

evaluated under applicable authorities in comparison to other feasible alternatives for restoring wetland, coastal and nearshore habitat and services injured by the *Deepwater Horizon* oil spill.

The PDARP/PEIS provides TIGs the option to prepare strategic restoration plans “to focus and sequence priorities within a Restoration Area” and to “consider resources at the ecosystem level, while implementing restoration at the local level.” (PDARP Section 7.3.1). In addition, the NRDA implementing regulations specifically allow trustees to consider the use of existing projects (15 CFR 990.56), such as those identified in the draft 2017 CMP. The Louisiana TIG is proposing that this Strategic Restoration Plan will focus on wetland, coastal, and nearshore habitat restoration type projects in the Barataria Basin restoration area because the PDARP/PEIS found that Barataria Basin experienced some of the heaviest and persistent oiling from the DWH spill and because the Basin supports very high primary and secondary production that contributes to the overall health of the northern Gulf of Mexico ecosystem.

The Louisiana TIG anticipates that the Strategic Restoration Plan for Barataria Basin will select for further funding and development most, if not all, of the remaining projects applicable under the “Wetlands, Coastal, and Nearshore Habitats” Restoration Type to be implemented in the Barataria Basin by the Louisiana TIG under the PDARP/PEIS. Developing such a strategic plan for much of Barataria Basin restoration for this Restoration Type will allow the Louisiana TIG to identify a suite of projects that, taken together, best achieve the “integrated ecosystem restoration” called for in Chapter 5 of the PDARP/PEIS. A decision in the strategic plan to fund further development of projects will not be a final decision by the Louisiana TIG to proceed with implementation of those projects. Information about the “Wetlands, Coastal, and Nearshore Habitats” Restoration Type as well as the OPA criteria against which projects will be evaluated can be found in the PDARP/PEIS.

The second action taken in this Notice is to inform the public of the Louisiana TIG Trustees’ initiation of restoration planning, which will include the preparation of a restoration plan (the Phase 2 Plan) that evaluates the Mid-Barataria Sediment Diversion project as a means of restoring injured wetland, coastal and nearshore resources and services in Barataria Basin to restore for injuries resulting from the *Deepwater Horizon* oil spill. The Louisiana TIG

began this restoration planning effort on March 28, 2017, by requesting project ideas from the public. At that time, the Louisiana TIG requested project ideas that could benefit wetlands, coastal, and nearshore habitats in the Barataria Basin, the estuary most heavily impacted by the DWH oil spill. That notice was published on the Louisiana TIG Web site: (<http://www.gulfspillrestoration.noaa.gov/restoration-areas/louisiana>).

The Mid-Barataria Sediment Diversion, a large-scale sediment diversion, is one of the projects proposed in the Draft 2017 CMP. While the Louisiana TIG Trustees have not yet decided to move forward with a restoration plan for a Mid-Barataria Sediment Diversion, the project currently is undergoing engineering and design and supplemental scoping for preparation of an EIS, led by the USACE based on permit applications submitted by the Louisiana Coastal Protection and Restoration Authority pursuant to the provisions of section 404 of the Clean Water Act, section 10 of the Rivers and Harbors Appropriation Act of 1899, and section 14 of the Rivers and Harbors Appropriation Act of 1899, as amended. To facilitate the potential consideration of this project under OPA, it is the intent of the state and Federal Louisiana TIG Trustees to assist the USACE in the preparation of the EIS for the Mid-Barataria Sediment Diversion. In addition, the Federal Louisiana TIG Trustees are cooperating agencies with the USACE for the preparation of that EIS. In a coordinated **Federal Register** notice, the USACE is issuing a supplemental Notice of Intent regarding the scope of the EIS for the project, including the potential for the EIS to inform a NRDA decision on restoration planning in which case the Louisiana TIG Trustees would adopt the EIS for such purposes. The Louisiana TIG is seeking to facilitate public involvement regarding the EIS, and encourages interested person and entities to submit comments in response to the USACE EIS process regarding the Mid-Barataria Sediment Diversion.

Next Steps

With regard to the Phase 1 Plan, the Louisiana TIG Trustees will proceed with consideration of whether a combination of projects in the Draft 2017 CMP provides a basis for a Strategic Restoration Plan for Barataria Basin.

With regard to the potential Phase 2 Plan, the Louisiana TIG Trustees will review all public input received as part of the USACE’s scoping process for the preparation of an EIS for the proposed

Mid-Barataria Sediment Diversion project as the Trustees work with the USACE to prepare an EIS that supports both the USACE regulatory decisions and OPA restoration planning decisions. The Louisiana TIG Trustees will additionally seek formal public involvement in the Phase 2 Draft Restoration Plan process in accordance with applicable federal regulations and consistent with the PDARP/PEIS.

Administrative Record

The documents included in the Administrative Record can be viewed electronically at the following location: <http://www.doi.gov/deepwaterhorizon/adminrecord>.

The Trustees opened a publicly available Administrative Record for the NRDA for the *Deepwater Horizon* oil spill, including restoration planning activities, concurrently with publication of the 2011 Notice of Intent (NOI) to Begin Restoration Scoping and Prepare a Gulf Spill Restoration Planning PEIS (pursuant to 15 CFR 990.45). The Administrative Record includes the relevant administrative records since its date of inception. This Administrative Record is actively maintained and available for public review.

Authority

The authority of this action is the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*) and the implementing NRDA regulations found at 15 CFR part 990 and NEPA (42 U.S.C. 4321 *et seq.*).

SUPPLEMENTARY INFORMATION:

Deletion

On 3/24/2017 (82 FR 15047), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletion from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the product listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.
2. The action may result in authorizing a small entity to furnish the product to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501-8506) in connection with the product deleted from the Procurement List.

End of Certification

Accordingly, the following product is deleted from the Procurement List:
