Vol. 82

Friday,

No. 81

April 28, 2017

Pages 19613–20240

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 82 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 82, No. 81

Friday, April 28, 2017

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2017–0322]

Drawbridge Operation Regulation; Hillsborough River, Tampa, FL

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the operation of the Hillsborough Bridge across the Hillsborough River, Tampa, Florida. This deviation is necessary to allow the bridge owner, Florida Department of Transportation to repair the Hillsborough Bridge. Due to the type of repairs this bridge will be required to remain closed to navigation until all components can be removed and replaced.

DATES: This deviation is effective from 7 a.m. on May 10, 2017, until 7 p.m. on June 21, 2017.

ADDRESSES: The docket for this deviation, [USCG–2017–0322] is available at <http://www.regulations.gov>. Type the docket number in the “SEARCH” box and click “SEARCH”. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Eddie Lawrence with the Seventh Coast Guard District Bridge Office; telephone 305–415–6946, email Eddie.H.Lawrence@uscg.mil.

SUPPLEMENTARY INFORMATION: Florida Department of Transportation, the bridge owner, has requested a temporary deviation from the operating schedule of the Hillsborough Bridge across the Hillsborough River, Tampa, Florida to conduct needed repairs. The Florida

Department of Transportation advised “the work is not an emergency but is needed now as the original counterweight cables from 1939 are at the end of their service life. It is not possible to remove the counterweight cables and keep the bridge in operation at the same time”; the Coast Guard has taken this into consideration prior to allowing this closure. This temporary deviation will impact navigation since no vessel with a height greater than 10 feet will be able to pass during this closure period. Not allowing the necessary bridge repairs will also have an impact to navigation. The current operating regulation is under 33 CFR 117.291.

Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass through the bridge in closed positions. The Coast Guard will also inform the users of the waterways through Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: April 24, 2017.

Barry Dragon,

Director, Bridge Branch, Seventh Coast Guard District.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[EPA–R03–OAR–2016–0053; FRL–9961–37–Region 3]

Approval and Promulgation of Air Quality Plans; State of Maryland; Control of Emissions From Existing Hospital/Medical/Infectious Waste Incineration Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a revised section 111(d)/129 plan submitted by the State of Maryland for existing hospital/medical/infectious waste incineration (HMIWI) units. The section 111(d)/129 plan contains revisions to a previously-approved State plan for existing HMIWI units that was submitted as a result of the October 6, 2009 promulgation of federal new source performance standards (NSPS) and emission guidelines for HMIWI units, which were subsequently amended on April 4, 2011. This action is being taken under sections 111(d) and 129 of the Clean Air Act (CAA).

DATES: This final rule is effective on May 30, 2017.

ADDRESSES: EPA has established a docket for this action under Docket ID Number EPA–R03–OAR–2016–0053. All documents in the docket are listed on the <https://www.regulations.gov> Web site. Although listed in the index, some information is not publicly available, e.g., confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Mike Gordon, (215) 814–2039, or by email at gordon.mike@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On November 28, 2016 (81 FR 85457), EPA published a notice of proposed rulemaking (NPR) for the State of Maryland. In the NPR, EPA proposed approval of Maryland’s revised CAA section 111(d)/129 State plan for existing HMIWI units. The formal State plan revision (MD Submittal #12–11) was submitted by Maryland on January 10, 2013.

II. Summary of SIP Revision

EPA has reviewed the revised Maryland section 111(d)/129 plan submittal in the context of the

requirements of 40 CFR part 60, subparts B, Ec and Ce, and part 62, subpart A. EPA has determined that the submitted revised section 111(d)/129 plan meets the above-cited requirements for State plans for existing units covered by the emission guidelines for that source category. Thus, EPA is approving Maryland's State plan in this action. A detailed explanation of the rationale behind this approval is available in the July 22, 2016 technical support document (TSD) and in the NPR and will not be restated here. No comments were received on the proposed rule.

III. Final Action

EPA is approving the revised Maryland section 111(d)/129 plan for HMIWI units submitted pursuant to 40 CFR part 60, subpart Ce because the plan is at least as stringent as requirements in 40 CFR part 60, subpart Ce for existing HMIWI units. Therefore, EPA is amending 40 CFR part 62, subpart V to reflect this approval action. The scope of the approval of the section 111(d)/129 plan is limited to the provisions of 40 CFR parts 60 and 62 for existing HMIWI units, as referenced in the emission guidelines at 40 CFR part 60, subpart Ce.

As discussed in the NPR, the EPA Administrator continues to retain authority for several tasks affecting the regulation of HMIWI units, as stipulated in 40 CFR 60.32e(k) and 60.50c(i). This retention of authority includes the granting of waivers for performance tests.

IV. Statutory and Executive Order Reviews

A. General Requirements

In reviewing section 111(d)/129 plan submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely

affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this final rule for existing HMIWI units within the State of Maryland does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the section 111(d)/129 plan is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 27, 2017. Filing a petition for reconsideration by the

Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action approving Maryland's CAA Section 111(d)/129 state plan for existing HMIWI units may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 62

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: March 24, 2017.

Cecil Rodrigues,

Acting Regional Administrator, Region III.

40 CFR part 62 is amended as follows:

PART 62—APPROVAL AND PROMULGATION OF STATE PLANS FOR DESIGNATED FACILITIES AND POLLUTANTS

- 1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart V—Maryland

- 2. Revise § 62.5160 to read as follows:

§ 62.5160 Identification of plan.

(a) Section 111(d)/129 plan for HMIWIs and the associated Code of Maryland (COMAR) 26.11.08 regulations, as submitted on April 14, 2000.

(b) Section 111(d)/129 plan for HMIWIs and the associated Code of Maryland (COMAR) regulations, as submitted on January 10, 2013.

- 3. Revise § 62.5161 to read as follows:

§ 62.5161 Identification of sources.

(a) The plan submitted on April 14, 2000 applies to all existing HMIWIs located in Maryland for which construction was commenced on or before June 20, 1996.

(b) The January 10, 2013 submittal applies to all existing HMIWIs as defined in the approved Maryland Section 111(d)/129 plan.

- 4. Revise § 62.5162 to read as follows:

§ 62.5162 Effective date.

(a) The effective date of the plan submitted on April 14, 2000 is October 20, 2000.

(b) The effective date of the plan submitted on January 10, 2013 is May 30, 2017.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[WC Docket No. 13-39; FCC 13-135; FCC 14-175]

Rural Call Completion Recordkeeping and Reporting Requirements; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: The Federal Communications Commission (Commission) published a document in the **Federal Register** on March 4, 2015, concerning its rural call completion recordkeeping and reporting requirements. That document inadvertently omitted reference to the *Order on Reconsideration (Reconsideration Order)* WC Docket No. 13-39, FCC 14-175, which adopted minor amendments to those requirements. This document corrects that error.

DATES: This correction is effective April 28, 2017.

FOR FURTHER INFORMATION CONTACT: Nirali Patel, Wireline Competition Bureau, Competition Policy Division, (202) 418-7830, or send an email to nirali.patel@fcc.gov.

SUPPLEMENTARY INFORMATION: This document makes the following corrections to the Commission's final rule, FR Doc. No. 2015-04415, published on March 4, 2015, at 80 FR 11594:

1. On page 115494, in the heading of the rule, add “; FCC 14-175” after “FCC 13-135”.

2. On page 11594, in the **SUMMARY** section, in the first sentence, add “and the Commission's *Order on Reconsideration (Reconsideration Order)* WC Docket No. 13-39, FCC 14-175.” to the end of the sentence.

3. On page 11594, in the **DATES** section, add “and the amendments to 47 CFR 64.2101, 64.2103, and 64.2105, published at 79 FR 73227, December 10, 2014, and corrected at 80 FR 1007, January 8, 2015,” after “December 17, 2013” and before “are effective on March 4, 2015.”

4. On page 11594, in the

SUPPLEMENTARY INFORMATION section:

i. In the first sentence, add “and the Commission's *Reconsideration Order*,

FCC 14-175, published at 79 FR 73227, December 10, 2014, and corrected at 80 FR 1007, January 8, 2015.” to the end of the sentence;

ii. In the third sentence, add “, and paragraph 66 of document WC Docket No. 13-39, FCC 14-175.” to the end of the sentence; and

iii. In the third column, under the heading “Needs and Uses,” add the following two sentences between the twelfth and thirteenth sentences: “On November 13, 2014, the Commission adopted a *Reconsideration Order* in WC Docket No. 13-39, FCC 14-175, 79 FR 73227, corrected at 80 FR 1007, Rural Call Completion. The *Reconsideration Order* reduced the burden on covered providers by excluding certain traffic from the reporting and retention requirements adopted in the *Order*.”

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

National Oceanic and Atmospheric Administration

50 CFR Part 635

[Docket No. 150121066-5717-02]

RIN 0648-XF346

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason Angling category retention limit adjustment.

SUMMARY: NMFS has determined that the Atlantic bluefin tuna (BFT) daily retention limit that applies to vessels permitted in the Highly Migratory Species (HMS) Angling category and the HMS Charter/Headboat category (when fishing recreationally for BFT) should be adjusted for the remainder of 2017, based on consideration of the regulatory determination criteria regarding inseason adjustments. NMFS is adjusting the Angling category BFT daily retention limit to two school BFT and one large school/small medium BFT per vessel per day/trip for private vessels (*i.e.*, those with HMS Angling category permits); and three school BFT and one large school/small medium BFT per vessel per day/trip for charter

vessels (*i.e.*, those with HMS Charter/Headboat permits when fishing recreationally). These retention limits are effective in all areas, except for the Gulf of Mexico, where NMFS prohibits targeted fishing for BFT.

DATES: Effective May 1, 2017 through December 31, 2017.

FOR FURTHER INFORMATION CONTACT:

Sarah McLaughlin or Brad McHale, 978-281-9260.

SUPPLEMENTARY INFORMATION:

Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing categories, per the allocations established in the 2006 Consolidated Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006) and amendments, and in accordance with implementing regulations. NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota.

As a method for limiting fishing mortality on juvenile BFT, ICCAT recommends a tolerance limit on the annual harvest of BFT measuring less than 115 cm (straight fork length) to no more than 10 percent by weight of a Contracting Party's total BFT quota. Any overharvest of such tolerance limit from one year must be subtracted from the tolerance limit applicable in the next year or the year after that. The United States implements this provision by limiting the harvest of school BFT (measuring 27 to less than 47 inches) as appropriate to not exceed the 10-percent limit.

The currently codified baseline U.S. quota is 1,058.9 mt (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area). See § 635.27(a). The currently codified Angling category quota is 195.2 mt (108.4 mt for school BFT, 82.3 mt for large school/small medium BFT, and 4.5 mt for large medium/giant BFT).

The 2017 BFT fishing year, which is managed on a calendar-year basis and subject to an annual calendar-year

quota, began January 1, 2017. The Angling category season opened January 1, 2017, and continues through December 31, 2017. The size classes of BFT are summarized in Table 1. Please note that large school and small medium BFT traditionally have been

managed as one size class, as described below, *i.e.*, a limit of one large school/small medium BFT (measuring 47 to less than 73 inches). Currently, the default Angling category daily retention limit of one school, large school, or small medium BFT applies

(§ 635.23(b)(2)). This retention limit applies to HMS Angling and to HMS Charter/Headboat category permitted vessels (when fishing recreationally for BFT).

TABLE 1—BFT SIZE CLASSES

Size class	Curved fork length
School	27 to less than 47 inches (68.5 to less than 119 cm).
Large school	47 to less than 59 inches (119 to less than 150 cm).
Small medium	59 to less than 73 inches (150 to less than 185 cm).
Large medium	73 to less than 81 inches (185 to less than 206 cm).
Giant	81 inches or greater (206 cm or greater).

Table 2 summarizes the recreational quota, subquotas, landings, and

retention limit information for 2015 and 2016, by size class.

TABLE 2—ANGLING CATEGORY QUOTAS (mt), ESTIMATED LANDINGS (mt), AND DAILY RETENTION LIMITS, 2015–2016

Size class	2015			2016		
	Subquotas and total quota (mt)	Landings (mt)	Amount of subquotas and total quota used (percent)	Subquotas and total quota (mt)	Landings (mt)	Amount of subquotas and total quota used (percent)
School	108.4	26.2	24	108.4	40.3	37
Large School/Small Medium	82.3	80.2	97	82.3	96.8	118
Trophy: Large Medium/Giant	4.5	6.7	149	4.5	5.9	131
Total	195.2	113.1	58	195.2	143	73
Daily Retention Limits (per Vessel)	<i>January 1 through May 14:</i> 1 school, large school, or small medium (default)			<i>January 1 through April 22:</i> 1 school, large school, or small medium (default)		
	<i>May 15 through December 31</i> (80 FR 27863, May 15, 2015):			<i>April 23 through December 31</i> (81 FR 23438, April 21, 2016):		
	<i>Private boats:</i> 1 school and 1 large school/small medium			<i>Private boats:</i> 2 school and 1 large school/small medium		
	<i>Charter/Headboats:</i> 2 school and 1 large school/small medium			<i>Charter/Headboats:</i> 3 school and 1 large school/small medium		

Adjustment of Angling Category Daily Retention Limit

Under § 635.23(b)(3), NMFS may increase or decrease the Angling category retention limit for any size class of BFT after considering regulatory determination criteria provided under § 635.27(a)(8). Recreational retention limits may be adjusted separately for specific vessel type, such as private vessels, headboats, or charter vessels.

NMFS has considered all of the relevant determination criteria and their applicability to the change in the Angling category retention limit. The criteria and their application are discussed below.

NMFS considered the usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of

the stock (§ 635.27(a)(8)(i)). Biological samples collected from BFT landed by recreational fishermen continue to provide NMFS with valuable parts and data for ongoing scientific studies of BFT age and growth, migration, and reproductive status. Additional opportunity to land BFT would support the collection of a broad range of data for these studies and for stock monitoring purposes.

NMFS considered the catches of the Angling category quota to date and the likelihood of closure of that segment of the fishery if no adjustment is made (§ 635.27(a)(8)(ii)). NMFS anticipates that the full 2017 Angling category quota would not be harvested under the default retention limit. As shown in Table 2, Angling category landings were approximately 58 and 73 percent of the

184.3-mt annual Angling category quota in 2015 and 2016, respectively.

NMFS also considered the effects of the adjustment on bluefin tuna rebuilding and overfishing and the effects of the adjustment on accomplishing the objectives of the FMP (§ 635.27(a)(8)(v) and (vi)). These retention limits would be consistent with the quotas established and analyzed in the bluefin tuna quota final rule (80 FR 52198, August 28, 2015), and with objectives of the 2006 Consolidated HMS FMP and amendments, and is not expected to negatively impact stock health or to affect the stock in ways not already analyzed in those documents. It is also important that we limit landings to the subquotas both to adhere to the FMP quota allocations and to ensure that

landings are as consistent as possible with the pattern of fishing mortality (e.g., fish caught at each age) that was assumed in the projections of stock rebuilding.

Another principal consideration in setting the retention limit is the objective of providing opportunities to harvest the full Angling category quota without exceeding it based on the goals of the 2006 Consolidated HMS FMP and amendments, including to achieve optimum yield on a continuing basis and to optimize the ability of all permit categories to harvest their full BFT quota allocations (related to § 635.27(a)(8)(x)).

The 2016 school bluefin tuna landings represent 3.7 percent of the total U.S. quota for 2016, well under the ICCAT recommended 10-percent limit. Landings of school bluefin tuna in 2015 represented 2.4 percent of the total U.S. quota for 2015. Given that the Angling category landings fell short of the available quota and considering the regulatory criteria above, NMFS has determined that the Angling category retention limit applicable to participants on HMS Angling and HMS Charter/Headboat category permitted vessels should be adjusted upwards from the default level. NMFS has also concluded that implementation of separate limits for private and charter/headboat vessels remains appropriate, recognizing the different nature, socio-economic needs, and recent landings results of the two components of the recreational BFT fishery. For example, charter operators historically have indicated that a multi-fish retention limit is vital to their ability to attract customers. In addition, Large Pelagics Survey estimates indicate that charter/headboat BFT landings averaged approximately 30 percent of recent recreational landings for 2015 through 2016, with the remaining 70 percent landed by private vessels.

Therefore, for private vessels (*i.e.*, those with HMS Angling category permits), this action adjusts the limit upwards to two school BFT and one large school/small medium BFT per vessel per day/trip (*i.e.*, two BFT measuring 27 to less than 47 inches, and one BFT measuring 47 to less than 73 inches). For charter vessels (*i.e.*, those with HMS Charter/Headboat permits), this action adjusts the limit upwards to three school BFT and one large school/small medium BFT per vessel per day/trip when fishing recreationally for BFT (*i.e.*, three BFT measuring 27 to less than 47 inches, and one BFT measuring 47 to less than 73 inches). These retention limits are effective in all areas, except for the Gulf of Mexico, where NMFS prohibits targeted fishing for

BFT. Regardless of the duration of a fishing trip, the daily retention limit applies upon landing. For example, whether a private vessel (fishing under the Angling category retention limit) takes a two-day trip or makes two trips in one day, the day/trip limit of two school BFT and one large school/small medium BFT applies and may not be exceeded upon landing.

NMFS anticipates that the BFT daily retention limits in this action will result in landings during 2017 that would not exceed the available subquotas. Lower retention limits could result in substantial underharvest of the codified Angling category subquota, and increasing the daily limits further may risk exceeding the available quota, contrary to the objectives of the 2006 Consolidated HMS FMP and amendments. NMFS is not setting higher school BFT limit for private and charter vessels due to the potential risk of exceeding the ICCAT tolerance limit on school BFT and other considerations, such as potential effort shifts to BFT fishing as a result of current, reduced recreational retention limits for New England groundfish and striped bass. NMFS will monitor 2017 landings closely and will make further adjustments, including closure if necessary, with an inseason action if warranted.

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely through the mandatory landings and catch reports. HMS Charter/Headboat and Angling category vessel owners are required to report the catch of all BFT retained or discarded dead, within 24 hours of the landing(s) or end of each trip, by accessing hmspermits.noaa.gov or by using the Android or iPhone app. Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional retention limit adjustments or closures are necessary to ensure available quota is not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. Subsequent actions, if any, will be published in the **Federal Register**. In addition, fishermen may call the Atlantic Tunas Information Line at (978) 281-9260, or access hmspermits.noaa.gov, for updates on quota monitoring and inseason adjustments.

HMS Angling and HMS Charter/Headboat category permit holders may catch and release (or tag and release) BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs at § 635.26. Anglers are also reminded that

all BFT that are released must be handled in a manner that will maximize survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the "Careful Catch and Release" brochure available at www.nmfs.noaa.gov/sfa/hms/.

Classification

The Assistant Administrator for NMFS (AA) finds that it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on, this action for the following reasons:

The regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Affording prior notice and opportunity for public comment to implement the daily retention limit for the remainder of 2017 at this time is impracticable. Based on available BFT quotas, fishery performance in recent years, and the availability of BFT on the fishing grounds, immediate adjustment to the Angling category BFT daily retention limit from the default levels is warranted to allow fishermen to take advantage of the availability of fish and of quota. NMFS could not have proposed these actions earlier, as it needed to consider and respond to updated data and information from the 2016 Angling category fishery. If NMFS was to offer a public comment period now, after having appropriately considered that data, it would preclude fishermen from harvesting BFT that are legally available consistent with all of the regulatory criteria, and/or could result in selection of a retention limit inappropriately high or low for the amount of quota available for the period.

Fisheries under the Angling category daily retention limit are currently underway and thus prior notice would be contrary to the public interest. Delays in increasing daily recreational BFT retention limit would adversely affect those HMS Angling and Charter/Headboat category vessels that would otherwise have an opportunity to harvest more than the default retention limit of one school, large school, or small medium BFT per day/trip and may exacerbate the problem of low catch rates and quota rollovers. Analysis of available data shows that adjustment to the BFT daily retention limit from the default level would result in minimal

risks of exceeding the ICCAT-allocated quota. NMFS provides notification of retention limit adjustments by publishing the notice in the **Federal Register**, emailing individuals who have subscribed to the Atlantic HMS News electronic newsletter, and updating the information posted on the Atlantic Tunas Information Line and on hmspermits.noaa.gov. Therefore, the AA finds good cause under 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment. For these reasons, there also is good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

This action is being taken under § 635.23(b)(3), and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: April 26, 2017.

Karen H. Abrams,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 170104016-7016-01]

RIN 0648-XF138

Magnuson-Stevens Act Provisions; Fisheries of the Northeastern United States; Northeast Multispecies Fishery; 2017 and 2018 Sector Operations Plans and 2017 Allocation of Northeast Multispecies Annual Catch Entitlements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Interim final rule.

SUMMARY: We have approved sector operations plans for fishing years 2017 and 2018, granting regulatory exemptions for fishing years 2017 and 2018, and providing Northeast multispecies annual catch entitlements to approved sectors for fishing year 2017. Approval of sector operations plans is necessary to allocate annual catch entitlements to the sectors and for the sectors to operate. The Northeast Multispecies Fishery Management Plan allows limited access permit holders to form sectors, and requires sectors to submit their operations plans and contracts to us, NMFS, for approval or

disapproval. This interim final rule approves sector operations plans, grants regulatory exemptions for sectors, and provides preliminary allocations of annual catch entitlements to sectors for the start of the 2017 fishing year. Changes to exemptions and updates to sector annual catch entitlements may be considered in subsequent rulemakings.

DATES: Sector operations plans and regulatory exemptions are effective May 1, 2017, through April 30, 2019. Northeast multispecies annual catch entitlements for sectors are effective May 1, 2017, through April 30, 2018. The default catch limit for Eastern Georges Bank cod is effective May 1, 2017, through July 31, 2017, or until the final rule for Framework 56 is implemented if prior to July 31, 2017. Written comments must be received on or before May 30, 2017.

ADDRESSES: You may submit comments on this document, identified by NOAA-NMFS-2017-0016, by either of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#/docketDetail;D=NOAA-NMFS-2017-0016, click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.
- **Mail:** Submit written comments to Kyle Molton, 55 Great Republic Drive, Gloucester, MA 01930.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

Copies of each sector's final operations plan and contract are available from the NMFS Greater Atlantic Regional Fisheries Office: John K. Bullard, Regional Administrator, National Marine Fisheries Service, 55 Great Republic Drive, Gloucester, MA 01930. These documents are also accessible via the Federal eRulemaking Portal: <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Kyle Molton, Fishery Management Specialist, (978) 281-9236. To review **Federal Register** documents referenced in this

rule, you can visit: <http://www.greateratlantic.fisheries.noaa.gov/sustainable/species/multispecies>.

SUPPLEMENTARY INFORMATION:

Background

Amendment 13 to the Northeast (NE) Multispecies Fishery Management Plan (FMP) (69 FR 22906; April 27, 2004) established a process for forming sectors within the NE multispecies (groundfish) fishery, and Amendment 16 to the FMP (74 FR 18262; April 9, 2010), followed by Framework Adjustment 45 to the FMP (76 FR 23042; April 25, 2011) and Framework 48 to the FMP (78 FR 26118; May 3, 2013), expanded and revised sector management.

The FMP defines a sector as "[a] group of persons (three or more persons, none of whom have an ownership interest in the other two persons in the sector) holding limited access vessel permits who have voluntarily entered into a contract and agree to certain fishing restrictions for a specified period of time, and which has been granted a TAC(s) [*sic*] in order to achieve objectives consistent with applicable FMP goals and objectives." Sectors are self-selecting, meaning each sector can choose its members.

The NE multispecies sector management system allocates a portion of the NE multispecies stocks to each sector. These annual sector allocations are known as annual catch entitlements (ACEs) and are based on the collective fishing history of a sector's members. Sectors may receive allocations of large-mesh NE multispecies stocks with the exception of Atlantic halibut, windowpane flounder, Atlantic wolffish, and ocean pout, which are non-allocated species. The ACEs are a portion of a stock's annual catch limit (ACL) available to commercial NE multispecies vessels within a sector. A sector determines how to harvest its ACEs and may decide to limit operations to fewer vessels.

Because sectors elect to receive an allocation under a quota-based system, the FMP grants sector vessels several "universal" exemptions from the FMP's effort controls. These universal exemptions apply to: Trip limits on allocated stocks; the Georges Bank (GB) Seasonal Closure Area; NE multispecies days-at-sea (DAS) restrictions; the requirement to use a 6.5-inch (16.5-cm) mesh codend when fishing with selective gear on GB; portions of the Gulf of Maine (GOM) Cod Protection Closures; and the at-sea monitoring (ASM) coverage level for sector vessels fishing exclusively in the Southern New England (SNE) and Inshore GB Broad Stock Areas (BSA) with extra-large mesh

gillnets (10-inch [25.4-cm] or greater). The FMP prohibits sectors from requesting exemptions from permitting restrictions, gear restrictions designed to minimize habitat impacts, and most reporting requirements.

We received operations plans and preliminary contracts for fishing years 2017 and 2018 from 19 sectors. The operations plans are similar to previously approved versions and cover two fishing years. Continuing to approve two-year sector operations plans will help streamline the process for sector managers and reduce administrative burdens for both sectors and NMFS. In addition to the approved sectors, there are several state-operated permit banks, which receive allocation based on the history of the permits owned by the states. The final rule implementing Amendment 17 to the FMP allowed a state-operated permit bank to receive an allocation without needing to comply with the administrative and procedural requirements for sectors (77 FR 16942; March 23, 2012). Instead, permit banks are required to submit a list of participating permits to us, as specified in the permit bank's Memorandum of Agreement, to determine the ACE allocated to the permit bank. These allocations may be leased to fishermen enrolled in sectors. Although state-operated permit banks are no longer approved through the sector approval process, they are included in this discussion of allocations because they contribute to the total allocation under the sector system.

We have determined that the 19 sector operations plans and contracts that we have approved, and 21 of the 26

regulatory exemptions requested, are consistent with the FMP's goals and objectives, and meet sector requirements outlined in the regulations at § 648.87. These 19 operations plans are similar to previously approved plans. Copies of the operations plans and contracts, and the environmental assessment (EA), are available at: <http://www.regulations.gov> and from NMFS (see ADDRESSES).

Default Catch Limits for Fishing Year 2017

Last year, Framework 55 (81 FR 26412; May 2, 2016) set fishing year 2017 catch limits for all groundfish stocks. The 2017 catch limits for most stocks remain the same as, or similar, to 2016 limits, with minor adjustments for projected stock growth or revised estimates of Canadian catch. Framework 55 did not, however, specify a 2017 catch limit for Eastern GB cod, which is a management unit of the GB cod stock that is jointly managed with Canada. In addition, the Northeast Fisheries Science Center conducted a new benchmark assessment for witch flounder in December 2016.

This year, in Framework 56, the Council adopted a new 2017 catch limit for witch flounder based on the 2016 benchmark assessment, as well as 2017 catch limits for the three U.S./Canada stocks (Eastern GB cod, Eastern GB haddock, and GB yellowtail flounder). We are working to publish a proposed rule to request comments on the Framework 56 measures. Given the timing of the 2016 witch flounder stock assessment, the development and submission of Framework 56 was delayed, and it will not be possible to implement Framework 56 measures in time for May 1, 2017.

As a result, this rule sets a default catch limit for Eastern GB cod to prevent disruption to the groundfish fishery. The default catch limit for Eastern GB cod is set at 35 percent of the previous year's (2016) catch limit. This rule also announces the 2017 catch limits that will be effective on May 1, 2017, including the sector and common pool allocations based on the preliminary fishing year 2017 sector rosters (Table 1). The default catch limit for Eastern GB cod would be effective from May 1, 2017, through July 31, 2017, or the date on which the final rule for Framework 56 is implemented if prior to July 31. The catch limits for GB cod, GB haddock, GB yellowtail flounder, and witch flounder would be replaced once Framework 56 is implemented.

In Framework 56, the Council recommended a 23-percent decrease for GB yellowtail flounder for fishing year 2017 compared to 2016, and compared to the fishing year 2017 catch limit previously set in Framework 55. The recommended decrease is based on the Transboundary Management Guidance Committee's recommendation, which is the joint U.S./Canada management body that meets annually to recommend shared quotas for the three transboundary stocks. This recommendation will be further discussed in the Framework 56 proposed rule. We are highlighting this proposed decrease to sectors in this rule because the GB yellowtail flounder sector allocation issued in this rule is based on the higher 2017 catch limit previously approved in Framework 55.

BILLING CODE 3510-22-C

Sector Allocations

Based on preliminary sector rosters submitted on March 20, 2017, we have projected fishing year 2017 allocations in this final rule. All permits enrolled in a sector, and the vessels associated with those permits, have until April 30, 2017, to withdraw from a sector and fish in the common pool for fishing year 2017. For fishing year 2018, we will set similar roster deadlines, notify permit holders of the fishing year 2018 deadlines, and allow permit holders to change sectors separate from the annual sector operations plans approval process.

We calculate the sector's allocation for each stock by summing its members' potential sector contributions (PSC) for a stock and then multiplying that total percentage by the available commercial sub-ACL for that stock. Table 2 shows the projected total PSC for each sector by stock for fishing year 2017. Tables 3 and 4 show the initial allocations that each sector will be allocated, in pounds and metric tons, respectively, for fishing

year 2017, based on their preliminary fishing year 2017 rosters. At the start of the fishing year, we provide the final allocations, to the nearest pound, to the individual sectors, and we use those final allocations to monitor sector catch. The common pool sub-ACLs are also included in each of these tables for comparison.

We do not assign a permit separate PSCs for the Eastern GB cod or Eastern GB haddock; instead, we assign each permit a PSC for the GB cod stock and GB haddock stock. Each sector's GB cod and GB haddock allocations are then divided into an Eastern ACE and a Western ACE, based on each sector's percentage of the GB cod and GB haddock ACLs. For example, if a sector is allocated 4 percent of the GB cod ACL and 6 percent of the GB haddock ACL, the sector is allocated 4 percent of the commercial Eastern U.S./Canada Area GB cod total allowable catch (TAC) and 6 percent of the commercial Eastern U.S./Canada Area GB haddock TAC as its Eastern GB cod and haddock ACEs. These amounts are then subtracted from

the sector's overall GB cod and haddock allocations to determine its Western GB cod and haddock ACEs. A sector may only harvest its Eastern GB cod and haddock ACEs in the Eastern U.S./Canada Area, but may "convert," or transfer, its Eastern GB cod or haddock allocation into Western GB allocation and fish that converted ACE outside the Eastern GB area.

We expect to finalize 2016 catch information in summer 2017. We will allow sectors to transfer fishing year 2016 ACE for 2 weeks upon our completion of year-end catch accounting to reduce or eliminate any fishing year 2016 overages. If necessary, we will reduce any sector's fishing year 2017 allocation to account for a remaining overage in fishing year 2016. We will follow the same process for fishing year 2018. Each year of the operations plans, we will notify the Council and sector managers of this deadline in writing and will announce this decision on our Web site at: <http://www.greateratlantic.fisheries.noaa.gov/>.

*The data in this table are based on preliminary fishing year 2017 sector rosters.

#Numbers are rounded to the nearest metric ton, but allocations are made in pounds. In some cases, this table shows a sector allocation of 0 metric tons, but that sector may be allocated a small amount of that stock in pounds.

^ The data in the table represent the total allocations to each sector.

BILLING CODE 3510-22-C

Sector Operations Plans and Contracts*Approved Sectors*

As previously stated, we received and are approving 19 sector operations plans and contracts for fishing years 2017 and 2018. In order to approve a sector's operations plan for fishing years 2017 and 2018, we consider whether a sector has been compliant with reporting requirements from previous years, including the year-end reporting requirements found at § 648.87(b)(1)(vi)(C). Approved operations plans, provided on our Web site as a single document for each sector, not only contain the rules under which each sector would fish, but also provide the legal contract that binds each member to the sector for the length of the sector's operations plan. Each sector's operations plan, and each sector's members, must comply with the regulations governing sectors, found at § 648.87. In addition, each sector must conduct fishing activities as detailed in its approved operations plan.

Participating vessels are required to comply with all pertinent Federal fishing regulations, except as specifically exempted in the letter of authorization (LOA) issued by the Regional Administrator, which details any approved sector exemptions from the regulations. If, during a fishing year, or between fishing years 2017 and 2018, a sector requests an exemption that we have already granted, or proposes a change to administrative provisions, we may amend the sector operations plans. Should any such amendments require modifications to LOAs, we would include these changes in updated LOAs and provide them to the appropriate sectors.

As in previous years, we retain the right to revoke exemptions in-season if: We determine that the exemption jeopardizes management measures, objectives, or rebuilding efforts; the exemption results in unforeseen negative impacts on other managed fish stocks, habitat, or protected resources; the exemption causes enforcement concerns; catch from trips utilizing the exemption cannot adequately be monitored; or a sector is not meeting certain administrative or operational requirements. If it becomes necessary to revoke an exemption, we will do so through a process consistent with the Administrative Procedure Act.

Each sector is required to ensure that it does not exceed its ACE during the fishing year. Sector vessels are required to retain all legal-sized allocated NE multispecies stocks, unless a sector is granted an exemption allowing its member vessels to discard legal-sized unmarketable fish at sea. Catch (defined as landings and dead discards) of all allocated NE multispecies stocks by a sector's vessels count against the sector's allocation. Catch from a sector trip targeting dogfish, monkfish, skate, and lobster (with non-trap gear) would be deducted from the sector's ACE because these are groundfish trips using gear capable of catching groundfish. This includes trips that have declared into the small-mesh exemption described below, because vessels fishing under this sector exemption, (*i.e.*, vessels fishing with both small mesh and large mesh during the same trip) are considered to be on a sector trip for purposes of monitoring ACE. Catch from a non-sector trip in an exempted fishery does not count against a sector's allocation and is assigned to a separate ACL sub-component to account for any

groundfish bycatch that occurs in non-groundfish fisheries.

In fishing years 2010 and 2011, we funded an ASM program with a target ASM coverage level of 30 percent of all trips. In addition, we provided 8-percent observer coverage through the Northeast Fishery Observer Program (NEFOP), which helps to support the Standardized Bycatch Reporting Methodology (SBRM) and stock assessments. This resulted in an overall target coverage level of 38 percent for fishing years 2010 and 2011, between ASM and NEFOP. Beginning in fishing year 2012, we have conducted an annual analysis to determine the total target coverage level. Industry has been required to pay for their costs of ASM coverage since 2012, while we continued to fund NEFOP coverage. However, we were able to fund the industry's portion of ASM costs and NEFOP coverage in fishing years 2012 through most of 2015. Industry began paying for their portion of the ASM program in March 2016. In June 2016, after determining that the SBRM monitoring program could be fully funded, NOAA Fisheries announced that we had remaining funds to offset some of industry's costs of the groundfish ASM program in 2016. We provided a grant to the Atlantic States Marine Fisheries Commission (ASMFC) to reimburse sectors for 85 percent of their costs for at-sea monitoring. We expect that there will be funds remaining in the grant to the ASMFC at the end of the 2016 fishing year that will be available to reimburse sectors for a portion of their ASM costs in fishing year 2017. We have not yet determined the reimbursement rate for 2017. However, it may be lower than 85 percent. Table 5 shows the target coverage level in previous fishing years.

TABLE 5—HISTORIC TARGET COVERAGE LEVEL FOR MONITORING

Fishing year	Total target coverage level (%)	ASM target coverage level (%)	NEFOP target coverage level (%)
2010	38	30	8
2011	38	30	8
2012	25	17	8
2013	22	14	8
2014	26	18	8
2015	16	12	4
2016	14	10	4

Sectors are responsible for paying the at-sea portion of costs associated with the sector ASM program and for designing, implementing, and funding an ASM program that will provide the level of ASM coverage specified

annually. We are required to specify a level of ASM coverage using a process described in Framework 55 that attempts to balance minimizing the cost burden to sectors and NMFS to the extent practicable, while still providing

a reliable estimate of overall catch by sectors needed for monitoring ACEs and ACLs. Using this method, NMFS has determined that the total appropriate target coverage level for fishing year 2017 is 16 percent of all eligible sector

trips. Federally-funded observer coverage provided by NEFOP to meet SBRM will partially satisfy the 16-percent coverage requirement, so sectors will pay for ASM coverage on less than 16 percent of their groundfish trips. We will use discards derived from these observed and monitored trips to calculate and apply discards to unobserved sector trips. We have published a more detailed summary of the supporting information, explanation and justification for this decision at: http://www.greateratlantic.fisheries.noaa.gov/ro/fso/reports/Sectors/ASM/FY2017_Multispecies_Sector_ASM_Requirements_Summary.pdf.

The draft operations plans submitted in September 2016 included industry-funded ASM plans to be used for fishing year 2017. As in previous years, we gave sectors the option to design their own programs in compliance with regulations, or elect to adopt the NMFS-designed ASM program that we have used in previous fishing years. As in past years, several sectors chose to adopt the NMFS-designed program while others proposed programs of their own design. Sector-designed ASM programs for fishing years 2017 and 2018 were similar to those approved in past years. We reviewed all sector-proposed ASM programs for consistency with ASM requirements and have approved them. ASM programs proposed by the sectors are described in detail later in this final rule.

Each sector contract details the method for initial ACE sub-allocation to sector members. For fishing years 2017 and 2018, each sector has proposed that each sector member could harvest an amount of fish equal to the amount each individual member's permit contributed to the sector, as modified by the sector for reserves or other management measures. Each sector operations plan submitted for fishing years 2017 and 2018 states that the sector would withhold an initial reserve from the sector's ACE sub-allocation to each individual member to prevent the sector from exceeding its ACE. A sector and sector members can be held jointly and severally liable for ACE overages, discarding legal-sized fish, and/or misreporting catch (landings or discards). Each sector contract provides procedures for enforcement of the

sector's rules, explains sector monitoring and reporting requirements, provides sector managers with the authority to issue stop fishing orders to sector members who violate provisions of the operations plan and contract, and presents a schedule of penalties that managers may levy for sector plan violations.

Sectors are required to monitor their allocations and catch. To help ensure that a sector does not exceed its ACE, each sector operations plan explains sector monitoring and reporting requirements, including a requirement to submit weekly catch reports to us. If a sector reaches an ACE threshold (specified in the operations plan), the sector must provide us with sector allocation usage reports on a daily basis. Once a sector's allocation for a particular stock is caught, that sector is required to cease all sector fishing operations in that stock area until it acquires more ACE, likely by an ACE transfer between sectors. Within 60 days of when we complete year-end catch accounting, each sector is required to submit an annual report detailing the sector's catch (landings and discards), enforcement actions, and pertinent information necessary to evaluate the biological, economic, and social impacts of each sector.

Future Consideration of 2017 Sector Operations

An ongoing case, *United States v. Carlos Rafael*, may affect sector operations for the 2017 fishing year. On March 30, 2017, Carlos Rafael pleaded guilty to federal criminal charges involving falsely reporting catch information on dealer reports and vessel trip reports. All of the vessels involved were enrolled in NEFS 9 during the period of misreporting, are currently enrolled in the sector for fishing year 2016, and are on the preliminary sector roster for fishing year 2017. Sentencing for these violations is currently scheduled for June 27, 2017, and may provide additional information that could affect sector operations. Because the case is ongoing, we are approving the NEFS 9 operations plan at this time. However, we intend to take into account additional information regarding NEFS 9 operations as it becomes available and take further action, as necessary, including consideration of further

management or monitoring requirements and continued approval of the sector.

Granted Exemptions for Fishing Years 2017 and 2018

Previously Granted Exemptions Granted for Fishing Years 2017 and 2018 (1–20)

We are granting exemptions from the following requirements for fishing years 2017 and 2018, all of which have been requested and granted in previous years: (1) 120-day block out of the fishery required for Day gillnet vessels; (2) 20-day spawning block out of the fishery required for all vessels; (3) prohibition on a vessel hauling another vessel's gillnet gear; (4) limits on the number of gillnets that may be hauled on GB when fishing under a NE multispecies/monkfish DAS; (5) limits on the number of hooks that may be fished; (6) DAS Leasing Program length and horsepower restrictions; (7) prohibition on discarding; (8) daily catch reporting by sector managers for sector vessels participating in the Closed Area (CA) I Hook Gear Haddock Special Access Program (SAP); (9) prohibition on fishing inside and outside of the CA I Hook Gear Haddock SAP while on the same trip; (10) prohibition on a vessel hauling another vessel's hook gear; (11) the requirement to declare an intent to fish in the Eastern U.S./Canada SAP and the CA II Yellowtail Flounder/Haddock SAP prior to leaving the dock; (12) gear requirements in the Eastern U.S./Canada Management Area; (13) seasonal restrictions for the Eastern U.S./Canada Haddock SAP; (14) seasonal restrictions for the CA II Yellowtail Flounder/Haddock SAP; (15) sampling exemption; (16) prohibition on groundfish trips in the Nantucket Lightship Closed Area; (17) prohibition on combining small-mesh exempted fishery and sector trips in Southern New England; (18) limits on the number of gillnets for day gillnet vessels fishing outside the GOM; (19) 6.5-inch minimum mesh size requirement for trawl nets to allow a 5.5 inch codend on directed redfish trips; and (20) extra-large mesh requirement to target dogfish on trips excluded from ASM in SNE and Inshore GB. A detailed description of the previously granted exemptions and supporting rationale can be found in the applicable final rules identified in Table 6 below.

TABLE 6—EXEMPTIONS FROM PREVIOUS FISHING YEARS THAT ARE GRANTED IN FISHING YEARS 2017 AND 2018

New Exemption Granted for Fishing Years 2017 and 2018

(21) Requirement To Carry a VMS for Handgear A Vessels Fishing in a Single Broad Stock Area

Sectors are prohibited from requesting exemptions from reporting requirements. However, Amendment 18 included a measure that allows a sector to request a VMS exemption for Handgear A vessels, and we are granting this exemption for the 2017 and 2018 fishing years. Because the cost of VMS units is often a significant barrier to sector participation for handgear vessels, this exemption is intended to increase Handgear A vessel participation in sectors. Handgear A vessels using the VMS exemption (enrolled in a sector that has the exemption and fishing in a single broad stock area) must declare the start of trips to NMFS using the interactive voice response (IVR) system. Vessels must also declare their trip end through IVR, similar to a VMS trip end hail.

To ensure that catch and discards are reported to the correct broad stock area, Handgear A vessels may only use the VMS exemption when fishing in a single broad stock area. Handgear vessels intending to fish in multiple broad stock areas (for example, Gulf of Maine and Inshore Georges Bank) must declare their trip through a VMS system and submit daily VMS catch reports when fishing inside and outside of the Gulf of Maine on the same trip. A VMS unit is also required when fishing in the Eastern and Western U.S./Canada Areas, and may be required for some sector exemptions or special access areas, and this exemption does not waive those requirements.

Handgear A vessels using the VMS exemption are still required to call into the pre-trip notification system (PTNS) at least 48 hours prior to the start of a trip to facilitate ASM selection procedures. Additionally, all other reporting and monitoring requirements still apply, including the requirement to complete a vessel trip report (VTR) and declare their trip end before beginning to offload. We expect the requirement to

complete a VTR and declare a trip end before offloading to assist with coordinating dockside enforcement and sampling.

As with other exemptions, sectors that have requested the exemption must include it in their operations plan, and have their plan approved, in order for their sector members to use the exemption. We will monitor the use of this exemption and update requirements, as necessary.

Denied Fishing Years 2017 and 2018 Exemption Requests

We are denying five exemption requests. Three of these requests sought to allow the use of nets with mesh smaller than the minimum mesh size to target healthy stocks. We are denying these exemptions because of concerns about bycatch of undersized groundfish, concerns about impacts on stocks in poor condition, like cod, and a lack of available data to support approval. Increasing fishing opportunities to catch healthy stocks is important, but we must ensure that these opportunities do not negatively affect stocks in poor condition. As such, testing these concepts and collecting data necessary to support future exemption requests are needed. These ideas should be pursued through experimental fishing permits and other research to collect data useful in evaluating their effectiveness. We are also denying an exemption request that would allow certain gillnet vessels to leave nets in the water between trips because this could undermine effort controls in the Monkfish FMP due to interactions between that plan and the groundfish FMP. Because of the complicated interplay between this exemption request and multiple FMP's we have forwarded this request to the New England Council for their consideration in future groundfish or monkfish actions, should they choose. We are denying the VMS powerdown exemption because of a lack of compliance with the requirements of the exemptions when it was granted in previous years. In years when this exemption was granted, we worked with sectors to improve use of this

exemption; however, compliance did not improve. As a result, we did not approve this exemption for fishing years 2015 and 2016. Requests for this exemption for fishing years 2017 and 2018 did not include any additional requirements or information that would suggest use of this exemption would improve from previous years. For these reasons, we do not have confidence that compliance with this exemption would be adequate, which would undermine our ability to adequately monitor the fishery. For these reasons, we are again denying this exemption.

Exemption We Propose To Modify

Modifications to the Sectors Small-Mesh Fishery Exemption Area

We received a request to modify the area for an approved exemption (17) that allows the use of small-mesh and large mesh trawl gear on a sector trip in portions of Southern New England. As approved in fishing years 2015 and 2016, and in this rule for fishing years 2017 and 2018, the exemption allows vessels to combine sector and small-mesh fishery trips by first targeting groundfish with large mesh and then switching to small-mesh mid-trip to target exempted fishery species. There are additional requirements for gear modifications on the small-mesh portion of the trip to reduce bycatch of groundfish, and all legal groundfish caught on the small-mesh portion of the trip must be kept and counted against the sector's allocation. A vessel using this exemption is still required to meet the same NEFOP and ASM coverage as groundfish trips, and is also required to submit a VMS catch report when switching gears.

The current small-mesh sector exemption area as described in the Final 2015 and 2016 Sector Rule (80 FR 25143, May 1 2015) includes two discrete areas, one that parallels the southern shore of Long Island to the waters just off Narragansett Bay, and a second area south of Martha's Vineyard (see Figure 1). The request was to modify the area to include all of statistical areas 537, 539 and 613, which would expand the geographic footprint

of the exemption area, to better reflect fishing practices in the area and increase efficiency and opportunities for sector vessels (see Figure 2). We are proposing to grant the modification to the exemption area, as requested, but the exemption would not be applicable to any areas that overlap groundfish

closed areas or southern windowpane flounder accountability measure (AM) areas, regardless of whether the AM areas are triggered. We are excluding the overlapping southern windowpane flounder AM areas because of concerns about interactions with windowpane flounder and other regulated groundfish

species within the AM area. As with all sector exemptions, we will continue to monitor the use of the updated exemption, as well as any changes to AM areas by the New England Council, in future consideration of this exemption.

BILLING CODE 3510-22-P

Figure 2. Proposed Sectors Small-Mesh Fishery Exemption Area, and Overlapping Southern Windowpane Accountability Measure and Groundfish Closed Areas.

BILLING CODE 3510-22-C

Modified Exemption Reporting Requirements*Changes to the Reporting Requirements for the Exemption From the Extra-Large Mesh Requirement To Target Dogfish on Trips Excluded From ASM*

Last year, Framework 55 removed the ASM coverage requirement for sector trips using gillnets with extra-large mesh (10 inches (25.4 cm) or greater) in the SNE and Inshore GB Broad Stock Areas. We also approved a sector exemption that allows vessels on these ASM-excluded sector trips to target dogfish using 6.5-inch (16.5-cm) mesh gillnet gear within the footprint and season of either the Nantucket Shoals Dogfish Exemption Area (June 1 to October 15), the Eastern Area of the Cape Cod Spiny Dogfish Exemption Area (June 1 to December 31), or the Southern New England Dogfish Gillnet Exemption Area (May 1 to October 31). At the time, we announced that we would closely monitor the exemption during the 2016 fishing year to evaluate whether additional reporting measures are necessary. In order to improve the monitoring of this exemption, and to be consistent with reporting requirements of similar exemptions, we are updating the reporting requirements for this exemption beginning in the 2017 fishing year.

In addition to the PTNS requirement, a vessel is now required to declare its intent to use gillnets with extra-large mesh (10 inches (25.4 cm) or greater) in the SNE/MA and Inshore GB Broad Stock Areas by submitting a trip start hail through its VMS unit prior to departure. This trip start hail will be used for monitoring and enforcement purposes. Trips declaring this exemption must stow their regulated mesh gear and use their extra large mesh (10 inches (25.4 cm) or greater) first. Also starting fishing year 2017, the vessel, once finished with the extra-large mesh portion of the trip, must submit a Multispecies Catch Report via VMS with a good faith estimate of all catch on board, and an indication of the switch to regulated mesh. The vessel could then fish with regulated mesh within the allowable dogfish exemption areas, and comply with the remaining requirements of a sector trip, including the submission of VTRs, a trip end hail, and a final Multispecies Catch Report.

We will continue to closely monitor this exemption to evaluate whether additional reporting measures are necessary. While sector trips using this exemption are exempt from ASM coverage, any legal-sized allocated groundfish stocks caught during these

trips must be landed and the associated landed weight (dealer or VTR) will be deducted from the sector's ACE.

Additional Sector Operations Plan Provisions*Inshore GOM Restrictions*

Several sectors have proposed an operations plan provision to limit and more accurately document a vessel's behavior when fishing in an area they define as the inshore portion of the GOM BSA, or the area to the west of 70°15' W. long. As in fishing years 2015 and 2016, we are approving this provision, but note that a sector may elect to remove this provision in the final version of its operations plan, and it is not a requirement under NMFS regulations.

Under this provision, a vessel that is carrying an observer or at-sea monitor would remain free to fish in all areas, including the inshore GOM area, without restriction. If a vessel is not carrying an observer or at-sea monitor and fishes any part of its trip in the GOM west of 70°15' W. long., the vessel would be prohibited from fishing outside of the GOM BSA. Also, if a vessel is not carrying an observer or at-sea monitor and fishes any part of its trip outside the GOM BSA, this provision would prohibit a vessel from fishing west of 70°15' W. long. within the GOM BSA. The approved provision includes a requirement that a vessel declare whether it intends to fish in the inshore GOM area through the trip start hail using its VMS unit prior to departure. We provide sector managers with the ability to monitor this provision through the Sector Information Management Module, a Web site where we also provide roster, trip, discard, and observer information to sector managers. A sector vessel may use a federally funded NEFOP observer or at-sea monitor on these trips because we believe it will not create bias in coverage or discard estimates, as fishing behavior is not expected to change as a result of this provision.

Prohibition on a Vessel Hauling Another Vessel's Trap Gear To Target Groundfish

Several sectors have requested a provision to allow a vessel to haul another vessel's fish trap gear, similar to the current exemptions that allow a vessel to haul another vessel's gillnet gear or hook gear. These exemptions have generally been referred to as "community" gear exemptions. Regulations at § 648.84(a) require a vessel to mark all bottom-tending fixed gear, which would include fish trap gear

used to target groundfish. To facilitate enforcement of this regulation, we are requiring that any community fish trap gear be tagged by each vessel that plans to haul the gear, similar to how this sector operations plan provision was implemented in fishing years 2014 through 2016. This allows one vessel to deploy the trap gear and another vessel to haul the trap gear, provided both vessels tag the gear prior to deployment. This requirement is included in the sector's operations plan to provide the opportunity for the sector to monitor the use of this provision and ensure that the Office of Law Enforcement (OLE) and the U.S. Coast Guard can enforce the marking requirement.

At-Sea Monitoring Proposals

For fishing years 2017 and 2018, each sector is required to develop and fund an approved ASM program. In the event we cannot approve a proposed ASM program we asked all sectors to include an option to use the current NMFS-designed ASM program as a back-up. Sustainable Harvest Sectors 1, 2, and 3, GB Cod Fixed Gear Sector, Northeast Coastal Communities Sector, and Maine Coast Community Sector have proposed to use the ASM program that was developed by NMFS. We approve this program for these sectors because it is consistent with goals and objectives of monitoring, and with regulatory requirements. Sectors that operate only as permit banks, and explicitly prohibit fishing in their operations plans, are not required to include provisions for an ASM program.

We approve the ASM programs proposed by the remaining 12 sectors, which state that they will: Contract with a NMFS-approved ASM provider; meet the specified coverage level; and utilize the PTNS for random selection of monitored trips and notification to providers. These ASM programs also include additional protocols for ASM coverage waivers, incident reporting, and safety requirements for their sector managers and members. We have determined that the programs are consistent with the goals and objectives of at-sea monitoring, and within the regulatory requirements.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the NMFS Assistant Administrator has determined that this interim final rule is consistent with the NE Multispecies FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

The AA finds that prior notice and the opportunity for public comment would be contrary to the public interest, consistent with 5 U.S.C. 553(b)(B). The purpose of this action is to allocate quotas to sectors and to authorize vessels to fish under the sector operations plans during the 2017 fishing year. The sector operations plans must be approved before sector vessels can fish in the sector fishery. In 2015, Framework Adjustment 55 to the NE Multispecies FMP set 2017 annual catch limits for groundfish stocks. However, in January 2017 the New England Fishery Management Council approved Framework Adjustment 56 to the FMP which would change the annual catch limits for 2017 for some stocks (some stocks would increase and others would decrease). To avoid public confusion and a mid-year change in allocations, we initially developed this rule to complement the Framework 56 rulemaking process. Typically, the framework rulemaking and related sector operations rule are completed in time for the start of the fishing year on May 1. However, the Council did not formally submit Framework 56 to us until April 13, 2017, which prohibited us from coordinating the publication of the two actions. Due to the late submission of Framework 56, this rule instead makes allocations based on the quota previously set by Framework 55. This rule could not be revised, as necessary, in time to provide prior notice and comment and still be effective for the start of the 2017 fishing year on May 1, 2017.

Delaying the effective date of this action past the beginning of the fishing year on May 1 would cause a major disruption in sector member fishing plans and impose substantial opportunity costs through lost fishing opportunities. Sectors include 838 permits and 99 percent of fishing activity. Thus, any delay past the beginning of the fishing year would effectively shut down nearly the entire groundfish fishery during that delay. This delay may also require sector members to reconsider their decision and plans to fish in the sector rather than the common pool. Shutting down the fishery and disrupting business plans is contrary to this rule's intended purpose of providing operational flexibility and maximum opportunity for catching up to the fishery's allocated amounts. Further, these allocated amounts are gauged to achieve Optimum Yield and producing the greatest benefit to the nation as required by the Magnuson-Stevens Fishery Conservation and Management Act. A

delay in the beginning of the fishery would be contrary to this statutory requirement and FMP goal. The economic loss from this lost opportunity and disruption would further exacerbate the severe economic impacts experienced by the groundfish fishery that have resulted from the substantial catch limit reductions for many key groundfish stocks over the past 5 years. For these reasons, delaying the effective date of this action to provide prior opportunity for public comment is contrary to the public interest. The AA finds that there is adequate justification under 5 U.S.C. 553(d)(1) to waive the 30-day delay in effective date because this rule relieves several restrictions. This action allocates quotas and approves sector operations plans for fishing year 2017. A delay in effectiveness would not be in the public interest because this rule does not impose any new requirements or costs on industry for which industry needs time to prepare to comply. Further, if the effectiveness of this action is delayed beyond the May 1, 2017, start of the fishing year, the 838 permits enrolled to fish in a sector in 2017 would either need to cease fishing on May 1, until this rule became effective, or forego fishing as part of a sector, including the associated regulatory exemptions, for the entirety of the fishing year and instead fish under the effort control regulations of the common pool. For example, vessels fishing in the common pool would be subject to effort controls that do not apply to vessels fishing under an approved sector operations plan. Common pool vessels will have their catch limited each trip, will be further limited in the number of days they could fish, and will be subject to several seasonal closures that sector vessels will be exempted from.

Additionally, there is good cause under 5 U.S.C. 553(d)(3), to waive the 30-day delay in effectiveness so that the purpose of this rule is not undermined. As stated above, the purpose of this action is to allocate quotas to sectors and to authorize vessels to fish under the sector operations plans during the 2017 fishing year. If the effectiveness of this action is delayed beyond the May 1, 2017, start of the fishing year, the 838 permits enrolled to fish in a sector in 2017 would either need to cease fishing on May 1 until this rule became effective, or forego fishing as part of a sector, including the associated regulatory exemptions, for the entirety of the fishing year and instead fish under the effort control regulations of the common pool. Preventing vessels from fishing under the provisions of an

approved operations plan either for the whole year, or a portion of the year, would severely disrupt the sector fishery and have direct negative economic effects on the affected vessels.

This interim final rule does not contain policies with Federalism or "takings" implications as those terms are defined in E.O. 13132 and E.O. 12630, respectively.

This interim final rule is exempt from the procedures of the Regulatory Flexibility Act because the rule is issued without opportunity for prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 25, 2017.

Alan D. Risenhoover,

Acting Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 1301-00-D

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****50 CFR Part 660****[Docket No. 161222999–7413–01]****RIN 0648–BG59****Fisheries Off West Coast States; West Coast Salmon Fisheries; 2017 Management Measures and a Temporary Rule**

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; and a temporary rule for emergency action.

SUMMARY: Through this final rule, NMFS establishes fishery management measures for the 2017 ocean salmon fisheries off Washington, Oregon, and California and the 2018 salmon seasons opening earlier than May 1, 2018. The temporary rule for emergency action (emergency rule), under the Magnuson-Stevens Fishery Conservation and Management Act (MSA), implements the 2017 annual management measures for the West Coast ocean salmon fisheries for the area from the U.S./Canada border to Cape Falcon, OR, from May 1, 2017, through October 28, 2018. The emergency rule is required because allocation of coho harvest between recreational and commercial fisheries will not be consistent with the allocation schedule specified in the Pacific Coast Salmon Fishery Management Plan (FMP) in order to limit fishery impacts on Queets coho and meet conservation and management objectives. The fishery management measures for the area from Cape Falcon, OR, to the U.S./Mexico border are consistent with the FMP and are implemented through a final rule. Specific fishery management measures vary by fishery and by area. The measures establish fishing areas, seasons, quotas, legal gear, recreational fishing days and catch limits, possession and landing restrictions, and minimum lengths for salmon taken in the U.S. exclusive economic zone (EEZ) (3–200 NM) off Washington, Oregon, and California. The management measures are intended to prevent overfishing and to apportion the ocean harvest equitably among treaty Indian, non-treaty commercial, and recreational fisheries. The measures are also intended to allow a portion of the salmon runs to escape the ocean fisheries in order to provide for

spawning escapement and inside fisheries (fisheries occurring in state internal waters).

DATES: The final rule covering fisheries south of Cape Falcon, Oregon, is effective from 0001 hours Pacific Daylight Time, May 1, 2017, until the effective date of the 2018 management measures, which will be published in the *Federal Register*. The temporary rule covering fisheries north of Cape Falcon, Oregon, is effective from 0001 hours Pacific Daylight Time, May 1, 2017, through 2400 hours Pacific Daylight Time, October 28, 2017, or the attainment of the specific quotas listed below in section two of this rule.

ADDRESSES: The documents cited in this document are available on the Pacific Fishery Management Council's (Council's) Web site (www.pcouncil.org).

SUPPLEMENTARY INFORMATION:**Background**

The ocean salmon fisheries in the EEZ off Washington, Oregon, and California are managed under a “framework” FMP. Regulations at 50 CFR part 660, subpart H, provide the mechanism for making preseason and inseason adjustments to the management measures, within limits set by the FMP, by notification in the *Federal Register*. Establishing annual management measures is authorized at 50 CFR 660.408.

The management measures for the 2017 and pre-May 2018 ocean salmon fisheries that are implemented in this final rule were recommended by the Council at its April 6 to 11, 2017, meeting.

Process Used To Establish 2017 Management Measures

The Council announced its annual preseason management process for the 2017 ocean salmon fisheries in the *Federal Register* on December 28, 2016 (81 FR 95568), and on the Council's Web site at (www.pcouncil.org). NMFS published an additional notice of opportunities to submit public comments on the 2017 ocean salmon fisheries in the *Federal Register* on January 17, 2017 (82 FR 4859). These notices announced the availability of Council documents, the dates and locations of Council meetings and public hearings comprising the Council's complete schedule of events for determining the annual proposed and final modifications to ocean salmon fishery management measures, and instructions on how to comment on the development of the 2017 ocean salmon

fisheries. The agendas for the March and April Council meetings were published in the *Federal Register* (82 FR 10881, February 16, 2017, and 82 FR 14353, March 20, 2017, respectively) and posted on the Council's Web site prior to the actual meetings.

In accordance with the FMP, the Council's Salmon Technical Team (STT) and staff economist prepared four reports for the Council, its advisors, and the public. All four reports were made available on the Council's Web site upon their completion. The first of the reports, “Review of 2016 Ocean Salmon Fisheries,” was prepared in February when the scientific information necessary for crafting management measures for the 2017 and pre-May 2018 ocean salmon fisheries first became available. The first report summarizes biological and socio-economic data for the 2016 ocean salmon fisheries and assesses how well the Council's 2016 management objectives were met. The second report, “Preseason Report I Stock Abundance Analysis and Environmental Assessment Part 1 for 2017 Ocean Salmon Fishery Regulations” (PRE I), provides the 2017 salmon stock abundance projections and analyzes the impacts on the stocks and Council management goals if the 2016 regulations and regulatory procedures were applied to the projected 2017 stock abundances. The completion of PRE I is the initial step in developing and evaluating the full suite of preseason alternatives.

Following completion of the first two reports, the Council met in Vancouver, WA, from March 7 to 13, 2017, to develop 2017 management alternatives for proposal to the public. The Council proposed three alternatives for commercial and recreational fisheries management for analysis and public comment. These alternatives consisted of various combinations of management measures designed to protect weak stocks of coho and Chinook salmon, and to provide for ocean harvests of more abundant stocks. After the March Council meeting, the Council's STT and staff economist prepared a third report, “Preseason Report II Proposed Alternatives and Environmental Assessment Part 2 for 2017 Ocean Salmon Fishery Regulations” (PRE II), which analyzes the effects of the proposed 2017 management alternatives.

Public hearings, sponsored by the Council, to receive testimony on the proposed alternatives were held on March 27, 2017, in Westport, WA, and Coos Bay, OR; and on March 28, 2017, in Fort Bragg, CA. The States of Washington, Oregon, and California

sponsored meetings in various fora that also collected public testimony, which was then presented to the Council by each state's Council representative. The Council also received public testimony at both the March and April meetings and received written comments at the Council office.

The Council met from April 6 to 11, 2017, in Vancouver, WA, to adopt its final 2017 salmon management recommendations. Following the April Council meeting, the Council's STT and staff economist prepared a fourth report, "Preseason Report III Analysis of Council-Adopted Management Measures for 2017 Ocean Salmon Fisheries" (PRE III), which analyzes the environmental and socio-economic effects of the Council's final recommendations. After the Council took final action on the annual ocean salmon specifications in April, it transmitted the recommended management measures to NMFS, published them in its newsletter, and also posted them on the Council Web site (www.pcouncil.org).

National Environmental Policy Act (NEPA)

The environmental assessment (EA) for this action comprises the Council's documents described above (PRE I, PRE II, and PRE III), providing analysis of environmental and socioeconomic effects under NEPA. The EA and its related Finding of No Significant Impact (FONSI) are posted on the NMFS West Coast Region Web site (www.westcoast.fisheries.noaa.gov).

Resource Status

Stocks of Concern

The FMP requires that the fisheries be shaped to meet escapement-based Annual Catch Limits (ACLs), Endangered Species Act (ESA) consultation requirements, obligations of the Pacific Salmon Treaty (PST) between the U.S. and Canada, and other conservation objectives detailed in the FMP. Because the ocean salmon fisheries are mixed-stock fisheries, this requires "weak stock" management to avoid exceeding limits for the stocks with the most constraining limits. Abundance forecasts for individual salmon stocks can vary significantly from one year to the next; therefore, the stocks that constrain the fishery in one year may differ from those that constrain the fishery in the next. For 2017, limits for three stocks are the most constraining on the fisheries; these are described below.

Fisheries south of Cape Falcon, OR, are limited in 2017 primarily by the low

abundance forecast of Klamath River fall Chinook salmon (KRFC) and concern for the status of ESA-listed Sacramento River winter Chinook salmon (SRWC). Fisheries north of Cape Falcon are limited primarily by the low abundance forecast for Queets coho. The limitations imposed in order to protect these stocks are described below. The alternatives and the Council's recommended management measures for 2017 were designed to avoid exceeding these limitations.

Sacramento River winter Chinook salmon (SRWC): In 2010, NMFS consulted under ESA section 7 and provided guidance to the Council regarding the effects of Council area fisheries on SRWC, ESA-listed as endangered. NMFS completed a biological opinion that includes a reasonable and prudent alternative (RPA) to avoid jeopardizing the continued existence of this evolutionarily significant unit (ESU). The RPA included management-area-specific fishing season openings and closures, and minimum size limits for both commercial and recreational fisheries. It also directed NMFS to develop a second component to the RPA—an abundance-based management (ABM) framework. In 2012, NMFS implemented this ABM framework, which supplements the above management restrictions with maximum allowable impact rates that apply when abundance is low, based on the three-year geometric mean spawning escapement of SRWC. Using the methodology specified in the ABM framework, the age-3 impact rate on SRWC in 2017 fisheries south of Point Arena recommended by NMFS would be limited to a maximum of 15.8 percent. At the start of the preseason planning process for the 2017 management season, NMFS provided a letter to the Council, dated March 3, 2017, summarizing limits to impacts on ESA-listed species for 2017, based on existing biological opinions and 2017 abundance information, as required by the Salmon FMP. The letter stated the 15.8 percent maximum impact rate on SRWC.

However, as in 2016, the Council expressed concern that the methodology used to recommend that impact rate is retrospective in nature and may not be responsive to the effects of recent environmental events on salmon survival and productivity, including the perilously high mortality rates of out-migrating SRWC smolts in recent years due to warm water conditions caused by drought in California. Estimates of juvenile SRWC passage at Red Bluff Diversion Dam on the Sacramento River

indicate that, while 2016 brood year outmigration was slightly higher than the previous two brood years, juvenile abundance remains about one-third the 2007–2015 average. The Council has formed a workgroup to develop new scientific methodology to incorporate information about future SRWC abundance into fishery management; however, that new methodology is not yet available. For 2017, the Council recommended precautionary management measures including time and area restrictions based on data presented by the California Department of Fish and Wildlife (CDFW) regarding SRWC encounters in the fishery resulting in an impact rate for SRWC of 12.2 percent. Conservation measures for SRWC will constrain 2017 salmon fisheries south of Point Arena, California.

Klamath River fall Chinook salmon (KRFC): KRFC is not an ESA-listed stock; however, forecast abundance for this stock in 2017 is historically low, only 30 percent of the 2016 forecast. KRFC currently meets the FMP's status determination criteria (SDC) for approaching an overfished condition based on escapements in 2015 and 2016, coupled with the projected escapement in 2017. The FMP defines "overfished" status in terms of a three-year geometric mean escapement level and whether it is above the minimum stock sized threshold (MSST). Based on preliminary information, it is possible that KRFC will be determined to have a three-year geometric mean escapement level below MSST once post-season escapement estimates are available, and meet the definition of "overfished" in 2018, but, given the minimal impacts of Council-area fisheries on KRFC, this is the case whether or not there are any fishery impacts.

The FMP's harvest control rule for this stock allows for minimal levels of impact at very low abundance levels. Given the forecast abundance of KRFC for 2017, the control rule limits impacts on the stock to 8.1 percent. Fisheries south of Cape Falcon and north of Point Sur will be constrained by this limit. The FMP specifies a set of circumstances that the Council should consider in applying the control rule at very low abundance levels: Critically low spawner abundance that may affect crucial genetic thresholds of substocks, spawner abundance in recent years, status of co-mingled stocks, marine and freshwater environmental conditions, needs for tribal fisheries, whether the stock is currently in an approaching overfished condition, and whether the stock is currently overfished. The Council and its advisors discussed these

circumstances. The risk for substocks to fall below crucial genetic thresholds in 2017 was expected to be substantial (greater than 80 percent) under either a no-fishing scenario or fishing at levels specified by the control rule level. In 2016, KRFC spawner escapement was well below both the level for maximum sustained yield (S_{MSY}) and minimum stock size threshold (MSST) specified in the FMP. Regarding the status of comingled stocks, the STT reported that the primary stocks that comeingle with KRFC have relatively low forecast abundance for 2017. The Yurok and Hoopa Valley Tribes have reserved fishing rights and are dependent on salmon for their subsistence and culture. NMFS' Northwest and Southwest Fisheries Science Centers presented information indicating that the broods that will contribute to 2017 harvest and escapement encountered poor ocean conditions in the California Current Ecosystem. As stated above, KRFC currently meet the FMP SDC criteria for approaching an overfished condition; although NMFS has not yet made a determination. Finally, KRFC are not currently overfished. After consideration of these circumstances, the Council adopted the 8.1 percent impact rate, consistent with the KRFC control rule. The Council developed management measures that utilize time and area closures to minimize fishery impacts on KRFC: The Klamath Management Zone (KMZ), Humbug Mountain, OR south to Humboldt South Jetty, CA, will be closed for the entire year to both commercial and recreational fishing and the area from Florence South Jetty, OR south to Humbug Mountain will be closed to commercial fishing to provide an additional buffer; in California, there will be very little fishing opportunity in the Fort Bragg management area, specifically avoiding times when KRFC impacts are known to be high in that area; and, finally, CDFW will recommend to the California Fish and Game Commission that fall Chinook fishing in the Klamath River be closed in 2017. The combination of the KRFC and SRWC control rules will constrain fisheries severely in California in 2017.

Queets coho: Queets coho are not ESA-listed. However, the 2017 abundance forecast for this stock is very low; 6,548 fish compared to a 2009–2016 average of 18,700 fish. The FMP's conservation objective for Queets coho is a spawning escapement of 5,800 fish. Although the Council's recommended management measures would allow for an ocean escapement of 5,800 Queets coho, the conservation objective in the

FMP is for a spawning escapement that accounts for in-river fishery impacts. The FMP provides flexibility in setting the annual spawning escapement for several Washington coho stocks, including Queets coho, provided there is agreement between the Washington Department of Fish and Wildlife (WDFW) and the treaty tribes, consistent with court orders in *U.S. v. Washington*. Therefore, based on agreement between those parties and discussion on the Council floor that the reduced spawning escapement is unlikely to jeopardize the capacity of the fishery to produce maximum sustainable yield on a continuing basis, the Council adopted a 2017 spawning escapement target of 5,130 Queets coho to allow for limited harvest opportunity in ocean and in-river fisheries directed at other higher-abundance stocks. Additionally, under the criteria of the PST's Southern Coho Management Plan, Queets coho abundance is in the "low" category in 2017 and subject to a total exploitation rate of 20 percent. The state and treaty tribal co-managers relied on a provision in the PST to request that the Southern Panel of the Pacific Salmon Commission agree to permit a 22 percent exploitation rate on Queets coho in 2017 to allow the U.S. to meet fishery management objectives [(Pacific Salmon Treaty, Article XV, Annex IV, Chapter 5, paragraph 11(c)]. The Southern Panel did agree to this request. Managing for impacts to Queets coho will constrain salmon fisheries north of Cape Falcon, Oregon.

Annual Catch Limits and Status Determination Criteria

Annual Catch Limits (ACLs) are set for two Chinook salmon stocks, Sacramento River fall Chinook (SRFC) and KRFC, and one coho stock, Willapa Bay natural coho. The Chinook salmon stocks are indicator stocks for the Central Valley Fall Chinook complex and the Southern Oregon/Northern California Chinook complex, respectively. The Far North Migrating Coastal Chinook complex includes a group of Chinook salmon stocks that are caught primarily in fisheries north of Cape Falcon, Oregon, and other fisheries that occur north of the U.S./Canada border. No ACL is set for these stocks because they are managed according to the PST with Canada. Other Chinook salmon stocks caught in fisheries north of Cape Falcon are ESA-listed or hatchery produced, and are managed consistent with ESA consultations or hatchery goals. Willapa Bay natural coho is the only coho stock for which an ACL is set, as the other coho stocks in the FMP are either ESA-listed,

hatchery produced, or managed under the PST.

ACLs for salmon stocks are escapement-based, which means they establish a number of adults that must escape the fisheries to return to the spawning grounds. ACLs are set based on the annual abundance projection and a fishing rate reduced to account for scientific uncertainty. For SRFC in 2017, the overfishing limit (OFL) is $S_{OFL} = 230,700$ (projected abundance) multiplied by $1 - F_{MSY}$ ($1 - 0.78$) or 50,754 returning spawners (F_{MSY} is the fishing mortality rate that would result in maximum sustainable yield – MSY). S_{ABC} is 230,700 multiplied by $1 - F_{ABC}$ ($1 - 0.70$) (F_{MSY} reduced for scientific uncertainty = 0.70) or 69,210. The S_{ACL} is set equal to S_{ABC} , i.e., 69,210 spawners. The adopted management measures provide for an expected SRFC spawning escapement of 133,200. For KRFC in 2017, S_{OFL} is 12,383 (abundance projection) multiplied by $1 - F_{MSY}$ ($1 - 0.71$), or 3,591 returning spawners. S_{ABC} is 12,383 multiplied by $1 - F_{ABC}$ ($1 - 0.68$) (F_{MSY} reduced for scientific uncertainty = 0.68) or 3,963 returning spawners. S_{ACL} is set equal to S_{ABC} , i.e., 3,963 spawners. The adopted management measures provide for an expected KRFC spawning escapement of 11,379. For Willapa Bay natural coho in 2017, the overfishing limit (OFL) is $S_{OFL} = 36,720$ (projected abundance) multiplied by $1 - F_{MSY}$ ($1 - 0.74$) or 9,547 returning spawners. S_{ABC} is 36,720 multiplied by $1 - F_{ABC}$ ($1 - 0.70$) (F_{MSY} reduced for scientific uncertainty = 0.70) or 11,016. S_{ACL} is set equal to S_{ABC} , i.e., 11,016 spawners. The adopted management measures provide for an expected Willapa Bay natural coho ocean escapement of 34,400.

As explained in more detail above under "Stocks of Concern," fisheries north and south of Cape Falcon, are constrained by impact limits necessary to protect ESA-listed salmon stocks including SRWC and KRFC and Queets coho which are not ESA-listed. For 2017, projected abundance of the three stocks with ACLs (SRFC, KRFC, and Willapa Bay natural coho), in combination with the constraints for ESA-listed and non-ESA-listed stocks, are expected to result in escapements greater than required to meet the ACLs for all three stocks with defined ACLs.

Emergency Rule

The Council's final recommendation for the ocean salmon fishing seasons that commence May 1, 2017, deviates from the FMP specifically with regard to the FMP's allocation schedule for coho harvest in the area north of Cape Falcon, between commercial and recreational

fisheries. The total allowable catch (TAC) of coho in non-treaty commercial and recreational fisheries north of Cape Falcon is 47,600 marked coho in 2017. At that TAC level, the FMP allocates 25 percent (16 percent marked coho equivalent) of coho to the commercial fishery and 75 percent (84 percent marked coho equivalent) of coho to the recreational fishery. To limit fishery impacts on coho consistent with the adopted spawning escapement and exploitation rates described above, the Council recommended the following allocations of marked coho TAC: 12 percent commercial and 88 percent recreational. Recreational fisheries are more dependent on coho, while commercial fisheries are more dependent on Chinook salmon. Additionally, in mark-selective fisheries, recreational fisheries have a lower impact rate due to lower hooking mortality. This deviation from the FMP allocation schedule should provide fishing opportunity on abundant stocks while limiting fishery impacts on Queets coho.

The Council considered three alternative fishery management schemes for the fisheries north of Cape Falcon; two of the three alternatives were inconsistent with the FMP coho allocation schedule. Alternative I would have limited the commercial fishery to nine percent of the north of Falcon coho TAC, inconsistent with the FMP allocation schedule between commercial and recreational fisheries; Alternative II would have been consistent with the FMP coho allocation schedule; and Alternative III would have prohibited coho retention in the non-treaty commercial fishery north of Cape Falcon and would have restricted coho retention in the recreational fishery to the area south of Leadbetter Point, WA, this would be inconsistent with the FMP allocation schedule between commercial and recreational fisheries and among recreational fishery subareas. The Council's state and tribal representatives, and industry advisory committee, supported consideration of these three alternatives. The Council's final recommended management measures fall between the second and third alternatives in terms of impacts to coho. These management measures reflect agreement between the State of Washington and coastal treaty tribes on spawning escapement and exploitation rate goals on Queets coho for combined ocean fisheries and fisheries landward of the EEZ; the projected impacts of the combined fisheries are managed such that Queets coho meets these escapement and exploitation rate goals.

The Council voted unanimously to adopt these measures, and members spoke about the need to conserve Queets coho while providing harvest opportunity on abundant stocks to provide economic benefit to fishery dependent communities.

The proposed fisheries have minimal impacts on Queets coho and are not expected to jeopardize the capacity of the fishery to produce maximum sustainable yield on a continuing basis. The FMP defines overfishing and overfished status for this stock. Queets would not be subject to overfishing under the proposed management measures, in fact the overfishing limits in the FMP are much higher than the expected impact rates (65 percent MFMT compared to a 22 percent projected impact rate). Queets coho currently meet the FMP's SDC for approaching an overfished condition based on escapements in 2014 and 2015, coupled with the projected escapement in 2017. Escapements in 2016 are not available but are reported to have been much higher than anticipated during the 2016 preseason process. Based on preliminary information, it is possible that Queets coho will have a three-year geometric mean escapement level below MSST, and meet the definition of "overfished" in 2018, but, given the minimal impacts of Council-area fisheries on Queets coho, this is the case whether or not there are any fishery impacts. The marginal decreases in the abundance of Queets coho expected from the proposed fisheries (approximately 267 fish out of the forecasted abundance of 6,548 fish may be taken by the proposed fisheries) are not expected to affect the ability of the fisheries to produce MSY on a continuing basis.

The temporary rule for emergency action implements the 2017 annual management measures for the West Coast ocean salmon fisheries for the area from the U.S./Canada border to Cape Falcon, OR, for 180 days, from May 1, 2017, through October 28, 2017 (16 U.S.C. 1855(c)).

Public Comments

The Council invited written comments on developing 2017 salmon management measures in their notice announcing public meetings and hearings (81 FR 95568, December 28, 2016). At its March meeting, the Council adopted three alternatives for 2017 salmon management measures having a range of quotas, season structure, and impacts, from the least restrictive in Alternative I to the most restrictive in Alternative III. These alternatives are described in detail in PRE II.

Subsequently, comments were taken at three public hearings held in March, staffed by representatives of the Council and NMFS. The Council received several written comments directly. The three public hearings were attended by a total of 154 people; 34 people provided oral comments. Comments came from individual fishers, fishing associations, fish buyers, and processors. Written and oral comments addressed the 2017 management alternatives described in PRE II, and generally expressed preferences for a specific alternative or for particular season structures. All comments were included in the Council's briefing book for their April 2017 meeting and were considered by the Council, which includes a representative from NMFS, in developing the recommended management measures transmitted to NMFS on April 20, 2017. In addition to comments collected at the public hearings and those submitted directly to the Council, a few people provided oral comments at the April 2017 Council meeting. NMFS also invited comments to be submitted directly to the Council or to NMFS, via the Federal Rulemaking Portal (www.regulations.gov) in a notice (82 FR 4859, January 17, 2017). No comments were submitted via www.regulations.gov.

Comments on alternatives for fisheries north of Cape Falcon. For fisheries north of Cape Falcon, Alternative I was favored by most commercial and recreational fishery commenters at the public hearing in Westport, WA. A variety of modifications to the alternatives were presented, most designed to maximize fishing opportunity in both commercial and recreational fisheries.

Comments on alternatives for fisheries south of Cape Falcon. Comments supporting a particular alternative south of Cape Falcon varied with geographic location of the meeting or commenter. Those attending the meeting in Coos Bay, OR, largely favored Alternative I for both commercial and recreational fisheries, while those attending the meeting in Fort Bragg, CA, expressed overwhelming support for Alternative III. The Council received a large number of emailed comments from members of a recreational fishing club in California who favored Alternative I. Comments included concern for Klamath and Sacramento River salmon and various environmental and management concerns that affect them.

Comments on incidental halibut retention in the commercial salmon fisheries. At its March meeting, the Council identified three alternatives for landing limits for incidentally caught

halibut that are retained in the salmon troll fishery. There were a few comments received on halibut and these focused on the ability to access the full halibut allocation (severely constrained salmon fisheries in 2016 resulted in the commercial fleet being unable to access all of the incidental halibut allocation available).

Comments from treaty tribe representatives. At its March and April meetings, the Council heard testimony from members of several treaty tribes; additional comments were submitted in writing. There was strong concern about environmental conditions in the Klamath River that are deleterious to salmon survival, including promoting increased rates of infection by the parasite *Ceratonova shasta*. Comments were made on the need for sufficient spawning escapement in the Columbia River Basin and in support of successful artificial propagation and reintroduction efforts implemented there by the tribes. Comments were made on the reserved treaty rights of tribes to fish and frustration with insufficient salmon for tribal needs. Finally, there were written comments expressing concern over the low abundance of coho salmon in Puget Sound rivers and stressing the need to limit fisheries to provide spawning escapement.

The Council, including the NMFS representative, took all of these comments into consideration. The Council's final recommendation generally includes aspects of all three alternatives, while taking into account the best available scientific information and ensuring that fisheries are consistent with ESA consultation standards, ACLs, PST obligations, and tribal fishing rights. These management tools assist the Council in meeting impact limits on weak stocks. The Council adopted alternative III for incidental halibut retention, this alternative provides for more liberal landing limits for halibut than were adopted for 2016 salmon fisheries and April 2017 salmon fisheries (81 FR 26157, May 2, 2016).

Management Measures for 2017 Fisheries

The Council's recommended ocean harvest levels and management measures for the 2017 fisheries are designed to apportion the burden of protecting the weak stocks identified and discussed in PRE I equitably among ocean fisheries and to allow maximum harvest of natural and hatchery runs surplus to inside fishery and spawning needs. NMFS finds the Council's recommendations to be responsive to the goals of the FMP, the requirements

of the resource, and the socioeconomic factors affecting resource users. The recommendations are consistent with the requirements of the MSA, U.S. obligations to Indian tribes with federally recognized fishing rights, and U.S. international obligations regarding Pacific salmon. The Council's recommended management measures also comply with NMFS ESA consultation standards and guidance, for those ESA-listed salmon species that may be affected by Council fisheries. Accordingly, NMFS, through this final rule and temporary rule, approves and implements the Council's recommendations.

North of Cape Falcon, 2017 management measures for non-Indian commercial troll and recreational fisheries have increased quotas for Chinook and coho salmon compared to 2016, when historically low abundance for several coho stocks severely constrained fisheries. North of Cape Falcon in 2017, commercial and recreational fisheries will have access to coho salmon in all management areas. Chinook harvest north of Cape Falcon will be moderately improved over the 2016 level for both commercial and recreational fisheries.

Quotas for the 2017 treaty-Indian commercial troll fishery North of Cape Falcon 2017 are 40,000 Chinook salmon and 12,500 coho in ocean management areas and Washington State Statistical Area 4B combined. These quotas are unchanged for Chinook from 2016 and allow coho retention which was not available in 2016. The treaty-Indian fishery commercial fisheries include a May and June fishery and a July and August fishery, with a quota of 20,000 Chinook in each fishery and 12,500 coho in the July and August fishery. Although the fishing opportunity North of Cape Falcon is better than in 2016, fisheries are reduced significantly compared to those implemented over the last ten years.

Recreational fisheries south of Cape Falcon will be directed primarily at Chinook salmon and are shaped to minimize impacts to KRFC, with opportunity for coho salmon limited to the area between Cape Falcon and Humbug Mountain, OR. Commercial fisheries south of Cape Falcon will be directed at Chinook in the areas north of the Florence South Jetty in Oregon and south of Horse Mountain in California and have no coho retention.

Management Measures for 2018 Fisheries

The timing of the March and April Council meetings makes it impracticable for the Council to recommend fishing

seasons that begin before May 1 of the same year. Therefore, this action also establishes the 2018 fishing seasons that open earlier than May 1. The Council recommended, and NMFS concurs, that the commercial season off Oregon from Cape Falcon to the Oregon/California border, the commercial season off California from Horse Mountain to Point Arena, the recreational season off Oregon from Cape Falcon to Humbug Mountain, and the recreational season off California from Horse Mountain to the U.S./Mexico border will open in 2018 as indicated in the "Season Description" section of this document. At the March 2018 meeting, the Council may consider inseason recommendations to adjust the commercial and recreational seasons prior to May 1 in the areas off Oregon and California.

The following sections set out the management regime for the ocean salmon fishery. Open seasons and days are described in Sections 1, 2, and 3 of the 2017 management measures. Inseason closures in the commercial and recreational fisheries are announced on the NMFS hotline and through the U.S. Coast Guard (USCG) Notice to Mariners as described in Section 6. Other inseason adjustments to management measures are also announced on the hotline and through the Notice to Mariners. Inseason actions will also be published in the **Federal Register** as soon as practicable.

The following are the management measures recommended by the Council and approved and implemented here for 2017 and, as specified, for 2018.

Section 1. Commercial Management Measures for 2017 Ocean Salmon Fisheries

Parts A, B, and C of this section contain restrictions that must be followed for lawful participation in the fishery. Part A identifies each fishing area and provides the geographic boundaries from north to south, the open seasons for the area, the salmon species allowed to be caught during the seasons, and any other special restrictions effective in the area. Part B specifies minimum size limits. Part C specifies special requirements, definitions, restrictions, and exceptions.

A. Season Description

North of Cape Falcon, OR

—U.S./Canada border to Cape Falcon

May 1 through the earlier of June 30 or 27,000 Chinook, no more than 8,900 of which may be caught in the area between the U.S./Canada border and the Queets River and no more than 9,000 of

which may be caught in the area between Leadbetter Point and Cape Falcon (C.8). In the area between the U.S./Canada border and the Queets River, a landing and possession limit of 60 Chinook per vessel per calendar week (Monday through Sunday) will be in place. Seven days per week (C.1). All salmon except coho (C.4, C.7). Chinook minimum size limit of 28 inches total length (B). Vessels in possession of salmon north of the Queets River may not cross the Queets River line (see Section 5. Geographical Landmarks) without first notifying WDFW at 360–249–1215 with area fished, total Chinook and halibut catch aboard, and destination. Vessels in possession of salmon south of the Queets River may not cross the Queets River line (see Section 5. Geographical Landmarks) without first notifying WDFW at 360–249–1215 with area fished, total Chinook and halibut catch aboard, and destination. When it is projected that approximately 75 percent of the overall Chinook guideline has been landed, or approximately 75 percent of the Chinook subarea guideline has been landed in the area between the U.S./Canada border and the Queets River, or approximately 75 percent of the Chinook subarea guideline has been landed in the area between Leadbetter Point and Cape Falcon, inseason action will be considered to ensure the guideline is not exceeded. See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3).

July 1–4, July 7–September 19 or 18,000 Chinook or 5,600 coho, whichever comes first; no more than 7,200 Chinook may be caught in the area between the U.S./Canada border and the Queets River (C.8). Open five days per week, Friday through Tuesday. In the area between the U.S./Canada border and the Queets River, a landing and possession limit of 60 Chinook and 10 coho per vessel per open period will be in place (C.1, C.6). In the area from the Queets River to Cape Falcon, a landing and possession limit of 75 Chinook and 10 coho per vessel per open period will be in place (C.1, C.6). Chinook minimum size limit of 28 inches total length. Coho minimum size limit of 16 inches total length (B, C.1). All coho must be marked with a healed adipose fin clip (C.8.c). No chum retention north of Cape Alava, WA in August and September (C.4, C.7). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3). Vessels in possession of salmon north of the Queets River may not cross the Queets River line (see Section 5. Geographical Landmarks) without first notifying

WDFW at 360–249–1215 with area fished, total Chinook and halibut catch aboard, and destination. Vessels in possession of salmon south of the Queets River may not cross the Queets River line (see Section 5. Geographical Landmarks) without first notifying WDFW at 360–249–1215 with area fished, total Chinook and halibut catch aboard, and destination. When it is projected that approximately 75 percent of the overall Chinook guideline has been landed, or approximately 75 percent of the Chinook subarea guideline has been landed in the area between the U.S./Canada border to the Queets River, inseason action will be considered to ensure the guideline is not exceeded.

For all commercial troll fisheries north of Cape Falcon, mandatory closed areas include: Salmon Troll Yelloweye Rockfish Conservation Area, Cape Flattery and Columbia Control Zones, and, beginning August 14, Grays Harbor Control Zone closed (C.5). Vessels must land and deliver their fish within 24 hours of any closure of this fishery. Vessels fishing or in possession of salmon while fishing north of Leadbetter Point must land and deliver their fish within the area and north of Leadbetter Point. Vessels fishing or in possession of salmon while fishing south of Leadbetter Point must land and deliver their fish within the area and south of Leadbetter Point, except that Oregon permitted vessels may also land their fish in Garibaldi, OR. Under state law, vessels must report their catch on a state fish receiving ticket. Oregon State regulations require all fishers landing salmon into Oregon from any fishery between Leadbetter Point, WA, and Cape Falcon, OR, must notify Oregon Department of Fish and Wildlife (ODFW) within one hour of delivery or prior to transport away from the port of landing by either calling 541–867–0300 ext. 271 or sending notification via email to nfalcon.trollreport@state.or.us. Notification shall include vessel name and number, number of salmon by species, port of landing and location of delivery, and estimated time of delivery. Inseason actions may modify harvest guidelines in later fisheries to achieve or prevent exceeding the overall allowable troll harvest impacts (C.8).

South of Cape Falcon, OR

—Cape Falcon to Florence South Jetty
April 15–May 31;
June 7–12, June 15–30, July 8–31;
September 1–30, October 1–31 (C.9.a).
Seven days per week. All salmon except coho (C.4, C.7). Chinook minimum size limit of 28 inches total length (B, C.1). All vessels fishing in the

area must land their fish in the state of Oregon. See gear restrictions and definitions (C.2, C.3) and Oregon State regulations for a description of special regulations at the mouth of Tillamook Bay. Beginning September 1, no more than 45 Chinook per vessel per landing week (Thursday through Wednesday), and only open shoreward of the 40 fathom regulatory line (C.5.f).

In 2018, the season will open March 15 for all salmon except coho. Chinook minimum size limit of 28 inches total length (B, C.1). Gear restrictions same as in 2017 (C.2, C.3, C.4, C.6, C.7, C.8). This opening could be modified following Council review at its March 2018 meeting.

—Florence South Jetty to Humbug Mountain

Closed (C.9.a).

In 2018, the season will open March 15 for all salmon except coho. Chinook minimum size limit of 28 inches total length (B, C.1). Gear restrictions same as in 2017 (C.2, C.3, C.4, C.6, C.7, C.8). This opening could be modified following Council review at its March 2018 meeting.

—Humbug Mountain to Oregon/California border (Oregon Klamath Management Zone (KMZ))

Closed (C.9.a).

In 2018, the season will open March 15 for all salmon except coho. Chinook minimum size limit of 28 inches total length (B, C.1). Gear restrictions same as in 2017 (C.2, C.3, C.4, C.6, C.7, C.8). This opening could be modified following Council review at its March 2018 meeting.

—Oregon/California border to Humboldt South Jetty (California KMZ)

Closed (C.9.a).

—Humboldt South Jetty to Horse Mt.

Closed.

When the fishery is closed between the Oregon/California border and Humbug Mountain and open to the south, vessels with fish on board caught in the open area off California may seek temporary mooring in Brookings, OR prior to landing in California only if such vessels first notify the Chetco River Coast Guard Station via VHF channel 22A between the hours of 0500 and 2200 and provide the vessel name, number of fish on board, and estimated time of arrival (C.6).

—Horse Mt. to Point Arena (Fort Bragg)

September 1 through the earlier of September 30, or a 3,000 Chinook quota (C.9.b).

Five days per week, Friday through Tuesday. All salmon except coho (C.4, C.7). Chinook minimum size limit of 27

inches total length (B, C.1). Landing and possession limit of 60 Chinook per vessel per open period (C.8.e). All fish caught in this area must be landed between the Oregon/California border and Point Arena (C.6). All fish must be offloaded within 24 hours of any closure of the fishery and prior to fishing outside the area (C.1). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3).

In 2018, the season will open April 16–30 for all salmon except coho, with a 27-inch Chinook minimum size limit and the same gear restrictions as in 2017. All fish caught in the area must be landed in the area. This opening could be modified following Council review at its March 2018 meeting.

—Point Arena to Pigeon Point (San Francisco)

August 1–29;

September 1–30 (C.9.b).

Seven days per week. All salmon except coho (C.4, C.7). Chinook

minimum size limit of 27 inches total length prior to September 1, 26 inches thereafter (B, C.1). All fish must be landed in California. All salmon caught in California prior to September 1 must be landed and offloaded no later than 11:59 p.m., August 30 (C.6). In September, all fish must be landed south of Point Arena until the quota in the Fort Bragg fishery is met and the fishery has closed for 24 hours (C.6). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3).

• Point Reyes to Point San Pedro (Fall Area Target Zone)

October 2–6 and 9–13.

Five days per week, Monday through Friday. All salmon except coho (C.4, C.7). Chinook minimum size limit of 26 inches total length (B, C.1). All fish caught in this area must be landed between Point Arena and Pigeon Point (C.6). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3).

—Pigeon Point to U.S./Mexico border (Monterey)

May 1–31;

June 1–30 (C.9.b).

Seven days per week. All salmon except coho (C.4, C.7). Chinook minimum size limit of 27 inches total length (B, C.1). All fish must be landed in California. All salmon caught in California prior to September 1 must be landed and offloaded no later than 11:59 p.m., August 30 (C.6). See compliance requirements (C.1) and gear restrictions and definitions (C.2, C.3).

California State regulations require all salmon be made available to a CDFW representative for sampling immediately at port of landing. Any person in possession of a salmon with a missing adipose fin, upon request by an authorized agent or employee of the CDFW, shall immediately relinquish the head of the salmon to the state (California Fish and Game Code § 8226).

B. Minimum Size (Inches) (See C.1)

Area (when open)	Chinook		Coho		Pink
	Total length	Head-off	Total length	Head-off	
North of Cape Falcon, OR	28.0	21.5	16	12	None.
Cape Falcon to Humbug Mountain	28.0	21.5			None.
Humbug Mountain to OR/CA border					
OR/CA border to Humboldt South Jetty					
Horse Mountain to Point Arena	27.0	20.5			None.
Point Arena to Pigeon Point:					
Prior to September 1	27.0	20.5			None.
September 1 and thereafter	26.0	19.5			None.
Pigeon Point to U.S./Mexico border	27.0	20.5			None.

Metric equivalents: 28.0 in = 71.1 cm, 27.0 in = 68.6 cm, 26.0 in = 66.0 cm, 21.5 in = 54.6 cm, 20.5 in = 52.1 cm, 19.5 in = 49.5 cm, 16.0 in = 40.6 cm, and 12.0 in = 30.5 cm.

C. Requirements, Definitions, Restrictions, or Exceptions

C.1. Compliance With Minimum Size or Other Special Restrictions

All salmon on board a vessel must meet the minimum size, landing/possession limit, or other special requirements for the area being fished and the area in which they are landed if the area is open or has been closed less than 48 hours for that species of salmon. Salmon may be landed in an area that has been closed for a species of salmon more than 48 hours only if they meet the minimum size, landing/possession limit, or other special requirements for the area in which they were caught. Salmon may not be filleted prior to landing.

Any person who is required to report a salmon landing by applicable state law must include on the state landing receipt for that landing both the number and weight of salmon landed by species. States may require fish landing/

receiving tickets be kept on board the vessel for 90 days or more after landing to account for all previous salmon landings.

C.2. Gear Restrictions

a. Salmon may be taken only by hook and line using single point, single shank, barbless hooks.

b. Cape Falcon, Oregon, to the Oregon/California border: No more than 4 spreads are allowed per line.

c. Oregon/California border to U.S./Mexico border: No more than 6 lines are allowed per vessel, and barbless circle hooks are required when fishing with bait by any means other than trolling.

C.3. Gear Definitions

Trolling defined: Fishing from a boat or floating device that is making way by means of a source of power, other than drifting by means of the prevailing water current or weather conditions.

Troll fishing gear defined: One or more lines that drag hooks behind a

moving fishing vessel. In that portion of the fishery management area off Oregon and Washington, the line or lines must be affixed to the vessel and must not be intentionally disengaged from the vessel at any time during the fishing operation.

Spread defined: A single leader connected to an individual lure and/or bait.

Circle hook defined: A hook with a generally circular shape and a point which turns inward, pointing directly to the shank at a 90° angle.

C.4. Vessel Operation in Closed Areas With Salmon on Board

a. Except as provided under C.4.b below, it is unlawful for a vessel to have troll or recreational gear in the water while in any area closed to fishing for a certain species of salmon, while possessing that species of salmon; however, fishing for species other than salmon is not prohibited if the area is open for such species, and no salmon are in possession.

b. *When Genetic Stock Identification (GSI) samples will be collected in an area closed to commercial salmon fishing, the scientific research permit holder shall notify NOAA Office of Law Enforcement, USCG, CDFW, WDFW, and Oregon State Police at least 24 hours prior to sampling and provide the following information:* The vessel name, date, location and time collection activities will be done. Any vessel collecting GSI samples in a closed area shall not possess any salmon other than those from which GSI samples are being collected. Salmon caught for collection of GSI samples must be immediately released in good condition after collection of samples.

C.5. Control Zone Definitions

a. *Cape Flattery Control Zone*—The area from Cape Flattery (48°23'00" N. lat.) to the northern boundary of the U.S. EEZ; and the area from Cape Flattery south to Cape Alava (48°10'00" N. lat.) and east of 125°05'00" W. long.

b. *Salmon Troll Yelloweye Rockfish Conservation Area (50 CFR 660.70(c))*—The area in Washington Marine Catch Area 3 from 48°00.00' N. lat.; 125°14.00' W. long. to 48°02.00' N. lat.; 125°14.00' W. long. to 48°02.00' N. lat.; 125°16.50' W. long. to 48°00.00' N. lat.; 125°16.50' W. long. and connecting back to 48°00.00' N. lat.; 125°14.00' W. long.

c. *Grays Harbor Control Zone*—The area defined by a line drawn from the Westport Lighthouse (46° 53'18" N. lat., 124°07'01" W. long.) to Buoy #2 (46°52'42" N. lat., 124°12'42" W. long.) to Buoy #3 (46°55'00" N. lat., 124°14'48" W. long.) to the Grays Harbor north jetty (46°55'36" N. lat., 124°10'51" W. long.).

d. *Columbia Control Zone*—An area at the Columbia River mouth, bounded on the west by a line running northeast/southwest between the red lighted Buoy #4 (46°13'35" N. lat., 124°06'50" W. long.) and the green lighted Buoy #7 (46°15'09" N. lat., 124°06'16" W. long.); on the east, by the Buoy #10 line which bears north/south at 357° true from the south jetty at 46°14'00" N. lat., 124°03'07" W. long. to its intersection with the north jetty; on the north, by a line running northeast/southwest between the green lighted Buoy #7 to the tip of the north jetty (46°15'48" N. lat., 124°05'20" W. long.), and then along the north jetty to the point of intersection with the Buoy #10 line; and, on the south, by a line running northeast/southwest between the red lighted Buoy #4 and tip of the south jetty (46°14'03" N. lat., 124°04'05" W. long.), and then along the south jetty to the point of intersection with the Buoy #10 line.

e. *Klamath Control Zone*—The ocean area at the Klamath River mouth bounded on the north by 41°38'48" N. lat. (approximately 6 nautical miles north of the Klamath River mouth); on the west by 124°23'00" W. long. (approximately 12 nautical miles off shore); and on the south by 41°26'48" N. lat. (approximately 6 nautical miles south of the Klamath River mouth).

f. Waypoints for the 40 fathom regulatory line from Cape Falcon to Humbug Mountain (50 CFR 660.71(k)).

- (12) 45°46.00' N. lat., 124°04.49' W. long.;
- (13) 45°44.34' N. lat., 124°05.09' W. long.;
- (14) 45°40.64' N. lat., 124°04.90' W. long.;
- (15) 45°33.00' N. lat., 124°04.46' W. long.;
- (16) 45°32.27' N. lat., 124°04.74' W. long.;

- (55) 43°13.72' N. lat., 124°33.25' W. long.;
- (56) 43°12.26' N. lat., 124°34.16' W. long.;
- (57) 43°10.96' N. lat., 124°32.33' W. long.;
- (58) 43°05.65' N. lat., 124°31.52' W. long.;
- (59) 42°59.66' N. lat., 124°32.58' W. long.;
- (60) 42°54.97' N. lat., 124°36.99' W. long.;
- (61) 42°53.81' N. lat., 124°38.57' W. long.;
- (62) 42°50.00' N. lat., 124°39.68' W. long.;
- (63) 42°49.13' N. lat., 124°39.70' W. long.;
- (64) 42°46.47' N. lat., 124°38.89' W. long.;
- (65) 42°45.74' N. lat., 124°38.86' W. long.;
- (66) 42°44.79' N. lat., 124°37.96' W. long.;
- (67) 42°45.01' N. lat., 124°36.39' W. long.;
- (68) 42°44.14' N. lat., 124°35.17' W. long.;
- (69) 42°42.14' N. lat., 124°32.82' W. long.;
- (70) 42°40.50' N. lat., 124°31.98' W. long.

C.6. Notification When Unsafe Conditions Prevent Compliance With Regulations

If prevented by unsafe weather conditions or mechanical problems from meeting special management area

landing restrictions, vessels must notify the U.S. Coast Guard and receive acknowledgment of such notification prior to leaving the area. This notification shall include the name of the vessel, port where delivery will be made, approximate amount of salmon (by species) on board, the estimated time of arrival, and the specific reason the vessel is not able to meet special management area landing restrictions.

In addition to contacting the U.S. Coast Guard, vessels fishing south of the Oregon/California border must notify CDFW within one hour of leaving the management area by calling 800-889-8346 and providing the same information as reported to the U.S. Coast Guard. All salmon must be offloaded within 24 hours of reaching port.

C.7. Incidental Halibut Harvest

During authorized periods, the operator of a vessel that has been issued an incidental halibut harvest license by the International Pacific Halibut Commission (IPHC) may retain Pacific halibut caught incidentally in Area 2A while trolling for salmon. Halibut retained must be no less than 32 inches in total length, measured from the tip of the lower jaw with the mouth closed to the extreme end of the middle of the tail, and must be landed with the head on. When halibut are caught and landed incidental to commercial salmon fishing by an IPHC license holder, any person who is required to report the salmon landing by applicable state law must include on the state landing receipt for that landing both the number of halibut landed, and the total dressed, head-on weight of halibut landed, in pounds, as well as the number and species of salmon landed.

License applications for incidental harvest must be obtained from the IPHC (phone: 206-634-1838). Applicants must apply prior to mid-March 2018 for 2018 permits (exact date to be set by the IPHC in early 2018). Incidental harvest is authorized only during April, May, and June of the 2017 troll seasons and after June 30 in 2017 if quota remains and if announced on the NMFS hotline (phone: 800-662-9825 or 206-526-6667). WDFW, ODFW, and CDFW will monitor landings. If the landings are projected to exceed the IPHC's 39,810 pound preseason allocation or the total Area 2A non-Indian commercial halibut allocation, NMFS will take inseason action to prohibit retention of halibut in the non-Indian salmon troll fishery.

May 1, 2017, through December 31, 2017, and April 1-30, 2018, license holders may land or possess no more than one Pacific halibut per each two

Chinook, except one Pacific halibut may be possessed or landed without meeting the ratio requirement, and no more than 35 halibut may be possessed or landed per trip. Pacific halibut retained must be no less than 32 inches in total length (with head on). IPHC license holders must comply with all applicable IPHC regulations.

Incidental Pacific halibut catch regulations in the commercial salmon troll fishery adopted for 2017, prior to any 2017 inseason action, will be in effect when incidental Pacific halibut retention opens on April 1, 2018 unless otherwise modified by inseason action at the March 2018 Council meeting.

a. "C-shaped" yelloweye rockfish conservation area is an area to be voluntarily avoided for salmon trolling. NMFS and the Council request salmon trollers voluntarily avoid this area in order to protect yelloweye rockfish. The area is defined in the Pacific Council Halibut Catch Sharing Plan in the North Coast subarea (Washington marine area 3), with the following coordinates in the order listed:

48°18' N. lat.; 125°18' W. long.;
48°18' N. lat.; 124°59' W. long.;
48°11' N. lat.; 124°59' W. long.;
48°11' N. lat.; 125°11' W. long.;
48°04' N. lat.; 125°11' W. long.;
48°04' N. lat.; 124°59' W. long.;
48°00' N. lat.; 124°59' W. long.;
48°00' N. lat.; 125°18' W. long.;
and connecting back to 48°18' N. lat.;
125°18' W. long.

C.8. Inseason Management

In addition to standard inseason actions or modifications already noted under the season description, the following inseason guidance applies:

a. Chinook remaining from the May through June non-Indian commercial troll harvest guideline north of Cape Falcon may be transferred to the July through September harvest guideline if the transfer would not result in exceeding preseason impact expectations on any stocks.

b. NMFS may transfer fish between the recreational and commercial fisheries north of Cape Falcon if there is agreement among the areas' representatives on the Salmon Advisory Subpanel (SAS), and if the transfer would not result in exceeding preseason impact expectations on any stocks.

c. At the March 2018 meeting, the Council will consider inseason recommendations for special regulations for any experimental fisheries (proposals must meet Council protocol and be received in November 2017).

d. If retention of unmarked coho is permitted by inseason action, the allowable coho quota will be adjusted to

ensure preseason projected impacts on all stocks is not exceeded.

e. Landing limits may be modified inseason to sustain season length and keep harvest within overall quotas.

C.9. State Waters Fisheries

Consistent with Council management objectives:

a. The State of Oregon may establish additional late-season fisheries in state waters.

b. The State of California may establish limited fisheries in selected state waters.

Check state regulations for details.

C.10. For the Purposes of California Fish and Game Code, Section 8232.5, the Definition of the KMZ for the Ocean Salmon Season Shall be That Area From Humboldt Mountain, Oregon, to Horse Mountain, California

Section 2. Recreational Management Measures for 2017 Ocean Salmon Fisheries

Parts A, B, and C of this section contain restrictions that must be followed for lawful participation in the fishery. Part A identifies each fishing area and provides the geographic boundaries from north to south, the open seasons for the area, the salmon species allowed to be caught during the seasons, and any other special restrictions effective in the area. Part B specifies minimum size limits. Part C specifies special requirements, definitions, restrictions and exceptions.

A. Season Description

North of Cape Falcon, OR

—U.S./Canada border to Cape Alava (Neah Bay Subarea)

June 24 through earlier of September 4 or 4,370 marked coho subarea quota with a subarea guideline of 7,900 Chinook (C.5).

Seven days per week. All salmon, except no chum beginning August 1; two fish per day. All coho must be marked with a healed adipose fin clip (C.1). Beginning August 1, Chinook non-retention east of the Bonilla-Tatoosh line (C.4.a) during Council managed ocean fishery. See gear restrictions and definitions (C.2, C.3). Inseason management may be used to sustain season length and keep harvest within the overall Chinook and coho recreational TACs for north of Cape Falcon (C.5).

—Cape Alava to Queets River (La Push Subarea)

June 24 through earlier of September 4 or 1,090 marked coho subarea quota with a subarea guideline of 2,500 Chinook (C.5).

Seven days per week. All salmon, two fish per day. All coho must be marked with a healed adipose fin clip. See gear restrictions and definitions (C.2, C.3). Inseason management may be used to sustain season length and keep harvest within the overall Chinook and coho recreational TACs for north of Cape Falcon (C.5).

—Queets River to Leadbetter Point (Westport Subarea)

July 1 through earlier of September 4 or 15,540 marked coho subarea quota with a subarea guideline of 21,400 Chinook (C.5).

Seven days per week. All salmon; two fish per day, no more than one of which can be a Chinook. All coho must be marked with a healed adipose fin clip (C.1). See gear restrictions and definitions (C.2, C.3). Grays Harbor Control Zone closed beginning August 14 (C.4.b). Inseason management may be used to sustain season length and keep harvest within the overall Chinook and coho recreational TACs for north of Cape Falcon (C.5).

—Leadbetter Point to Cape Falcon (Columbia River Subarea)

June 24 through earlier of September 4 or 21,000 marked coho subarea quota with a subarea guideline of 13,200 Chinook (C.5).

Seven days per week. All salmon; two fish per day, no more than one of which can be a Chinook. All coho must be marked with a healed adipose fin clip (C.1). See gear restrictions and definitions (C.2, C.3). Columbia Control Zone closed (C.4.c). Inseason management may be used to sustain season length and keep harvest within the overall Chinook and coho recreational TACs for north of Cape Falcon (C.5).

South of Cape Falcon, OR

—Cape Falcon to Humbug Mountain.

March 15 through October 31 (C.6), except as provided below during the all-salmon mark-selective and September non-mark-selective coho fisheries.

Seven days per week. All salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length (B). See gear restrictions and definitions (C.2, C.3).

- Non-mark-selective coho fishery: September 2 through the earlier of September 30 or a landed catch of 6,000 coho (C.5).

Seven days per week. All salmon, two fish per day (C.1). Chinook minimum size limit of 24 inches total length. Coho minimum size limit of 16 inches total length (B). See gear restrictions and definitions (C.2, C.3).

The all salmon except coho season reopens the earlier of October 1 or attainment of the coho quota (C.5). During October, the fishery is only open shoreward of the 40 fathom regulatory line (C.4.f).

In 2018, the season between Cape Falcon and Humbug Mountain will open March 15 for all salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length (B); and the same gear restrictions as in 2017 (C.2, C.3). This opening could be modified following Council review at the March 2018 Council meeting.

Fishing in the Stonewall Bank yelloweye rockfish conservation area restricted to trolling only on days the all depth recreational halibut fishery is open (call the halibut fishing hotline 1-800-662-9825 for specific dates) (C.3.b, C.4.d).

—Cape Falcon to Humbug Mountain

All-salmon mark-selective coho fishery: June 24 through the earlier of July 31 or a landed catch of 18,000 marked coho (C.5).

Seven days per week. All salmon, two fish per day. All retained coho must be marked with a healed adipose fin clip (C.1). Chinook minimum size limit of 24 inches total length. Coho minimum size limit of 16 inches total length (b). See gear restrictions and definitions (C.2, C.3). Any remainder of the mark-selective quota may be transferred on an impact neutral basis to the September non-mark-selective quota from Cape Falcon to Humbug Mountain. The all salmon except coho season reopens the earlier of August 1 or attainment of the coho quota (C.5.e).

Fishing in the Stonewall Bank Yelloweye Rockfish Conservation Area restricted to trolling only on days the all depth recreational halibut fishery is open (call the halibut fishing hotline 1-800-662-9825 for specific dates) (C.3.b, C.4.d).

—Humbug Mountain to Oregon/California border (Oregon KMZ)
Closed (C.6).

—Oregon/California border to Horse Mountain (California KMZ)
Closed (C.6).

—Horse Mountain to Point Arena (Fort Bragg)

April 1–May 31;

August 15–November 12 (C.6).

Seven days per week. All salmon except coho; two fish per day (C.1). Chinook minimum size limit of 20 inches total length (B). See gear restrictions and definitions (C.2, C.3).

In 2018, season opens April 7 for all salmon except coho; two fish per day

(C.1). Chinook minimum size limit of 20 inches total length (B); and the same gear restrictions as in 2017 (C.2, C.3). This opening could be modified following Council review at the March 2018 Council meeting.

—Point Arena to Pigeon Point (San Francisco)

April 1–30;

May 15–October 31 (C.6).

Seven days per week. All salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length through April 30, 20 inches thereafter (B). See gear restrictions and definitions (C.2, C.3).

In 2018, season opens April 7 for all salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length (B); and the same gear restrictions as in 2017 (C.2, C.3). This opening could be modified following Council review at the March 2018 Council meeting.

—Pigeon Point to Point Sur (Monterey North)

April 1–July 15 (C.6).

Seven days per week. All salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length (B). See gear restrictions and definitions (C.2, C.3).

In 2018, season opens April 7 for all salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length (B); and the same gear restrictions as in 2017 (C.2, C.3). This opening could be modified following Council review at the March 2018 Council meeting.

—Point Sur to U.S./Mexico border (Monterey South)

April 1–May 31 (C.6).

Seven days per week. All salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length (B). See gear restrictions and definitions (C.2, C.3).

In 2018, season opens April 7 for all salmon except coho; two fish per day (C.1). Chinook minimum size limit of 24 inches total length (B); and the same gear restrictions as in 2017 (C.2, C.3). This opening could be modified following Council review at the March 2018 Council meeting.

California State regulations require all salmon be made available to a CDFW representative for sampling immediately at port of landing. Any person in possession of a salmon with a missing adipose fin, upon request by an authorized agent or employee of the CDFW, shall immediately relinquish the head of the salmon to the state (California Code of Regulations Title 14 Section 1.73).

B. Minimum Size (Total Length in Inches) (See C.1)

Area (when open)	Chinook	Coho	Pink
North of Cape Falcon	24.0	16.0	None.
Cape Falcon to Humbug Mountain	24.0	16.0	None.
Humbug Mt. to OR/CA border.			
OR/CA border to Horse Mountain.			
Horse Mountain to Point Arena	20.0		20.0.
Point Arena to Pigeon Point:			
Through April 30	24.0		24.0.
After April 30	20.0		20.0.
Pigeon Point to Point Sur	24.0		24.0.
Point Sur to U.S./Mexico border	24.0		24.0.

Metric equivalents: 24.0 in = 61.0 cm, 20.0 in = 50.8 cm, and 16.0in = 40.6 cm.

C. Requirements, Definitions, Restrictions, or Exceptions

C.1. Compliance With Minimum Size and Other Special Restrictions

All salmon on board a vessel must meet the minimum size or other special requirements for the area being fished and the area in which they are landed if that area is open. Salmon may be landed in an area that is closed only if they meet the minimum size or other special requirements for the area in which they were caught. Salmon may not be filleted prior to landing.

Ocean Boat Limits: Off the coast of Washington, Oregon, and California, each fisher aboard a vessel may continue to use angling gear until the combined daily limits of Chinook and coho salmon for all licensed and juvenile anglers aboard have been attained (additional state restrictions may apply).

C.2. Gear Restrictions

Salmon may be taken only by hook and line using barbless hooks. All persons fishing for salmon, and all persons fishing from a boat with salmon on board, must meet the gear restrictions listed below for specific areas or seasons.

a. *U.S./Canada border to Point Conception, California:* No more than one rod may be used per angler; and no more than two single point, single shank barbless hooks are required for all fishing gear. [Note: ODFW regulations in the state-water fishery off Tillamook Bay may allow the use of barbed hooks to be consistent with inside regulations.]

b. *Horse Mountain, California, to Point Conception, California:* Single point, single shank, barbless circle hooks (see gear definitions below) are required when fishing with bait by any means other than trolling, and no more than two such hooks shall be used. When angling with two hooks, the distance between the hooks must not

exceed five inches when measured from the top of the eye of the top hook to the inner base of the curve of the lower hook, and both hooks must be permanently tied in place (hard tied). Circle hooks are not required when artificial lures are used without bait.

C.3. Gear Definitions

a. *Recreational fishing gear defined:* Off Oregon and Washington, angling tackle consists of a single line that must be attached to a rod and reel held by hand or closely attended; the rod and reel must be held by hand while playing a hooked fish. No person may use more than one rod and line while fishing off Oregon or Washington. Off California, the line must be attached to a rod and reel held by hand or closely attended; weights directly attached to a line may not exceed four pounds (1.8 kg). While fishing off California north of Point Conception, no person fishing for salmon, and no person fishing from a boat with salmon on board, may use more than one rod and line. Fishing includes any activity which can reasonably be expected to result in the catching, taking, or harvesting of fish.

b. *Trolling defined:* Angling from a boat or floating device that is making way by means of a source of power, other than drifting by means of the prevailing water current or weather conditions.

c. *Circle hook defined:* A hook with a generally circular shape and a point which turns inward, pointing directly to the shank at a 90° angle.

C.4. Control Zone Definitions

a. *The Bonilla-Tatoosh Line:* A line running from the western end of Cape Flattery to Tatoosh Island Lighthouse (48°23'30" N. lat., 124°44'12" W. long.) to the buoy adjacent to Duntze Rock (48°24'37" N. lat., 124°44'37" W. long.), then in a straight line to Bonilla Point (48°35'39" N. lat., 124°42'58" W. long.) on Vancouver Island, British Columbia.

b. *Grays Harbor Control Zone*—The area defined by a line drawn from the Westport Lighthouse (46°53'18" N. lat., 124°07'01" W. long.) to Buoy #2 (46°52'42" N. lat., 124°12'42" W. long.) to Buoy #3 (46°55'00" N. lat., 124°14'48" W. long.) to the Grays Harbor north jetty (46°55'36" N. lat., 124°10'51" W. long.).

c. *Columbia Control Zone:* An area at the Columbia River mouth, bounded on the west by a line running northeast/southwest between the red lighted Buoy #4 (46°13'35" N. lat., 124°06'50" W. long.) and the green lighted Buoy #7 (46°15'09" N. lat., 124°06'16" W. long.); on the east, by the Buoy #10 line which bears north/south at 357° true from the south jetty at 46°14'00" N. lat., 124°03'07" W. long. to its intersection with the north jetty; on the north, by a line running northeast/southwest between the green lighted Buoy #7 to the tip of the north jetty (46°15'48" N. lat., 124°05'20" W. long. and then along the north jetty to the point of intersection with the Buoy #10 line; and on the south, by a line running northeast/southwest between the red lighted Buoy #4 and tip of the south jetty (46°14'03" N. lat., 124°04'05" W. long.), and then along the south jetty to the point of intersection with the Buoy #10 line.

d. *Stonewall Bank Yelloweye Rockfish Conservation Area:* The area defined by the following coordinates in the order listed:

44°37.46' N. lat.; 124°24.92' W. long.
44°37.46' N. lat.; 124°23.63' W. long.
44°28.71' N. lat.; 124°21.80' W. long.
44°28.71' N. lat.; 124°24.10' W. long.
44°31.42' N. lat.; 124°25.47' W. long.
and connecting back to 44°37.46' N. lat.; 124°24.92' W. long.

e. *Klamath Control Zone:* The ocean area at the Klamath River mouth bounded on the north by 41°38'48" N. lat. (approximately 6 nautical miles north of the Klamath River mouth); on the west by 124°23'00" W. long. (approximately 12 nautical miles off

shore); and, on the south by 41°26'48" N. lat. (approximately 6 nautical miles south of the Klamath River mouth).

f. Waypoints for the 40 fathom regulatory line from Cape Falcon to Humbug Mountain (50 CFR 660.71(k)).

(12) 45°46.00' N. lat., 124°04.49' W. long.;

(13) 45°44.34' N. lat., 124°05.09' W. long.;

(14) 45°40.64' N. lat., 124°04.90' W. long.;

(15) 45°33.00' N. lat., 124°04.46' W. long.;

(16) 45°32.27' N. lat., 124°04.74' W. long.;

(17) 45°29.26' N. lat., 124°04.22' W. long.;

(18) 45°20.25' N. lat., 124°04.67' W. long.;

(19) 45°19.99' N. lat., 124°04.62' W. long.;

(20) 45°17.50' N. lat., 124°04.91' W. long.;

(21) 45°11.29' N. lat., 124°05.20' W. long.;

(22) 45°05.80' N. lat., 124°05.40' W. long.;

(23) 45°05.08' N. lat., 124°05.93' W. long.;

(24) 45°03.83' N. lat., 124°06.47' W. long.;

(25) 45°01.70' N. lat., 124°06.53' W. long.;

(26) 44°58.75' N. lat., 124°07.14' W. long.;

(27) 44°51.28' N. lat., 124°10.21' W. long.;

(28) 44°49.49' N. lat., 124°10.90' W. long.;

(29) 44°44.96' N. lat., 124°14.39' W. long.;

(30) 44°43.44' N. lat., 124°14.78' W. long.;

(31) 44°42.26' N. lat., 124°13.81' W. long.;

(32) 44°41.68' N. lat., 124°15.38' W. long.;

(33) 44°34.87' N. lat., 124°15.80' W. long.;

(34) 44°33.74' N. lat., 124°14.44' W. long.;

(35) 44°27.66' N. lat., 124°16.99' W. long.;

(36) 44°19.13' N. lat., 124°19.22' W. long.;

(37) 44°15.35' N. lat., 124°17.38' W. long.;

(38) 44°14.38' N. lat., 124°17.78' W. long.;

(39) 44°12.80' N. lat., 124°17.18' W. long.;

(40) 44°09.23' N. lat., 124°15.96' W. long.;

(41) 44°08.38' N. lat., 124°16.79' W. long.;

(42) 44°08.30' N. lat., 124°16.75' W. long.;

(43) 44°01.18' N. lat., 124°15.42' W. long.;

(44) 43°51.61' N. lat., 124°14.68' W. long.;

(45) 43°42.66' N. lat., 124°15.46' W. long.;

(46) 43°40.49' N. lat., 124°15.74' W. long.;

(47) 43°38.77' N. lat., 124°15.64' W. long.;

(48) 43°34.52' N. lat., 124°16.73' W. long.;

(49) 43°28.82' N. lat., 124°19.52' W. long.;

(50) 43°23.91' N. lat., 124°24.28' W. long.;

(51) 43°20.83' N. lat., 124°26.63' W. long.;

(52) 43°17.96' N. lat., 124°28.81' W. long.;

(53) 43°16.75' N. lat., 124°28.42' W. long.;

(54) 43°13.97' N. lat., 124°31.99' W. long.;

(55) 43°13.72' N. lat., 124°33.25' W. long.;

(56) 43°12.26' N. lat., 124°34.16' W. long.;

(57) 43°10.96' N. lat., 124°32.33' W. long.;

(58) 43°05.65' N. lat., 124°31.52' W. long.;

(59) 42°59.66' N. lat., 124°32.58' W. long.;

(60) 42°54.97' N. lat., 124°36.99' W. long.;

(61) 42°53.81' N. lat., 124°38.57' W. long.;

(62) 42°50.00' N. lat., 124°39.68' W. long.;

(63) 42°49.13' N. lat., 124°39.70' W. long.;

(64) 42°46.47' N. lat., 124°38.89' W. long.;

(65) 42°45.74' N. lat., 124°38.86' W. long.;

(66) 42°44.79' N. lat., 124°37.96' W. long.;

(67) 42°45.01' N. lat., 124°36.39' W. long.;

(68) 42°44.14' N. lat., 124°35.17' W. long.;

(69) 42°42.14' N. lat., 124°32.82' W. long.;

(70) 42°40.50' N. lat., 124°31.98' W. long.;

C.5. Inseason Management

Regulatory modifications may become necessary inseason to meet preseason management objectives such as quotas, harvest guidelines, and season duration. In addition to standard inseason actions or modifications already noted under the season description, the following inseason guidance applies:

a. Actions could include modifications to bag limits, or days open to fishing, or extensions or reductions in areas open to fishing.

b. Coho may be transferred inseason among recreational subareas north of Cape Falcon to help meet the recreational season duration objectives (for each subarea) after conferring with representatives of the affected ports and the Council's SAS recreational representatives north of Cape Falcon, and if the transfer would not result in exceeding preseason impact expectations on any stocks.

c. Chinook and coho may be transferred between the recreational and commercial fisheries north of Cape Falcon if there is agreement among the representatives of the SAS, and if the transfer would not result in exceeding preseason impact expectations on any stocks.

d. Fishery managers may consider inseason action modifying regulations restricting retention of unmarked coho. To remain consistent with preseason expectations, any inseason action shall consider, if significant, the difference between observed and preseason forecasted mark rates. Such a consideration may also include a change in bag limit of two salmon, no more than one of which may be a coho.

e. Marked coho remaining from the Cape Falcon to Humbug Mountain recreational mark-selective coho quota may be transferred inseason to the Cape Falcon to Humbug Mountain non-mark-selective recreational fishery if the transfer would not result in exceeding preseason impact expectations on any stocks.

C.6. Additional Seasons in State Territorial Waters

Consistent with Council management objectives, the States of Washington, Oregon, and California may establish limited seasons in state waters. Check state regulations for details.

Section 3. Treaty Indian Management Measures for 2017 Ocean Salmon Fisheries

Parts A, B, and C of this section contain requirements that must be followed for lawful participation in the fishery.

A. Season Descriptions

May 1 through the earlier of June 30 or 20,000 Chinook quota.

All salmon except coho. If the Chinook quota for the May–June fishery is not fully utilized, the excess fish may be transferred into the later all-salmon season (C.5.a). If the Chinook quota is exceeded, the excess will be deducted from the later all-salmon season (C.5). See size limit (B) and other restrictions (C).

July 1 through the earlier of September 15, or 20,000 Chinook quota (C.5), or 12,500 coho quota.

All salmon. See size limit (B) and other restrictions (C).

B. Minimum Size (Inches)

Area (when open)	Chinook		Coho		Pink
	Total	Head-off	Total	Head-off	
North of Cape Falcon	24.0	18.0	16.0	12.0	None.

Metric equivalents: 24.0 in = 61.0 cm, 18.0 in = 45.7 cm, 12.0 in = 30.5 cm.

C. Requirements, Restrictions, and Exceptions

C.1. Tribe and Area Boundaries.

All boundaries may be changed to include such other areas as may hereafter be authorized by a Federal court for that tribe's treaty fishery.

S'KLALLAM—Washington State Statistical Area 4B (All).

MAKAH—Washington State Statistical Area 4B and that portion of the FMA north of 48°02'15" N. lat. (Norwegian Memorial) and east of 125°44'00" W. long.

QUILEUTE—That portion of the FMA between 48°10'00" N. lat. (Cape Alava.) and 47°31'42" N. lat. (Queets River) and east of 125°44'00" W. long.

HOH—That portion of the FMA between 47°54'18" N. lat. (Quillayute River) and 47°21'00" N. lat. (Quinault River) and east of 125°44'00" W. long.

QUINAULT—That portion of the FMA between 47°40'06" N. lat. (Destruction Island) and 46°53'18" N. lat. (Point Chehalis) and east of 125°08'30" W. long.

C.2. Gear Restrictions

a. Single point, single shank, barbless hooks are required in all fisheries.

b. No more than eight fixed lines per boat.

c. No more than four hand held lines per person in the Makah area fishery (Washington State Statistical Area 4B and that portion of the FMA north of 48°02'15" N. lat. (Norwegian Memorial) and east of 125°44'00" W. long.).

C.3. Quotas

a. The quotas include troll catches by the S'Klallam and Makah tribes in Washington State Statistical Area 4B from May 1 through September 15.

b. The Quileute Tribe will continue a ceremonial and subsistence fishery during the time frame of September 15 through October 15 in the same manner as in 2004–2015. Fish taken during this fishery are to be counted against treaty troll quotas established for the 2017 season (estimated harvest during the September-October ceremonial and subsistence fishery: 20 Chinook; 40 coho).

C.4. Area Closures

a. The area within a six nautical mile radius of the mouths of the Queets River (47°31'42" N. lat.) and the Hoh River (47°45'12" N. lat.) will be closed to commercial fishing.

b. A closure within two nautical miles of the mouth of the Quinault River (47°21'00" N. lat.) may be enacted by the Quinault Nation and/or the State of Washington and will not adversely affect the Secretary of Commerce's management regime.

C.5. Inseason Management: In Addition to Standard Inseason Actions or Modifications Already Noted Under the Season Description, the Following Inseason Guidance Applies

a. Chinook remaining from the May through June treaty-Indian ocean troll harvest guideline north of Cape Falcon may be transferred to the July through September harvest guideline on a fishery impact equivalent basis.

Section 4. Halibut Retention

Under the authority of the Northern Pacific Halibut Act, NMFS promulgated regulations governing the Pacific halibut fishery, which appear at 50 CFR part 300, subpart E. On March 7, 2017, NMFS published a rule announcing the IPHC's regulations, and fishery regulations for U.S. waters off Alaska (82 FR 12730). On April 20, 2017, NMFS published a final rule (82 FR 18581) approving and implementing the Area 2A (U.S. West Coast) Pacific halibut Catch Sharing Plan and the Area 2A management measures for 2017. The Catch Sharing Plan, in combination with the IPHC regulations, provides that vessels participating in the salmon troll fishery in Area 2A, which have obtained the appropriate IPHC license, may retain halibut caught incidentally during authorized periods in conformance with provisions published with the annual salmon management measures. A salmon troller may participate in the halibut incidental catch fishery during the salmon troll season or in the directed commercial fishery targeting halibut, but not both.

The following measures have been approved by the IPHC, and

implemented by NMFS. During authorized periods, the operator of a vessel that has been issued an incidental halibut harvest license may retain Pacific halibut caught incidentally in Area 2A while trolling for salmon. Halibut retained must be no less than 32 inches (81.28 cm) in total length, measured from the tip of the lower jaw with the mouth closed to the extreme end of the middle of the tail, and must be landed with the head on.

License applications for incidental harvest must be obtained from the IPHC (phone: 206–634–1838). Applicants must apply prior to mid-March 2018 for 2018 permits (exact date to be set by the IPHC in early 2018). Incidental harvest is authorized only during April, May, and June of the 2017 troll seasons and after June 30 in 2017 if quota remains and if announced on the NMFS hotline (phone: 1–800–662–9825 or 206–526–6667). WDFW, ODFW, and CDFW will monitor landings. If the landings are projected to exceed the 39,810 pound preseason allocation or the total Area 2A non-Indian commercial halibut allocation, NMFS will take inseason action to prohibit retention of halibut in the non-Indian salmon troll fishery.

May 1, 2017, through December 31, 2017, and April 1–30, 2018, license holders may land or possess no more than one Pacific halibut per each two Chinook, except one Pacific halibut may be possessed or landed without meeting the ratio requirement, and no more than 35 halibut may be possessed or landed per trip. Pacific halibut retained must be no less than 32 inches in total length (with head on). IPHC license holders must comply with all applicable IPHC regulations.

Incidental Pacific halibut catch regulations in the commercial salmon troll fishery adopted for 2017, prior to any 2017 inseason action, will be in effect when incidental Pacific halibut retention opens on April 1, 2018, unless otherwise modified by inseason action at the March 2018 Council meeting.

NMFS and the Council request that salmon trollers voluntarily avoid a "C-shaped" YRCA (also known as the

Salmon Troll YRCA) in order to protect yelloweye rockfish. Coordinates for the Salmon Troll YRCA are defined at 50 CFR 660.70(a) in the North Coast subarea (Washington marine area 3). See Section 1.C.7. in this document for the coordinates.

Section 5. Geographical Landmarks

Wherever the words “nautical miles off shore” are used in this document, the distance is measured from the baseline from which the territorial sea is measured.

Geographical landmarks referenced in this document are at the following locations:

Cape Flattery, WA	48°23'00" N. lat.
Cape Alava, WA	48°10'00" N. lat.
Queets River, WA	47°31'42" N. lat.
Leadbetter Point, WA	46°38'10" N. lat.
Cape Falcon, OR	45°46'00" N. lat.
Florence South Jetty, OR	44°00'54" N. lat.
Humbog Mountain, OR	42°40'30" N. lat.
Oregon-California border	42°00'00" N. lat.
Humboldt South Jetty, CA	40°45'53" N. lat.
Horse Mountain, CA	40°05'00" N. lat.
Point Arena, CA	38°57'30" N. lat.
Point Reyes, CA	37°59'44" N. lat.
Point San Pedro, CA	37°35'40" N. lat.
Pigeon Point, CA	37°11'00" N. lat.
Point Sur, CA	36°18'00" N. lat.
Point Conception, CA	34°27'00" N. lat.

Section 6. Inseason Notice Procedures

Notice of inseason management actions will be provided by a telephone hotline administered by the West Coast Region, NMFS, 1-800-662-9825 or 206-526-6667, and by USCG Notice to Mariners broadcasts. These broadcasts are announced on Channel 16 VHF-FM and 2182 KHz at frequent intervals. The announcements designate the channel or frequency over which the Notice to Mariners will be immediately broadcast. Inseason actions will also be published in the **Federal Register** as soon as practicable. Since provisions of these management measures may be altered by inseason actions, fishermen should monitor either the telephone hotline or Coast Guard broadcasts for current

information for the area in which they are fishing.

Classification

This final rule is necessary for conservation and management of Pacific coast salmon stocks and is consistent with the Magnuson-Stevens Act and other applicable law. These regulations are being promulgated under the authority of 16 U.S.C. 1855(d) and 16 U.S.C. 773(c).

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Assistant Administrator for Fisheries finds good cause under 5 U.S.C. 553(b)(B), to waive the requirement for prior notice and opportunity for public comment, as such procedures would be impracticable and contrary to the public interest.

The annual salmon management cycle begins May 1 and continues through April 30 of the following year. May 1 was chosen because the pre-May harvests constitute a relatively small portion of the annual catch. The time frame of the preseason process for determining the annual modifications to ocean salmon fishery management measures depends on when the pertinent biological data are available. Salmon stocks are managed to meet annual spawning escapement goals or specific exploitation rates. Achieving either of these objectives requires designing management measures that are appropriate for the ocean abundance predicted for that year. These pre-season abundance forecasts, which are derived from previous years' observed spawning escapement, vary substantially from year to year, and are not available until January or February because spawning escapement continues through the fall.

The preseason planning and public review process associated with developing Council recommendations is initiated in February as soon as the forecast information becomes available. The public planning process requires coordination of management actions of four states, numerous Indian tribes, and the Federal Government, all of which have management authority over the stocks. This complex process includes the affected user groups, as well as the general public. The process is compressed into a two-month period culminating with the April Council meeting at which the Council adopts a recommendation that is forwarded to NMFS for review, approval, and implementation of fishing regulations effective on May 1.

Providing opportunity for prior notice and public comments on the Council's recommended measures through a

proposed and final rulemaking process would require 30 to 60 days in addition to the two-month period required for development of the regulations. Delaying implementation of annual fishing regulations, which are based on the current stock abundance projections, for an additional 60 days would require that fishing regulations for May and June be set in the previous year, without the benefit of information regarding current stock status. For the 2017 fishing regulations, the current stock status was not available to the Council until February. Because a substantial amount of fishing occurs during May and June, managing the fishery with measures developed using the prior year's data could have significant adverse effects on the managed stocks, including ESA-listed stocks. Although salmon fisheries that open prior to May are managed under the prior year's measures, as modified by the Council at its March meeting, relatively little harvest occurs during that period (e.g., on average, less than 5 percent of commercial and recreational harvest occurred prior to May 1 during the years 2001 through 2015). Allowing the much more substantial harvest levels normally associated with the May and June salmon seasons to be promulgated under the prior year's regulations would impair NMFS' ability to protect weak and ESA-listed salmon stocks, and to provide harvest opportunity where appropriate. The choice of May 1 as the beginning of the regulatory season balances the need to gather and analyze the data needed to meet the management objectives of the Salmon FMP and the need to manage the fishery using the best available scientific information.

If these measures are not in place on May 1, salmon fisheries will not open as scheduled, or would open based on 2016 management measures which do not account for 2017 abundance projections without inseason action by NMFS. This would result in lost fishing opportunity, negative economic impacts, and confusion for the public as the state fisheries adopt concurrent regulations that conform to the Federal management measures.

Overall, the annual population dynamics of the various salmon stocks require managers to adjust the season structure of the West Coast salmon fisheries to both protect weaker stocks and give fishers access to stronger salmon stocks, particularly hatchery produced fish. Failure to implement these measures immediately could compromise the status of certain stocks, or result in foregone opportunity to harvest stocks whose abundance has

increased relative to the previous year thereby undermining the purpose of this agency action.

In addition, public comment was received and considered by the Council and NMFS throughout the process of developing these management measures. As described above, the Council took comment at its March and April meetings, and heard summaries of comments received at public meetings held between the March and April meetings in each of the coastal states. NMFS also invited comments in a notice published prior to the March Council meeting, and considered comments received by the Council through its representative on the Council. Thus, these measures were developed with significant public input.

Based upon the above-described need to have these measures effective on May 1 and the fact that there is limited time available to implement these new measures after the final Council meeting in April and before the commencement of the ocean salmon fishing year on May 1, NMFS has concluded it is impracticable and contrary to the public interest to provide an opportunity for prior notice and public comment under 5 U.S.C. 553(b)(B).

The Assistant Administrator for Fisheries also finds that good cause exists under 5 U.S.C. 553(d)(3), to waive the 30-day delay in effectiveness of this final rule. As previously discussed, data were not available until February and management measures were not finalized until mid-April. These measures are essential to conserve threatened and endangered ocean salmon stocks, and to provide for harvest of more abundant stocks. Delaying the effectiveness of these measures by 30 days could compromise the ability of some stocks to attain their conservation objectives, preclude harvest opportunity, and negatively impact anticipated international, state, and tribal salmon fisheries, thereby undermining the purposes of this agency action and the requirements of the Magnuson-Stevens Act.

To enhance the fishing industry's notification of these new measures, and to minimize the burden on the regulated community required to comply with the new regulations, NMFS is announcing the new measures over the telephone hotline used for inseason management actions and is posting the regulations on its West Coast Region Web site (<http://www.westcoast.fisheries.noaa.gov>). NMFS is also advising the states of Washington, Oregon, and California on the new management measures. These states announce the seasons for applicable state and Federal fisheries through their own public notification systems.

Because prior notice and an opportunity for public comment are not required to be provided for these portions of this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are not applicable. Accordingly, no Regulatory Flexibility Analysis is required for this portion of the rule and none has been prepared.

This action contains collection-of-information requirements subject to the Paperwork Reduction Act (PRA), and which have been approved by the Office of Management and Budget (OMB) under control number 0648-0433. The current information collection approval expires on July 31, 2017; renewal of this approval has been submitted to OMB and approval is pending. The public reporting burden for providing notifications if landing area restrictions cannot be met is estimated to average 15 minutes per response. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless

that collection of information displays a currently valid OMB control number.

NMFS has current ESA biological opinions that cover fishing under these regulations on all listed salmon species. NMFS reiterated their consultation standards for all ESA listed salmon and steelhead species in their annual Guidance letter to the Council dated March 3, 2017. Some of NMFS past biological opinions have found no jeopardy, and others have found jeopardy, but provided reasonable and prudent alternatives to avoid jeopardy. The management measures for 2017 are consistent with the biological opinions that found no jeopardy, and with the reasonable and prudent alternatives in the jeopardy biological opinions. The Council's recommended management measures therefore comply with NMFS' consultation standards and guidance for all listed salmon species which may be affected by Council fisheries. In some cases, the recommended measures are more restrictive than NMFS' ESA requirements.

In 2009, NMFS consulted on the effects of fishing under the Salmon FMP on the endangered Southern Resident Killer Whale Distinct Population Segment (SRKW) and concluded the salmon fisheries were not likely to jeopardize SRKW. The 2017 salmon management measures are consistent with the terms of that biological opinion.

This final rule was developed after meaningful and collaboration with the affected tribes. The tribal representative on the Council made the motion for the regulations that apply to the tribal fisheries.

Authority: 16 U.S.C. 773–773k; 1801 *et seq.*

Dated: April 25, 2017.

Alan D. Risenhoover,
*Acting Deputy Assistant Administrator for
Regulatory Programs, National Marine
Fisheries Service.*

BILLING CODE 3510–22–P

Proposed Rules

Federal Register

Vol. 82, No. 81

Friday, April 28, 2017

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2017-0395; Directorate Identifier 2017-CE-011-AD]

RIN 2120-AA64

Airworthiness Directives; British Aerospace Regional Aircraft Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for British Aerospace Regional Aircraft Model HP.137 Jetstream Mk.1, Jetstream Series 200 and 3101, and Jetstream Model 3201 airplanes that would supersede AD 97-10-05. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as cracks in the main landing gear (MLG) fitting at the pintle to cylinder interface, which could cause failure of the MLG during takeoff and landing. We are issuing this proposed AD to require actions to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by June 12, 2017.

ADDRESSES: You may send comments by any of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- **Fax:** (202) 493-2251.
- **Mail:** U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- **Hand Delivery:** U.S. Department of Transportation, Docket Operations, M-

30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For the British Aerospace Jetstream Series 3100 and 3200 service information identified in this proposed AD, contact BAE Systems (Operations) Ltd, Business Support Team-Technical Publications, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; phone: +44 1292 675207; fax: +44 1292 675704; email: RApublications@baesystems.com; Internet: https://www.regional-services.com/spares_and_support/support/aircraft-technical-publications/. For the Heroux Devtek service information identified in this proposed AD, contact Heroux Devtek Product Support, Unit 1, Pembroke Court, Chancellor Road, Manor Park, Runcorn, Cheshire, WA7 1TG, England; phone: +44 01928 530530; fax: +44 01928 579454; email: technical_support@herouxdevtek.com; Internet: <http://www.herouxdevtek.com/aog-product-support>. You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2017-0395; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4059; fax: (816) 329-4090; email: doug.rudolph@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2017-0395; Directorate Identifier 2017-CE-011-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On December 9, 1996, we issued AD 97-10-05, Amendment 39-10017 (62 FR 28318; May 23, 1997) ("AD 97-10-05"). That AD required actions intended to address an unsafe condition on British Aerospace Regional Aircraft Model HP.137 Jetstream Mk.1, Jetstream Series 200 and 3101, and Jetstream Model 3201 airplanes and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA AD 2017-0053, dated March 24, 2017 (referred to after this as "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

Cracks were found during early fatigue testing and in service on the main landing gear (MLG) main fitting at the pintle to cylinder interface.

This condition, if not detected and corrected, could lead to structural failure of the MLG, possibly resulting in loss of control of the aeroplane during take-off or landing runs.

To address this unsafe condition, BAE Systems (Operations) Ltd published several Service Bulletins (SB) which, in 1996, were consolidated into a single SB 32-JA960142 to provide instructions for inspection. CAA UK issued AD 005-03-96 accordingly to require repetitive inspections of the MLG.

Recently, a crack was found which was below the critical crack length, but unusually large compared to other similar cracks

previously found in service. Further investigation into the subject determined that the existing inspection interval remains valid, but also showed that the assumed detectable defect size of 1.27 mm (0.05 in) crack cannot be guaranteed using the current accomplishment instructions for high frequency eddy current (HFEC) or fluorescent dye penetrant (FDP) inspection.

Consequently, BAE Systems (Operations) Ltd issued SB 32-JA960142 Revision 04, which provides improved procedures for HFEC and FDP inspection to ensure the detection of cracks of 1.27 mm (0.05 in).

For the reason described above, the [EASA] AD retains the requirements of CAA UK AD 005-03-96, which is superseded, and requires accomplishment of repetitive inspections in accordance with the improved procedures.

You may examine the MCAI on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2017-0395.

Related Service Information Under 14 CFR Part 51

We reviewed British Aerospace Jetstream Series 3100 and 3200 Service Bulletin 32-JA960142, Revision No. 4, October 21, 2016, which describes procedures for doing non-destructive testing for cracks in the MLG and corrective actions if cracks found exceed a certain crack length. (The appendix to the service bulletin specifically describes fluorescent liquid penetrant testing.) We reviewed Heroux Devtek Service Bulletin 32-56, Revision 4, dated August 16, 2016, which describes procedures for doing a non-destructive testing eddy current inspection for cracks in the MLG. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section of this NPRM.

FAA's Determination and Requirements of the Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD will affect 26 products of U.S. registry. We also estimate that it would take about 6 work-hours per product to

comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour.

Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be \$13,260, or \$510 per product.

In addition, we estimate that any necessary follow-on actions would take about 1 work-hour and require parts costing \$5,000, for a cost of \$5,085 per product. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Amendment 39-10017 (62 FR 28318; May 23, 1997), and adding the following new AD:

British Aerospace Regional Aircraft: Docket No. FAA-2017-0395; Directorate Identifier 2017-CE-011-AD.

(a) Comments Due Date

We must receive comments by June 12, 2017.

(b) Affected ADs

This AD replaces AD 97-10-05; Amendment 39-10017 (62 FR 28318; May 23, 1997) ("AD 97-10-05").

(c) Applicability

This AD applies to British Aerospace Regional Aircraft Model HP.137 Jetstream Mk.1, Jetstream Series 200 and 3101, and Jetstream Model 3201 airplanes, all serial numbers, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 32: Landing Gear.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as cracks in the main landing gear (MLG) fitting at the pintle to cylinder interface, which could cause failure of the MLG during takeoff and landing. We are issuing this proposed AD to detect and correct cracks in the main landing gear (MLG), which could lead to structural failure of the MLG and could result in loss of control during takeoffs and landings.

(f) Actions and Compliance

Unless already done, do the following actions listed in paragraphs (f)(1) through (3) of this AD:

- (1) Within the compliance times listed in paragraph (f)(1)(i) or (ii) of this AD, as applicable, inspect the MLG for cracks following Appendix 1 of British Aerospace Jetstream Series 3100 and 3200 Service Bulletin 32-JA960142, Revision No. 4, October 21, 2016; or Heroux Devtek Service

Bulletin 32–56, Revision 4, dated August 16, 2016, as specified in British Aerospace Jetstream Series 3100 and 3200 Service Bulletin 32–JA960142, Revision No. 4, October 21, 2016.

(i) For airplanes that have been inspected following AD 97–10–05: Do the initial inspection within 1,200 flight cycles (FC) after the last inspection required by AD 97–10–05 and repetitively thereafter at intervals not to exceed 1,200 FC.

(ii) For airplanes that have not been inspected following AD 97–10–05: Do the initial inspection within 8,000 FC after installation of the MLG or within the next 100 FC after the effective date of this AD, whichever occurs later, and repetitively thereafter at intervals not to exceed 1,200 FC.

(2) If any cracks are found during any of the inspections required in paragraph (f)(1) of this AD, before further flight, replace the MLG with an airworthy part following British Aerospace Jetstream Series 3100 and 3200 Service Bulletin 32–JA960142, Revision No. 4, October 21, 2016.

(3) The compliance times in paragraphs (f)(1)(i) and (ii) of this AD are presented in flight cycles (landings). If the total flight cycles have not been kept, multiply the total number of airplane hours time-in-service (TIS) by 0.75 to calculate the cycles. For the purposes of this AD:

- (i) 100 hours TIS $\times$.75 = 75 cycles; and
- (ii) 1,000 hours TIS $\times$.75 = 750 cycles.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: doug.rudolph@faa.gov. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product*: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(h) Related Information

(1) Refer to MCAI European Aviation Safety Agency (EASA) AD 2017–0053, dated March 24, 2017. You may examine the MCAI on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2017–0395.

(2) For the British Aerospace Jetstream Series 3100 and 3200 service information related to this AD, contact BAE Systems (Operations) Ltd, Business Support Team-Technical Publications, Prestwick International Airport, Ayrshire, KA9 2RW,

Scotland, United Kingdom; phone: +44 1292 675207; fax: +44 1292 675704; email: RApublications@baesystems.com; Internet: https://www.regional-services.com/spares_and_support/support/aircraft-technical-publications/. For the Heroux Devtek service information identified in this proposed AD, contact Heroux Devtek Product Support, Unit 1, Pembroke Court, Chancellor Road, Manor Park, Runcorn, Cheshire, WA7 1TG, England; phone: +44 01928 530530; fax: +44 01928 579454; email: technical_support@herouxdevtek.com; Internet: <http://www.herouxdevtek.com/aog-product-support>.

(3) You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Issued in Kansas City, Missouri, on April 20, 2017.

[Docket No. FAA–2016–9594; Airspace Docket No. 16–ASO–20]

Proposed Establishment of Temporary Restricted Areas R–2920A and R–2920B; Santa Rosa Island, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM); withdrawal.

SUMMARY: This action withdraws the NPRM published in the **Federal Register** of February 23, 2017, proposing to establish temporary restricted areas R–2920A and R–2920B, Santa Rosa Island, FL, for the period May 11 to May 18, 2017. The proponent has informed the FAA that plans to conduct hazardous activities have been cancelled; therefore, a requirement no longer exists to establish temporary restricted areas.

DATES: The proposed rule published on February 23, 2017 at 82 FR 11415 is withdrawn as of 0901 UTC, April 28, 2017.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Policy Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8783.

SUPPLEMENTARY INFORMATION:

History

An NPRM was published in the **Federal Register** of February 23, 2017 (82 FR 11415), Docket No. FAA–2016–9594, to establish temporary restricted areas, designated as R–2920A and R–2920B, south of the Elgin Air Force Base Range Complex, in the vicinity of Santa Sosa Island, FL. The temporary restricted areas were proposed to contain hazardous activities to be used for the testing of counter-unmanned aircraft systems capabilities in support of exercise Black Dart 2017, from May 11 to May 18, 2017. The comment period closed on March 27, 2017. The FAA received five comments on the proposal. The proponent has informed the FAA that hazardous testing activities have been cancelled. Therefore, the NPRM is being withdrawn. As a result, the comments received on the proposal are no longer relevant.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2016–0514; FRL–9961–39–Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Maryland; Removal of Clean Air Interstate Rule (CAIR) Program Regulations and Reference to CAIR, and Amendments to Continuous Emission Monitor (CEM) Reference

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a

July 7, 2016 state implementation plan (SIP) revision submitted by the State of Maryland. The revision includes revised regulations which repealed Maryland's Clean Air Interstate Rule (CAIR) Program in its entirety, and which removed references to CAIR from other Maryland regulations that relate to general air quality definitions and to the control of emissions from pulp mills in Maryland. Additionally, the revision includes an amendment to a Maryland regulation regarding the use of continuous emission monitoring (CEM) systems at Kraft pulp mill boilers and combustion units in order to clarify that CEM systems must meet requirements beyond those only related to certification. The July 7, 2016 SIP submittal satisfies Maryland's obligation pursuant to an earlier rulemaking in which EPA granted final conditional approval of amendments regarding the control of emissions from Kraft pulp mills contingent upon Maryland addressing the monitoring issue. Final approval of the July 7, 2016 SIP revision will convert the prior conditional approval of the pulp mill regulations to a full approval. EPA is proposing to approve this revision to the Maryland SIP in accordance with the requirements of the Clean Air Act (CAA).

DATES: Written comments must be received on or before May 30, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R03-OAR-2016-0514 at <http://www.regulations.gov>, or via email to pino.maria@epa.gov. For comments submitted at Regulations.gov, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from Regulations.gov. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER**

INFORMATION CONTACT section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on

making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Ellen Schmitt, (215) 814-5787, or by email at schmitt.ellen@epa.gov.

SUPPLEMENTARY INFORMATION: On July 7, 2016, EPA received from the State of Maryland a formal submittal (#16-07) seeking a revision to its SIP.

I. Background

To help reduce interstate transport of ozone and fine particulate matter (PM_{2.5}) pollution in the eastern half of the United States, EPA finalized CAIR in May 2005.¹ CAIR addressed both the 1997 ozone and PM_{2.5} national ambient air quality standards (NAAQS) and required 28 states, including Maryland, to limit emissions of nitrogen oxides (NO_x) and sulfur dioxide (SO₂).² For CAIR, EPA developed three separate cap and trade programs that could be used to achieve the required reductions: The CAIR NO_x ozone season trading program, the CAIR annual NO_x trading program, and the CAIR SO₂ trading program.

On December 23, 2008, CAIR was remanded to EPA by the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit) in *North Carolina v. EPA*, 531 F.3d 896 (D.C. Cir. 2008), *modified on reh'g*, 550 F.3d 1176. The December 2008 D.C. Circuit ruling allowed CAIR to remain in effect until a new interstate transport rule consistent with the Court's opinion was developed. While EPA worked on developing a new rule to address the interstate transport of air pollution, the CAIR program continued as planned with the NO_x annual and ozone season programs beginning in 2009 and the SO₂ annual program beginning in 2010.

In response to the remand of CAIR, EPA promulgated the Cross State Air Pollution Rule (CSAPR) on July 6, 2011.³ CSAPR, which reduces emissions from electric generating units (EGUs), addresses the 1997 8-hour ozone NAAQS, the 1997 annual PM_{2.5} NAAQS and the 2006 24-hour PM_{2.5} NAAQS. The rule also contained provisions that would sunset CAIR-related obligations on a schedule coordinated with the implementation of CSAPR compliance requirements. CSAPR was to become effective January 1, 2012; however, the timing of CSAPR's implementation was impacted by a number of court actions. On December 30, 2011, the D.C. Circuit stayed CSAPR prior to its

implementation, and EPA was ordered to continue administering CAIR on an interim basis.⁴ In a subsequent decision on the merits, the Court vacated CSAPR based on a subset of petitioners' claims.⁵ However, on April 29, 2014, the U.S. Supreme Court reversed that decision and remanded the case to the D.C. Circuit for further proceedings.⁶ Throughout the initial round of D.C. Circuit proceedings and the ensuing Supreme Court proceedings, the stay on CSAPR remained in place, and EPA continued to implement CAIR.

Following the April 2014 Supreme Court decision, EPA filed a motion asking the D.C. Circuit to lift the stay in order to allow CSAPR to replace CAIR in an equitable and orderly manner while further D.C. Circuit proceedings were held to resolve remaining claims from petitioners. Additionally, EPA's motion requested to toll, by three years, all CSAPR compliance deadlines that had not passed as of the approval date of the stay. On October 23, 2014, the D.C. Circuit granted EPA's request, and on December 3, 2014 (79 FR 71663), in an interim final rule, EPA set the updated effective date of CSAPR as January 1, 2015 and tolled the implementation of CSAPR Phase I to 2015 and CSAPR Phase 2 to 2017. In accordance with the interim final rule, the sunset date for CAIR was December 31, 2014, and EPA began implementing CSAPR on January 1, 2015.⁷

II. Summary of SIP Revision

On July 7, 2016, EPA received from the State of Maryland a formal submittal (#16-07) seeking a revision to its SIP. As a result of CSAPR replacing CAIR, Maryland, in its July 7, 2016 submittal, requested that EPA remove from the Maryland SIP the CAIR program in its entirety, and references to CAIR located in other sections of the Code of Maryland Regulations (COMAR). Maryland's submittal seeks to remove the CAIR program by removing, in its entirety, COMAR 26.11.28 from Maryland's SIP because the CAIR program is now moot and has been replaced entirely by CSAPR. The July 7, 2016 SIP submittal also includes an amended definition of "NO_x Ozone Season Allowance" in COMAR 26.11.01.01B(24-1) which removed reference to CAIR, thereby directing

⁴ Order of December 30, 2011, in *EME Homer City Generation, L.P. v. EPA*, D.C. Cir. No. 11-1302.

⁵ *EME Homer City Generation, L.P. v. EPA*, 696 F.3d 7 (D.C. Cir. 2012), cert. granted 133 U.S. 2857 (2013).

⁶ *EPA v. EME Homer City Generation, L.P.*, 134 S. Ct. 1584, 1600-01 (2014).

⁷ At the present time, CSAPR is implemented in Maryland via a federal implementation plan (FIP).

¹ 70 FR 25172 (May 12, 2005).

² SO₂ is a precursor to PM_{2.5} formation, and NO_x is a precursor to both ozone and PM_{2.5} formation.

³ 76 FR 48208 (August 8, 2011).

affected sources to the “NO_x ozone season emission trading program,” which is currently CSAPR. The SIP revision also includes a revised version of COMAR 26.11.14. In COMAR 26.11.14.07C(1), there was a specific reference to COMAR 26.11.28, Maryland’s CAIR program, which is now moot and which Maryland requested EPA remove from the SIP. Maryland revised COMAR 26.11.14.07C(1) to remove reference to COMAR 26.11.28, while permitting the continued practice of allowing certain sources to use NO_x ozone season allowances as an alternative compliance method. Maryland has included revised COMAR 26.11.01.01 and 26.11.14.07, which includes 26.11.01.01B(24–1) and 26.11.14.07C(1), respectively, for incorporation by reference into the Maryland SIP.

Finally, the July 7, 2016 SIP submission includes an amended COMAR 26.11.14.07D(1) which removes the word “certified” in order to clarify that for Kraft pulp mill combustion units and boilers to meet the monitoring and reporting requirements, CEM systems must meet all the requirements of 40 CFR 75, subpart H, and not just the certification requirements for CEMs.

III. Summary of EPA Analysis

In this action, EPA proposes to approve the removal of COMAR 26.11.28, which incorporated the CAIR program, from the Maryland SIP. EPA also proposes to approve the removal of references to CAIR from other Maryland regulations located in the Maryland SIP that relate to general air quality definitions and to the control of emissions from pulp mills in Maryland. As mentioned previously in this preamble, the D.C. Circuit remanded CAIR to EPA in 2008; however, the Court left CAIR in place while EPA worked to develop a new interstate transport rule. CSAPR was promulgated to respond to the court’s concerns and to replace CAIR. The implementation of CSAPR was delayed for several years beyond its originally expected implementation timeframe of 2012 and therefore the sunset of CAIR was also deferred. CAIR was implemented through the 2014 compliance periods and was sunset and replaced by CSAPR on January 1, 2015, thereby making CAIR moot and any reference to CAIR inconsequential. Additionally, as a result of CSAPR replacing CAIR and the removal of Maryland’s CAIR program under COMAR 26.11.28, reference to CAIR in other Maryland regulations is inaccurate and misleading. Thus, removing reference to CAIR or COMAR 26.11.28 from the other Maryland

regulations mentioned in this action does not affect the sources impacted by the federal cap and trade program. Additionally, although EPA’s proposed action here removes the CAIR program from the Maryland SIP, this action is overall SIP strengthening as it removes a moot program no longer in operation. EPA has already replaced CAIR with CSAPR which operates through FIPs, and which yields overall NO_x and ozone reductions that are at least equal to or better than reductions from CAIR.⁸⁹

In addition, Maryland’s amendments to COMAR 26.11.01.01 and COMAR 26.11.14 (to remove references to CAIR) are in response to EPA’s conditional approval of a previous Maryland SIP submittal. Maryland SIP #14–04 was submitted on October 8, 2014 for inclusion in the Maryland SIP and included amendments to COMAR 26.11.14—Control of Kraft Pulp Mills.¹⁰ In a letter dated September 18, 2015, the Maryland Department of the Environment (MDE) committed to removing references to CAIR, which sunset on December 31, 2014, through a SIP revision. The amendments to COMAR 26.11.01.01 and COMAR 26.11.14, provided by Maryland’s SIP submittal #16–07, complete the actions required by EPA’s conditional approval of Maryland SIP submittal #14–04. 81 FR 59486 (August 30, 2016). Pursuant to section 110(k) of the CAA and as stated in the August 30, 2016 final conditional approval of COMAR 26.11.14 for Maryland’s October 8, 2014 SIP submittal, once EPA determines that MDE has satisfied the condition to remove references to CAIR, EPA shall remove the conditional nature of the August 30, 2016 approval. At that time, the October 8, 2014 SIP submission #14–04 will receive full approval status.¹¹

Finally, regarding Maryland’s amendments to COMAR 26.11.14.07D(1), the removal of the word “certified” from this portion of the

Maryland regulation is merely an administrative action to make clear that CEMs used by Kraft pulp mill combustion units and boilers must meet all of the requirements of 40 CFR part 75, subpart H, and not just the certification requirements for CEMs.

Based upon its review, EPA finds Maryland’s July 7, 2016 SIP submittal approvable under section 110 of the CAA as a SIP strengthening measure which removes moot provisions and makes minor administrative changes.

IV. Proposed Action

This action proposes to approve Maryland’s July 7, 2016 SIP submittal which seeks removal of Maryland’s CAIR program, in its entirety, from the SIP and also seeks the removal of references to CAIR from other Maryland regulations that relate to general air quality definitions and to the control of emissions from Kraft pulp mills in the State. EPA is also proposing to approve the amended version of COMAR 26.11.14.07D(1) for inclusion in the Maryland SIP as the amended version removes the word “certified” from COMAR 26.11.14.07D(1) in order to clarify the CEM system requirements for monitoring and reporting emissions from Kraft pulp mill boilers and combustion units.

Additionally, EPA proposes to find that Maryland’s July 7, 2016 SIP submittal satisfies Maryland’s obligation pursuant to EPA’s August 30, 2016 (81 FR 59486) rulemaking in which the Agency granted final conditional approval of amendments regarding the control of NO_x emissions at Kraft pulp mills. For this reason, EPA also proposes to remove the conditional nature of the August 30, 2016 conditional approval and proposes to grant full approval to the Maryland SIP revision regarding the control Kraft pulp mill emissions from various processes and fuel-burning equipment, submitted as #14–04 on October 15, 2014.

EPA is proposing to approve the Maryland SIP revision which was submitted on July 7, 2016. EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

V. Incorporation by Reference

In this proposed rule, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is proposing to incorporate by reference portions of MDE regulations COMAR 26.11.01 and COMAR 26.11.14 regarding air quality definitions and

⁸⁹ 76 FR 48208 (August 8, 2011).

⁹ According to section 110(l) of the CAA, the Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement of the Act.

¹⁰ The final rulemaking notice for EPA’s conditional approval of SIP submission #14–04 was published on August 30, 2016 (81 FR 59486) and addressed NO_x reductions for pulp mills in Maryland.

¹¹ Thus, once this proposed action to approve the July 7, 2016 SIP submission #16–07 is finalized, thereby finding Maryland has met the conditions within our August 30, 2016 conditional approval (81 FR 59486), the conditional approval of Maryland’s October 8, 2014 SIP submission #14–04 will be converted to full approval.

Kraft pulp mill emission controls to remove reference to CAIR which were discussed in section II (Summary of SIP Revision) of this preamble. EPA is also proposing to incorporate by reference the portion of COMAR 26.11.14 which removed the word “certified” from COMAR 26.11.14.07D(1). EPA has made, and will continue to make, these materials generally available through <http://www.regulations.gov> and/or at the EPA Region III Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a “significant regulatory action” subject to review by the Office

of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule, regarding the removal of the CAIR program under COMAR 26.11.28 from the Maryland SIP and amendments to COMAR 26.11.01 and 26.11.14, does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

April 25, 2017.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are required regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by May 30, 2017 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725-17th Street NW., Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@OMB.EOP.GOV or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Copies of the submission(s) may be obtained by calling (202) 720-8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs

potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: Farm Loan Program, General Program Administration.

OMB Control Number: 0560-0238.

Summary of Collection: Authority to establish the regulatory requirements contained in 7 CFR 761 and 7 CFR 763, is derived from 5 U.S.C. 301 which provides that "The Head of an Executive department or military department may prescribe regulations for the government of his department, the distribution and performance of its business . . ." The Secretary delegated authority to administer the provisions of the Act applicable to the Farm Loan Program (FLP) to the Under Secretary for Farm and Foreign Agricultural Service in section 2.16 of 7 CFR part 2. FLP provides loans to family farmers to purchase real estate equipment and finance agricultural production. The regulations covered by this information collection package describes, the policies and procedures the agency uses to provide supervised credit to direct FLP applicants and borrowers in accordance with the provisions of the Consolidated Farm and Rural Development Act (Pub. L. 87-128), as amended.

Need and use of the Information: Information collections are submitted by applicants and borrowers to the local FSA office serving the county in which their business is headquartered. The information is necessary to provide supervised credit as legislatively mandated and is used by Agency Officials to: (1) Ensure that when loan funds or insurance proceeds are used for construction and development, projects, work is completed according to applicable state and local requirements, and in a manner that protects the Agency's financial interest. (2) Ensure that the loan repayment plan is developed using realistic data, based on the actual history of the operation and any planned improvements. (3) Identify potential concerns limiting the success of the operation and develop a loan assessment outlining the course of action to be followed, to improve the operation so that commercial credit is available. The agency is mandated to

provide supervised credit; therefore, failure to collect the information, or collecting it less frequently, could result in the failure of the farm operation or loss of agency security property.

Description of Respondents: Business or other for-profit; Farms.

Number of Respondents: 84,983.

Frequency of Responses: Reporting: On occasion; Annually.

Total Burden Hours: 229,237.

Ruth Brown,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2017-0033]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Bovine Spongiform Encephalopathy; Importation of Animals and Animal Products

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with activities to prevent the introduction of bovine spongiform encephalopathy into the United States.

DATES: We will consider all comments that we receive on or before June 27, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2017-0033>.
- *Postal Mail/Commercial Delivery:*

Send your comment to Docket No. APHIS-2017-0033, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket

may be viewed at <http://www.regulations.gov/>

#!docketDetail;D=APHIS-2017-0033 or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations to prevent the introduction of bovine spongiform encephalopathy into the United States, contact Dr. Alexandra MacKenzie, Senior Staff Veterinarian, Live Animal Imports, NIES, VS, APHIS, 4700 River Road Unit 40, Riverdale, MD 20737-1236; 301-851-3411; and Dr. Magde S. Elshafie, Senior Staff Veterinary Medical Officer, NIES, VS, APHIS, 4700 River Road Unit 40, Riverdale, MD 20737, 301-851-3300. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at 301-851-2483.

SUPPLEMENTARY INFORMATION:

Title: Bovine Spongiform Encephalopathy; Importation of Animals and Animal Products.

OMB Control Number: 0579-0393.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Animal Health Protection Act (7 U.S.C. 8301 *et seq.*) authorizes the Secretary of Agriculture to, among other things, prohibit or restrict the importation and interstate movement of animals and animal products into or through the United States to prevent the introduction and dissemination of animal diseases and pests.

To guard against the introduction of animal diseases, the Animal and Plant Health Inspection Service (APHIS) regulates the importation of animals and animal products into the United States. The regulations in 9 CFR parts 92, 93, 94, 95, and 96 govern the importation of certain animals, birds, poultry, meat, and other animal products and byproducts into the United States to prevent the introduction of various animal diseases, including bovine spongiform encephalopathy (BSE), a chronic degenerative disease that affects the central nervous system of cattle.

Section 92.5 of the regulations provides that all countries of the world are considered by APHIS to be in one of three BSE risk categories: Negligible risk, controlled risk, or undetermined

risk. These risk categories are defined in § 92.1. Any region that is not classified by APHIS as presenting either negligible risk or controlled risk for BSE is considered to present an undetermined risk. Under the regulations, APHIS may classify a region for BSE in one of two ways. One way is for countries that have not received a risk classification from the World Organization for Animal Health (OIE) to request classification by APHIS. The other way is for APHIS to concur with the classification given to a country by the OIE.

To ensure BSE is not introduced into the United States, the regulations place specific conditions on the importation of animals and animal products. These requirements necessitate the use of several information collection activities, including, but not limited to, certifications, official identification, request for and retention of classification as negligible or controlled risk, declarations of importation, import and export certificates, applications, import and movement permits, agreements, certification statements, seals, notifications, and recordkeeping.

The information collection requirements above are currently approved by the Office of Management and Budget (OMB) under OMB control numbers 0579-0393 (Bovine Spongiform Encephalopathy; Importation of Bovines and Bovine Products) and 0579-0234 (Bovine Spongiform Encephalopathy; Importation of Animals and Animal Products). After OMB approves this combined information collection package (0579-0393), APHIS will retire OMB control number 0579-0234. We have also updated the title of this information collection to "Bovine Spongiform Encephalopathy; Importation of Animals and Animal Products."

We are asking the OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.52 hours per response.

Respondents: Shippers, hunters, U.S. importers of regulated animal products, herd owners (including hobby farms), salaried veterinarians of foreign nations, foreign exporters of processed animal protein and other regulated materials and products, accredited veterinarians, and slaughter facility managers.

Estimated annual number of respondents: 2,225.

Estimated annual number of responses per respondent: 238.

Estimated annual number of responses: 529,236.

Estimated total annual burden on respondents: 275,743 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 25th day of April 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS-2017-0004]

Notice of Request for Reinstatement of an Information Collection; Importation of Ruminant and Swine Hides, Bird Trophies, and Deer Hides

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Reinstatement of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a reinstatement of an information collection associated with the importation of ruminant and swine hides, bird trophies, and deer hides.

DATES: We will consider all comments that we receive on or before June 27, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/> *#!docketDetail;D=APHIS-2017-0004*.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2017-0004, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/> *#!docketDetail;D=APHIS-2017-0004* or in our reading Room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the importation of ruminant and swine hides, bird trophies, and deer hides, contact Dr. Lisa Dixon, Animal Products Import Director, NIES, VS, APHIS, 4700 River Road Unit 40, Riverdale, MD 20737; (301) 851-3373. Copies of this information collection can be obtained from Ms. Kimberly Hardy, the APHIS Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Ruminant and Swine Hides, Bird Trophies, and Deer Hides.

OMB Control Number: 0579-0307.

Type of Request: Reinstatement of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into and dissemination within the United States of livestock diseases and pests. To carry out this mission, APHIS regulates the importation of animals and animal products into the United States. The regulations are contained in title 9, parts 91 through 99, of the Code of Federal Regulations (CFR).

The regulations in 9 CFR part 95 (referred to below as the regulations) prohibit or restrict the importation of specified animal products into the

United States to prevent the introduction into the U.S. livestock population of certain contagious animal diseases. Sections 95.16 and 95.17 of the regulations contain, among other things, specific processing, recordkeeping, and certification requirements for untanned hides and skins and bird trophies.

The regulations require that shipments of hides be accompanied by certificates showing their origin and certifying that the hides are from areas free of certain animal diseases. Shipments of ruminant hides from Mexico must be accompanied by written statements indicating that the hides were frozen for 24 hours and treated for ticks. Shipments of bird trophies must be accompanied by certificates of origin certifying that the trophies are from regions free of exotic Newcastle disease and highly pathogenic avian influenza. These activities help ensure that the products do not harbor disease or ticks.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.2 hours per response.

Respondents: National government officials of the exporting country, owners of untanned ruminant and swine hides, and importers of untanned ruminant and swine hides.

Estimated number of respondents: 264.

Estimated number of responses per respondent: 2.59.

Estimated annual number of responses: 683.

Estimated total annual burden on respondents: 137 hours. (Due to

averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 24th day of April 2017.

Animal and Plant Health Inspection Service

[Docket No. APHIS-2017-0021]

General Conference Committee of the National Poultry Improvement Plan; Meeting

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of meeting.

SUMMARY: We are giving notice of a meeting of the General Conference Committee of the National Poultry Improvement Plan.

DATES: The General Conference Committee meeting will be held on May 18, 2017, from 7:30 a.m. to 12 p.m.

ADDRESSES: The General Conference Committee meeting will be held at the Doubletree by Hilton, 363 Maine Mall Road, Portland, ME 04106.

FOR FURTHER INFORMATION CONTACT: Dr. Denise Brinson, Senior Coordinator, National Poultry Improvement Plan, VS, APHIS, USDA, 1506 Klondike Road, Suite 101, Conyers, GA 30094; (770) 922-3496.

SUPPLEMENTARY INFORMATION: The General Conference Committee (the Committee) of the National Poultry Improvement Plan, representing cooperating State agencies and poultry industry members, serves an essential function by acting as liaison between the poultry industry and the Department in matters pertaining to poultry health.

Topics for discussion at the upcoming meeting include:

1. National Veterinary Services Laboratories (NVSL) Avian Influenza Update.
2. Animal and Plant Health Inspection Service/Veterinary Services Update.
3. Compartmentalization Program for Primary Breeders.
4. NVSL Salmonella Update.
5. New Diagnostic Tests.

The meeting will be open to the public. However, due to time constraints, the public will not be allowed to participate in the discussions during the meeting. Written statements on meeting topics may be filed with the Committee before or after the meeting by sending them to the person listed under **FOR FURTHER INFORMATION**

CONTACT. Written statements may also be filed at the meeting. Please refer to Docket No. APHIS-2017-0021 when submitting your statements.

This notice of meeting is given pursuant to section 10 of the Federal Advisory Committee Act (5 U.S.C. App. 2).

Done in Washington, DC, this 24th day of April 2017.

Jere L. Dick,

Acting Administrator, Animal and Plant Health Inspection Service.

Notice of Request for Extension of Approval of an Information Collection; Credit Account Approval for Reimbursable Services

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with credit account approval for reimbursable services.

DATES: We will consider all comments that we receive on or before June 27, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/> #!docketDetail;D=APHIS-2017-0032.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2017-0032, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket

may be viewed at <http://www.regulations.gov/> #!docketDetail;D=APHIS-2017-0032 or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on credit account approval for reimbursable services, contact Mrs. Kris Caraher, Accountant, Financial Management Division, APHIS, 4700 River Road Unit 55, Riverdale, MD 20737; (301) 851-2834. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Credit Account Approval for Reimbursable Services.

OMB Control Number: 0579-0055.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) provides the services of a Federal inspector to clear imported and exported agricultural commodities for animal and plant health purposes. These services are paid for by user fees during regular working hours. If an importer wishes to have shipments cleared at other hours, such services will usually be provided on a reimbursable overtime basis, unless already covered by a user fee. Exporters wishing cargo to be certified during nonworking hours may also utilize this procedure.

Many importers and exporters who require inspection services are repeat customers who request that APHIS bill them. The Agency needs to collect certain information to conduct a credit check on prospective applicants to ensure creditworthiness prior to extending credit services and to prepare billings. Also, the Debt Collection Improvement Act of 1996, as amended (31 U.S.C. 3332), requires that agencies collect tax identification numbers from all persons doing business with the Government for purposes of collecting delinquent debts. APHIS Form 192 (Application for Credit Account) is used to collect this information and must be completed before credit is extended.

We are asking the Office of Management and Budget (OMB) to approve our use of this information

collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 0.25 hours per response.

Respondents: Importers, exporters, or brokers who wish to set up an account for billing of inspection services provided during nonworking hours.

Estimated Annual Number of Responses: 261.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Annual Number of Responses: 261.

Estimated Total Annual Burden on Respondents: 65 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 25th day of April 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

Forest Service

National Advisory Committee for Implementation of the National Forest System Land Management Planning Rule

AGENCY: Forest Service, USDA.

ACTION: Notice of meetings.

SUMMARY: The National Advisory Committee for Implementation of the National Forest System Land Management Planning Rule Committee (Committee) will meet in Houston, Texas. Attendees may also listen via webinar and conference call. The Committee operates in compliance with the Federal Advisory Committee Act (FACA). Committee information can be found by visiting the Committee's Web site at: <http://www.fs.usda.gov/main/planningrule/committee>.

DATES: The meetings will be held in-person and streamed via webinar/conference call on the following dates and times:

- Tuesday, May 9, 2017 from 8:30 a.m. to 5:00 p.m. CST.
- Wednesday, May 10, 2017 from 8:30 a.m. to 5:00 p.m. CST.
- Thursday, May 11, 2017 from 8:30 a.m. to 1:00 p.m. CST.

All meetings are subject to cancellation. For updated status of meetings prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Woodlands Waterway Marriott Hotel and Convention Center, 1601 Lake Robbins Drive, The Woodlands, Texas. For anyone who would like to attend via webinar and/or conference call, please visit the Web site listed above or contact the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses, when provided, are placed in the record and available for public inspection and copying. The public may inspect comments received at the USDA Forest Service Washington Office—Yates Building. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT:

Crystal Merica, Committee Coordinator by phone at 202-205-3562, or by email at ckmerica@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to provide:

1. Continued deliberations on formulating advice for the Secretary,
2. Discussion of Committee work group findings,
3. Hearing public comments, and

4. Administrative tasks.

This meeting is open to the public. The agenda will include time for people to make oral comments of three minutes or less. Individuals wishing to make an oral comment should submit a request in writing by May 5, 2017, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the Committee may file written statements with the Committee's staff before or after the meeting. Written comments and time requests for oral comments must be sent to Crystal Merica, USDA Forest Service, Ecosystem Management Coordination, 201 14th Street SW., Mail Stop 1104, Washington, DC 20250-1104, or by email at ckmerica@fs.fed.us. The agenda and summary of the meeting will be posted on the Committee's Web site within 21 days of the meeting.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: April 13, 2017.

Glenn Casamassa,

Associate Deputy Chief, National Forest System.

DEPARTMENT OF COMMERCE

International Trade Administration

[C-122-858]

Certain Softwood Lumber Products From Canada: Preliminary Affirmative Countervailing Duty Determination, and Alignment of Final Determination With Final Antidumping Duty Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that countervailable subsidies are being provided to producers and exporters of certain softwood lumber products (softwood lumber) from Canada. The period of investigation is January 1, 2015, through December 31, 2015.

DATES: Effective April 28, 2017.

FOR FURTHER INFORMATION CONTACT:

Lana Nigro (Tolko), Toby Vandall (Canfor), Justin Neuman (JDIL), Patricia Tran (West Fraser), and Kristen Johnson (Resolute), AD/CVD Operations, Offices I and III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-1779, (202) 482-1664, (202) 482-0486, (202) 482-1503, and (202) 482-4793, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 703(b) of the Tariff Act of 1930, as amended (the Act). The Department published the notice of initiation of this investigation on December 22, 2017.¹ On February 2, 2017, the Department postponed the

preliminary determination of this investigation and the revised deadline is now April 24, 2017.²

On April 13, 2017, the Department preliminarily determined that critical circumstances exist with respect to certain companies.³ For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.⁴ A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>, and is available to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is softwood lumber from Canada. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the preamble to the Department's regulations,⁵ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, (*i.e.*, scope).⁶ Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice* as well as on additional language proposed by the Department. On March 29, 2017, a letter presenting a proposal for company exclusions was filed on behalf of the Government of Canada (GOC), Canadian

provincial and territorial governments, as well as the Canadian industry associations.⁷ The Department finds that it lacks the authority to conduct the requested company exclusion process in the context of this countervailing duty investigation (CVD) on softwood lumber from Canada.⁸

With respect to other proposed scope exclusions, including the request to exclude merchandise from certain provinces, the Department is inviting comments on those proposed exclusions and will incorporate the decisions into the final CVD and AD determinations after considering any relevant comments submitted in case and rebuttal briefs. Comments on any proposed scope exclusions are due no later than seven days of publication of this notice in the **Federal Register**. Please note that the Department will not accept any new factual information in these submissions. The Department intends to set the same deadline on the record of the companion AD investigation. For further information regarding proposed scope exclusions, see the Preliminary Decision Memorandum accompanying this notice.

Methodology

The Department is conducting this investigation in accordance with section 701 of the Act. For each of the subsidy programs found countervailable, the Department preliminarily determines that there is a subsidy, *i.e.*, a financial contribution by an "authority" that gives rise to a benefit to the recipient, and that the subsidy is specific.⁹

Alignment

As noted in the Preliminary Decision Memorandum, in accordance with section 705(a)(1) of the Act and 19 CFR 351.210(b)(4), the Department is aligning the final CVD determination in this investigation with the final determination in the companion AD

⁷ See letter from the Government of Canada, "Proposal for Company Exclusions," dated March 29, 2017; see also letter from the Government of New Brunswick, "Softwood Lumber from Canada: Proposals for Product- or Company-Based Exclusions from the CVD Investigation," dated March 31, 2017; letter from Government of British Columbia, "Certain Softwood Lumber Products from Canada: Comments in Support of Clarifying and Exclusionary Language Proposed by Canada Regarding the Scope of these Investigations," dated April 3, 2017.

⁸ See Memorandum from Gary Taverman, Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, dated April 24, 2017.

⁹ See sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

⁶ See *Initiation Notice*.

investigation of softwood lumber from Canada based on a request made by the petitioner.¹⁰ Consequently, the final CVD determination will be issued on the same date as the final AD determination, which is currently scheduled to be issued no later than September 6, 2017, unless postponed.

All-Others Rate

Sections 703(d) and 705(c)(5)(A) of the Act provide that in the preliminary determination, the Department shall determine an estimated all-others rate for companies not individually

examined. This rate shall be an amount equal to the weighted average of the estimated subsidy rates established for those companies individually examined, excluding any zero and *de minimis* rates and any rates based entirely under section 776 of the Act.

In this investigation, the Department calculated individually estimated countervailable subsidy rates for Canfor Corporation (Canfor), J.D. Irving, Limited (JDIL),¹¹ Resolute FP Canada Inc. (Resolute), Tolko Marketing and Sales Ltd. (Tolko), and West Fraser Timber Co. Ltd. (West Fraser), that are

not zero, *de minimis*, or based entirely on facts otherwise available. The Department calculated the all-others rate using a weighted-average of the individually estimated subsidy rates calculated for the examined respondents using each company's business proprietary data for the merchandise under consideration.¹²

Preliminary Determination

The Department preliminarily determines that the following estimated countervailable subsidy rates exist:

Company	Subsidy rate (%)
Canfor Corporation and its cross-owned affiliates ¹³	20.26
J.D. Irving, Limited and its cross-owned affiliates ¹⁴	3.02
Resolute FP Canada Inc. and its cross-owned affiliates ¹⁵	12.82
Tolko Marketing and Sales Ltd. and its cross-owned affiliates ¹⁶	19.50
West Fraser Mills Ltd. and its cross-owned affiliates ¹⁷	24.12
All-Others:	19.88

Suspension of Liquidation

In accordance with section 703(d)(1)(B) and (d)(2) of the Act, the Department will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to 19 CFR 351.205(d), the Department will instruct CBP to require a cash deposit equal to the rates indicated above.

Section 703(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published. As

discussed in *Preliminary CC Determination*, the Department preliminarily found that critical circumstances exist for imports of subject merchandise produced and/or exported by JDIL and the companies subject to the All-Others rate.¹⁸ Accordingly, in accordance with section 703(e)(2)(A) of the Act, the suspension of liquidation shall apply to unliquidated entries of merchandise from the exporters/producers identified in this paragraph that were entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the publication of this notice.

Disclosure

The Department intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of its public announcement or within five days of the date of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, the Department intends to verify the information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.¹⁹ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the

¹⁰ See Letter from the petitioner, "Certain Softwood Lumber Products from Canada: Request for Alignment of the Countervailing Duty Final Determination with the Companion Antidumping Duty Final Determination" dated April 13, 2017.

¹¹ See *MacLean-Fogg Co. v. United States*, 753 F.3d 1237 (Fed. Cir. 2014) (holding that voluntary respondents are considered "individually investigated" for purposes of calculating the all-others rate). The Department accepted JDIL as a voluntary respondent in this investigation.

¹² See Memorandum to the File, "Calculation of the 'All-Others' Rate in the Preliminary Determination of the Countervailing Duty Investigation of Softwood Lumber Products from Canada" (April 24, 2017).

¹³ The Department preliminarily has found the following companies to be cross-owned with Canfor Corporation: Canadian Forest Products, Ltd., and Canfor Wood Products Marketing, Ltd.

¹⁴ The Department preliminarily has found the following companies to be cross-owned with JDIL: Miramichi Timber Holdings Limited, The New Brunswick Railway Company, Rothesay Paper Holdings Ltd., St. George Pulp & Paper Limited, and Irving Paper Limited.

¹⁵ The Department preliminarily has found the following companies to be cross-owned with Resolute: Resolute Growth Canada Inc., Resolute Sales Inc., Abitibi-Bowater Canada Inc., Bowater Canadian Ltd., Resolute Forest Products Inc., Produits Forestiers Maurice S.E.C., and 9192-8515 Quebec Inc.

¹⁶ The Department preliminarily has found the following companies to be cross-owned with Tolko: Tolko Industries Ltd., and Meadow Lake OSB Limited Partnership.

¹⁷ The Department preliminarily has found the following companies to be cross-owned with West Fraser: West Fraser Timber Co. Ltd., West Fraser Alberta Holdings, Ltd., Blue Ridge Lumber Inc., Manning Forest Products, Ltd., Sunpine Inc., and Sundre Forest Products Inc.

¹⁸ See *Antidumping and Countervailing Duty Investigations of Certain Softwood Lumber Products from Canada: Preliminary Determinations of Critical Circumstances*, signed April 12, 2017 (*Preliminary CC Determination*).

¹⁹ See 19 CFR 351.309; see also 19 CFR 351.303 (for general filing requirements).

case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined and interested parties will be notified by the Department, via letter. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

International Trade Commission Notification

In accordance with section 703(f) of the Act, the Department will notify the International Trade Commission (ITC) of its determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination.

Notification to Interested Parties

This determination is issued and published pursuant to sections 703(f) and 777(i) of the Act and 19 CFR 351.205(c).

Dated: April 24, 2017.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is softwood lumber, siding, flooring and certain other coniferous wood ("softwood lumber products"). The scope includes:

- Coniferous wood, sawn, or chipped lengthwise, sliced or peeled, whether or not planed, whether or not sanded, or whether or not finger-jointed, of an actual thickness exceeding six millimeters.
- Coniferous wood siding, flooring, and other coniferous wood (other than moldings and dowel rods), including strips and friezes for parquet flooring, that is continuously shaped (including, but not limited to, tongued, grooved, rebated, chamfered, V-jointed, beaded, molded, rounded) along any of its edges, ends, or faces, whether or not planed, whether or not sanded, or whether or not end-jointed.
- Coniferous drilled and notched lumber and angle cut lumber.

- Coniferous lumber stacked on edge and fastened together with nails, whether or not with plywood sheathing.

- Components or parts of semi-finished or unassembled finished products made from subject merchandise that would otherwise meet the definition of the scope above.

Softwood lumber product imports are generally entered under Chapter 44 of the Harmonized Tariff Schedule of the United States ("HTSUS"). This chapter of the HTSUS covers "Wood and articles of wood." Softwood lumber products that are subject to this investigation are currently classifiable under the following ten-digit HTSUS subheadings in Chapter 44: 4407.10.01.01; 4407.10.01.02; 4407.10.01.15; 4407.10.01.16; 4407.10.01.17; 4407.10.01.18; 4407.10.01.19; 4407.10.01.20; 4407.10.01.42; 4407.10.01.43; 4407.10.01.44; 4407.10.01.45; 4407.10.01.46; 4407.10.01.47; 4407.10.01.48; 4407.10.01.49; 4407.10.01.52; 4407.10.01.53; 4407.10.01.54; 4407.10.01.55; 4407.10.01.56; 4407.10.01.57; 4407.10.01.58; 4407.10.01.59; 4407.10.01.64; 4407.10.01.65; 4407.10.01.66; 4407.10.01.67; 4407.10.01.68; 4407.10.01.69; 4407.10.01.74; 4407.10.01.75; 4407.10.01.76; 4407.10.01.77; 4407.10.01.82; 4407.10.01.83; 4407.10.01.92; 4407.10.01.93; 4409.10.05.00; 4409.10.10.20; 4409.10.10.40; 4409.10.10.60; 4409.10.10.80; 4409.10.20.00; 4409.10.90.20; 4409.10.90.40; and 4418.90.25.00.

Subject merchandise as described above may also be classified as stringers, square cut box-spring-frame components, fence pickets, truss components, pallet components, flooring, and door and window frame parts under the following ten-digit HTSUS subheadings in Chapter 44: 4415.20.40.00; 4415.20.80.00; 4418.90.46.05; 4418.90.46.20; 4418.90.46.40; 4418.90.46.95; 4421.90.70.40; 4421.90.94.00; and 4421.90.97.80.

Although these HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the investigation is dispositive.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE201

Deepwater Horizon Oil Spill; Notice of Intent To Conduct Strategic Restoration Planning That Considers Existing Projects for Barataria Bay, Louisiana and To Initiate Restoration Planning With Regard to the Mid-Barataria Sediment Diversion

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent to prepare a Strategic Restoration Plan for Barataria Basin, Louisiana, and to initiate restoration planning with regard to the Mid-Barataria Sediment Diversion.

SUMMARY: NOAA, on behalf of the Federal and state natural resource trustees for the Louisiana Trustee Implementation Group (Louisiana TIG Trustees) for the *Deepwater Horizon* (DWH) oil spill, is initiating two actions with this notice.

First, the Louisiana TIG Trustees are announcing their intent to prepare a Strategic Restoration Plan for Barataria Basin, Louisiana, pursuant to the *Deepwater Horizon* Programmatic Damage Assessment and Restoration Plan and Programmatic Environmental Impact Statement (PDARP/PEIS) (Feb 2016). This Barataria Basin Strategic Restoration Plan, referred to herein as the Phase I Plan, will consider identifying habitat restoration components of the Louisiana Draft 2017 Coastal Master Plan (draft 2017 CMP) to serve as an Oil Pollution Act (OPA) Strategic Restoration Plan for restoring wetland, coastal, and nearshore habitat in Barataria Basin, Louisiana, consistent with OPA and with the Trustees' PDARP/PEIS. The Louisiana TIG Trustees will consider whether a combination of Barataria Basin habitat restoration projects in the draft 2017 CMP constitutes a preferred alternative, among other feasible alternatives, for fulfilling OPA's and the PDARP/PEIS's intent for the trustees to address ecosystem-level injuries and to restore, rehabilitate, replace, or acquire the equivalent of the injured wetland, coastal and nearshore habitat resources and services and compensate for interim losses of those resources from the *Deepwater Horizon* oil spill. Any projects or suites of projects that are ultimately included in the resulting Strategic Restoration Plan will be further analyzed in subsequent phased

restoration plans and their accompanying environmental impact analyses as required by OPA, NEPA, and the Trustees' PDARP/PEIS.

Second, the Louisiana TIG Trustees are providing notice of the initiation of restoration planning, including analysis of the Mid-Barataria Sediment Diversion and appropriate alternatives to partially restore ecosystem and wetland, coastal and nearshore habitat resources and services in Barataria Basin, and compensate for interim losses of those resources and services, injured by the *Deepwater Horizon* oil spill. This potential Mid-Barataria Sediment Diversion Restoration Plan is referred to herein as the Phase 2 Plan. The Louisiana TIG Trustees are evaluating whether the Mid-Barataria Sediment Diversion is an appropriate project for restoring injuries from the *Deepwater Horizon* oil spill, and the Louisiana TIG Trustees anticipate that their decision in that regard will be informed by the results of the Phase 1 Plan. Further, by separate Supplemental Notice of Intent, the U.S. Army Corps of Engineers (USACE) is announcing its intent, as part of its review under section 404 of the Clean Water Act, section 10 of the Rivers and Harbors Act of 1899 ("Section 10/404"), and section 408 of the Rivers and Harbors Appropriation Act of 1899, as amended ("Section 408"), to prepare a draft Environmental Impact Statement ("EIS") pursuant to the National Environmental Policy Act of 1969 (NEPA). USACE will use the EIS, in conjunction with other relevant materials, to inform decision-making on the Department of the Army, section 10/404 and section 408 requests for permits and permissions for the Mid-Barataria Sediment Diversion. In order to capitalize on that ongoing environmental review, the Louisiana TIG Trustees are, at this time, requesting input on the scope of the USACE EIS via the process outlined in the coordinated USACE NOI. The LA TIG is supporting the development of the USACE EIS with the potential for the EIS to serve as the EIS for the Phase 2 Restoration Plan. The Louisiana TIG Trustees will additionally seek formal public involvement in the Phase 2 Draft Restoration Plan process in accordance with applicable Federal regulations and consistent with the PDARP/PEIS.

DATES: The date, time, and location of the formal public comment portion of this scoping period for the USACE EIS are yet to be determined. This information will be made available to the public on the DWH Trustees' Louisiana TIG Web page, (<http://www.gulfspillrestoration.noaa.gov/>

[restoration-areas/louisiana](http://www.gulfspillrestoration.noaa.gov/restoration-areas/louisiana)), the USACE-MVN's Web page (<http://www.mvn.usace.army.mil/Missions/Regulatory/Permits/Mid-Barataria-Sediment-Diversion-EIS/>), and via a future **Federal Register** notice. The Louisiana TIG Trustees will additionally seek formal public involvement in the Phase 2 Draft Restoration Planning process in accordance with applicable federal regulations and consistent with the PDARP/PEIS. The date, time, and location of the formal public involvement period for the Phase 2 Restoration Plan process are yet to be determined. This information will be made available to the public via a future **Federal Register** notice and on the DWH Trustees' Louisiana TIG Web page, (<http://www.gulfspillrestoration.noaa.gov/restoration-areas/louisiana>).

- NOAA: Mel Landry, gulfspill.restoration@noaa.gov.
- LOUISIANA: Liz Williams, LATIG@la.gov.

SUPPLEMENTARY INFORMATION:

Background

On April 20, 2010, the mobile offshore drilling unit, *Deepwater Horizon*, which was being used to drill a well for BP Exploration and Production Inc. (BP), in the Macondo prospect (Mississippi Canyon 252—MC252), exploded, caught fire and subsequently sank in the Gulf of Mexico, resulting in an unprecedented volume of oil and other discharges from the rig and from the wellhead on the seabed. The *Deepwater Horizon* oil spill is the largest oil spill in U.S. history, discharging millions of barrels of oil over a period of 87 days. In addition, well over one million gallons of dispersants were applied to the waters of the spill area in an attempt to disperse the spilled oil. An undetermined amount of natural gas was also released to the environment as a result of the spill.

The *Deepwater Horizon* State and Federal natural resource trustees (DWH Trustees) conducted the natural resource damage assessment (NRDA) for the *Deepwater Horizon* oil spill under the Oil Pollution Act 1990 (OPA; 33 U.S.C. 2701 *et seq.*). Pursuant to OPA, Federal and State agencies act as trustees on behalf of the public to assess natural resource injuries and losses and to determine the actions required to compensate the public for those injuries and losses. OPA further instructs the designated trustees to develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the

injured natural resources under their trusteeship, including the loss of use and services from those resources from the time of injury until the time of restoration to baseline (the resource quality and conditions that would exist if the spill had not occurred) is complete.

Upon completion of the NRDA, the DWH Trustees reached and finalized a settlement of their natural resource damage claims with BP in a Consent Decree¹ approved by the United States District Court for the Eastern District of Louisiana. Pursuant to that Consent Decree, restoration projects in Louisiana are now chosen and managed by the Louisiana TIG. The Louisiana TIG is composed of the following Trustees:

- U.S. Department of the Interior, as represented by the National Park Service, U.S. Fish and Wildlife Service, and Bureau of Land Management;
- National Oceanic and Atmospheric Administration, on behalf of the U.S. Department of Commerce;
- U.S. Department of Agriculture;
- U.S. Environmental Protection Agency;
- Louisiana Coastal Protection and Restoration Authority;
- Louisiana Department of Natural Resources;
- Louisiana Department of Environmental Quality;
- Louisiana Oil Spill Coordinator's Office; and
- Louisiana Department of Wildlife and Fisheries.

These restoration planning activities are proceeding in accordance with the PDARP/PEIS. Information on the Restoration Type: Restore Wetlands, Coastal, and Nearshore Habitats, as well as the OPA criteria against which projects will be evaluated, can be found in the PDARP/PEIS (<http://www.gulfspillrestoration.noaa.gov/restoration-planning/gulf-plan>) and in the Overview of the PDARP/PEIS (<http://www.gulfspillrestoration.noaa.gov/restoration-planning/gulf-plan>).

Overview of Action

The first action taken in this Notice is to inform the public that the Louisiana TIG Trustees intend to prepare a Strategic Restoration Plan for Barataria Basin pursuant to the PDARP/PEIS and OPA. The Trustees intend to consider the use of wetlands, coastal and nearshore habitat projects or suites of projects from the Draft 2017 CMP as the basis for that Strategic Restoration Plan. Those Draft 2017 CMP projects will be

¹ <https://www.justice.gov/enrd/file/838066/download>.

evaluated under applicable authorities in comparison to other feasible alternatives for restoring wetland, coastal and nearshore habitat and services injured by the *Deepwater Horizon* oil spill.

The PDARP/PEIS provides TIGs the option to prepare strategic restoration plans “to focus and sequence priorities within a Restoration Area” and to “consider resources at the ecosystem level, while implementing restoration at the local level.” (PDARP Section 7.3.1). In addition, the NRDA implementing regulations specifically allow trustees to consider the use of existing projects (15 CFR 990.56), such as those identified in the draft 2017 CMP. The Louisiana TIG is proposing that this Strategic Restoration Plan will focus on wetland, coastal, and nearshore habitat restoration type projects in the Barataria Basin restoration area because the PDARP/PEIS found that Barataria Basin experienced some of the heaviest and persistent oiling from the DWH spill and because the Basin supports very high primary and secondary production that contributes to the overall health of the northern Gulf of Mexico ecosystem.

The Louisiana TIG anticipates that the Strategic Restoration Plan for Barataria Basin will select for further funding and development most, if not all, of the remaining projects applicable under the “Wetlands, Coastal, and Nearshore Habitats” Restoration Type to be implemented in the Barataria Basin by the Louisiana TIG under the PDARP/PEIS. Developing such a strategic plan for much of Barataria Basin restoration for this Restoration Type will allow the Louisiana TIG to identify a suite of projects that, taken together, best achieve the “integrated ecosystem restoration” called for in Chapter 5 of the PDARP/PEIS. A decision in the strategic plan to fund further development of projects will not be a final decision by the Louisiana TIG to proceed with implementation of those projects. Information about the “Wetlands, Coastal, and Nearshore Habitats” Restoration Type as well as the OPA criteria against which projects will be evaluated can be found in the PDARP/PEIS.

The second action taken in this Notice is to inform the public of the Louisiana TIG Trustees’ initiation of restoration planning, which will include the preparation of a restoration plan (the Phase 2 Plan) that evaluates the Mid-Barataria Sediment Diversion project as a means of restoring injured wetland, coastal and nearshore resources and services in Barataria Basin to restore for injuries resulting from the *Deepwater Horizon* oil spill. The Louisiana TIG

began this restoration planning effort on March 28, 2017, by requesting project ideas from the public. At that time, the Louisiana TIG requested project ideas that could benefit wetlands, coastal, and nearshore habitats in the Barataria Basin, the estuary most heavily impacted by the DWH oil spill. That notice was published on the Louisiana TIG Web site: (<http://www.gulfspillrestoration.noaa.gov/restoration-areas/louisiana>).

The Mid-Barataria Sediment Diversion, a large-scale sediment diversion, is one of the projects proposed in the Draft 2017 CMP. While the Louisiana TIG Trustees have not yet decided to move forward with a restoration plan for a Mid-Barataria Sediment Diversion, the project currently is undergoing engineering and design and supplemental scoping for preparation of an EIS, led by the USACE based on permit applications submitted by the Louisiana Coastal Protection and Restoration Authority pursuant to the provisions of section 404 of the Clean Water Act, section 10 of the Rivers and Harbors Appropriation Act of 1899, and section 14 of the Rivers and Harbors Appropriation Act of 1899, as amended. To facilitate the potential consideration of this project under OPA, it is the intent of the state and Federal Louisiana TIG Trustees to assist the USACE in the preparation of the EIS for the Mid-Barataria Sediment Diversion. In addition, the Federal Louisiana TIG Trustees are cooperating agencies with the USACE for the preparation of that EIS. In a coordinated **Federal Register** notice, the USACE is issuing a supplemental Notice of Intent regarding the scope of the EIS for the project, including the potential for the EIS to inform a NRDA decision on restoration planning in which case the Louisiana TIG Trustees would adopt the EIS for such purposes. The Louisiana TIG is seeking to facilitate public involvement regarding the EIS, and encourages interested person and entities to submit comments in response to the USACE EIS process regarding the Mid-Barataria Sediment Diversion.

Next Steps

With regard to the Phase 1 Plan, the Louisiana TIG Trustees will proceed with consideration of whether a combination of projects in the Draft 2017 CMP provides a basis for a Strategic Restoration Plan for Barataria Basin.

With regard to the potential Phase 2 Plan, the Louisiana TIG Trustees will review all public input received as part of the USACE’s scoping process for the preparation of an EIS for the proposed

Mid-Barataria Sediment Diversion project as the Trustees work with the USACE to prepare an EIS that supports both the USACE regulatory decisions and OPA restoration planning decisions. The Louisiana TIG Trustees will additionally seek formal public involvement in the Phase 2 Draft Restoration Plan process in accordance with applicable federal regulations and consistent with the PDARP/PEIS.

Administrative Record

The documents included in the Administrative Record can be viewed electronically at the following location: <http://www.doi.gov/deepwaterhorizon/adminrecord>.

The Trustees opened a publicly available Administrative Record for the NRDA for the *Deepwater Horizon* oil spill, including restoration planning activities, concurrently with publication of the 2011 Notice of Intent (NOI) to Begin Restoration Scoping and Prepare a Gulf Spill Restoration Planning PEIS (pursuant to 15 CFR 990.45). The Administrative Record includes the relevant administrative records since its date of inception. This Administrative Record is actively maintained and available for public review.

Authority

The authority of this action is the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*) and the implementing NRDA regulations found at 15 CFR part 990 and NEPA (42 U.S.C. 4321 *et seq.*).

Dated: April 21, 2017.

Carrie Selberg,

Deputy Director, Office of Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510–22–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Deletion

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Deletion from the Procurement List.

SUMMARY: This action deletes a product from the Procurement List previously furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

DATES: Effective May 28, 2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely

Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202-4149.

FOR FURTHER INFORMATION CONTACT:

Amy B. Jensen, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Deletion

On 3/24/2017 (82 FR 15047), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletion from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the product listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing a small entity to furnish the product to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501-8506) in connection with the product deleted from the Procurement List.

End of Certification

Accordingly, the following product is deleted from the Procurement List:

Product

NSN(s)—Product Name(s): 4610-01-117-8271—Bag, Drinking Water Storage

Mandatory Source(s) of Supply: Huntsville Rehabilitation Foundation, Huntsville, AL

Contracting Activity: Defense Logistics Agency Land and Maritime

Amy B. Jensen,

Director, Business Operations.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List: Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to and deletions from the Procurement List.

SUMMARY: The Committee is proposing to add products to the Procurement List that will be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities, and deletes products and a service previously furnished by such agencies.

DATES: Comments must be received on or before May 28, 2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202-4149.

FOR FURTHER INFORMATION CONTACT: Amy B. Jensen, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice will be required to procure the products listed below from the nonprofit agency employing persons who are blind or have other severe disabilities.

The following products are proposed for addition to the Procurement List for production by the nonprofit agency listed:

Products

NSN(s)—Product Name(s):

5180-01-563-6719—Kit, Urban Operation Tools, Squad

5180-01-631-3029—Kit, Urban Operations Tools, Platoon

Mandatory Source(s) of Supply: Wiscraft, Inc., Milwaukee, WI

Mandatory for: 100% of the requirements of the U.S. Army

Contracting Activity: U.S. Army TACOM LCMC ILSC—SKOT Group

Distribution: C-List

Deletions

The following products and service are proposed for deletion from the Procurement List:

Products:

NSN(s)—Product Name(s):

7530-01-368-3491—Index Dividers, White Tabs with Black Print, January–December

Mandatory Source(s) of Supply: South Texas Lighthouse for the Blind, Corpus Christi, TX

Contracting Activities: General Services Administration, New York, NY
Department of Veterans Affairs, Strategic Acquisition Center

NSN(s)—Product Name(s):

7930-00-NIB-0210 Cleaner, Phenolic

Disinfectant, Concentrate, 2 Liter

7930-01-381-5957 Cleaner, Pretreatment

Carpet, Concentrate, 2 Liter

7930-01-412-1031 Cleaner, Scotchgard

Bonnet, Concentrate, 2 Liter

Mandatory Source(s) of Supply: Beacon Lighthouse, Inc., Wichita Falls, TX

Contracting Activity: Department of Veterans Affairs, Strategic Acquisition Center

NSN(s)—Product Name(s): 7350-01-359-9524—Cup, Paper, Recyclable, White, 9 oz.

Mandatory Source(s) of Supply: Cloverbrook Center for the Blind and Visually Impaired, Cincinnati, OH

Contracting Activity: General Services Administration, Fort Worth, TX

NSN(s)—Product Name(s):

7520-01-624-9379—Pen, Roller Ball, Liquid Ink, Retractable, Needle Point, Airplane Safe, 0.5mm, Refillable, Black, EA

7520-01-624-9383—Pen, Roller Ball, Liquid Ink, Retractable, Needle Point, Airplane Safe, 0.5mm, Refillable, Blue, EA

7520-01-624-9384—Pen, Roller Ball, Liquid Ink, Retractable, Needle Point, Airplane Safe, 0.7mm, Refillable, Black, EA

7520-01-624-9385—Pen, Roller Ball, Liquid Ink, Retractable, Needle Point, Airplane Safe, 0.7mm, Refillable, Blue, EA

Mandatory Source(s) of Supply: San Antonio Lighthouse for the Blind, San Antonio, TX

Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s): 7520-01-466-0485—Tray, Desk, Plastic

Mandatory Source(s) of Supply: LC Industries, Inc., Durham, NC

Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s):

891500-NSH-0145—Diced Green Peppers
Diced Green Peppers

891500-NSH-0146—Sliced Yellow Onions
Sliced Yellow Onions

891500-NSH-0147—Cole Slaw with Carrots

Mandatory Source(s) of Supply: Employment Solutions, Inc., Lexington, KY

Contracting Activity: Department of Justice, Federal Prison System

NSN(s)—Product Name(s): MR 942—Cloth, Dish, 2 pack

Mandatory Source(s) of Supply: Lions Services, Inc., Charlotte, NC

Contracting Activity: Defense Commissary

Agency
 NSN(s)—*Product Name(s)*: 1430-01-133-8435—Bag, Storage
Mandatory Source(s) of Supply: Huntsville Rehabilitation Foundation, Huntsville, AL
Contracting Activity: Defense Logistics Agency Land and Maritime
Service
Service Type: Customization & Distribution of NRPM Service Department of the Navy, FISC Norfolk: Detachment 1322 Patterson Ave. SE, Washington Navy Yard, Washington DC
Mandatory Source(s) of Supply: Industries for the Blind, Inc., West Allis, WI
Contracting Activity: Dept of Defense/Department of the Navy

BILLING CODE 6353-01-P

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities: Proposed Collection Revision, Comment Request: Adoption of Revised Registration Form 8-R and Cancellation of Form 3-R

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: The Commodity Futures Trading Commission (“CFTC” or the “Commission”) is announcing an opportunity for public comment on the proposed revision to the collection of certain information by the Commission. Under the Paperwork Reduction Act (“PRA”), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information and to allow 60 days for public comment. The Commission revised its Form 8-R, the application form that individuals use to register with the Commission or to be listed as a principal. This notice solicits comments on the PRA implications of the revisions to Form 8-R, including comments that address the burdens associated with the modified information collection requirements of the revised Form 8-R. Additionally, this notice also solicits comments on the PRA implications of reassigning the burdens associated with the information collections requirements of Commission Form 3-R, which is no longer used, to Commission Forms 7-R and 8-R.

DATES: Comments must be submitted on or before June 27, 2017.

ADDRESSES: You may submit comments, identified by “OMB control numbers

3038-0023 and 3038-0072; Adoption of Revised Registration Form 8-R and Cancellation of Form 3-R,” by any of the following methods:

- The Commission’s Web site, via its Comments Online process at <http://comments.cftc.gov/>. Follow the instructions for submitting comments through the Web site.
- *Mail*: Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.
- *Hand Delivery/Courier*: Same as Mail above.
- *Federal eRulemaking Portal*: <http://www.regulations.gov/>. Follow the instructions for submitting comments through the Portal.

Please submit your comments using only one method.

All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to <http://www.cftc.gov>. You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures established in Regulation 145.9.¹

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from <http://www.cftc.gov> that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the information collection request will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT:

Laura Gardy, Associate Director, (202) 418-7645, lgardy@cftc.gov; or August A. Imholtz III, Special Counsel, (202) 418-5140, aimholtz@cftc.gov, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION: Under the PRA, Federal agencies must obtain approval from the Office of Management

and Budget (“OMB”) for each collection of information they conduct or sponsor. “Collection of Information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, the CFTC is publishing notice of the proposed revision to the collections of information listed below. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB number.

Titles: Registration Under the Commodity Exchange Act (OMB control number 3038-0023); Registration of Swap Dealers and Major Swap Participants (OMB control number 3038-0072). This is a request for extension and revision of these currently approved information collections.

Abstract: The Commission recently revised its Form 8-R, the application form that individuals must use to register with the Commission as an associated person, floor broker, or floor trader, or to be listed as a principal. The collections of information related to Form 8-R were previously approved by OMB in accordance with the PRA and assigned OMB control numbers 3038-0023 and 3038-0072. Additionally, the Commission no longer requires individuals and entities to use Commission Form 3-R to update their registration information, which now can be updated directly on Forms 7-R or 8-R. The Commission therefore is reassigning to Forms 7-R and 8-R the information collection burdens previously associated with Commission Form 3-R. The collection of information related to Form 3-R was previously approved by OMB in accordance with the PRA and assigned OMB control number 3038-0023.

1. Form 8-R Revision

The revised Form 8-R contains several changes that increase the existing information collection burden, currently 0.8 hours, associated with Form 8-R. The Commission estimates that the changes, which are discussed below, when considered together in aggregate add a total of 0.1 burden hours to the information collection burdens associated with Form 8-R.

¹ 17 CFR 145.9.

First, in the “Fingerprint Card Information” section, revised Form 8–R adds two new questions. One new question addresses new requirements and exemptions thereto contained in Commission Regulation 3.21(e) applicable to non-U.S. persons. The other new question addresses the fingerprinting requirement exception for certain outside directors of registered firms. Second, in the section titled “Disciplinary Information—Regulatory Disclosures,” a new question was added to existing Question E. Among other things, Question E inquires whether the applicant (or an entity of which the applicant was a principal) violated, or aided and abetted the violation of, any investment-related statutes or regulations, a potential statutory basis for refusing or conditioning registration. The new question directs the applicant to disclose whether he or she has ever been found to have “failed to supervise another person’s activities under any investment-related statute or regulation.” Third, in the section titled “Disciplinary Information—Financial Disclosures,” the Commission revised Question J. Prior to the revision, Question J asked whether the applicant has “currently failed to comply with any order to pay any futures-related civil monetary penalties, restitution amounts, disgorgement amounts, reparation amounts or arbitration awards.” As revised, Question J now inquires whether the applicant “failed to pay any arbitration awards involving CFTC-regulated products, CFTC civil monetary penalties, CFTC restitution amounts, CFTC disgorgement amounts, or CFTC reparation amounts.”

The revised Form 8–R also contains several changes that do not alter the information collection burdens associated with Form 8–R. First, the revised Form 8–R combines into a single form two separate, existing versions of the Form 8–R, the Form 8–R “Individual Application” and the Form 8–R “Floor Trader Order Enterer Individual Application,” both of which were previously approved by OMB. In the section titled “Sponsor Information and Registration Categories,” the revised Form 8–R adds “floor trader order enterer” as a new category of persons that can be associated with a sponsor. Also in connection with this change, the revised Form 8–R includes two newly defined terms: “entity floor trader” and “floor trader order enterer.” Second, in the section titled “Principal Information,” the prior version of Form 8–R contained a blank space in which an applicant entered a title. In the revised Form 8–R, the space is replaced

with a list of available titles for applicants to choose from. Third, NFA is simplifying the process by which it requests supplemental information and documentation regarding the applicant’s criminal, regulatory or financial disclosures. The prior version of Form 8–R requested that applicants provide a written explanation of the facts and circumstances regarding any such disclosures. Applicants were also separately requested to provide NFA with copies of pertinent documents associated with each disclosure. To consolidate and modernize this process, the revised Form 8–R allows applicants to complete a separate “Disclosure Matter Page” for each matter, instance or event requiring disclosure and to simultaneously upload all pertinent documents associated with each disclosure. The Disclosure Matter Page provides applicants with an efficient and effective method of supplying the supplemental information and documentation that NFA requests in the normal course whenever an applicant responds affirmatively to any of the questions regarding criminal, regulatory or financial disclosures.

Lastly, the revised Form 8–R contains numerous changes to the language, formatting and organization of Form 8–R, all of which—individually and collectively—do not alter the information collection burdens associated with Form 8–R. The only changes to Form 8–R that affect the information collection burdens associated with the form are those discussed above.

2. Cancellation of Form 3–R

Commission Regulations 3.11 and 3.31 historically required entities and individuals to use Commission Form 3–R to update or correct certain types of information that originally was supplied on Commission Forms 7–R or 8–R, the registration forms for entities and individuals respectively. Regulations 3.11 and 3.31 were amended in 2012 to reflect a new practice whereby Forms 7–R and 8–R could be directly updated online, and the requirement to use Form 3–R for updates, or for any other purpose, was deleted from the Commission rules. At that time, however, the Commission did not reassign to Forms 7–R and 8–R the information collection burden associated with the Form 3–R. The Commission is doing so now.

The information collection burden associated with Form 3–R is 0.1 hours. In reassigning that burden to Forms 7–R and 8–R, the Commission believes that it is appropriate to adopt a conservative approach and assign an

additional 0.1 hours each to the Form 7–R and 8–R. Accordingly, by virtue of cancelling Form 3–R, and reassigning to Forms 7–R and 8–R the information collection burdens associated with Form 3–R, the information collection burdens for Forms 7–R and 8–R each will increase by 0.1 hours. The reassignment of the information collection burden from Form 3–R to Forms 7–R and 8–R reallocates the information collection burdens within OMB control number 3038–0023, and does not increase or decrease the total information collection burden under that control number.

3. Invitation to Comment

With respect to the information collections discussed above, the CFTC invites comments on:

- Whether the proposed revision to the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
- The accuracy of the Commission’s estimate of the burden of the proposed revision to the collection of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden of collection of information on those who are to respond, including through the further use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

Burden Statement: As explained above, the Commission believes that the revisions to Form 8–R increase the information collection burdens associated with that Form under OMB control numbers 3038–0023 and 3038–0072. Additionally, the Commission believes that reassigning to Forms 7–R and 8–R the information collection burdens formerly associated with Commission Form 3–R reallocates the information collection burdens within OMB control number 3038–0023, and therefore does not increase or decrease the total information collection burden under that control number.

The Commission estimates the burden of this collection of information under OMB control number 3038–0023 to be:

Respondents/Affected Entities: (1) Users of Form 7–R, specifically futures commission merchants, retail foreign exchange dealers, introducing brokers, commodity trading advisors, commodity pool operators, floor trader firms, and

leverage transaction merchants; and (2) users of Form 8–R, specifically (i) associated persons of futures commission merchants, retail foreign exchange dealers, introducing brokers, commodity trading advisors, commodity pool operators, and leverage transaction merchants; floor brokers; (ii) principals of futures commission merchants, retail foreign exchange dealers, introducing brokers, commodity trading advisors, commodity pool operators, floor trader firms, or leverage transaction merchants; (iii) floor brokers; (iv) floor traders; and (v) floor trader order enterers.

Estimated Number of Respondents: 78,109.

Estimated Total Annual Burden on Respondents: 7,210 hours.

Frequency of Collection: Periodically.

There are no capital costs or operating and maintenance costs associated with this collection.

The Commission estimates the burden of this collection of information under OMB control number 3038–0072 to be:

Respondents/Affected Entities: (1) Users of Form 7–R, specifically swap dealers and major swap participants; and (2) users of Form 8–R, specifically principals of swap dealers and of major swap participants.

Estimated Number of Respondents: 770.

Estimated Total Annual Burden on Respondents: 648 hours.

Frequency of Collection: Periodically.

There are no capital costs or operating and maintenance costs associated with this collection.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: April 24, 2017.

Robert N. Sidman,

Deputy Secretary of the Commission.

BILLING CODE 6351–01–P

COMMODITY FUTURES TRADING COMMISSION

Adoption of Revised Registration Form 8–R

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: The Commodity Futures Trading Commission (the “Commission” or “CFTC”) is revising its Form 8–R, the application form that individuals must use to register with the Commission as an associated person of a registrant, floor broker, or floor trader, or to be listed as a principal of a registrant (collectively, “applicants”).

DATES: *Effective Date:* The new, revised version of Form 8–R shall be effective (and the prior version shall cease to be effective) when the National Futures Association (“NFA”) makes the new, revised version of the Form 8–R available on the NFA Web site for use by individual applicants.

FOR FURTHER INFORMATION CONTACT: Erik F. Remmler, Deputy Director, (202) 418–7630, eremmler@cftc.gov; Laura Gardy, Associate Director, (202) 418–7645, lgardy@cftc.gov; or August A. Imholtz III, Special Counsel, (202) 418–5140, aimholtz@cftc.gov, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Background

Individuals acting in certain capacities in the markets regulated by the Commission must file a completed Form 8–R with NFA.¹ These applicants include: Associated persons of futures commission merchants, retail foreign exchange dealers, introducing brokers, commodity trading advisors, commodity pool operators, and leverage transaction merchants; floor brokers; and floor traders.² Additionally, any individual acting in the capacity as principal of a futures commission merchant, retail foreign exchange dealer, introducing broker, commodity trading advisor, commodity pool operator, swap dealer,

major swap participant, floor trader or leverage transaction merchant also must file a completed Form 8–R.³ Lastly, individuals that enter orders for floor trader firms must file the Form 8–R as well.⁴ Individual applicants have been required to use Form 8–R since 1977.⁵

Form 8–R requests information about the applicant that can be used to assess the applicant's fitness to engage in business as a derivatives professional. Form 8–R is a Commission form maintained and used primarily by the NFA. NFA is currently the only registered futures association authorized by the Commission in accordance with Section 17 of the Commodity Exchange Act (“Act”).⁶ Pursuant to Section 17(o) of the Act,⁷ Regulation 3.2,⁸ and a series of orders, the Commission delegated to NFA certain registration functions including, among other things, the processing of all Form 8–R filings.⁹ Since the first delegation to NFA in 1984, NFA has developed substantial expertise in registration matters, including reviewing and processing completed Forms 8–R. In 2002, with the approval of the Commission, NFA transitioned from a paper-based registration system to an online registration system that utilizes, among other things, an electronic version of Form 8–R.¹⁰

³ 17 CFR 3.1(a); 3.10(a)(2); 3.11(a)(1). While “principal” is not technically a registration class and principals do not apply for registration, for purposes of this Notice, the Form 8–R filings by principals will be referred to with the other Form 8–R filings as “registration applications.”

⁴ 17 CFR 3.11(a)(1).

⁵ Revision of Registration Forms and Amendment of Related Rules, 42 FR 23988 (May 11, 1977) (Form 8–R replaced Forms 2–R, 4–R and 94).

⁶ 7 U.S.C. 21 (2012).

⁷ 7 U.S.C. 21(o) (2012).

⁸ 17 CFR 3.2.

⁹ See, e.g., Introducing Brokers and Associated Persons of Introducing Brokers; Authorization of National Futures Association to Perform Commission Registration Functions, 48 FR 35158 (Aug. 3, 1983); Performance of Registration Functions by National Futures Association, 49 FR 39593 (Oct. 9, 1984) (futures commission merchants, commodity pool operators, commodity trading advisors, and associated persons thereof); Performance of Registration Functions by National Futures Association; Delegation of Authority, 51 FR 34490 (Sept. 29, 1986) (floor brokers); Performance of Registration Functions by National Futures Association with Respect to Floor Traders and Floor Brokers, 58 FR 19657 (Apr. 15, 1993); and Performance of Registration Functions by National Futures Association with Respect to Swap Dealers and Major Swap Participants, 77 FR 2708 (Jan. 19, 2012).

¹⁰ Registration of Intermediaries, 67 FR 38869 (June 6, 2002). The transition to an online registration system has permitted greater efficiencies, including allowing individuals to update their existing Forms 8–R instead of completing a separate Form 3–R. To that end, in 2012, the Commission eliminated the requirement that registrants and individuals use Form 3–R to

¹ 17 CFR 3.10(a)(2), 3.11(a), and 3.12(c).

² 17 CFR 3.11(a); 3.12(c).

II. Revisions To Commission Form 8-R

NFA has requested that the Commission make several changes to Form 8-R.¹¹ Upon consideration of NFA's request, the Commission is revising and updating Form 8-R. In addition, the Commission is updating the Form 8-R Privacy Act and Paperwork Reduction Act Statements. The Form 8-R revisions are described below.¹²

In the section titled "Sponsor Information and Registration Categories," Form 8-R previously listed three categories of persons that could be associated with a sponsor: Associated persons, branch office managers, and principals.¹³ The revised Form 8-R includes a fourth category, floor trader order enterer. This addition addresses the Form 8-R filing requirement for employees of an entity that is a registered floor trader who execute swap transactions on a swap execution facility for the floor trader's own account.¹⁴ In connection with this change, the revised Form 8-R includes two newly defined terms: "Entity floor trader" and "floor trader order enterer." "Entity floor trader" is defined as an entity that is "an applicant or registrant that filed a Form 7-R for registration as a floor trader."¹⁵ "Floor trader order enterer" is defined as "an individual

update information in their existing Form 7-R or 8-R, and provided that an update to a registrant's online Form 7-R or 8-R would automatically create a record of changes equivalent to a completed Form 3-R. Registration of Intermediaries, 77 FR 51898 (Aug. 28, 2012); *see also*, Registration of Intermediaries, 76 FR 12888, 12891 (proposed Mar. 9, 2011).

¹¹ Request from NFA to CFTC, dated Sept. 8, 2016, as amended on Oct. 31, 2016. Both communications are on file with the Commission.

¹² This Notice describes the substantive changes to Form 8-R. The Commission also is making a number of minor, non-substantive, or technical changes to Form 8-R that are not described herein.

¹³ Associated persons and principals must file Form 8-R. 17 CFR 1.3(aa), 3.1(a), 3.10(a) and 3.12. Branch Office Manager is a category that NFA utilizes to ensure proper oversight of branch offices. *See* NFA Interpretive Notice 9002, Registration Requirements; Branch Offices (Staff, Sept. 6, 1985; revised July 1, 2000; Dec. 9, 2005; and Sept. 30, 2010).

¹⁴ 17 CFR 1.3(ggg)(6)(iv), 3.11(a)(1). Commission Regulation 3.11(a)(1) was amended in 2012 to require individuals that enter swap orders for the account of an entity floor trader to file a Form 8-R. 77 FR 51898. These individuals are required to file a Form 8-R, but are not required to register with the Commission in any specified capacity. Since 2012, NFA has required these individuals to file a separate, paper version of the Form 8-R titled Floor Trader Order Enterer Application. The revisions to the Form 8-R discussed in this paragraph result from combining the pre-existing, electronic Form 8-R with the paper version for floor trader order enterers.

¹⁵ Entities that act as market participants or intermediaries must use the Commission Form 7-R to register with the Commission. 17 CFR 3.10 and 3.11.

responsible for entry of orders from an entity floor trader's own account."¹⁶

In the section titled "Principal Information," the prior version of Form 8-R contained a blank space in which an applicant entered a title. In the revised Form 8-R, the space is replaced with a menu of available titles.

In the "Fingerprint Card Information" section, revised Form 8-R adds two new questions. One new question addresses new requirements and exemptions thereto contained in Commission Regulation 3.21(e) applicable to non-U.S. persons. A non-U.S. natural person may now claim an exemption under Commission Regulation 3.21(e) from the fingerprint submission requirement where the applicant otherwise underwent a qualifying criminal history background check.¹⁷ The other new question addresses the fingerprinting requirement exception for certain outside directors of registered firms.¹⁸

The sections in Form 8-R titled "Disciplinary Information—Criminal Disclosures," "Disciplinary Information—Regulatory Disclosures," and "Disciplinary Information—Financial Disclosures" contain a series of questions that inquire about the disciplinary history of the applicant. These questions are designed to identify and gather information that may reflect on the fitness of the applicant and whether he or she may be subject to a statutory disqualification from registration.¹⁹ Among other things, these questions ask about the disciplinary history of "any entity of which you [the applicant] were a principal at the time the [potentially reportable] activities occurred." The term "principal" as used in the Disciplinary History section of Form 8-R was sometimes understood by applicants to mean that only firms that were subject to Commission registration were relevant. The long-standing interpretation of the term "principal" as used in that context was not limited to the applicant's status as a principal only for Commission registrants, but also if the applicant served in one of the capacities included in the definition of "principal" for any firm. The definition

¹⁶ The revised Form 8-R includes additional conforming changes to incorporate entity floor traders and floor trader order enterers as appropriate.

¹⁷ 17 CFR 3.21(e); Alternative to Fingerprinting Requirements for Foreign Natural Persons, 81 FR 18743 (Apr. 1, 2016).

¹⁸ 17 CFR 3.21(c) (permitting an outside director to indicate that he or she will file the appropriate notice required by Commission Regulation 3.21(c) instead of supplying his or her fingerprints).

¹⁹ *See* 7 U.S.C. 12a(2) and (3) (2012).

of "principal" is revised to clarify this issue.²⁰

In the section titled "Disciplinary Information—Regulatory Disclosures," a new question was added to existing Question E. Among other things, Question E inquires whether the applicant (or an entity of which the applicant was a principal) violated, or aided and abetted the violation of, any investment-related statutes or regulations, a potential statutory basis for refusing or conditioning registration.²¹ The new question directs the applicant to disclose whether he or she has ever been found to have failed to supervise another person's activities under any investment-related statute or regulation.²² The new question is intended to ensure complete disclosure of conduct that may result in a refusal or limitation on registration.

In the section titled "Disciplinary Information—Financial Disclosures," the Commission revised Question J, which asked whether the applicant has "currently failed to comply with any order to pay any futures-related civil monetary penalties, restitution amounts, disgorgement amounts, reparation amounts or arbitration awards." As revised, Question J now inquires whether the applicant "failed to pay any arbitration awards involving CFTC-regulated products, CFTC civil monetary penalties, CFTC restitution amounts, CFTC disgorgement amounts, or CFTC reparation amounts." The revision is designed to clarify that this question is not limited solely to unpaid monetary awards related to futures contracts, but also includes unpaid awards related to all products subject to the jurisdiction of the Commission.

Lastly, NFA is simplifying the process by which it requests supplemental information and documentation regarding the applicant's criminal, regulatory, financial, or employment disclosures. The prior version of Form 8-R requested that applicants provide a written explanation of the facts and circumstances regarding any such disclosures. Applicants were also separately requested to provide NFA with copies of pertinent documents associated with each disclosure. To consolidate and modernize this process, the revised Form 8-R allows applicants

²⁰ A provision was added to the definition of "principal" that states, "[f]or the purpose of answering Questions A, B, C, D, E, F, G, I and K of the Disciplinary History sections, principal also means an individual described in [paragraphs] (1), (2) or (4) above with respect to any entity whether or not the entity is an applicant, registrant, or a person required to be registered under the Act."

²¹ 7 U.S.C. 12(a)(3).

²² *See* 7 U.S.C. 12(a)(3)(C).

to complete a separate “Disclosure Matter Page” for each matter, instance, or event requiring disclosure and to simultaneously upload all pertinent documents associated with each disclosure. The Disclosure Matter Page provides applicants with an efficient and effective method of supplying the supplemental information and documentation that NFA requests in the normal course whenever an applicant responds affirmatively to any of the questions regarding criminal, regulatory or financial disclosures.

A revised version of Form 8–R that incorporates the changes discussed above, as well as other non-substantive changes, is attached as Appendix A to this Notice.

III. Related Matters

Paperwork Reduction Act.

Recordkeeping or information collection requirements under the Paperwork

Reduction Act (“PRA”) related to Form 8–R exist under current law. The titles for the existing information collections are “Registration Under the Commodity Exchange Act,” OMB control number 3038–0023, and “Registration of Swap Dealers and Major Swap Participants,” OMB control number 3038–0072. The preliminary view of the Commission is that the revisions to Form 8–R may modify the existing recordkeeping or information collection requirements under the PRA. To ensure compliance with the PRA, the Commission will publish in the **Federal Register** a separate notice and request for comment on the amended PRA burden associated with the revised Form 8–R.²³ The Commission also will submit to OMB an

²³ The notice and request for comment on the amended PRA burden will also address reassigning from Form 3–R to Form 8–R the PRA burden associated with providing updated information on Form 8–R.

information collection request to amend the information collection, in accordance with 44 U.S.C. 3506(c)(2)(A) and 5 CFR 1320.8(d).

Issued by the Commission on April, 24 2017, in Washington, DC.

Robert N. Sidman,

Deputy Secretary of the Commission.

Note: The following appendices will not appear in the Code of Federal Regulations.

Appendices to Adoption of Revised Registration Form 8–R

Appendix 1—Commission Voting Summary

On this matter, Acting Chairman Giancarlo and Commissioner Bowen voted in the affirmative. No Commissioner voted in the negative.

Appendix A—Individual Application (Form 8–R)

BILLING CODE 6351–01–P

Individual Application (Form 8-R)

COMMODITY FUTURES TRADING COMMISSION NATIONAL FUTURES ASSOCIATION

Instructions for Completing the Individual Application

READ THESE INSTRUCTIONS CAREFULLY BEFORE COMPLETING OR REVIEWING THE APPLICATION. THE FAILURE TO ANSWER ALL QUESTIONS COMPLETELY AND ACCURATELY OR THE OMISSION OF REQUIRED INFORMATION MAY RESULT IN THE DENIAL OR REVOCATION OF REGISTRATION.

THE FAILURE TO DISCLOSE A DISCIPLINARY MATTER EITHER IN AN APPLICATION OR AN UPDATE WILL RESULT IN THE IMPOSITION OF A LATE DISCLOSURE FEE IN ACCORDANCE WITH NFA REGISTRATION RULE 210(c).

Not every section applies to every applicant. Certain sections apply depending on the registration category or categories being applied for. The text above these sections explains who must complete the section.

DEFINED TERMS

Words that are underlined in this form are either defined terms and have the meanings contained in the Definition of Terms section or links to the text of Commodity Exchange Act provisions, CFTC Regulations or NFA Rules.

GENERAL

Read the Instructions and Questions Carefully

A question that is answered incorrectly because it was misread or misinterpreted can result in severe consequences, including denial or revocation of registration. Although this applies to all questions in the application, it is particularly important to the questions in the Disciplinary Information Section.

Rely Only on Advice from NFA Staff

A question that is answered incorrectly because of advice received from a lawyer, employer, a judge or anyone else (other than a member of NFA's Registration Investigations or Legal ("RIL") staff) can result in severe consequences, including denial or revocation of registration. This also applies to all questions in the form, but is particularly important regarding the Disciplinary Information Section. If the language of a question in the Disciplinary Information Section requires disclosure of a matter, a "Yes" answer to the question is required no matter what other advice has been received from anyone other than NFA's RIL staff. Additionally, the applicant or registrant remains responsible for failures to disclose even if someone completes the form on the applicant's or registrant's behalf.

Update the Information on the Application

If information provided on the application changes or a matter that would have required disclosure on the application occurs after the application is filed, the new information must be promptly filed. APs and Principals should advise their Sponsors of the new information, and the Sponsor must file the update on their behalf. The failure to promptly update information can result in severe consequences, including denial or revocation of registration.

Compliance with Disclosure Requirements of Another Regulatory Body is not Sufficient

With some exceptions, which are described below in the Regulatory and Financial Disclosures sections, if any question requires the provision of information, that information must be provided. In particular, if a question in the Disciplinary Information Section requires disclosure of a matter, the question must be answered "Yes" and additional documents must be provided even if the matter has been disclosed to another regulatory body such as FINRA, an exchange or a state regulator. Similarly, disclosure is required even if another regulatory body does NOT require disclosure of the same matter.

Call NFA with Questions

If there is any question about whether particular information must be provided, whether a particular matter must be disclosed or whether a particular question requires a "Yes" answer, call the NFA Information Center at (800) 621-3570 or (312) 781-1410. Representatives are available from 8:00 a.m. to 5:00 p.m., Central Time, Monday through Friday. If the advice of NFA staff is sought, a written record containing the date of the conversation, the name of the NFA staff person giving the advice and a description of the advice should be made during the conversation and kept in the event an issue concerning disclosure of the matter arises later.

DISCIPLINARY INFORMATION SECTION

Criminal Disclosures

Some common mistakes in answering the criminal disclosure questions involve expungements, diversion programs and similar processes. The Commodity Futures Trading Commission requires a "Yes" answer even if the matter has been expunged or the records sealed, there was no adjudication or finding of guilt, the guilty plea was vacated or set aside or the matter was dismissed upon completion of the diversion program.

Another common error regarding criminal matters concerns matters that do not involve the futures industry. All criminal matters must be disclosed, even if a matter is unrelated to the futures industry, unless the case was decided in a juvenile court or under a Youth Offender law.

Regulatory Disclosures

Regulatory actions taken by the Commodity Futures Trading Commission, NFA or U.S. futures exchanges do not need to be disclosed since NFA is already aware of them once they are entered into NFA's BASIC system.

Financial Disclosures

It is not necessary to disclose arbitration awards or CFTC reparations matters unless the applicant or registrant has failed to pay an award related to a CFTC-related product or an order entered in a reparations matter.

Only adversary actions that a bankruptcy trustee files must be disclosed. Adversary actions that creditors file are not disclosable. A person named as a party to an adversary action in a bankruptcy proceeding must disclose the action, even if the person is not the bankrupt person.

ADDITIONAL DOCUMENTS

For each matter that caused a "Yes" answer, a Disclosure Matter Page ("DMP"), which is accessible using NFA's DMP Filing System, must be filed. In addition to the required DMP, other documents about the matter must be provided to NFA. If court documents are unavailable, a letter from the court verifying that must be sent to NFA. If documents other than court documents are unavailable, the person must provide a written explanation for their unavailability. Electronic copies of the documents can be uploaded using NFA's DMP Filing System or you can send documents to NFA by emailing electronic documents to registration@nfa.futures.org, faxing documents to (312) 559-3411 or mailing documents to NFA Registration Department, 300 S. Riverside Plaza, Suite 1800, Chicago IL 60606.

Like answering the questions correctly, providing all documents to NFA is important. Failure to do so will delay the registration process and may result in a denial of the application.

DEFINITION OF TERMS (The following terms are defined solely for the purpose of using NFA's Online Registration System.)

10% OR MORE INTEREST: direct or indirect ownership of 10% or more of an entity's stock; entitlement to vote or empowered to sell 10% or more of an entity's voting securities; contribution of 10% or more of an entity's capital; or entitlement to 10% or more of an entity's net profits.

ADJUDICATION: in a criminal case, a determination by the court that the defendant is guilty or not guilty.

ADVERSARY ACTION: a lawsuit arising in or related to a bankruptcy case commenced by a creditor or bankruptcy trustee by filing a complaint with the bankruptcy court.

ALIAS: another name utilized by an individual or previously used by an entity.

CHARGE: a formal complaint, information, indictment or equivalent instrument containing an accusation of a crime.

DBA: abbreviation for Doing Business As. The firm is doing its futures, retail off-exchange forex or swaps business by this name.

DESIGNATED SUPERVISOR: solely for the purpose of determining whether the Branch Manager Examination (Series 30) is required, Designated Supervisor means a person who is registered with FINRA (formerly known as NASD) as a General Securities Representative and has been designated to act as the supervisor of an office that is not an Office of Supervisory Jurisdiction ("non-OSJ"), provided that:

- either the futures activity conducted in the non-OSJ that is subject to the Designated Supervisor's supervision is limited to activity not requiring the Series 3 Examination and both the Designated Supervisor and the Branch Manager of the Office of Supervisory Jurisdiction to which the non-OSJ reports have otherwise satisfied NFA's Proficiency Requirements appropriate to their supervisory activities; or
- the activity that is conducted in the non-OSJ that requires the Series 3 Examination is supervised by the Branch Manager of the Office of Supervisory Jurisdiction to which the non-OSJ reports and both the Designated Supervisor and Branch Office Manager have passed the Series 3 Examination.

ENJOINED: subject to an injunction.

ENTITY: any person other than an individual.

ENTITY FLOOR TRADER: an applicant that files or registrant that filed a Form 7-R to apply for registration as a floor trader.

FELONY: any crime classified as a felony and for states and countries that do not differentiate between a felony or misdemeanor, an offense that could result in imprisonment for any period of more than one year. The term also includes a general court martial.

FINANCIAL SERVICES INDUSTRY: the commodities, securities, accounting, banking, finance, insurance, law or real estate industries.

FLOOR TRADER ORDER ENTERER: an individual responsible for entry of orders from an Entity Floor Trader's own account.

FOUND: subject to a determination that conduct or a rule violation has occurred. The term applies to dispositions of any type, including but not limited to consent decrees or settlements in which the findings are neither admitted nor denied or in which the findings are for settlement or record purposes only.

INDIRECT OWNER: an individual who through agreement, holding companies, nominees, trusts or otherwise:

- is the owner of 10% or more of the outstanding shares of any class of an entity's equity securities, other than non-voting securities;
- is entitled to vote 10% or more of the outstanding shares of any class of an entity's equity securities, other than non-voting securities;
- has the power to sell or direct the sale of 10% or more of the outstanding shares of any class of an entity's equity securities, other than non-voting securities;
- is entitled to receive 10% or more of an entity's net profits; or
- has the power to exercise a controlling influence over an entity's activities that are subject to regulation by the Commission.

INTERNAL REVENUE CODE:

Section 7203: Willful Failure to File Return, Supply Information or Pay Tax

Section 7204: Fraudulent Statement or Failure to Make Statement

Section 7205: Fraudulent Withholding Exemption Certificate or Failure to Supply Information

Section 7207: Fraudulent Returns, Statements or Other Documents

INVESTMENT RELATED STATUTES:

- The Commodity Exchange Act
- The Securities Act of 1933
- The Securities Exchange Act of 1934
- The Public Utility Holding Company Act of 1935
- The Trust Indenture Act of 1939
- The Investment Advisers Act of 1940
- The Investment Company Act of 1940
- The Securities Investors Protection Act of 1970
- The Foreign Corrupt Practices Act of 1977
- Chapter 96 of Title 18 of the United States Code

- Any similar statute of a State or foreign jurisdiction
- Any rule, regulation or order under any such statutes; and
- The rules of the Municipal Securities Rulemaking Board

MISDEMEANOR: any crime classified as a misdemeanor and for states and countries that do not differentiate between a felony or misdemeanor, an offense that could result in imprisonment for any period of at least six days but not more than one year. By way of example, an offense for which the maximum period of imprisonment is 60 days would be considered a misdemeanor. The term also includes a special court martial.

NON-U.S. NATURAL PERSON: an individual who has not resided in the U.S. since reaching the age of 18 years.

OTHER NAME: For firms or sole proprietors, any other name that the applicant uses or has used in the past for its futures, retail off-exchange forex or swaps business but not the name of any other legal entity that the applicant has an affiliation or association with (see DBA). For individuals, this is any name the person is or has been known by. For example, a maiden name, an alias name that you use or are known by, or a previous name if you have changed your legal name.

OUTSIDE DIRECTOR: an individual who is director of an applicant or registrant and who

- is not an officer or employee of the applicant or registrant;
- is not engaged in or have direct supervisory responsibility over persons engaged in the solicitation of
 - or acceptance of customers' orders or retail forex customers' orders;
 - funds, securities or property for participation in a commodity pool;
 - a client's or prospective client's discretionary account;
 - leverage customers' orders for leverage transactions;
 - or acceptance of a swap agreement; or
- does not regularly have access to the keeping, handling or processing of:
 - transactions involving "commodity Interests", as that term is defined in CFTC Regulation 1.3(yy);
 - customer funds, retail forex customer funds, leverage customer funds, foreign futures or foreign options secured amount, or adjusted net capital.

PERSON: an individual, association, partnership, corporation, limited liability company, limited liability partnership, trust, or other form of business organization.

PRINCIPAL - means, with respect to an applicant, a registrant, or a person required to be registered under the Act:

- (1) an individual who is:
- a sole proprietor of a sole proprietorship;
 - a general partner of a partnership;
 - a director, president, chief executive officer, chief operating officer, chief financial officer, or a person in charge of a business unit, division or function subject to regulation by the Commission of a corporation, limited liability company or limited liability partnership;
 - a manager, managing member or a member vested with the management authority for a limited liability company or limited liability partnership; or
 - a chief compliance officer; or

- (2) an individual who directly or indirectly, through agreement, holding companies, nominees, trusts or otherwise:
- is the owner of 10% or more of the outstanding shares of any class of an applicant or registrant's equity securities, other than non-voting securities;
 - is entitled to vote 10% or more of the outstanding shares of any class of an applicant or registrant's equity securities, other than non-voting securities;
 - has the power to sell or direct the sale of 10% or more of the outstanding shares of any class of an applicant or registrant's equity securities, other than non-voting securities;
 - is entitled to receive 10% or more of an applicant or registrant's net profits; or
 - has the power to exercise a controlling influence over an applicant or registrant's activities that are subject to regulation by the Commission; or
- (3) an entity that:
- is a general partner of a partnership; or
 - is the direct owner of 10% or more of the outstanding shares of any class of an applicant or registrant's equity securities, other than non-voting securities; or
- (4) an individual who or an entity that:
- has contributed 10% or more of an applicant or registrant's capital unless such capital contribution consists of subordinated debt contributed by:
 - an unaffiliated bank insured by the Federal Deposit Insurance Corporation;
 - an unaffiliated "foreign bank," as defined in 12 CFR 211.21(n) that currently operates an "office of a foreign bank," as defined in 12 CFR 211.21(t), which is licensed under 12 CFR 211.24(a);
 - such office of an unaffiliated, licensed foreign bank; or
 - an insurance company subject to regulation by any State,provided such debt is not guaranteed by an individual who or entity that is not a principal of the applicant or registrant.

For the purpose of answering Questions A, B, C, D, E, F, G, I and K of the Disciplinary Information sections, PRINCIPAL also means an individual described in (1), (2) or (4) above with respect to any entity whether or not the entity is an applicant, registrant, or a person required to be registered under the Act.

SELF-REGULATORY ORGANIZATION (SRO): a private, non-governmental organization authorized to set and enforce standards or conduct for an industry. NFA, FINRA (formerly known as NASD) and the securities and futures exchanges in the U.S. are examples of domestic SROs.

UNITED STATES CRIMINAL CODE:

Section 152: Concealment of assets, making false claims or bribery in connection with a bankruptcy

Sections 1341, 1342, or 1343: Mail fraud

Chapter 25: Counterfeiting and forgery

Chapter 47: Fraud or false statements in a matter within the jurisdiction of a United States department or agency

Chapter 95 or 96: Racketeering and Racketeering Influence.

Completing the Proficiency Requirements Section

Individuals who are applying for registration as an AP or who are principals of a sole proprietorship must satisfy proficiency requirements. Individuals who have already satisfied the proficiency requirements do not need to complete the Proficiency Requirements section. An individual will have satisfied the proficiency requirements if:

- NFA has evidence that the individual has taken and passed the National Commodity Futures Examination (Series 3) or the Limited Futures Examination-Regulations (Series 32):
 - within two years prior to the date the application is filed; or
 - more than two years prior to the date the application is filed and since that date there has not been a period of two consecutive years during which the individual was not registered as an AP or FB or was not an approved principal of a registrant; or
- The individual is registered as a Floor Broker on the date the application is filed.

Individuals who must complete the Proficiency Requirements section must indicate whether they intend to use the Series 3 examination or one or more alternative means to satisfying proficiency requirements. Some of the alternatives require that an individual limit the activities that he or she intends to engage in and to pass an alternative examination. Individuals who have already passed an alternative examination do not complete the questions related to alternative examinations if:

- NFA has evidence that the individual has taken and passed the examination that the individual intends to use to satisfy the alternative proficiency requirement:
 - within two years prior to the date the application is filed; or
 - more than two years prior to the date the application is filed and since that date there has not been a period of two consecutive years during which the individual was not registered as an AP or FB or was not an approved principal of a registrant.

Individuals seeking approval as a forex associated person or as a sole proprietor forex firm must satisfy proficiency requirements before engaging in off-exchange forex business with retail customers. Individuals who have already satisfied the proficiency requirements do not need to complete the Proficiency Requirements section. An individual will have satisfied the proficiency requirements if:

- NFA has evidence that the individual has passed the Series 3 or Series 32 exam requirement (as described above) and
 - NFA has received satisfactory evidence that the applicant has passed the Series 34 within two years of the date the application is filed or
 - since the date the applicant last passed the Series 34 there has not been a period of two consecutive years during which the applicant has not been either registered as an AP or FB or was not an approved principal of a registrant; or
- The individual was registered as an AP, FB or an approved sole proprietor principal on May 22, 2008, and there has not been a period of two consecutive years since that date during which the applicant has not been either registered as an AP or FB or was not an approved principal of a registrant.

Individuals filing as Branch Office Managers must indicate whether they will satisfy the Branch Manager proficiency requirements using the Branch Manager Examination (Series 30) or an alternative. The individual does not complete the Branch Manager proficiency section if the individual has already satisfied the Branch Manager proficiency requirements. An individual will

have already satisfied the Branch Manager proficiency requirements if NFA has evidence that the individual has taken and passed the Series 30 and since the date the individual last ceased acting as a branch office manager, there has not been a period of two consecutive years during which he or she has not been registered as an AP.

Additional Assistance

Additional information regarding registration requirements and specific topics can be found on the Registration page of NFA's web site at www.nfa.futures.org. NFA's Information Center, (800-621-3570 or 312-781-1410), is also available to provide assistance. Its normal hours are Monday through Friday, from 8:00 AM to 5:00 PM, CT.

Disciplinary Information – Criminal Disclosures

For additional assistance and information on completing this page refer to the Instructions and Definition of Terms at the beginning of this document.

Answer the following questions.

YOU MUST ANSWER "YES" TO THE QUESTIONS ON THIS PAGE EVEN IF:

- ADJUDICATION OF GUILT WAS WITHHELD OR THERE WAS NO CONVICTION; OR
- THERE WAS A CONDITIONAL DISCHARGE OR POST-CONVICTION DISMISSAL AFTER SUCCESSFUL COMPLETION OF A SENTENCE; OR
- A STATE CERTIFICATE OF RELIEF FROM DISABILITIES OR SIMILAR DOCUMENT WAS ISSUED RELIEVING THE HOLDER OF FORFEITURES, DISABILITIES OR BARS RESULTING FROM A CONVICTION; OR
- THE RECORD WAS EXPUNGED OR SEALED; OR
- A PARDON WAS GRANTED.

YOU MAY ANSWER "NO" IF THE CASE WAS DECIDED IN A JUVENILE COURT OR UNDER A YOUTH OFFENDER LAW.

For each matter that requires a "Yes" answer to Questions A, B or C below, you must provide additional information by filing a Criminal Disclosure Matter Page ("DMP") for each criminal matter using NFA's DMP Filing system that requests:

- who was involved;
- when it occurred;
- what the allegations were;
- what the final determination was, if any; and
- the date of the determination.

You must also provide documents regarding each criminal matter requiring a "Yes" answer, that show

- the charges;
- the classification of the offense, i.e., felony or misdemeanor;
- the plea, sentencing and probation information, as applicable;
- the final disposition; and
- a summary of the circumstances surrounding the criminal matter.

You may provide these documents electronically using the upload function in the DMP Filing System or sending them to NFA (See Instruction).

Question A.*

(1) Have you personally or

*Required to file application

(2) has any entity of which you were a Principal at the time the activities occurred

ever pled guilty or nolo contendere ("no contest") to or been convicted or found guilty of any felony in any U.S., non-U.S. or military court?

☐ Yes ☐ No

Question B.*

(1) Have you personally or

(2) has any entity of which you were a Principal at the time the activities occurred

ever pled guilty to or been convicted or found guilty of any misdemeanor in any U.S., non-U.S. or military court which involves:

- embezzlement, theft, extortion, fraud, fraudulent conversion, forgery, counterfeiting, false pretenses, bribery, gambling, racketeering or misappropriation of funds, securities or property;
- violation of sections 7203, 7204, 7205 or 7207 of the Internal Revenue Code of 1986; or
- violation of sections 152, 1341, 1342, or 1343 or chapters 25, 47, 95 or 96 of the U.S. Criminal Code; or
- any transaction in or advice concerning futures, options, leverage transactions or securities?

☐ Yes ☐ No

Question C.*

(1) Are you personally or

(2) is any entity of which you were a Principal at the time the activities occurred

a party to any action, or is there a charge pending, the resolution of which could result in a "Yes" answer to the above questions?

☐ Yes ☐ No

Applicants with all "No" answers above answer this question

Even though you answered "No" to all of the above questions, would you like to provide a Criminal DMP?*

☐ Yes ☐ No

*Required to file application

Applicants with "Yes" answers above answer this question

Will you be filing a Criminal DMP with respect to a new matter?*

☐ Yes

☐ No

*Required to file application

Disciplinary Information - Regulatory Disclosures

For additional assistance and information on completing this page refer to the Instructions and Definition of Terms at the beginning of this document.

For each matter that requires a "Yes" answer to Questions D, E, F, G, H or I below, you must provide additional information by filing a Regulatory DMP for each regulatory matter using NFA's DMP Filing system that requests:

- who was involved;
- when it occurred;
- what the allegations were;
- what the final determination was, if any;
- the date of the determination; and
- a summary of the circumstances surrounding the regulatory matter.

You must also provide documents regarding each regulatory matter requiring a "Yes" answer, that show

- the allegations; and
- the final disposition.

You may provide these documents electronically using the upload function in the DMP Filing System or sending them to NFA (See Instruction).

Answer the following questions.

Question D.*

In any case brought by a U.S. or non-U.S. governmental body (other than the CFTC),

(1) have you personally or

(2) has any entity of which you were a Principal at the time the activities occurred

ever been permanently or temporarily enjoined after a hearing or default or as the result of a settlement, consent decree or other agreement, from engaging in or continuing any activity involving:

- any transaction in or advice concerning futures, options, leverage transactions or securities; or
- embezzlement, theft, extortion, fraud, fraudulent conversion, forgery, counterfeiting, false pretenses, bribery, gambling, racketeering or misappropriation of funds, securities or property?

☐ Yes ☐ No

*Required to file application

Question E.*

In any case brought by a U.S. or non-U.S. governmental body (other than the CFTC),

(1) have you personally or

(2) has any entity of which you were a Principal at the time the activities occurred

ever been found after a hearing or default or as the result of a settlement, consent decree or other agreement, to:

- have violated any provision of any investment-related statute or regulation thereunder; or
- have violated any statute, rule, regulation or order which involves embezzlement, theft, extortion, fraud, fraudulent conversion, forgery, counterfeiting, false pretenses, bribery, gambling, racketeering or misappropriation of funds, securities or property; or
- have willfully aided, abetted, counseled, commanded, induced or procured such violation by any other person; or
- have failed to supervise another person's activities under any investment-related statute or regulation thereunder?

☐ Yes ☐ No

Question F.*

(1) Have you personally or

(2) has any entity of which you were a Principal at the time the activities occurred

ever been debarred by any agency of the U. S. from contracting with the U. S.?

☐ Yes ☐ No

Question G.*

(1) Have you personally or

(2) has any entity of which you were a Principal at the time the activities occurred

ever been the subject of any order issued by or a party to any agreement with a U.S. or non-U.S. regulatory authority (other than the CFTC), including but not limited to a licensing authority, or self-regulatory organization (other than NFA or a U.S. futures exchange) that prevented or restricted your ability to engage in any business in the financial services industry?

☐ Yes ☐ No

*Required to file application

Question H.*

Are any of the orders or other agreements described in Question G currently in effect against you personally?

☐ Yes ☐ No

Question I.*

(1) Are you personally or

(2) is any entity of which you were a Principal at the time the activities occurred

a party to any action, or is there a charge pending, the resolution of which could result in a "Yes" answer to the above questions?

☐ Yes ☐ No

Applicants with all "No" answers above answer this question

Even though you answered "No" to all of the above questions, would you like to provide a Regulatory DMP?*

☐ Yes ☐ No

Applicants with "Yes" answers above answer this question

Will you be filing a Regulatory DMP with respect to a new matter?*

☐ Yes ☐ No

*Required to file application

Disciplinary Information - Financial Disclosures

For additional assistance and information on completing this page refer to the Instructions and Definition of Terms at the beginning of this document.

For each matter that requires a "Yes" answer to Questions J and K below, you must provide additional information by filing a Financial DMP for each financial matter using NFA's DMP Filing system that requests:

- who was involved;
- when it occurred;
- what the allegations were;
- what the final determination was, if any;
- the date of the determination; and
- a summary of the circumstances surrounding the financial matter.

For actions filed with bodies other than NFA or the CFTC, you must also provide documents regarding each financial matter requiring a "Yes" answer that show

- the allegations; and
- the final disposition.

You may provide these documents electronically using the upload function in the DMP Filing System or sending them to NFA (See Instruction).

Answer the following questions.

Question J.*

Have you failed to pay any arbitration awards involving CFTC-regulated products, CFTC civil monetary penalties, CFTC restitution amounts, CFTC disgorgement amounts, or CFTC reparation amounts?

☐ Yes ☐ No

Question K.*

(1) Have you personally or

(2) has any entity of which you were a Principal at the time the activities occurred

ever been the subject of an adversary action brought by a U.S. bankruptcy trustee?

☐ Yes ☐ No

*Required to file application

Applicants with all "No" answers above answer this question

Even though you answered "No" to all of the above questions, would you like to provide a Financial DMP?*

☐ Yes ☐ No

Applicants with "Yes" answers above answer this question

Will you be filing a Financial DMP with respect to a new matter?*

☐ Yes ☐ No

Disciplinary Information - Employment Disclosures

For additional assistance and information on completing this page refer to the Instructions and Definition of Terms at the beginning of this document.

For each matter that requires a "Yes" answer to Question L below, you must provide additional information by filing an Employment DMP for each employment matter using NFA's DMP Filing system that requests:

- who was involved;
- when it occurred;
- what the allegations were;
- what the final determination was, if any;
- the date of the determination; and
- a summary of the circumstances surrounding the employment matter.

You must also provide documents regarding each employment matter requiring a "Yes" answer that show

- the allegations; and
- the final disposition.

You may provide documents regarding each employment matter electronically using the upload function in the DMP Filing System or sending them to NFA (See Instruction).

Answer the following question.

Question L.*

Have you ever been discharged or permitted to resign for cause as a result of allegations of:

- embezzlement, theft, extortion, fraud, fraudulent conversion, forgery, counterfeiting, false pretenses, bribery, gambling, racketeering or misappropriation of funds, securities or property; or
- failure to supervise another person in the conduct of such person's activities as a registrant of the CFTC, SEC, NFA, FINRA or other U.S. or non-U.S. self-regulatory organization?

☐ Yes ☐ No

Applicants with a "No" answer above answer this question

Even though you answered "No" to all of the above questions, would you like to provide an Employment DMP?*

☐ Yes ☐ No

*Required to file application

Applicants with "Yes" answers above answer this question

Will you be filing an Employment DMP with respect to a new matter?*

☐ Yes

☐ No

*Required to file application

Employment, Education and Residential History

Employment and Education History

The CFTC requires that the sponsor attempt to communicate with all of the applicant's previous employers and educational institutions for the past three years and to maintain documentation in their files that includes the names of the persons contacted and the dates of contact or, if no contact was made, the reason why.

Enter your employment and personal history, working back 10 years. All time must be accounted for, including self-employment, part-time employment, unemployment, military service and full-time education. If more spaces are needed, complete the information in another document and attach it to this document.

Proficiency Requirements

Answer the following questions.

Have you passed the Series 3 Examination within the past two years?* ☐ Yes ☐ No

Only individuals intending to use an alternative(s) to satisfy the proficiency requirements complete this section.

Check one of the following, if applicable

If you are a registered General Securities Representative of the sponsor, and your futures activity will be limited to any of the two following activities, check each that applies:

- ☐ You limit futures activities to those activities covered in the Futures Managed Funds Examination (Series 31): the solicitation of pool participants and/or the solicitation of discretionary accounts managed by a CTA, or the supervision of others engaged in such solicitations.

Have you passed the Series 31 Examination within the past two years?* ☐ Yes ☐ No

- ☐ You limit your futures activity as provided in Registration Rule 401(b) to referring clients to another AP of the sponsor or to supervising others who make such referrals.
- ☐ Check here if you have been registered or licensed to solicit futures business by a foreign regulatory authority located in Canada or the United Kingdom within the past two years and are therefore eligible to satisfy the proficiency requirements by passing the Limited Futures Examination – Regulations (Series 32).

Have you passed the Series 32 Examination within the past two years?* ☐ Yes ☐ No

- ☐ Check here if your sponsor is a CPO that trades swaps subject to the jurisdiction of the CFTC in a commodity pool that but for the trading of such swaps would be eligible for the exclusion under CFTC Regulation 4.5(c)(2)(iii)(A) or (B) or the exemption under CFTC Regulations 4.13(a)(3) and the sponsor has been granted or is seeking a waiver from the Series 3 for its APs pursuant to NFA Registration Rule 401(e)(2)(ii) or if your sponsor is a CTA that provides advice on behalf of the sponsor to a commodity pool as described above.
- ☐ Check here if your sponsor is a CPO that operates pools primarily engaged in securities transactions or a CTA that provides futures trading advice solely incidental to its securities advisory services and your sponsor has been granted or is seeking a waiver from the Series 3 for its APs pursuant to the Interpretive Notices to Registration Rule 402.

*Required to file application

Only individuals filing as a forex associated person complete this section.

Have you passed the Series 34 Examination within the past two years?* ☐ Yes ☐ No

Only individuals filing as a branch office manager complete this section

Have you passed the Series 30 Examination within the past two years?* ☐ Yes ☐ No

Are you eligible to be a Branch Office Manager or Designated Supervisor under FINRA rules?* ☐ Yes ☐ No

Paperwork Reduction Act Notice

OMB Numbers 3038-0023 and 3038-0072

You are not required to provide the information requested on a form subject to the Paperwork Reduction Act unless the form displays a valid OMB Control Number.

The time needed to complete and file Form 7-R, Form 7-W, Form 8-R and Form 8-T may vary depending upon individual circumstances. The estimated average times are:

Form 7-R

FCM	0.6 hours	IB	0.5 hours	Form 7-W	0.1 hours
SD	1.1 hour	CPO	0.5 hours	Form 8-R	1.0 hour
MSP	1.1 hour	CTA	0.5 hours	Form 8-T	0.2 hours
RFED	0.6 hours	FT	0.6 hours		

Privacy Act Notice

The information in Forms 7-R, 7-W, 8-R and 8-T and on the fingerprint card is being collected pursuant to authority granted in Sections 2(c), 4f, 4k, 4n, 4s, 8a and 19 of the Commodity Exchange Act, 7 U.S.C. 2(c), 6f, 6k, 6n, 6s, 12a and 23. Under Section 2(c), it is unlawful for anyone to engage in off-exchange foreign currency futures transactions or off-exchange foreign currency leveraged, margined or financed transactions with persons who are not eligible contract participants without registration, or exemption from registration, as a retail foreign exchange dealer, futures commission merchant, introducing broker, commodity pool operator or commodity trading advisor, as appropriate. Under Section 4d of the Commodity Exchange Act, 7 U.S.C. 6d, it is unlawful for anyone to act as a futures commission merchant or introducing broker without being registered in that capacity under the Act. Under Section 4m of the Commodity Exchange Act, 7 U.S.C. 6m, it is unlawful for a commodity trading advisor or commodity pool operator to make use of the mails or any means or instrumentality of interstate commerce in connection with his business as a commodity trading advisor or commodity pool operator without being registered in the appropriate capacity under the Act, except that a commodity trading advisor who, during the course of the preceding 12 months, has not furnished commodity trading advice to more than 15 persons and does not hold himself out generally to the public as a commodity trading advisor, need not register. Under Section 4s of the Commodity Exchange Act, 7 U.S.C. 6s, it is unlawful for anyone to act as a swap dealer or major swap participant without being registered in that capacity under the Act. Under Section 19 of the Commodity Exchange Act, 7 U.S.C. 23, and Section 31.5 of the CFTC's regulations, it is unlawful for anyone to act as a leverage transaction merchant without being registered in that capacity under the Act.

The information requested in Form 7-R is designed to assist NFA and the CFTC, as appropriate, in determining whether the application for registration should be granted or denied and to maintain the accuracy of registration files. The information in Form 7-W is designed to assist NFA and the CFTC in determining whether it would be contrary to the requirements of the Commodity Exchange Act, or any rule, regulation or order thereunder, or the public interest to permit withdrawal from registration.

The information requested in Form 8-R and on the fingerprint card will be used by the CFTC or NFA, as appropriate, as a basis for conducting an inquiry into the individual's fitness to be an associated person, floor broker or floor trader or to be a principal of a futures commission merchant, swap dealer, major swap participant, retail foreign exchange dealer, introducing broker, commodity

trading advisor, commodity pool operator, leverage transaction merchant or non-natural person floor trader.

Portions of the information requested in Form 8-R will be used by the CFTC and, in appropriate cases, by NFA, to confirm the registration of certain associated persons. The information requested in Form 8-T will be used by the CFTC, and, in appropriate cases, by NFA, to record the registration status of the individual and, in appropriate cases, as a basis for further inquiry into the individual's fitness to remain in business subject to the CFTC's jurisdiction.

With the exception of the social security number and Federal employer identification number, all information in Forms 8-R and 8-T must be furnished. Disclosure of the social security number and Federal employer identification number is voluntary. The social security number and the Federal employer identification number are sought pursuant to the Debt Collection Improvement Act of 1996, which allows the CFTC to use the social security number or taxpayer identifying number furnished to the CFTC as part of the registration process for purposes of collecting and reporting on any debt owed to the U.S. Government, including civil monetary penalties. Although voluntary, the furnishing of a social security number or Federal employer identification number assists the CFTC and NFA in identifying individuals and firms, and therefore expedites the processing of those forms.

The failure by an applicant, registrant or principal to timely file a properly completed Form 7-R and all other related required filings may result in the denial of an application for registration or withdrawal thereof or, in the case of an annual records maintenance fee, treating the registrant as having petitioned for withdrawal. Failure by an applicant, registrant or principal to timely file or cause to be filed a properly completed Form 8-R or 8-T, any other required related filings, or a fingerprint card may result in the lapse, denial, suspension or revocation of registration, withdrawal of the application or other enforcement or disciplinary action by the CFTC or NFA.

NFA makes available to the public on NFA website(s), including the Background Affiliation Status Information Center (BASIC), firm directories, business addresses, telephone numbers, registration categories, effective dates of registration, registration status, and disciplinary action taken concerning futures commission merchants, introducing brokers, commodity pool operators, commodity trading advisors, swap dealers, major swap participants and retail foreign exchange dealers and their associated persons and principals; non-natural person floor traders and their principals; and floor trader order enterers.

Additional information on Forms 7-R, 7-W, 8-R and 8-T is publicly available, and may be accessed by contacting the National Futures Association, Registration Department, Suite 1800, 300 S. Riverside Plaza, Chicago, IL 60606-6615, except for the following information, which is generally not available for public release unless required under the Freedom of Information Act (FOIA) :

- The fingerprint card, including its demographic information;
- social security number;
- date of birth;
- location of birth;
- current residential address; and
- any supplementary information filed in response to the Form 8-R "Personal Information," "Disciplinary Information," "Matter Information," or "Disclosure Matter" sections, Form 8-T "Withdrawal Reasons," "Disciplinary Information," or "Matter Information" sections, and Form 7-W, "Additional Customer Information" sections.

The CFTC, or NFA acting in accordance with rules approved by the CFTC, may disclose to third parties any information provided on Forms 7-R, 7-W, 8-R and 8-T pursuant to the Commodity Exchange Act, 7 U.S.C. 1 et. seq., Privacy Act of 1974, 5 U.S.C. 552a (Privacy Act), and the Commission's Privacy Act routine uses published in the Federal Register, which may include, but is not limited to, disclosure to Federal, state, local, or foreign law enforcement or regulatory authorities acting within the scope of their jurisdiction or for their use in meeting responsibilities assigned to them by law. The information will be maintained and disclosures will be made in accordance with CFTC Privacy Act System of Records Notice CFTC-12, National Futures Association (NFA) Applications Suite System (Exempted), CFTC-10, Investigatory Records (Exempted), or another relevant System of Records Notice, available from the CFTC "Privacy Program" page, <http://www.cftc.gov/Transparency/PrivacyOffice>.

If an individual believes that information on the forms is confidential, the individual may petition the CFTC, pursuant to 17 CFR 145.9, to treat such information as confidential in response to requests under FOIA. 5 U.S.C. 552. The filing of a petition for confidential treatment, however, does not guarantee that the information will be treated confidentially in response to a FOIA request. The CFTC will make no determination as to confidential treatment of information submitted unless and until the information is the subject of an FOIA request.

This notice is provided in accordance with the requirements of the Privacy Act, 5 U.S.C. 552a(e)(3), and summarizes some of an individual's rights under the Privacy Act, 5 U.S.C. 552a. Individuals desiring further information should consult the CFTC's regulations under the Privacy Act, 17 CFR Part 146, and under the Freedom of Information Act, 17 CFR Part 145, and the CFTC's published System of Records Notices, which describe the existence and character of each system of records maintained by the CFTC, available at the CFTC "Privacy Program" page.

Forms which have not been prepared and executed in compliance with applicable requirements may not be acceptable for filing. Acceptance of this form shall not constitute any finding that the information is true, current or complete. Misstatements or omissions of fact may constitute federal criminal violations [7 U.S.C. 13 and 18 U.S.C. 1001] or grounds for disqualification from registration.

Sponsor Agreement

Sponsor certifies that:

the Form 8-R is, to the best of the Sponsor's knowledge, information and belief, true, complete and accurate and that in light of the circumstances under which the Sponsor has given them, the answers and statements in the Form 8-R are not misleading in any material respect;

the AP applicant, Forex AP applicant, Swap AP applicant, principal or Floor Trader Order Enterer has authorized the Sponsor to electronically file the Form 8-R on the AP applicant's, Forex AP applicant's or Swap AP applicant's behalf, the principal's behalf or the Floor Trader Order Enterer's behalf and that the Sponsor has authorized the person who files the application to file the Form 8-R and to make the certifications and acknowledgements contained in this Sponsor Agreement;

the Sponsor has communicated or has attempted to communicate with all of the applicant's previous employers and educational institutions for the past three years and has documentation on file with the names of the persons contacted and the dates of contact or, if no contact was

made, the reason therefor;

the applicant has been hired or is employed by the Sponsor or that it is the intention of the Sponsor to hire or otherwise employ the applicant as an AP, Forex AP or Swap AP within 30 days after receipt of notification that the applicant has received a temporary license or has been registered;

the applicant will not be permitted to act as an AP until the applicant has received a temporary license or has been registered as an AP, to act as a Forex AP until the applicant has been approved as a Forex AP or to act as a Swap AP until the applicant has been approved as a Swap AP;

if the Sponsor is a new sponsor filing an application for registration of the applicant as an AP pursuant to the provisions of NFA Registration Rule 207(a), that the Sponsor has verified that the applicant is not subject to a disqualification from registration under Section 8a(2) of the Commodity Exchange Act, 7 U.S.C. 12(a)(2), and that the Sponsor meets the requirements set forth in NFA Registration Rule 509(b)(5);

if the applicant is applying for a temporary license pursuant to NFA Registration Rule 301(a)(2), that the Sponsor has reviewed the information concerning the applicant in NFA's BASIC system and has received a copy of the notice of the institution of any proceeding in the BASIC system that is pending and was brought against the applicant under Sections 6(c), 6(d), 6c, 6d, 8a or 9 of the Commodity Exchange Act, 7 U.S.C. 9, 13b, 13a-1, 13a-2, 12a, and 13, CFTC regulations 3.55 or 3.60 or NFA or exchange rules or that was instituted in accordance with the procedures provided in CFTC regulation 3.51 or Part 500 of the NFA Registration Rules and, within the prior 12 months, resulted in the Commission or NFA permitting the withdrawal of such person's application for registration in any capacity;

if the applicant is subject to any current NFA or Commission order imposing conditions on the registration of the applicant, that the Sponsor meets the requirements set forth in NFA Registration Rule 509(b)(5) to sponsor a conditioned registrant, that it has reviewed the conditions contained in any current NFA or Commission order imposing conditions on the registration of the applicant and that the Sponsor will supervise the applicant in accordance with the conditions contained in the order; and

the Sponsor has taken, and will take, such measures as are necessary to prevent the unwarranted dissemination of any of the information contained in the Form 8-R and the records and documents retained in support of the Form 8-R.

Sponsor acknowledges that:

the Sponsor is subject to the imposition of criminal penalties under Section 9(a) of the Commodity Exchange Act, 7 U.S.C. 13(a), and 18 U.S.C. 1001 for any false statements or omissions Sponsor made in the Form 8-R;

while the individual is an AP, forex AP or Swap AP sponsored by or a principal of the Sponsor or is responsible for entering orders on behalf of the Floor Trader's own account, the Sponsor is responsible for maintaining the information in the Form 8-R in a complete, accurate and current manner by electronically filing updates to the information contained therein;

it is the duty and obligation of the Sponsor not to employ an individual as an AP with a statutory disqualification under Section 8a(2) of the Commodity Exchange Act, 7 U.S.C. 12(a)(2), to notify the Commission when any individual associated with the Sponsor is subject to a statutory disqualification under Section 8a(2) of the Act and to supervise any individual for whom the Sponsor files a Form 8-R, once the Sponsor employs him or her, with a view toward preventing him or her from committing violations of the Commodity Exchange Act and the rules, regulations and orders thereunder; and

the information contained in the Form 8-R has been supplied to the Sponsor for the sole purpose of allowing it to verify the information contained in the Form 8-R.

Individual Agreement

The applicant, principal or Floor Trader Order Enterer verifies that:

the answers and statements in the application or Form 8-R are true, complete and accurate and that in light of the circumstances under which the applicant, principal or Floor Trader Order Enterer has given them, the answers and statements in the Form 8-R are not misleading in any material respect.

The applicant certifies that

if applying for a temporary license pursuant to the provisions of NFA Registration Rule 301(a)(2), that the applicant has advised the Sponsor of and has provided the Sponsor with a copy of the notice of the institution of any pending adjudicatory proceeding that was brought against the applicant under Sections 6(c), 6(d), 6c, 6d, 8a or 9 of the Commodity Exchange Act, 7 U.S.C. 9, 13b, 13a-1, 13a-2, 12a, and 13, CFTC regulations 3.55 or 3.60 or NFA or exchange rules or any proceeding that was brought against the applicant under CFTC regulation 3.51 or Part 500 of the NFA Registration Rules and, within the prior 12 months, resulted in the Commission or NFA permitting the withdrawal of such person's application for registration in any capacity.

The applicant, principal or Floor Trader Order Enterer acknowledges that:

the applicant, principal or Floor Trader Order Enterer is subject to the imposition of criminal penalties under Section 9(a) of the Commodity Exchange Act, 7 U.S.C. 13(a), and 18 U.S.C. 1001 for any false statements or omissions made in the Form 8-R;

the applicant, principal or Floor Trader Order Enterer is responsible at all times for maintaining the information in the Form 8-R in a complete, accurate and current manner by promptly notifying the Sponsor whenever any of the information on the Form 8-R is no longer complete, accurate or current and authorizing the Sponsor to electronically file updates to correct the information;

the residential address provided on the Form 8-R may be deemed to be the address for delivery to the applicant, principal or Floor Trader Order Enterer of any written communications from the Commission and NFA, including any notice of intent to deny, revoke or otherwise affect the applicant's registration or individual's status as principal; any summons, complaint, reparations claim, arbitration claim, order or subpoena; request for information; or any other written communication

unless the applicant, principal or Floor Trader Order Enterer specifies another address for this purpose;

the applicant or principal must keep current the residential address provided on the Form 8-R while registered as an AP or affiliated as a principal and for two years after termination of registration or affiliation; and

the applicant is not registered and may not act as an AP until a notice has been issued that registration or a TL has been granted; if applicable, the applicant is not approved as a Forex AP and may not act as a Forex AP until approval has been granted; and, if applicable, the applicant is not approved as a Swap AP and may not act as a Swap AP until approval has been granted.

The applicant, principal or Floor Trader Order Enterer authorizes that:

NFA, and any contract market of which the applicant's or principal's Sponsor or any current or future guarantor (under CFTC regulation 1.10(j)) of the applicant's or principal's Sponsor is or may become a member, may conduct an investigation to determine the applicant's or principal's fitness for registration, and if applicable, for Associate status and NFA may conduct a background investigation of the Floor Trader Order Enterer;

and requests that any person, including but not limited to contract markets, or non-U.S. regulatory or law enforcement agencies, furnish upon request to NFA or any agent acting on behalf of NFA any information requested by NFA in connection with any investigation conducted by NFA to determine the applicant's fitness for registration or fitness of the principal or any background investigation of the Floor Trader Order Enterer;

The applicant, principal or Floor Trader Order Enterer agrees that:

the applicant, principal or Floor Trader Order Enterer will cooperate promptly and fully, consistent with applicable Federal law, in any investigation in connection with the applicant's or principal's fitness for registration or Associate status or any background investigation of the Floor Trader Order Enterer, which may include contacting non-U.S. regulatory and law enforcement authorities, including the submission of documents and information to NFA that NFA, in its discretion, may require in connection with the applicant's or principal's fitness for registration or Associate status or the background investigation of the Floor Trader Order Enterer;

the applicant or principal submits to the jurisdiction of any contract market, of which the applicant's or principal's Sponsor or any current or future guarantor (under CFTC regulation 1.10(j)) of the applicant's or principal's Sponsor is or may become a member, which has or may adopt rules which apply to the applicant as an associated person or principal, and the applicant or principal shall abide by all such rules and to comply with, be subject to, and abide by all requirements, rulings, orders, directives and decisions of and any penalties, prohibitions and limitations imposed by any such contract market;

any person furnishing information to NFA or any agent acting on behalf of NFA in connection with the investigation so authorized is released from any and all liability of whatever nature by reason of furnishing such information to NFA or any agent acting on behalf of NFA;

if the applicant is applying to obtain registration as an associated person, the applicant is also applying for registration with NFA as an Associate if the applicant's Sponsor is or becomes a Member of NFA; and

if the applicant is granted registration as an Associate of a Member of NFA, the applicant shall become and remain bound by all applicable NFA requirements, including without limitation all applicable NFA Bylaws, Compliance Rules, Financial Requirements, Registration Rules, Code of Arbitration and Member Arbitration Rules, as then and thereafter in effect, and that this agreement shall apply each time that the applicant is granted registration as an Associate.

Floor Broker/Floor Trader Agreement

The applicant certifies that:

the answers and statements in the Form 8-R are true, complete and accurate and that in light of the circumstances under which the applicant has given them, the answers and statements in the Form 8-R are not misleading in any material respect.

The applicant acknowledges that:

the applicant is subject to the imposition of criminal penalties under Section 9(a) of the Commodity Exchange Act, 7 U.S.C. 13(a), and 18 U.S.C. 1001 for any false statements or omissions made in the Form 8-R;

the applicant is responsible at all times for maintaining the information in the Form 8-R in a complete, accurate and current manner by electronically filing updates to the information contained therein;

the business address provided on the Form 8-R may be deemed to be the address for delivery to the applicant of any written communications from the Commission and NFA, including any notice of intent to deny, revoke or otherwise affect the applicant's registration; any summons, complaint, reparations claim, arbitration claim, order or subpoena; request for information; or any other written communication unless the applicant specifies another address for this purpose;

the applicant must keep current the business address provided on the Form 8-R while registered and for two years after termination of registration; and

the applicant is not registered and may not act as an FB or FT until a notice has been issued that registration or a temporary license has been granted.

The applicant authorizes that:

NFA may conduct an investigation to determine the applicant's fitness for registration;

and requests that any person, including but not limited to contract markets or non-U.S. regulatory or law enforcement agencies, furnish upon request to NFA or any agent acting on behalf of NFA any information requested by NFA in connection with any investigation conducted by NFA to

determine the applicant's fitness for registration;

The applicant agrees that:

the applicant will cooperate promptly and fully, consistent with applicable Federal law, in any investigation in connection with the applicant's application for registration, which investigation may include contacting non-U.S. regulatory and law enforcement authorities, including the submission of documents and information to NFA that NFA, in its discretion, may require in connection with the applicant's application for registration;

any person furnishing information to NFA or any agent acting on behalf of NFA in connection with the investigation so authorized is released from any and all liability of whatever nature by reason of furnishing such information to NFA or any agent acting on behalf of NFA; and

if the applicant ever applies for and is granted registration as an Associate of a Member of NFA, the applicant shall become and remain bound by all applicable NFA requirements, including without limitation all applicable NFA Bylaws, Compliance Rules, Financial Requirements, Registration Rules, Code of Arbitration and Member Arbitration Rules, as then and thereafter in effect, and that this agreement shall apply each time that the applicant is granted registration as an Associate.

THE APPLICANT, PRINCIPAL OR FLOOR TRADER ORDER ENTERER ALSO AGREES TO THE PRIVACY ACT NOTICE ABOVE, AND THE COLLECTION, PROCESSING, DISCLOSURE, AND USE OF HIS OR HER PERSONAL INFORMATION BY NFA, THE CFTC, AND THIRD PARTIES AS STATED IN THE NOTICE.

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the announcement of a public meeting of the Academic Research Council (ARC or Council) of the Consumer Financial Protection Bureau (Bureau). The notice also describes the functions of the Council. Notice of the meeting is permitted by section 8 of the ARC Charter.

DATES: The meeting date is Wednesday, May 17, 2017, 9:00 a.m. to 12:00 p.m. eastern standard time.

ADDRESSES: The meeting location is Consumer Financial Protection Bureau,

1275 First Street NE., Washington, DC 20002.

FOR FURTHER INFORMATION CONTACT:

Emily Turner, Director's Financial Analyst, 202-435-7730, *CFPB AcademicResearchCouncil@cfpb.gov*, Academic Research Council, Office of Research, 1275 First Street NE., Washington, DC 20002.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1013(b)(1) of the Consumer Financial Protection Act, 12 U.S.C. 5493(b)(1), establishes the Office of Research (OR) and assigns to it the responsibility of researching, analyzing, and reporting on topics relating to the Bureau's mission, including developments in markets for consumer financial products and services, consumer awareness, and consumer behavior. The Academic Research Council is a consultative body comprised of scholars that help the Office of Research perform these responsibilities. Section 3 of the ARC

Charter states: The Council will provide the Office of Research advice and feedback on research methodologies, framing research questions, data collection, and analytic strategies. Additionally, the Council will provide both backward- and forward-looking feedback on the Office of Research's research work and will offer input into its research strategic planning process and research agenda. Specifically, Section 8(d) of the ARC Charter states:

(1) The Council will convene in person from time to time at the call of the Assistant Director or the Assistant Director's designee, but at a minimum shall meet annually. Council members may also make additional visits to the Bureau or participate in additional meetings for educational or other research-related purposes.

II. Agenda

The Academic Research Council will discuss methodology and direction for consumer finance research at the Bureau.

Persons who need a reasonable accommodation to participate should

contact CFPB_504Request@cfpb.gov, 202-435-9EE0, 1-855-233-0362, or 202-435-9742 (TTY) at least ten business days prior to the meeting or event to request assistance. The request must identify the date, time, location, and title of the meeting or event, the nature of the assistance requested, and contact information for the requester. CFPB will strive to provide, but cannot guarantee that accommodation will be provided for late requests.

Individuals who wish to attend the Academic Research Council meeting must RSVP to CFPB_504 Request@cfpb.gov by noon, May 8, 2017. Members of the public must RSVP by the due date and must include "ARC" in the subject line of the RSVP.

III. Availability

The Council's agenda will be made available to the public on May 1, 2017, via consumerfinance.gov. Individuals should express in their RSVP if they require a paper copy of the agenda.

A recording and transcript of this meeting will be available after the meeting on the CFPB's Web site consumerfinance.gov.

Dated: April 24, 2017.

Leandra English,

Chief of Staff, Bureau of Consumer Financial Protection.

BILLING CODE 4810-AM-P

DEPARTMENT OF DEFENSE

Office of the Secretary

Charter Renewal of Department of Defense Federal Advisory Committee

AGENCY: Department of Defense.

ACTION: Renewal of Federal Advisory Committee.

SUMMARY: The Department of Defense (DoD) is publishing this notice to announce that it is renewing the charter for the Board of Regents, Uniformed Services University of the Health Sciences ("the Board").

FOR FURTHER INFORMATION CONTACT: Jim Freeman, Advisory Committee Management Officer for the Department of Defense, 703-692-5952.

SUPPLEMENTARY INFORMATION: The Board's charter is being renewed pursuant to 10 U.S.C. 2113a and in accordance with the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended) and 41 CFR 102-3.50(a). The Board's charter and contact information for the Board's Designated Federal Officer (DFO) can be found at <http://www.facadatabase.gov/>.

The Board shall assist the Secretary of Defense in an advisory capacity in carrying out the Secretary's responsible to conduct the business of the Uniformed Services University of the Health Sciences ("the University"). The Board shall provide advice and recommendations on academic and administrative matters critical to the full accreditation and successful operation of the University.

Under the provisions of 10 U.S.C. 2113a(b), the Board shall be composed of 15 members. All members of the Board are appointed to provide advice on behalf of the Government on the basis of their best judgment without representing any particular point of view and in a manner that is free from conflict of interest. Pursuant to 10 U.S.C. 2113a(e), Board members (other than ex-officio members), while attending conferences or meetings or while otherwise performing their duties as members, shall be entitled to receive compensation at a rate to be fixed by the Secretary of Defense. All members are entitled to reimbursement for official Board-related travel and per diem.

The public or interested organizations may submit written statements to the Board membership about the Board's mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the Board. All written statements shall be submitted to the DFO for the Board, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: April 25, 2017.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Office of the Secretary

Industry Information Day; Amendment

AGENCY: DoD Chief Information Officer, Department of Defense (DoD).

ACTION: Notice of meeting; extension of period for public to submit questions prior to meeting.

SUMMARY: DoD is extending the period for organizations to submit questions prior to the public "Industry Information Day" where DoD will present a briefing, and receive and address industry feedback on the implementation of Defense Federal Acquisition Regulation Supplement

(DFARS) Case 2013-D018, "*Network Penetration Reporting and Contracting for Cloud Services*." The period for organizations to submit questions is extended until Friday, June 2, 2017.

DATES: The public meeting will be held on June 23, 2017, from 9:00 a.m. to 1:00 p.m., EDT. Registration to attend this meeting must be received by Monday, June 12, 2017.

ADDRESSES: The public meeting will be held at the Mark Center Auditorium, 4800 Mark Center Drive, Alexandria, VA 22350-3603. The auditorium is located on level B-1 of the building.

FOR FURTHER INFORMATION CONTACT: Ms. Vicki Michetti, at (703)604-3167.

SUPPLEMENTARY INFORMATION:

Background

On April 5, 2017 (82 FR 16577), DoD published a notice of meeting in the **Federal Register** to announce that DoD is hosting an "Industry Information Day" to present a briefing, and receive and address industry feedback on the implementation of Defense Federal Acquisition Regulation Supplement (DFARS) Case 2013-D018, "*Network Penetration Reporting and Contracting for Cloud Services*."

The period for organizations to submit questions prior to DoD hosting an "Industry Information Day" is extended from May 1, 2017 to June 2, 2017, to provide additional time for parties to request information on the implementation of DFARS Case 2013-D018, "*Network Penetration Reporting and Contracting for Cloud Services*." Questions should be sent by email to OSD.DIBCSIAEvents@mail.mil with the subject line of the email stating, "Industry Information Day."

Dated: April 25, 2017.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Availability of Record of Decision for the Gulf of Alaska Navy Training Activities Final Supplemental Environmental Impact Statement/Overseas Environmental Impact Statement

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: The Department of the Navy (DoN), after carefully weighing the

strategic, operational, and environmental consequences of the proposed action, announces its decision to continue military readiness activities as identified in Alternative 1 in the Gulf of Alaska Navy Training Activities Final Supplemental Environmental Impact Statement/Overseas Environmental Impact Statement. This alternative includes one large-scale Carrier Strike Group exercise annually, Anti-Submarine Warfare activities, and the use of active sonar for up to 21 consecutive days between April and October. Implementation of Alternative 1 will enable the DoN to meet current and future training requirements and manage and mitigate environmental impacts.

SUPPLEMENTARY INFORMATION: The complete text of the Record of Decision is available at <http://www.GOAIEIS.com>. Single copies of the Record of Decision are available upon request by contacting: GOA Supplemental EIS/OEIS Project Manager, Naval Facilities Engineering Command Northwest, 1101 Tautog Circle, Suite 203, Silverdale, Washington 98315–1101.

Dated: April 25, 2017.

A.M. Nichols,

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2017–ICCD–0007]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; 2017–18 National Teacher and Principal Survey (NTPS 2017–18)

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before May 30, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2017–ICCD–0007. Comments submitted in response to this notice should be

submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW, LBJ, Room 224–84, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact NCES Information Collections at NCES.Information.Collections@ed.gov.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: 2017–18 National Teacher and Principal Survey (NTPS 2017–18).

OMB Control Number: 1850–0598.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public:

Individuals or Households.

Total Estimated Number of Annual Responses: 101,383.

Total Estimated Number of Annual Burden Hours: 46,749.

Abstract: The National Teacher and Principal Survey (NTPS), conducted biennially by the National Center for Education Statistics (NCES), is a system of related questionnaires that provides descriptive data on the context of elementary and secondary education. Redesigned from the Schools and Staffing Survey (SASS) with a focus on flexibility, timeliness, and integration with other ED data, the NTPS system allows for school, principal, and teacher characteristics to be analyzed in relation to one another. NTPS is an in-depth, nationally representative survey of first through twelfth grade public school teachers, principals, and schools. Kindergarten teachers in schools with at least a first grade are also surveyed. NTPS utilizes core content and a series of rotating modules to allow timely collection of important education trends as well as trend analysis. Topics covered include characteristics of teachers, principals, schools, teacher training opportunities, retention, retirement, hiring, and shortages. Preliminary activities for NTPS 2017–18, namely: (a) Contacting and seeking research approvals from public school districts with an established research approval process (“special contact districts”), (b) notifying districts that their school(s) have been selected for NTPS 2017–18, and (c) notifying sampled schools of their selection for the survey and verifying their mailing addresses, were approved in November 2016 with revisions in March 2017 (OMB# 1850–0598 v.16–17). This request is to conduct NTPS 2017–18, including all of its recruitment and data collection activities. Because of the overlap in time, this request also carries over the burden and materials for the approved preliminary activities.

Dated: April 25, 2017.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

DEPARTMENT OF ENERGY

DOE/NSF High Energy Physics Advisory Panel

AGENCY: Department of Energy, Office of Science.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the DOE/NSF High Energy Physics Advisory Panel (HEPAP). The Federal Advisory Committee Act requires that public notice of these

meetings be announced in the **Federal Register**.

DATES: Monday, June 5, 2017 8:30 a.m. to 6:00 p.m.

Tuesday, June 6, 2017 8:30 a.m. to 4:00 p.m.

ADDRESSES: Hilton Washington DC North/Gaithersburg, 620 Perry Parkway, Gaithersburg, MD 20877.

FOR FURTHER INFORMATION CONTACT: John Kogut, Executive Secretary, High Energy Physics Advisory Panel (HEPAP), U.S. Department of Energy, Office of Science, SC-25/Germantown Building, 1000 Independence Avenue SW., Washington, DC 20585; Telephone: (301) 903-1298.

SUPPLEMENTARY INFORMATION:

Purpose of Meeting: To provide advice and guidance to the Department of Energy and the National Science Foundation on scientific priorities within the field of high energy physics research.

Tentative Agenda: Agenda will include discussions of the following: June 5-6, 2017

- Discussion of Department of Energy High Energy Physics Program.
- Discussion of National Science Foundation Elementary Particle Physics Program.
- Reports on and Discussions of Topics of General Interest in High Energy Physics.
- Public Comment (10-minute rule).

Public Participation: The meeting is open to the public. A webcast of this meeting will be available. Please check the Web site below for updates and information on how to view the meeting. If you would like to file a written statement with the Committee, you may do so either before or after the meeting. If you would like to make oral statements regarding any of these items on the agenda, you should contact John Kogut, (301) 903-1298 or by email at: John.Kogut@science.doe.gov. You must make your request for an oral statement at least five business days before the meeting. Reasonable provision will be made to include the scheduled oral statements on the agenda. The Chairperson of the Panel will conduct the meeting to facilitate the orderly conduct of business. Public comment will follow the 10-minute rule.

Minutes: The minutes of the meeting will be available on the U.S. Department of Energy's Office of High Energy Physics Advisory Panel Web site: <http://science.energy.gov/hep/hepap/meetings/>.

Issued at Washington, DC, on April 21, 2017.

Environmental Management Site-Specific Advisory Board, Northern New Mexico

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Northern New Mexico. The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, May 17, 2017 1:00 p.m.-5:15 p.m.

ADDRESSES: The Lodge at Santa Fe, Kachina Ballroom, 750 North St. Francis Drive, Santa Fe, New Mexico 87501.

FOR FURTHER INFORMATION CONTACT: Menice Santistevan, Northern New Mexico Citizens' Advisory Board (NNMCAB), 94 Cities of Gold Road, Santa Fe, NM 87506. Phone (505) 995-0393; Fax (505) 989-1752 or Email: Menice.Santistevan@em.doe.gov.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE-EM and site management in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

- Call to Order
- Welcome and Introductions
- Approval of Agenda and Meeting Minutes of March 29, 2017
- Old Business
- New Business
- Update from Co-Deputy Designated Federal Officers and Executive Director
- Break
- Presentation on Wildfire Mitigation
- Public Comment Period
- Updates from EM Los Alamos Field Office and New Mexico Environment Department
- Wrap-Up Comments from NNMCAB Members
- Adjourn

Public Participation: The EM SSAB, Northern New Mexico, welcomes the attendance of the public at its advisory committee meetings and will make

every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Menice Santistevan at least seven days in advance of the meeting at the telephone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Menice Santistevan at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

DOE/NSF Nuclear Science Advisory Committee

AGENCY: Office of Science, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the DOE/NSF Nuclear Science Advisory Committee (NSAC). The Federal Advisory Committee Act requires that public notice of these meetings be announced in the **Federal Register**.

DATES: Friday, June 2, 2017; 8:45 a.m.–4:45 p.m.

ADDRESSES: Hilton Washington DC/ Rockville Hotel & Executive Meeting Center, 1750 Rockville Pike, Rockville, Maryland 20852, 301-468-1100.

FOR FURTHER INFORMATION CONTACT:

Brenda L. May, U.S. Department of Energy; SC-26/Germantown Building, 1000 Independence Avenue SW., Washington, DC 20585-1290; Telephone: 301-903-0536 or email: brenda.may@science.doe.gov

The most current information concerning this meeting can be found on the Web site: <http://science.gov/np/nsac/meetings/>.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to provide advice and

guidance on a continuing basis to the Department of Energy and the National Science Foundation on scientific priorities within the field of basic nuclear science research.

Tentative Agenda: Agenda will include discussions of the following:

Friday, June 2, 2017

- Perspectives from Department of Energy and National Science Foundation
- Update from the Department of Energy and National Science Foundation's Nuclear Physics Office's
- LRP Presentations on CEBAF, FRIB, Theory Initiatives, RHIC

Note: The NSAC Meeting will be broadcast live on the Internet. You may find out how to access this broadcast by

going to the following site prior to the start of the meeting. A video record of the meeting including the presentations that are made will be archived at this site after the meeting ends: <http://www.tvworldwide.com/events/DOE/170602/>.

Public Participation: The meeting is open to the public. If you would like to file a written statement with the Committee, you may do so either before or after the meeting. If you would like to make oral statements regarding any of these items on the agenda, you should contact Brenda L. May, 301-903-0536 or Brenda.May@science.doe.gov (email). You must make your request for an oral statement at least five business days before the meeting. Reasonable provision will be made to include the scheduled oral statements on the agenda. The Chairperson of the Committee will conduct the meeting to facilitate the orderly conduct of business. Public comment will follow the 10-minute rule.

The minutes of the meeting will be available for review on the U.S. Department of Energy's Office of Nuclear Physics Web site at <http://science.gov/np/nsac/meetings/>.

Issued in Washington, DC, on April 21, 2017.

[Docket No. ER17-1438-000]

Radford's Run Wind Farm, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Radford's Run Wind Farm, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is May 11, 2017.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by

clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Dated: April 21, 2017.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17-141-000]

Texas Gas Transmission, LLC; Notice of Request Under Blanket Authorization

Take notice that on April 11, 2017, Texas Gas Transmission, LLC (Texas Gas), 9 Greenway Plaza, Suite 2800, Houston, Texas 77046, filed a prior notice application pursuant to sections 157.205, and 157.216(b) of the Federal Energy Regulatory Commission's (Commission) regulations under the Natural Gas Act (NGA), and Texas Gas' blanket certificate issued in Docket No. CP82-407-000. Texas Gas requests authorization to abandon certain natural gas pipeline assets, ancillary auxiliary facilities and appurtenances, located in Terrebonne Parish, Louisiana and Louisiana State waters. Specifically, Texas Gas proposes to: (1) Abandon in place 3.61 miles of 8-inch-diameter pipeline known as the Bay Junop to Bay Round 8-inch pipeline; (3) abandon in place approximately 10.05 miles and abandon by removal approximately 0.24 miles of 8-inch-diameter pipeline, known as the Bay Round to Block 8 8-inch pipeline; and (3) abandon by removal the Bay Round Platform and the Brammer Old Camp Pass Platform, all as more fully set forth in the application, which is open to the public for inspection. The filing may also be viewed on the web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call

toll-free, (866) 208-3676 or TTY, (202) 502-8659.

Any questions regarding this application should be directed to Kathy D. Fort, Manager, Certificates and Tariffs, Texas Gas Transmission, LLC, 610 West 2nd Street, Owensboro, Kentucky 42301 or phone (270) 688-6825, or by email kathy.fort@bwpmlp.com.

Any person or the Commission's staff may, within 60 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the regulations under the NGA (18 CFR 157.205), a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the allowed time for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed

documents on all other parties.

However, the non-party commenter will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Dated: April 21, 2017.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket No. CP17–6–000]

Texas Eastern Transmission, LP; Notice of Availability of the Environmental Assessment for the Proposed Idle Line 1 Abandonment Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Idle Line 1 Abandonment Project, proposed by Texas Eastern Transmission, LP (Texas Eastern) in the above-referenced docket. Texas Eastern requests authorization to abandon in place and by removal approximately 165 miles of existing, idle, Line 1 pipeline that runs from Fayette County, Ohio, to Greene County, Pennsylvania. Specifically, Texas Eastern is proposing to abandon portions of the Line 1 pipeline that were placed into idle service in 1989 including three segments of 24-inch pipeline, associated lateral lines 10–L and 10–M, metering and regulating facilities, and other related aboveground facilities.

The EA assesses the potential environmental effects of the abandonment of the Idle Line 1 in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The U.S. Army Corps of Engineers participated as a cooperating agency in the preparation of the EA. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposal and participate in the NEPA analysis. The U.S. Army Corps of Engineers may adopt and use the EA in its decision-making process on whether to issue a Section 404 or Section 10 permit to Texas Eastern for abandonment activities in waters of the United States.

The proposed Idle Line 1 Abandonment Project includes abandoning in place the following facilities:

- 5.03 miles of 24-inch-diameter Line 1 from milepost 837.05 in Fayette County, Ohio to milepost 842.08 in Pickaway County, Ohio (Segment 1);
- 155.37 miles of 24-inch-diameter Line 1 from milepost 848.33 in Pickaway County, Ohio to milepost 1003.7 in Green County, Pennsylvania (Segment 2);
- 5.48 miles of 24-inch-diameter Line 1 from milepost 1004.35 to 1009.83 in Greene County, Pennsylvania (Segment 3);
- 0.5 miles of 8-inch Line 10–M in Marshall County, West Virginia;
- 0.07 miles of 4.5-inch Line 10–L in Greene County, Pennsylvania; and

Metering and Regulation facilities, and related launcher/receiver barrels, mainline valves, and other appurtenances would also be removed.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; libraries in the project areas; potentially affected landowners and other interested individuals and groups; and parties to this proceeding.

In addition, the EA is available for public viewing on the FERC's Web site (www.ferc.gov) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502–8371.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in Washington, DC on or before May 22, 2017.

For your convenience, there are three methods you can use to file your comments to the Commission. In all instances, please reference the project docket number (CP17–6–000) with your submission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or FercOnlineSupport@ferc.gov.

(1) You can file your comments electronically using the eComment feature on the Commission's Web site (www.ferc.gov) under the link to Documents and Filings. This is an easy method for submitting brief, text-only comments on a project;

(2) You can also file your comments electronically using the eFiling feature on the Commission's Web site (www.ferc.gov) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You must select the type of filing you are making. If you are filing a comment on a particular project, please select "Comment on a Filing"; or

(3) You can file a paper copy of your comments by mailing them to the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.214).¹ Only intervenors have the right to seek rehearing of the Commission's decision. The Commission grants affected landowners and others with environmental concerns intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which no other party can adequately represent. Simply filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered.

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC Web site (www.ferc.gov) using the eLibrary link. Click on the eLibrary link, click on "General Search," and enter the docket number excluding the last three digits in the Docket Number field (*i.e.*, CP17–6). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which

¹ See the previous discussion on the methods for filing comments.

allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Dated: April 21, 2017.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–212–000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Amendment

On April 19, 2017, Transcontinental Gas Pipe Line Company, LLC (Transco), P.O. Box 1396, Houston, TX 77251–1396, filed a variance request in Docket No. CP15–138–000. The Commission is treating the variance request as an application to amend its Atlantic Sunrise Project under section 7(c) of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations, and hereby gives notice of the proposed amendment. Specifically, Transco requests authorization to modify the pipeline route in Luzerne and Wyoming counties, Pennsylvania, from milepost (MP) M–0166–0.29 to MP 30.20 (totaling 6.48 miles), identified as Central Penn Line (CPL) North Alternative 13 (Amendment). Transco proposes this amendment to address landowner concerns, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may be viewed on the web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FercOnlineSupport@ferc.gov or call toll-free, (866) 208–3676 or TTY, (202) 502–8659.

Any questions regarding the proposed amendment should be directed to Bill Hammons at Transcontinental Gas Pipe Line Company, LLC, Post Office Box 1396, Houston, TX 77251 or at (713) 215–2130 or Scott Turkington, Director, Rates & Regulatory, Transcontinental Gas Pipe Line Company, LLC, Post Office Box 1396, Houston, TX 77251–1396 or at (713) 215–3391 (phone), or scott.c.turkington@williams.com.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental analysis (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 5 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this

project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on May 12, 2017.

Dated: April 21, 2017.

Kimberly D. Bose,
Secretary.

[Docket Nos. EL17–67–000]

New York Power Authority; New York Independent System Operator, Inc.; Notice of Institution of Section 206 Proceeding

On April 21, 2017, a letter order was issued in Docket No. EL17–67–000 by the Director, Division of Electric Power—East, Office of Energy Market Regulation, pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e (2012), instituting an investigation into whether the updated depreciation rates of New York Power Authority, which were included in New York Independent System Operator, Inc.'s Open Access Transmission Tariff may be unjust, unreasonable, unduly discriminatory or preferential. *New York Power Authority and New York Independent System Operator, Inc.*, 159 FERC 62,075 (2017).

Any interested person desiring to be heard in Docket No. EL17–67–000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214, within 21 days of the date of issuance of the order.

Dated: April 21, 2017.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC17–105–000.

Applicants: CP Bloom Wind LLC.

Description: Application for Authorization under Section 203 of the Federal Power Act of CP Bloom Wind LLC.

Filed Date: 4/20/17.

Accession Number: 20170420–5237.

Comments Due: 5 p.m. ET 5/11/17.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER17–335–002.

Applicants: PJM Interconnection, L.L.C.

Description: Compliance filing: Erata to Compliance Filing in Docket No. ER17–335–001 to be effective 1/9/2017.

Filed Date: 4/20/17.

Accession Number: 20170420–5202.

Comments Due: 5 p.m. ET 5/11/17.

Docket Numbers: ER15–794–004.

Applicants: Catalyst Paper Operations Inc.

Description: Compliance filing: Change in Status Filing to be effective 1/27/2017.

Filed Date: 4/21/17.

Accession Number: 20170421–5223.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17–1445–000.

Applicants: Tucson Electric Power Company.

Description: § 205(d) Rate Filing: Concurrence to PNM RS No. 45 PETA (TEP RS No. 47) to be effective 6/11/2017.

Filed Date: 4/20/17.

Accession Number: 20170420–5190.

Comments Due: 5 p.m. ET 5/11/17.

Docket Numbers: ER17–1446–000.

Applicants: Midcontinent

Independent System Operator, Inc.

Description: Notification of Tariff Discrepancy and Request for Limited Tariff Waiver of Midcontinent Independent System Operator, Inc.

Filed Date: 4/20/17.

Accession Number: 20170420–5241.

Comments Due: 5 p.m. ET 5/11/17.

Docket Numbers: ER17–1447–000.

Applicants: Southwest Power Pool, Inc.

Description: § 205(d) Rate Filing: 1630R7 The Empire District Electric Company NITSA and NOA to be effective 4/1/2017.

Filed Date: 4/21/17.

Accession Number: 20170421–5036.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17–1448–000.

Applicants: DifWind Farms Limited I. *Description:* § 205(d) Rate Filing: CIS and SW Category 2 Seller Request to be effective 4/22/2017.

Filed Date: 4/21/17.

Accession Number: 20170421–5063.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17–1449–000.

Applicants: DifWind Farms Limited II.

Description: § 205(d) Rate Filing: CIS and SW Category 2 Seller Request to be effective 4/22/2017.

Filed Date: 4/21/17.

Accession Number: 20170421–5064.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17–1450–000.

Applicants: DifWind Farms Limited V.

Description: § 205(d) Rate Filing: CIS and SW Category 2 Seller Request to be effective 4/22/2017.

Filed Date: 4/21/17.

Accession Number: 20170421–5065.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17–1451–000.

Applicants: VPI Enterprises, LLC.

Description: § 205(d) Rate Filing: CIS and SW Category 2 Seller Request to be effective 4/22/2017.

Filed Date: 4/21/17.

Accession Number: 20170421–5066.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17–1452–000.

Applicants: Southern California Edison Company.

Description: § 205(d) Rate Filing: Amended SGIA SEPV Mojave West Project SA No. 560 to be effective 6/21/2017.

Filed Date: 4/21/17.

Accession Number: 20170421–5067.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17–1453–000.

Applicants: New York Independent System Operator, Inc.

Description: § 205(d) Rate Filing: 205 filing re: transmission constraint pricing revisions to be effective 6/20/2017.

Filed Date: 4/21/17.

Accession Number: 20170421-5070.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17-1454-000.

Applicants: Midcontinent

Independent System Operator, Inc.

Description: § 205(d) Rate Filing;

2017-04-21 SA 3012 Wisconsin Power & Light-ATC GIA (J390) to be effective 4/7/2017.

Filed Date: 4/21/17.

Accession Number: 20170421-5092.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17-1455-000.

Applicants: Public Service Electric and Gas Company, PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing;

PSEG submits revisions to OATT, Attachment M-2 (PSEG) to Update to General Proc. to be effective 6/21/2017.

Filed Date: 4/21/17.

Accession Number: 20170421-5102.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17-1456-000.

Applicants: Arizona Public Service Company.

Description: § 205(d) Rate Filing; Rate Schedule No. 217, Exhibit D to be effective 6/21/2017.

Filed Date: 4/21/17.

Accession Number: 20170421-5129.

Comments Due: 5 p.m. ET 5/12/17.

Docket Numbers: ER17-1457-000.

Applicants: ITC Midwest LLC.

Description: § 205(d) Rate Filing;

Cancellation of Maintenance Agreement with SMMPA to be effective 4/21/2017.

Filed Date: 4/21/17.

Accession Number: 20170421-5145.

Comments Due: 5 p.m. ET 5/12/17.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Dated: April 21, 2017.

BILLING CODE 6712-01-P

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Information Collection Activities: Submission for OMB Review; Comment Request (3064-0006 & -0184)

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on the renewal of existing information collections, as required by the Paperwork Reduction Act of 1995. On January 11, 2017, the FDIC requested comment for 60 days on a proposal to renew the information collections described below. No comments were received. The FDIC hereby gives notice of its plan to submit to OMB a request to approve the renewal of these collections, and again invites comment on this renewal.

DATES: Comments must be submitted on or before May 30, 2017.

ADDRESSES: Interested parties are invited to submit written comments to the FDIC by any of the following methods:

- <http://www.FDIC.gov/regulations/laws/federal/notices.html>.
- Email: comments@fdic.gov. Include the name and number of the collection in the subject line of the message.
- Mail: Manny Cabeza (202-898-3767), Counsel, MB-3007, or Jennifer Jones (202-898-6768), Counsel, MB-3105, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.
- Hand Delivery: Comments may be hand-delivered to the guard station at

the rear of the 17th Street Building (located on F Street), on business days between 7:00 a.m. and 5:00 p.m.

All comments should refer to the relevant OMB control number. A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Manny Cabeza or Jennifer Jones, at the FDIC address above.

SUPPLEMENTARY INFORMATION: On January 11, 2017, (82 FR 3315), the FDIC requested comment for 60 days on a proposal to renew the information collections described below. No comments were received. The FDIC hereby gives notice of its plan to submit to OMB a request to approve the renewal of these collections, and again invites comment on this renewal.

Proposal to renew the following currently approved collections of information:

1. *Title:* Interagency Biographical and Financial Report.

OMB Number: 3064-0006.

Form Number: Interagency Biographical and Financial Report.

Affected Public: Insured State Nonmember Banks and State Savings Associations.

Burden Estimate:

Type of burden	Estimated number of respondents	Estimated time per response	Frequency of response	Total annual estimated burden
Reporting	574	4	On Occasion	2,296 hours

General Description of Collection: The Report is submitted to the FDIC by: (1) Each individual director, officer or individual or group of shareholders acting in concert that will own or control 10% or more of a proposed or operating depository institution applying for FDIC deposit insurance; (2) a person proposing to acquire control of an insured state nonmember bank or state savings association (FDIC-supervised institution); (3) each proposed new director or proposed new chief executive officer of an FDIC-supervised institution which has undergone a change in control within the preceding twelve months; and (4) each proposed new director or senior executive officer of an FDIC-supervised institution that is not in compliance with the applicable capital requirements

or is otherwise in a troubled condition. The information is used by the FDIC to make an evaluation of the general character and financial condition of individuals who will be involved in the management or control of financial institutions, as required by statute. In order to lessen the burden on applicants, the FDIC cooperates with the other federal banking agencies to the maximum extent possible in processing the various applications. Notably, the Interagency Biographical and Financial Report will be amended to remove all references to the Office of Thrift Supervision as it appears on the form as well as changing the term "thrift" to "savings association." These changes are technical and non-substantive in nature.

There is no change in the method or substance of the collection. The overall

reduction in burden hours is a result of economic fluctuation. In particular, the number of respondents has decreased while the hours per response remain the same.

2. *Title:* Prohibitions and Restrictions on Proprietary Trading and Certain Interests In and Relationships With, Hedge Funds and Private Equity Funds.

OMB Number: 3064-0184.

Form Number: None.

Affected Public: Insured state nonmember banks not under a holding company; state savings associations and state savings banks not under a holding company; subsidiaries of state nonmember banks, state savings associations, and state savings banks not under a holding company; and foreign banks having an insured branch and their branches and agencies.

General Description of Collection:

Subject to certain exemptions, banking entities are generally prohibited from engaging in proprietary trading or from investing in, sponsoring, or having certain relationships with a hedge fund or private equity fund ("covered fund"). The Covered entities must retain certain records for a period that is no less than 5 years in a form that allows the prompt production of such records to the FDIC on request. The information collection requirements affecting FDIC-supervised institutions are summarized below.

Reporting Requirements

Section 351.12(e) states that, upon application, a banking entity may obtain an extension of the period of time to meet the requirements on ownership limitations in this section for up to 2 additional years.

Recordkeeping Requirements

Section 351.3(d)(3) requires covered entities to have a detailed written liquidity management plan that specifically contemplates and authorizes certain otherwise prohibited

securities to be used for liquidity management purposes.

Section 351.4(b)(3)(i)(A) provides that a trading desk or other organizational unit of another entity with more than \$50 billion in trading assets and liabilities is not a client, customer, or counterparty unless the trading desk documents how and why a particular trading desk or other organizational unit of the entity should be treated as a client, customer, or counterparty of the trading desk for purposes of § 351.4(b).

Section 351.11(a)(2) requires that covered funds generally must be organized and offered only in connection with the provision of bona fide trust, fiduciary, investment advisory, or commodity trading advisory services and only to persons that are customers of such services of the banking entity, pursuant to a written plan or similar documentation outlining how the banking entity intends to provide advisory or other similar services to its customers through organizing and offering the covered fund.

Section 351.20(b) specifies the contents of a required compliance

program for a banking entity with total consolidated assets of \$10 billion or more including a provision requiring that records sufficient to demonstrate compliance with section 13 of the BHC Act and applicable regulations be maintained and retained for a period of no less than 5 years or such longer period as required by FDIC.

Section 351.20(e) specifies that any banking entity that has more than \$10 billion in total consolidated assets as reported on December 31 of the previous two calendar years shall maintain records documenting the determination that each fund sponsored by the banking entity (including all subsidiaries and affiliates) is not a covered fund. Banking entities must also maintain a written plan documenting the treatment of certain seeding vehicles described in the regulation and, under certain circumstances, documentation of the value of the ownership interests owned by the banking entity in certain foreign public fund and each jurisdiction in which any such foreign public fund is organized.

Section 351.20(f)(1) applies to banking entities with no covered activities. A banking entity that does not engage in activities or investments pursuant to subpart B or subpart C (other than trading activities permitted pursuant to § 351.6(a) of subpart B) may satisfy the requirements of this section by establishing the required compliance program prior to becoming engaged in such activities or making such investments (other than trading activities permitted pursuant to § 351.6(a) of subpart B).

Section 351.20(f)(2) applies to banking entities with modest activities. A banking entity with total consolidated assets of \$10 billion or less as reported on December 31 of the previous two calendar years may satisfy the requirements of this section by including in its existing compliance policies and procedures appropriate references to the statutory and regulatory requirements and adjustments as appropriate given the activities, size, scope and complexity of the banking entity.

Disclosure Requirements

Section 351.11(a)(8)(i) requires that a banking entity make certain clear and conspicuous written disclosures to any prospective and actual investor in a covered fund (such as through disclosure in the covered fund's offering documents).

There is no change in the method or substance of this information collection. The annual burden estimate has been reduced from 28,234 hours to 17,763 hours primarily because the FDIC estimates that all FDIC-supervised institutions have now completed the implementation phase of the information collection and are no longer subject to that burden. FDIC is using one (1) respondent as a place-holder for implementation burden. Another reason for the reduction in burden is that fewer institutions are subject to reporting, recordkeeping and disclosure requirements. The foregoing reductions in burden more than offset a modest increase in burden attributable to: (i)

One additional institution growing in size to a degree that now makes it subject to 12 CFR 351.20(b) and (e) recordkeeping requirements; and (ii) an agency adjustment in its estimate of respondents affected by the recordkeeping requirements in 12 CFR 351.20(f)(1) due to the inadvertent omission of a class of respondents in its prior estimate.

Request for Comment

Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Dated at Washington, DC, this 24th day of April 2017.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE 6714-01-P

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Information Collection Activities: Proposed Collection Renewals; Comment Request (3064-0099; -0118; -0148 and -0153)

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal

agencies to take this opportunity to comment on the renewal of existing information collections, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). Currently, the FDIC is soliciting comment on renewal of the information collections described below.

DATES: Comments must be submitted on or before June 27, 2017.

ADDRESSES: Interested parties are invited to submit written comments to the FDIC by any of the following methods:

- <http://www.FDIC.gov/regulations/laws/federal/notices.html>.

- *Email:* comments@fdic.gov. Include the name and number of the collection in the subject line of the message.

- *Mail:* Manny Cabeza (202-898-3767), Counsel, MB 3007 or Jennifer Jones (202-898-6768), Counsel, MB-3105, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

- *Hand Delivery:* Comments may be hand-delivered to the guard station at the rear of the 17th Street Building (located on F Street), on business days between 7:00 a.m. and 5:00 p.m.

All comments should refer to the relevant OMB control number. A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Manny Cabeza or Jennifer Jones, at the FDIC address noted above.

SUPPLEMENTARY INFORMATION: Proposal to renew the following currently approved collections of information:

1. *Title:* Application for Waiver of Prohibition on Acceptance of Brokered Deposits.

OMB Number: 3064-0099.

Form Number: None.

Affected Public: Insured state nonmember banks and state savings associations.

Burden Estimate:

Type of burden	Estimated number of respondents	Estimated time per response (hours)	Frequency of response	Total annual estimated burden (hours)
Reporting	30	6	On Occasion	180

General Description of Collection: Section 29 of the Federal Deposit Insurance Act prohibits undercapitalized insured depository institutions from accepting, renewing,

or rolling over any brokered deposits. Adequately capitalized institutions may do so with a waiver from the FDIC, while well-capitalized institutions may accept, renew, or roll over brokered

deposits without restriction. This information collection captures the burden associated with preparing and filing an application for a waiver of the

prohibition on the acceptance of brokered deposits.

There is no change in the method or substance of the collection. The overall reduction in burden hours is a result of economic fluctuation. In particular, the

number of respondents has decreased while the hours per response remain the same.

2. *Title:* Management Official Interlocks.

OMB Number: 3064–0118.

Form Number: None.

Affected Public: Insured state nonmember banks and state savings associations.

Burden Estimate:

Type of burden	Estimated number of respondents	Estimated time per response	Frequency of response	Total annual estimated burden (hours)
Reporting	3	7	On Occasion	21

General Description of Collection: The FDIC's Management Official Interlocks regulation, 12 CFR 348, which implements the Depository Institutions Management Interlocks Act (DIMIA), 12 U.S.C. 3201–3208, generally prohibits bank management officials from serving simultaneously with two unaffiliated depository institutions or their holding companies but allows the FDIC to grant exemptions in appropriate circumstances. Consistent with DIMIA, the FDIC's Management Official Interlocks regulation has an application

requirement requiring information specified in the FDIC's procedural regulation. The rule also contains a notification requirement.

There is no change in the method or substance of the collection. The overall reduction in burden hours is a result of economic fluctuation as well as the change in complexity of the reporting institutions. In particular, the number of respondents has decreased while the hours per response have increased due to the complexity of the reporting institutions.

3. *Title:* Interagency Statement on Sound Practices Concerning Complex Structured Finance Transactions.

OMB Number: 3064–0148.

Form Number: Interagency Statement on Sound Practices Concerning Elevated Risk Complex Structured Finance Activities.

Affected Public: Insured state nonmember banks and state savings associations.

Burden Estimate:

Type of burden	Estimated number of respondents	Estimated time per response	Frequency of response	Total annual estimated burden (hours)
Recordkeeping	4	25	On Occasion	100

General Description of Collection: The Interagency Statement on Sound Practices Concerning Complex Structured Finance Transactions describes the types of internal controls and risk management procedures that the Agencies believe are particularly effective in assisting financial institutions to identify, evaluate, assess, document, and control the full range of credit, market, operational, legal and

reputational risks. A financial institution that engages in complex structured finance transactions should maintain a set of formal, written, firm-wide policies and procedures that are designed to allow the institution to identify and assess these risks.

There is no change in the method or substance of the collection. The overall reduction in burden hours is a result of economic fluctuation. In particular, the

number of respondents has decreased while the hours per response remain the same.

4. *Title:* Regulatory Capital Rules.

OMB Number: 3064–0153.

Form Number: None.

Affected Public: State nonmember banks, state savings associations, and certain subsidiaries of those entities.

Burden Estimate:

ESTIMATED HOURLY BURDEN

Type of burden	Estimated number of respondents	Estimated time per response	Frequency of response	Total annual estimated burden

Total Burden Hours					139,478

General Description of Collection:
This collection comprises the disclosure and recordkeeping requirements associated with minimum capital

requirements and overall capital adequacy standards for insured state nonmember banks, state savings associations, and certain subsidiaries of

those entities. The data is used by the FDIC to evaluate capital before approving various applications by insured depository institutions, to

evaluate capital as an essential component in determining safety and soundness, and to determine whether an institution is subject to prompt corrective action provisions.

There is no change in the method or substance of the collection. The overall reduction in burden hours is a result of economic fluctuation. In particular, the number of respondents has decreased while the hours per response remain the same.

Request for Comment

Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Dated at Washington, DC, this 25th day of April 2017.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE 6714-01-P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than May 16, 2017.

A. Federal Reserve Bank of Chicago
(Colette A. Fried, Assistant Vice

President) 230 South LaSalle Street, Chicago, Illinois 60690-1414:

1. *James P Cravens Stock Trust, James P Cravens Trustee, Sanborn, Iowa, and Marilyn Lee Cravens Stock Trust, Marilyn Lee Cravens Trustee, Sanborn, Iowa, as individuals and as a group acting in concert the Cravens Family Control group consisting of James P Cravens Stock Trust, James P Cravens Trustee, Sanborn, Iowa, Marilyn Lee Cravens Stock Trust, Marilyn Lee Cravens Trustee, Sanborn, Iowa, Emilie G Cravens, Manhattan, Kansas, Catherine J Cravens, Arlington, Virginia, and Margaret Burr Porter, Godfrey, Illinois; to acquire and retain shares of Milford Bancorporation, Milford, Iowa, and thereby indirectly acquire and retain shares of United Community Bank, Milford, Iowa.*

Board of Governors of the Federal Reserve System, April 25, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090-0292; Docket No. 2017-0001; Sequence 4]

Information Collection; FFATA Subaward and Executive Compensation Reporting Requirements

AGENCY: Office of the Integrated Award Environment, General Services Administration (GSA).

ACTION: Notice of request for comments regarding an extension to an existing OMB information collection.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve a renewal of the currently approved information collection requirement regarding FFATA Subaward and Executive Compensation Reporting Requirements.

DATES: Submit comments on or before June 27, 2017.

ADDRESSES: Submit comments identified by Information Collection 3090-0292, FFATA Subaward and Executive Compensation Reporting Requirements by any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by searching the OMB control number

3090-0292. Select the link "Comment Now" that corresponds with "Information Collection 3090-0292, FFATA Subaward and Executive Compensation Reporting Requirements". Follow the instructions provided on the screen. Please include your name, company name (if any), and "Information Collection 3090-0292, FFATA Subaward and Executive Compensation Reporting Requirements" on your attached document.

- *Mail:* General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: IC 3090-0292, FFATA Subaward and Executive Compensation Reporting Requirements.

Instructions: Please submit comments only and cite Information Collection 3090-0292, FFATA Subaward and Executive Compensation Reporting Requirements, in all correspondence related to this collection. All comments received will be posted without change to <http://www.regulations.gov>, including any personal and/or business confidential information provided.

FOR FURTHER INFORMATION CONTACT: Dennis Harrison, Procurement Analyst, Office of the Integrated Award Environment, GSA, at telephone number 202-215-9767; or via email at dennis.harrison@gsa.gov.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Federal Funding Accountability and Transparency Act (P.L. 109-282, as amended by section 6202(a) of P.L. 110-252), known as FFATA or the Transparency Act requires information disclosure of entities receiving Federal financial assistance through Federal awards such as Federal contracts, sub-contracts, grants and sub-grants, FFATA 2(a), (2), (i), (ii). Beginning October 1, 2010, the currently approved Paperwork Reduction Act submission directed compliance with the Transparency Act to report prime and first-tier sub-award data. Specifically, Federal agencies and prime awardees of grants were to ensure disclosure of executive compensation of both prime and subawardees and sub-award data pursuant to the Transparency Act. This information collection requires reporting of only the information enumerated under the Transparency Act.

B. Annual Reporting Burden

Sub-award Responses: 107,614.
Hours Per Response: 1.
Total Burden Hours: 107,614.
Executive Compensation Responses: 41,298.
Hours Per Response: 1.

Total Burden Hours: 41,298.

Total Annual Burden Hours: 148,912.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202-501-4755. Please cite OMB Control No. 3090-0292, FFATA Subaward and Executive Compensation Reporting Requirements, in all correspondence.

Dated: April 18, 2017.

Steve Grewal,

Deputy Chief Information Officer, General Services Administration.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Federal Funding Accountability and Transparency Act (P.L. 109-282, as amended by section 6202(a) of P.L. 110-252), known as FFATA or the Transparency Act, requires information disclosure of entities receiving Federal financial assistance through Federal awards such as Federal contracts, sub-contracts, grants and sub-grants, FFATA 2(a),(2),(i),(ii). The system that collects this information is called the FFATA Sub-award Reporting System (FSRS, www.fsrs.gov). This information collection requires information necessary for prime awardee registration in FSRS to create a user log-in and enable sub-award reporting for their entity. To register in FSRS for a user log-in, an entity is required to provide their Data Universal Numbering System (DUNS) number. FSRS then pulls core data about the entity from their System for Award Management (SAM) registration to include the legal business name, physical address, mailing address and Commercial and Government Entity (CAGE) code. The entity completes the FSRS registration by providing contact

information within the entity for approval.

If a prime awardee has already registered in FSRS to report contracts-related Transparency Act financial data, a new log-in will not be required. In addition, if a prime awardee had a user account in the Electronic Subcontract Reporting System (eSRS), a new log-in will not be required.

B. Annual Reporting Burden

Respondents: 5,678.

Responses Per Respondent: 1.

Total Annual Responses: 5,678.

Hours Per Response: .5.

Total Burden Hours: 2,839.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202-501-4755.

Please cite OMB Control No. 3090-0291, FSRS Registration Requirements for Prime Grant Awardees, in all correspondence.

BILLING CODE 6820–34–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed changes to the currently approved information collection project: “*Developing a Registry of Registries.*”

DATES: Comments on this notice must be received by June 27, 2017.

ADDRESSES: Written comments should be submitted to: Doris Lefkowitz, Reports Clearance Officer, AHRQ, by email at doris.lefkowitz@AHRQ.hhs.gov.

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by email at doris.lefkowitz@AHRQ.hhs.gov.

SUPPLEMENTARY INFORMATION:

Proposed Revision of a Currently Approved Collection Project: “Developing a Registry of Registries.” OMB Control Number 0935–0203

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3521, AHRQ invites the public to comment on this proposed information collection on the development of a registry of patient registries. Patient registries have received significant attention and funding in recent years. Similar to controlled studies, patient registries represent some burden to patients (*e.g.*, time to complete patient reported outcome measures, risk of loss of privacy), who often participate voluntarily in hopes of improving knowledge about a disease or condition. Patient registries also represent a substantial investment of health research resources. Despite these factors, patient registries are not required to be registered in *ClinicalTrials.gov*, presenting the potential for duplication of efforts and insufficient dissemination of findings that are not published in the peer-reviewed literature. To fulfill the obligation to patients and to ensure that resources are used in the most efficient manner, registries need to be listed in a manner similar to that of trials in *ClinicalTrials.gov*.

By providing a centralized point of collection for information about all patient registries in the United States, the Registry of Patient Registries (RoPR) enhances patient registry information, extracted from *ClinicalTrials.gov*, building on AHRQ’s efforts to describe the quality, appropriateness, and effectiveness of health services (and patient registries in particular) in a more readily available, central location.

The RoPR database system aims to achieve the following objectives:

(1) Provide a searchable database of patient registries in the United States (to promote collaboration, reduce redundancy, and improve transparency);

(2) Facilitate the use of common data fields and definitions in similar health conditions (to improve opportunities for sharing, comparing, and linkage);

(3) Provide a public repository of searchable summary results (including results from registries that have not yet been published in the peer-reviewed literature);

(4) Offer a search tool to locate existing data that researchers can request for use in new studies; and

(5) Serve as a recruitment tool for researchers and patients interested in participating in patient registries.

To achieve the objectives of this project, the following data collections will be implemented:

(1) Collect information on registries from users who populate the RoPR database system.

AHRQ is proposing to add a self-registration option to the RoPR database so that registry owners do not need a National Library of Medicine Protocol Registration System (PRS) account to contribute. The current OMB-approved RoPR system requires users to have a PRS account. In the current data entry process, registry owners enter most of the registry information using the *ClinicalTrials.gov* PRS. If a user defines the *ClinicalTrials.gov* record as a patient registry, that user will have the option of following a link to the RoPR submission page to input additional information about the registry. Patient registry data entered in the PRS is uploaded to the RoPR system daily and is accessible (along with information entered directly into RoPR) to the public via the RoPR search function.

Under the AHRQ proposal, these users can complete a simple registration on the RoPR site, which would be less burdensome than the PRS registration process, and then enter all registry information directly on RoPR. The rationale behind this alternative registration pathway is that many registries are created for quality reporting, outcome tracking, and quality improvement purposes, rather than for research purposes. Registering in *ClinicalTrials.gov* implies a research purpose, so it is not necessarily appropriate for non-research registries to register in *ClinicalTrials.gov*, and many have expressed that they do not wish to do so. AHRQ anticipates that more than 75 percent of registries will still register through the *ClinicalTrials.com*. However, the remaining registries are extremely important for health policy, and providing them with a registration pathway furthers the goal of creating a central place where stakeholders can find information on research and non-research registries pertinent to a specific clinical topic.

The new self-registration pathway is being developed by AHRQ through its contractor, L&M Policy Research and subcontractor Truven Health Analytics, an IBM Company, pursuant to AHRQ's statutory authority to conduct and support research on health care and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of health care services and with respect to database development. 42 U.S.C. 299a(a)(1) and (8).

AHRQ, in collaboration with the Centers for Medicare & Medicaid Services (CMS), is also proposing to add three fields to the self-registration pathway related to the CMS initiative to create a Centralized Repository for Public Health Agencies and Clinical Data Registry Reporting. The purpose of the repository is to assist eligible professionals, eligible hospitals, and critical access hospitals in finding entities that accept electronic public health data. By adding these fields to the existing RoPR database, AHRQ will further the goal of creating a central place where stakeholders can find all pertinent information on registries.

Method of Collection

The purpose and the use of the RoPR is to provide a readily available public resource strictly for patient registries, following the model of *ClinicalTrials.gov*, allowing for the increased availability and efficacy of patient registries. The information being collected in the RoPR Record is visible to the public visiting the RoPR Web site, and is readily available for public use.

The RoPR is an ongoing data collection initiative.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours for the respondent's time to participate in the RoPR. In 2016, 65 respondents manually entered a new RoPR record. It is expected that more than 75% of patient registries are research-focused and will continue to use the original *ClinicalTrials.gov* pathway described above. Thus, it is estimated that once

the self-registration pathway is available, approximately 65 respondents will enter RoPR records through the *ClinicalTrials.gov* link annually, and an additional 16 respondents (roughly 25% of 65), representing non-research registries, will enter RoPR records through the new self-registration pathway.

Each respondent need enter his or her new RoPR record only once. The RoPR system sends an automated reminder to any registry owner who has not updated his or her RoPR record in the past year. In 2016, 132 RoPR entries were updated and released. Using the same logic as above, it is estimated that an additional 33 entries (25% of 132) might be updated annually once the self-registration pathway is available.

In January 2017, Truven Health Analytics used a sample of existing *ClinicalTrials.gov* registry entries to estimate the time needed to enter all additional fields added through the self-registration process. The sample included records representing a range of depth and complexity. For example, one registry record contained only one primary outcome measure. Another record contained three more detailed outcome measures (one primary, one secondary, and one other.)

As a result of the knowledge gained during these processes, it is estimated that it will take users 10 minutes, on average, to manually enter the additional fields added through the self-registration process. Adding this time to the estimated burden of completing the original RoPR fields (45 minutes), it is estimated that it will take users 55 minutes to complete all fields through the self-registration pathway.

It is estimated that it will take users 5 minutes to review and update the fields added through the self-registration pathway. Adding this time to the estimated burden of reviewing and updating the original RoPR fields (15 minutes), it is estimated that it will take 20 minutes for a person to review and make updates to an existing RoPR record created through the self-registration pathway.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Minutes per response	Total burden hours
New RoPR Record entered manually through self-registration process	16	1	55/60	14.67
New RoPR Record entered through <i>ClinicalTrials.gov</i> pathway	65	1	45/60	48.75
Review/update existing RoPR Record created through self-registration process	33	1	20/60	11

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Form name	Number of respondents	Number of responses per respondent	Minutes per response	Total burden hours
Review/update existing RoPR Record created through <i>ClinicalTrials.gov</i> pathway	132	1	15/60	33
Total	246			107.42

Exhibit 2 shows the estimated cost time to participate in the RoPR. The estimated at an average of \$4,017.51 burden associated with the respondent's total cost burden to respondents is annually.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN

Form name	Number of respondents	Total burden hours	Average hourly wage rate † (\$)	Total cost burden (\$)
New RoPR Record entered manually through self-registration process	16	14.67	\$37.40	\$548.66
New RoPR Record entered through <i>ClinicalTrials.gov</i> pathway	65	48.75	37.40	1,823.25
Review/update existing RoPR Record created through self-registration process	33	11	37.40	411.40
Review/update existing RoPR Record created through <i>ClinicalTrials.gov</i> pathway	132	33	37.40	1,234.20
Total	246	107.42	37.40	4,017.51

*Based on the mean wages for Healthcare Practitioners and Technical Occupations, 29-0000. National Compensation Survey: Occupational wages in the United States May 2015, "U.S. Department of Labor, Bureau of Labor Statistics." Available at: <https://www.bls.gov/oes/current/oes290000.htm>.

Request for Comments

In accordance with the Paperwork Reduction Act, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ health care research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection.

All comments will become a matter of public record.

Sharon B. Arnold,
Acting Director.

BILLING CODE 4160-90-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) reapprove the proposed information collection project: "*Medical Expenditure Panel Survey—Insurance Component*."

DATES: Comments on this notice must be received by June 27, 2017.

ADDRESSES: Written comments should be submitted to: Doris Lefkowitz, Reports Clearance Officer, AHRQ, by email at doris.lefkowitz@AHRQ.hhs.gov.

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT:
Doris Lefkowitz, AHRQ Reports

Clearance Officer, (301) 427-1477, or by email at doris.lefkowitz@AHRQ.hhs.gov.

SUPPLEMENTARY INFORMATION:

Proposed Project

Medical Expenditure Panel Survey—Insurance Component

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501-3521, AHRQ invites the public to comment on this proposed information collection. Employer-sponsored health insurance is the source of coverage for 84.4 million current and former workers, plus many of their family members, and is a cornerstone of the U.S. health care system. The Medical Expenditure Panel Survey—Insurance Component (MEPS-IC) measures the extent, cost, and coverage of employer-sponsored health insurance on an annual basis. These statistics for private industry are produced at the National, State, and sub-State (metropolitan area) level. Statistics are also produced for State and Local governments.

This research has the following goals:

- (1) Provide data for Federal policymakers evaluating the effects of National and State health care reforms.
- (2) Provide descriptive data on the current employer-sponsored health insurance system and data for modeling the differential impacts of proposed health policy initiatives.

(3) Supply critical State and National estimates of health insurance spending for the National Health Accounts and Gross Domestic Product.

The MEPS-IC is conducted pursuant to AHRQ's statutory authority to conduct surveys to collect data on the cost, use and quality of health care, including types and costs of private insurance, 42 U.S.C. 299b-2(a), and to conduct research on health care, 42 U.S.C. 299a.

Method of Collection

To achieve the goals of this project, following data collections will be implemented for both private sector and state and local government employers:

(1) Pre-screener Questionnaire—The purpose of the Pre-screener Questionnaire, which is collected via telephone, varies depending on the insurance status of the establishment contacted. Establishment is defined as a single, physical location in the private sector and a governmental unit in state and local governments. For establishments that do not offer health insurance to their employees, the Pre-screener Questionnaire is used to collect basic information, such as number of employees. For establishments that do

offer health insurance, the Pre-screener Questionnaire collects contact name and address information for the person in the establishment best equipped to complete the full questionnaire.

(2) Establishment Questionnaire—The purpose of the mailed Establishment Questionnaire is to obtain general information from employers that provide health insurance to their employees, including total active enrollment in health insurance, other employee benefits, demographic characteristics of employees, and retiree health insurance.

(3) Plan Questionnaire—The purpose of the mailed Plan Questionnaire is to collect plan-specific information on each plan (up to four plans) offered by establishments. This questionnaire obtains information on total premiums, employer and employee contributions to the premium, and plan enrollment for each type of coverage offered—single, employee-plus-one, and family—within a plan. It also asks for information on deductibles, copays, and other plan characteristics.

The primary objective of the MEPS-IC is to collect information on employer-sponsored health insurance. Such

information is needed in order to provide the tools for Federal, State, and academic researchers to evaluate current and proposed health policies and to support the production of important statistical measures for other Federal agencies.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours for the respondent's time to participate in the MEPS-IC. The Pre-screener Questionnaire will be completed by 30,041 respondents and takes about 5½ minutes to complete. The Establishment Questionnaire will be completed by 25,914 respondents and takes about 23 minutes to complete. The Plan Questionnaire will be completed by 22,943 respondents and will require an average of 2.2 responses per respondent. Each Plan Questionnaire takes about 11 minutes to complete. The total annualized burden hours are estimated to be 21,636 hours.

Exhibit 2 shows the estimated annualized cost burden associated with the respondents' time to participate in this data collection. The annualized cost burden is estimated to be \$691,703.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS FOR THE 2018–2019 MEPS-IC

Form name	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours
Pre-screener Questionnaire	30,041	1	0.09	2,704
Establishment Questionnaire	25,914	1	* 0.38	9,847
Plan Questionnaire	22,943	2.2	0.18	9,085
Total	78,898	na	na	21,636

* The burden estimate printed on the establishment questionnaire is 45 minutes which includes the burden estimate for completing the establishment questionnaire, an average of 2.2 plan questionnaires, plus the prescreener. The establishment and plan questionnaires are sent to the respondent as a package and are completed by the respondent at the same time.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN FOR THE 2018–2019 MEPS-IC

Form name	Number of respondents	Total burden hours	Average hourly wage rate *	Total cost burden
Pre-screener Questionnaire	30,041	2,704	31.97	\$86,447
Establishment Questionnaire	25,914	9,847	31.97	314,809
Plan Questionnaire	22,943	9,085	31.97	290,447
Total	78,898	21,636	na	\$691,703

* Based upon the mean hourly wage for Compensation, Benefits, and Job Analysis Specialists occupation code 13–1141, at <https://www.bls.gov/oes/current/oes131141.htm> (U.S. Department of Labor, Bureau of Labor Statistics).

Request for Comments

In accordance with the Paperwork Reduction Act, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ health care

research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity

of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and

included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Sharon B. Arnold,
Acting Director.

BILLING CODE 4160-90-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project: "*Generic Clearance for Questionnaire and Data Collection Testing, Evaluation, and Research for the Agency for Healthcare Research and Quality.*"

DATES: Comments on this notice must be received by June 27, 2017.

ADDRESSES: Written comments should be submitted to: Doris Lefkowitz, Reports Clearance Officer, AHRQ, by email at doris.lefkowitz@AHRQ.hhs.gov.

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427-1477, or by email at doris.lefkowitz@AHRQ.hhs.gov.

SUPPLEMENTARY INFORMATION:

Proposed Project

Generic Clearance for Questionnaire and Data Collection Testing, Evaluation, and Research for the Agency for Healthcare Research and Quality

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501-3520, AHRQ invites the public to comment on this proposed information collection. The Agency for Healthcare Research and Quality (AHRQ) requests that the Office of Management and Budget (OMB)

reapprove generic pre-testing Clearance 0935-0124 for three years to facilitate AHRQ's efforts to (1) employ evaluation-type methods and techniques to improve AHRQ's current data collection and estimation procedures, (2) develop new collections and procedures, including toolkits, and (3) revise existing collections and procedures. AHRQ believes that developing, testing, and evaluating data collection and estimation procedures using survey methods and other techniques in anticipation of agency-sponsored studies can improve its information collection efforts, and the products it develops and allow AHRQ to be more responsive to fast-changing developments in the health care research field. AHRQ uses techniques to simplify data collection and estimation procedures, reduce respondent burden, and improve efficiencies to meet the needs of individuals and small business respondents who may have reduced budgets and staff.

This clearance request is limited to research on data collection, toolkit development, and estimation procedures and reports and does not extend to the collection of data for public release or policy formation. The current Clearance (0935-0124) was granted on November 12, 2014, and expires on November 30, 2017.

This generic clearance will allow AHRQ to draft and test toolkits, survey instruments and other data collection and estimation procedures more quickly and with greater lead time, thereby managing project time more efficiently and improving the quality of the data AHRQ collects. In some instances, the ability to test and evaluate toolkits, data collection and estimation procedures in anticipation of work or early in a project may result in the decision not to proceed with additional activities, which could save both public and private resources and eliminate respondent burden.

This generic clearance will facilitate AHRQ's response to a changing environment. Many of the tools AHRQ develops are made available to the private sector to assist in improving health care quality. The health and health care environment changes rapidly and requires a quick response from AHRQ to provide refined tools.

These preliminary research activities will not be used by AHRQ to regulate or sanction its customers. They will be entirely voluntary and the confidentiality of respondents and their

responses will be preserved. Proposed information collections submitted under this generic clearance will be submitted for review by OMB with a response expected in 14 days.

Method of Collection

The information collected through preliminary research activities under this generic clearance will be used by AHRQ to employ techniques to (1) improve AHRQ's current data collection and estimation procedures, (2) develop new collections and procedures, including toolkits, and (3) revise existing collections and procedures in anticipation or in response to changes in the health or health care field. The end result will be improvement in AHRQ's data collections and procedures and the quality of data collected, a reduction or minimization of respondent burden, increased agency efficiency, and improved responsiveness to the public.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated burden hours, over the full 3 years of this clearance, for the respondents' time to participate in the research activities that may be conducted under this generic clearance. Mail surveys will be conducted with about 6,000 persons (2,000 per year for 3 years) and are estimated to average 20 minutes. Mail surveys may also be sent to respondents via email, and may include a telephone non-response follow-up. Telephone non-response follow-up for mailed surveys is not counted as a telephone survey in Exhibit 1. Not more than 600 persons, over 3 years, will participate in telephone surveys that will take about 40 minutes. Web-based surveys will be conducted with no more than 3,000 persons and will require no more than 10 minutes to complete. About 1,500 persons will participate in focus groups which may last up to two hours, while in-person interviews will be conducted with 600 persons and will take about 50 minutes. Automated data collection will be conducted for about 1,500 persons and could take up to 1 hour. Cognitive testing will be conducted with about 600 persons and is estimated to take 1½ hours to complete. The total burden over 3 years is estimated to be 8,900 hours (about 2,967 hours per year).

Exhibit 2 shows the estimated cost burden over 3 years, based on the respondent's time to participate in these research activities. The total cost burden is estimated to be \$338,734.

EXHIBIT 1—ESTIMATED BURDEN HOURS OVER 3 YEARS

Type of information collection	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours
Mail/email *	6,000	1	20/60	2,000
Telephone	600	1	40/60	400
Web-based	3,000	1	10/60	500
Focus Groups	1,500	1	2.0	3,000
In-person	600	1	1.0	600
Automated **	1,500	1	1.0	1,500
Cognitive Testing ***	600	1	1.5	900
Totals	13,800	na	na	8,900

* May include telephone non-response follow-up in which case the burden will not change

** May include testing of database software, CAPI software or other automated technologies.

*** May include cognitive interviews for questionnaire or toolkit development, or "think aloud" testing of prototype Web sites.

EXHIBIT 2—ESTIMATED COST BURDEN OVER 3 YEARS

Type of information collection	Number of respondents	Total burden hours	Average hourly wage rate *	Total cost burden
Mail/email	6,000	2,000	\$38.06	\$76,120
Telephone	600	400	38.06	15,224
Web-based	3,000	500	38.06	19,030
Focus Groups	1,500	3,000	38.06	114,180
In-person	600	600	38.06	22,836
Automated	1,500	1,500	38.06	57,090
Cognitive Testing	600	900	38.06	34,254
Totals	13,800	8,900	na	338,734

* Based upon the average wages for 29-000 (Healthcare Practitioner and Technical Occupations), "National Compensation Survey: Occupational Wages in the United States, May 2016," U.S. Department of Labor, Bureau of Labor Statistics https://www.bls.gov/oes/current/oes_nat.htm#29-0000.

Request for Comments

In accordance with the Paperwork Reduction Act, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ health care research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Sharon B. Arnold,
Acting Director.

BILLING CODE 4160-90-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Announcement of Requirements and Registration for Healthy Behavior Challenge

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC) located within the Department of Health and Human Services (HHS) announces the launch of the Healthy Behavior Data Challenge. The Healthy Behavior Data Challenge responds to the call for new ways to address the challenges and limitations of self-reported health surveillance information and tap into the potential of innovative data sources and alternative methodologies for public health surveillance. Challenge participants will propose data sources and approaches for aggregating data from wearable devices, mobile applications and/or social media in the areas of nutrition, physical activity, sedentary behaviors, and/or sleep. Conducted in two phases, Phase I (Prototype Development) entails Challenge participants developing a concept proposal for obtaining data

collected from wearable devices, mobile applications and/or social media for public health surveillance purposes. In Phase II (Prototype Implementation), a subset of submissions (up to 3) with promising concepts will be invited to test their proposed approaches for ongoing public health surveillance.

DATES: The Challenge is effective April 28, 2017 and will conclude December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Dr. Machell Town, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, 4770 Buford Highway NE., MS F-78, Chamblee, Georgia 30341; Email: BRFSSinnovations@cdc.gov.

SUPPLEMENTARY INFORMATION:

Award Approving Official: Anne Schuchat, MD, (RADM, USPHS) Acting Director, Centers for Disease Control and Prevention, and Acting Administrator, Agency for Toxic Substances and Disease Registry.

The Behavioral Risk Factor Surveillance System (BRFSS) is the nation's premier system of health-related telephone surveys that collect state data about U.S. residents regarding their health-related risk behaviors, chronic health conditions, and use of preventive services. Established in 1984 with 15 states, BRFSS now collects data in all 50 states as well as the District of

Columbia and three U.S. territories. BRFSS completes more than 400,000 adult interviews each year, making it the largest continuously conducted health survey system in the world.

The collection of health data through traditional surveillance modes including telephone and in-person interviewing, however, is becoming increasingly challenging and costly with declines in participation and changes in personal communications. In addition, the self-reported nature of responses particularly in the areas of nutrition, physical activity, sedentary behaviors, and sleep has been a major limitation in these surveillance systems, since self-reported data are subject to under/over reporting and recall bias. Meanwhile, the advent of new technologies and data sources including wearable devices (such as: Smart watches, activity trackers, sleep monitors, etc.), mobile health applications on smartphones or tablets, and data from social media represents an opportunity to enhance the ability to monitor health-related information and potentially adjust for methodological limitations in traditional self-reported data.

The Healthy Behavior Data (HBD) Challenge will be conducted concurrently with a similar challenge proposed by the Public Health Agency of Canada. This will enable the two countries to learn from their respective challenges and leverage information. We expect increased efficiency with a dual challenge.

Submissions will be accepted starting April 28, 2017. The submission period for phase I will end on July 31, 2017. The Phase II (Prototype Implementation) submission period will begin September 4, 2017 and end December 31, 2017. The grand prize finalist is anticipated to be announced in February of 2018.

Information on the Behavioral Risk Factor Surveillance System can be found at www.cdc.gov/brfss.

Subject of Challenge Competition

The Healthy Behavior Data Challenge responds to the call for new ways to address the challenges and limitations of self-reported health surveillance information and tap into the potential of innovative data sources and alternative methodologies for public health surveillance.

The Healthy Behavior Data (HBD) Challenge will support the development and implementation of prototypes to use these novel methodologies and data sources (e.g., wearable devices, mobile applications, and/or social media) to enhance traditional healthy behaviors surveillance systems in the areas of nutrition, physical activity, sedentary

behaviors, and/or sleep among the adult population aged 18 years and older in the U.S. and U.S. territories.

Ideation Period

The Challenge will launch as an ideation/open submission period in which eligible participants (outlined in Eligibility Rules) may register and submit an entry onto the Challenge Web site (<https://www.challenge.gov/challenge/the-healthy-behavior-data-challenge/>). Information about the Challenge and a link to the Challenge Web site can also be found at *Challenge.gov*. The 13-week ideation period will be followed by a 16-week resubmission period held for those who were chosen by the judges as semifinalists to further refine their idea. The Challenge Web site serves as the destination and submission portal. Participants may find the Challenge rules, eligibility criteria, evaluation criteria, additional resources, and the Challenge timeline on the Challenge Web site or at *Challenge.gov*.

Submission Requirements

Entries not in compliance with the submission requirements outlined below will be ineligible for further review and prize award. During the open submission period, eligible participants may register and submit an entry onto the Challenge Web site, to include:

Phase I (Prototype Development)

1. A completed HBD Challenge Submission Template describing the proposed project, project personnel and data sources.
2. A PowerPoint or other visual presentation of the proposed project including purpose, methods and anticipated outcomes of the proposed approach, which could be used to present the proposal to a judging panel.
3. A description of data that are anticipated to be captured by the proposed approach, comparability to the Behavioral Risk Factor Surveillance System (BRFSS), and, if applicable, descriptions of online app(s), web-based tools or communication devices used to recruit or track subjects' healthy behavior information.
4. Proposal of a viable data source(s) from a currently available or a feasible future source (such as a proposed app or online tool). HBD Challenge participants may propose the use of public and/or private data sources, as long as respondent agrees to participate and the respondent confidentiality and privacy are maintained.
5. A demonstration of how CDC would be able to access the data.

6. A detailed outline of the information that will be obtained.

7. A demonstration of how data will be extracted and collected: Present the format in which it will be stored.

8. A description of how the new data source(s) could be linked with other data sources, in a statistically robust manner that could result in useful public health insights, citing statistical approaches and evidence to support the proposal.

9. A focus on one or more behavioral factors including physical activity, sleep, sedentary behaviors, and/or nutrition.

10. Information about the population reached and generalizability of the approach.

11. A description of how data could be stratified by demographic characteristics (e.g. age, sex, education, geographic jurisdiction).

12. An indication of how information gathered addresses some or all of the following common metrics in one or more of the healthy behavior topics below:

- a. Sleep:
 - i. Hours of sleep per night (sleep duration)
 - ii. Amount of time awake (sleep quality)
 - iii. Number of times awake (sleep quality)
 - iv. Number of adults reporting having trouble getting to and staying asleep
 - v. Time to fall asleep
 - vi. Amount of time in REM vs. non-REM sleep (duration of sleep stage)
 - vii. Heart rate
 - viii. Respiration
 - ix. Sleep behaviors such as snoring, sleep talking, and sleep movement
- b. Sedentary Behaviors:
 - i. Average number of hours per day spent sedentary, excluding sleep time
 - ii. Average number of hours per week spent on a computer/screen including watching TV, videos, playing computer games, emailing or using the internet
 - iii. Sedentary data with additional information on location (work, school, community, etc.) broken down by weekday and weekend day
- c. Nutrition:
 - i. Total calories consumed per day
 - ii. Consumption of fruit (not including juices) by day, week, or month
 - iii. Consumption of green leafy or lettuce salads, with or without other vegetables, by day, week, or month
 - iv. Consumption of vegetables (not including lettuce salads and potatoes) by day, week, or month
 - v. Number of sugar-sweetened beverages consumed by day, week, or month

- vi. Number of caffeinated drinks consumed by day, week, or month
- d. Physical activity:
 - i. Minutes of moderate-to-vigorous physical activity (MVPA) per day (ideally by location—work, school, in community)
 - ii. Daily number of steps
 - iii. Miles/km (Distance) on foot
 - iv. Number of days of physical activity/ week or month (and established number of days in one month)
 - v. Minutes of moderate-to-vigorous physical activity (MVPA) per day (ideally by location—work, school, in community) broken down by week day and weekend day.
- vi. Calories burned
- vii. Type of activity (aerobic, strength, etc.)
- viii. Active minutes
- ix. Duration of exercise
- x. Flights of stairs climbed
- xi. Average and peak heart rate
- xii. Occupational physical activity and active chores amount: (location of physical activity)
- xiii. Number of hours of reported physical activities while at work, in or around household
- xiv. Leisure time physical activity amount:
- xv. # of hours per week adult participants spent in sports, fitness or recreational physical activities, organized or non-organized, that lasted a minimum of 10 continuous minutes
- xvi. Number of adults reporting and time spent walking or cycling to work or school

Participants may also choose to suggest additional metrics in the areas of nutrition, physical activity, sedentary behaviors, and/or sleep. If additional metrics are included, the participant should include a short description of the data and how it might inform public health efforts (such information and data will be collected in accordance with any applicable laws and regulations).

Phase II (Prototype Implementation Phase)

During The Phase II Prototype Implementation Phase, the six submissions selected under Phase I will test their solutions, utilizing their previously collected data from 300 or more adults (aged 18 and above) residing in the U.S. or its territories. During this phase there will be an opportunity for HBD Challenge participants to incorporate data from existing surveys including the Behavioral Risk Factor Surveillance System (BRFSS).

Phase II (Prototype Implementation) allows applicants to test proposals developed in Phase I. The prototype is a demonstration of possible methods for supplementing data from existing surveillance systems (such as the BRFSS). This prototype is not meant to be merged with existing surveillance systems, but rather to complement data collected with current infrastructures. At the end of implementation HBD Challenge participants should be able to:

1. Compare data obtained by the prototype to data from the BRFSS in the areas of nutrition, physical activity, sedentary behaviors, and/or sleep.
2. Demonstrate how data from the included participants could be stratified by demographics (age, sex, education, etc.).
3. Demonstrate the ease of adding additional types of mobile applications and wearable devices to existing survey methodologies.
4. Report that describes the prototype/ methodology and the prototype's anticipated strengths and limitations for surveillance.
5. Demonstrate the applicability of the non-traditional data source(s) for ongoing public health surveillance purposes.
6. Describe the prototype in detail, including purpose, method, outcomes and comparability to data obtained from the Behavioral Risk Factor Surveillance System (BRFSS).
7. Provide a working prototype including data (in Excel format) obtained using the prototype from 300 or more adult respondents residing in the U.S. or its territories. The data must include the age, gender, location, and at least one of the measures associated with the HBD Challenge in the areas of nutrition, physical activity, sedentary behaviors and/or sleep.
8. Provide a PowerPoint presentation to the judges and invited CDC personnel which includes information on the purpose, methods, outcomes and comparability to the BRFSS.

Submissions must be free of security threats and/or malware. Applicants/ Contestants agree that CDC may conduct testing on the product/submission to determine whether malware or other security threats may be present. CDC may disqualify the product if, in CDC's judgment, the app may damage government or others' equipment or operating environment or if the app, in CDC's judgment, is inconsistent with CDC's public health mission, utilizes software or other technologies without appropriate licenses, or any other reason deemed necessary.

How To Enter

Participants may enter by visiting healthdatachallenge.gov and challenge.gov and following the instructions for submission. The U.S. and Canadian challenges are being run in parallel and U.S. entrants should submit to this contest via challenge.gov and Canadian citizens to the Canadian contest found at healthdatachallenge.gov.

Eligibility Rules for Participating in the Competition

To be eligible to win a prize under this challenge, an individual or entity—

- (1) Shall have registered to participate in the competition under the rules promulgated by the Centers for Disease Control and Prevention;
- (2) Shall have complied with all the requirements under this section;
- (3) In the case of a private entity, shall be incorporated in and maintain a primary place of business in the United States, and in the case of an individual, whether participating singly or in a group, shall be a citizen or permanent resident of the United States; and
- (4) May not be a Federal entity or Federal employee acting within the scope of their employment.
- (5) Shall not be an HHS employee working on their applications or submissions during assigned duty hours.

(6) Are an individual or team comprised of members each of who are 18 years of age or over.

(7) Are not on the Excluded Parties List System located at www.sam.gov.

Additionally:

(a) Federal grantees may not use Federal funds to develop challenge applications unless consistent with the purpose of their grant award. Federal contractors may not use Federal funds from a contract to develop challenge applications or to fund efforts in support of a challenge submission.

(b) Employees of CDC, and/or any other individual or entity associated with the development, evaluation, or administration of the Challenge as well as members of such persons' immediate families (spouses, children, siblings, parents), and persons living in the same household as such persons, whether or not related, are not eligible to participate in the Challenge.

(c) An individual or entity shall not be deemed ineligible because the individual or entity used Federal facilities or consulted with Federal employees during a competition if the facilities and employees are made available to all individuals and entities participating in the competition on an equitable basis.

(d) Applicants must agree to assume any and all risks and waive claims against the Federal Government and its related entities, except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from their participation in a competition, whether the injury, death, damage, or loss arises through negligence or otherwise.

(e) A solution may be disqualified if it fails to function as expressed in the description provided by the user, or if it provides inaccurate or incomplete information.

(f) CDC reserves the right to disqualify participants from the Challenge for inappropriate, derogatory, defamatory, or threatening comments or communication through the Challenge Web site or on the *Challenge.gov* Web site.

(g) Submissions must be free of security threats and/or malware. Applicants/Contestants agree that CDC may conduct testing on the product/submission to determine whether malware or other security threats may be present. CDC may disqualify the product if, in CDC's judgment, the product may damage government or others' equipment or operating environment.

(h) Applicants must obtain liability insurance or demonstrate financial responsibility in the amount of \$0 for claims by: (1) A third party for death, bodily injury, or property damage, or loss resulting from an activity carried out in connection with participation in a competition, with the Federal Government named as an additional insured under the registered applicant's insurance policy and registered applicant's agreeing to indemnify the Federal Government against third party claims for damages arising from or related to competition activities; and (2) the Federal Government for damage or loss to Government property resulting from such an activity. Applicants who are a group must obtain insurance or demonstrate financial responsibility for all members of the group.

(i) By participating in the Challenge, each Applicant agrees to comply with and abide by these Official Rules, Terms & Conditions and the decisions of the Federal Agency sponsors and/or the individual judges, which shall be final and binding in all respects.

Registration Process for Participants

To register for this Challenge, participants can access <https://www.challenge.gov/challenge/the-healthy-behavior-data-challenge/>

anytime during the proposal submission period stated above to register.

Amount of the Prize

In Phase I (Prototype Development), participants will compete for a \$30,000 prize pot from which up to six teams or submissions will be selected to receive a \$5000 prize each).

In phase II, up to 3 participants will compete for a \$70,000 prize pot. The following prizes will be awarded:
One First Place winner of \$40,000
One Second Place winner of \$20,000
One Third Place winner of \$10,000
Three (3) winners will be notified via email.

Payment of the Prize

Prizes awarded under this competition will be paid by electronic funds transfer and may be subject to Federal income taxes. HHS will comply with the Internal Revenue Service withholding and reporting requirements, where applicable.

Basis Upon Which Winner Will Be Selected

A review panel composed of subject-matter experts will judge eligible HBD Challenge entries. A judging panel will make final winner selections based upon the criteria outlined below and in compliance with the HHS Competition Judging Guidelines.

Phase I Scoring Criteria

All Criteria are scaled 1–5, with 1 being the lowest score on each dimension and 5 being the highest score on each dimension. Scores are weighted by the proportion of each dimension and then aggregated to create a final score.

1. Efficacy of Prototype (20%)

1 = Prototype is likely to not work in a way that is statistically appropriate/5 = Prototype is likely to successfully collect, and harmonize data, in a statistically robust manner, across multiple data sources to address common metrics.

2. Promise of Comparability to BRFSS Findings (20%)

1 = Prototype does not consider stratification parameters, or applies to only a narrow population/5 = Prototype holds promise for capturing data that is valid, reliable, and representative of a large population.

3. Acceptability (15%)

1 = All parties expressed concerns with data being used in terms of respondent privacy, feasibility and utility/5 = All parties involved are comfortable with data being used in terms of respondent privacy, feasibility

and utility. NOTE: This means that federal and state restrictions on data collection and assurance of confidentiality are being respected. Any proposals that appear to violate the Privacy Act, HIPAA, and FERPA will be unacceptable. (Mandatory criteria; if not scored 5, prototype may be disqualified).

4. Innovation (15%)

1 = Prototype duplicates existing approach/5 = Prototype presents a novel approach.

5. Feasibility of Prototype (15%)

1 = Prototype is not feasible due to factors like cost, availability of data, etc./5 = Prototype is feasible and addresses potential implementation challenges by offering solutions.

6. Generalizability (10%)

1 = Prototype is not generalizable to a range of data sources/5 = Prototype is generalizable to a range of data sources.

7. Breadth of Data Collected (Scope) (5%)

1 = Prototype does not address required metrics, across the identified content area(s)/5 = Prototype includes required metrics.

Phase II Scoring Criteria

All Criteria are scaled 1–5, with 1 being the lowest score on each dimension and 5 being the highest score on each dimension. Scores are weighted by the proportion of each dimension and then aggregated to create a final score. Judging criteria for Phase II include:

• Data quality (20%)

1 = Prototype does not provide data that are likely to be valid or reliable or representative of a population/5 = Prototype provides data that demonstrate validity, reliability, and representativeness.

• Ability to complement BRFSS Findings (20%)

1 = Prototype does not outline steps to complement BRFSS efforts/5 = Prototype provides data which can complement and/or supplement measures collected by the BRFSS or other publicly available traditional surveillance systems.

• Validation of or Enhancement of existing national public health surveillance data (20%)

1 = Prototype cannot be statistically aligned with currently available health data/5 = Prototype statistically aligns with available data across population sub-groups.

• Flexibility (10%)

1 = Prototype does not demonstrate the ability to include additional types of

data and data sources/5 = Prototype demonstrates flexibility in the ability to add different data types and data from additional sources.

- Simplicity (structure and ease of operation) (10%)
 - 1 = Prototype's structure and operation is complex/5 = Prototype's structure is clear and easy to implement; it is not burdensome on current systems.
- Resources for system operation (10%)
 - 1 = Prototype requires heavy resource burden in terms of cost, training, administration, infrastructure/5 = Prototype has low resource burden in terms of cost, training, administration, infrastructure.
- Timeliness (5%)
 - 1 = there is a significant gap in time between data collection and analysis/5 = there is a real-time monitoring through the collected data.
- Stratification by Demographics (5%)
 - 1 = Prototype is unable to stratify the data by key demographics/5 = Prototype is able to stratify the data by age, sex, education, and race/ethnicity.

Additional Information

An individual or entity shall not be deemed ineligible because the individual or entity used Federal facilities or consulted with Federal employees during a competition if the facilities and employees are made available to all individuals and entities participating in the competition on an equitable basis.

Participants must also agree to assume any and all risks and waive claims against the Federal Government and its related entities, except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from my participation in this prize contest, whether the injury, death, damage, or loss arises through negligence or otherwise.

Participants are required to obtain liability insurance or demonstrate financial responsibility in the amount of \$0, for claims by a third party for death, bodily injury, or property damage, or loss resulting from an activity carried out in connection with participation in a challenge.

Participants must also agree to indemnify the Federal Government against third party claims for damages arising from or related to HBD Challenge activities.

CDC reserves the right to cancel, suspend, and/or modify the HBD Challenge, or any part of it, for any reason, at CDC's sole discretion.

Compliance With Rules and Contacting Contest Winners

Finalists and the Contest Winners must comply with all terms and conditions of these Official Rules, and winning is contingent upon fulfilling all requirements herein. The initial finalists will be notified by email, telephone, or mail after the date of the judging. Awards may be subject to Federal income taxes, and the Department of Health and Human Services will comply with the Internal Revenue Service withholding and reporting requirements, where applicable.

Intellectual Property (IP) Rights

- Applicants are free to discuss their submission and the ideas or technologies that it contains with other parties; encouraged to share ideas/technologies publicly; encouraged to collaborate or combine with other teams to strengthen their solutions; and are free to contract with any third parties. Applicants should be aware that any agreement signed or obligation undertaken in regards to their participation in this HBD Challenge that conflicts with the HBD Challenge rules, terms and conditions may result in disqualification of the Applicant's submission.

- Upon submission, each Applicant warrants that he or she is the sole author and owner of the work and any pertinent Intellectual Property (IP) rights, that the work is wholly original of the Applicant (or is an improved version of an existing work that the Applicant has sufficient rights to use—including the substantial improvement of existing open-source work), and that it does not infringe any copyright or any other rights of any third party of which Applicant is aware. Each Applicant also warrants that the work is free of security threats and/or malware.

- Applicants retain ownership of the data that they develop and deliver under the scope of the HBD Challenge, including any software, research product, or other intellectual property ("IP") that they develop in connection therewith. Applicants agree to grant a license to the Federal Agency sponsor (CDC) for the use of the IP developed in connection with the HBD Challenge as set forth herein.

- Each Applicant must clearly delineate any Intellectual Property (IP) and/or confidential commercial information contained in a submission that is owned by the Applicant, and which the Applicant wishes to protect as proprietary data.

- Upon completion of the HBD Challenge period, applicants consent to

grant CDC an unlimited, non-exclusive, royalty-free, worldwide license and the right to reproduce, publically perform, publically display, and use the Submission, including, without limitation, for promotional purposes relating to the HBD Challenge.

- All materials submitted to CDC as part of a submission become CDC agency records. Any confidential commercial or financial information contained in a submission must be clearly designated at the time of submission.

- If the Submission includes any third party works (such as third party content or open source code), Applicant must be able to provide, upon request, documentation of all appropriate licenses and releases for use of such third party works. If Applicant cannot provide documentation of all required licenses and releases, Federal Agency sponsors reserve the right, at their sole discretion, to disqualify the Submission. Conversely, they may seek to secure the licenses and releases and allow the applicable Submission to remain in the HBD Challenge, while reserving all applicable Federal agency rights with respect to such licenses and releases.

Privacy

If Contestants choose to provide the CDC with personal information by registering or filling out the submission form through the *Challenge.gov* Web site, that information is used to respond to Contestants in matters regarding their submission, announcements of entrants, finalists, and winners of the Contest. Information is not collected for commercial marketing. Winners are permitted to cite that they won this contest.

General Conditions

The CDC reserves the right to cancel, suspend, and/or modify the Contest, or any part of it, for any reason, at CDC's sole discretion.

Participation in this Contest constitutes a contestants' full and unconditional agreement to abide by the Contest's Official Rules found at www.Challenge.gov.

Authority: 15 U.S.C. 3719.

Dated: April 26, 2017.

Sandra Cashman,

Executive Secretary, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Centers for Medicare & Medicaid Services**

[Document Identifiers: CMS-304/CMS-304a, CMS-368/CMS-R-144, and CMS-R-308]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by May 30, 2017.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 OR, Email: OIRA_submission@omb.eop.gov.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at Web site address at <https://www.cms.gov/Regulations-and-Guidance/Legislation/>

PaperworkReductionActof1995/PRA-Listing.html.

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.

3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786-4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. Comments submitted in response to the 60-day FR Notice have been addressed in Appendix A of the ICR. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Reconciliation of State Invoice and Prior Quarter Adjustment Statement; *Use:* Form CMS-304 (Reconciliation of State Invoice) is used by manufacturers to respond to the state's rebate invoice for current quarter utilization. Form CMS-304a (Prior Quarter Adjustment Statement) is required only in those instances where a change to the original rebate data submittal is necessary. *Form Number:* CMS-304 and -304a (OMB control number: 0938-0676); *Frequency:* Quarterly; *Affected Public:* Business or other for-profits; *Number of Respondents:* 1,037; *Total Annual Responses:* 4,148; *Total Annual Hours:* 187,880. (For policy questions regarding this collection contact Andrea Wellington at 410-786-3490.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicaid Drug Rebate Program Forms; *Use:* We develop the rebate amount per drug unit from

information supplied by the drug manufacturers and distributes these data to the states. States then must report quarterly to the drug manufacturers and report to us the total number of units of each dosage form/strength of their covered outpatient drugs reimbursed during a quarter and the rebate amount to be refunded. This report is due within 60 days of the end of each calendar quarter. The information in the report is based on claims paid by the state Medicaid agency during a calendar quarter. Form CMS-R-144 (Quarterly Report Data) is required from states quarterly to report utilization for any drugs paid for during that quarter. Form CMS-368 (Administrative Data) is required only in those instances where a change to the original data submittal is necessary. *Form Number:* CMS-368 and -R-144 (OMB control number: 0938-0582); *Frequency:* Quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 224; *Total Annual Hours:* 12,101. (For policy questions regarding this collection contact Andrea Wellington at 410-786-3490.)

3. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* State Children's Health Insurance Program and Supporting Regulations; *Use:* States must submit title XXI plans and amendments for approval by the Secretary. We use the plan and its subsequent amendments to determine if the state has met the requirements of title XXI. Information provided in the state plan, state plan amendments, and from the other information we are collecting will be used by advocacy groups, beneficiaries, applicants, other governmental agencies, providers groups, research organizations, health care corporations, health care consultants. States will use the information collected to assess state plan performance, health outcomes and an evaluation of the amount of substitution of private coverage that occurs as a result of the subsidies and the effect of the subsidies on access to coverage. *Form Number:* CMS-R-308 (OMB control number: 0938-0841); *Frequency:* Yearly, Once, and Occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 28,294,596; *Total Annual Hours:* 1,473,885. (For policy questions regarding this collection contact Amy Lutzky at 410-786-0721).

Dated: April 25, 2017.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-10151, CMS-10199, CMS-R-13, CMS-10279]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by May 30, 2017.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 OR, Email: OIRA_submission@omb.eop.gov.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at Web site address at <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html>
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.
3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786-4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. Comments submitted in response to the 60-day **Federal Register** Notice have been addressed in Appendix A of the ICR. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Reinstatement with change of a previously approved collection; *Title of Information Collection:* Data Collection for Medicare Beneficiaries Receiving Implantable Cardioverter-Defibrillators for Primary Prevention of Sudden Cardiac Death; *Use:* We provide coverage for implantable cardioverter-defibrillators (ICDs) for secondary prevention of sudden cardiac death based on extensive evidence showing that use of ICDs among patients with a certain set of physiologic conditions are effective. Accordingly, we consider coverage for ICDs reasonable and necessary under Section 1862(a)(1)(A) of the Social Security Act. However, evidence for use of ICDs for primary

prevention of sudden cardiac death is less compelling for certain patients.

To encourage responsible and appropriate use of ICDs, we issued a "Decision Memo for Implantable Defibrillators" on January 27, 2005, indicating that ICDs will be covered for primary prevention of sudden cardiac death if the beneficiary is enrolled in either an FDA-approved category B IDE clinical trial (42 CFR 405.201), a trial under the CMS Clinical Trial Policy (NCD Manual § 310.1) or a qualifying prospective data collection system (either a practical clinical trial or prospective systematic data collection, which is sometimes referred to as a registry). *Form Number:* CMS-10151 (OMB control number: 0938-0967); *Frequency:* Occasionally; *Affected Public:* Business or other for-profits, Not-for-profit institutions; *Number of Respondents:* 1,600; *Total Annual Responses:* 80,000; *Total Annual Hours:* 20,000. (For policy questions regarding this collection contact JoAnna Baldwin at 410-786-7205.)

2. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Data Collection for Medicare Facilities Performing Carotid Artery Stenting with Embolic Protection in Patients at High Risk for Carotid Endarterectomy; *Use:* We provide coverage for carotid artery stenting (CAS) with embolic protection for patients at high risk for carotid endarterectomy and who also have symptomatic carotid artery stenosis between 50 percent and 70 percent or have asymptomatic carotid artery stenosis ≥80 percent in accordance with the Category B IDE clinical trials regulation (42 CFR 405.201), a trial under the CMS Clinical Trial Policy (NCD Manual § 310.1, or in accordance with the National Coverage Determination on CAS post approval studies (Medicare NCD Manual 20.7). Accordingly, we consider coverage for CAS reasonable and necessary (section 1862(A)(1)(a) of the Social Security Act). However, evidence for use of CAS with embolic protection for patients with high risk for carotid endarterectomy and who also have symptomatic carotid artery stenosis ≥70 percent who are not enrolled in a study or trial is less compelling. To encourage responsible and appropriate use of CAS with embolic protection, we issued a Decision Memo for Carotid Artery Stenting on March 17, 2005, indicating that CAS with embolic protection for symptomatic carotid artery stenosis ≥70 percent will be covered only if performed in facilities that have been determined to be competent in

performing the evaluation, procedure and follow-up necessary to ensure optimal patient outcomes. In accordance with this criteria, we consider coverage for CAS reasonable and necessary (section 1862(A)(1)(a) of the Social Security Act). *Form Number:* CMS–10199 (OMB control number: 0938–1011); *Frequency:* Yearly; *Affected Public:* Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 1,370; *Total Annual Responses:* 4,110; *Total Annual Hours:* 28,998. (For policy questions regarding this collection contact Sarah Fulton at 410–786–2749.)

3. Type of Information Collection

Request: Extension of a currently approved collection; *Title of Information Collection:* Conditions of Coverage for Organ Procurement Organizations and Supporting Regulations; *Use:* Section 1138(b) of the Social Security Act, as added by section 9318 of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99–509), sets forth the statutory qualifications and requirements that organ procurement organizations (OPOs) must meet in order for the costs of their services in procuring organs for transplant centers to be reimbursable under the Medicare and Medicaid programs. An OPO must be certified and designated by the Secretary as an OPO and must meet performance-related standards prescribed by the Secretary. The corresponding regulations are found at 42 CFR part 486 (Conditions for Coverage of Specialized Services Furnished by Suppliers) under subpart G (Requirements for Certification and Designation and Conditions for Coverage: Organ Procurement Organizations).

Since each OPO has a monopoly on organ procurement within its designated service area (DSA), we must hold OPOs to high standards. Collection of this information is necessary for us to assess the effectiveness of each OPO and determine whether it should continue to be certified as an OPO and designated for a particular donation service area by the Secretary or replaced by an OPO that can more effectively procure organs within that DSA. *Form Number:* CMS–R–13 (OMB control number: 0938–0688); *Frequency:* Occasionally; *Affected Public:* Not-for-profit institutions; *Number of Respondents:* 58; *Total Annual Responses:* 58; *Total Annual Hours:* 13,546. (For policy questions regarding this collection contact Diane Corning at 410–786–8486.)

4. Type of Information Collection

Request: Extension of a currently approved collection; *Title of*

Information Collection: Ambulatory Surgical Center Conditions for Coverage; *Use:* The Ambulatory Surgical Center (ASC) Conditions for Coverage (CfCs) focus on a patient-centered, outcome-oriented, and transparent processes that promote quality patient care. The CfCs are designed to ensure that each facility has properly trained staff to provide the appropriate type and level of care for that facility and provide a safe physical environment for patients. The CfCs are used by Federal or state surveyors as a basis for determining whether an ASC qualifies for approval or re-approval under Medicare. We, along with the healthcare industry, believe that the availability to the facility of the type of records and general content of records, which this regulation specifies, is standard medical practice and is necessary in order to ensure the well-being and safety of patients and professional treatment accountability. *Form Number:* CMS–10279 (OMB control number: 0938–1071); *Frequency:* Annual; *Affected Public:* Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 5,500; *Total Annual Responses:* 5,500; *Total Annual Hours:* 209,000. (For policy questions regarding this collection contact Jacqueline Leach at 410–786–4282.)

Dated: April 26, 2017.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–1551]

Determination That DEMEROL (Meperidine Hydrochloride) Injectable and Other Drug Products Were Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) has determined that the drug products listed in this document were not withdrawn from sale for reasons of safety or effectiveness. This determination means that FDA will not begin procedures to withdraw approval of abbreviated new drug applications (ANDAs) that refer to these drug products, and it will allow

FDA to continue to approve ANDAs that refer to the products as long as they meet relevant legal and regulatory requirements. Through this notice, FDA is hoping to stimulate the economy and increase the regulatory certainty with respect to generic versions of these drug products by confirming that generic versions of the subject drug products may continue to be marketed.

FOR FURTHER INFORMATION CONTACT:

Stacy Kane, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6236, Silver Spring, MD 20993–0002, 301–796–8363, Stacy.Kane@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: In 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) (the 1984 amendments), which authorized the approval of duplicate versions of drug products approved under an ANDA procedure. ANDA applicants must, with certain exceptions, show that the drug for which they are seeking approval contains the same active ingredient in the same strength and dosage form as the “listed drug,” which is a version of the drug that was previously approved. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

The 1984 amendments include what is now section 505(j)(7) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)(7)), which requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the “Approved Drug Products With Therapeutic Equivalence Evaluations,” which is generally known as the “Orange Book.” Under FDA regulations, a drug is removed from the list if the Agency withdraws or suspends approval of the drug’s NDA or ANDA for reasons of safety or effectiveness, or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

Under § 314.161(a) (21 CFR 314.161(a)), the Agency must determine whether a listed drug was withdrawn from sale for reasons of safety or effectiveness: (1) Before an ANDA that refers to that listed drug may be approved, (2) whenever a listed drug is voluntarily withdrawn from sale and ANDAs that refer to the listed drug have been approved, and (3) when a person petitions for such a determination under 21 CFR 10.25(a) and 10.30. Section 314.161(d) provides that if FDA determines that a listed drug was withdrawn from sale for safety or

effectiveness reasons, the Agency will initiate proceedings that could result in

the withdrawal of approval of the ANDAs that refer to the listed drug.

FDA has become aware that the drug products listed in the table in this document are no longer being marketed.

Application No.	Drug name	Active ingredient(s)	Strength(s)	Dosage form/route	Applicant
NDA 005010	DEMEROL	Meperidine Hydrochloride	50 milligrams (mg)/5 milliliter (mL).	Syrup; Oral	U.S. Pharmaceutical Holdings II, LLC.
NDA 006035	METHERGINE	Methylegonovine Maleate	0.2 mg	Tablet; Oral	Edison Therapeutics LLC.
NDA 007337	PERCODAN and PERCODAN-DEMI.	Aspirin, Oxycodone Hydrochloride, Oxycodone Terephthalate.	325 mg, 4.5 mg, 0.38 mg; and 325 mg, 2.25 mg, 0.19 mg.	Tablet; Oral	Endo Pharmaceuticals Inc.
NDA 008720	LEVO-DROMORAN	Levorphanol Tartrate	2 mg	Tablet; Oral	Valeant Pharmaceuticals North America LLC.
NDA 008848	PAMINE and PAMINE FORTE.	Methscopolamine Bromide.	2.5 mg and 5 mg	Tablet; Oral	Fougera Pharmaceuticals Inc.
NDA 009470	XYLOCAINE VISCOUS ...	Lidocaine Hydrochloride ..	2%	Solution; Oral	Fresenius Kabi USA, LLC.
NDA 010485	ATARAX	Hydroxyzine Hydrochloride.	10 mg/5 mL	Syrup; Oral	Pfizer Inc.
NDA 010742	COMPAZINE	Prochlorperazine Edisylate.	Equivalent to (EQ) 5 mg Base/mL.	Injectable; Injection	GlaxoSmithKline.
NDA 012111	MYDRIACYL	Tropicamide	0.5%; 1%	Solution/Drops; Ophthalmic.	Alcon Laboratories Inc.
NDA 012248	PLEGINE	Phendimetrazine Tartrate	35 mg	Tablet; Oral	Wyeth Ayerst Laboratories.
NDA 012365	SOMA COMPOUND	Aspirin; Carisoprodol	325 mg; 200 mg	Tablet; Oral	Meda Pharmaceuticals Inc.
NDA 012366	SOMA COMPOUND W/ CODEINE.	Aspirin; Carisoprodol; Codeine Phosphate.	325 mg; 200 mg; 16 mg	Tablet; Oral	Ditto.
NDA 016012	VIVACTIL	Protriptyline Hydrochloride	5 mg; 10 mg	Tablet; Oral	Teva Women's Health, Inc.
NDA 017352	FASTIN	Phentermine Hydrochloride.	30 mg	Capsule; Oral	GlaxoSmithKline.
NDA 017690	IMODIUM	Loperamide Hydrochloride	2 mg	Capsule; Oral	Johnson & Johnson Consumer Inc.
NDA 017694	IMODIUM	Loperamide Hydrochloride	2 mg	Capsule; Oral	Ditto.
NDA 017741	FLORONE	Diflorasone Diacetate	0.05%	Cream; Topical	Pharmacia and Upjohn Co.
NDA 017802	LO/OVRAL-28	Ethinyl Estradiol; Norgestrel.	0.03 mg; 0.3 mg	Tablet; Oral-28	Wyeth Pharmaceuticals Inc.
NDA 017857	STADOL	Butorphanol Tartrate	2 mg/mL	Injectable; Injection	Delcor Asset Corporation.
NDA 017857	STADOL PRESERVATIVE FREE.	Butorphanol Tartrate	1 mg/mL; 2 mg/mL	Injectable; Injection	Ditto.
NDA 018342	WELLCOVORIN	Leucovorin Calcium	EQ 5 mg Base; EQ 25 mg Base.	Tablet; Oral	GlaxoSmithKline.
NDA 018353	FLAGYL I.V.	Metronidazole Hydrochloride.	EQ 500 mg Base/Vial	Injectable; Injection	G.D. Searle LLC, a subsidiary of Pfizer Inc.
NDA 018733	TALWIN NX	Naloxone Hydrochloride; Pentazocine Hydrochloride.	EQ 0.5 mg Base; EQ 50 mg Base.	Tablet; Oral	Sanofi-Aventis U.S. LLC.
NDA 019488	CARDENE	Nicardipine Hydrochloride	20 mg; 30 mg	Capsule; Oral	Chiesi USA, Inc.
NDA 019578	MEFLOQUINE HYDROCHLORIDE.	Mefloquine Hydrochloride	250 mg	Tablet; Oral	U.S. Army Walter Reed Army Institute Research.
NDA 019591	LARIAM	Mefloquine Hydrochloride	250 mg	Tablet; Oral	Hoffmann-La Roche Inc.
NDA 019735	FLOXIN	Ofloxacin	200 mg; 300 mg; 400 mg	Tablet; Oral	Janssen Pharmaceuticals, Inc.
NDA 019890	STADOL	Butorphanol Tartrate	1 mg/Spray	Spray, Metered; Nasal	Bristol-Myers Squibb Co.
NDA 020142	CATAFLAM	Diclofenac Potassium	50 mg	Tablet; Oral	Novartis Pharmaceuticals Corp.
NDA 020254	VOLTAREN-XR	Diclofenac Sodium	100 mg	Extended-Release Tablet; Oral.	Ditto.
NDA 020312	UNIVASC	Moexipril Hydrochloride ...	7.5 mg; 15 mg	Tablet; Oral	UCB, Inc.
NDA 020346	ZYRTEC	Cetirizine Hydrochloride ...	5 mg/5 mL	Syrup; Oral	Johnson & Johnson Consumer Inc.
NDA 020584	LODINE XL	Etodolac	400 mg; 500 mg; 600 mg	Extended-Release Tablet; Oral.	Wyeth Pharmaceuticals Inc.
NDA 020625	ALLEGRA	Fexofenadine Hydrochloride.	60 mg	Capsule; Oral	Sanofi-Aventis U.S. LLC.
NDA 020729	UNIRETIC	Hydrochlorothiazide; Moexipril Hydrochloride.	12.5 mg/7.5 mg; 12.5 mg/15 mg; 25 mg/15 mg.	Tablet; Oral	UCB, Inc.
NDA 021066	ZADITOR	Ketotifen Fumarate	EQ 0.025% Base	Solution/Drops; Ophthalmic.	Alcon Pharmaceuticals, Ltd.
NDA 021224	RAZADYNE	Galantamine Hydrobromide.	4 mg/mL	Solution; Oral	Janssen Pharmaceuticals, Inc.
NDA 021378	COMBUNOX	Ibuprofen; Oxycodone Hydrochloride.	400 mg; 5 mg	Tablet; Oral	Forest Laboratories, Inc.
NDA 021473	CIPRO XR	Ciprofloxacin; Ciprofloxacin Hydrochloride.	212.6 mg; EQ 287.5 mg Base; 425.2 mg; EQ 574.9 mg Base.	Extended-Release Tablet; Oral.	Bayer HealthCare Pharmaceuticals, Inc.
NDA 021606	ZEMPLAR	Paricalcitol	4 micrograms (mcg)	Capsule; Oral	AbbVie Inc.
NDA 021729	ABILIFY	Aripiprazole	10 mg and 15 mg	Tablet, Orally Disintegrating; Oral.	Otsuka Pharmaceutical Co., Ltd.

Application No.	Drug name	Active ingredient(s)	Strength(s)	Dosage form/route	Applicant
NDA 050072	PENBRITIN-S	Ampicillin Sodium	EQ 125 mg Base/Vial; EQ 250 mg Base/Vial; EQ 500 mg Base/Vial; EQ 1 gram (g) Base/Vial; EQ 2 g Base/Vial; EQ 4 g Base/Vial.	Injectable; Injection	Wyeth Ayerst Laboratories.
NDA 050309	POLYCILLIN-N	Ampicillin Sodium	EQ 125 mg Base/Vial; EQ 250 mg Base/Vial; EQ 500 mg Base/Vial; EQ 1 g Base/Vial; EQ 2 g Base/Vial.	Injectable; Injection	Bristol Laboratories Inc.
NDA 050674	VANTIN	Cefpodoxime Proxetil	EQ 100 mg Base; EQ 200 mg Base.	Tablet; Oral	Pharmacia and Upjohn Co.
ANDA 064170	CEFAZOLIN SODIUM	Cefazolin Sodium	EQ 10 g Base/Vial; EQ 20 g Base/Vial.	Injectable; Injection	Fresenius Kabi USA, LLC.
ANDA 075406	OGESTREL 0.5/50-21	Ethinyl Estradiol; Norgestrel.	0.05 mg; 0.5 mg	Tablet; Oral-21	Watson Laboratories, Inc.
ANDA 085106	PERCOCET	Acetaminophen; Oxycodone Hydrochloride.	325 mg; 5 mg	Tablet; Oral	Vintage Pharmaceuticals LLC.
ANDA 089351	ROXICET	Acetaminophen; Oxycodone Hydrochloride.	325 mg/5 mL; 5 mg/5 mL	Solution; Oral	West-Ward Pharmaceuticals International Ltd.
ANDA 089456	PERPHENAZINE	Perphenazine	8 mg	Tablet; Oral	ANI Pharmaceuticals, Inc.
ANDA 089457	PERPHENAZINE	Perphenazine	16 mg	Tablet; Oral	Teva Pharmaceuticals USA.
ANDA 089707	PERPHENAZINE	Perphenazine	2 mg	Tablet; Oral	Ditto.
ANDA 089708	PERPHENAZINE	Perphenazine	4 mg	Tablet; Oral	Do.

FDA has reviewed its records and, under § 314.161, has determined that the drug products listed in this document were not withdrawn from sale for reasons of safety or effectiveness. Accordingly, the Agency will continue to list the drug products listed in this document in the “Discontinued Drug Product List” section of the Orange Book. The “Discontinued Drug Product List” identifies, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness.

Approved ANDAs that refer to the NDAs and ANDAs listed in this document are unaffected by the discontinued marketing of the products subject to those NDAs and ANDAs. Additional ANDAs that refer to these products may also be approved by the Agency if they comply with relevant legal and regulatory requirements. If FDA determines that labeling for these drug products should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

This is not a significant regulatory action subject to Executive Order 12866, and does not impose any additional burden on regulated entities.

Dated: April 24, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2016-N-1114]

Pharmaceutical Distribution Supply Chain Pilot Projects; Reopening of Comment Period; Request for Information

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; reopening of comment period; request for information.

SUMMARY: The Food and Drug Administration (FDA) is reopening the comment period for the Request for Information that appeared in the **Federal Register** of April 15, 2016. In the Request for Information, FDA requested comments regarding issues related to utilizing the product identifier for product tracing, improving the technical capabilities of the supply chain, and identifying system attributes that are necessary to implement the requirements established under the Drug Supply Chain Security Act (DSCSA). The information gathered from additional public comments will further inform the design and development of the pilot project(s) that FDA establishes under the DSCSA. FDA is reopening the comment period to receive updated comments and any new information.

DATES: FDA is reopening the comment period on the Request for Information published April 15, 2016 (81 FR 22279). Submit either electronic or written

comments by April 30, 2018. Late, untimely filed comments will not be considered. Electronic comments must be submitted on or before April 30, 2018. The <https://www.regulations.gov/> electronic filing system will accept comments until midnight Eastern Time at the end of April 30, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov/>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov/> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov/>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2016-N-1114 for “Pharmaceutical Distribution Supply Chain Pilot Projects; Reopening of Comment Period; Request for Information.” Received comments, those filed in a timely manner (see **DATES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov/> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov/>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other

applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov/> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT:

Daniel Bellingham, Office of Compliance, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993-0002, 301-796-3130, DSCSAPilotProjects@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of April 15, 2016, FDA published a Request for Information with a 30-day comment period to request comments relating to FDA implementation of the DSCSA. To permit additional and update submissions, we are reopening this comment period and extending it for April 30, 2018. We are particularly interested in comments regarding past or present pilot projects related to enhancing the safety and security of the pharmaceutical distribution supply chain. Stakeholders that may be interested in responding to this request for information include manufacturers, repackagers, wholesale distributors, dispensers, State and Federal authorities, solution providers, and standards organizations, and other interested persons. FDA is particularly interested in learning about the practices, processes, and systems that supply chain stakeholders have used or considered using in such pilot projects. This includes, but is not limited to, information about the following:

- Utilizing the product identifier for tracing of a product, which may include verification of the product identifier of a product, including the use of aggregation and inference;
- Technical capabilities each sector of the supply chain to comply with systems and processes needed to utilize the product identifier to enhance the tracing of a product; or
- System attributes that are necessary to implement the requirements established under the DSCSA.

Interested persons are requested to provide any other relevant information that may inform FDA’s development of a pilot project under the DSCSA.

FDA is reopening the comment period for the Request for Information for 1 year, until April 30, 2018. The Agency believes that an additional comment period of 1 year will allow time for interested persons to submit new, additional, or updated comments on these important issues.

Dated: April 19, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2017-N-1393]

Government-Owned Inventions; Availability for Licensing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The invention listed in this document is owned by an agency of the U.S. Government and is available for licensing to achieve expeditious commercialization of results of federally funded research and development.

FOR FURTHER INFORMATION CONTACT: Licensing information and copies of the patent applications listed in this document may be obtained by writing to the indicated licensing contact at the Food and Drug Administration (FDA) Technology Transfer Program, 10903 New Hampshire Ave., Bldg. 1, Rm. 4213, Silver Spring, MD 20993, telephone: 240-402-2561, FAX: 301-847-3539. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

SUPPLEMENTARY INFORMATION: Technology descriptions follow.
Title of Abstract: Solid-Phase Purification of Synthetic DNA Sequences.

Description of Technology: Scientists at FDA have developed a high-throughput method for purifying full-length phosphorothioate and native DNA sequences. This method comprises a modified silica gel that enables capture of DNA sequences functionalized with a novel linker specifically designed for exclusive capture of full-length sequences. This

technology has been shown to generate DNA sequences of high purity without the need of expensive equipment and associated accessories. This discovery may improve the availability of pure DNA sequences for clinical and/or synthetic biology applications.

Potential Commercial Applications:

- A high-throughput purification technique for producing small and large quantities of highly pure DNA sequences.

Competitive Advantages:

- Cost effective.
- High-throughput capabilities.
- Time saving.
- High purity.

Development Stage:

- In vitro data available.

Inventors:

Serge L. Beaucage.

Andrzej Grajkowski.

Publication: Grajkowski, A., J. Cieslak, and S.L. Beaucage, "Solid-Phase Purification of Synthetic DNA Sequences," *The Journal of Organic Chemistry*, 81 (15): pp. 6165–6175, 2016; DOI: 10.1021/acs.joc.6b01020.

Intellectual Property: U.S. Provisional Patent Application No. 62/356,214, filed June 29, 2016, FDA Reference No. E–2016–005.

Licensing and Collaborative Research Opportunity:

Parties interested in licensing this technology should contact Charlene Maddox at Charlene.Maddox@fda.hhs.gov or FDAlnventionlicensing@fda.hhs.gov.

Dated: April 19, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

[FR Doc. 2017–08596 Filed 4–27–17; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection

Activities: Submission to OMB for Review and Approval; Public Comment Request; Information Collection Request Title: Health Workforce Connector, OMB No. 0906–xxxx–NEW

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period.

DATES: Comments on this ICR should be received no later than May 30, 2017.

ADDRESSES: Submit your comments, including the Information Collection Request Title, to the desk officer for HRSA, either by email to OIRA_submission@omb.eop.gov or by fax to 202–395–5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email the HRSA Information Collection Clearance Officer at paperwork@hrsa.gov or call (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference, in compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995.

Information Collection Request Title: Health Workforce Connector OMB No. 0906–xxxx–NEW

Abstract: The Health Workforce Connector is being developed to expand on the current National Health Service Corps (NHSC) Jobs Center, which includes positions approved for NHSC scholarship and loan repayment obligors. The new Health Workforce Connector will provide a central platform to connect participants in both the NHSC and NURSE Corps programs with facilities that are approved for performance of their NHSC or NURSE Corps service obligation. The Health Workforce Connector will become a resource that engages any health care professional or student interested in providing primary care services in underserved communities (whether or not those individuals are obligated to the NHSC or NURSE Corps) with facilities in need of health care providers. The Health Workforce Connector will also allow users to create a profile, search for NHSC and NURSE Corps sites, find job opportunities, and will be searchable by Site Points of Contact. Like the current NHSC Jobs Center, individuals will be able to use

the Health Workforce Connector's search capability with Google Maps.

Need and Proposed Use of the Information: Information will be collected from users in the following two ways:

(1) **Account Creation:** Creating an account is optional, but to create an account, the user will be required to enter their first name, last name, and email address. Those are the only mandatory fields in the profile account creation process and will be used to send an automated email allowing the user to validate their login credentials. This information will also be used to validate any users who already exist within the Bureau of Health Workforce Management Information Systems Solution (BMISS) database and allow an initial import of existing data at the request of the user.

(2) **Profile Completion:** Users may fill out a profile, but this function will be completely optional and will include fields such as location, discipline, specialty, and languages spoken. The information collected, if 'published' by the user, will allow internal BMIS Site Points of Contact the ability to search on anyone who may be a potential candidate for job opportunities at the site. All information collected will be stored within existing secure BMIS databases and will be used internally for report generation on an as-needed basis.

Likely Respondents: Potential users will include individuals searching for a health care job opportunity or an NHSC or NURSE Corps health care facility, and health care facilities searching for potential candidates to fill open health care job opportunities at their sites.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Account Creation	15,600	1	15,600	.08	1,248
Complete Profile	9,400	1	9,400	1	9,400
Total	*15,600	—	15,600	—	10,648

* The 9,400 respondents who complete their profiles are a subset of the 15,600 respondents who create accounts.

Jason E. Bennett,

Director, Division of the Executive Secretariat.

[FR Doc. 2017–08584 Filed 4–27–17; 8:45 am]

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

[Document Identifier 0990–0421–60D]

Agency Information Collection Activities; Proposed Collection; Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). The ICR is for extending the use of the approved information collection assigned OMB control number 0990–0421, which expires on July 31, 2017. Prior to submitting the ICR to OMB, OS seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on the ICR must be received on or before June 27, 2017.

ADDRESSES: Submit your comments to *Information.CollectionClearance@hhs.gov* or by calling (202) 795–7714.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the document identifier 0990–0421–60D for reference.

Information Collection Request Title: ASPE Generic Clearance for the Collection of Qualitative Research and Assessment.

OMB No.: 0990–0421.

Abstract: The Office of the Assistant Secretary for Planning and Evaluation (ASPE) is requesting an extension for their generic clearance for purposes of conducting qualitative research. ASPE conducts qualitative research to gain a better understanding of emerging health policy issues, develop future intramural and extramural research projects, and to ensure HHS leadership, agencies and offices have recent data and information to inform program and policy decision-making. ASPE is requesting approval for at least four types of qualitative research: (a) Interviews, (b) focus groups, (c) questionnaires, and (d) other qualitative methods. ASPE's mission is to advise the Secretary of the Department of Health and Human Services on policy development in

health, disability, human services, data, and science, and provides advice and analysis on economic policy. ASPE leads special initiatives, coordinates the Department's evaluation, research and demonstration activities, and manages cross-Department planning activities such as strategic planning, legislative planning, and review of regulations. Integral to this role, ASPE will use this mechanism to conduct qualitative research, evaluation, or assessment, conduct analyses, and understand needs, barriers, or facilitators for HHS-related programs.

ASPE is requesting comment on the burden for qualitative research aimed at understanding emerging health and human services policy issues. The goal of developing these activities is to identify emerging issues and research gaps to ensure the successful implementation of HHS programs. The participants may include health and human services experts; national, state, and local health or human services representatives; public health, human services, or healthcare providers; and representatives of other health or human services organizations. The increase in burden from 747 in 2014 to 1,300 respondents in 2017 reflects an increase in the number of research projects conducted over the estimate in 2014.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondent	Form	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Health Policy Stakeholder	Qualitative Research	1,300	1	1	1,300

OS specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information

technology to minimize the information collection burden.

Terry S. Clark,

Asst Information Collection Clearance Officer.

BILLING CODE 4150–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Solicitation of Nominations for Three Organizations To Serve as Non-Voting Liaison Representatives to the Chronic Fatigue Syndrome Advisory Committee

AGENCY: Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Chronic Fatigue Syndrome Advisory Committee (CFSAC) is one of the federal advisory committees for which the Department of Health and Human Services (HHS) provides management support. The Office of the Assistant Secretary for Health (OASH), a staff division in the Office of the Secretary, HHS, is assigned responsibility to provide management support for CFSAC activities. The CFSAC is authorized to have three non-voting liaison representative positions. The organizations designated to fill these positions will be selected from those concerned with myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS). The Designated Federal Officer (DFO) for CFSAC will select the organizations from which the representative will be selected to fill these vacant positions. The representatives selected to fill these positions will serve a two-year term as a non-voting liaison representative. Details of nomination requirements are provided below.

DATES: Nominations must be received no later than 5 p.m. ET on May 30, 2017, at the address listed below.

ADDRESSES: All nominations should be sent to Commander Gustavo Ceinos, Designated Federal Officer, Chronic Fatigue Syndrome Advisory Committee, Office on Women's Health, Department of Health and Human Services, 200 Independence Avenue SW., Room 728F.6, Washington, DC 20201. Nomination materials, including attachments, may be submitted electronically to cfsac@hhs.gov.

FOR FURTHER INFORMATION CONTACT: Commander Gustavo Ceinos, Designated Federal Officer, Chronic Fatigue Syndrome Advisory Committee, Office on Women's Health, Department of Health and Human Services, 200 Independence Avenue SW., Room 728F.6, Washington, DC 20201. The telephone number is: 202-401-9545. Inquiries can be sent to cfsac@hhs.gov.

SUPPLEMENTARY INFORMATION: CFSAC was established on September 5, 2002. The purpose of the CFSAC is to provide advice and recommendations to the Secretary of HHS, through the Assistant Secretary for Health, on issues related to ME/CFS. CFSAC advises and makes recommendations on a broad range of topics including: (1) Opportunities to improve knowledge and research about the epidemiology, etiologies, biomarkers and risk factors for ME/CFS; (2) research on the diagnosis, treatment, and management of ME/CFS and potential impact of treatment options; (3)

strategies to inform the public, health care professionals, and the biomedical academic and research communities about ME/CFS advances; (4) partnerships to improve the quality of life of ME/CFS patients; and (5) strategies to insure that input from ME/CFS patients and caregivers is incorporated into HHS policy and research. Management and support services for Committee activities are provided by staff from the HHS Office on Women's Health, within the OASH. The CFSAC charter is available at <https://www.hhs.gov/ash/advisory-committees/cfsac/about-cfsac/charter/index.html>.

CFSAC meetings are held not less than two times per year. The CFSAC membership consists of 13 voting members, including the Chair. The voting members are composed of seven biomedical research scientists with demonstrated expertise in biomedical research applicable to ME/CFS; three individuals with expertise in health care delivery, private health care services or insurers, or voluntary organizations concerned with the problems of individuals with ME/CFS, and three are either patients or caregivers affected by ME/CFS.

CFSAC also includes eight non-voting *ex-officio* representatives from the Agency for Healthcare Research and Quality, Centers for Disease Control and Prevention, Food and Drug Administration, Health Resources and Services Administration, National Institutes of Health, Social Security Administration, U.S. Department of Veteran Affairs, and the Department of Defense.

In 2012, the CFSAC structure was expanded to include three non-voting liaison representative positions. These positions are occupied by representatives from organizations that are concerned with ME/CFS. The terms of the current non-voting liaison representative positions expire in May. The selected organizations will occupy the position for a two-year term.

Nominations: The OASH is requesting nominations of organizations to fill the three non-voting liaison representative positions for the CFSAC. The organizations will be selected by the DFO or designee.

Selection of the three organizations which will serve as non-voting liaison representatives will be based on the organizations' qualifications to contribute to the accomplishment of the CFSAC mission, as described in the Committee charter. In selecting the organizations to be considered for these positions, the OASH will give close attention to equitable geographic

distribution and give priority to U.S.-chartered 501(c)(3) organizations that operate within the United States and have membership with demonstrated expertise in ME/CFS and related research, clinical services, or advocacy and outreach on issues concerning ME/CFS.

The individuals designated by the selected organizations to serve as the official liaison representative will perform the associated duties without compensation, and will not receive per diem or reimbursement for travel expenses. The organizations selected will cover expenses for their designated representative to attend, at a minimum, one in-person CFSAC meeting per year during the designated term of appointment.

To qualify for consideration of selection to the Committee, an organization should submit the following items:

(1) A statement of the organization's history, mission, and focus, including information that demonstrates the organization's experience and expertise in ME/CFS and related research, clinical services, or advocacy and outreach on issues of ME/CFS, as well as expert knowledge of the broad issues and topics pertinent to ME/CFS. This information should demonstrate the organization's proven ability to work and communicate with the ME/CFS patient and advocacy community, and other public/private organizations concerned with ME/CFS, including public health agencies at the federal, state, and local levels.

(2) two to four letters of recommendation that clearly state why the organization is qualified to serve on CFSAC in a liaison representative position. These letters should be from individuals who are not part of the organization.

(3) A statement that the organization is willing to serve as a non-voting liaison representative of the Committee and will cover expenses for their representative to attend in-person, at a minimum, one CFSAC meeting per year in Washington, DC, during the designated term of appointment.

(4) A current financial disclosure statement (or annual report) demonstrating the organization's ability to cover expenses for its representative to attend in-person, at a minimum, one CFSAC meeting per year in Washington, DC, during the term of appointment.

Submitted nominations must include these critical elements in order for the organization to be considered for one of the liaison representative positions.

Nomination materials should be typewritten, using a 12-point font and

double-spaced. All nomination materials should be submitted (postmarked or received) by May 30, 2017.

Electronic submissions: Nomination materials, including attachments, may be submitted electronically to cfsac@hhs.gov. An email from the CFSAC Support Team will be sent to the nominating organization and/or nominator to confirm receipt of the nomination. If the email confirmation is not received within two working days, please call 202-690-7650. Telephone and facsimile submissions cannot be accepted.

Regular, Express, or Overnight Mail: Written documents may be submitted to the following addressee only: Commander Gustavo Ceinos, Designated Federal Officer, CFSAC, Office on Women's Health, Department of Health and Human Services, 200 Independence Avenue SW., Room 728F.6, Washington, DC 20201.

HHS makes every effort to ensure that the membership of federal advisory committees is fairly balanced in terms of points of view represented. Every effort is made to ensure that a broad representation of geographic areas, sex, ethnic and minority groups, and people with disabilities are given consideration for membership on federal advisory committees. Selection of the represented organizations shall be made without discrimination against the composition of an organization's membership on the basis of age, sex, race, ethnicity, sexual orientation, disability, and cultural, religious, or socioeconomic status.

Authority: 42 U.S.C. 217a, section 222 of the Public Health Service (PHS) Act, as amended. The Committee is governed by the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App 2), which sets forth standards for the formation and use of advisory committees.

Dated: April 18, 2017.

Nicole Greene,

Acting Director, Office on Women's Health.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under

OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Project: Mandatory Guidelines for Federal Workplace Drug Testing Programs (OMB No. 0930-0158)—Revision

SAMHSA will request OMB approval for the Federal Drug Testing Custody and Control Form (CCF) for federal agency and federally regulated drug testing programs which must comply with the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs using Urine (82 FR 7920) dated January 23, 2017, and OMB approval for information provided by test facilities (laboratories and IITFs) for the National Laboratory Certification Program (NLCP).

The CCF is used by all federal agencies and employers regulated by the Department of Transportation (DOT) and the Nuclear Regulatory Commission

(NRC) to document the collection and chain of custody of urine specimens at the collection site, for HHS-certified test facilities to report results, and for Medical Review Officers (MROs) to document and report a verified result. SAMHSA allows the use of the CCF as a paper or electronic form.

The current OMB-approved CCF has a May 31, 2017 expiration date. SAMHSA has resubmitted the CCF with minor content revisions to the form for OMB approval. These revisions are:

- Remove the checkbox, the letters “DOT”, and hash line in front of Specify DOT Agency in Step 1: Completed by collector or employer Representative; Line D: Specify Testing Authority.
- Addition of four new analytes (oxycodone, oxymorphone, hydrocodone, and hydromorphone) in Step 5A: Primary Specimen Report—Completed by Test Facility.
- Removal of the analyte methylenedioxymethylamphetamine (MDA) in Step 5A: Primary Specimen Report—Completed by Test Facility.

Based upon information from federal agencies and from DOT concerning their

regulated industries, the number of respondents has been reduced from a total of 6.1 million in 2013 to 5.4 million, which reduces the total burden hours by 188,766.

Laboratories and IITFs seeking HHS certification under the NLCP must complete and submit the NLCP application form. The NLCP application form has not been revised compared to the previous form.

Prior to an inspection, an HHS-certified laboratory or IITF is required to submit specific information regarding its procedures. Collecting this information prior to an inspection allows the inspectors to thoroughly review and understand the testing procedures before arriving for the onsite inspection. The NLCP information checklist has not been revised compared to the previous form.

The annual total burden estimates for the CCF, the NLCP application, the NLCP information checklist, and the NLCP recordkeeping requirements are shown in the following table.

Form/respondent	Number of respondents	Responses per respondent	Total number of responses	Burden per response (hours)	Annual burden (hours)
Custody and Control Form:					
Donor	5,400,000	1	5,400,000	0.08	450,000
Collector	5,400,000	1	5,400,000	0.07	360,000
Laboratory	5,400,000	1	5,400,000	0.05	270,000
IITF	0	0	0	0	0
Medical Review Officer	5,400,000	1	5,400,000	0.05	270,000

Written comments and recommendations concerning the proposed information collection should be sent by May 30, 2017 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@omb.eop.gov. Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202-395-7285.

Commenters may also mail them to: Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, Room 10102, Washington, DC 20503.

Summer King,
Statistician.

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2008-0010]

Board of Visitors for the National Fire Academy

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Committee Management; Notice of Open Federal Advisory Committee Meeting.

SUMMARY: The Board of Visitors for the National Fire Academy (Board) will

meet via teleconference on May 24 and June 21, 2017. The meetings will be open to the public.

DATES: The meetings will take place on Wednesday, May 24 and June 21, 2017, from 1:00 to 3:00 p.m. Eastern Daylight Time. Please note that the meetings may close early if the Board has completed its business.

ADDRESSES: Members of the public who wish to participate in the teleconference should contact Ruth MacPhail as listed in the **FOR FURTHER INFORMATION**

CONTACT section by close of business May 22nd to obtain the call-in number and access code for the May 24th meeting, and by close of business June 19th for the June 21st meeting. For information on services for individuals with disabilities or to request special assistance, contact Ruth MacPhail as soon as possible.

To facilitate public participation, we are inviting public comment on the issues to be considered by the Board as listed in the **SUPPLEMENTARY INFORMATION** section. Participants seeking to have their comments considered during the meeting should submit them in advance or during the public comment segment. Comments submitted up to 30 days after the meeting will be included in the public record and may be considered at the next meeting. Comments submitted in advance must be identified by Docket ID FEMA-2008-0010 and may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Email:* FEMA-RULES@fema.dhs.gov. Include the docket number in the subject line of the message.

- *Mail/Hand Delivery:* Ruth MacPhail, 16825 South Seton Avenue, Emmitsburg, Maryland 21727.

Instructions: All submissions received must include the words "Department of Homeland Security" and the Docket ID for this action. Comments received will be posted without alteration at <http://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received by the Board, go to <http://www.regulations.gov>, click on "Advanced Search," then enter "FEMA-2008-0010" in the "By Docket ID" box, then select "FEMA" under "By Agency," and then click "Search."

FOR FURTHER INFORMATION CONTACT:

Alternate Designated Federal Officer: Kirby E. Kiefer, telephone (301) 447-1117, email Kirby.Kiefer@fema.dhs.gov.

Logistical Information: Ruth MacPhail, telephone (301) 447-1333 and email Ruth.Macphail@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. Appendix.

Purpose of the Board

The purpose of the Board is to review annually the programs of the National Fire Academy (Academy) and advise the Federal Emergency Management Agency (FEMA) Administrator, through the United States Fire Administrator, on the operation of the Academy and any improvements therein that the Board deems appropriate. In carrying out its responsibilities, the Board examines Academy programs to determine whether these programs further the basic missions that are approved by the FEMA Administrator, examines the physical plant of the Academy to determine the adequacy of the Academy's facilities, and examines the funding levels for Academy programs. The Board submits a written annual report to the FEMA Administrator, through the United States Fire Administrator. The report provides detailed comments and recommendations regarding the operation of the Academy.

Agenda

The Board will discuss the direction of the Executive Fire Officer Program to include curriculum, projects, and other requirements.

There will be a public comment period after the Board has concluded their discussions of the agenda item; each speaker will be given no more than 5 minutes to speak. Please note that the public comment period may end before the time indicated, following the last call for comments. Contact Ruth MacPhail to register as a speaker. Meeting materials will be posted at <https://www.usfa.fema.gov/training/nfa/about/bov.html> by May 10th for the May 24th meeting and by June 7th for the June 21st meeting.

Dated: April 20, 2017.

Kirby E. Kiefer,

Acting Superintendent, National Fire Academy, United States Fire Administration, Federal Emergency Management Agency.

BILLING CODE 9111-145-P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS-2017-0017]

National Infrastructure Advisory Council

AGENCY: National Protection and Programs Directorate, DHS.

ACTION: Committee Management; Notice of an Open Federal Advisory Committee Meeting.

SUMMARY: The National Infrastructure Advisory Council (NIAC) will meet Monday, May 8, 2017, at 1331 F Street NW., Suite 800, Washington, DC 20004. This meeting will be open to the public.

DATES: The NIAC will meet on May 8, 2017 from 1:30 p.m.–4:30 p.m. ET. The meeting may close early if the committee has completed its business. For additional information, please consult the NIAC Web site, www.dhs.gov/NIAC, or contact the NIAC Secretariat by phone at (703) 235-2888 or by email at NIAC@hq.dhs.gov.

ADDRESSES: 1331 F Street NW., Suite 800, Washington, DC 20004. Members of the public will register at the registration table prior to entering the meeting room. For information on facilities or services for individuals with disabilities, or to request special assistance at the meeting, contact the person listed under **FOR FURTHER INFORMATION CONTACT** below as soon as possible.

To facilitate public participation, we are inviting public comment on the issues to be considered by the Council as listed in the "Summary" section below. Comments must be submitted in writing no later than 12:00 p.m. on May 8, 2017, in order to be considered by the Council in its meeting. The comments must be identified by "DHS-2016-0005," and may be submitted by any one of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. Follow the instructions for submitting written comments.

- *Email:* NIAC@hq.dhs.gov. Include the docket number in the subject line of the message.

- *Fax:* (703)235-9707.

- *Mail:* Ginger Norris, National Protection and Programs Directorate, Department of Homeland Security, 245 Murray Lane SW., Mail Stop 0612, Washington, DC 20598-0607.

Instructions: All written submissions received must include the words "Department of Homeland Security" and the docket number for this action. Written comments received will be posted without alteration at

www.regulations.gov, including any personal information provided.

Docket: For access to the docket or to read background documents or comments received by the NIAC, go to www.regulations.gov. Enter "NIAC" in the search line and the Web site will list all relevant documents for your review.

Members of the public will have an opportunity to provide oral comments on the topics on the meeting agenda below, and on any previous studies issued by the NIAC. We request that comments be limited to the issues and studies listed in the meeting agenda and previous NIAC studies. All previous NIAC studies can be located at www.dhs.gov/NIAC. Public comments may be submitted in writing or presented in person for the Council to consider. Comments received by Ginger Norris on or after 1:00 p.m. on May 8, 2017 will still be accepted and reviewed by the Members, but not necessarily at the time of the meeting. In-person presentations will be limited to three minutes per speaker, with no more than 15 minutes for all speakers. Parties interested in making in-person comments should register on the Public Comment Registration list available at the entrance to the meeting location prior to the beginning of the meeting.

FOR FURTHER INFORMATION CONTACT: Ginger Norris, NIAC, Designated Federal Officer, Department of Homeland Security, 202-441-5885.

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. appendix. The NIAC shall provide the President, through the Secretary of Homeland Security, with advice on the security and resilience of the Nation's critical infrastructure sectors. The NIAC will meet to discuss issues relevant to critical infrastructure security and resilience, as directed by the President.

The meeting will commence at 1:30 p.m. EST. At this meeting, the Council will discuss its newest tasking and receive briefings. All presentations will be posted prior to the meeting on the Council's public Web page—www.dhs.gov/NIAC.

Public Meeting Agenda

- I. Opening of Meeting
- II. Roll Call of Members
- III. Opening Remarks and Introductions
- IV. Approval of February 2017 Meeting Minutes
- V. Presentations on Future Focus Study
- VI. Public Comment
- VII. Discussion of New NIAC Business
- VIII. Closing Remarks
- IX. Adjournment

The FACA requires that notices of meetings of advisory committees be

announced in the **Federal Register** 15 days prior to the meeting date. However, this notice of the NIAC meeting is being published in the **Federal Register** notice on April 27, 2017 10 days prior to the meeting due to the immediate need for the NIAC members to meet to discuss cyber threats to critical infrastructure. Notwithstanding the difficulties that delayed publication, this NIAC meeting must occur. Although the meeting notice was published in the **Federal Register** late, the meeting date was announced during the public meeting on February 16, 2017 and the agenda will be published on the NIAC Web site listed in this **Federal Register** Notice.

Dated: April 17, 2017.

Ginger Norris,

Designated Federal Officer for the National Infrastructure Advisory Council.

[FR Doc. 2017-08637 Filed 4-27-17; 8:45 am]

BILLING CODE 9110-9P-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Immigration and Customs Enforcement

[OMB Control No. 1653-0021]

Agency Information Collection Activities: Extension, Without Changes, of an Existing Information Collection; Comment Request

AGENCY: U.S. Immigration and Customs Enforcement, Department of Homeland Security.

ACTION: 30-Day Notice of information collection for review; Form No. I-246; Application for Stay of Removal or Deportation; OMB Control No. 1653-0021.

The Department of Homeland Security, U.S. Immigration and Customs Enforcement (USICE) is submitting the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies. This information collection was previously published in the **Federal Register** on February 13, 2017, Vol. 82 No. 10497 allowing for a 60-day comment period. USICE did not receive a comment in connection with the 60-day notice. The purpose of this notice is to allow an additional 30 days for public comments.

Written comments and suggestions regarding items contained in this notice and especially with regard to the estimated public burden and associated response time should be directed to the Office of Information and Regulatory Affairs, Office of Management and

Budget. Comments should be addressed to the OMB Desk Officer for U.S. Immigration and Customs Enforcement, Department of Homeland Security, and sent via electronic mail to oira_submission@omb.eop.gov or faxed to (202) 395-5806.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, without change, of a currently approved information collection.

(2) *Title of the Form/Collection:* Application for a Stay of Deportation or Removal.

(3) *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* ICE Form I-246; U.S. Immigration and Customs Enforcement.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individual or Households, Business or other non-profit. The information collected is necessary for USICE to make a determination that the eligibility requirements for a request for a stay of deportation or removal are met by the applicant.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 10,000 responses at 30 minutes (.5 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 5,000 annual burden hours.

Dated: April 25, 2017.

Scott Elmore,

PRA Clearance Officer, Office of the Chief Information Officer, U.S. Immigration and Customs Enforcement, Department of Homeland Security.

[FR Doc. 2017-08580 Filed 4-27-17; 8:45 am]

BILLING CODE 9111-28-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615-0044]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Application for Action on an Approved Application or Petition

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until June 27, 2017.

ADDRESSES: All submissions received must include the OMB Control Number 1615-0044 in the body of the letter, the agency name and Docket ID USCIS-2007-0012. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Online.* Submit comments via the Federal eRulemaking Portal Web site at <http://www.regulations.gov> under e-Docket ID number USCIS-2007-0012;

(2) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW., Washington, DC 20529-2140.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20

Massachusetts Avenue NW., Washington, DC 20529-2140, telephone number 202-272-8377 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at <http://www.uscis.gov>, or call the USCIS National Customer Service Center at 800-375-5283 (TTY 800-767-1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: <http://www.regulations.gov> and enter USCIS-2007-0012 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of <http://www.regulations.gov>.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or

other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, without change, of a currently approved collection.

(2) *Title of the Form/Collection:* Application for action on an approved application or petition.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I-824; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or households. Form I-824 is used to request a duplicate approval notice, or to notify the U.S. Consulate that a petition has been approved or that a person has been adjusted to permanent resident status.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection is 10,888 and the estimated hour burden per response is .42 hours (25 minutes).

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 4,572 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$1,333,780.

Dated: April 24, 2017.

Samantha Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111-97-P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS-WASO-NRSS-22699; PPWONRADD1, PPMRSNR1Y.NM0000 (177)]

Agency Information Collection Activities: OMB Control Number 1024-0236; Research Permit and Reporting System Applications and Reports

AGENCY: National Park Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (National Park Service, NPS) will ask the Office of Management and Budget (OMB) to approve the

information collection (IC) described below. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This IC is scheduled to expire on April 30, 2017. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: You must submit comments on or before May 30, 2017.

ADDRESSES: Send your comments and suggestions on this information collection to the Desk Officer for the Department of the Interior at OMB–OIRA at (202) 395–5806 (fax) or *OIRA_Submission@omb.eop.gov* (email). Please provide a copy of your comments to the Information Collection Clearance Officer, National Park Service, 12201 Sunrise Valley Drive (MS–242 ADIR–PMSP), Reston, VA 20192 (mail); or *tim_goddard@nps.gov* (email). Please reference OMB Control Number 1024–0236 in the subject line of your comments. You may review the ICR online at <http://www.reginfo.gov>. Follow the instructions to review Department of the Interior collections under review by OMB.

FOR FURTHER INFORMATION CONTACT: To request additional information about this IC, contact Bill Commins, Natural Resource Stewardship and Science, National Park Service, 1201 I St. NW. (Floor 8, Room 46), Washington, DC 20005 (mail); 202–513–7166 (telephone); 202–371–1944 (fax); or *bill_commins@nps.gov* (email).

SUPPLEMENTARY INFORMATION:

I. Abstract

Regulations at 36 CFR 2.1 and 2.5 provide for taking of scientific research specimens in parks. We use a permit system to manage scientific research and collecting. National Park Service Forms 10–741a (Application for a Scientific Research and Collecting Permit) and 10–741b (Application for a Science Education Permit) collect information from persons seeking a permit to conduct natural or social science research and collection activities in individual units of the National Park System. The information we collect includes, but is not limited to:

- Names and business contact information.
- Project title, purpose of study, summary of proposed field methods and activities, and study and field schedules.
- Location where scientific activities are proposed to take place, including method of access.
- Whether or not specimens are proposed to be collected or handled, and if yes, scientific descriptions and proposed disposition of specimens.
- If specimens are to be permanently retained, the proposed repositories for those specimens.

Persons who receive a permit must report annually on the activities conducted under the permit. Form 10–226 (Investigator's Annual Report) collects the following information:

- Reporting year, park, and type of permit.
- Names and business contact information and names of additional investigators.
- Project title, park-assigned study or activity number, park-assigned permit number, permit start and expiration

dates, and scientific study start and ending dates.

- Activity type, subject discipline, purpose of study/activity during the reporting year, and finding and status of study or accomplishments of education activity during the reporting year.

We use the above information to manage the use and preservation of park resources and for reporting to the public via the Internet about the status of permitted research and collecting activities. We encourage respondents to use the Internet-based, automated Research Permit and Reporting System (RPRS) to complete and submit applications and reports. For those who use RPRS, much of the information needed for the annual report is generated automatically through information supplied in the application or contained in the permit.

You may obtain additional information about the application and reporting forms and existing guidance and explanatory material by clicking on “Help” at the RPRS Web site (<https://irma.nps.gov/RPRS/>).

II. Data

OMB Control Number: 1024–0236.

Title: Research Permit and Reporting System Applications and Reports, 36 CFR 2.1 and 2.5.

Service Form Number(s): NPS Forms 10–226, 10–741a, and 10–741b.

Type of Request: Extension of a currently approved collection.

Description of Respondents: Individuals; businesses; academic and research institutions; and Federal, State, local, and tribal governments.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion for applications; annually for reports.

Activity	Number of respondents	Number of annual responses	Completion time per response	Total annual burden hours
Form 10–226, “Investigator's Annual Report”				
Individuals	217	217	15 minutes	54
Private Sector	1,700	1,700	15 minutes	425
Government	1,300	1,300	15 minutes	325
Subtotal	3,217	3,217		804
Form 10–741a, “Application for a Scientific Research and Collecting Permit”				
Individuals	272	272	1.38 hours	375
Private Sector	1,600	1,600	1.38 hours	2,208
Government	1,400	1,400	1.38 hours	1,932
Subtotal	3,272	3,272		4,515
Form 10–741b, “Application for a Science Education Permit”				
Individuals	30	30	1 hour	30
Private Sector	50	50	1 hour	50
Government	50	50	1 hour	50

Activity	Number of respondents	Number of annual responses	Completion time per response	Total annual burden hours
Subtotal	130	130		130
Totals	6,619	6,619		5,449

* Total annual burden hours rounded.

Estimated Annual Non-hour Cost Burden: There is no non-hour burden cost associated with this collection.

III. Comments

On September 9, 2016, we published in the **Federal Register** (81 FR 44147) a Notice of our intent to request that OMB renew approval for this information collection. In that Notice, we solicited comments for 60 days, ending November 7, 2016. We received no comments in response to that Notice.

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Timothy Goddard,

*Information Collection Clearance Officer,
National Park Service.*

[MMAA104000]

Notice on Outer Continental Shelf Oil and Gas Lease Sales

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: List of Restricted Joint Bidders.

Pursuant to the joint bidding provisions of 30 CFR 556.511–556.515, the Bureau of Ocean Energy Management is publishing a List of Restricted Joint Bidders. Each entity within one of the following groups is restricted from bidding with any entity in any of the other following groups at Outer Continental Shelf oil and gas lease sales to be held during the bidding period May 1, 2017, through October 31, 2017. This List of Restricted Joint Bidders will cover the period May 1, 2017, through October 31, 2017, and replace the prior list published on November 4, 2016, which covered the period of November 1, 2016, through April 30, 2017.

Group I

BP America Production Company
BP Exploration & Production Inc.
BP Exploration (Alaska) Inc.

Group II

Chevron Corporation
Chevron U.S.A. Inc.
Chevron Midcontinent, L.P.
Unocal Corporation
Union Oil Company of California
Pure Partners, L.P.

Group III

Eni Petroleum Co. Inc.
Eni Petroleum US LLC
Eni Oil US LLC
Eni Marketing Inc.
Eni BB Petroleum Inc.
Eni US Operating Co. Inc.
Eni BB Pipeline LLC

Group IV

Exxon Mobil Corporation
ExxonMobil Exploration Company

Group V

Petroleo Brasileiro S.A.
Petrobras America Inc.

Group VI

Shell Oil Company
Shell Offshore Inc.
SWEPI LP
Shell Frontier Oil & Gas Inc.
SOI Finance Inc.
Shell Gulf of Mexico Inc.

Group VII

Statoil ASA
Statoil Gulf of Mexico LLC
Statoil USA E&P Inc.
Statoil Gulf Properties Inc.

Group VIII

Total E&P USA, Inc.

Dated: April 21, 2017.

Walter D. Cruickshank,

Acting Director, Bureau of Ocean Energy Management.

BILLING CODE 4310-MR-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-570 and 731-TA-1346 (Preliminary)]

Aluminum Foil From China**Determinations**

On the basis of the record ¹ developed in the subject investigations, the United

States International Trade Commission (“Commission”) determines, pursuant to the Tariff Act of 1930 (“the Act”), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of aluminum foil from China, provided for in subheadings 7607.11.30, 7607.11.60, 7607.11.90, and 7607.19.60 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (“LTFV”) and to be subsidized by the government of China.

Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission’s rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in section 207.21 of the Commission’s rules, upon notice from the Department of Commerce (“Commerce”) of affirmative preliminary determinations in the investigations under sections 703(b) or 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of affirmative final determinations in those investigations under sections 705(a) or 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Background

On March 9, 2017, The Aluminum Association Trade Enforcement Working Group (Arlington, Virginia), on behalf of JW Aluminum Company (Goose Creek, South Carolina), Novelis North America (Atlanta, Georgia), and Reynolds Consumer Products (Lake Forest, Illinois) filed a petition with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV and subsidized imports of aluminum foil from China. Accordingly, effective March 9, 2017, the Commission, pursuant to sections 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and

1673b(a)), instituted countervailing duty investigation No. 701-TA-570 and antidumping duty investigation No. 731-TA-1346 (Preliminary).

Notice of the institution of the Commission’s investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of March 15, 2017 (82 FR 13853). The conference was held in Washington, DC, on March 30, 2017, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)). It completed and filed its determinations in these investigations on April 24, 2017. The views of the Commission are contained in USITC Publication 4684 (May 2017), entitled *Aluminum Foil from China: Investigation Nos. 701-TA-570 and 731-TA-1346 (Preliminary)*.

By order of the Commission.

Issued: April 24, 2017.

William R. Bishop,

Supervisory Hearings and Information Officer.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE
Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140-0099]

Agency Information Collection Activities; Proposed eCollection eComments Requested; ATF Adjunct Instructor Data Form—ATF Form 6140.3

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register**, on February 24, 2017, allowing for a 60-day comment period.

¹ The record is defined in sec. 207.2(f) of the Commission’s Rules of Practice and Procedure (19 CFR 207.2(f)).

DATES: Comments are encouraged and will be accepted for an additional 30 days until May 30, 2017.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, particularly with respect to the estimated public burden or associated response time, have suggestions, need a copy of the proposed information collection instrument with instructions, or desire any other additional information, please contact J. Wade Brashier, Professional/Technical Training & Development Branch, either by mail at 99 New York Avenue NE., Washington, DC 20226 or by email at jerry.brashier@atf.gov. Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to OIRA_submissions@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension, without change, of a currently approved collection.

2. *The Title of the Form/Collection:* ATF Adjunct Instructor Data Form.

3. *The agency form number, if any, and the applicable component of the Department*

4. *sponsoring the collection:*

5. *Form number:* ATF Form 6140.3.

6. *Component:* Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

7. *Affected public who will be asked or required to respond, as well as a brief abstract:*

8. *Primary:* State, Local, or Tribal Government.

9. *Other:* None.

10. *Abstract:* The information collected on ATF F 6140.3 will provide ATF with sufficient data to uniquely identify individual instructors, validate instructor topical expertise prior to training, and defend an instructor's qualifications in court regarding topical expertise.

11. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 20 respondents will utilize the form, and it will take each respondent approximately 30 minutes to complete the form.

12. *An estimate of the total public burden (in hours) associated with the collection:* An estimated 20 respondents will utilize the form, and it will take each respondent approximately 30 minutes to complete the form.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405A, Washington, DC 20530.

Dated: April 24, 2017.

Melody Braswell,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2017-08550 Filed 4-27-17; 8:45 am]

BILLING CODE 4410-14-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Resource Conservation and Recovery Act

On April 25, 2017, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Northern District of New York in the lawsuit entitled *United States v. Falcon Petroleum, LLC, RGLL, Inc., and GRJH, Inc.*, Civil Action No. 1:16-cv-1522.

This settlement resolves the United States' allegations that Falcon Petroleum, LLC, RGLL, Inc., and GRJH, Inc. ("Defendants") violated the Resource Conservation and Recovery Act ("Act") and its implementing regulations set forth at 40 CFR part 280 at eight gas stations in New York, all of which contain underground storage

tanks ("tanks") owned and operated, or owned and leased, by Defendants. The United States' claims against Defendants stem from the company's alleged failure to install overfill protection equipment; perform release detection on tanks and associated piping; equip piping with automatic line leak detectors; perform annual testing of an automatic line leak detector on piping; and maintain adequate records of release detection monitoring.

The proposed Consent Decree resolves these allegations by requiring that Defendants implement injunctive relief valued at approximately \$218,000, undertake a Supplemental Environmental Project ("SEP") valued at approximately \$220,000, and pay a \$60,000 civil penalty. As part of the injunctive relief, Defendants will install, or upgrade to, fully automated electronic release detection monitoring equipment at seven gas stations in New York. As part of the SEP, Defendants will install a centralized monitoring system in twenty-six stations that span three states: Twenty-three in New York, two in Connecticut and one in New Hampshire. The centralized monitoring system will transmit to and collect at one central location the information gathered at each gas station equipped with the electronic release detection monitoring equipment. This technology will therefore assist Defendants to respond to potential releases and other alarm events.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Falcon Petroleum, LLC, RGLL, Inc., and GRJH, Inc.*, D.O.J. Ref. No. 90-7-1-09896. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

<i>To submit comments:</i>	<i>Send them to:</i>
By email	pubcomment-ees.enrd@usdoj.gov .
By mail	Assistant Attorney General, U.S. DOJ-ENRD, P.O. Box 7611, Washington, DC 20044-7611.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department Web site: http://www.usdoj.gov/enrd/Consent_Decrees.html. We will provide a paper copy of the Consent Decree upon written request and payment of

reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ-ENRD, P.O. Box 7611, Washington, DC 20044-7611.

Please enclose a check or money order for \$10.25 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the exhibits and signature pages, the cost is \$6.75.

Robert E. Maher, Jr.,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 2017-08651 Filed 4-27-17; 8:45 am]

BILLING CODE 4410-15-P

DEPARTMENT OF LABOR

Office of the Assistant Secretary for Administration and Management

Agency Information Collection Activities; Comment Request; Application for Use of Public Space by Non-DOL Agencies in the Frances Perkins Building

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is soliciting comments concerning an Information Collection Request (ICR) proposing to extend Paperwork Reduction Act of 1995 (PRA), authority to conduct the information collection titled, "Application for Use of Public Space by Non-DOL Agencies in the Frances Perkins Building." This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden.

DATES: Submit written comments on or before June 27, 2017.

ADDRESSES: Contact Michel Smyth by telephone at 202-693-4129 (this is not a toll-free number) to request a free copy of this ICR that includes applicable supporting documentation providing a description of the likely respondents, proposed frequency of response, and estimated total burden. Submit written comments about, or requests for a copy of, this ICR by mail or courier to the U.S. Department of Labor—OASAM, Office of the Chief Information Officer, Attn: Information Policy and Assessment Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: DOL_PRA_PUBLIC@dol.gov.

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202-693-4129 (this is not a toll-free number) or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The DOL headquarters building, the Frances Perkins Building (FPB), has conference and meeting capabilities located in its public space areas that non-DOL entities may request to use. The Administrator of the General Services Administration set forth terms and conditions delegating FPB operation to the DOL, Office of the Assistant Secretary for Administration and Management (OASAM). The delegation sets forth conditions authorizing the DOL to issue occasional use permits for FPB public space. The delegation is also subject to applicable standard operating procedures for Government-owned real properties. More specifically, the DOL may only issue occasional use permits to organizations engaging in cultural, educational, or recreational activities. These permits are generally not available for commercial purposes. Any person or organization wishing to use a FPB public area must file a permit application with the DOL Conference Rooms and Services Center. Applicants must submit the following information: (a) Applicant's full name, mailing address, and telephone number; (b) organization sponsoring the proposed activity; (c) individual(s) responsible for supervising the activity; (d) documentation showing the applicant is authorized to represent the sponsoring organization; and (e) a description of the proposed activity, including dates and times during which it is to be conducted and the number of persons to be involved. OASAM policies and procedures concerning FPB public space are set forth in DOL Manual Series section 2-510 and an application—Form DL-1-6062B, Application for Use of Public Space by Non-DOL Agencies in the Frances Perkins Building.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the Office of Management and Budget (OMB) under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1225-0087. The DOL intends to seek continued approval

for this collection of information for an additional three years.

The DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the OMB for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed. Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the ICR. Submitted comments will also be a matter of public record for this ICR and posted on the Internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive information in any comments.

The DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL—OASAM.

Type of Review: Extension without change of a currently approved collection.

Title of Collection: Application for Use of Public Space by Non-DOL Agencies in the Frances Perkins Building.

Form: Application for Use of Public Space by Non-DOL Agencies in the Frances Perkins Building (Form DL-1-6062B).

OMB Control Number: 1225-0087.
 Affected Public: Private Sector—not for-profit institutions.
 Estimated Number of Respondents: 5.
 Frequency: On occasion.
 Total Estimated Annual Responses: 5.
 Estimated Average Time per Response: 5 minutes.
 Estimated Total Annual Burden Hours: 1 hour.
 Total Estimated Annual Other Cost Burden: \$0.

Authority: 44 U.S.C. 3506(c)(2)(A).

Dated: April 24, 2017.

Michel Smyth,

Departmental Clearance Officer.

BILLING CODE 4510-23-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-027 and 52-028; NRC-2008-0441]

South Carolina Electric & Gas Company, South Carolina Public Service Authority; Virgil C. Summer Nuclear Station, Units 2 and 3; Design Reliability Assurance Program (D-RAP) Changes

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 70 to Combined Licenses (COLs), NPF-93 and NPF-94. The COLs were issued to South Carolina Electric & Gas Company and the South Carolina Public Service Authority, (together referred to as the licensee); for construction and operation of the Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3, located in Fairfield County, South Carolina.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption and amendment were issued on April 11, 2017.

ADDRESSES: Please refer to Docket ID NRC-2008-0441 when contacting the NRC about the availability of information regarding this document.

You may obtain publicly-available information related to this document using any of the following methods:

- **Federal Rulemaking Web site:** Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- **NRC's Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. The request for the amendment and exemption was submitted by letter dated September 22, 2016 and is available in ADAMS under Accession No. ML16270A582.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Billy Gleaves, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-5848; email: Bill.Gleaves@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, "Scope and Contents," of Appendix D, "Design Certification Rule for the AP1000," to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment No. 70 to COLs, NPF-93 and NPF-94, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, "Processes for Changes and Departures," Appendix D, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes that would revise the Updated Final Safety Analysis Report (UFSAR) in the form of departures from the incorporated plant-

specific DCD Tier 2 information. The proposed amendment also involves related changes to plant-specific Tier 1 information, with corresponding changes to the associated COL Appendix C information. Specifically, the LAR revises the Design Reliability Assurance Program (D-RAP) to identify the covers for the in-containment refueling water storage tank (IRWST) vents and overflow weirs as the risk-significant components included in the D-RAP and to identify that the field control relays of each rod drive motor-generator (MG) sets are a part of the rod drive power supply control cabinets in which the relays are located.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in §§ 50.12, 52.7, and Section VIII.A.4 of Appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML17048A143.

Similar exemption documents were issued to the licensee for VCSNS Units 2 and 3 (COLs NPF-93 and NPF-94). The exemption documents for VCSNS Units 2 and 3 can be found in ADAMS under Accession Nos. ML17048A144 and ML17048A147, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The similar amendment documents for COLs NPF-93 and NPF-94 are available in ADAMS under Accession Nos. ML17048A145 and ML17048A148, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VCSNS Units 2 and Unit 3. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In an application dated September 22, 2016, the licensee requested from the Commission an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR part 52, Appendix

D, as part of license amendment request 16–14, “Design Reliability Assurance Program (D–RAP) Changes.”

For the reasons set forth in Section 3.1 of the NRC staff’s Safety Evaluation, which can be found in ADAMS under Accession No. ML17048A143, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified DCD Tier 1 information related to the in-containment refueling water storage tank vents and overflow weirs, the rod drive motor-generator sets field control relays, and the rod drive power supply control cabinets, as described in the licensee’s request dated September 22, 2016. This exemption is related to, and necessary for the granting of License Amendment No. 70, which is being issued concurrently with this exemption.

3. As explained in Section 5.0 of the NRC staff’s Safety Evaluation (ADAMS Accession No. ML17048A143), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated September 22, 2016 (ADAMS Accession No. ML16270A582), the licensee requested that the NRC amend the COLs for VCSNS, Units 2 and 3, COLs NPF–93 and NPF–94. The proposed amendment is described in Section I of this **Federal Register** Notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s rules and regulations. The Commission has made appropriate findings as required by the Act and the

Commission’s rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on November 8, 2016 (81 FR 78652). No comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on September 22, 2016.

The exemption and amendment were issued on April 11, 2017, as part of a combined package to the licensee (ADAMS Accession No. ML17048A142).

Dated at Rockville, Maryland, this 14th day of April 2017.

For the Nuclear Regulatory Commission.

Brian Hughes,

*Acting Branch Chief, Licensing Branch 4,
Division of New Reactor Licensing, Office of
New Reactors.*

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–027 and 52–028; NRC–2008–0441]

Virgil C. Summer Nuclear Station, Units 2 and 3; South Carolina Electric & Gas Company; South Carolina Public Service Authority Debris Screen Related Dimensions

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 66 to Combined Licenses (COL), NPF–93 and NPF–94. The COLs were issued to South Carolina Electric & Gas

Company and the South Carolina Public Service Authority, (both collectively referred to as the licensee) for construction and operation of the Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3, located in Fairfield County, South Carolina.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption and amendment were issued on March 27, 2017.

ADDRESSES: Please refer to Docket ID NRC–2008–0441 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2008–0252. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. The request for the amendment and exemption was submitted by letter dated August 12, 2016 (ADAMS Accession No. ML16225A437).

- *NRC’s PDR:* You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Ruth Reyes, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3249; email: Ruth.Reyes@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, "Scope and Contents," of appendix D, "Design Certification Rule for the AP1000," to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment No. 66 to COLs, NP-93 and NPF-94, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, "Processes for Changes and Departures," appendix D, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes that would revise the Updated Final Safety Analysis Report in the form of departures from the incorporated plant-specific DCD Tier 2 information. The proposed amendment also involves related changes to plant-specific Tier 1 information, with corresponding changes to the associated COL Appendix C information. The proposed changes are to information identifying the frontal face area and screen surface area for the In-Containment Refueling Water Storage Tank (IRWST) screens, the location and dimensions of the protective plate located above the containment recirculation (CR) screens, and increasing the maximum Normal Residual Heat Removal System flowrate through the IRWST and CR screens.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML17040A590.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VCSNS Units 2 and 3 (COLs NPF-93 and NPF-94). The exemption documents for VCSNS Units 2 and 3 can be found in ADAMS under Accession Nos. ML17040A547 and ML17040A553, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF-93 and NPF-94 are available in

ADAMS under Accession Nos. ML17040A543 and ML17040A545, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to V. C. Summer Units 2 and 3. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In an application dated August 12, 2016, the licensee requested from the Commission an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR part 52, appendix D, as part of License Amendment Request 14-11, "Debris Screen Related Dimensions."

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation, which can be found at ADAMS Accession No. ML17040A590, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified DCD Tier 1 information, with corresponding changes to Appendix C of the Facility COLs as described in the licensee's request dated August 12, 2016. This exemption is related to, and necessary for, the granting of License Amendment No. 66, which is being issued concurrently with this exemption.

3. As explained in Section 5.0 of the NRC staff's Safety Evaluation this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated August 12, 2016, the licensee requested that the NRC amend the COLs for VCSNS, Units 2 and 3, COLs NPF-93 and NPF-94. The proposed amendment is described in Section I of this **Federal Register** notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on October 11, 2016 (81 FR 70182). No comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on August 12, 2016.

The exemption and amendment were issued on March 27, 2017, as part of a combined package to the licensee (ADAMS Accession No. ML17040A530).

Dated at Rockville, Maryland, this 17th day of April 2017.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–027 and 52–028; NRC–2008–0441]

South Carolina Electric & Gas Company, South Carolina Public Service Authority, Virgil C. Summer Nuclear Station, Units 2 and 3, Inspections, Tests, Analyses, and Acceptance Criteria

AGENCY: Nuclear Regulatory Commission.

ACTION: Determination of the successful completion of inspections, tests, and analyses.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) staff has determined that the inspections, tests, and analyses have been successfully completed, and that the specified acceptance criteria are met for multiple inspections, tests, analyses, and acceptance criteria (ITAAC) for the Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3. **DATES:** The determination of the successful completion of inspections, tests, and analyses for these ITAAC for VCSNS, Units 2 and 3 is effective April 28, 2017.

ADDRESSES: Please refer to Docket ID NRC–2008–0441 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2008–0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT:

Billy Gleaves, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–5848; email: Bill.Gleaves@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Licensee Notification of Completion of ITAAC

South Carolina Electric & Gas (SCE&G), on behalf of itself and the South Carolina Public Service Authority, (both hereafter called the licensee) has submitted ITAAC closure notifications (ICNs) under title 10 of the *Code of Federal Regulations* (10 CFR) 52.99(c)(1), informing the NRC that the licensee has successfully performed the required inspections, tests, and analyses, and that the acceptance criteria are met for:

VCSNS Unit 2 ITAAC

2.1.01.06.ii (7), 2.1.03.09a.i (81), 2.5.01.03c (513), and C.3.8.01.02.03 (845)

VCSNS Unit 3 ITAAC

2.1.01.06.ii (7), 2.1.03.09a.i (81), 2.5.01.03c (513), 3.3.00.09 (814), and C.3.8.01.02.03 (845)

The ITAAC for VCSNS Unit 2 are in Appendix C of the VCSNS Unit 2 combined license (ADAMS Accession No. ML14100A092). The ITAAC for VCSNS Unit 3 are in Appendix C of VCSNS Unit 3 combined license (ADAMS Accession No. ML14100A101).

II. NRC Staff Determination of Completion of ITAAC

The NRC staff has determined that the specified inspections, tests, and analyses have been successfully completed, and that the specified acceptance criteria are met. The documentation of the NRC staff's determination is in the ITAAC Closure Verification Evaluation Form (VEF) for each ITAAC. The VEF is a form that represents the NRC staff's structured process for reviewing ICNs. Each ICN presents a narrative description of how the ITAAC was completed. The NRC's ICN review process involves a determination on whether, among other things: (1) Each ICN provides sufficient information, including a summary of the methodology used to perform the ITAAC, to demonstrate that the inspections, tests, and analyses have been successfully completed; (2) each ICN provides sufficient information to demonstrate that the acceptance criteria

of the ITAAC are met; and (3) any NRC inspections for the ITAAC have been completed and any ITAAC findings associated with that ITAAC have been closed.

The NRC staff's determination of the successful completion of these ITAAC is based on information available at this time and is subject to the licensee's ability to maintain the condition that the acceptance criteria are met. If the staff receives new information that suggests the staff's determination on any of these ITAAC is incorrect, then the staff will determine whether to reopen that ITAAC (including withdrawing the staff's determination on that ITAAC). The NRC staff's determination will be used to support a subsequent finding, pursuant to 10 CFR 52.103(g), at the end of construction that all acceptance criteria in the combined license are met. The ITAAC closure process is not finalized for these ITAAC until the NRC makes an affirmative finding under 10 CFR 52.103(g). Any future updates to the status of these ITAAC will be reflected on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/oversight/itaac.html>.

This notice fulfills the staff's obligations under 10 CFR 52.99(e)(1) to publish a notice in the **Federal Register** of the NRC staff's determination of the successful completion of inspections, tests, and analyses.

Virgil C. Summer Nuclear Station Unit 2, Docket No. 5200027

A complete list of the review status for VCSNS Unit 2 ITAAC, including the submission date and ADAMS Accession Number for each ICN received, the ADAMS Accession Number for each VEF, and the ADAMS Accession Numbers for the inspection reports associated with these specific ITAAC, can be found on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/new-licensing-files/sum2-icnsr.pdf>.

Virgil C. Summer Nuclear Station Unit 3, Docket No. 5200028

A complete list of the review status for VCSNS Unit 3 ITAAC, including the submission date and ADAMS Accession Number for each ICN received, the ADAMS Accession Number for each VEF, and the ADAMS Accession Numbers for the inspection reports associated with these specific ITAAC, can be found on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/new-licensing-files/sum3-icnsr.pdf>.

Dated at Rockville, Maryland, this 17th day of April 2017.

For the Nuclear Regulatory Commission.

The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Chandu Patel, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-3025; email: Chandu.Patel@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Licensee Notification of Completion of ITAAC

Southern Nuclear Operating Company, Inc. (SNC), Georgia Power Company, Oglethorpe Power Corporation, MEAG Power SPVM, LLC., MEAG Power SPVJ, LLC., MEAG Power SPVP, LLC., and the City of Dalton, Georgia, (hereafter called the licensee) has submitted ITAAC closure notifications (ICNs) under title 10 of the *Code of Federal Regulations* (10 CFR) 52.99(c)(1), informing the NRC that the licensee has successfully performed the required inspections, tests, and analyses, and that the acceptance criteria are met for:

VEGP Unit 3 ITAAC

2.1.01.07.iii (10), 2.1.02.08d.iv (35), 2.1.03.02c (71), and 2.2.03.08c.xi (196)

VEGP Unit 4 ITAAC

2.1.01.07.iii (10), 2.1.02.08d.iv (35), and 2.2.03.08c.xi (196)

The ITAAC for VEGP Unit 3 are in Appendix C of the VEGP Unit 3 combined license (ADAMS Accession No. ML14100A106). The ITAAC for VEGP Unit 4 are in Appendix C of VEGP Unit 4 combined license (ADAMS Accession No. ML14100A135).

II. NRC Staff Determination of Completion of ITAAC

The NRC staff has determined that the specified inspections, tests, and analyses have been successfully completed, and that the specified acceptance criteria are met. The documentation of the NRC staff's determination is in the ITAAC Closure Verification Evaluation Form (VEF) for each ITAAC. The VEF is a form that represents the NRC staff's structured process for reviewing ICNs. Each ICN presents a narrative description of how the ITAAC was completed. The NRC's ICN review process involves a determination on whether, among other things: (1) Each ICN provides sufficient information, including a summary of the methodology used to perform the ITAAC, to demonstrate that the inspections, tests, and analyses have been successfully completed; (2) each ICN provides sufficient information to demonstrate that the acceptance criteria of the ITAAC are met; and (3) any NRC inspections for the ITAAC have been completed and any ITAAC findings associated with that ITAAC have been closed.

The NRC staff's determination of the successful completion of these ITAAC is based on information available at this time and is subject to the licensee's ability to maintain the condition that the acceptance criteria are met. If the staff receives new information that suggests the staff's determination on any of these ITAAC is incorrect, then the staff will determine whether to reopen that ITAAC (including withdrawing the staff's determination on that ITAAC). The NRC staff's determination will be used to support a subsequent finding, pursuant to 10 CFR 52.103(g), at the end of construction that all acceptance criteria in the combined license are met. The ITAAC closure process is not finalized for these ITAAC until the NRC makes an affirmative finding under 10 CFR 52.103(g). Any future updates to the status of these ITAAC will be reflected on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/oversight/itaac.html>.

This notice fulfills the staff's obligations under 10 CFR 52.99(e)(1) to publish a notice in the **Federal Register** of the NRC staff's determination of the successful completion of inspections, tests and analyses.

Vogtle Electric Generating Plant Unit 3, Docket No. 5200025

A complete list of the review status for VEGP Unit 3 ITAAC, including the submission date and ADAMS Accession Number for each ICN received, the ADAMS Accession Number for each VEF, and the ADAMS Accession Numbers for the inspection reports associated with these specific ITAAC, can be found on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/new-licensing-files/vog3-icnsr.pdf>

Vogtle Electric Generating Plant Unit 4, Docket No. 5200026

A complete list of the review status for VEGP Unit 4 ITAAC, including the submission date and ADAMS Accession Number for each ICN received, the ADAMS Accession Number for each VEF, and the ADAMS Accession Numbers for the inspection reports associated with these specific ITAAC, can be found on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/new-licensing-files/vog4-icnsr.pdf>.

Dated at Rockville, Maryland, this 17th day of April 2017.

For the Nuclear Regulatory Commission,
Jennifer Dixon-Herrity,
Chief, Licensing Branch 4, Division of New
Reactor Licensing, Office of New Reactors.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-275 and 50-323; NRC-2016-0080]

Pacific Gas and Electric Company

AGENCY: Nuclear Regulatory Commission.

ACTION: Director's decision under 10 CFR 2.206; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued a director's decision with regard to a Petition to Intervene and Request for Hearing concerning Diablo Canyon Power Plant (DCPP) dated August 26, 2014, filed by Friends of the Earth (FOE or petitioner), asserting, in part, its concerns about DCPP's operational safety and ability to safely shut down in the event of a nearby earthquake. The petitioner's requests and the director's decision are included in the **SUPPLEMENTARY INFORMATION** section of this document.

ADDRESSES: Please refer to Docket ID NRC-2016-0080 when contacting the

NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- **Federal Rulemaking Web site:** Go to <http://www.regulations.gov> and search for Docket ID NRC-2016-0080. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- **NRC's Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. For the convenience of the reader, the ADAMS accession numbers are provided in a table in the "Availability of Documents" section of this document.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Margaret Watford, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-1233, email: Margaret.Watford@nrc.gov.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a director's decision on a Petition to Intervene and Request for Hearing, filed by the FOE on August 26, 2014, which the Commission referred to the NRC's EDO for consideration under the regulations of section 2.206 of title 10 of the *Code of Federal Regulations* (10 CFR) in Commission Memorandum and Order (CLI-15-14) dated May 21, 2015. The EDO then referred these concerns to the NRC's Office of Nuclear Reactor Regulation for consideration under 10 CFR 2.206. The petition was supplemented by letters dated September 30, 2015, and February 8, 2016.

The petitioner requested that the NRC take enforcement actions to ensure that DCPP can operate safely and demonstrate its ability to safely shut down in the event of an earthquake

caused by nearby faults. As the basis of the request, the petitioner states that the “NRC staff’s determination that the new seismic information, including the Shoreline earthquake and its effect on the San Luis Bay and Los Osos faults, is a lesser-included case within the Hosgri earthquake is insufficient to insure that Diablo Canyon is operating safely with an adequate margin of safety.”

On two occasions, the NRC offered FOE opportunities to address the Petition Review Board (PRB), which was established to review FOE’s enforcement concerns. In response, on September 30, 2015, and February 8, 2016, FOE provided written submissions to the PRB in lieu of addressing the PRB in person or by

telephone. The NRC staff considered these submittals during its evaluation.

The NRC sent a copy of the proposed director’s decision to the petitioner and the Pacific Gas and Electric Company (the licensee) for comment on February 28, 2017. The petitioner and the licensee were asked to provide comments by March 16, 2017, on any part of the proposed director’s decision that was considered to be erroneous or any issues in the petition that were not addressed. The NRC staff did not receive any comments on the proposed director’s decision.

The Director of the Office of Nuclear Reactor Regulation has determined that the request to take enforcement actions to ensure that DCPP can operate safely and demonstrate its ability to safely shut down in the event of an earthquake

caused by nearby faults be denied. The reasons for this decision are explained in the director’s decision DD–17–02 pursuant to section 2.206 of 10 CFR of the Commission’s regulations.

The NRC will file a copy of the director’s decision with the Secretary of the Commission for the Commission’s review in accordance with 10 CFR 2.206. As provided by this regulation, the director’s decision will constitute the final action of the Commission 25 days after the date of the decision unless the Commission, on its own motion, institutes a review of the director’s decision in that time.

Availability of Documents

The documents identified in the following table are available for public inspection through the NRC’s ADAMS.

Title	Date	ADAMS Accession No.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS); Meeting of the ACRS Subcommittee on NuScale; Notice of Meeting

The ACRS Subcommittee on NuScale will hold a meeting on May 3, 2017, at 11545 Rockville Pike, Room T–2B3, Rockville, Maryland 20852.

The meeting will be open to public attendance with the exception of portions that may be closed to protect information that is proprietary pursuant to 5 U.S.C. 552b(c)(4). The agenda for the subject meeting shall be as follows:

Wednesday, May 3, 2017—2:00 p.m. Until 5:00 p.m.

The Subcommittee will hear a briefing on the NRC staff’s NuScale Safety Focused Review approach. The Subcommittee will hear presentations by and hold discussions with the NRC staff and other interested persons regarding this matter. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Michael Snodderly (Telephone 301–415–2241 or Email: Michael.Snodderly@nrc.gov) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this

timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 17, 2016, (81 FR 71543).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at <http://www.nrc.gov/reading-rm/doc-collections/acrs>. Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North Building, 11555 Rockville Pike, Rockville, Maryland. After registering with Security, please contact Mr. Theron Brown (Telephone 240-888-9835) to be escorted to the meeting room.

Dated: April 4, 2017.

Mark L. Banks,

Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

BILLING CODE 7590-01-P

PEACE CORPS

Information Collection Request; Submission for OMB Review

AGENCY: Peace Corps.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Peace Corps will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval. The purpose of this notice is to allow 30 days for public comment in the **Federal Register** preceding submission to OMB. We are conducting this process in accordance with the Paperwork Reduction Act of 1995.

DATES: Submit comments on or before May 30, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name/or OMB approval number and should be sent via email to: oir_submission@omb.eop.gov or fax to: 202-395-3086. Attention: Desk Officer for Peace Corps.

FOR FURTHER INFORMATION CONTACT: Denora Miller, FOIA/Privacy Act Officer, Peace Corps, 1111 20th Street NW., Washington, DC 20526, (202) 692-1236, or email at pcf@peacecorps.gov.

SUPPLEMENTARY INFORMATION:

Title: Global Health Service Peace Corps Staff Reference form.

OMB Control Number: 0420-0548.

Type of Request: New.

Affected Public: Individuals.

Respondents Obligation to Reply: Voluntary.

Burden to the Public:

Estimated burden (hours) of the collection of information:

a. *Number of interviewed applicants:* 120.

b. *Number of references required per interviewed applicant:* ** 2.

c. *Estimated number of reference forms received:* 240.

d. *Frequency of response:* One time.
e. *Completion time:* 10 minutes.
f. *Annual burden hours:* 40.

** Reference information is collected only if an applicant is contacted for an interview. The estimated number of applicants interviewed is 120 based on the first three years of the GHSP program.

General Description of Collection:

Peace Corps Response uses the staff, personal and professional reference forms to learn from someone who knows the applicant and his or her background whether the applicant possesses the necessary characteristics and skills to serve as a Global Health Service Partnership Volunteer.

Request for Comment: Peace Corps invites comments on whether the proposed collections of information are necessary for proper performance of the functions of the Peace Corps, including whether the information will have practical use; the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the information to be collected; and, ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

This notice is issued in Washington, DC, on April 25, 2017.

Denora Miller,

FOIA/Privacy Act Officer, Management.

PEACE CORPS

Information Collection Request; Submission for OMB Review

AGENCY: Peace Corps.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Peace Corps will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval. The purpose of this notice is to allow 30 days for public comment in the **Federal Register** preceding submission to OMB. We are conducting this process in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

DATES: Submit comments on or before May 30, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name/or OMB approval

number and should be sent via email to: oir_submission@omb.eop.gov or fax to: 202-395-3086. Attention: Desk Officer for Peace Corps.

FOR FURTHER INFORMATION CONTACT:

Denora Miller, FOIA/Privacy Act Officer, Peace Corps, 1111 20th Street NW., Washington, DC 20526, (202) 692-1236, or email at pcf@peacecorps.gov.

ADDRESSES:

Comments should be addressed to Denora Miller, FOIA/Privacy Act Officer. Denora Miller can be contacted by telephone at 202-692-1236 or email at pcf@peacecorps.gov. Email comments must be made in text and not in attachments.

FOR FURTHER INFORMATION CONTACT:

Denora Miller at Peace Corps address above.

SUPPLEMENTARY INFORMATION:

Title: Global Health Service Application.

OMB Control Number: 0420-0547.

Type of Request: New.

Affected Public: Individuals.

Respondents Obligation to Reply: Voluntary.

Respondents: Potential Volunteers.

Burden to the Public:

Estimated burden (hours) of the collection of information:

a. *Number of respondents:* 200.

b. *Frequency of response:* One time.

c. *Completion time:* 60 minutes.

d. *Annual burden hours:* 200 hours.

General Description of Collection: The Global Health Service Partnership Application ("the Application") is necessary to recruit qualified volunteers to serve in Peace Corps Response, as Global Health Service Partnership Volunteers to build institutional capacity and help strengthen the quality of medical and nursing education. Applicants are selected based on their qualifications for a specific Volunteer assignment.

Request for Comment: Peace Corps invites comments on whether the proposed collections of information are necessary for proper performance of the functions of the Peace Corps, including whether the information will have practical use; the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the information to be collected; and, ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

This notice is issued in Washington, DC, on April 25, 2017.

Denora Miller,

FOIA/Privacy Act Officer, Management.

BILLING CODE 6051-01-P

PENSION BENEFIT GUARANTY CORPORATION

Proposed Submission of Information Collection for OMB Review; Comment Request; Mergers and Transfers Between Multiemployer Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of intent to request extension of OMB approval of information collection.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of a collection of information contained in its regulation on Mergers and Transfers Between Multiemployer Plans. This notice informs the public of PBGC's intent and solicits public comment on the collection of information.

DATES: Comments must be submitted on or before June 27, 2017.

ADDRESSES: Comments may be submitted by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Email:* paperwork.comments@pbgc.gov.

- *Mail or Hand Delivery:* Regulatory Affairs Group, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington, DC 20005-4026.

Comments received, including personal information provided, will be posted to www.pbgc.gov.

Copies of the collection of information may also be obtained without charge by writing to Disclosure Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington, DC 20005-4026, or calling 202-326-4040 during normal business hours. (TTY and TDD users may call the Federal relay service toll-free at 800-877-8339 and ask to be connected to 202-326-4040.)

FOR FURTHER INFORMATION CONTACT:

Hilary Duke (duke.hilary@pbgc.gov), Attorney, Regulatory Affairs Group, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington DC 20005-4026; 202-326-4400, extension 3839. (TTY and TDD users may call the Federal relay service toll-free at 800-877-8339 and ask to be connected to 202-326-4400, extension 3839.)

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of a collection of information contained in its regulation on Mergers and Transfers Between Multiemployer Plans (29 CFR part 4231) (OMB control number 1212-0022; expires July 31, 2017). This notice informs the public of PBGC's intent and solicits public comment on the collection of information.

Section 4231(a) and (b) of the Employee Retirement Income Security Act of 1974 (ERISA) requires plans that are involved in a merger or transfer to give PBGC 120 days' notice of the transaction and provides that if PBGC determines that specified requirements are satisfied, the transaction will be deemed not to be in violation of ERISA section 406(a) or (b)(2) (dealing with prohibited transactions).

PBGC's regulation on Mergers and Transfers Between Multiemployer Plans (29 CFR part 4231) sets forth the procedures for giving notice of a merger or transfer under section 4231 and for requesting a determination that a transaction complies with section 4231.

PBGC uses information submitted by plan sponsors under the regulation to determine whether mergers and transfers conform to the requirements of ERISA section 4231 and the regulation.

The collection of information under the regulation has been approved by OMB under control number 1212-0022 (expires July 31, 2017). PBGC intends to request that OMB extend its approval for another three years. An agency may

not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that there are 14 transactions each year for which plan sponsors submit notices and approval requests under this regulation. The estimated annual burden of the collection of information is 9.50 hours and \$42,800.

PBGC is soliciting public comments to—

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodologies and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Issued in Washington, DC.

Deborah Chase Murphy,

Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation.

BILLING CODE P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-80514; File No. SR-IEX-2017-11]

Self-Regulatory Organizations; Investors Exchange LLC; Notice of Filing of Proposed Rule Change To Modify the Manner in Which the Exchange Opens Trading for Non-IEX-Listed Securities

April 24, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 13, 2017, the Investors Exchange LLC (“IEX” or the “Exchange”) filed with the Securities and Exchange Commission

(“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Securities Exchange Act of 1934 (“Act”), and Rule 19b-4 thereunder, Investors Exchange LLC (“IEX” or the “Exchange”) is filing with the Securities and Exchange Commission (“Commission”) proposed rule changes to (i) amend Rule 11.231 to modify the manner in which the Exchange opens trading for non-IEX-listed securities beginning at the start of Regular Market Hours and retitle it “Regular Market Session Opening Process for Non-IEX-Listed Securities”; and (ii) amend Rules 11.190 and 11.220 to specify the order types eligible to participate in the proposed Regular Market Session Opening Process for non-IEX listed securities (“Opening Process”) described in proposed Rule 11.231 and priority thereof.

The text of the proposed rule change is available at the Exchange's Web site at www.iextrading.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose Background

The purpose of the proposed rule change is to (i) amend Rule 11.231 to modify the manner in which the Exchange opens trading for non-IEX-listed securities beginning at the start of Regular Market Hours and retitle it

“Regular Market Session Opening Process for Non-IEX-Listed Securities”; (ii) amend Rule 11.190(a)(2)(E) to allow market orders with a time-in-force of DAY to be entered in the Pre-Market Session for queuing and participation in the Regular Market Session Opening Process for non-IEX-listed securities (“Opening Process”) described in proposed Rule 11.231; (iii) amend Rule 11.220(a)(2) regarding the priority of orders eligible to execute in the proposed Opening Process; and (iv) amend Rule 11.190(b)(11) to clarify that orders with a Minimum Quantity as defined in Rule 11.190(b)(11) (“Minimum Quantity orders”) are not eligible to participate in the Opening Process pursuant to proposed Rule 11.231.

Currently, the Exchange begins accepting limit orders with a time-in-force of IOC, FOK, SYS, and GTT³ for non-IEX-listed securities for trading at the beginning of the Pre-Market Session and any such orders received by the Exchange are immediately eligible for execution in the Pre-Market Session. In addition, limit orders with a time-in-force of DAY or GTX⁴ and pegged orders with a time-in-force of DAY that are entered during the Pre-Market Session are queued in the time sequence of their receipt by the System pursuant to Rule 11.220(a)(2), until the start of the Regular Market Session, or until the order is canceled by the User. Any such queued orders that are in the System at the beginning of Regular Market Hours are released to the Order Book as incoming orders in their relative time priority pursuant to Rule 11.220(a)(2) and are immediately eligible for trading in the Regular Market Session, subject to the User's instructions and market conditions. Pursuant to IEX Rule 11.190(a)(2)(E), market orders may only be submitted in the Regular Market Session, and are rejected by the System in the Pre-Market Session and Post-Market Session. Furthermore, under paragraph (iii) of IEX Rule 11.190(a)(2)(E), market orders marked DAY, by default, are rejected. When elected by the User, market orders marked DAY submitted by that User are accepted and eligible to trade or route during the Regular Market Session. Market orders marked DAY are treated by the System as having a TIF of IOC.⁵

³ See Rules 11.190(c)(1), 11.190(c)(2), 11.190(c)(5), and 11.190(c)(6), defining the time-in-force of IOC, FOK, SYS, and GTT, respectively.

⁴ See Rules 11.190(c)(3), 11.190(c)(4), defining a time-in-force of DAY and GTX, respectively.

⁵ Members that would like to enter market orders with time-in-force of DAY and have the Exchange accept such orders are required to have authorized

Continued

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Description of Proposed Rule Change

The Exchange proposes to amend Rule 11.231 to offer an enhanced opening process for non-IEX-listed securities. Specifically, as proposed, the Exchange will attempt to perform the Opening Process in each non-IEX-listed security pursuant to which all eligible interest resting on the Order Book in the Pre-Market Session available for continuous trading (*i.e.*, orders on the “Continuous Book”) or orders queued for execution in the Regular Market Session (*i.e.*, orders on the “Cross Book”) will be executed at a single price. As proposed, the Opening Process offers Users an opportunity to participate in an electronic price discovery mechanism that efficiently matches all eligible buy and sell orders in each non-IEX-listed security queued for the Opening Process along with all eligible orders resting on the Continuous Book from the Pre-Market Session at a single price. The Opening Process is designed to efficiently maximize the number of shares executed at a single price that is reflective of the broader market for the security, as described more fully below.

As proposed, prior to the beginning of Regular Market Hours, Users who wish to participate in the Opening Process may enter limit, market, and pegged orders designated with a time-in-force of DAY and limit orders designated with a time-in-force of GTX, which shall queue in the System and are eligible for execution in the Opening Process (orders on the Cross Book); interest resting on the Order Book in the Pre-Market Session available for continuous trading (*i.e.*, orders on the Continuous Book) are also eligible for execution in the Opening Process (collectively, “Cross Eligible Orders”). Minimum Quantity orders are not eligible for execution in the Opening Process, and are therefore not Cross Eligible Orders. Accordingly, the Exchange is proposing to amend Rule 11.190(a)(2)(E) to extend the queuing functionality to market orders with a time-in-force of DAY that are entered during the Pre-Market Session and are not designated to route pursuant to Rule 11.230(c), allowing such orders to queue in the System for participation in the Opening Process.⁶

⁶ personnel contact IEX Market Operation (marketops@iextrading.com) in writing requesting such port setting changes, and must specifically identify the order entry sessions to which such port setting will apply.

⁶ Orders canceled before the Opening Process will not participate in the Opening Process. Market orders with a time-in-force of DAY that are entered during the Pre-Market Session and are designated to route pursuant to Rule 11.230(c) will be rejected upon entry.

Orders with a time-in-force of IOC or FOK do not rest on the Order Book and are therefore ineligible to participate in the Opening Process. In addition, the Exchange is proposing to make a minor conforming change to the language used in reference to LULD Price Bands in Rule 11.190(a)(1)(2) [*sic*] in order to conform the reference to the language used throughout the Exchange’s rules.

As proposed, orders on the Continuous Book and orders on the Cross Book (collectively, the Order Book) shall be ranked and maintained for the Opening Process pursuant to Rule 11.220(a)(2), as follows:

- Midpoint peg orders, as defined in IEX Rule 11.190(b)(9), on the Cross Book are ranked and eligible for execution in the Opening Process at the less aggressive of the Midpoint Price or the order’s limit price, if any.

- Primary peg orders, as defined in IEX Rule 11.190(b)(8), on the Cross Book are ranked and eligible for execution in the Opening Process at the less aggressive of one (1) MPV below (above) the NBB (NBO) for buy (sell) orders or the order’s limit price, if any, but may exercise price discretion up (down) to the Opening Match Price, subject to the less aggressive of the NBB (NBO) or the order’s limit price, if any, except during periods of quote instability, as defined in IEX Rule 11.190(g). When exercising price discretion, primary peg orders are ranked behind any non-displayed interest at the Opening Match Price for the duration of the Opening Process. If multiple primary peg orders are exercising price discretion during the Opening Process, they maintain their relative time priority at the Opening Match Price.

- Discretionary Peg orders, as defined in IEX Rule 11.190(b)(10), on the Cross Book are ranked and eligible for execution in the Opening Process at the less aggressive of the NBB (NBO) for buy (sell) orders or the order’s limit price, if any, but may exercise price discretion up (down) to the Opening Match Price, subject to the less aggressive of the Midpoint Price or the order’s limit price, if any, except during periods of quote instability, as defined in IEX Rule 11.190(g). When exercising price discretion, Discretionary Peg orders are ranked behind any non-displayed interest at the Opening Match Price for the duration of the Opening Process. If multiple Discretionary Peg orders are exercising price discretion during the Opening Process, they maintain their relative time priority at the Opening Match Price.

- Limit orders on the Cross Book are ranked and eligible for execution in the Opening Process at their limit price.

- Non-displayed limit orders and non-displayed portions of reserve orders on the Continuous Book are ranked and eligible for execution in the Opening Process at the less aggressive of the Midpoint Price or the order’s limit price.

- Displayed limit orders on the Continuous Book are ranked and eligible for execution in the Opening Process at their resting price.

As noted above, orders shall be ranked and prioritized for the Opening Process in price—display—time priority pursuant to proposed Rule 11.220(a)(2). Specifically, the best priced Cross Eligible Order (the highest priced resting order to buy or the lowest priced resting order to sell) has priority over all other orders to buy (or orders to sell) in all cases. Market orders have precedence over limit orders. Cross Eligible Orders resting on the Continuous Book are ranked by the price at which they are resting on the Continuous Book and Cross Eligible Orders resting on the Cross Book are ranked by the limit price defined by the User, if any, except in the case of pegged orders, which are ranked by their current book price (in each case, the order’s “resting price”). Equally priced Cross Eligible Orders are ranked by display priority, *i.e.*, displayed orders and displayed portions of Cross Eligible Orders will have precedence over non-displayed orders and non-displayed portions of Cross Eligible Orders at a given price. Equally priced Cross Eligible Orders with the same display priority are ranked in time priority, *i.e.*, where Cross Eligible Orders to buy (or sell) are ranked at the same price with the same display priority, the oldest order at such price and display shall have precedence at that price and display. Orders are ranked by the time at which they are posted to the Order Book at a given price, the first to be posted at a given price being the oldest. Cross Eligible Orders maintain their time priority once booked until:

- In the case of an order on the Cross Book, the order is: (i) Incremented by the User, (ii) re-priced by the User, (iii) the Minimum Quantity instruction is removed from an order by the User, and therefore becomes a Cross Eligible Order, or (iv) a pegged order is re-priced by the System in response to changes in the NBBO, at which time the order will receive a new timestamp. Pursuant to IEX Rule 11.231(a)(1)(ii) and (iii), respectively, when exercising price discretion, primary peg and Discretionary Peg orders maintain time priority at their resting price, however they are prioritized behind any non-displayed interest at the Opening Match

Price for the duration of the Opening Process.

- In the case of an order on the Continuous Book, any one of the events specified in IEX Rule 11.220(a)(1)(C) occurs to an order, at which time the order will receive a new timestamp.

Under proposed Rule 11.231(b), beginning at the start of Regular Market Hours, Cross Eligible Orders that are eligible to trade at the Opening Match Price (as described below) will be processed in accordance with price—display—time priority pursuant to proposed Rule 11.220(a)(2). First, to the extent there is contra side interest eligible to trade at the Opening Match Price, market orders will be executed at the Opening Match Price in time priority. After the execution of all market orders, the remaining Cross Eligible Orders priced more aggressively than the Opening Match Price will be executed in price—display—time priority at the Opening Match Price. All remaining Cross Eligible Orders priced equal to the Opening Match Price will execute in display—time priority at the Opening Match Price. Executions will occur until there is no remaining volume or there is an imbalance of orders (*i.e.*, there are no remaining eligible shares to buy (sell), while eligible shares to sell (buy) remain unexecuted) (the process described above, collectively, being the “Opening Match”). AGID modifiers, as defined in Rule 11.190(e), will not be supported for executions in the Opening Match, but will be enforced on all unexecuted shares released to the Order Book following the Opening Match.

An imbalance of Cross Eligible Orders on the buy side or sell side may result in orders that are not executed in whole or in part. Unexecuted Cross Eligible Orders to buy (sell) that are priced at or above (below) the Cross Price Constraint (but remained unexecuted due to an imbalance of Cross Eligible Orders) will price slide pursuant to IEX Rule 11.190(h) and all remaining unexecuted Cross Eligible Orders, along with any orders that were either ineligible to participate in the Opening Process or too passive to be executed in the Opening Process, will be released to the Order Book for continuous trading or canceled in accordance with the terms of the order. Routable orders that are released to the Order Book will be routed in accordance with IEX Rule 11.230(c)(3) (Re-Sweep Behavior), subject to the order’s instructions.

Proposed Rule 11.231(c)(1) sets forth proposed definitions applicable to the Opening Process. As proposed:

- The term “Away Protected NBB” or “Away Protected NBO” shall mean the

national best bid or offer, respectively, that is a Protected Quotation and not a quotation of the Exchange.

- The term “Away Protected Bid” or “Away Protected Offer” shall mean a Protected Bid or Protected Offer, respectively, that is not a quotation of the Exchange.

- The term “Cross Price Constraint” shall mean, collectively, the upper and lower threshold prices within which the Opening Match must occur, inclusive of the boundaries. During a crossed market, if the upper threshold price is below the lower threshold price when performing the Opening Process, no Opening Match will occur and orders eligible to post on the Order Book will price slide in accordance with the price sliding process, pursuant to IEX Rule 11.190(h), and the security will open for trading on IEX in accordance with prevailing market session rules.

- The upper threshold price of the Cross Price Constraint is equal to the price of the Away Protected NBO, except in the event that an Away Protected Bid is crossing an Away Protected Offer, the upper threshold price is equal to the greater of five cents (\$0.05) or one half of a percent (0.5%) higher than the lowest Away Protected Offer.

- The lower threshold price of the Cross Price Constraint is equal to the price of the Away Protected NBB, except in the event that an Away Protected Bid is crossing an Away Protected Offer, the lower threshold price is equal to the greater of five cents (\$0.05) or one half of a percent (0.5%) lower than the highest Away Protected Bid.

- The term “Cross Tie Breaker” shall mean the price of the most current Order Collar Reference Price pursuant to IEX Rule 11.190(f).⁷

Under proposed Rule 11.231(c)(2), if both an Away Protected Bid and Away

⁷ Rule 11.190(f)(1)(A) defines the Order Collar Reference Price as the most current of: (i) The consolidated last sale price disseminated during the Regular Market Session on the current trade date, (ii) the last trade price disseminated outside of the Regular Market Session by the SIP (Form T, as communicated by the relevant SIP) on the current trade date, which but for the Form T designation would have been considered a valid last sale price, or, (iii) if no such trades exist, the previous official closing price. If no Pre-Market Session trades have occurred that qualify to update the Order Collar Reference Price and the previous official closing price for the security is not available, in the interest of maintaining a fair and orderly market, the Exchange will prevent trading in a security pursuant to Rule 11.190(f)(1)(B) by rejecting orders beginning at the start of the Pre-Market Session, and will not conduct an Opening Match in such security. Accordingly, in such cases, the Opening Process will conclude with IEX opening the Regular Market Session without an Opening Match, and trading will begin upon receipt of the first Order Collar Reference Price for the security.

Protected Offer exists (*i.e.*, a two-sided market) the price of the Opening Match (“Opening Match Price”) will be the price that maximizes the number of shares of Cross Eligible Orders to be executed. If more than one price exists that maximizes the number of shares of Cross Eligible Orders to be executed, the Opening Match shall occur at the entered price at which shares will remain unexecuted in the match (*i.e.*, the price of the most aggressive unexecuted order). If Cross Eligible Order shares are maximized and left unexecuted at more than one price, the Opening Match shall occur at the price that minimizes the distance from the Cross Tie Breaker (*i.e.*, the price at or higher than the most aggressive unexecuted buy order and at or lower than the most aggressive unexecuted sell order that is closest or equal to the Cross Tie Breaker). Lastly, if the Opening Match Price established pursuant to the procedures above is below (above) the lower (upper) threshold price of the Cross Price Constraint, the Opening Match shall occur at the lower (upper) threshold price of the Cross Price Constraint.

The following examples are designed to illustrate the process for determining the Opening Match Price in a two-sided market, as described above. Each example below assumes the Away Protected NBB is \$10.09, the Away Protected NBO is \$10.11, and the last trade price that qualified as an Order Collar Reference Price was \$10.10:

- *Example 1*

- The Cross Book includes the following orders:

- Limit order to buy 1,500 shares with a limit price of \$10.10; and
 - Limit order to sell 1,000 shares with a limit price of \$10.10.

- Shares are maximized at \$10.10; therefore

- 1,000 shares would execute at the Opening Match Price of \$10.10.

- *Example 2*

- The Cross Book contains the following orders:

- Limit order to buy 1,500 shares with a limit price of \$10.10; and
 - Market order to sell 1,000 shares.

- Shares are maximized at each price at and between the lower threshold of the Cross Price Constraint (*i.e.*, \$10.09) and \$10.10;

- The price at which shares will remain unexecuted in the auction is \$10.10;⁸ therefore

⁸ Note, while shares are maximized at and between the lower threshold of the Cross Price Constraint (\$10.09) and \$10.10, the *entered* price at which shares will remain unexecuted in the auction

■ 1,000 shares would execute at the Opening Match Price of \$10.10.

• *Example 3*

○ The Cross Book contains the following orders:

■ Limit order to buy 2,000 shares with a limit price of \$10.11;

■ Limit order to sell 2,000 shares with a limit price of \$10.09.

○ The Continuous Book contains the following orders:

■ Displayed limit order to buy 500 shares with a limit price of \$10.09;

■ Displayed limit order to sell 600 shares with a limit price of \$10.11.

○ Shares are maximized at each price at or between \$10.09 and \$10.11;

○ The range of prices at or between the prices at which shares will remain unexecuted in the auction is \$10.09 and \$10.11;

○ Because a range of prices exist after evaluating the prior two conditions (*i.e.*, an auction price range), the price closest to the Cross Tie Breaker (*i.e.*, the last trade price that qualified as an Order Collar Reference Price) within the auction price range is \$10.10; therefore

■ 2,000 shares would execute at the Opening Match Price of \$10.10.

• *Example 4*

○ The Cross Book contains the following orders:

■ Limit order to buy 2,000 shares with a limit price of \$10.08;

■ Limit order to sell 2,000 shares with a limit price of \$10.08.

○ The Continuous Book contains the following orders:

■ Displayed limit order to buy 500 shares with a limit price of \$10.09;

■ Displayed limit order to sell 600 shares with a limit price of \$10.11.

○ Shares are maximized at \$10.08, however \$10.08 is below the lower threshold of the Cross Price Constraint (*i.e.*, \$10.09); therefore

■ 500 shares would execute at the Opening Match Price of \$10.09.

The following examples are designed to illustrate the process for determining the Opening Match Price and the proposed execution priority including non-displayed orders on the Cross Book in two-sided market, as described above. Each example below assumes the Away Protected NBB is \$20.19, the Away Protected NBO is \$20.21, and the last trade price that qualified as an Order Collar Reference Price was \$20.20:

• *Example 1*

○ The Cross Book includes the following orders:

■ Midpoint Peg order to buy 2,500 shares with a resting price of \$20.20.

■ Limit order to buy 500 shares with a limit price of \$20.18; and

■ Limit order to sell 2,000 shares with a limit price of \$20.18.

○ For purposes of determining the Opening Match Price, the Midpoint Peg order is priced at its resting price (\$20.20);

○ Accordingly, shares are maximized between \$20.18 and \$20.20, and the price at which shares are left unexecuted within such range, is \$20.20; therefore

■ 2,000 shares would execute at the Opening Match Price of \$20.20;

• The Midpoint Peg buy order would receive an execution of 2,000 shares and the remaining 500 shares remain booked at the midpoint of the NBBO;

• The limit sell order would receive an execution of 2,000 shares, and thus be fully filled; and

• The limit buy order would not receive an execution, because the limit sell order is fully filled after matching with the Midpoint Peg buy order with superior priority. The entire limit buy order is booked at the \$20.18.

• *Example 2*

○ The Cross Book includes the following orders:

■ Primary Peg order to buy 2,500 shares with a resting price of \$20.18, and limit price of \$20.20;

■ Limit order to buy 500 shares with a limit price of \$20.19; and

■ Displayed limit order to sell 2,000 shares with a limit price of \$20.19.

○ For purposes of determining the Opening Match Price, the Primary Peg order is priced at its resting price (\$20.18); the Primary Peg order is eligible exercise price discretion up to the Opening Match Price, so long as the match price is at or below the less aggressive of the NBB or the order's limit price;

○ Accordingly, shares are maximized at \$20.19; therefore

■ 2,000 shares would execute at the Opening Match Price of \$20.19;

• The limit buy order would receive an execution of 500 shares;

• Assuming IEX has determined the quote to be stable pursuant to IEX Rule 11.190(g), the Primary Peg buy order would exercise discretion up to the Opening Match Price and receive an execution of 1,500 shares; the remaining 1,000 shares remain booked at \$20.18; and

• Assuming IEX has determined the quote to be stable pursuant to IEX Rule 11.190(g), the limit sell order would receive an execution of 2,000 shares. If IEX has determined the quote to be unstable pursuant to IEX Rule 11.190(g), the limit sell order would receive an

execution of 500 shares and the remaining 1,500 shares would post, in accordance with the display-price sliding behavior, 1 MPV above the NBB at \$20.20.

• *Example 3*

○ The Cross Book includes the following orders:

■ Midpoint Peg order to buy 2,500 shares with a resting price of \$20.20.

■ Displayed limit order to buy 500 shares with a limit price of \$20.20; and

■ Limit order to sell 2,000 shares with a limit price of \$20.20.

○ For purposes of determining the Opening Match Price, the Midpoint Peg order is priced at its resting price (\$20.20);

○ Accordingly, shares are maximized at \$20.20; therefore

■ 2,000 shares would execute at the Opening Match Price of \$20.20;

• The limit buy order would receive an execution of 500 shares;

• The Midpoint Peg buy order would receive an execution of 1,500 shares; and

• The limit sell order would receive an execution of 2,000 shares.

• *Example 4*

○ The Cross Book includes the following orders:

■ Discretionary Peg order to buy 2,500 shares with a resting price of \$20.19, and limit price of \$20.21;

■ Limit order to buy 500 shares with a limit price of \$20.20; and

■ Limit order to sell 2,000 shares with a limit price of \$20.20.

○ For purposes of determining the Opening Match Price, the Discretionary Peg order is priced at its resting price (\$20.19); the Discretionary Peg order is eligible exercise price discretion up to the Opening Match Price, so long as the match price is at or below the less aggressive of the midpoint of the NBBO or the order's limit price.

○ Accordingly, shares are maximized at \$20.20; therefore

■ 2,000 shares would execute at the Opening Match Price of \$20.20;

• The limit buy order would receive an execution of 500 shares;

• Assuming IEX has determined the quote to be stable pursuant to IEX Rule 11.190(g), the Discretionary Peg buy order would exercise discretion up to the Opening Match Price and receive an execution of 1,500 shares; and

• Assuming IEX has determined the quote to be stable pursuant to IEX Rule 11.190(g), the limit sell order would receive an execution of 2,000 shares. If IEX has determined the quote to be unstable pursuant to IEX Rule 11.190(g), the limit sell order would receive an execution of 500 shares and the

is \$10.10, as \$10.10 is the resting price of the most aggressive order where shares remain unexecuted.

remaining 1,500 shares would post at \$20.20.

Under proposed Rule 11.231(c)(3), if there is a lack of an Away Protected Bid and/or Away Protected Offer (*i.e.*, a one-sided, or zero-sided market) the Opening Match Price will be the price of the Cross Tie Breaker. If the price of the Cross Tie Breaker is below (above) the lower (upper) threshold price of the Cross Price Constraint, the Opening Match shall occur at the lower (upper) threshold price of the Cross Price Constraint.⁹

The following examples are designed to illustrate the process for determining the Opening Match Price in a one-sided or zero-sided market as described above. Each example below assumes the last trade price that qualified as an Order Collar Reference Price was \$10.10:

• **Example 1**

- Away Protected NBB is \$10.09;
- The Cross Book includes the

following orders:

- Limit order to buy 1,500 shares with a limit price of \$10.11; and
- Limit order to sell 1,000 shares with a limit price of \$10.09.

○ The Cross Tie Breaker is \$10.10 and such price is above the lower threshold of the Cross Price Constraint (*i.e.*, \$10.09);¹⁰ therefore

- 1,000 shares would execute at the Opening Match Price of \$10.10.

• **Example 2**

- Away Protected NBB is \$10.11;
- The Cross Book includes the

following orders:

- Limit order to buy 1,500 shares with a limit price of \$10.11; and
- Limit order to sell 1,000 shares with a limit price of \$10.09.

○ The Cross Tie Breaker is \$10.10 however such price is below the lower threshold of the Cross Price Constraint (*i.e.*, \$10.11); therefore

- 1,000 shares would execute at the Opening Match Price of \$10.11.

• **Example 3**

- There is neither an Away Protected NBB nor an Away Protected NBO;
- The Cross Book includes the

following orders:

- Limit order to buy 1,500 shares with a limit price of \$10.11; and

- Limit order to sell 1,000 shares with a limit price of \$10.09.

○ The Cross Tie Breaker is \$10.10;¹¹ therefore

- 1,000 shares would execute at the Opening Match Price of \$10.10.

Proposed Rule 11.231(e) provides that if a security is subject to a halt, suspension, or pause in trading during the Pre-Market Session, the Exchange will not accept orders in the security for continuous trading, or for queuing and participation in the Opening Process. Pursuant to IEX Rule 11.271, any order submitted during a halt will be rejected by the System. Any orders resting on the Order Book at the time of a trading halt will not be canceled by the System, and will be unavailable for trading or re-sweep during the trading halt, but will be available for cancellation by the submitting User. Orders that were submitted prior to the halt, suspension, or pause in trading that joined the Cross Book or the Continuous Book will remain on the Cross Book or the Continuous Book unless canceled by the User. If the halt, suspension, or pause remains in effect at the start of the Regular Market Hours, the Opening Process will not occur at the normally scheduled time. Instead, once the security resumes trading, the Exchange will conduct the Opening Process, as described in proposed Rule 11.231(b) and (c), including all Cross Eligible Orders that remain on the Cross Book and the Continuous Book. Following the conclusion of the Opening Process, the Exchange will accept and execute orders as usual in accordance with prevailing market session rules.

In the event of a disruption that prevents the execution of the Opening Process, Rule 11.231(d) provides for Opening Process Contingency Procedures designed to allow for timely and orderly opening of non-IEX-listed securities. As proposed, rather than matching orders at the Opening Match Price as described in Rule 11.231(c), IEX will publicly announce that no Opening Process will occur.¹² All orders on the Order Book will be canceled, and IEX will open the security for trading without an Opening Match.

Lastly, proposed Rule 11.231(f) states that for purposes of Rule 611(b)(3) of

Regulation NMS, and section VI(D)(6) of the Plan to Implement a Tick Size Pilot Program, orders executed in the Opening Process shall constitute a single-priced opening transaction by the Exchange and may trade-through or trade-at the price of any other Trading Center's Manual or Protected Quotations. Each of the orders executed in the Opening Process are by definition a single priced opening or re-opening transaction, and therefore meet the letter and spirit of Rule 611(B)(3) of Regulation NMS and section VI(D)(6) of the plan to Implement a Tick Size Pilot Program, consistent with the protection of investors and the public interest.

Implementation

The Exchange plans to implement the proposed changes during the second quarter of 2017 pending completion of necessary technology changes and subject to Commission approval. The Exchange will announce the implementation date of the proposed changes by Trader Alert at least 10 business days in advance of such implementation date and within 90 days of approval of this proposed rule change.

2. Statutory Basis

IEX believes that the proposed rule change is consistent with Section 6(b) of the Act¹³ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹⁴ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. Specifically, the Exchange believes that the proposal is consistent with the protection of investors and the public interest in that the price discovery mechanism utilized to determine the Opening Match Price under proposed Rule 11.231(c) will provide the greatest opportunity to match buy and sell orders at a price that is reflective of market conditions for the security, while also providing for orderly and timely openings of non-IEX-listed securities.

Specifically, the Exchange believes that constraining the Opening Match Price to prices at or between the Away Protected NBB and Away Protected NBO is designed to respect the fact that

⁹ In a one-sided market where there is no Away Protected NBB or no Away Protected NBO, the Cross Tie Breaker is compared to the available threshold price of the Cross Price Constraint (*i.e.*, the Opening Match Price will be at or above the lower threshold price, or at or below the upper threshold price of the Cross Price Constraint, as applicable). In a zero-sided market, the Opening Match Price will be the Cross Tie Breaker.

¹⁰ Note, there is no upper threshold price of the Cross Price Constraint because there is no Away Protected NBO, and therefore the Cross Tie Breaker of \$10.10 is compared to the available lower threshold price of the Cross Price Constraint (\$10.09).

¹¹ Note, there is neither an upper threshold price nor a lower threshold price of the Cross Price Constraint because there are no away protected quotations.

¹² Note, the Exchange intends to disseminate a System Status Alert to publicly announce that no Opening Process will occur, which automatically publishes an email alert, twitter update, and text message to all persons registered to receive such alerts, as well as publishing to the IEX public Web site. To register for System Status Alerts, visit <https://www.iextrading.com/status/#/>.

¹³ 15 U.S.C. 78f.

¹⁴ 15 U.S.C. 78f(b)(5).

much of the liquidity seeking execution at the start of Regular Market Hours is aggregated at the primary market center. Therefore, including the quotations of the primary market (along with those of all other protected markets) for purposes of pricing the Opening Match is designed to provide the greatest opportunity to match buy and sell orders at a price that is reflective of the market for the security, in furtherance of the perfection of a free and open market and a national market system, and consistent with the protection of investors and the public interest. The Exchange notes that as proposed, the Cross Price Constraint will not include IEX's protected quotations when determining the upper and lower threshold prices within which the Opening Match must occur, because the inclusion of such quotes may unnecessarily constrain the prices at which the Opening Match may occur, needlessly restricting price discovery in the Opening Process when the Opening Match would maximize shares traded at a price beyond the IEX best bid (offer) but within the Away Protected NBB (NBO). However, shares that comprise protected quotations on IEX would necessarily be included in the Opening Process pursuant to proposed Rule 11.220(a)(2) regarding priority. Accordingly, the Exchange believes that excluding IEX's protected quotations is consistent with the protection of investors and the public interest, in that it is designed to allow for robust price discovery to occur at or within the prices which best reflect the broader market for the security.

The Exchange believes that not supporting AGID modifiers in the Opening Process is consistent with the protection of investors and the public interest because within the context of the Opening Match process, counterparties are not considered; only the aggregate available volume for execution is considered. It is illogical to cancel an order that happens to be allocated an execution against an order entered using the same MPID, because both orders execute at the exact same price to the exact same effect where the orders happen to execute against orders of a different MPID. Furthermore, the Exchange believes that supporting AGID modifiers and including Minimum Quantity orders in the Opening Process would introduce additional technical complexities to the Opening Process, and the Exchange believes providing simplicity in this regard is in the

interest of the protection of investors and the public interest.¹⁵

The Exchange notes that the proposed handling of Minimum Quantity orders in the Opening Process is distinct from the proposed handling of such orders in the Opening Auction for IEX-listed securities pursuant to proposed Rule 11.350(c).¹⁶ Specifically, in the case of an Opening Auction for an IEX-listed security pursuant to proposed Rule 11.350(c)(2)(C), Minimum Quantity orders are eligible for execution in the auction, but the minimum quantity instructions will not be supported, although it will be enforced on all unexecuted shares released for continuous trading following the Opening Auction match. Conversely, for the Opening Process for non-IEX-listed securities, Minimum Quantity orders are not eligible for execution in the Opening Process. The Exchange believes the Opening Process will yield small execution sizes in comparison the size of an Opening Auction. Accordingly, the Exchange does not believe that including Minimum Quantity orders but not supporting the instruction is an effective approach for handling such orders because the Opening Match is likely to result in more executions that are smaller than an order's minimum quantity instruction. Accordingly, the Exchange believes that the proposed functionality regarding Minimum Quantity orders is consistent with the protection of investors and the public interest.

Furthermore, the Exchange believes that the proposed changes to Rule 11.220(a)(2) regarding the priority of orders eligible to execute in the proposed Opening Process is consistent with the protection of investors and the public interest because the proposed Opening Process priority is designed to create continuity between the priority rules applied during continuous trading and in the Opening Process. Specifically, identical to the Pre-Market, Regular Market, and Post Market Sessions, the Exchange is proposing to apply price—display—time priority for purpose of ranking and maintaining orders eligible to execute in the proposed Opening Process. Furthermore, the Exchange notes that the proposed priority for the Opening

Process is substantially similar to the priority of the opening processes for non-listed securities on NYSE Arca, Inc. ("NYSE Arca") and the Nasdaq Stock Market ("Nasdaq").¹⁷

The Exchange believes that allowing primary peg, midpoint peg and Discretionary Peg orders to participate in the proposed Opening Process is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system, and protect investors and the public interest. Specifically, as proposed, primary peg, midpoint peg, and Discretionary Peg orders as set forth in Rules 11.190(b)(8), 11.190(b)(9), and 11.190(b)(10), respectively, would be ranked and eligible for execution in the Opening Process at their resting price. As proposed, primary peg and Discretionary Peg orders would have the ability to exercise price discretion to execute at the Opening Match Price. When primary peg and Discretionary Peg orders exercise discretion to execute at the Opening Match Price, such orders are prioritized behind all other non-displayed interest at the Opening Match Price; if multiple orders exercise discretion, they maintain their relative time priority at the Opening Match Price. Primary peg orders may exercise price discretion up (down) to the Opening Match Price, subject to the less aggressive of the NBB (NBO) or the order's limit price, if any, except during periods of quote instability, as defined in IEX Rule 11.190(g). Discretionary Peg orders may exercise price discretion up (down) to the Opening Match Price, subject to the less aggressive of the Midpoint Price or the order's limit price, if any, except during periods of quote instability, as defined in IEX Rule 11.190(g). The Exchange believes that inclusion of such orders is designed to maximize the liquidity available for execution in the Opening Process, thereby facilitating price discovery and a more orderly opening.

As proposed, primary peg, midpoint peg, and Discretionary Peg orders participate in the Opening Process in a manner that is fundamentally substantially similar to the behavior of such orders during continuous trading. Specifically, the manner in which such orders are eligible for execution in the Opening Process are functionally identical to their eligibility for execution during continuous trading. For example, a resting Discretionary Peg

¹⁵ The Exchange notes that Bats BZX Exchange, Inc. ("Bats") does not support broker self-match restrictions in their opening process for non-listed securities. See Bats Rule 11.24(b), which states that all MTP modifiers, as defined in Bats Rule 11.9(f), will be ignored as it relates to executions occurring as part of the Bats opening match process.

¹⁶ See proposed Rule 11.350(c)(2)(C) in SR-IEX-2017-10 available at <https://www.iextrading.com/regulation/rule-filings/>.

¹⁷ See, e.g., Nasdaq Rule 4752(d)(3)(A)–(D), and NYSE Arca Rule 7.35(a)(6) and 7.35(c)(4), describing priority for the opening auction.

order would exercise discretion up (down) to the less aggressive of the Midpoint Price or the order's limit price to interact with an incoming spread crossing order. Similarly, in the Opening Process, a Discretionary Peg order would exercise discretion up (down) to the Opening Match Price, subject to the less aggressive of the Midpoint Price, or the order's limit price to interact contra-side liquidity in the Opening Process. Accordingly, inclusion of such orders would be in accord with existing functionality already approved by the Commission in connection with its grant of IEX's application for registration as a national securities exchange under Sections 6 and 19 of the Act, wherein the Commission specifically found IEX's order type rules to be consistent with the Act and, in particular, the Section 6(b)(5) requirement that the Exchange's rules be designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system, and protect investors and the public interest.¹⁸ Accordingly, the Exchange does not believe that allowing these orders to participate in the proposed Opening Process in accordance with their current functionality raises any new or novel issues that have not already been considered by the Commission, and is thus consistent with the protection of investors and the public interest.

The Exchange also believes that the proposal is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, to protect investors and the public interest, because proposed Rule 11.231(d) sets forth an opening process contingency procedure, which provides a clear and transparent process designed to provide a means for trading in a non-IEX-listed security to open in an orderly and timely manner even after a disruption has prevented the execution of the Opening Process. Furthermore, the Exchange believes that proposed Rule 11.231(e) is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest in that the Exchange would conduct the Opening Process for non-IEX-listed securities that were subject to and remained in a halt, suspension, or pause in trading at the

commencement of the Opening Process, while still allowing Users to cancel any queued interest prior to the commencement of the Opening Process. Applying the proposed Opening Process for securities that open after the start of Regular Market Hours as a result of a halt, suspension, or pause in trading provides the greatest opportunity to match buy and sell orders at a price that is reflective of market conditions for the security, while also providing for orderly and timely openings of non-IEX-listed securities, and creating uniformity among all non-IEX-listed securities by applying a consistent approach to open trading on IEX in such securities.

In addition, the Exchange believes that allowing market orders with a time-in-force of DAY to be entered into the System for queueing in the Pre-Market session while also allowing such orders to participate in the Opening Process provides Users with greater control and flexibility with respect to entering orders, and may simplify the order entry process for Users. In this regard, Users are able to enter orders that will either queue on the Cross Book for participation in the Opening Process, or are eligible for execution in the Pre-Market Session prior to participating in the Opening Process, which removes impediments to a free and open market and benefits all Users of the Exchange. In addition, the Exchange believes that its proposal to make a minor conforming change to the language used in reference to the LULD Price Bands in Rule 11.190(a)(1)(2) [sic] in order to conform the reference to the language used throughout the Exchange's rules is consistent with the protection of investors and the public interest because it is designed to provide consistency and clarity in the Exchange's rules, which benefits all market participants.

The Exchange is not proposing to disseminate indicative pricing or imbalance information relating to the Opening Process. The Exchange is not proposing to disseminate indicative pricing or imbalance information prior to the Opening Process because the Exchange is not trying to establish equilibrium in order to determine the official opening price of the security. Rather, the Opening Process is designed to efficiently resolve the queue of orders awaiting the Regular Market Session at a fair price, that reflects the broader market for the security. Accordingly, the Exchange believes that not providing indicative pricing or imbalance information related to the Opening

Process is consistent with the protection of investors and the public interest.¹⁹

B. Self-Regulatory Organization's Statement on Burden on Competition

IEX does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes that the proposed Opening Process is designed to promote fair competition among brokers and dealers and among exchange markets by offering an Opening Process that competes with existing opening processes for non-listed securities offered by IEX's competitors, thereby promoting intermarket competition between exchanges in furtherance of the principles of Section 11A(a)(1).²⁰

With respect to intramarket competition, the proposed Opening Process will apply equally to all non-IEX-listed securities, and all Members and market participants that send orders to IEX through Members. Members are permitted to enter any type of Cross Eligible Order and there are no privileged participants who receive enhanced priority, or have access to special order types. Consequently, IEX does not believe that the proposal will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

¹⁹ The Exchange notes that Bats does not provide indicative pricing or imbalance information for its process for opening non-listed securities pursuant to Bats Rule 11.24.

²⁰ 15 U.S.C. 78k-1(a)(1).

¹⁸ See Securities Exchange Act Release No. 34-78101 at 47 (June 17, 2016), 81 FR 41142 (June 23, 2016) (File No. 10-222).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-IEX-2017-11 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-IEX-2017-11. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-IEX-2017-11, and should be submitted on or before May 19, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²¹

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-80511]

Order Granting Petition for Review and Scheduling Filing of Statements; in the Matter of Bats BZX Exchange, Inc.; Regarding an Order Disapproving a Proposed Rule Change, as Modified by Amendments No. 1 and 2, to BZX Rule 14.11(e)(4), Commodity-Based Trust Shares, To List and Trade Shares Issued by the Winklevoss Bitcoin Trust

April 24, 2017.

This matter comes before the Securities and Exchange Commission ("Commission") on petition to review the disapproval, through delegated authority, of the Bats BZX Exchange, Inc. ("BZX") proposed rule change to list and trade shares of the Winklevoss Bitcoin Trust as Commodity-Based Trust Shares under BZX Rule 14.11(e)(4).

On July 8, 2016, the Commission issued a notice of filing of the proposed rule change filed with the Commission pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Exchange Act")¹ and Rule 19b-4² thereunder.³ On August 23, 2016, the Commission designated a longer time period within which to act on the proposed rule change.⁴ On October 12, 2016, the Commission instituted proceedings under Section 19(b)(2)(B) of the Exchange Act⁵ to determine whether to approve or disapprove the proposed rule change.⁶ On January 4,

²¹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Notice of Filing of a Proposed Rule Change to BZX Rule 14.11(e)(4), Commodity-Based Trust Shares, to List and Trade Winklevoss Bitcoin Shares Issued by the Winklevoss Bitcoin Trust, Securities Exchange Act of 1934, Release No. 78262 (July 8, 2016), 81 FR 45554 (July 14, 2016).

⁴ Notice of Designation of a Longer Period for Commission Action on Proposed Rule Change to BZX Rule 14.11(e)(4), Commodity-Based Trust Shares, to List and Trade Winklevoss Bitcoin Shares Issued by the Winklevoss Bitcoin Trust, Securities Exchange Act of 1934, Release No. 78653 (August 23, 2016), 81 FR 59256 (August 29, 2016).

⁵ 15 U.S.C. 78s(b)(2)(B).

⁶ Order Instituting Proceedings to Determine Whether to Approve or Disapprove a Proposed Rule Change to BZX Rule 14.11(e)(4), Commodity-Based Trust Shares, to List and Trade Winklevoss Bitcoin Shares Issued by the Winklevoss Bitcoin Trust,

2017, the Commission designated a longer period for Commission action on the proposed rule change.⁷ After consideration of the record in the proposed rule change, the Division of Trading and Markets ("Division"), pursuant to delegated authority,⁸ issued an order disapproving the proposed rule change ("Disapproval Order") on March 10, 2017.⁹

On March 24, 2017, pursuant to Rule 430 of the Rules of Practice,¹⁰ BZX filed a petition for review of the Disapproval Order. Pursuant to Rule 431 of the Rules of Practice,¹¹ BZX's petition for review of the Disapproval Order is granted. Further, the Commission hereby establishes that any party to the action or other person may file a written statement in support of or in opposition to the Disapproval Order on or before May 15, 2017.

For the reasons stated above, it is hereby:

Ordered that the petition of BZX for review of the Division's action to disapprove the proposed rule change by delegated authority be *granted*; and

It is further *ordered* that any party or other person may file a statement in support of or in opposition to the action made pursuant to delegated authority on or before May 15, 2017.

The order disapproving such proposed rule change shall remain in effect.

By the Commission.

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-80517; File No. SR-FICC-2017-010]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing of Proposed Rule Change To Amend the Mortgage-Backed Securities Division Rules Concerning Use of Clearing Fund for Losses, Liabilities or Temporary Needs for Funds Incident to the Clearance and Settlement Business and Make Other Related Changes

April 24, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 11, 2017, Fixed Income Clearing Corporation (“FICC”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency’s Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of modifications to the Mortgage-Backed Securities Division (“MBSD”) Clearing Rules (“MBSD Rules”)³ of FICC. Specifically, FICC proposes to amend Section 5 of MBSD Rule 4 to (i) delete language that would potentially limit FICC’s access to MBSD Clearing Fund cash and collateral to address losses, liabilities, or temporary needs for funds incident to its clearance and settlement business and (ii) make additional changes to correct grammar errors, delete superfluous words and otherwise align the text of Section 5 of MBSD Rule 4 to the text of Section 5 of Rule 4 of FICC’s Government Securities Division (“GSD”) Rulebook (“GSD Rules”).⁴

II. Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change would (i) delete language that would potentially limit FICC’s access to MBSD Clearing Fund cash and collateral to address losses, liabilities or temporary needs for funds incident to its clearance and settlement business and (ii) make additional changes to correct grammar errors, delete superfluous words, and otherwise align the text of Section 5 of MBSD Rule 4 to the text of Section 5 of GSD Rule 4.

Section 5 of MBSD Rule 4 (the “Rule” or the “MBSD Rule” as used herein) describes the purposes for which FICC may use MBSD Clearing Fund deposits. The Rule is based on the parallel Section 5 of GSD Rule 4. The Rule describes the use of Clearing Fund deposits both to satisfy “losses or liabilities of the Corporation” and as collateral.⁵ The first category is further divided between losses or liabilities “arising from the failure of a Defaulting Member”⁶ and those “otherwise incident to the clearance and settlement business of the Corporation *with respect to losses or liabilities to meet unexpected or unusual requirements for funds that represent a small percentage of the Clearing Fund.*”⁷ The second category refers to Clearing Fund deposits serving as collateral (i) to meet FICC’s temporary financing needs, (ii) to ensure Members’ satisfaction of settlement obligations, and (iii) “*to meet unexpected or unusual requirements for funds that represent a small percentage of the Clearing Fund.*”⁸

Section 5 of GSD Rule 4 reflects the same two-part construction but does not

contain the limiting language relating to “unexpected or unusual requirements for funds.”⁹ This limiting language was approved and became effective in 2012 when FICC introduced central counterparty and guaranteed settlement services for MBSD, at which time the entirety of the MBSD Rules were updated and replaced.¹⁰ Neither FICC’s proposal nor the Commission’s approval order describes the purpose of the limiting language.¹¹

The language appears to have been drawn from the Commission’s publication in 1980 of standards for the Commission’s Division of Market Regulation (the “Division”) to employ in connection with the registration of clearing agencies.¹² In the 1980 Standards Release, the Division stated, in relevant part, that a clearing agency “should have a clearing fund which . . . is limited in the purposes for which it may be used.”¹³ The Division further stated that “the rules of the clearing agency should limit the purposes for which the clearing fund may be used to protecting participants and the clearing agency (i) from the defaults of participants and (ii) from clearing agency losses (*not including day-to-day operating expenses*) such as losses of securities not covered by insurance or other resources of the clearing agency.”¹⁴ The Division observed that some commenters opposed the limitation contained in clause (ii) on grounds that it could limit a clearing agency’s access to its clearing fund in the event of a temporary need to cover an operating funds shortfall while a fee increase was being implemented or a temporary need to cover a delay in payment by a participant due to circumstances beyond the participant’s control.¹⁵ The Division noted that the commenter expressed concern that the clearing agency not be forced into insolvency in such circumstances.¹⁶ The Division stated that it “appreciate[d] a clearing agency’s possible need for temporary applications of a clearing fund in limited amounts to meet unexpected or

unusual requirements for funds,” but noted that “regular or substantial use of a clearing fund for such purposes, however, would be inappropriate.”¹⁷

At the time that the Commission published the 1980 Standards Release, clearing agencies operated in a very different manner from how FICC operates today. Clearing agencies were not, for example, subject to requirements with respect to maintaining any particular amount of operating capital.¹⁸ Against this background, it is understandable that the Division could have deemed the temporary access by a clearing agency to a limited amount of its clearing fund to cover operating expense shortfalls to be acceptable.

FICC is now subject to substantially enhanced requirements. On September 28, 2016, the Commission adopted amendments to Rule 17Ad-22 under the Act, including the addition of new section 17Ad-22(e), which specifies enhanced standards for covered clearing agencies.¹⁹ The new and enhanced standards specified in Rule 17Ad-22(e) require, among other things, that FICC “establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . maintain a sound risk management framework for comprehensively managing legal, credit, liquidity, operational, general business, investment, custody, and other risks that arise in or are borne by” FICC, including “plans for the recovery . . . of [FICC] necessitated by credit losses, liquidity shortfalls, losses from general business risk, or any other losses.”²⁰ Rule 17Ad-22(e) also requires FICC to maintain policies and procedures reasonably designed to “[i]dentify, monitor, and manage [its] general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that [it] can continue operations and services as a going concern if those losses

materialize.”²¹ The above requirement includes the requirement that FICC maintain “a viable plan . . . for raising additional equity should its equity fall below the amount required [to satisfy its operating capital requirement].”²²

FICC proposes to delete the language in Section 5 of MBSD Rule 4 that limits certain uses by FICC of the MBSD Clearing Fund to “unexpected or unusual” requirements for funds that represent a “small percentage” of the MBSD Clearing Fund because (i) the first instance of the limiting language could impair FICC’s access to the MBSD Clearing Fund as one tool (among many) that FICC could employ in order to manage non-default risks, so that it can withstand or recover from such risks and continue operations and services as a going concern while implementing its viable plan for raising additional capital, and (ii) the effect of the second instance of the limiting language is confusing and unclear.

Although, as noted above, FICC’s original objective in including the limiting language when it revised the MBSD Rules is not clear, the comments described in the 1980 Standards Release suggests two examples for which such language could have been intended: (i) Limiting FICC’s use of the MBSD Clearing Fund should an MBSD member experience an operational problem that caused a temporary delay in payment and (ii) limiting FICC’s use of the MBSD Clearing Fund should FICC suffer an operating funds shortfall to the point that FICC’s viability as a going concern became temporarily impaired.²³

The first example, however, is inconsistent with FICC’s broad and unlimited access to the MBSD Clearing Fund to satisfy “losses or liabilities . . . arising from the failure of a Defaulting Member . . .” and to use Clearing Fund deposits as collateral “to meet its temporary financing needs” with respect to securities settlement.²⁴ Additionally, FICC believes that both examples would represent a misreading of the objective of this discussion in the 1980 Standards Release, in which the Division stated that a clearing agency’s rules should provide that it may access its clearing fund to cover clearing agency losses, in addition to losses caused by a participant default, in an unrestricted manner “but not including

day-to-day operating expenses.”²⁵ In other words, it appears that the Division believed, at the time when the 1980 Standards Release was published, that a clearing agency *should* be permitted to access its clearing fund on a temporary basis to cover even short-term day-to-day operating losses if such use was necessary to avoid “going out of business” and such use was neither “regular” nor “substantial.”²⁶ FICC notes that it would be extraordinarily unlikely for it to access the MBSD Clearing Fund for such a purpose at the present time, because, as noted above, FICC is now subject to a requirement that it hold, at a minimum, capital equal to six months of operating expenses.²⁷ To summarize, the limiting language as currently included in the Rule would not be effective to limit FICC’s use of the MBSD Clearing Fund to address a temporary operational issue that caused a delay in payment by a participant, nor does FICC believe such limitation would have been intended. While the language would be effective to limit to small amounts FICC’s access to MBSD Clearing Fund deposits to cover temporary shortfalls in funds needed to meet day-to-day operating expenses, the utility of such a restriction has been eliminated by the new capital requirements to which FICC is subject.

FICC is concerned, however, that the limiting language could be interpreted to prevent FICC from accessing MBSD Clearing Fund deposits as a tool to address an unexpected short-term need for funds that would allow FICC to continue operations and services as a going concern while it implements other tools available to it, because such use may be deemed to be either “satisfaction of losses or liabilities of FICC,” even if the use of deposits is temporary, or the use of deposits as collateral is to meet “temporary financing needs” (see discussion below), both of which are impacted by the limiting language in the Rule. There are many tools that are available to FICC to address such a need for funds, which tools are described in the FICC Capital Plan PRC. The tools directly available to FICC include increasing fees or decreasing expenses, and FICC’s parent company, The

¹⁷ *Id.*

¹⁸ The 1980 Standards Release does not include specific financial requirements for clearing agencies. The Division stated that clearing agencies should provide financial statements to their participants on a periodic basis and that clearing agencies should plan for contingencies including (in relevant part) loss of funds, with respect to which the Division advised that clearing agencies should maintain adequate insurance. *See id.* at 41926–27 and 41929.

¹⁹ *See* Securities Exchange Act Release No. 78961 (September 28, 2016), 81 FR 70786 (October 13, 2016) (S7–03–14) (the “Covered Clearing Agency Standards Release”). FICC is a “covered clearing agency” as defined in Rule 17Ad-22(a)(5) and must comply with the new section (e) of Rule 17Ad-22 by April 11, 2017.

²⁰ 17 CFR 240.17Ad-22(e)(3).

²¹ 17 CFR 240.17Ad-22(e)(15). The capital requirement set forth in Rule 17Ad-22(e)(15) is equal to, at a minimum, six months of FICC’s current operating expenses. 17 CFR 240.17Ad-22(e)(15)(ii).

²⁴ MBSD Rule 4, Section 5.

²⁵ *See* 1980 Standards Release, *supra* note 12, at 41929.

²⁶ *Id.*

²⁷ On April 6, 2017, FICC submitted a proposed rule change to adopt a Clearing Agency Policy on Capital Requirements and a Clearing Agency Capital Replenishment Plan in connection with its compliance with Rule 17Ad-22(e)(15). *See* SR–FICC–2017–007 (the “FICC Capital Plan PRC”), which was filed with the Commission but has not yet been published in the **Federal Register**. A copy of the proposed rule change is available at <http://www.dtcc.com/legal/sec-rule-filings.aspx>.

Depository Trust & Clearing Corporation (“DTCC”),²⁸ may also implement tools available to it to raise capital that may be contributed to FICC.²⁹ While the FICC Capital Plan PRC does not contemplate recourse to either the GSD Clearing Fund or the MBSD Clearing Fund as a formal tool for capital replenishment, FICC believes that it would be imprudent to limit FICC’s ability to employ this tool, particularly on a temporary basis, and it is clear that this was not the Division’s objective when it discussed the underlying concerns in the 1980 Standards Release. Finally, FICC notes that FICC’s access to GSD Clearing Fund deposits is not so limited. While FICC believes that its use of either the MBSD Clearing Fund or the GSD Clearing Fund for such purposes would be extraordinarily unlikely, the distinction between the two rules creates an appearance of inequity between MBSD Members and GSD Netting Members.

FICC also proposes to delete the second instance of the limiting language and otherwise amend the “collateral” portion of Section 5 of MBSD Rule 4, for the reasons described above, to the extent that the second instance of the limiting language that appears in the Rule would limit FICC’s ability to pledge MBSD Clearing Fund deposits that are in the form of securities in order to meet temporary financing needs for purposes otherwise permitted by the Rule as FICC proposes to amend it. Section 5 of MBSD Rule 4 states that the MBSD Clearing Fund also may be used to provide FICC

a source of collateral both [*sic*] to meet its temporary financing needs (through an appropriate financing method determined by the Corporation in its sole discretion) for any financing that is obtained by the Corporation to hold securities pending settlement, to ensure the satisfaction of Members’ settlement obligations and to meet unexpected or unusual requirements for funds that represent a small percentage of the Clearing Fund.³⁰

This section of the Rule identifies that the MBSD Clearing Fund is a source of collateral for FICC to meet “temporary financing needs” (*i.e.*, where FICC may pledge the assets as collateral to a lender to FICC) and to ensure that Members perform to FICC (*i.e.*, where Members have pledged collateral to FICC as surety against their own default). This

understanding of the construction of the Rule is clear from comparison to Section 5 of GSD Rule 4, which also uses the word “both,” but where only the temporary financing example and the member surety example follow.³¹ It is reasonable to believe that the second instance of the limiting language in the MBSD Rule was simply intended to make clear that, to the extent FICC was permitted to use the MBSD Clearing Fund to address a particular loss or liability “otherwise incident to the clearance and settlement business,” FICC was also permitted to use MBSD Clearing Fund deposits as collateral to address “temporary financing needs” for the same purpose. If so, the same rationale for deleting the limiting language that is described above would apply.

Finally, with respect to both instances of the limiting language in the Rule, FICC is concerned that scenarios that previously may have been fairly described as generating “unexpected or unusual requirements for funds” may no longer be fairly described as “unexpected” or “unusual” given the expectations described in the Covered Clearing Agency Standards Release that covered clearing agencies contemplate and plan for such scenarios.³²

Consequently, FICC proposes to delete the limiting language in both places where it appears in MBSD Rule 4, Section 5, because the original purpose of the language is unclear, and potential applications of the limiting language may not have been intended or would not be, as a prudential matter, appropriate today. FICC also believes that, because of the uncertain intent of the language and the inherent ambiguity of terms such as “unexpected or unusual,” FICC’s use of MBSD Clearing Fund deposits to address needs that are “otherwise incident to [its] clearance and settlement business” could be subject to legal challenges. FICC believes that the limiting language could impair FICC’s compliance with Rule 17Ad-22(e)(3)(ii), pursuant to which FICC is preparing a recovery plan that provides for FICC’s management of a broad range of risks such that it can continue to provide critical clearance and settlement operations and services even if such risks materialize.³³ FICC also believes that, because of its unclear

purpose and the ambiguity of its terms, the limiting language could also impair FICC’s compliance with Rule 17Ad-22(e)(1), pursuant to which FICC is required to “establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . [p]rovide for a well-founded, clear, transparent and enforceable legal basis for each of its activities in all relevant jurisdictions.”³⁴

FICC also proposes to amend Section 5 of MBSD Rule 4 to make additional changes that would align the Rule to Section 5 of GSD Rule 4 (where applicable), remove superfluous words and correct grammar errors and sentence construction ambiguities in the paragraph of the Rule that FICC proposes to amend in order to delete the limiting language discussed above. The first instance of the limiting language modifies the phrase “otherwise incident to the clearance and settlement business” with the phrase “with respect to losses and liabilities to meet unexpected or unusual requirements for funds” FICC proposes that, upon deleting this phrase, “otherwise incident to the clearance and settlement business of the Corporation” would be followed immediately by “including losses and liabilities arising other than from such failure of such Member,” which would align the amended MBSD Rule to Section 5 of GSD Rule 4 but would not otherwise change the extent of FICC’s authority if the limiting language was deleted. FICC also proposes to replace the word “provide” with the word “providing” because “providing” would be grammatically correct where the sentence construction is that the use of MBSD Clearing Fund deposits “shall be limited to . . . satisfaction of losses or liabilities . . . and to [providing] the Corporation with a source of collateral.” Next, FICC proposes to add to the clause referring to temporary financing needs the modifier “including, without limitation,” and delete the parenthetical modifier “(through an appropriate financing method determined by the Corporation in its sole discretion) for” that currently precedes the reference to “financing that is obtained by the Corporation to hold securities pending settlement.” This change would delete a superfluous parenthetical clause and align the amended MBSD Rule to Section 5 of GSD Rule 4. Finally, FICC proposes to delete a comma and add the word “and” before the phrase “to ensure the satisfaction of Members’ settlement obligations,” because these changes would be grammatically

²⁸ DTCC operates on a shared services model with respect to FICC and its other subsidiaries. Most corporate functions are established and managed on an enterprise-wide basis pursuant to intercompany agreements.

³³ The Commission issued a temporary exemption from compliance with the recovery and wind-down plan requirements of Rule 17Ad-22(e)(3) and (e)(15) until December 31, 2017. Securities Exchange Act Release No. 80378 (April 5, 2017) (File No. S7-03-14).

³⁴ 17 CFR 240.17Ad-22(e)(1).

necessary upon deletion of the second instance of the limiting language. FICC also believes it is reasonable and appropriate to align the language of Section 5 of MBSD Rule 4 to Section 5 of GSD Rule 4, because it would avoid any question whether Section 5 of MBSD Rule 4 should be interpreted differently from Section 5 of GSD Rule 4. FICC does not believe that these sections should be interpreted differently, except as necessary with respect to differences that are specific to the services and defined terminology of each division.

2. Statutory Basis

FICC believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to FICC. In particular, FICC believes that the proposed rule change is consistent with Section 17A(b)(3)(F)³⁵ of the Act and Rule 17Ad-22(e) under the Act,³⁶ for the reasons described below.

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions.³⁷ The proposed rule change would enhance FICC's prompt and accurate clearance and settlement of securities transactions because it would enhance FICC's ability to ensure that it can continue its operations and services as a going concern in the unlikely event that it would be necessary or appropriate for FICC to access MBSD Clearing Fund deposits to address losses, liabilities or temporary financing needs incident to its clearance and settlement business. Additionally, the more technical aspects of the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions by removing potentially ambiguous language, correcting grammar errors, and deleting superfluous text in Section 5 of MBSD Rule 4, which changes would enhance the clarity of the Rule. The proposed rule change would also promote the prompt and accurate clearance and settlement of securities transactions by aligning Section 5 of MBSD Rule 4 to Section 5 of GSD Rule 4, which would reduce the risk of legal challenges to FICC's use of MBSD Clearing Fund deposits based upon the argument that differences between the two rules indicate that Section 5 of MBSD Rule 4

should be interpreted differently from Section 5 of GSD Rule 4.

FICC also believes that the proposed rule change is consistent Rule 17Ad-22(e)(1) and (3). Rule 17Ad-22(e)(1) requires FICC to "establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . [p]rovide for a well-founded, clear, transparent and enforceable legal basis for each of its activities in all relevant jurisdictions."³⁸ As described above, FICC believes that the proposed rule change to eliminate the limiting language described above would reduce the risk of legal challenges to FICC's ability to access MBSD Clearing Fund deposits under scenarios in which FICC believes that such limitation was not intended or in which such limitation would not be appropriate, as a prudential matter, in light of the enhanced standards to which FICC is now subject. The more technical aspects of the proposed rule change would also reduce the risk of legal challenges to FICC's actions that could be based upon grammar errors or differences between Section 5 of MBSD Rule 4 and Section 5 of GSD Rule 4. Rule 17Ad-22(e)(3) requires FICC to "establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . maintain a sound risk management framework for comprehensively managing legal, credit, liquidity, operational, general business, investment, custody, and other risks that arise in or are borne by" FICC, including "plans for the recovery . . . of [FICC] necessitated by credit losses, liquidity shortfalls, losses from general business risk, or any other losses."³⁹ The proposed rule change would enhance FICC's compliance with Rule 17Ad-22(e)(3) by enhancing and clarifying FICC's ability to access MBSD Clearing Fund deposits as one tool that it may employ in order to address losses, liabilities or temporary needs for funds incident to its clearance and settlement business. In particular, FICC believes that enhancing and clarifying FICC's ability to access MBSD Clearing Fund deposits in this manner and making the related more technical changes to Section 5 of MBSD Rule 4 would enhance FICC's comprehensive management of legal and operational risks, consistent with Rule 17Ad-22(e)(3)(i).⁴⁰ FICC also believes that enhancing and clarifying FICC's ability

to access MBSD Clearing Fund deposits to address such risks would enhance FICC's ability to establish and maintain appropriate recovery and orderly wind-down plans, as required by Rule 17Ad-22(e)(3)(ii),⁴¹ by enhancing and clarifying one tool that FICC may employ in order to address such risks.

(B) Clearing Agency's Statement on Burden on Competition

FICC believes that the proposed rule change to delete the limiting language in Section 5 of MBSD Rule 4 could have an impact upon competition. Specifically, as a result of the proposed rule change FICC's ability to access MBSD Clearing Fund deposits with respect to certain non-default losses would be expanded and clarified. Although FICC believes it is extraordinarily unlikely that FICC would find it necessary or appropriate to employ this tool in lieu of other tools that are available to FICC, if FICC were to access MBSD Clearing Fund deposits for this purpose, and such use became a loss or liability that was allocated to MBSD Members pursuant to Section 5 and Section 7 of MBSD Rule 4, such allocation could have a different financial impact upon MBSD Members than would be imposed by use of another tool that FICC could employ to address the underlying loss, liability, or temporary needs for funds incident to its clearance and settlement business. Accordingly, FICC believes that the proposed rule change to delete the limiting language in Section 5 of MBSD Rule 4 could burden competition. However, FICC does not believe that this aspect of the proposed rule changes would impose a significant burden on competition, both because it is extraordinarily unlikely that FICC would employ this tool and because FICC's access to MBSD Clearing Fund deposits for these purposes would, if employed, likely replace (possibly temporarily) alternative tools such as fee increases or capital-raising tools available to DTCC that would also have a financial impact on MBSD Members.

FICC believes that the above described potential burden on competition would be necessary and appropriate in furtherance of the Act, specifically Section 17A(b)(3)(F) of the Act,⁴² because, as described above, the proposed rule change would enhance FICC's prompt and accurate clearance and settlement of securities transactions by enhancing FICC's ability to ensure that it can continue its operations and services as a going concern, in the

³⁸ 17 CFR 240.17Ad-22(e)(1).

³⁹ 17 CFR 240.17Ad-22(e)(3).

⁴⁰ 17 CFR 240.17Ad-22(e)(3)(i). See also Covered Clearing Agency Standards Release, *supra* note 19, at 70810 (discussing guidelines that a covered clearing agency should consider with respect to its comprehensive risk management framework).

⁴¹ 17 CFR 240.17Ad-22(e)(3)(ii).

⁴² 15 U.S.C. 78q-1(b)(3)(F).

³⁵ 15 U.S.C. 78q-1(b)(3)(F).

³⁶ 17 CFR 240.17Ad-22(e).

³⁷ 15 U.S.C. 78q-1(b)(3)(F).

unlikely event that it would be necessary or appropriate for FICC to access MBSD Clearing Fund deposits to address losses, liabilities or temporary financing needs incident to its clearance and settlement business. FICC also believes that the proposed rule change to delete the limiting language in Section 5 of MBSD Rule 4 is necessary and appropriate in furtherance of the Act because it would (i) reduce the risk of legal challenges to FICC's ability to access MBSD Clearing Fund deposits under scenarios in which FICC believes that such limitation was not intended or in which, FICC believes, such limitation would not be appropriate, thereby supporting FICC's compliance with Rule 17Ad-22(e)(1),⁴³ (ii) enhance FICC's comprehensive management of legal and operational risks, thereby supporting FICC's compliance with Rule 17Ad-22(e)(3)(i),⁴⁴ and (iii) enhance FICC's ability to establish and maintain appropriate recovery and orderly wind-down plans, thereby supporting FICC's compliance with Rule 17Ad-22(e)(3)(ii).⁴⁵

FICC does not believe the additional changes to correct grammar errors, delete superfluous words and otherwise align the text of Section 5 of MBSD Rule 4 to the text of Section 5 of GSD Rule 4 would have any impact upon competition, because these proposed rule changes would enhance the clarity and grammatical accuracy of the Rule and therefore would not have an impact on MBSD members or impose any other potential burden on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

FICC has not received or solicited any written comments relating to this proposal. FICC will notify the Commission of any written comments received by FICC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-FICC-2017-010 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-FICC-2017-010. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FICC and on DTCC's Web site (<http://dtcc.com/legal/sec-rule-filings.aspx>). All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-FICC-2017-010 and should be submitted on or before May 19, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴⁶

Eduardo A. Aleman,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-80516; File No. SR-NYSEArca-2017-43]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending the NYSE Arca Equities Schedule of Fees and Charges for Exchange Services

April 24, 2017.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the "Act")² and Rule 19b-4 thereunder,³ notice is hereby given that, on April 20, 2017, NYSE Arca, Inc. (the "Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Arca Equities Schedule of Fees and Charges for Exchange Services ("Fee Schedule") to add a new pricing tier, the Large Order Tier, and to change pricing in Tier 3. The Exchange proposes to implement the fee changes effective April 20, 2017.⁴ The proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁴ The Exchange originally filed to amend the Fee Schedule on March 31, 2017 (SR-NYSEArca-2017-34) and withdrew such filing on April 10, 2017. On April 10, 2017, the Exchange re-filed to amend the Fee Schedule (SR-NYSEArca-2017-39) and withdrew such filing on April 20, 2017.

⁴⁴ 17 CFR 240.17Ad-22(e)(3)(i).

⁴⁵ 17 CFR 240.17Ad-22(e)(3)(ii).

⁴⁶ 17 CFR 200.30-3(a)(12).

statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule, as described below, to add a new pricing tier, the Large Order Tier, and change pricing in Tier 3. The proposed fee changes would be applicable to securities with a per share price of \$1.00 or above. The Exchange proposes to implement the fee changes on April 20, 2017.

Large Order Tier

Currently, ETP Holders, including Market Makers, are charged a fee of \$0.0010 per share for Market Orders,⁵ Market-On-Close ("MOC") Orders,⁶ Limit-On-Close ("LOC") Orders⁷ and Auction-Only Orders⁸ that are executed in the Closing Auction⁹ if the ETP Holder meets the current Tier 1, Tier 2 or Tier 3 requirements. ETP Holders that do not meet the Tier 1, Tier 2 or Tier 3 requirements are charged a fee of \$0.0012 per share for such orders, as provided in the Basic Rates section of the Fee Schedule. The Exchange is proposing a new pricing tier to incentivize large order flow to the Exchange. The proposed Large Order Tier fee of \$0.0010 per share would be applicable to ETP Holders, including Market Makers, that execute an average daily volume ("ADV") of 1,250,000 shares or greater of Market Orders, MOC Orders, LOC Orders and Auction-Only Orders executed in the Closing Auction from orders of 650,000 shares and

greater ("Large Closing Orders") and that have a ratio of Large Closing Order shares to total shares executed during the month of at least 35%.

For example, if, in a month, an ETP Holder has an ADV of 3,000,000 shares of Market, MOC, LOC, and Auction-Only orders that are executed in the Closing Auction, of which 2,000,000 shares are from Large Closing Orders, and a total ADV of 5,000,000 shares (all volume, including but not limited to orders that add liquidity, take liquidity, are routed to and executed at other markets, and are executed in the Core Open Auction¹⁰ and Closing Auction), such ETP Holder will have a ratio of Large Closing Orders to total shares executed during the month of 40% (2,000,000/5,000,000). Such ETP Holder would therefore meet the proposed requirements of the Large Order Tier and the Exchange would charge this ETP Holder a fee of \$0.0010 per share for the 2,000,000 shares from Large Closing Orders. The remaining 1,000,000 shares executed in the Closing Auction that are not from Large Closing Orders would be charged per the Exchange's current fees, *i.e.*, \$0.0010 per share if the ETP Holder meets the Tier 1, Tier 2 or Tier 3 requirements, or \$0.0012 per share under the Basic Rates section of the Fee Schedule.

The proposed fee for Large Closing Orders is the lowest fee applicable to ETP Holders, and would be equivalent to the fee charged for Market, MOC, LOC, and Auction-Only orders that are executed in the Closing Auction if an ETP Holder meets Tier 1, Tier 2 or Tier 3 requirements. For the ETP Holder in the example above, absent the proposed fee, the ETP Holder would be charged a fee of \$0.0010 per share for Market, MOC, LOC, and Auction-Only orders that are executed in the Closing Auction if that ETP Holder met Tier 1, Tier 2 or Tier 3 requirements, or \$0.0012 per share under the Basic Rates section of the Fee Schedule.

For ETP Holders that qualify for the proposed Large Order Tier, Tiered or Basic Rates would apply to all other fees and credits, based on the ETP Holder's qualifying levels, and if an ETP Holder qualifies for more than one tier in the Fee Schedule, the Exchange would apply the most favorable rate available under such tiers.

Tier 3

The Fee Schedule currently provides, in Tier 1 and Tier 2 sections, that a fee of \$0.0010 per share is charged for

Market, MOC, LOC and Auction-Only Orders executed in the Closing Auction. For Basic Rates customers, this fee is \$0.0012 per share.¹¹ Per the current Fee Schedule, Tier 3 customers are subject to the fee provided in the Basic Rates section of the Fee Schedule, or \$0.0012 per share. The Exchange proposes to modify the Tier 3 section of the Fee Schedule to include a \$0.0010 per share fee for Market, MOC, LOC and Auction-Only Orders executed in the Closing Auction for Tapes A, B and C.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,¹² in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,¹³ in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes the proposed Large Order Tier is reasonable and equitably allocated because it would apply to ETP Holders and Market Makers that execute large orders in the Exchange's Closing Auction and is designed to incentivize these market participants to increase the orders sent directly to the Exchange and therefore provide liquidity that supports the quality of price discovery and promotes market transparency. The Exchange believes the new Large Order Tier is equitable because it would be available to all similarly situated ETP Holders and Market Makers on an equal basis and provides a fee that is reasonably related to the value of an exchange's market quality associated with higher volumes. The Exchange believes that the Large Order Tier proposal is reasonable because it provides ETP Holders with an additional way to qualify for the same \$0.0010 fee for Market, MOC, LOC, and Auction-Only orders that are charged to tiered customers.

The Exchange further believes that the proposed Large Order Tier is reasonable, equitable and not unfairly discriminatory because providing pricing tiers that favor a particular segment of securities or type of activity

⁵ A Market Order is an unpriced order to buy or sell a stated amount of a security that is to be traded at the best price obtainable without trading through the NBBO. *See* Rule 7.31(a)(1).

⁶ A MOC Order is a Market Order that is to be traded only during the Closing Auction. *See* Rule 7.31(c)(4).

⁷ A LOC Order is a Limit Order that is to be traded only during the Closing Auction. *See* Rule 7.31(c)(3).

⁸ An Auction-Only Order is a Limit or Market Order that is to be traded only within an auction pursuant to Rule 7.35 or routed pursuant to Rule 7.34. Any quantity of an Auction-Only Order that is not traded in the designated auction is cancelled. *See* Rule 7.31(c).

⁹ The Closing Auction is conducted at the end of the Core Trading Session. *See* Rule 7.35(d).

¹⁰ The Core Open Auction is conducted at the beginning of the Core Trading Session. *See* Rule 7.35(c).

¹¹ This fee for Basic Rates customers was increased to \$0.0012 per share in June 2016. *See* Securities Exchange Act Release No. 77925 (May 26, 2016), 81 FR 35412 (June 2, 2016) (SR-NYSEArca-2016-78) ("June Fee Filing"). Prior to the June Fee Filing, the fee for Market, MOC, LOC and Auction-Only Orders executed in the Closing Auction was \$0.0010 per share for all customers.

¹² 15 U.S.C. 78f(b).

¹³ 15 U.S.C. 78f(b)(4) and (5).

is not unusual. For example, NYSE MKT LLC provides a higher per share credit on a per transaction basis for displayed liquidity when adding liquidity in orders that originally display a minimum of 2,000 shares.¹⁴

The Exchange believes that the proposed new pricing tier would create an added incentive for ETP Holders and Market Makers to execute large orders on the Exchange. The Exchange believes that the proposed change is equitable and not unfairly discriminatory because providing a lower fee as an incentives for orders in exchange-listed securities that are executed on a registered national securities exchange (rather than relying on certain available off-exchange execution methods) would contribute to investors' confidence in the fairness of their transactions and would benefit all investors by deepening the Exchange's liquidity pool, supporting the quality of price discovery, promoting market transparency and improving investor protection.

Tier 3 customers have always been charged a fee of \$0.0010 per share. The Exchange does not believe that there is any confusion among market participants with respect to the applicable Tier 3 fee for Market, MOC, LOC and Auction-Only Orders executed in the Closing Auction, but rather that the addition of the proposed language would serve to provide transparency in the Exchange's rules, and is an equitable allocation of reasonable fees. The Exchange believes that the addition of the proposed Tier 3 fee is consistent with Section 6(b)(5) of the Act in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by clarifying what fees apply for certain transactions and market participants.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,¹⁵ the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, the Exchange believes that the addition of the new Large Order Tier and the Tier 3 fee would encourage the submission of additional liquidity to a public exchange, thereby promoting price discovery and transparency and enhancing order execution opportunities for ETP Holders and Market Makers. The Exchange believes that this could promote competition between the Exchange and other execution venues, including those that currently offer similar order types and comparable transaction pricing, by encouraging additional orders to be sent to the Exchange for execution.

Finally, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and rebates to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees and credits in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. As a result of all of these considerations, the Exchange does not believe that the proposed changes will impair the ability of ETP Holders or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section

19(b)(3)(A)¹⁶ of the Act and subparagraph (f)(2) of Rule 19b-4¹⁷ thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁸ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSEArca-2017-43 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEArca-2017-43. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and

¹⁴ See NYSE MKT Equities Price List, Transaction Fees and Credits For Non-ETP Securities Traded Pursuant to Unlisted Trading Privileges at https://www.nyse.com/publicdocs/nyse/markets/nyse-mkt/NYSE_MKT_Equities_Price_List.pdf. See also Securities Exchange Act Release No. 66599 (March 14, 2012), 77 FR 16302 (March 20, 2012) (SR-NYSEAmex-2012-17). The proposed Large Order Tier omits a reference to the originally displayed size like the NYSE MKT credit because auction orders on the Exchange are submitted to the auction once and do not decrement in size. While it could be possible for a market order to receive a fill and resize, the Exchange believes that this would be extremely unlikely.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-80515; File No. SR-NYSEArca-2017-45]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Reflect a Change in the Index Methodology Applicable to the Virtus Enhanced U.S. Equity ETF Under NYSE Arca Equities Rule 5.2(j)(3)

April 24, 2017.

Pursuant to Section 19(b)(1) ¹ of the Securities Exchange Act of 1934 (the "Act") ² and Rule 19b-4 thereunder, ³ notice is hereby given that, on April 20, 2017, NYSE Arca, Inc. (the "Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to reflect a change in the index methodology applicable to the Virtus Enhanced U.S. Equity ETF ("Fund"). The Commission, pursuant to Section 19(b)(2) of the Act,

has previously approved listing and trading of shares of the Fund on the Exchange under NYSE Arca Equities Rule 5.2(j)(3). The proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Commission has approved the listing and trading on the Exchange of shares ("Shares") of the Fund, ⁴ under NYSE Arca Equities Rule 5.2(j)(3), which governs the listing and trading of Investment Company Units. The Exchange proposes to reflect a change in the index methodology applicable to the Fund from the index description in the Prior Notice, as described below. Shares of the Fund have not commenced trading on the Exchange as of the date of filing of this proposed rule change.

Index Methodology

As stated in the Prior Notice, the Fund's investment objective will be to seek investment results that, before fees and expenses, closely correspond to the price and yield performance of the Rampart Enhanced U.S. Equity Index (the "Index"). The Prior Notice stated that the Index is comprised of an equity portfolio enhanced by an "Options Strategy Overlay". The equity portfolio is comprised of the largest 400 U.S. exchange-listed stocks as measured by market capitalization. The portfolio is market capitalization-weighted and is

reconstituted and rebalanced on a quarterly basis. The Options Strategy Overlay uses an objective, rules-based methodology to transact in options linked to the S&P 500 Index (SPX). SPX options are traded on the Chicago Board Options Exchange. Each week, out of the money SPX put options and out of the money SPX call options are sold. The proceeds are used to buy an SPX call option. The strike prices of the options are systematically selected according to the prevailing volatility environment. In general, in higher volatility environments the short options will be struck farther out of the money.

The Exchange proposes to delete the representation in the eighth sentence of the preceding paragraph that proceeds are used to buy an SPX call option. Instead, proceeds from weekly sales of out-of-the-money SPX put and call options by the Fund (to the extent there are profits from such sales), as it attempts to meet its investment objective, will be collected by the Fund, and distributed periodically to shareholders, instead of such proceeds being used to purchase additional SPX call options. Between such distributions, there would be no additional exposure to SPX options via reinvestment in such options. Virtus ETF Advisers LLC (the "Adviser") represents that the proposed change to the Index methodology would provide a simplified strategy that emphasizes enhanced income to investors rather than enhanced total return.

There will be no change to the Fund's investment objective. Except for the change noted above, all other representations made in the Prior Releases remain unchanged.

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under Section 6(b)(5) ⁵ that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices, and is designed to promote just and equitable principles of trade and to protect investors and the public interest. Proceeds from weekly sales of out-of-the-money SPX put and call options by the Fund, as it attempts

¹⁹ 17 CFR 200.30-3(a)(12).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁴ See Securities Exchange Act Release No. 79402 (November 25, 2016), 81 FR 86760 (December 1, 2016) (SR-NYSEArca-2016-131) ("Prior Order"). See also Securities Exchange Act Release No. 79101 (October 14, 2016) (SR-NYSEArca-2016-131) (notice of filing of proposed rule change relating to listing on the Exchange of Shares of the Fund) ("Prior Notice" and, together with the Prior Order, the "Prior Releases").

⁵ 15 U.S.C. 78f(b)(5).

to meet its investment objective, will be distributed periodically to shareholders instead of such proceeds being used to purchase additional SPX call options.

The proposed rule change is designed to perfect the mechanism of a free and open market, and, in general, to promote just and equitable principles of trade and to protect investors and the public interest. The Adviser represents that, by not using proceeds of sales to add to exposure to SPX options in the Index, the proposed change to the Index methodology would provide a simplified strategy that emphasizes enhanced income to investors rather than enhanced total return. Except for the change noted above, all other representations in the Prior Releases remain unchanged.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposed rule change will enhance competition among issues of exchange-traded funds that invest in both U.S. exchange listed stocks and U.S. exchange-traded options to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁶ and subparagraph (f)(6) of Rule 19b-4 thereunder.⁷

A proposed rule change filed under Rule 19b-4(f)(6) normally does not become operative before 30 days from the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),⁸ the Commission may designate a shorter time if such

action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. The proposed rule change does not raise any regulatory issues. Additionally, waiver of the operative delay will allow the Adviser to pursue the Fund's investment objective in a consistent manner should the Exchange wish to commence trading in the Shares without delay. For these reasons, the Commission hereby waives the 30-day operative delay and designates the proposed rule change to be operative upon filing with the Commission.⁹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSEArca-2017-45 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.
- All submissions should refer to File Number SR-NYSEArca-2017-45. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's

⁹ For purposes only of waiving the operative delay for this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEArca-2017-45, and should be submitted on or before May 19, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁰

Eduardo A. Aleman,
Assistant Secretary.

DEPARTMENT OF STATE

[Public Notice: 9979]

Shipping Coordinating Committee; Notice of Public Meeting

The Shipping Coordinating Committee (SHC) will conduct an open meeting at 9:00 a.m. on Wednesday, June 28, 2017, in room 6110-01-b of the Douglas A. Munro Coast Guard Headquarters Building at St. Elizabeth's, 2703 Martin Luther King Jr. Avenue SE., Washington, DC 20593. The primary purpose of the meeting is to prepare for the seventy-first session of the International Maritime Organization's (IMO) Marine Environment Protection Committee to be held at the IMO Headquarters, United Kingdom, July 3-7, 2017.

The agenda items to be considered include:

- Adoption of the agenda
- Decisions of other bodies
- Consideration and adoption of amendments to mandatory instruments
- Harmful aquatic organisms in ballast water
- Air pollution and energy efficiency
- Further technical and operational measures for enhancing the energy efficiency of international shipping
- Reduction of GHG emissions from ships
- Identification and protection of Special Areas and PSSAs
- Pollution prevention and response (report of the fourth session of the Sub-Committee)
- Reports of other sub-committees
- Technical cooperation activities for the protection of the marine environment
- Capacity building for the implementation of new measures
- Application of the Committees' Guidelines
- Work program of the Committee and subsidiary bodies
- Election of the Chair and Vice-Chair for 2018
- Any other business
- Consideration of the report of the Committee

Members of the public may attend this meeting up to the seating capacity of the room. Upon request to the meeting coordinator, members of the public may also participate via teleconference, up to the capacity of the teleconference phone line. To access the teleconference line, participants should call (855) 475-2447 and use Participant Code: 993 678 424. To facilitate the building security process, and to request reasonable accommodation, those who

plan to attend should contact the meeting coordinator, LCDR Staci Weist, by email at Eustacia.y.weist@uscg.mil, by phone at (202) 372-1376, or in writing at 2703 Martin Luther King Jr. Ave. SE., Stop 7509, Washington, DC 20593-7509 no later than June 21, 2017. Requests made after June 21, 2017 might not be able to be accommodated.

Please note that due to security considerations, two valid, government issued photo identifications must be presented to gain entrance to the Coast Guard Headquarters building. It is recommended that attendees arrive to the Headquarters building no later than 30 minutes ahead of the scheduled meeting for the security screening process. The building is accessible by taxi, public transportation, and privately owned conveyance (upon request). Parking in the vicinity of the building is extremely limited and not guaranteed. Additional information regarding this and other SHC public meetings may be found at: www.uscg.mil/imo.

DEPARTMENT OF STATE

[Public Notice: 9978]

Shipping Coordinating Committee; Notice of Public Meeting

The Shipping Coordinating Committee (SHC) will conduct an open meeting at 9:00 a.m. on May 23, 2017, in the CDR Raymond J. Evans Conference Center, Room 6i10-01-a, of the Douglas A. Munro Coast Guard Headquarters Building at St. Elizabeth's, 2703 Martin Luther King Jr. Avenue SE., Washington, DC 20593. The primary purpose of the meeting is to prepare for the ninety-eighth session of the International Maritime Organization's (IMO) Maritime Safety Committee to be held at the IMO Headquarters, United Kingdom, June 7-16, 2017.

The agenda items to be considered include:

- Adoption of the agenda; report of credentials
- Decisions of other IMO bodies
- Consideration and adoption of amendments to mandatory instruments
- Early implementation/application of IMO instruments
- Measures to enhance maritime security
- Goal-based new ship construction standards

- Carriage of cargoes and containers (report of the third session of the Sub-Committee)
- Pollution prevention and response (report of the fourth session of the Sub-Committee)
- Human element, training and watch keeping (report of the fourth session of the Sub-Committee)
- Navigation, communications, search and rescue (report of the fourth session of the Sub-Committee)
- Ship systems and equipment (report of the fourth session of the Sub-Committee)
- Capacity building for the implementation of new measures
- Formal safety assessment
- Piracy and armed robbery against ships
- Unsafe mixed migration by sea
- Implementation of instruments and related matters
- Relations with other organizations
- Committee's organization and method of work
- Work program
- Any other business
- Consideration of the report of the Committee on its ninety-eighth session

Members of the public may attend this meeting up to the seating capacity of the room. Upon request to the meeting coordinator, members of the public may also participate via teleconference, up to the capacity of the teleconference phone line. To access the teleconference line, participants should call (202) 475-4000 and use Participant Code: 887 809 72. In order to ensure reasonable accommodation for all meeting participants, those who plan to attend should contact the meeting coordinator, LCDR Tiffany Duffy, by email at tiffany.a.duffy@uscg.mil, by phone at (202) 372-1376, or in writing at 2703 Martin Luther King Jr. Ave. SE., Stop 7509, Washington, DC 20593-7509 no later than May 15, 2017. Requests made after May 15, 2017 might not be able to be accommodated.

Please note that due to security considerations, two valid, government issued photo identifications must be presented to gain entrance to the Coast Guard Headquarters building. It is recommended that attendees arrive to the Headquarters building no later than 30 minutes ahead of the scheduled meeting for the security screening process. The Headquarters building is accessible by taxi, public transportation, and privately owned conveyance (upon request). Parking in the vicinity of the building is extremely limited and not guaranteed. BILLING CODE 4710-09-P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 35283 (Sub-No. 1)]

The Indiana Rail Road Company— Amended Trackage Rights Exemption—CSX Transportation, Inc.

Pursuant to a written Supplemental Agreement, dated February 16, 2017, The Indiana Rail Road Company (INRD) seeks to acquire approximately 30.6 miles of limited and amended overhead trackage rights from CSX Transportation, Inc. (CSXT),¹ between the INRD-CSXT connection near INRD's Senate Avenue Yard and CSXT's Avon Yard in Indianapolis, Ind. INRD presently holds overhead trackage rights over the subject lines, which it can utilize in conjunction with specified categories of traffic.² INRD states that the proposed transaction would amend those existing trackage rights to allow INRD to handle interchange traffic between CSXT and Louisville & Indiana Railroad Company in intermediate switching service.

The additional restricted overhead trackage rights to be acquired are over the following CSXT line segments: (1) Between the INRD-CSXT connection south of INRD's Senate Avenue Yard at milepost QIB 5.3 and the Hamilton Connection at milepost QIB 9.0, a distance of approximately 3.7 miles; (2) over CSXT's Hamilton Connection between milepost QIB 9.0 and milepost BD 122.0, a distance of approximately 0.5 miles; (3) between milepost BD 122.0 and milepost QS 12.5 at CP AN near the west end of Avon Yard, a distance of approximately 14.4 miles, with two milepost equations where milepost BD 123.7 = milepost QI 283.7 and milepost QI 283.9 = milepost QS 0.0; (4) between milepost QSC 0.7 at CP IJ and milepost QSC 8.6 at CP South

¹ INRD is indirectly controlled by CSXT and operates as an independent Class II rail carrier.

² Pursuant to an August 22, 1996 trackage rights agreement and a September 1, 2009 Supplemental Agreement between INRD and CSXT, INRD holds trackage rights over several CSXT line segments in the Indianapolis terminal for the purpose of handling certain limited categories of overhead traffic. See *Ind. R.R.—Trackage Rights Exemption—CSX Transp., Inc.*, FD 35283 (STB served Sept. 3, 2009); *Ind. R.R.—Trackage Rights Exemption—Consol. Rail Corp.*, FD 33380 (STB served Apr. 30, 1997).

Hunt, a distance of approximately 7.9 miles, connecting at both ends with Line Segment #3; (5) between milepost QSL 1.7 at CP Dale and milepost QSL 0.0 at CP IU, a distance of approximately 1.7 miles, connecting Line Segment #1 to Line Segment #3; and (6) between milepost QSS 106.9 at Belt Crossing and milepost QSS 109.3 at CP IU, a distance of approximately 2.4 miles, connecting Line Segment #1 to Line Segment #3.

The earliest this transaction may be consummated is May 13, 2017, the effective date of the exemption (30 days after the verified notice of exemption was filed).

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk & Western Railway—Trackage Rights—Burlington Northern, Inc.*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Railway—Lease & Operate—California Western Railroad*, 360 I.C.C. 653 (1980).

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Stay petitions must be filed by May 5, 2017 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. 35283 (Sub-No. 1), must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, a copy of each pleading must be served on Thomas J. Litwiler, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 920, Chicago, IL 60606-2832.

Board decisions and notices are available on our Web site at “WWW.STB.GOV.”

Decided: April 25, 2017.

By the Board, Rachel D. Campbell,
Director, Office of Proceedings.

Raina S. Contee,
Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Aviation Rulemaking Advisory Committee (ARAC)—ARAC Input To Support Regulatory Reform of Aviation Regulations—New Task**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of a new task assignment for the Aviation Rulemaking Advisory Committee (ARAC).

SUMMARY: The FAA assigned the Aviation Rulemaking Advisory Committee (ARAC) a new task to consider (1) recommendations on existing regulations that are good candidates for repeal, replacement, or modification and (2) recommendations on regulatory action identified in FAA's regulatory agenda. Pursuant to the February 24, 2017, Executive Order titled "Enforcing the Regulatory Reform Agenda," each agency is required to establish a Regulatory Reform Task Force (RRTF) to evaluate existing regulations, and make recommendations for their repeal, replacement, or modification. As part of this process, the RRTF is required to seek input/assistance from entities significantly affected by its regulations. Since the ARAC's membership represents a broad spectrum of entities significantly affected the FAA's regulations, the Department, through the FAA, assigned this task to ARAC. This notice informs the public of the new ARAC activity.

FOR FURTHER INFORMATION CONTACT: Nikeita Johnson, Management and Program Analyst, Federal Aviation Administration, Room 810, 800 Independence Avenue SW., Washington, DC 20591, Nikeita.Johnson@faa.gov, (202) 267-4977.

SUPPLEMENTARY INFORMATION:**ARAC Acceptance of Task**

At the April 20, 2017, ARAC meeting, the FAA assigned and ARAC accepted this task to evaluate the FAA's regulations in Title 14 of the Code of Federal Regulations to determine any and all regulations that should be repealed, replaced or modified, and to provide feedback on the regulatory actions identified in the FAA's regulatory agenda. ARAC will then provide advice and recommendations on the assigned task and submit a recommendation report to the FAA.

Background

The FAA established ARAC to provide information, advice, and

recommendations on aviation related issues that could result in rulemaking to the FAA Administrator, through the Associate Administrator of Aviation Safety.

Improvement of regulations is a continuous focus for the Department. Accordingly, the Department regularly makes a conscientious effort to review its rules in accordance with the Department's 1979 Regulatory Policies and Procedures (44 FR 11034, 2/26/1979), Executive Order 12866, Executive Order 13563, and section 610 of the Regulatory Flexibility Act. Through two new Executive Orders, President Trump directed agencies to further scrutinize its regulations. On January 30, 2017, President Trump signed an Executive Order titled "Reducing Regulation and Controlling Regulatory Costs (EO)." Under Section 2a of that Executive Order, unless prohibited by law, whenever an executive department or agency publicly proposes for notice and comment or otherwise promulgates a new regulation, it shall identify at least two existing regulations to be repealed.

In addition, on February 24, 2017, President Trump signed Executive Order 13777 titled "Enforcing the Regulatory Reform Agenda." Under this Executive Order, each agency is required to establish a Regulatory Reform Task Force (RRTF) to evaluate existing regulations, and make recommendations for their repeal, replacement, or modification. As part of this process, the Department is directed to seek input/assistance from entities significantly affected by its regulations.

Accordingly, the Department, through the FAA, tasked ARAC to consider (1) recommendations on existing regulations that are good candidates for repeal, replacement, or modification and (2) recommendations on regulatory action identified in FAA's regulatory agenda.

The Task

The ARAC is tasked to:

1. Evaluate the FAA's regulations in Title 14 of the Code of Federal Regulations to determine any and all regulations that should be repealed, replaced or modified. This evaluation will attempt to identify regulations that:
 - a. Eliminate jobs, or inhibit job creation;
 - b. Are outdated, unnecessary, or ineffective;
 - c. Impose costs that exceed benefits; or
 - d. Create a serious inconsistency or otherwise interfere with regulatory reform initiatives and policies.
 For purposes of this evaluation, a regulation means any regulatory

provision and could include a regulatory section (e.g., § 121.xxx), paragraph (e.g., § 121.xxx(y)), or subparagraph (e.g., § 121.xxx(y)(z)).

2. Provide a detailed explanation for recommending the repeal, replacement or modification of each regulation. This explanation will include any examples of why the regulation falls into one or more of the categories listed in paragraph 1.

3. Provide quantitative data on the costs and benefits of either repealing, replacing or modifying each regulation in the recommendation report.

4. Review the FAA's current regulatory actions identified in the regulatory agenda, and provide feedback on the current program as appropriate.

5. Develop both an initial report and an addendum report containing recommendations on the findings and results of the tasks explained above. This data will be provided in two recommendation reports. In the first recommendation report, ARAC will provide a list of regulations that are considered to address the criteria of paragraph 1 of this tasking. A second addendum recommendation report will provide details to supplement the first submittal by ARAC to the FAA, and will provide the additional and detailed data as described in paragraph 2, 3 and 4 of this tasking.

a. The recommendation report should document both majority and dissenting positions on the findings and the rationale for each position.

b. Any disagreements should be documented, including the rationale for each position and the reasons for the disagreement.

Schedule

This tasking notice requires two recommendation reports.

- The initial recommendation report must be submitted to the FAA no later than June 1, 2017, to allow for consideration of ARAC approval at the June 15, 2017 meeting.

After the initial recommendation report is submitted, the addendum recommendation report must be submitted to the FAA no later August 31, 2017, to allow for consideration of ARAC approval at the September 14, 2017, meeting. The Secretary of Transportation determined the formation and use of the ARAC is necessary and in the public interest in connection with the performance of duties imposed on the FAA by law. ARAC meetings are open to the public.

Issued in Washington, DC, on April 21, 2017.

Dale Bouffiou,

*Alternate Designated Federal Officer,
Aviation Rulemaking Advisory Committee.*

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[FHWA Docket No. FHWA-2017-0006]

Fixing America's Surface Transportation Act (FAST Act); Equal Access for Over-the-Road Buses

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice; request for comment.

SUMMARY: The FHWA invites interested parties to review and comment on definitions and applicable facilities related to requirements contained in Section 1411(a) and (b) of the Fixing America's Surface Transportation (FAST) Act regarding the treatment of over-the-road buses (OTRBs). In addition, FHWA invites interested parties to review and comment on a listing of covered Section 129 Federal-aid toll facilities in the United States.

DATES: Comments must be received by May 30, 2017.

ADDRESSES: To ensure that you do not duplicate your docket submissions, please submit them by only one of the following means:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov> and follow the online instructions for submitting comments.

- *Mail:* U.S. Department of Transportation, Dockets Management Facility, Room W12-140, 1200 New Jersey Ave. SE., Washington, DC 20590-0001.

- *Hand Delivery:* West Building Ground Floor, Room W12-140, 1200 New Jersey Ave. SE., between 9 a.m. 5p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 366-9329.

All comments must include the docket number DOT-FHWA-2017-0006 at the beginning of the submission.

Electronic Access: This document may be viewed online through the Federal eRulemaking portal at: <http://www.regulations.gov>. Electronic submission and retrieval help and guidelines are available on the Web site. It is available 24 hours each day, 365 days each year. Please follow the instructions. An electronic copy of this document may also be downloaded

from the Office of the Federal Register's Web site at: <http://www.archives.gov/federalregister> and the Government Publishing Office's Web site at: <http://www.gpo.gov/fdsys>.

FOR FURTHER INFORMATION CONTACT: Ms. Cynthia Essenmacher, Federal Tolling Program Manager, Center for Innovative Finance Support, Office of Innovative Program Delivery, Federal Highway Administration, 315 W. Allegan St., Room 201, Lansing, MI 48933, (517) 702-1856. For legal questions: Mr. Steven Rochlis, Office of the Chief Counsel, Federal Highway Administration, 1200 New Jersey Avenue SE., Washington, DC 20590, (202) 366-1395. Office hours are from 8:00 a.m. to 4:30 p.m. E.T., Monday through Friday, except for Federal holidays.

SUPPLEMENTARY INFORMATION:

Table of Contents

- A. Background
- B. Applicable Definitions for Implementing Section 1411 of the FAST Act
- C. Covered Facilities Subject to OTRB Equal Access
- D. Covered Section 129 Facilities List
- E. Request for Comment

A. Background

The FAST Act includes a number of provisions that modify Federal requirements related to high-occupancy vehicle (HOV) facilities and the tolling of highways. Sections 1411(a) and (b) of the FAST Act contained new requirements regarding the treatment of over-the-road buses (OTRBs) that access toll highways and HOV facilities. Specifically, the FAST Act amended 23 U.S.C. 129 and 23 U.S.C. 166 to address access to toll or HOV facilities for OTRBs.

For HOV facilities, 23 U.S.C. 166(b)(3) was amended by the FAST Act, adding subparagraph (C) to grant HOV authorities an exception to allow public transportation vehicles (which FHWA interprets to include all public transportation vehicles, including public transportation buses) that do not meet the minimum occupancy requirements to use HOV lanes, but only if the HOV authority also gives equal access to OTRBs that serve the public. Under this exception provided in 23 U.S.C. 166(b), HOV authorities may allow all public transportation vehicles to use HOV lanes, whether they meet the minimum occupancy requirements, as long as they provide equal access to OTRBs serving the public, under the same rates, terms, and conditions as all other public transportation vehicles.

Additionally, 23 U.S.C. 166(b)(4)(C) was also amended by the FAST Act,

adding subparagraph (iii), to grant HOV authorities the alternative to toll vehicles not meeting the minimum occupancy requirements in HOV lanes. In that case, HOV authorities are required to provide access to OTRBs that serve the public under the same rates, terms, and conditions as public transportation buses (which FHWA interprets to exclude other types of public transportation vehicles, which may be treated differently by the HOV authority). Similarly, on toll facilities subject to 23 U.S.C. 129, the FAST Act amended 23 U.S.C. 129(a) by adding paragraph (9) to also require that OTRBs that serve the public be provided access to the toll facility under the same rates, terms, and conditions as public transportation buses.

In preparing guidance to assist in the implementation of Section 1411 of the FAST Act, FHWA considered how to define key terms in Section 1411 as well as which facilities are governed by the new requirements. The FHWA is seeking comment on implementation of these terms as they relate to FAST Act Section 1411 amendments to 23 U.S.C. 129 and 166.

B. Applicable Definitions for Implementing Section 1411 of the FAST Act

For the purposes of implementing FAST Act Section 1411 amendments to 23 U.S.C. 129 and 166, FHWA intends to use definitions where they exist in relevant statutes and regulations. Where FHWA found no existing definition, such as for the term "public transportation bus," FHWA developed a definition based on its interpretation of Congress's intent. The definitions for the key terms, are:

"Over-the-road bus" is defined as a bus characterized by an elevated passenger deck located over a baggage compartment. *Source:* As amended by FAST Act Section 1411, 23 U.S.C. 129(a)(10)(C) and 23 U.S.C. 166(f)(4) define this term, giving it the same meaning as in Section 301 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12181).

"Public Transportation Bus" is a category of public transportation vehicle (as defined in 23 U.S.C. 166(f)(6)), consisting of a motor vehicle with motive power, except a trailer, designed for carrying more than 10 persons. *Source:* The FHWA developed this definition by drawing upon definitions of similar or related terms. The FHWA incorporated the definition of "public transportation vehicle" in 23 U.S.C. 166(f)(6), and the definition of "bus" in 49 CFR 571.3.

“*Public Transportation Vehicle*” means a vehicle that (A) provides designated public transportation (as defined in section 221 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12141)) or provides public school transportation (to and from public or private primary, secondary, or tertiary schools); and (B)(i) is owned or operated by a public entity; (ii) is operated under a contract with a public entity; or (iii) is operated pursuant to a license by the Secretary or a State agency to provide motorbus or school vehicle transportation services to the public. *Source:* This term is defined in 23 U.S.C. 166(f)(6).

“*Serve/Serving the Public*” means provision of service to the general public, including general or special service (including charter service) on a regular and continuing basis. *Source:* This term has a similar meaning as the term “designated public transportation” in Section 221 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12141).

“*Toll Facility*” means a toll highway, bridge, or tunnel or approach to the highway, bridge, or tunnel constructed under 23 U.S.C. 129(a). *Source:* This term has the same meaning as the term is given in 23 U.S.C. 129(a)(10)(E).

C. Covered Facilities Subject to OTRB Equal Access

Section 129 Facilities

Section 1411(a) of the FAST Act amends 23 U.S.C. 129 to provide that, “An over-the-road bus that serves the public shall be provided access to a toll facility under the same rates, terms, and conditions as public transportation buses.” 23 U.S.C. 129(a)(9). A toll facility is defined in 23 U.S.C. 129(a)(10)(E) (as amended by the FAST Act) as: “a toll highway, bridge, or tunnel or approach to the highway, bridge, or tunnel constructed under [section 129(a)].”

Facilities “constructed under” Section 129 includes both facilities subject to Section 129 tolling agreements executed prior to the Moving Ahead for Progress in the 21st Century Act (MAP-21)(Pub. L. 112–141) (which eliminated the statutory requirement for a Section 129 toll agreement), and facilities that have become (or will become) subject to Section 129 post-MAP-21 (which may, or may not, have a tolling Memorandum of Understanding with FHWA). This would include a facility that either uses Federal-aid funds on an existing toll facility in accordance with Section 129(a), or imposes tolls on a facility

constructed with Federal-aid funds pursuant to Section 129(a).

Section 166 Facilities

For HOV facilities under 23 U.S.C. 166, Section 1411(b) of the FAST Act added Section 166(b)(3)(C), which requires any authority that allows public transportation vehicles to use an HOV facility to provide equal access to the facility under the same rates, terms, and conditions for all public transportation vehicles and OTRBs serving the public. The FAST Act also added Section 166(b)(4)(C)(iii), which provides that if an authority operates HOT lanes that allow vehicles not otherwise exempt under 23 U.S.C. 166(b) to pay a toll to use the facility, the authority must ensure that OTRBs serving the public are provided access to the facility under the same rates, terms, and conditions as public transportation buses.

Under 23 U.S.C. 166(f)(2), the term “HOV facility” means a high occupancy vehicle facility. There are no exclusions or exceptions under this definition based on Federal-aid participation in the construction or operation of the HOV facility. Therefore, FHWA believes amendments made by Section 1411 of the FAST Act are applicable to all Section 166 HOV facilities, regardless of Federal-aid participation in the project.

D. Covered Section 129 Facilities List

The Section 129 Covered Facilities list can be found on the docket for this **Federal Register** Notice. Federal-aid toll facilities that were constructed under other Federal tolling authorities and not subject to Section 1411 of the FAST Act are also included in the docket list of covered facilities for reference. Other Federal tolling authorities include the Surface Transportation and Uniform Relocation Assistance Act of 1987 (Pub. L. 100–17) and the Intermodal Surface Transportation Efficiency Act of 1991 (Pub. L. 102–240).

The FHWA invites comment on the accuracy and completeness of the list of facilities subject to OTRB equal access.

E. Request for Comment

The FHWA is seeking public comment on the following specific sections of this **Federal Register** Notice:

- (1) Applicable definitions for implementing Section 1411 of the FAST Act,
- (2) Covered facilities subject to OTRB equal access, and
- (3) OTRB Section 129 Covered Facilities list.

The OTRB Section 129 Covered Facilities list can be found on the docket for this **Federal Register** Notice.

Commenters are encouraged to address any or all of the areas listed above. Commenters are also encouraged to provide specific information on toll facilities subject to OTRB requirements that are not included on the Section 129 Covered Facilities-OTRB list. Commenters may also describe why they believe certain facilities should be included in the Section 129 Covered Facilities-OTRB list. This description should include such information as the facility name, location, route designation, and owner/operator.

Commenters are also encouraged to focus on matters within the control of FHWA. (Matters not within the control of FHWA include such items as HOV occupancy requirements at specific facilities, setting of toll rates, or Federal Transit Administration laws.) The FHWA will consider public comment before adopting its final guidance on OTRBs.

Issued on: April 24, 2017.

Walter C. Waidelich, Jr.,
Acting Deputy Administrator, Federal Highway Administration.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket Number NHTSA–2016–0131]

Reports, Forms and Recordkeeping Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), U.S. Department of Transportation.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) this notice announces NHTSA has submitted to the Office of Management and Budget (OMB) a request for emergency clearance and review for existing information collection 2127–0025. Approval of this collection is essential to the mission of the agency.

While NHTSA has requested a temporary emergency clearance for this collection, the agency is also in the process of requesting a full clearance for this collection and has already published a 30-day **Federal Register** notice requesting comment. This notice repeats that request for comments.

DATES: Comments on the already published request for comments must be received on or before May 22, 2017. We

have requested that OMB take action on the emergency collection by April 30, 2017.

ADDRESSES: Send comments, by May 22, 2017, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention: NHTSA Desk Officer.

FOR FURTHER INFORMATION CONTACT:

Michael Kuppersmith, National Highway Traffic Safety Administration, Office of the Chief Counsel (NCC-0010), (202) 366-5263, 1200 New Jersey Avenue SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: NHTSA has requested emergency Paperwork Reduction Act clearance for its confidential business information collection (2127-0025) given the agency's current collection expires April 30, 2017, and use of this collection is essential to the mission of the agency. NHTSA published a 60-day renewal for this collection on December 28, 2016 (81 FR 95729), and received no comments. NHTSA published a 30-day notice for this collection on April 21, 2017 (82 FR 18825), and the comment period remains open until May 22, 2017. The agency again requests any comments from the public on this request by that date.

NHTSA expects that it will receive approximately 500 requests for confidentiality per year. With an estimated eight hours of preparation to collect and provide the information for each request, at an assumed rate of \$24.92 per hour, the annual estimated cost of collecting and preparing the information necessary for 500 complete requests for confidential treatment is about \$99,680 (8 hours of preparation × 500 requests × \$24.92). Adding in a postage cost of \$3,325 (500 requests at a cost of \$6.65 for postage (priority flat rate envelope from USPS)), we estimate that it will cost \$103,005 per year for persons to prepare and submit the information necessary to satisfy the confidential business information provisions of 49 CFR part 512.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is most effective if OMB receives it by May 22, 2017.

Issued in Washington, DC, under authority delegated in 49 CFR 1.95.

Jack Danielson,

Acting Deputy Administrator, NHTSA.

[FR Doc. 2017-08641 Filed 4-27-17; 8:45 am]

BILLING CODE 4910-59-P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Sanctions Actions Pursuant to Executive Order 13582

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of 271 persons whose property and interests in property are blocked pursuant to E.O. 13582.

DATES: OFAC's actions described in this notice were effective on April 24, 2017.

FOR FURTHER INFORMATION CONTACT:

OFAC: Associate Director for Global Targeting, tel.: 202-622-2420; Assistant Director for Sanctions Compliance & Evaluation, tel.: 202-622-2490; Assistant Director for Licensing, tel.: 202-622-2480; Assistant Director for Regulatory Affairs, tel. 202-622-4855; or the Department of the Treasury's Office of the General Counsel: Office of the Chief Counsel (Foreign Assets Control), tel.: 202-622-2410.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The Specially Designated Nationals and Blocked Persons List and additional information concerning OFAC sanctions programs are available on OFAC's Web site (www.treasury.gov/ofac).

Notice of OFAC Actions

On April 24, 2017, OFAC designated the following 271 persons pursuant to section 1(b)(i) of E.O. 13582, "Blocking Property of the Government of Syria and Prohibiting Certain Transactions with Respect to Syria" (E.O. 13582) for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services in support of, the Government of Syria, a person whose property and interests in property are blocked pursuant to E.O. 13582. OFAC also designated the following 271 persons pursuant to section 1(b)(ii) of E.O. 13582 for having acted or purported to act for or on behalf of, directly or indirectly,

Government of Syria, a person whose property and interests in property are blocked pursuant to E.O. 13582:

BILLING CODE 4810-AL-P

DEPARTMENT OF THE TREASURY

Multiemployer Pension Plan Application To Reduce Benefits

AGENCY: Department of the Treasury.

ACTION: Notice of availability; request for comments.

SUMMARY: The Board of Trustees of the Alaska Ironworkers Pension Trust, a multiemployer pension plan, has submitted an application to reduce benefits under the plan in accordance with the Multiemployer Pension Reform Act of 2014. The purpose of this notice is to announce that the application submitted by the Board of Trustees of the Alaska Ironworkers Pension Trust has been published on the Treasury Web site, and to request public comments on the application from interested parties, including participants and beneficiaries, employee organizations, and contributing

employers of the Alaska Ironworkers Pension Trust.

DATES: Comments must be received by June 12, 2017.

ADDRESSES: You may submit comments electronically through the Federal eRulemaking Portal at <http://www.regulations.gov>, in accordance with the instructions on that site. Electronic submissions through www.regulations.gov are encouraged.

Comments may also be mailed to the Department of the Treasury, MPRA Office, 1500 Pennsylvania Avenue NW., Room 1224, Washington, DC 20220. Attn: Eric Berger. Comments sent via facsimile and email will not be accepted.

Additional Instructions. All comments received, including attachments and other supporting materials, will be made available to the public. Do not include any personally identifiable information (such as Social Security number, name, address, or other contact information) or any other information in your comment or supporting materials that you do not want publicly disclosed. Treasury will make comments available for public inspection and copying on www.regulations.gov or upon request. Comments posted on the Internet can be retrieved by most Internet search engines.

FOR FURTHER INFORMATION CONTACT: For information regarding the application from the Alaska Ironworkers Pension Trust, please contact Treasury at (202) 622-1534 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The Multiemployer Pension Reform Act of 2014 (MPRA) amended the Internal Revenue Code to permit a multiemployer plan that is projected to have insufficient funds to reduce pension benefits payable to participants and beneficiaries if certain conditions are satisfied. In order to reduce benefits, the plan sponsor is required to submit an application to the Secretary of the Treasury, which Treasury, in consultation with the Pension Benefit Guaranty Corporation (PBGC) and the Department of Labor, is required to approve or deny.

On March 30, 2017, the Board of Trustees of the Alaska Ironworkers Pension Trust submitted an application for approval to reduce benefits under the plan. As required by MPRA, that application has been published on Treasury's Web site at <https://auth.treasury.gov/services/Pages/Plan-Applications.aspx>. Treasury is publishing this notice in the **Federal Register**, in consultation with the PBGC and the Department of Labor, to solicit

public comments on all aspects of the Alaska Ironworkers Pension Trust application.

Comments are requested from interested parties, including participants and beneficiaries, employee organizations, and contributing employers of the Alaska Ironworkers Pension Trust. Consideration will be given to any comments that are timely received by Treasury.

Dated: April 25, 2017.

Robert J. Neis,

Benefits Tax Counsel, Office of Tax Policy.

DEPARTMENT OF THE TREASURY

Multiemployer Pension Plan Application To Reduce Benefits

AGENCY: Department of the Treasury.

ACTION: Notice of availability; request for comments.

SUMMARY: The Board of Trustees of the International Association of Machinists Motor City Pension Fund (IAM Motor City Pension Fund), a multiemployer pension plan, has submitted an application to reduce benefits under the plan in accordance with the Multiemployer Pension Reform Act of 2014. The purpose of this notice is to announce that the application submitted by the Board of Trustees of the IAM Motor City Pension Fund has been published on the Treasury Web site, and to request public comments on the application from interested parties, including participants and beneficiaries, employee organizations, and contributing employers of the IAM Motor City Pension Fund.

DATES: Comments must be received by June 12, 2017.

ADDRESSES: You may submit comments electronically through the Federal eRulemaking Portal at <http://www.regulations.gov>, in accordance with the instructions on that site. Electronic submissions through www.regulations.gov are encouraged.

Comments may also be mailed to the Department of the Treasury, MPRA Office, 1500 Pennsylvania Avenue NW., Room 1224, Washington, DC 20220. Attn: Eric Berger. Comments sent via facsimile and email will not be accepted.

Additional Instructions. All comments received, including attachments and other supporting materials, will be made available to the public. Do not include any personally identifiable information (such as Social

Security number, name, address, or other contact information) or any other information in your comment or supporting materials that you do not want publicly disclosed. Treasury will make comments available for public inspection and copying on www.regulations.gov or upon request. Comments posted on the Internet can be retrieved by most Internet search engines.

FOR FURTHER INFORMATION CONTACT: For information regarding the application from the IAM Motor City Pension Fund, please contact Treasury at (202) 622-1534 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The Multiemployer Pension Reform Act of 2014 (MPRA) amended the Internal Revenue Code to permit a multiemployer plan that is projected to have insufficient funds to reduce pension benefits payable to participants and beneficiaries if certain conditions are satisfied. In order to reduce benefits, the plan sponsor is required to submit an application to the Secretary of the Treasury, which Treasury, in consultation with the Pension Benefit Guaranty Corporation (PBGC) and the Department of Labor, is required to approve or deny.

On March 29, 2017, the Board of Trustees of the IAM Motor City Pension Fund submitted an application for approval to reduce benefits under the plan. As required by MPRA, that application has been published on Treasury's Web site at <https://auth.treasury.gov/services/Pages/Plan-Applications.aspx>. Treasury is publishing this notice in the **Federal Register**, in consultation with the PBGC and the Department of Labor, to solicit public comments on all aspects of the IAM Motor City Pension Fund application.

Comments are requested from interested parties, including participants and beneficiaries, employee organizations, and contributing employers of the IAM Motor City Pension Fund. Consideration will be given to any comments that are timely received by Treasury.

BILLING CODE 4810-25-P

DEPARTMENT OF VETERANS AFFAIRS

Notice of Meeting of the Cooperative Studies Scientific Evaluation Committee

The Department of Veterans Affairs gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2, that the Cooperative Studies Scientific Evaluation Committee will hold a meeting on June 29, 2017, at the American Association of Airport Executives, 601 Madison Street, Alexandria, VA. The meeting will begin at 8:30 a.m. and end at 12:30 p.m.

The Committee advises the Chief Research and Development Officer on the relevance and feasibility of proposed projects and the scientific validity and propriety of technical details, including protection of human subjects.

The session will be open to the public for approximately 30 minutes at the start of the meeting for the discussion of administrative matters and the general status of the program. The remaining portion of the meeting will be closed to the public for the Committee's review, discussion, and evaluation of research and development applications.

During the closed portion of the meeting, discussions and recommendations will deal with qualifications of personnel conducting the studies, staff and consultant critiques of research proposals and similar documents, and the medical records of patients who are study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. As provided by section 10(d) of Public Law 92-463, as amended, closing portions of this meeting is in accordance with 5 U.S.C. 552b(c)(6) and (c)(9)(B).

The Committee will not accept oral comments from the public for the open portion of the meeting. Those who plan to attend or wish additional information should contact Dr. Grant Huang, Acting Director, Cooperative Studies Program (10P9CS), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, at (202) 443-5700 or by email at grant.huang@va.gov. Those wishing to submit written comments may send them to Dr. Huang at the same address and email.

Dated: April 25, 2017.

LaTonya L. Small, Ed.D.,

Federal Advisory Committee Management Officer.

BILLING CODE 8320-01-P

DEPARTMENT OF VETERANS AFFAIRS**Notice of Availability of a Final Environmental Impact Statement for a Replacement Robley Rex Veterans Affairs Medical Center, Louisville, Kentucky****AGENCY:** Department of Veterans Affairs.**ACTION:** Notice of availability.

SUMMARY: The Department of Veterans Affairs (VA) announces the availability of the Final Environmental Impact Statement (EIS) for the siting, construction, and operation of a new campus to replace the existing Robley Rex VA Medical Center (VAMC), Veterans Benefits Administration (VBA) regional office, and three community-based outpatient clinics (CBOC) in Louisville, Kentucky. Pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended, the Council on Environmental Quality's (CEQ's) regulations for implementing the procedural provisions of NEPA, and VA's NEPA regulations titled "Environmental Effects of the Department of Veterans Affairs Actions," VA has considered comments received on the Draft EIS, which was issued in October 2016 and identifies VA's preferred alternative in the Final EIS.

DATES: VA will publish a Record of Decision no sooner than 30 days after publication of the U.S. Environmental Protection Agency's Notice of Availability in the **Federal Register**.

ADDRESSES: The 2017 Final EIS is available for viewing on the Web site www.louisville.va.gov/newmedicalcenter/. Copies are also available at the St. Matthews and Westport Branches of the Louisville Free Public Library located at 3940 Grandview Avenue, Louisville, KY 40207 and 8100 Westport Road, Louisville, KY 40222.

FOR FURTHER INFORMATION CONTACT: Replacement VAMC Activation Team Office, 800 Zorn Avenue, Louisville, KY 40206 or by email to LouisvilleReplacementHospitalComments@va.gov.

SUPPLEMENTARY INFORMATION: VA plans to site, construct, and operate a VAMC and VBA regional office to replace the existing Robley Rex VAMC located on

Zorn Avenue in Louisville, KY. The existing 63-year-old VAMC facilities have reached the end of their serviceable lives and need to be replaced. The existing building conditions and site configuration are inadequate to effectively and efficiently meet the expanding needs of VA's health care mission in the region. The replacement campus will include diagnostic and treatment facilities and required site amenities and improvements needed to provide sufficient capacity to meet the current and projected future health care needs of Veterans in the Louisville service area.

In the Final EIS, VA has analyzed the environmental impacts of three alternatives for the replacement VAMC. Alternative A proposes construction and operation of a replacement VAMC campus at the Brownsboro Site at 4906 Brownsboro Road, Louisville, KY. Alternative B would construct and operate a replacement VAMC campus at the St. Joseph site on a parcel located east of I-265 and south of Factory Lane in Louisville, KY. Alternative C is the No Action alternative, which would consist of not constructing and operating a new replacement VAMC and VBA but continuing to operate the existing Louisville VAMC at 800 Zorn Avenue, all eight CBOCs and the VBA regional office at 321 West Main Street. The No Action alternative is required by NEPA and its regulations and also provided a baseline for comparing potential impacts from the action alternatives.

VA's preferred alternative is Alternative A, the construction and operation of a replacement VAMC campus at the Brownsboro Site at 4906 Brownsboro Road, in Louisville, KY. VA will relocate medical facility operations to the Brownsboro Site from Zorn Avenue and a later process will evaluate the future use or disposition of the Zorn Avenue property.

Environmental topics addressed in the Final EIS include aesthetics, air quality, cultural resources, geology and soils, hydrology and water quality, wildlife and habitat, noise, land use, floodplains and wetlands, socioeconomic, community services, solid waste and hazardous materials, transportation and parking, utilities, and environmental justice.

Best management practices and mitigation measures that could alleviate environmental effects have been considered and are included where relevant within the Final EIS. Unavoidable adverse impacts include effects to air quality, aesthetics, noise, land use, solid waste and hazardous materials, utilities, and transportation and traffic. With the exception of aesthetics and land use, implementation of specified mitigation measures, including the Kentucky Transportation Cabinet's planned construction (2019) of the single point urban interchange (SPUI) at the KY 22 Brownsboro site location, would substantially decrease the magnitude of these impacts.

The Final EIS considers comments on the Draft EIS, including those submitted during the public comment period that officially began on October 27, 2016, and ended on January 11, 2017, following a 30-day comment period extension that VA determined was sufficient in response to requests from the public for a 60-day extension.

The 2017 Replacement Robley Rex VAMC Final EIS is available for viewing on the VA Web site at www.louisville.va.gov/newmedicalcenter/ and at the St. Matthews and Westport Branches of the Louisville Free Public Library located at 3940 Grandview Avenue, Louisville, KY 40207 and 8100 Westport Road, Louisville, KY 40222, respectively. Information related to the EIS process is also available for viewing on the VA Web site at www.louisville.va.gov/newmedicalcenter/.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on April 21, 2017, for publication.

Dated: April 21, 2017.

Jeffrey Martin,

Office Program Manager, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

[CMS-1677-P]

RIN 0938-AS98

Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Proposed Policy Changes and Fiscal Year 2018 Rates; Quality Reporting Requirements for Specific Providers; Medicare and Medicaid Electronic Health Record (EHR) Incentive Program Requirements for Eligible Hospitals, Critical Access Hospitals, and Eligible Professionals; Provider-Based Status of Indian Health Service and Tribal Facilities and Organizations; Costs Reporting and Provider Requirements; Agreement Termination Notices

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing to revise the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals to implement changes arising from our continuing experience with these systems for FY 2018. Some of these proposed changes would implement certain statutory provisions contained in the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013, the Improving Medicare Post-Acute Care Transformation Act of 2014, the Medicare Access and CHIP Reauthorization Act of 2015, the 21st Century Cures Act, and other legislation. We also are making proposals relating to the provider-based status of Indian Health Service (IHS) and Tribal facilities and organizations and to the low-volume hospital payment adjustment for hospitals operated by the IHS or a Tribe. In addition, we are providing the proposed estimated market basket update that would apply to the rate-of-increase limits for certain hospitals excluded from the IPPS that are paid on a reasonable cost basis subject to these limits for FY 2018. We are proposing to update the payment policies and the annual payment rates for the Medicare prospective payment system (PPS) for inpatient hospital services provided by long-term care hospitals (LTCHs) for FY 2018.

In addition, we are proposing to establish new requirements or revise existing requirements for quality reporting by specific Medicare providers (acute care hospitals, PPS-exempt cancer hospitals, LTCHs, and inpatient psychiatric facilities). We also are proposing to establish new requirements or revise existing requirements for eligible professionals (EPs), eligible hospitals, and critical access hospitals (CAHs) participating in the Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs. We are proposing to update policies relating to the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program.

We also are proposing changes relating to transparency of accrediting organization survey reports and plans of correction of providers and suppliers; electronic signature and electronic submission of the Certification and Settlement Summary page of the Medicare cost reports; and clarification of provider disposal of assets.

DATES: *Comment Period:* To be assured consideration, comments must be received at one of the addresses provided in the **ADDRESSES** section, no later than 5 p.m. EDT on June 13, 2017.

ADDRESSES: In commenting, please refer to file code CMS-1677-P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (no duplicates, please):

1. *Electronically.* You may (and we encourage you to) submit electronic comments on this regulation to <http://www.regulations.gov>. Follow the instructions under the “submit a comment” tab.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1677-P, P.O. Box 8011, Baltimore, MD 21244-1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments via express or overnight mail to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1677-P, Mail Stop C4-26-05, 7500 Security Boulevard, Baltimore, MD 21244-1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier)

your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445-G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244-1850.

If you intend to deliver your comments to the Baltimore address, please call the telephone number (410) 786-7195 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, we refer readers to the beginning of the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: <http://www.regulations.gov>. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection, generally beginning approximately 3 weeks after publication of the rule, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244, on Monday through Friday of each week from 8:30 a.m. to 4:00 p.m. EST. To schedule an appointment to view public comments, phone 1–800–743–3951.

Electronic Access

This **Federal Register** document is available from the **Federal Register** online database through Federal Digital System (FDsys), a service of the U.S. Government Printing Office. This database can be accessed via the Internet at: <http://www.gpo.gov/fdsys>.

Tables Available Only Through the Internet on the CMS Web Site

In the past, a majority of the tables referred to throughout this preamble and in the Addendum to the proposed rule and the final rule were published in the **Federal Register** as part of the annual proposed and final rules. However, beginning in FY 2012, some of the IPPS tables and LTCH PPS tables are no longer published in the **Federal Register**. Instead, these tables generally will be available only through the Internet. The IPPS tables for this proposed rule are available through the Internet on the CMS Web site at: <http://www.cms.hhs.gov/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>. Click on the link on the left side of the screen titled, “FY 2018 IPPS Proposed Rule Home Page” or “Acute Inpatient—Files for Download”. The LTCH PPS tables for this FY 2018 proposed rule are available through the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/LongTermCareHospitalPPS/index.html> under the list item for Regulation Number CMS–1677–P. For further details on the contents of the tables referenced in this proposed rule,

we refer readers to section VI. of the Addendum to this proposed rule.

Readers who experience any problems accessing any of the tables that are posted on the CMS Web sites identified above should contact Michael Treitel at (410) 786–4552.

- a. Moving Procedure Codes From MS–DRGs 981 Through 983 or MS–DRGs 987 Through 989 Into MDCs
- b. Reassignment of Procedures Among MS–DRGs 981 Through 983, 984 Through 986, and 987 Through 989
15. Proposed Changes to the ICD–10–CM and ICD–10–PCS Coding Systems
16. Proposed Replaced Devices Offered Without Cost or With a Credit
 - a. Background
 - b. Proposed Changes for FY 2018
17. Other Proposed Policy Changes: Other Operating Room (O.R.) and Non-O.R. Issues
 - a. O.R. Procedures to Non-O.R. Procedures
 - b. Revision of Neurostimulator Generator
 - c. External Repair of Hymen
 - d. Non-O.R. Procedures in MDC 17 (Myeloproliferative Diseases and Disorders Poorly Differentiated Neoplasms)
- G. Recalibration of the Proposed FY 2018 MS–DRG Relative Weights
 1. Data Sources for Developing the Relative Weights
 2. Methodology for Calculation of the Relative Weights
 3. Development of National Average CCRs
- H. Proposed Add-On Payments for New Services and Technologies for FY 2018
 1. Background
 2. Public Input Before Publication of a Notice of Proposed Rulemaking on Add-On Payments
 3. ICD–10–PCS Section “X” Codes for Certain New Medical Services and Technologies
 4. Proposal To Revise Reference to an ICD–9–CM Code in § 412.87(b)(2) of the Regulations
 5. Proposed FY 2018 Status of Technologies Approved for FY 2017 Add-On Payments
 - a. CardioMEMS™ HF (Heart Failure) Monitoring System
 - b. Defitelio® (Defibrotide)
 - c. GORE® EXCLUDER® Iliac Branch Endoprosthesis (IBE)
 - d. Idarucizumab
 - e. Lutonix® Drug Coated Balloon PTA Catheter and In.PACT™ Admiral™ Paclitaxel Coated Percutaneous Transluminal Angioplasty (PTA) Balloon Catheter
 - f. MAGEC® Spinal Bracing and Distraction System (MAGEC® Spine)
 - g. Vistogard™ (Uridine Triacetate)
 - h. Blinatumomab (BLINCYTO™ Trade Brand)
 6. FY 2018 Applications for New Technology Add-On Payments
 - a. Bezlotoxumab (ZINPLAVA™)
 - b. EDWARDS INTUITY Elite™ Valve System (INTUITY) and Liva Nova Perceval Valve (Perceval)
 - c. Ustekinumab (Stelara®)
 - d. KTE–C19 (Axicabtagene Ciloleucel)
 - e. VYXEOS™ (Cytarabine and Daunorubicin Liposome for Injection)
 - f. GammaTile™
- III. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals
 - A. Background
 1. Legislative Authority
 2. Core-Based Statistical Areas (CBSAs) for the Proposed FY 2018 Hospital Wage Index
3. Codes for Constituent Counties in CBSAs
- B. Worksheet S–3 Wage Data for the Proposed FY 2018 Wage Index
 1. Included Categories of Costs
 2. Excluded Categories of Costs
 3. Use of Wage Index Data by Suppliers and Providers Other Than Acute Care Hospitals Under the IPPS
- C. Verification of Worksheet S–3 Wage Data
- D. Method for Computing the Proposed FY 2018 Unadjusted Wage Index
 1. Proposed Methodology for FY 2018
 2. Clarification of Other Wage Related Costs in the Wage Index
- E. Proposed Occupational Mix Adjustment to the FY 2018 Wage Index
 1. Use of 2013 Occupational Mix Survey for the FY 2018 Wage Index
 2. Use of the 2016 Medicare Wage Index Occupational Mix Survey for the FY 2019 Wage Index
 3. Calculation of the Proposed Occupational Mix Adjustment for FY 2018
- F. Analysis and Implementation of the Proposed Occupational Mix Adjustment and the Proposed FY 2018 Occupational Mix Adjusted Wage Index
- G. Proposed Application of the Rural, Imputed, and Frontier Floors
 1. Proposed Rural Floor
 2. Proposed Expiration of the Imputed Floor Policy
 3. Proposed State Frontier Floor for FY 2018
- H. Proposed FY 2018 Wage Index Tables
- I. Revisions to the Wage Index Based on Hospital Redesignations and Reclassifications
 1. General Policies and Effects of Reclassification and Redesignation
 2. MGCRB Reclassification and Redesignation Issues for FY 2018
 - a. FY 2018 Reclassification Requirements and Approvals
 - b. Extension of PRA Information Collection Requirement Approval for MGCRB Applications
 3. Proposed Deadline for Submittal of Documentation of Sole Community Hospital (SCH) and Rural Referral Center (RRC) Classification Status to the MGCRB
 - d. Clarification of Special Rules for SCHs and RRCs Reclassifying to Geographic Home Area
 3. Redesignations Under Section 1886(d)(8)(B) of the Act
 4. Proposed Changes to the 45-Day Notification Rules
- J. Proposed Out-Migration Adjustment Based on Commuting Patterns of Hospital Employees
- K. Reclassification From Urban to Rural Under Section 1886(d)(8)(E) of the Act Implemented at 42 CFR 412.103
- L. Clarification of Application Deadline for Rural Referral Center (RRC) Classification
- M. Proposed Process for Requests for Wage Index Data Corrections
 1. Process for Hospitals To Accept Wage Index Data Corrections
2. Process for Wage Index Data Corrections by CMS After the January Public Use File (PUF)
 - N. Proposed Labor Market Share for the Proposed FY 2018 Wage Index
- IV. Proposed Rebasings and Revising of the Hospital Market Baskets for Acute Care Hospitals
 - A. Background
 - B. Rebasings and Revising the IPPS Market Basket
 1. Development of Cost Categories and Weights
 - a. Use of Medicare Cost Report Data
 - b. Final Major Cost Category Computation
 - c. Derivation of the Detailed Cost Weights
 2. Selection of Proposed Price Proxies
 3. Labor-Related Share
 - C. Market Basket for Certain Hospitals Presently Excluded From the IPPS
 - D. Rebasings and Revising the Capital Input Price Index (CPII)
- V. Other Decisions and Proposed Changes to the IPPS for Operating System
 - A. Proposed Changes to MS–DRGs Subject to Postacute Care Transfer and MS–DRG Special Payment Policies
 - B. Proposed Changes in the Inpatient Hospital Updates for FY 2018 (§ 412.64(d))
 1. Proposed FY 2018 Inpatient Hospital Update
 2. Proposed FY 2018 Puerto Rico Hospital Update
 - C. Proposed Change to Volume Decrease Adjustment for Sole Community Hospitals (SCHs) and Medicare-Dependent, Small Rural Hospitals (MDHs) (§ 412.92)
 1. Background
 2. Proposed Changes to the Volume Decrease Adjustment Calculation Methodology for SCHs
 - D. Rural Referral Centers (RRCs): Proposed Annual Updates to Case-Mix Index (CMI) and Discharge Criteria (§ 412.96)
 1. Case-Mix Index (CMI)
 2. Discharges
 - E. Proposed Payment Adjustment for Low-Volume Hospitals (§ 412.101)
 1. Expiration of Temporary Changes to Low-Volume Hospital Payment Policy
 2. Background
 3. Proposed Payment Adjustment for FY 2018 and Subsequent Fiscal Years
 4. Proposed Parallel Low-Volume Hospital Payment Adjustment Regarding Hospitals Operated by the Indian Health Service (IHS) or a Tribe
 - F. Indirect Medical Education (IME) Payment Adjustment (§ 412.105)
 - G. Proposed Payment Adjustment for Medicare Disproportionate Share Hospitals (DSHs) for FY 2018 (§ 412.106)
 1. General Discussion
 2. Eligibility for Empirically Justified Medicare DSH Payments and Uncompensated Care Payments
 3. Empirically Justified Medicare DSH Payments
 4. Uncompensated Care Payments
 - a. Proposed Calculation of Factor 1 for FY 2018
 - b. Proposed Calculation of Factor 2 for FY 2018

(1) Background

- (2) Proposed Methodology for Calculation of Factor 2 for FY 2018
- c. Calculation of Proposed Factor 3 for FY 2018
 - (1) Background
 - (2) Proposed Data Source for FY 2018
 - (3) Proposed Time Period for Calculating Factor 3 for FY 2018, Including Methodology for Incorporating Worksheet S–10 Data
 - (4) Methodological Considerations for Calculating Factor 3
 - (5) Methodological Considerations for Incorporating Worksheet S–10 Data
- H. Medicare-Dependent, Small Rural Hospital (MDH) Program (§ 412.108)
 - 1. Background for the MDH Program
 - a. Expiration of the MDH Program
 - I. Hospital Readmissions Reduction Program: Proposed Updates and Changes (§§ 412.150 Through 412.154)
 - 1. Statutory Basis for the Hospital Readmissions Reduction Program
 - 2. Regulatory Background
 - 3. Maintenance of Technical Specifications for Quality Measures
 - 4. Proposed Policies for the Hospital Readmissions Reduction Program
 - 5. Proposed Applicable Period for FY 2018
 - 6. Proposed Calculation of Aggregate Payments for Excess Readmissions for FY 2018
 - 7. Background and Current Payment Adjustment Methodology
 - a. Background
 - b. Current Payment Adjustment Methodology
 - 8. Provisions for the Proposed Payment Adjustment Methodology for FY 2019: Proposed Methodology for Calculating the Proportion of Dual Eligible Patients
 - a. Background
 - b. Proposed Data Sources Used To Determine Dual Eligibility
 - c. Proposed Data Period Used To Define Dual Eligibility
 - 9. Provision for the Proposed Payment Adjustment Methodology for FY 2019: Proposed Methodology for Assigning Hospitals to Peer Groups
 - 10. Provisions for the Proposed Payment Adjustment Methodology for FY 2019: Proposed Payment Adjustment Formula Calculation Methodology
 - a. Background
 - b. Proposals
 - c. Analysis
 - 11. Accounting for Social Risk Factors in the Hospital Readmissions Reduction Program
 - 12. Extraordinary Circumstance Exception (ECE) Policy
 - 13. Timeline for Public Reporting of Excess Readmission Ratios on *Hospital Compare* for the FY 2018 Payment Determination
 - J. Hospital Value-Based Purchasing (VBP) Program: Proposed Policy Changes
 - 1. Background
 - a. Statutory Background and Overview of Past Program Years
 - b. FY 2018 Program Year Payment Details
 - 2. Accounting for Social Risk Factors in the Hospital VBP Program
 - 3. Retention and Removal of Quality Measures for the FY 2019 Program Year
 - a. Retention of Previously Adopted Hospital VBP Program Measures
 - b. Proposed Removal of the PSI 90 Measure
 - c. Summary of Previously Adopted Measures and Proposed Measure for Removal for the FY 2019 and FY 2020 Program Years
 - 4. Proposed New Measures for the FY 2022 Program Year, FY 2023 Program Year, and Subsequent Years
 - a. Proposed New Measure for the FY 2022 Program Year and Subsequent Years: Hospital-Level, Risk-Standardized Payment Associated With a 30-Day Episode-of-Care for Pneumonia (PN Payment)
 - b. Proposed New Measure for the FY 2023 Program Year and Subsequent Years: Patient Safety and Adverse Events (Composite) (NQF #0531)
 - 5. Previously Adopted and Proposed Baseline and Performance Periods
 - a. Background
 - b. Person and Community Engagement Domain
 - c. Efficiency and Cost Reduction Domain
 - d. Safety Domain
 - e. Clinical Care Domain
 - f. Summary of Previously Adopted and Proposed Baseline and Performance Periods for the FY 2019 Through FY 2023 Program Years
 - 6. Proposed Performance Standards for the Hospital VBP Program
 - a. Background
 - b. Previously Adopted and Proposed Performance Standards for the FY 2020 Program Year
 - c. Previously Adopted Performance Standards for Certain Measures for the FY 2021 Program Year
 - d. Previously Adopted and Proposed Performance Standards for Certain Measures for the FY 2022 Program Year
 - e. Proposed Performance Standards for Certain Measures for the FY 2023 Program Year
 - 7. Scoring Methodology and Data Requirements for the FY 2019 Program Year and Subsequent Years
 - a. Proposed Domain Weighting for the FY 2020 Program Year and Subsequent Years for Hospitals That Receive a Score on All Domains
 - b. Proposed Domain Weighting for the FY 2019 Program Year and Subsequent Years for Hospitals Receiving Scores on Fewer Than Four Domains
 - c. Minimum Numbers of Cases for Hospital VBP Program Measures for the FY 2019 Program Year and Subsequent Years
 - d. Weighting Measures Within the Efficiency and Cost Reduction Domain
 - K. Proposed Changes to the Hospital-Acquired Condition (HAC) Reduction Program
 - 1. Background
 - 2. Implementation of the HAC Reduction Program for FY 2018
 - 3. Proposed Data Collection Time Periods for the FY 2020 HAC Reduction Program
 - 4. Request for Comments on Additional Measures for Potential Future Adoption
 - 5. Accounting for Social Risk Factors in the HAC Reduction Program
- 6. Request for Comments on Inclusion on Disability and Medical Complexity for CDC NHSN Measures
- 7. Maintenance of Technical Specifications for Quality Measures
- 8. Extraordinary Circumstances Exception (ECE) Policy for the HAC Reduction Program
- L. Rural Community Hospital Demonstration Program
 - 1. Introduction
 - 2. Background
 - 3. Provisions of the 21st Century Cures Act (Pub. L. 114–255) and Proposals for Implementation
 - a. Statutory Provisions
 - b. Proposed Terms of Continuation for Previously Participating Hospitals
 - c. Solicitation for Additional Participants
 - 4. Budget Neutrality
 - a. Statutory Budget Neutrality Requirement
 - b. Methodology Used in Previous Final Rules
 - c. Proposed Budget Neutrality Methodology for Extension Period Authorized by the 21st Century Cures Act (Pub. L. 114–255)
 - d. Alternative Budget Neutrality Approach
 - e. Reconciling Actual and Estimated Costs of the Demonstration for Previous Years (2011, 2012, and 2013)
- M. Payments for Services in Inpatient and Outpatient Settings
 - 1. Adjustment to IPPS Rates Resulting From the 2-Midnight Policy for FY 2018
 - 2. Eliminating Inappropriate Medicare Payment Differentials for Similar Services in the Inpatient and Outpatient Settings
- N. Provider-Based Status of Indian Health Service and Tribal Facilities and Organizations
- O. Request for Information Regarding Physician-Owned Hospitals
- VI. Proposed Changes to the IPPS for Capital-Related Costs
 - A. Overview
 - B. Additional Provisions
 - 1. Exception Payments
 - 2. New Hospitals
 - 3. Payments for Hospitals Located in Puerto Rico
 - C. Proposed Annual Update for FY 2018
- VII. Proposed Changes for Hospitals Excluded From the IPPS
 - A. Proposed Rate-of-Increase in Payments To Excluded Hospitals for FY 2018
 - B. Proposed Revisions to Hospital-Within-Hospital Regulations
 - C. Critical Access Hospitals (CAHs)
 - 1. Background
 - 2. Frontier Community Health Integration Project (FCHIP) Demonstration
 - 3. Physician Certification Requirement for Payment of Inpatient CAH Services Under Medicare Part A
 - a. Background
 - b. Notice Regarding Changes to Instructions for the Review of the CAH 96-Hour Certification Requirement
- VIII. Proposed Changes to the Long-Term Care Hospital Prospective Payment System (LTCH PPS) for FY 2018
 - A. Background of the LTCH PPS
 - 1. Legislative and Regulatory Authority
 - 2. Criteria for Classification as an LTCH

- a. Classification as an LTCH
 - b. Hospitals Excluded From the LTCH PPS
 3. Limitation on Charges to Beneficiaries
 4. Administrative Simplification Compliance Act (ASCA) and Health Insurance Portability and Accountability Act (HIPAA) Compliance
 - B. Proposed Medicare Severity Long-Term Care Diagnosis-Related Group (MS-LTC-DRG) Classifications and Relative Weights for FY 2018
 1. Background
 2. Patient Classifications Into MS-LTC-DRGs
 - a. Background
 - b. Proposed Changes to the MS-LTC-DRGs for FY 2018
 3. Development of the Proposed FY 2018 MS-LTC-DRG Relative Weights
 - a. General Overview of the Development of the MS-LTC-DRG Relative Weights
 - b. Development of the Proposed MS-LTC-DRG Relative Weights for FY 2018
 - c. Data
 - d. Hospital-Specific Relative Value (HSRV) Methodology
 - e. Treatment of Severity Levels in Developing the MS-LTC-DRG Relative Weights
 - f. Proposed Low-Volume MS-LTC-DRGs
 - g. Steps for Determining the Proposed FY 2018 MS-LTC-DRG Relative Weights
 - C. Proposed Changes to the LTCH PPS Payment Rates and Other Proposed Changes to the LTCH PPS for FY 2018
 1. Overview of Development of the LTCH PPS Standard Federal Payment Rates
 2. Proposed FY 2018 LTCH PPS Standard Federal Payment Rate Annual Market Basket Update
 - a. Overview
 - b. Proposed Annual Update to the LTCH PPS Standard Federal Payment Rate for FY 2018
 - c. Proposed Adjustment to the LTCH PPS Standard Federal Payment Rate Under the Long-Term Care Hospital Quality Reporting Program (LTCH QRP)
 - d. Proposed Annual Update Under the LTCH PPS for FY 2018
 - D. Proposed Changes to the Short-Stay Outlier Adjustment Policy (§ 412.529)
 - E. Temporary Exception to the Site Neutral Payment Rate for Certain Spinal Cord Specialty Hospitals
 - F. Temporary Exception to the Site Neutral Payment Rate for Certain Discharges With Severe Wounds Form Certain LTCHs
 - G. Moratorium and Proposed Regulatory Delay of the Full Implementation of the "25-Percent" Threshold Policy" Adjustment (§ 412.538)
 - H. Revision to Moratorium on Increasing Beds in Existing LTCH or LTCH Satellite Locations Under the 21st Century Cures Act (Pub. L. 114-255) (§ 412.23)
 - I. Proposed Changes to the Average Length of Stay Criterion Under the 21st Century Cures Act (Pub. L. 114-255)
 - J. Change in Medicare Classification for Certain Hospitals (§ 412.23)
 - IX. Quality Data Reporting Requirements for Specific Providers and Suppliers
 - A. Hospital Inpatient Quality Reporting (IQR) Program
 1. Background
 - a. History of the Hospital IQR Program
 - b. Maintenance of Technical Specifications for Quality Measures
 - c. Public Display of Quality Measures
 - d. Accounting for Social Risk Factors in the Hospital IQR Program
 2. Retention of Previously Adopted Hospital IQR Program Measures for Subsequent Payment Determinations
 3. Removal and Suspension of Previously Adopted Hospital IQR Program Measures
 4. Previously Adopted Hospital IQR Program Measures for the FY 2019 Payment Determination and Subsequent Years
 5. Considerations in Expanding and Updating of Quality Measures
 6. Refinements to Existing Measures in the Hospital IQR Program for the FY 2020 Payment Determination and Subsequent Years
 - a. Refining Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Survey (NQF #0166) for the FY 2020 Payment Determination and Subsequent Years
 - b. Refinement of the Hospital 30-Day, All-Cause, Risk-Standardized Mortality Rate (RSMR) Following Acute Ischemic Stroke Hospitalization Measure for the FY 2023 Payment Determination and Subsequent Years
 - c. Summary of Previously Adopted Hospital IQR Program Measures for the FY 2020 Payment Determination and Subsequent Years
 7. Proposed Voluntary Hybrid Hospital-Wide Readmission Measure With Claims and Electronic Health Record Data (NQF #2879)
 - a. Background
 - b. Proposal for Voluntary Reporting of Electronic Health Record Data for the Hybrid HWR Measure (NQF #2879)
 - c. Data Sources
 - d. Outcome
 - e. Cohort
 - f. Inclusion and Exclusion Criteria
 - g. Risk-Adjustment
 - h. Calculating the Risk-Standardized Readmission Rate (RSRR)
 - i. Data Submission and Reporting Requirements
 - j. Confidential Hospital-Specific Reports
 8. Proposed Changes to Policies on Reporting of eCQMs
 - a. Background
 - b. Proposed Modifications to the eCQM Reporting Requirements for the Hospital IQR Program for the CY 2017 Reporting Period/FY 2019 Payment Determination
 - c. Proposed Modifications to the eCQM Reporting Requirements for the Hospital IQR Program for the CY 2018 Reporting Period/FY 2020 Payment Determination
 9. Possible New Quality Measures and Measure Topics for Future Years
 - a. Potential Inclusion of the Quality of Informed Consent Documents for Hospital-Performed, Elective Procedures Measure
 - b. Potential Inclusion of Four End-of-Life (EOL) Measures for Cancer Patients
 - c. Potential Inclusion of Two Nurse Staffing Measures
- d. Potential Inclusion of Additional Electronic Clinical Quality Measures (eCQMs) in the Hospital IQR and Medicare and Medicaid EHR Incentive Programs
10. Form, Manner, and Timing of Quality Data Submission
 - a. Background
 - b. Procedural Requirements for the FY 2020 Payment Determination and Subsequent Years
 - c. Data Submission Requirements for Chart-Abstracted Measures
 - d. Proposed Changes to the Reporting and Submission Requirements for eCQMs
 - e. Proposed Submission Form and Method for the Proposed Voluntary Hybrid Hospital-Wide Readmission Measure With Claims and Electronic Health Record Data (NQF #2879)
 - f. Sampling and Case Thresholds for the FY 2020 Payment Determination and Subsequent Years
 - g. HCAHPS Administration and Submission Requirements for the FY 2020 Payment Determination and Subsequent Years
 - h. Data Submission Requirements for Structural Measures for the FY 2020 Payment Determination and Subsequent Years
 - i. Data Submission and Reporting Requirements for HAI Measures Reported via NHSN
11. Proposed Modifications to the Validation of Hospital IQR Program Data
 - a. Background
 - b. Proposed Changes to the Existing Processes for Validation of Hospital IQR Program eCQM Data for the FY 2020 Payment Determination and Subsequent Years
 - c. Proposed Modifications to the Educational Review Process for Chart-Abstracted Measures Validation
12. Data Accuracy and Completeness Acknowledgement (DACA) Requirements for the FY 2020 Payment Determination and Subsequent Years
13. Public Display Requirements for the FY 2020 Payment Determination and Subsequent Years
 - a. Background
 - b. Potential Options for Confidential and Public Reporting of Hospital IQR Measures Stratified by Patient Dual Eligibility Status
14. Reconsideration and Appeal Procedures for the FY 2020 Payment Determination and Subsequent Years
15. Proposed Change to the Hospital IQR Program Extraordinary Circumstances Exceptions (ECE) Policy
 - a. Background
 - b. Proposals To Align the Hospital IQR Program ECE Policy With Other CMS Quality Programs
- B. PPS-Exempt Cancer Hospital Quality Reporting (PCHQR) Program
 1. Background
 2. Criteria for Removal and Retention of PCHQR Program Measures
 3. Retention and Proposed Removal of Previously Finalized Quality Measures for PCHs Beginning With the FY 2020 Program Year

- a. Background
- b. Proposed Removal of Measures From the PCHQR Program Beginning With the FY 2020 Program Year
4. Proposed New Quality Measures Beginning With the FY 2020 Program Year
 - a. Considerations in the Selection of Quality Measures
 - b. Proposed New Quality Measures Beginning With the FY 2020 Program Year
 - c. Summary of Previously Finalized and Newly Proposed PCHQR Program Measures for the FY 2020 Program Year and Subsequent Years
5. Accounting for Social Risk Factors in the PCHQR Program
6. Possible New Quality Measure Topics for Future Years
 - a. Background
 - b. Localized Prostate Cancer: Vitality; Localized Prostate Cancer: Urinary Incontinence; Localized Prostate Cancer: Urinary Frequency; Obstruction, and/or Irritation; Localized Prostate Cancer: Sexual Function; and Localized Prostate Cancer: Bowel Function
 - c. 30-Day Unplanned Readmission for Cancer Patients
7. Maintenance of Technical Specifications for Quality Measures
8. Public Display Requirements
 - a. Background
 - b. Deferment of Public Display of Two Measures
9. Form, Manner, and Timing of Data Submission
 - a. Background
 - b. Proposed Reporting Requirements for the Proposed New Measures
10. Extraordinary Circumstances Exceptions (ECE) Policy Under the PCHQR Program
 - a. Background
 - b. Proposed Modification to the Exception Policy
- C. Long-Term Care Hospital Quality Reporting Program (LTCH QRP)
 1. Background and Statutory Authority
 2. General Considerations Used for Selection of Quality Measures for the LTCH QRP
 - a. Background
 - b. Accounting for Social Risk Factors in the LTCH QRP
 3. Proposed Collection of Standardized Patient Assessment Data Under the LTCH QRP
 - a. Proposed Definition of Standardized Patient Assessment Data
 - b. General Considerations Used for the Selection of Proposed Standardized Patient Assessment Data
 4. Policy for Retaining LTCH QRP Measures and Proposal to Apply That Policy to Standardized Patient Assessment Data
 5. Policy for Adopting Changes to LTCH QRP Measures and Proposal to Apply That Policy to Standardized Patient Assessment Data
 6. Quality Measures Previously Finalized for the LTCH QRP

I. Executive Summary and Background

A. Executive Summary

1. Purpose and Legal Authority

This proposed rule would make payment and policy changes under the Medicare inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals as well as for certain hospitals and hospital units excluded from the IPPS. We also are making proposals relating to the provider-based status of Indian Health Service (IHS) and Tribal facilities and organizations and to the IPPS low-volume hospital payment adjustment for hospitals operated by the IHS or a Tribe. In addition, it would make payment and policy changes for inpatient hospital services provided by long-term care hospitals (LTCHs) under the long-term care hospital prospective payment system (LTCH PPS). It also would make policy changes to programs associated with Medicare IPPS hospitals, IPPS-excluded hospitals, and LTCHs.

We are proposing to establish new requirements or revising requirements for quality reporting by specific providers (acute care hospitals, PPS-exempt hospitals, LTCHs, and inpatient psychiatric facilities) that are participating in Medicare. We also are proposing to establish new requirements or revise existing requirements for eligible professionals (EPs), eligible hospitals, and CAHs participating in the Medicare and Medicaid EHR Incentive Programs. We are proposing to update policies relating to the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program. We also are proposing changes related to the transparency of accrediting organization survey reports and plans of correction; to allow electronic signature and electronic submission of the Certification and Settlement Summary page of the Medicare cost reports; and

to clarify provider reimbursement regulations relative to the sale or scrapping of depreciable assets on or after December 1, 1997.

Under various statutory authorities, we are proposing to make changes to the Medicare IPPS, to the LTCH PPS, and to other related payment methodologies and programs for FY 2018 and subsequent fiscal years. These statutory authorities include, but are not limited to, the following:

- Section 1886(d) of the Social Security Act (the Act), which sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires that, instead of paying for capital-related costs of inpatient hospital services on a reasonable cost basis, the Secretary use a prospective payment system (PPS).

- Section 1886(d)(1)(B) of the Act, which specifies that certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Rehabilitation hospitals and units; LTCHs; psychiatric hospitals and units; children's hospitals; cancer hospitals; long-term care neoplastic disease hospitals, and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS.

- Sections 123(a) and (c) of the BBRA (Pub. L. 106–113) and section 307(b)(1) of the BIPA (Pub. L. 106–554) (as codified under section 1886(m)(1) of the Act), which provide for the development and implementation of a prospective payment system for payment for inpatient hospital services of long-term care hospitals (LTCHs) described in section 1886(d)(1)(B)(iv) of the Act.

- Sections 1814(l), 1820, and 1834(g) of the Act, which specify that payments are made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services and that these payments are generally based on 101 percent of reasonable cost.

- Section 1866(k) of the Act, as added by section 3005 of the Affordable Care Act, which establishes a quality reporting program for hospitals described in section 1886(d)(1)(B)(v) of the Act, referred to as “PPS-exempt cancer hospitals.”

- Section 1886(a)(4) of the Act, which specifies that costs of approved

educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act.

- Section 1886(b)(3)(B)(viii) of the Act, which requires the Secretary to reduce the applicable percentage increase that would otherwise apply to the standardized amount applicable to a subsection (d) hospital for discharges occurring in a fiscal year if the hospital does not submit data on measures in a form and manner, and at a time, specified by the Secretary.

- Section 1886(o) of the Act, which requires the Secretary to establish a Hospital Value-Based Purchasing (VBP) Program under which value-based incentive payments are made in a fiscal year to hospitals meeting performance standards established for a performance period for such fiscal year.

- Section 1886(p) of the Act, as added by section 3008 of the Affordable Care Act, which establishes a Hospital-Acquired Condition (HAC) Reduction Program, under which payments to applicable hospitals are adjusted to provide an incentive to reduce hospital-acquired conditions.

- Section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act and amended by section 10309 of the Affordable Care Act and section 15002 of the 21st Century Cures Act, which establishes the “Hospital Readmissions Reduction Program.” Under the program, payments for discharges from an “applicable hospital” under section 1886(d) of the Act will be reduced to account for certain excess readmissions. Section 15002 of the 21st Century Cures Act requires the Secretary to compare cohorts of hospitals to each other in determining the extent of excess readmissions.

- Section 1886(r) of the Act, as added by section 3133 of the Affordable Care Act, which provides for a reduction to disproportionate share hospital (DSH) payments under section 1886(d)(5)(F) of the Act and for a new uncompensated care payment to eligible hospitals. Specifically, section 1886(r) of the Act requires that, for fiscal year 2014 and each subsequent fiscal year, subsection (d) hospitals that would otherwise receive a DSH payment made under section 1886(d)(5)(F) of the Act will receive two separate payments: (1) 25 percent of the amount they previously would have received under section 1886(d)(5)(F) of the Act for DSH (“the empirically justified amount”), and (2) an additional payment for the DSH

hospital’s proportion of uncompensated care, determined as the product of three factors. These three factors are: (1) 75 percent of the payments that would otherwise be made under section 1886(d)(5)(F) of the Act; (2) 1 minus the percent change in the percent of individuals who are uninsured (minus 0.2 percentage points for FY 2018 through FY 2019); and (3) a hospital’s uncompensated care amount relative to the uncompensated care amount of all DSH hospitals expressed as a percentage.

- Section 1886(m)(6) of the Act, as added by section 1206(a)(1) of the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 (Pub. L. 113–67), which provided for the establishment of site neutral payment rate criteria under the LTCH PPS with implementation beginning in FY 2016.

- Section 1886(m)(6) of the Act, as amended by section 15009 of the 21st Century Cures Act (Pub. L. 114–255), which provides for a temporary exception to the application of the site neutral payment rate under the LTCH PPS for certain spinal cord specialty hospitals for discharges in cost reporting periods beginning during FYs 2018 and 2019.

- Section 1886(m)(6) of the Act, as amended by section 15010 of the 21st Century Cures Act (Pub. L. 114–255), which provides for a temporary exception to the application of the site neutral payment rate under the LTCH PPS for certain LTCHs with certain discharges with severe wounds occurring in cost reporting periods beginning during FY 2018.

- Section 1886(m)(5)(D)(iv) of the Act, as added by section 1206 (c) of the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 (Pub. L. 113–67), which provides for the establishment of a functional status quality measure under the LTCH QRP for change in mobility among inpatients requiring ventilator support.

- Section 1899B of the Act, as added by the Improving Medicare Post-Acute Care Transformation Act of 2014 (the IMPACT Act, Pub. L. 113–185), which imposes data reporting requirements for certain post-acute care providers, including LTCHs.

2. Summary of the Major Provisions

a. MS–DRG Documentation and Coding Adjustment

Section 631 of the American Taxpayer Relief Act (ATRA, Pub. L. 112–240) amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment to the standardized amount of Medicare

payments to acute care hospitals to account for changes in MS–DRG documentation and coding that do not reflect real changes in case-mix, totaling \$11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. The FY 2014 through FY 2017 adjustments represented the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Public Law 110–90. Section 414 of the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 114–10) replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percent positive adjustment to the standardized amount of Medicare payments to acute care hospitals for FYs 2018 through 2023. The FY 2018 adjustment was subsequently adjusted to 0.4588 percent by section 15005 of the 21st Century Cures Act.

For FY 2018, we are proposing to make the 0.4588 percent positive adjustment to the standardized amount as required by section 414 of Public Law 114–10, as amended by section 15005 of the 21st Century Cures Act.

b. Adjustment to IPPS Rates Resulting From 2-Midnight Policy

In FY 2017, we made a permanent adjustment to the standardized amount, the hospital-specific payment rates, and the national capital Federal rate to prospectively remove the 0.2 percent reduction to the rates put in place in FY 2014 to offset the estimated increase in IPPS expenditures as a result of the 2-midnight policy. In addition, we made a temporary one-time prospective increase to the FY 2017 standardized amount, the hospital-specific payment rates, and the national capital Federal rate of 0.6 percent by including a temporary one-time factor of 1.006 in the calculation of the standardized amount, the hospital-specific payment rates, and the national capital Federal rate to address the effects of the 0.2 percent reduction to the rate for the 2-midnight policy in effect for FYs 2014, 2015, and 2016.

For FY 2018, we are including a factor of (1/1.006) in the calculation of the FY 2018 standardized amount, the hospital-specific payment rates, and the national capital Federal rate to remove the temporary one-time factor of 1.006, as established in the FY 2017 IPPS/LTCH PPS final rule.

c. Reduction of Hospital Payments for Excess Readmissions

We are proposing to make changes to policies for the Hospital Readmissions Reduction Program, which is established under section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act, as amended by section 10309 of the Affordable Care Act. The Hospital Readmissions Reduction Program requires a reduction to a hospital's base operating DRG payment to account for excess readmissions of selected applicable conditions. For FY 2018 and subsequent years, the reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). In this proposed rule, we are proposing the following policies: (1) Specify applicable time period for FY 2018; (2) specify the calculation of aggregate payments for excess readmissions for FY 2018; (3) propose changes to the payment adjustment factor in accordance with the 21st Century Cures Act for FY 2019; and (4) update the Extraordinary Circumstances Exception policy.

d. Hospital Value-Based Purchasing (VBP) Program

Section 1886(o) of the Act requires the Secretary to establish a Hospital VBP Program under which value-based incentive payments are made in a fiscal year to hospitals based on their performance on measures established for a performance period for such fiscal year. In this proposed rule, we are proposing to remove one previously adopted measure, the PSI 90: Patient Safety for Selected Indicators measure, from the Hospital VBP Program beginning with the FY 2019 program year. We also are proposing to adopt one new measure, Hospital-Level, Risk-Standardized Payment Associated with a 30-Day Episode of Care for Pneumonia, beginning with the FY 2022 program year, and to adopt a modified version of a previously adopted measure, Patient Safety and Adverse Events Composite (NQF #0531), beginning with the FY 2023 program year. In addition, we are proposing two modifications to our domain scoring policies beginning with the FY 2019 program year, and further proposing a new weighting methodology for the Efficiency and Cost Reduction domain. We also are inviting public comment on

the appropriateness of accounting for social risk factors in the Hospital VBP Program, including which social risk factors should be included; and how to account for these social risk factors in the Hospital VBP Program.

e. Hospital-Acquired Condition (HAC) Reduction Program

Section 1886(p) of the Act, as added under section 3008(a) of the Affordable Care Act, establishes an incentive to hospitals to reduce the incidence of hospital-acquired conditions by requiring the Secretary to make an adjustment to payments to applicable hospitals effective for discharges beginning on October 1, 2014. This 1-percent payment reduction applies to a hospital whose ranking is in the top quartile (25 percent) of all applicable hospitals, relative to the national average, of conditions acquired during the applicable period and on all of the hospital's discharges for the specified fiscal year. In this proposed rule, we are proposing the following policies: (1) Specifying the dates of the time period used to calculate hospital performance for the FY 2020 HAC Reduction Program; (2) requesting comments on additional measures for potential future adoption; (3) requesting comments on social risk factors; (4) requesting comments on accounting for disability and medical complexity in the CDC NHSN measures in Domain 2; and (5) updating the HAC Reduction Program's Extraordinary Circumstances Exception policy.

f. DSH Payment Adjustment and Additional Payment for Uncompensated Care

Section 3133 of the Affordable Care Act modified the Medicare disproportionate share hospital (DSH) payment methodology beginning in FY 2014. Under section 1886(r) of the Act, which was added by section 3133 of the Affordable Care Act, starting in FY 2014, DSHs receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remaining amount, equal to 75 percent of the amount that otherwise would have been paid as Medicare DSH payments, is paid as additional payments after the amount is reduced for changes in the percentage of individuals that are uninsured. Each Medicare DSH will receive an additional payment based on its share of the total amount of uncompensated care for all Medicare DSHs for a given time period.

In this proposed rule, we are proposing to update our estimates of the

three factors used to determine uncompensated care payments for FY 2018. The statute permits the use of a data source other than the CBO estimates to determine the percent change in the rate of uninsurance as part of the calculation of Factor 2 beginning in FY 2018. We are proposing to use uninsured estimates produced by CMS' Office of the Actuary (OACT) as part of the development of the National Health Expenditure Accounts (NHEA) in the calculation of Factor 2. We also are proposing to begin incorporating data from Worksheet S-10 in the calculation of hospitals' share of uncompensated care by combining data on uncompensated care costs from the Worksheet S-10 for FY 2014 with proxy data regarding a hospital's share of low-income insured days for FYs 2012 and 2013 to determine Factor 3 for FY 2018. The proposal to continue to use data from three cost reporting periods to calculate Factor 3 would have the effect of transitioning from the use of the proxy data on low-income insured days toward use of uncompensated care data from Worksheet S-10. As part of this proposal, we are proposing a definition of uncompensated care costs consisting of the sum of charity care and bad debt and a trim methodology to address anomalous charges. We also are proposing that, for Puerto Rico hospitals and Indian Health Service and Tribal hospitals, we would substitute data regarding low-income insured days for FY 2013 for the Worksheet S-10 data from FY 2014 cost reports.

We are proposing to continue the policies that were finalized in FY 2015 to address several specific issues concerning the process and data to be employed in determining hospitals' share of uncompensated care in the case of hospital mergers. We also are proposing to continue the policies finalized in FY 2017 concerning the methodology for calculating each hospital's relative share of uncompensated care, such as combining data from multiple cost reports beginning in the same fiscal year and averaging the sum of three individual Factor 3s by the number of cost reporting periods with data. In addition, we are proposing to annualize hospital cost reports that do not span 12 months. We also are proposing to apply a scaling factor to each hospital's uncompensated care amount so that total uncompensated care payments will be consistent with the estimated amount available to make uncompensated care payments for FY 2018.

g. Proposed Changes to the LTCH PPS

In this proposed rule, we set forth proposed changes to the LTCH PPS Federal payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2018; proposed changes to the payment methodology under the short-stay outlier (SSO) policy; proposals to implement several provisions of the 21st Century Cures Act; and a proposal to adopt a 1-year regulatory delay on the full implementation of the 25-percent threshold policy for discharges occurring in FY 2018 (that is, for the fiscal year after expiration of the current statutory moratoria under the 21st Century Cures Act, which is set to expire September 30, 2017).

h. Hospital Inpatient Quality Reporting (IQR) Program

Under section 1886(b)(3)(B)(viii) of the Act, subsection (d) hospitals are required to report data on measures selected by the Secretary for a fiscal year in order to receive the full annual percentage increase that would otherwise apply to the standardized amount applicable to discharges occurring in that fiscal year. In past years, we have established measures on which hospitals must report data and the process for submittal and validation of the data.

In this proposed rule, we are proposing to make several changes. First, we are proposing to refine two previously adopted measures. Specifically, we are proposing to update the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Survey measure by replacing the three existing questions about Pain Management with three new questions that address Communication About Pain During the Hospital Stay, beginning with the FY 2020 payment determination. In addition, we are proposing to update the stroke mortality measure to include the use of NIH Stroke Scale claims data for risk adjustment, beginning with the FY 2023 payment determination.

Second, we are proposing to adopt the Hospital-Wide All-Cause Unplanned Readmission Hybrid Measure as a voluntary measure for the CY 2018 reporting period and note that we are considering proposing this measure as a required measure as early as the CY 2021 reporting period/FY 2023 payment determination and requiring hospitals to submit the core clinical data elements and linking variables used in the measure as early as CY 2020 to support a dry run of the measure during which

hospitals would receive a confidential preview of their results in 2021.

Third, we are proposing modifications of our previously finalized eCQM reporting requirements. For the CY 2017 reporting period/FY 2019 payment determination, we are proposing that hospitals would be required to select and submit six of the available eCQMs included in the Hospital IQR Program measure set and provide two, self-selected, calendar year quarters of data. For the CY 2018 reporting period/FY 2020 payment determination, we are proposing that hospitals would be required to select and submit six of the available eCQMs, and provide data for the first three calendar quarters (Q1–Q3). These modifications are being proposed in alignment with proposals for the Medicare and Medicaid EHR Incentive Programs, and would decrease the required number of eCQMs and quarters of reporting as compared with the previously finalized requirements in the FY 2017 IPPS/LTCH PPS final rule.

Fourth, we are proposing modifications to the eCQM validation process if our proposals to modify the eCQM reporting requirements for the CY 2017 reporting period/FY 2019 payment determination and CY 2018 reporting period/FY 2020 payment determination are finalized as proposed, whereby hospitals would be required to submit a reduced number of cases for eCQM data validation for the FY 2020 and FY 2021 payment determinations. In addition, we are proposing policies related to the exclusion criteria for hospital selection and the data submission requirements for participating hospitals.

Fifth, we are proposing to modify our educational review process for chart-abstracted measures for the FY 2020 payment determination and subsequent years, such that educational reviews would be offered quarterly for the first three quarters of validation. Hospitals would be allowed 30 calendar days following the date the results of validation are posted to request an educational review. Also, we are proposing that if an educational review demonstrates that the abstraction score calculated by CMS is incorrect, we would use the corrected quarterly score to compute the final confidence interval.

Sixth, we are making proposals related to our Hospital IQR Program Extraordinary Circumstances Extension or Exemptions (ECE) policy, including a change to the name of the policy to Extraordinary Circumstances Exceptions policy.

Finally, we are inviting public comment on accounting for social risk factors in the Hospital IQR Program, the

confidential and potential future public reporting of clinical quality measure data stratified by patients' dual-eligible status, and the following clinical quality measures that we are considering for future inclusion in the Hospital IQR Program: (1) Quality of Informed Consent Documents for Hospital-Performed, Elective Procedures measure; (2) four End-of-Life process and outcome measures for cancer patients; (3) two nurse staffing measures; and (4) eleven newly specified electronic clinical quality measures (eCQMs).

i. Long-Term Care Hospital Quality Reporting Program (LTCH QRP)

Section 1886(m)(5) of the Act requires LTCHs to report certain quality data to CMS in order to receive their full annual update under the LTCH PPS. In this proposed rule, we are proposing to adopt one new outcome measure related to pressure ulcers and two new measures (one process and one outcome) related to ventilator weaning. We also are proposing to define the standardized patient assessment data that LTCHs must report to comply with section 1886(m)(5)(F)(ii) of the Act, as well as the requirements for the reporting of these data. Finally, we are proposing to publicly report data on four assessment-based measures and three claims-based measures.

j. Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program

For the Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program, we are making several proposals. First, beginning with the FY 2020 payment determination, we are proposing the Medication Continuation following Inpatient Psychiatric Discharge measure. Second, beginning with the FY 2019 payment determination (that is, for extraordinary circumstances occurring during CY 2018), we are proposing to update the IPFQR Program's extraordinary circumstances exception (ECE) policy by: (1) Allowing designated personnel to provide their contact information and sign the ECE request in lieu of the Chief Executive Officer (CEO); (2) allowing up to 90 days after the extraordinary circumstance to submit the request; and (3) stating that we will strive to respond to requests for ECEs within 90 days of receiving these requests. Third, we are proposing to change the annual data submission period from a specific date range to a 45-day period that begins at least 30 days following the end of the collection period. Fourth, we are proposing to align our deadline for submission of a Notice of Participation (NOP) or

program withdrawal with this proposed data submission timeframe. Finally, we are proposing factors by which we will evaluate measures for removal from the IPFQR Program. These factors align with those in use in other quality reporting programs.

3. Summary of Costs and Benefits

- *Adjustment for MS-DRG*

Documentation and Coding Changes.

Section 414 of the MACRA replaced the single positive adjustment we intended to make in FY 2018 once the recoupment required by section 631 of the ATRA was complete with a 0.5 percent positive adjustment to the standardized amount of Medicare payments to acute care hospitals for FYs 2018 through 2023. The FY 2018 adjustment was subsequently adjusted to 0.4588 percent by section 15005 of the 21st Century Cures Act (Pub. L. 114-255). For FY 2018, we are proposing to make the 0.4588 percent positive adjustment to the standardized amount as required by these provisions.

- *Adjustment to IPPS Payment Rates as a Result of the 2-Midnight Policy.* The removal of the adjustment to IPPS rates resulting from the 2-midnight policy will decrease IPPS payment rates by (1/1.006) for FY 2018. The (1/1.006) is a one-time factor that will be applied to the standardized amount, the hospital-specific rates, and the national capital Federal rate for FY 2018 only.

- *Medicare DSH Payment Adjustment and Additional Payment for Uncompensated Care.* Under section 1886(r) of the Act (as added by section 3133 of the Affordable Care Act), DSH payments to hospitals under section 1886(d)(5)(F) of the Act are reduced and an additional payment for uncompensated care is made to eligible hospitals beginning in FY 2014. Hospitals that receive Medicare DSH payments receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remainder, equal to an estimate of 75 percent of what otherwise would have been paid as Medicare DSH payments, is the basis for determining the additional payments for uncompensated care after the amount is reduced for changes in the percentage of individuals that are uninsured and additional statutory adjustments. Each hospital that receives Medicare DSH payments will receive an additional payment for uncompensated care based on its share of the total uncompensated care amount reported by Medicare DSHs. The reduction to Medicare DSH payments is not budget neutral.

For FY 2018, we are proposing that the 75 percent of what otherwise would have been paid for Medicare DSH will be adjusted to approximately 58.01 percent of the amount to reflect changes in the percentage of individuals that are uninsured and additional statutory adjustments. In other words, approximately 43.51 percent (the product of 75 percent and 58.01 percent) of our estimate of Medicare DSH payments, prior to the application of section 3133 of the Affordable Care Act, would be available to make additional payments to hospitals for their relative share of the total amount of uncompensated care.

We project that estimated Medicare DSH payments, and additional payments for uncompensated care made for FY 2018, will increase payments overall by approximately 0.8 percent as compared to the estimate of overall payments, including Medicare DSH payments and uncompensated care payments, that will be distributed in FY 2017. The additional payments have redistributive effects based on a hospital's uncompensated care amount relative to the uncompensated care amount for all hospitals that are estimated to receive Medicare DSH payments, and the calculated payment amount is not directly tied to a hospital's number of discharges.

- *Proposed Changes to the Hospital Readmissions Reduction Program.* For FY 2018 and subsequent years, the reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). Overall, in this proposed rule, we estimate that 2,591 hospitals would have their base operating DRG payments reduced by their determined proxy FY 2018 hospital-specific readmission adjustment. As a result, we estimate that the Hospital Readmissions Reduction Program would save approximately \$564 million in FY 2018, an increase of approximately \$27 million over the estimated FY 2017 savings.

- *Value-Based Incentive Payments Under the Hospital VBP Program.* We estimate that there would be no net financial impact to the Hospital VBP Program for the FY 2018 program year in the aggregate because, by law, the amount available for value-based incentive payments under the program in a given year must be equal to the total amount of base operating MS-DRG payment amount reductions for that

year, as estimated by the Secretary. The estimated amount of base operating MS-DRG payment amount reductions for the FY 2018 program year and, therefore, the estimated amount available for value-based incentive payments for FY 2018 discharges is approximately \$1.9 billion.

- *Proposed Changes to the HAC Reduction Program.* A hospital's Total HAC score and its ranking in comparison to other hospitals in any given year depends on several different factors. Any significant impact due to the proposed HAC Reduction Program changes for FY 2018, including which hospitals will receive the adjustment, will depend on actual experience.

- *Update to the LTCH PPS Payment Rates and Other Payment Factors.* Based on the best available data for the 415 LTCHs in our database, we estimate that the proposed changes to the payment rates and factors that we are presenting in the preamble and Addendum of this proposed rule, which reflects the rolling end to the transition of the statutory application of the site neutral payment rate required by section 1886(m)(6)(A) of the Act, the proposed update to the LTCH PPS standard Federal payment rate for FY 2018, and estimated changes to the site neutral payment rate and high-cost outlier (HCO) payments would result in an estimated decrease in payments from FY 2017 of approximately \$238 million.

- *Proposed Changes to the 25-Percent Threshold Policy.* In this proposed rule, we estimate our proposal to adopt a 1-year regulatory delay of the full implementation of the 25-percent threshold policy for discharges occurring in FY 2018 would increase payments to LTCHs in FY 2018 by \$50 million.

- *Proposed Changes to the Hospital Inpatient Quality Reporting (IQR) Program.* Across 3,300 IPPS hospitals, we estimate that our policy proposals would result in the following changes to costs and benefits in the Hospital IQR Program compared to previously finalized requirements: (1) A cost reduction of \$361,240 for the FY 2019 payment determination due to the proposed updates to the eCQM reporting requirements; (2) a total net cost reduction of \$392,963 for the FY 2020 payment determination due to the proposed updates to the eCQM reporting requirements, the proposed updates to the eCQM validation procedures, and the proposed voluntary reporting of the new Hybrid Hospital-Wide Readmission measure; and (3) a total cost reduction of \$70,048 for the FY 2021 payment determination due to

the proposed updates to the eCQM validation procedures.

- *Proposed Changes Related to the LTCH QRP.* In this proposed rule, we are proposing one outcome measure related to pressure ulcers and two new measures (one process and one outcome) related to ventilator weaning. We also are proposing to specify the use of the standardized patient assessment data as required under section 1899B(b)(1)(B) of the Act and policies regarding public display of measure data. Overall, the cost associated with the proposed changes to the LTCH QRP is estimated at an additional \$3,187.15 per LTCH annually, or \$1,357,726 for all LTCHs annually.

- *Proposed Changes to the IPFQR Program.* In this proposed rule, we are proposing to adopt one claims based measure, update our ECE process, change the specification of the data submission period, align the timeframe for submission of the NOP or program withdrawal with the data submission period, and establish criteria to evaluate measures for retention or removal. We do not believe that these policies will have any impact on the IPFQR program burden.

B. Summary

1. Acute Care Hospital Inpatient Prospective Payment System (IPPS)

Section 1886(d) of the Social Security Act (the Act) sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires the Secretary to use a prospective payment system (PPS) to pay for the capital-related costs of inpatient hospital services for these “subsection (d) hospitals.” Under these PPSs, Medicare payment for hospital inpatient operating and capital-related costs is made at predetermined, specific rates for each hospital discharge. Discharges are classified according to a list of diagnosis-related groups (DRGs).

The base payment rate is comprised of a standardized amount that is divided into a labor-related share and a nonlabor-related share. The labor-related share is adjusted by the wage index applicable to the area where the hospital is located. If the hospital is located in Alaska or Hawaii, the nonlabor-related share is adjusted by a cost-of-living adjustment factor. This base payment rate is multiplied by the DRG relative weight.

If the hospital treats a high percentage of certain low-income patients, it receives a percentage add-on payment applied to the DRG-adjusted base

payment rate. This add-on payment, known as the disproportionate share hospital (DSH) adjustment, provides for a percentage increase in Medicare payments to hospitals that qualify under either of two statutory formulas designed to identify hospitals that serve a disproportionate share of low-income patients. For qualifying hospitals, the amount of this adjustment varies based on the outcome of the statutory calculations. The Affordable Care Act revised the Medicare DSH payment methodology and provides for a new additional Medicare payment that considers the amount of uncompensated care beginning on October 1, 2013.

If the hospital is training residents in an approved residency program(s), it receives a percentage add-on payment for each case paid under the IPPS, known as the indirect medical education (IME) adjustment. This percentage varies, depending on the ratio of residents to beds.

Additional payments may be made for cases that involve new technologies or medical services that have been approved for special add-on payments. To qualify, a new technology or medical service must demonstrate that it is a substantial clinical improvement over technologies or services otherwise available, and that, absent an add-on payment, it would be inadequately paid under the regular DRG payment.

The costs incurred by the hospital for a case are evaluated to determine whether the hospital is eligible for an additional payment as an outlier case. This additional payment is designed to protect the hospital from large financial losses due to unusually expensive cases. Any eligible outlier payment is added to the DRG-adjusted base payment rate, plus any DSH, IME, and new technology or medical service add-on adjustments.

Although payments to most hospitals under the IPPS are made on the basis of the standardized amounts, some categories of hospitals are paid in whole or in part based on their hospital-specific rate, which is determined from their costs in a base year. For example, sole community hospitals (SCHs) receive the higher of a hospital-specific rate based on their costs in a base year (the highest of FY 1982, FY 1987, FY 1996, or FY 2006) or the IPPS Federal rate based on the standardized amount. SCHs are the sole source of care in their areas. Specifically, section 1886(d)(5)(D)(iii) of the Act defines an SCH as a hospital that is located more than 35 road miles from another hospital or that, by reason of factors such as isolated location, weather conditions, travel conditions, or absence of other like hospitals (as determined by

the Secretary), is the sole source of hospital inpatient services reasonably available to Medicare beneficiaries. In addition, certain rural hospitals previously designated by the Secretary as essential access community hospitals are considered SCHs.

Under current law, the Medicare-dependent, small rural hospital (MDH) program is effective through FY 2017. Through and including FY 2006, an MDH received the higher of the Federal rate or the Federal rate plus 50 percent of the amount by which the Federal rate was exceeded by the higher of its FY 1982 or FY 1987 hospital-specific rate. For discharges occurring on or after October 1, 2007, but before October 1, 2017, an MDH receives the higher of the Federal rate or the Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the highest of its FY 1982, FY 1987, or FY 2002 hospital-specific rate. MDHs are a major source of care for Medicare beneficiaries in their areas. Section 1886(d)(5)(G)(iv) of the Act defines an MDH as a hospital that is located in a rural area, has not more than 100 beds, is not an SCH, and has a high percentage of Medicare discharges (not less than 60 percent of its inpatient days or discharges in its cost reporting year beginning in FY 1987 or in two of its three most recently settled Medicare cost reporting years).

Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of inpatient hospital services in accordance with a prospective payment system established by the Secretary. The basic methodology for determining capital prospective payments is set forth in our regulations at 42 CFR 412.308 and 412.312. Under the capital IPPS, payments are adjusted by the same DRG for the case as they are under the operating IPPS. Capital IPPS payments are also adjusted for IME and DSH, similar to the adjustments made under the operating IPPS. In addition, hospitals may receive outlier payments for those cases that have unusually high costs.

The existing regulations governing payments to hospitals under the IPPS are located in 42 CFR part 412, subparts A through M.

2. Hospitals and Hospital Units Excluded From the IPPS

Under section 1886(d)(1)(B) of the Act, as amended, certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Inpatient rehabilitation facility (IRF) hospitals and units; long-term care hospitals (LTCHs); psychiatric hospitals and units; children's hospitals; cancer hospitals; long-term care neoplastic

disease hospitals (formerly LTCHs classified under section 1886(d)(1)(B)(iv)(II) of the Act and redesignated by section 15008 of Pub. L. 114–255) and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS. Various sections of the Balanced Budget Act of 1997 (BBA, Pub. L. 105–33), the Medicare, Medicaid and SCHIP [State Children's Health Insurance Program] Balanced Budget Refinement Act of 1999 (BBRA, Pub. L. 106–113), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA, Pub. L. 106–554) provide for the implementation of PPSs for IRF hospitals and units, LTCHs, and psychiatric hospitals and units (referred to as inpatient psychiatric facilities (IPFs)). (We note that the annual updates to the LTCH PPS are now included as part of the IPPS annual update document. Updates to the IRF PPS and IPF PPS are issued as separate documents.) Children's hospitals, cancer hospitals, hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa), and RNHCIs continue to be paid solely under a reasonable cost-based system subject to a rate-of-increase ceiling on inpatient operating costs.

The existing regulations governing payments to excluded hospitals and hospital units are located in 42 CFR parts 412 and 413.

3. Long-Term Care Hospital Prospective Payment System (LTCH PPS)

The Medicare prospective payment system (PPS) for LTCHs applies to hospitals described in section 1886(d)(1)(B)(iv) of the Act effective for cost reporting periods beginning on or after October 1, 2002. The LTCH PPS was established under the authority of sections 123 of the BBRA and section 307(b) of the BIPA (as codified under section 1886(m)(1) of the Act). During the 5-year (optional) transition period, a LTCH's payment under the PPS was based on an increasing proportion of the LTCH Federal rate with a corresponding decreasing proportion based on reasonable cost principles. Effective for cost reporting periods beginning on or after October 1, 2006, all LTCHs are paid 100 percent of the Federal rate. Section 1206(a) of the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67)

established the site neutral payment rate under the LTCH PPS, which made the LTCH PPS a dual rate payment system beginning in FY 2016. Under this statute, based on a rolling effective date that is linked to the date on which a given LTCH's Federal FY 2016 cost reporting period begins, LTCHs are paid for LTCH discharges at the site neutral payment rate unless the discharge meets the patient criteria for payment at the LTCH PPS standard Federal payment rate. The existing regulations governing payment under the LTCH PPS are located in 42 CFR part 412, subpart O. Beginning October 1, 2009, we issue the annual updates to the LTCH PPS in the same documents that update the IPPS (73 FR 26797 through 26798).

4. Critical Access Hospitals (CAHs)

Under sections 1814(l), 1820, and 1834(g) of the Act, payments made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services are generally based on 101 percent of reasonable cost. Reasonable cost is determined under the provisions of section 1861(v) of the Act and existing regulations under 42 CFR part 413.

5. Payments for Graduate Medical Education (GME)

Under section 1886(a)(4) of the Act, costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act. The amount of payment for direct GME costs for a cost reporting period is based on the hospital's number of residents in that period and the hospital's costs per resident in a base year. The existing regulations governing payments to the various types of hospitals are located in 42 CFR part 413.

C. Summary of Provisions of Recent Legislation Proposed To Be Implemented in This Proposed Rule

1. The American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240), the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 114–10), and the 21st Century Cures Act (Pub. L. 114–255)

Section 631 of the American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240) amended section 7(b)(1)(B) of Public Law 110–90 to require CMS to make a recoupment adjustment to the standardized amounts under section 1886(d) of the Act based upon the

Secretary's estimates for discharges occurring from FYs 2014 through FY 2017 to fully offset \$11 billion. Once the recoupment required under section 631 of the ATRA was completed, CMS had anticipated making a single positive adjustment in FY 2018 to offset the reductions required to recoup the \$11 billion under section 631 of the ATRA. However, section 414 of the MACRA (enacted on April 16, 2015) replaced the single positive adjustment CMS intended to make in FY 2018 with a 0.5 percent positive adjustment for each of FYs 2018 through 2023. Section 15005 of the 21st Century Cures Act (Pub. L. 114–255, enacted December 13, 2016) further amended Public Law 110–90 to reduce the adjustment for FY 2018 from 0.5 percent point to 0.4588 percentage point.

2. Pathway for SGR Reform Act of 2013 (Pub. L. 113–67)

The Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) introduced new payment rules in the LTCH PPS. Under section 1206 of this law, discharges in cost reporting periods beginning on or after October 1, 2015 under the LTCH PPS will receive payment under a site neutral rate unless the discharge meets certain patient-specific criteria. In this proposed rule, we are continuing to provide clarifications to prior policy changes that implemented provisions under section 1206 of the Pathway for SGR Reform Act.

3. Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) (Pub. L. 113–185)

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act (Pub. L. 113–185), enacted on October 6, 2014, made a number of changes that affect the Long-Term Care Quality Reporting Program (LTCH QRP). In this proposed rule, we are proposing to continue to implement portions of section 1899B of the Act, as added by section 2 of the IMPACT Act, which, in part, requires LTCHs, among other postacute care providers, to report standardized patient assessment data, data on quality measures, and data on resource use and other measures.

4. The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10)

Section 411(g) of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA, Pub. L. 114–10) sets the annual update under the LTCH PPS to 1.0 percent for FY 2018. In this proposed rule, consistent with this requirement, we are proposing to update

the LTCH standard Federal payment rate by 1.0 percent for FY 2018.

The MACRA also extended the MDH program and changes to the payment adjustment for low-volume hospitals through FY 2017. In this proposed rule, we discuss the expiration of the MDH program and the expiration of the temporary changes to the low-volume hospital payment adjustment under current law.

5. The 21st Century Cures Act (Pub. L. 114–255)

The 21st Century Cures Act (Pub. L. 114–255), enacted on December 13, 2016, contains a number of provisions affecting payments under the LTCH PPS and the Hospital Readmissions Reduction Program and the Medicare EHR Incentive Program, which we are proposing to implement in this proposed rule:

- Section 4002(b)(1)(A) amended section 1848(a)(7)(B) of the Act to provide that the Secretary shall exempt an eligible professional from the application of the payment adjustment under section 1848(a)(7)(A) of the Act with respect to a year, subject to annual renewal, if the Secretary determines that compliance with the requirement for being a meaningful EHR user is not possible because the certified EHR technology used by such eligible professional has been decertified under the Office of the National Coordinator for Health Information Technology's (ONC) Health IT Certification Program.

- Section 4002(b)(2) amended section 1886(b)(3)(B)(ix)(II) of the Act to provide that the Secretary shall exempt a hospital from the application of the payment adjustment under section 1886(b)(3)(B)(ix)(I) with respect to a fiscal year, subject to annual renewal, if the Secretary determines that compliance with the requirement for being a meaningful EHR user is not possible because the certified EHR technology used by the hospital is decertified under ONC's Health IT Certification Program.

- Section 15002, which amended section 1886(q)(3) of the Act by adding subparagraphs (D) and (E), which requires the Secretary to develop a methodology for the calculating the excess readmissions adjustment factor for the Hospital Readmissions Reduction Program based on cohorts defined by the percentage of dual eligible patients (that is, patients who are eligible for both Medicare and full-benefit Medicaid coverage) cared for by a hospital. In this proposed rule, we are proposing to implement changes to the payment adjustment factor to assess penalties based on a hospital's

performance relative to other hospitals treating a similar proportion of dual eligible patients.

- Section 15004(a), which further amended section 114(d)(7) of the MMSEA (as amended) by striking “The moratorium under paragraph (1)(A)” and inserting “[a]ny moratorium under paragraph (1)” and specified that such amendment shall take effect as if included in the enactment of section 112 of the PAMA. We are proposing to implement the exceptions to the current statutory moratorium, which is in effect through September 30, 2017, on increasing beds in an existing LTCH or an existing LTCH satellite as provided by Section 15004(a).

- Section 15004(b), which modifies high cost outlier payments to LTCH standard Federal rate cases beginning in FY 2018.

- Section 15006, which further amended section 114(c)(1)(A) of the MMSEA (as amended) by extending the moratorium on the full implementation of the 25-percent threshold policy through June 30, 2016, and for discharges occurring on or after October 1, 2016 and before October 1, 2017. In this proposed rule, we are implementing the moratorium on the full implementation of the 25-percent threshold policy for discharges occurring on or after October 1, 2016, through September 30, 2017, as provided by section 15006.

- Section 15007, which amended section 1206(a)(3) of the Pathway for SGR Reform Act by extending the exclusion of Medicare Advantage plans' and site neutral payment rate discharges from the calculation of the average length-of-stay to all LTCHs, for discharges occurring in cost reporting periods beginning on or after October 1, 2015.

- Section 15008, which provided for a change in Medicare classification for “subclause (II)” LTCHs by redesignating such hospitals from section 1886(d)(1)(B)(iv)(II) to section 1886(d)(1)(B)(vi) of the Act. In this proposed rule, we are proposing to implement the reclassification of hospitals which had previously been classified as “subclause (II)” LTCHs as their own category of IPPS-excluded hospitals as provided by the provisions of section 15008.

- Section 15009 of Public Law 114–255, which added new subparagraph (F) to section 1886(m)(6) of the Act, providing for a temporary exception to the site neutral payment rate for certain spinal cord specialty hospitals for all discharges occurring during FYs 2018 and 2019.

- Section 15010, which added a new subparagraph (G) to section 1886(m)(6) of the Act, to create a temporary exception to the site neutral payment rate for certain severe wound discharges from certain LTCHs during such LTCH's cost reporting period beginning during FY 2018.

Public Law 114–255 also amended section 1886(q)(3) of the Act by adding subparagraphs (D) and (E), which requires the Secretary to develop a methodology for the Hospital Readmissions Reduction Program that accounts for the percentage of dual-eligible patients (that is, patients who are eligible for both Medicare and full-benefit Medicaid coverage) cared for by a hospital. In this proposed rule, we are proposing to implement changes to the payment adjustment factor to assess penalties based on a hospital's performance relative to other hospitals treating a similar proportion of dual-eligible patients.

- Section 16003 amended section 1848(a)(7)(D) of the Act to provide that no payment adjustment may be made under section 1848(a)(7)(A) of the Act for 2017 and 2018 in the case of an eligible professional who furnishes substantially all of his or her covered professional services in an ambulatory surgical center (ASC). Section 1848(a)(7)(D)(iii) of the Act provides that determinations of whether an eligible professional is ASC-based may be made based on the site of service as defined by the Secretary or an attestation, but shall be made without regard to any employment or billing arrangement between the eligible professional and any other supplier or provider of services. Section 1848(a)(7)(D)(iv) of the Act provides that the ASC-based exception shall no longer apply as of the first year that begins more than 3 years after the date on which the Secretary determines, through notice-and-comment rulemaking, that certified EHR technology applicable to the ASC setting is available.

D. Summary of Provisions of This Proposed Rule

In this proposed rule, we are setting forth proposed payment and policy changes to the Medicare IPPS for FY 2018 operating costs and for capital-related costs of acute care hospitals and certain hospitals and hospital units that are excluded from IPPS. In addition, we are setting forth proposed changes to the payment rates, factors, and other payment and policy-related changes to programs associated with payment rate policies under the LTCH PPS for FY 2018.

Below is a summary of the major changes that we are proposing to make:

1. Proposed Changes to MS–DRG Classifications and Recalibrations of Relative Weights

In section II. of the preamble of this proposed rule, we include—

- Proposed changes to MS–DRG classifications based on our yearly review for FY 2018.
- Proposed adjustment to the standardized amounts under section 1886(d) of the Act for FY 2018 in accordance with the amendments made to section 7(b)(1)(B) of Public Law 110–90 by section 414 of the MACRA and section 15005 of the 21st Century Cures Act.
- Proposed recalibrations of the MS–DRG relative weights.
- A discussion of the FY 2018 status of new technologies approved for add-on payments for FY 2017 and a presentation of our evaluation and analysis of the FY 2018 applicants for add-on payments for high-cost new medical services and technologies (including public input, as directed by Pub. L. 108–173, obtained in a town hall meeting).

2. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals

In section III. of the preamble to this proposed rule, we are proposing to make revisions to the wage index for acute care hospitals and the annual update of the wage data. Specific issues addressed include, but are not limited to, the following:

- The proposed FY 2018 wage index update using wage data from cost reporting periods beginning in FY 2014.
- Clarification of other wage-related costs in the wage index.
- Calculation of the proposed occupational mix adjustment for FY 2018 based on the 2013 Occupational Mix Survey.
- Analysis and implementation of the proposed FY 2018 occupational mix adjustment to the wage index for acute care hospitals.
- Proposed application of the rural floor and the frontier State floor and the proposed expiration of the imputed floor.
- Proposed revisions to the wage index for acute care hospitals based on hospital redesignations and reclassifications under sections 1886(d)(8)(B), (d)(8)(E), and (d)(10) of the Act.
- Proposal to require documentation of SCH and RRC classification status approvals to be submitted to the MGCRB by the first business day after January 1.

- Clarification of special rules for SCHs and RRCs reclassifying to geographic home areas.

- Proposed changes to the 45-day notification rule.

- The proposed adjustment to the wage index for acute care hospitals for FY 2018 based on commuting patterns of hospital employees who reside in a county and work in a different area with a higher wage index.

- Determination of the labor-related share for the proposed FY 2018 wage index.

3. Proposed Revising and Rebased of Hospital Market Basket

In section IV. of this proposed rule, we are proposing to revise and rebase the hospital market baskets for acute care hospitals and update the labor-related share.

4. Other Decisions and Proposed Changes to the IPPS for Operating Costs

In section V. of the preamble of this proposed rule, we discuss proposed changes or clarifications of a number of the provisions of the regulations in 42 CFR parts 412 and 413, including the following:

- Proposed changes to MS–DRGs subject to the postacute care transfer policy.
- Proposed changes to the inpatient hospital update for FY 2018.
- Proposed changes to the volume decrease adjustment for SCHs.
- Proposed updated national and regional case-mix values and discharges for purposes of determining RRC status.
- Expiration of the MDH program and the temporary changes to the payment adjustment for low-volume hospitals at the end of FY 2017.
- Proposed parallel low-volume hospital payment adjustment concerning hospitals operated by the Indian Health Service (IHS) or a Tribe.
- The statutorily required IME adjustment factor for FY 2018.
- Proposed changes to the methodologies for determining Medicare DSH payments and the additional payments for uncompensated care.
- Discussion of expiration of the MDH program at the end of FY 2017 and our policy to allow MDHs to apply for SCH status in advance of the expiration of the MDH program and be paid as such under certain conditions.
- Proposed changes to the rules for payment adjustments under the Hospital Readmissions Reduction Program based on hospital readmission measures and the process for hospital review and correction of those rates for FY 2018.

- Proposed changes to the requirements and provision of value-based incentive payments under the Hospital Value-Based Purchasing Program.

- Proposed requirements for payment adjustments to hospitals under the HAC Reduction Program for FY 2018.

- Discussion of and proposals relating to the additional 5-year extension of the Rural Community Hospital Demonstration Program.

- Proposals related to the provider-based status of IHS and Tribal facilities and organizations that would remove the regulatory date limitation that restricted the grandfathering provision to IHS or Tribal facilities and organizations furnishing services on or before April 7, 2000. We also are proposing to make a technical change to make the regulation text more consistent with our current rules that require these facilities to comply with all applicable Medicare conditions of participation that apply to the main provider.

5. Proposed FY 2018 Policy Governing the IPPS for Capital-Related Costs

In section VI. of the preamble to this proposed rule, we discuss the proposed payment policy requirements for capital-related costs and capital payments to hospitals for FY 2018.

6. Proposed Changes to the Payment Rates for Certain Excluded Hospitals: Rate-of-Increase Percentages

In section VII. of the preamble of this proposed rule, we discuss—

- Proposed changes to payments to certain excluded hospitals for FY 2018.
- Proposed policy changes relating to payments to hospitals-within-hospitals.
- Proposed continued implementation of the Frontier Community Health Integration Project (FCHIP) Demonstration.

7. Proposed Changes to the LTCH PPS

In section VIII. of the preamble of this proposed rule, we set forth—

- Proposed changes to the LTCH PPS Federal payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2018.
- Proposed changes to the short-stay outlier (SSO) policy.
- Proposed 1-year regulatory delay of the full implementation of the 25-percent threshold policy for discharges occurring in FY 2018.
- Proposed changes to implement the temporary exception to the site neutral payment rate for certain spinal cord specialty hospitals and for certain discharges with severe wounds from certain LTCHs, as provided under sections 15009 and 15010 of Public Law 114–255, respectively.

- Proposed change to the average length of stay criterion to implement section 15007 of Public Law 114–255.
- Proposed change in Medicare classification for certain hospitals to implement section 15008 of Public Law 114–255.

8. Proposed Changes Relating to Quality Data Reporting for Specific Providers and Suppliers

In section IX. of the preamble of the proposed rule, we address—

- Proposed requirements for the Hospital Inpatient Quality Reporting (IQR) Program.
- Proposed changes to the requirements for the quality reporting program for PPS-exempt cancer hospitals (PCHQR Program).
- Proposed changes to the requirements under the LTCH Quality Reporting Program (LTCH QRP).
- Proposed changes to the requirements under the Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program.
- Proposed changes to requirements pertaining to the clinical quality measurement of eligible hospitals and CAHs as well as EPs participating in the Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs.

9. Proposed Changes Relating to Medicare Cost Reporting and Provider Requirements

In section X. of the preamble of this proposed rule, we present our proposals to revise the regulations to allow providers to use an electronic signature to sign the Certification and Settlement Summary page of the Medicare cost report and submit this page electronically, and clarify the rules relating to the sale or scrapping of depreciable assets disposed of on or after December 1, 1997.

10. Proposed Changes Relating to Survey and Certification Requirements

In section XI. of the preamble of this proposed rule, we present our proposals for allowing transparency in accrediting organization survey reports and plans of correction and for changing the requirement for providers to publish self-termination notices in newspapers.

11. Determining Prospective Payment Operating and Capital Rates and Rate-of-Increase Limits for Acute Care Hospitals

In section V. of the Addendum to this proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2018 prospective payment rates for operating costs and capital-related costs for acute

care hospitals. We are proposing to establish the threshold amounts for outlier cases. In addition, we are addressing the update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 2018 for certain hospitals excluded from the IPPS.

12. Determining Prospective Payment Rates for LTCHs

In the Addendum to this proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2018 LTCH PPS standard Federal payment rate and other factors used to determine LTCH PPS payments under both the LTCH PPS standard Federal payment rate and the site neutral payment rate in FY 2018. We are proposing to establish the adjustments for wage levels, the labor-related share, the cost-of-living adjustment, and high-cost outliers, including the applicable fixed-loss amounts and the LTCH cost-to-charge ratios (CCRs) for both payment rates.

13. Impact Analysis

In Appendix A of this proposed rule, we set forth an analysis of the impact that the proposed changes would have on affected acute care hospitals, CAHs, LTCHs, PCHs, and IPFs.

14. Recommendation of Update Factors for Operating Cost Rates of Payment for Hospital Inpatient Services

In Appendix B of this proposed rule, as required by sections 1886(e)(4) and (e)(5) of the Act, we are providing our recommendations of the appropriate percentage changes for FY 2018 for the following:

- A single average standardized amount for all areas for hospital inpatient services paid under the IPPS for operating costs of acute care hospitals (and hospital-specific rates applicable to SCHs).
- Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by certain hospitals excluded from the IPPS.
- The LTCH PPS standard Federal payment rate and the site neutral payment rate for hospital inpatient services provided for LTCH PPS discharges.

15. Discussion of Medicare Payment Advisory Commission Recommendations

Under section 1805(b) of the Act, MedPAC is required to submit a report to Congress, no later than March 15 of each year, in which MedPAC reviews and makes recommendations on Medicare payment policies. MedPAC's

March 2017 recommendations concerning hospital inpatient payment policies address the update factor for hospital inpatient operating costs and capital-related costs for hospitals under the IPPS. We address these recommendations in Appendix B of this proposed rule. For further information relating specifically to the MedPAC March 2017 report or to obtain a copy of the report, contact MedPAC at (202) 220–3700 or visit MedPAC's Web site at: <http://www.medpac.gov>.

II. Proposed Changes to Medicare Severity Diagnosis-Related Group (MS-DRG) Classifications and Relative Weights

A. Background

Section 1886(d) of the Act specifies that the Secretary shall establish a classification system (referred to as diagnosis-related groups (DRGs)) for inpatient discharges and adjust payments under the IPPS based on appropriate weighting factors assigned to each DRG. Therefore, under the IPPS, Medicare pays for inpatient hospital services on a rate per discharge basis that varies according to the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case multiplies an individual hospital's payment rate per case by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG, relative to the average resources used to treat cases in all DRGs.

Section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and relative weights at least annually to account for changes in resource consumption. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

B. MS-DRG Reclassifications

For general information about the MS-DRG system, including yearly reviews and changes to the MS-DRGs, we refer readers to the previous discussions in the FY 2010 IPPS/RV 2010 LTCH PPS final rule (74 FR 43764 through 43766) and the FYs 2011 through 2017 IPPS/LTCH PPS final rules (75 FR 50053 through 50055; 76 FR 51485 through 51487; 77 FR 53273; 78 FR 50512; 79 FR 49871; 80 FR 49342; and 81 FR 56787 through 56872, respectively).

C. Adoption of the MS-DRGs in FY 2008

For information on the adoption of the MS-DRGs in FY 2008, we refer readers to the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189).

D. Proposed FY 2018 MS-DRG Documentation and Coding Adjustment

1. Background on the Prospective MS-DRG Documentation and Coding Adjustments for FY 2008 and FY 2009 Authorized by Public Law 110–90

In the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189), we adopted the MS-DRG patient classification system for the IPPS, effective October 1, 2007, to better recognize severity of illness in Medicare payment rates for acute care hospitals. The adoption of the MS-DRG system resulted in the expansion of the number of DRGs from 538 in FY 2007 to 745 in FY 2008. By increasing the number of MS-DRGs and more fully taking into account patient severity of illness in Medicare payment rates for acute care hospitals, MS-DRGs encourage hospitals to improve their documentation and coding of patient diagnoses.

In the FY 2008 IPPS final rule with comment period (72 FR 47175 through 47186), we indicated that the adoption of the MS-DRGs had the potential to lead to increases in aggregate payments without a corresponding increase in actual patient severity of illness due to the incentives for additional documentation and coding. In that final rule with comment period, we exercised our authority under section 1886(d)(3)(A)(vi) of the Act, which authorizes us to maintain budget neutrality by adjusting the national standardized amount, to eliminate the estimated effect of changes in coding or classification that do not reflect real changes in case-mix. Our actuaries estimated that maintaining budget neutrality required an adjustment of –4.8 percentage points to the national standardized amount. We provided for phasing in this –4.8 percentage point adjustment over 3 years. Specifically, we established prospective documentation and coding adjustments of –1.2 percentage points for FY 2008, –1.8 percentage points for FY 2009, and –1.8 percentage points for FY 2010.

On September 29, 2007, Congress enacted the TMA [Transitional Medical Assistance], Abstinence Education, and QI [Qualifying Individuals] Programs Extension Act of 2007 (Pub. L. 110–90). Section 7(a) of Public Law 110–90 reduced the documentation and coding

adjustment made as a result of the MS-DRG system that we adopted in the FY 2008 IPPS final rule with comment period to –0.6 percentage point for FY 2008 and –0.9 percentage point for FY 2009.

As discussed in prior year rulemaking, and most recently in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56780 through 56782), we implemented a series of adjustments required under sections 7(b)(1)(A) and 7(b)(1)(B) of Public Law 110–90, based on a retrospective review of FY 2008 and FY 2009 claims data. We completed these adjustments in FY 2013, but indicated in the FY 2013 IPPS/LTCH PPS final rule (77 FR 53274 through 53275) that delaying full implementation of the adjustment required under section 7(b)(1)(A) of Public Law 110–90 until FY 2013 resulted in payments in FY 2010 through FY 2012 being overstated, and that these overpayments could not be recovered.

2. Recoupment or Repayment Adjustment Authorized by Section 631 of the American Taxpayer Relief Act of 2012 (ATRA)

Section 631 of the ATRA amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment or adjustments totaling \$11 billion by FY 2017. This adjustment represented the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. As discussed earlier, this delay in implementation resulted in overstated payment rates in FYs 2010, 2011, and 2012. The resulting overpayments could not have been recovered under Public Law 110–90.

Similar to the adjustments authorized under section 7(b)(1)(B) of Public Law 110–90, the adjustment required under section 631 of the ATRA was a one-time recoupment of a prior overpayment, not a permanent reduction to payment rates. Therefore, we anticipated that any adjustment made to reduce payment rates in one year would eventually be offset by a positive adjustment in 2018, once the necessary amount of overpayment was recovered. However, section 414 of the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015, Public Law 114–10, enacted on April 16, 2015, replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percentage point positive adjustment for each of FYs 2018 through 2023. We stated in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49345) that we would address this MACRA provision in future rulemaking.

However, section 15005 of the 21st Century Cures Act (Pub. L. 114–255), enacted on December 13, 2016, reduced the adjustment for FY 2018 from 0.5 percentage points to 0.4588 percentage points. We are addressing these provisions of MACRA and the 21st Century Cures Act in section II.D.3. of the preamble of this proposed rule.

As we stated in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515 through 50517), our actuaries estimated that a –9.3 percentage point adjustment to the standardized amount would be necessary if CMS were to fully recover the \$11 billion recoupment required by section 631 of the ATRA in FY 2014. It is often our practice to phase in payment rate adjustments over more than one year, in order to moderate the effect on payment rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, and after consideration of the public comments we received, in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515 through 50517), we implemented a –0.8 percentage point recoupment adjustment to the standardized amount in FY 2014. We estimated that if adjustments of approximately –0.8 percentage point were implemented in FYs 2014, 2015, 2016, and 2017, using standard inflation factors, the entire \$11 billion would be accounted for by the end of the statutory 4-year timeline. As estimates of any future adjustments are subject to variations in total savings, we did not provide for specific adjustments for FYs 2015, 2016, or 2017 at that time.

Consistent with the approach discussed in the FY 2014 rulemaking for recouping the \$11 billion required by section 631 of the ATRA, in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49874) and the FY 2016 IPPS/LTCH PPS final rule (80 FR 49345), we implemented additional –0.8 percentage point recoupment adjustments to the standardized amount in FY 2015 and FY 2016, respectively. We estimated that these adjustments, combined with leaving the prior –0.8 percentage point adjustments in place, would recover up to \$2 billion in FY 2015 and another \$3 billion in FY 2016. When combined with the approximately \$1 billion adjustment made in FY 2014, we estimated that approximately \$5 to \$6 billion would be left to recover under section 631 of the ATRA by the end of FY 2016.

As indicated in the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 24966), due to lower than previously estimated inpatient spending, we determined that an adjustment of –0.8 percentage point in FY 2017 would not recoup the \$11 billion under section 631 of the ATRA.

For the FY 2017 IPPS/LTCH PPS final rule (81 FR 56785), based on the Midsession Review of the President's FY 2017 Budget, our actuaries estimated that, to the nearest tenth of a percentage point, the FY 2017 documentation and coding adjustment factor that will recoup as closely as possible \$11 billion from FY 2014 through FY 2017 without exceeding this amount is -1.5 percentage points. Based on those updated estimates by the Office of the Actuary using the Midsession Review of the President's FY 2017 Budget, we made a -1.5 percentage point adjustment for FY 2017 as the final adjustment required under section 631 of the ATRA. The estimates by our actuaries related to this finalized adjustment were included in a memorandum that we made publicly available on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2017-IPPS-Final-Rule-Home-Page-Items/FY2017-IPPS-Final-Rule-OACT.html>.

3. Proposed Adjustment for FY 2018 Required Under Section 414 of Public Law 114–10 (MACRA) and Section 15005 of Public Law 114–255

As stated in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56785), once the recoupment required under section 631 of the ATRA was complete, we had anticipated making a single positive adjustment in FY 2018 to offset the reductions required to recoup the \$11 billion under section 631 of the ATRA. However, section 414 of the MACRA (which was enacted on April 16, 2015) replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percentage point positive adjustment for each of FYs 2018 through 2023. In the FY 2017 rulemaking, we indicated that we would address the adjustments for FY 2018 and later fiscal years in future rulemaking. As noted previously, section 15005 of the 21st Century Cures Act (Pub. L. 114–255), which was enacted on December 13, 2016, amended section 7(b)(1)(B) of the TMA, as amended by section 631 of the ATRA and section 414 of the MACRA, to reduce the adjustment for FY 2018 from a 0.5 percentage point to a 0.4588 percentage point. We believe the directive under section 15005 of Public Law 114–255 is clear. Therefore, for FY 2018, we are proposing to implement the required +0.4588 percentage point adjustment to the standardized amount. This is a permanent adjustment to payment rates. While we are not proposing future adjustments required under section 414 of the MACRA and section 15005 of Public Law 114–255 at

this time, we expect to propose positive 0.5 percentage point adjustments to the standardized amounts for FYs 2019 through 2023.

E. Refinement of the MS–DRG Relative Weight Calculation

1. Background

Beginning in FY 2007, we implemented relative weights for DRGs based on cost report data instead of charge information. We refer readers to the FY 2007 IPPS final rule (71 FR 47882) for a detailed discussion of our final policy for calculating the cost-based DRG relative weights and to the FY 2008 IPPS final rule with comment period (72 FR 47199) for information on how we blended relative weights based on the CMS DRGs and MS–DRGs. We also refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56785 through 56787) for a detailed discussion of the history of changes to the number of cost centers used in calculating the DRG relative weights. Since FY 2014, we calculate the IPPS MS–DRG relative weights using 19 CCRs, which now include distinct CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization.

2. Discussion of Policy for FY 2018

Consistent with our established policy, we calculated the proposed MS–DRG relative weights for FY 2018 using two data sources: The MedPAR file as the claims data source and the HCRIS as the cost report data source. We adjusted the charges from the claims to costs by applying the 19 national average CCRs developed from the cost reports. The description of the calculation of the proposed 19 CCRs and the proposed MS–DRG relative weights for FY 2018 is included in section II.G. of the preamble to this FY 2018 IPPS/LTCH PPS proposed rule. As we did with the FY 2017 IPPS/LTCH PPS final rule, for this proposed rule, we are providing the version of the HCRIS from which we calculated these proposed 19 CCRs on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>. Click on the link on the left side of the screen titled, “FY 2018 IPPS Proposed Rule Home Page” or “Acute Inpatient Files for Download.”

F. Proposed Changes to Specific MS–DRG Classifications

1. Discussion of Changes to Coding System and Basis for Proposed FY 2018 MS–DRG Updates

a. Conversion of MS–DRGs to the International Classification of Diseases, 10th Revision (ICD–10)

As of October 1, 2015, providers use the International Classification of Diseases, 10th Revision (ICD–10) coding system to report diagnoses and procedures for Medicare hospital inpatient services under the MS–DRG system instead of the ICD–9–CM coding system, which was used through September 30, 2015. The ICD–10 coding system includes the International Classification of Diseases, 10th Revision, Clinical Modification (ICD–10–CM) for diagnosis coding and the International Classification of Diseases, 10th Revision, Procedure Coding System (ICD–10–PCS) for inpatient hospital procedure coding, as well as the Official ICD–10–CM and ICD–10–PCS Guidelines for Coding and Reporting. For a detailed discussion of the conversion of the MS–DRGs to ICD–10, we refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56787 through 56789).

b. Basis for FY 2018 Proposed MS–DRG Updates

CMS has previously encouraged input from our stakeholders concerning the annual IPPS updates when that input is made available to us by December 7 of the year prior to the next annual proposed rule update. For example, to be considered for any updates or changes in FY 2018, comments and suggestions should have been submitted by December 7, 2016. The comments that were submitted in a timely manner for FY 2018 are discussed in this section of the preamble of this proposed rule. As CMS works with the public to examine the ICD–10 claims data used for updates to the ICD–10 MS–DRGs, we would like to examine areas where the MS–DRGs can be improved. This will require additional time for us to review requests from the public to make specific updates, analyze claims data, and consider any proposed updates. Given the need for more time to carefully evaluate requests and propose updates, we are changing the deadline to request updates to MS–DRGs to November 1 of each year. This will provide an additional 5 weeks for the data analysis and review process. Interested parties should submit any comments and suggestions for FY 2019 by November 1, 2017, via the CMS MS–

DRG Classification Change Requests
Mailbox located at:
[MSDRGClassificationChange@
cms.hhs.gov](mailto:MSDRGClassificationChange@cms.hhs.gov).

Following are the changes that we are proposing to the MS-DRGs for FY 2018 in this FY 2018 IPPS/LTCH PPS proposed rule. We are inviting public comments on each of the MS-DRG classification proposed changes as well as our proposals to maintain certain existing MS-DRG classifications discussed in this proposed rule. In some cases, we are proposing changes to the MS-DRG classifications based on our analysis of claims data. In other cases, we are proposing to maintain the existing MS-DRG classification based on our analysis of claims data. For this FY 2018 proposed rule, our MS-DRG analysis was based on ICD-10 claims data from the December 2016 update of the FY 2016 MedPAR file, which contains hospital bills received through September 30, 2016, for discharges occurring through September 30, 2016. In our discussion of the proposed MS-DRG reclassification changes, we referred to our analysis of claims data from the "December 2016 update of the FY 2016 MedPAR file".

As explained in previous rulemaking (76 FR 51487), in deciding whether to propose to make further modification to the MS-DRGs for particular circumstances brought to our attention, we consider whether the resource consumption and clinical characteristics of the patients with a given set of conditions are significantly different than the remaining patients represented in the MS-DRG. We evaluate patient care costs using average costs and lengths-of-stay and rely on the judgment of our clinical advisors to determine whether patients are clinically distinct

or similar to other patients represented in the MS-DRG. In evaluating resource costs, we consider both the absolute and percentage differences in average costs between the cases we select for review and the remainder of cases in the MS-DRG. We also consider variation in costs within these groups; that is, whether observed average differences are consistent across patients or attributable to cases that are extreme in terms of costs or length of stay, or both. Further, we consider the number of patients who will have a given set of characteristics and generally prefer not to create a new MS-DRG unless it would include a substantial number of cases.

In our examination of the claims data, we apply the following criteria established in FY 2008 (72 FR 47169) to determine if the creation of a new complication or comorbidity (CC) or major complication or comorbidity (MCC) subgroup within a base MS-DRG is warranted:

- A reduction in variance of costs of at least 3 percent.
- At least 5 percent of the patients in the MS-DRG fall within the CC or MCC subgroup.
- At least 500 cases are in the CC or MCC subgroup.
- There is at least a 20-percent difference in average costs between subgroups.
- There is a \$2,000 difference in average costs between subgroups.

In order to warrant creation of a CC or MCC subgroup within a base MS-DRG, the subgroup must meet all five of the criteria.

2. MDC 1 (Diseases and Disorders of the Nervous System)

a. Functional Quadriplegia

We received a request to reassign cases identified by diagnosis code R53.2 (Functional quadriplegia) from MS-DRGs 052 and 053 (Spinal Disorders and Injuries with and without CC/MCC, respectively). The requestor stated that because functional quadriplegia does not involve any spinal injury or pathology, cases identified by the diagnosis code should not be assigned to MS-DRGs 052 and 053. However, the requestor did not suggest an alternative MS-DRG assignment.

Section I.C.18.f. of the FY 2017 ICD-10-CM Official Coding Guidelines addresses the coding for the diagnosis of functional quadriplegia. Section I.C.18.f. states that functional quadriplegia (described by diagnosis code R53.2) is the lack of ability to use one's limbs or to ambulate due to extreme debility. The condition is not associated with neurologic deficit or injury, and diagnosis code R53.2 should not be used to identify cases of neurologic quadriplegia. In addition, the Guidelines state that the diagnosis code should only be assigned if functional quadriplegia is specifically documented by a physician in the medical record, and the diagnosis of functional quadriplegia is not associated with a neurologic deficit or injury. A physician may document the diagnosis of functional quadriplegia as occurring with a variety of conditions.

We examined claims data from the December 2016 update of the FY 2016 MedPAR file on cases reporting diagnosis code R53.2 in MS-DRGs 052 and 053. Our findings are shown in the table below.

CASES REPORTING FUNCTIONAL QUADRIPELGIA IN MS-DRGS 052 AND 053

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 052—All cases	865	5.4	\$10,247
MS-DRG 052—Cases reporting diagnosis code R53.2	63	4.9	6,420
MS-DRG 053—All cases	239	3.3	6,326
MS-DRG 053—Cases reporting diagnosis code R53.2	16	3.3	2,318

As shown in the table above, for MS-DRG 052, there were a total of 865 cases with an average length of stay of 5.4 days and average costs of \$10,247. Of the 865 cases in MS-DRG 052, there were 63 cases that reported a principal diagnosis of functional quadriplegia, with an average length of stay of 4.9 days and average costs of \$6,420. For MS-DRG 053, there were a total of 239 cases, with an average length of stay of

3.3 days and average costs of \$6,326. Of the 239 cases in MS-DRG 053, there were 16 cases that reported a principal diagnosis of functional quadriplegia, with an average length of stay of 3.3 days and average costs of \$2,318.

To address the request to reassign cases reporting a diagnosis of functional quadriplegia to a different MS-DRG, we reviewed the data for a total of 79 cases (63 cases in MS-DRG 052 and 16 cases

in MS-DRG 053) that reported a principal diagnosis of functional quadriplegia in MS-DRGs 052 and 053. As shown in the table above, our data analysis demonstrates that the average costs for these 79 cases are lower than the average costs of all cases in MS-DRGs 052 and 053 (\$6,420 compared to \$10,247 for all cases in MS-DRG 052, and \$2,318 compared to \$6,326 for all cases in MS-DRG 053), and the average

lengths of stay are shorter for cases reporting a diagnosis of functional quadriplegia in MS-DRG 052 (4.9 days compared to 5.4 days for all cases in MS-DRG 052), but equal for cases in MS-DRG 053 (3.3 days for cases reporting a diagnosis of functional quadriplegia and for all cases).

Our clinical advisors reviewed this issue and agreed that a diagnosis of functional quadriplegia does not involve a spinal disorder or injury, and may be associated with, or the result of, a variety of underlying conditions. Our clinical advisors also agreed that it is not clinically appropriate to include cases reporting a diagnosis of functional quadriplegia within MS-DRGs 052 and

053 because these cases do not involve a spinal disorder or injury. Therefore, given the fact that functional quadriplegia can be the result of a variety of other conditions, we reviewed the MS-DRGs in order to identify a more appropriate placement for cases reporting this diagnosis. Our clinical advisors recommended assigning cases representing a diagnosis of functional quadriplegia from MS-DRGs 052 and 053 to MS-DRGs 091, 092, and 093 (Other Disorders of Nervous System with MCC, with CC, and without CC/MCC, respectively). Within each MDC, there are MS-DRGs that describe a variety of other conditions that do not

have the clinical characteristics of the more specific MS-DRGs. In this case, MS-DRGs 091, 092, and 093 describe a variety of other disorders of the nervous system that are not clinically similar in characteristics to the disorders described by MS-DRGs 052 and 053. Our clinical advisors believe that MS-DRGs 091, 092, and 093 are more appropriate MS-DRG assignments for cases representing a diagnosis of functional quadriplegia.

We examined claims data from the December 2016 update of the FY 2016 MedPAR file on cases in MS-DRGs 091, 092, and 093. Our findings are shown in the table below.

CASES IN MS-DRGs 091, 092, AND 093

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 091—All cases	12,607	5.6	\$10,815
MS-DRG 092—All cases	19,392	3.9	6,706
MS-DRG 093—All cases	8,120	2.7	5,253

As shown in the table above, for MS-DRG 091, there were a total of 12,607 cases, with an average length of stay of 5.6 days and average costs of \$10,815. For MS-DRG 092, there were a total of 19,392 cases, with an average length of stay of 3.9 days and average costs of \$6,706. For MS-DRG 093, there were a total of 8,120 cases, with an average length of stay of 2.7 days and average costs of \$5,253. As stated earlier, of the 865 total cases in MS-DRG 052, there were 63 cases that reported a principal diagnosis of functional quadriplegia, with an average length of stay of 4.9 days and average costs of \$6,420. Of the 239 total cases in MS-DRG 053, there were 16 cases that reported a principal diagnosis of functional quadriplegia, with an average length of stay of 3.3 days and average costs of \$2,318. The average lengths-of-stay for cases reporting a diagnosis of functional quadriplegia in MS-DRGs 052 and 053 are similar to the average lengths of stay for cases found in MS-DRGs 091, 092 and 093 (4.9 days and 3.3 days for cases in MS-DRGs 052 and 053, respectively, compared to 5.6 days, 3.9 days, and 2.7 days, respectively, for cases in MS-DRGs 091, 092, and 093). The average costs for cases reporting a diagnosis of functional quadriplegia in MS-DRGs 052 and 053 are \$6,420 and \$2,318, respectively, compared to \$10,815, \$6,706, and \$5,253 for all cases in MS-DRGs 091, 092, and 093. The average costs for cases reporting a diagnosis of functional quadriplegia in MS-DRG 053 are lower than the average costs for all

cases in MS-DRG 093 without a CC or MCC (\$2,318 compared to \$5,253, respectively). The average costs for cases reporting a diagnosis of functional quadriplegia in MS-DRG 052 are \$6,420, which is lower than the average costs of \$10,815 for all cases in MS-DRG 091, but close to the average costs of \$6,706 for all cases in MS-DRG 092. While we acknowledge that the average costs for cases reporting a diagnosis of functional quadriplegia are lower than those cases within MS-DRGs 091, 092, and 093, as stated earlier, the average costs of cases reporting a diagnosis of functional quadriplegia also are lower than the average costs of all cases in MS-DRGs 052 and 053 where these cases are currently assigned.

Our clinical advisors reviewed the clinical issues as well as the claims data for MS-DRGs 052, 053, 091, 092, and 093. As a result of this review, they recommended that cases reporting a diagnosis of functional quadriplegia be reassigned from MS-DRGs 052 and 053 to MS-DRGs 091, 092, and 093 because the current MS-DRG assignment is not clinically appropriate. Our clinical advisors stated that reassigning these cases to MS-DRGs 091, 092, and 093 is more appropriate because this set of MS-DRGs includes a variety of nervous system disorders that are not appropriately classified to more specific MS-DRGs within MDC 1. Therefore, we are proposing to reassign cases identified by diagnosis code R53.2 from MS-DRGs 052 and 053 to MS-DRGs 091, 092, and 093 for FY 2018.

We are inviting public comments on our proposal.

b. Responsive Neurostimulator (RNS®) System

We received a request to modify the MS-DRG assignment for cases involving the use of the RNS® neurostimulator, a cranially implanted neurostimulator that is a treatment option for persons diagnosed with medically intractable epilepsy. Cases involving the use of the RNS® neurostimulator are assigned to MS-DRG 023 (Craniotomy with Major Device Implant or Acute Complex Central Nervous System (CNS) Principal Diagnosis (PDX) with MCC or Chemo Implant) and MS-DRG 024 (Craniotomy with Major Device Implant or Acute Complex Central Nervous System (CNS) Principal Diagnosis (PDX) without MCC).

Cases involving the use of the RNS® neurostimulator generator and leads are captured within the descriptions of four ICD-10-PCS codes. ICD-10-PCS code 0NH00NZ (Insertion of neurostimulator generator into skull, open approach) captures the use of the neurostimulator generator, and the other three ICD-10-PCS codes, 00H00MZ (Insertion of neurostimulator lead into brain, open approach), 00H03MZ (Insertion of neurostimulator lead into brain, percutaneous approach), and 00H04MZ (Insertion of neurostimulator lead into brain, percutaneous endoscopic approach) describe the insertions of the leads, depending on the approach used. The combination of an ICD-10-PCS

code capturing the use of the generator and another ICD-10-PCS code describing the specific approach used to insert the leads would capture the performance of the entire procedure.

The requestor stated that the RNS[®] neurostimulator received FDA pre-market approval on November 14, 2013, and is the first and only FDA-approved device used to provide responsive stimulation directly to the seizure onset zone in the brain. The RNS[®] neurostimulator includes a cranially implanted programmable neurostimulator connected to one or two depth and/or subdural cortical strip leads that are surgically placed in or on the brain at the seizure focus. The neurostimulator and leads are typically implanted during a single acute inpatient hospital procedure at a Comprehensive Epilepsy Center (CEC). The implanted neurostimulator continuously monitors brain electrical activity and is programmed by a physician to detect abnormal patterns of electrical activity that the physician believes may lead to seizures (epileptiform activity). In response to the detection of epileptiform activity, the device delivers brief, mild electrical pulses (responsive stimulation) to one or two epileptic foci. Detection and stimulation parameters are adjusted noninvasively by the physician to optimize control of epileptic seizures for each patient.

As the neurostimulator monitors brain activity, electrocorticograms (ECoGs) recorded immediately before and after certain events are stored for later review by the physician. The physician reviews the stored recordings to see the detections and the effects of stimulation. The physician can reprogram the neurostimulator at an in-person office appointment to change detection and stimulation settings based on this information, as well as review the patient's seizures.

The RNS[®] neurostimulator was approved for new technology add-on payments for FY 2015 and FY 2016, and new technology add-on payments were

discontinued for FY 2017. The new technology add-on payment application was discussed in the FY 2015 IPPS/LTCH PPS proposed and final rules (79 FR 28051 through 28054 and 79 FR 49946 through 49950, respectively), the FY 2016 IPPS/LTCH PPS proposed and final rules (80 FR 24427 through 24448 and 80 FR 49442 through 49443, respectively), and the FY 2017 IPPS/LTCH PPS proposed and final rules (81 FR 25036 through 25037 and 81 FR 56882 through 56884, respectively).

The requestor suggested the following three options for MS-DRG assignment updates for cases involving the RNS[®] neurostimulator:

- Create new MS-DRGs for cases involving the use of the RNS[®] neurostimulator. The requestor suggested MS-DRG XXX (Cranially Implanted Neurostimulators with MCC) and MS-DRG XXX (Cranially Implanted Neurostimulators without MCC) as possible MS-DRG titles. The requestor acknowledged that the number of cases assigned to this MS-DRG would be low, but anticipated that the number of cases would increase in the future.

- Reassign cases involving the use of the RNS[®] neurostimulator to MS-DRGs 020 and 021 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage with MCC, with CC, respectively) and update the MS-DRG logic and titles. The requestor asked CMS to reassign all cases involving the use of the RNS[®] neurostimulator that currently map to MS-DRG 023 (Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis with MCC or Chemo Implant) to MS-DRG 20, and change the title of MS-DRG 20 to "Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage or Cranially Implanted Neurostimulator with MCC." In addition, the requestor asked CMS to reassign all cases involving the use of the RNS[®] neurostimulator that currently map to MS-DRG 024 (Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis without MCC) to MS-DRG 021, and change the title of

MS-DRG 021 to "Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage with CC or Cranially Implanted Neurostimulator without MCC". The requestor believed that the majority of cases involving the use of the RNS[®] neurostimulator that map to MS-DRG 024 do not include a secondary diagnosis that is classified as a CC, and the average cost of cases involving the use of the RNS[®] neurostimulator without a CC is significantly higher than the average cost of all cases in MS-DRG 022 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage without CC/MCC). Therefore, the requestor stated that it would not be adequate to assign cases involving the use of the RNS[®] neurostimulator without a CC to MS-DRG 022.

- Reassign cases involving the use of the RNS[®] neurostimulator to other higher paying MS-DRGs that would provide adequate payment.

The requestor stated that it had analyzed data from two sources, which demonstrated that the average cost of cases involving the use of the RNS[®] neurostimulator was higher than the average cost of all cases in MS-DRGs 023 and 024 (the current MS-DRGs for cases involving the use of the RNS[®] neurostimulator). The requestor indicated that the data used for its analysis was obtained from hospitals performing the procedure, as well as from the FY 2015 MedPAR file.

The requestor also asked that CMS examine the cases representing cranially implanted neurostimulators and leads that were inserted for the treatment of epilepsy. The requestor pointed out that neurostimulators also are used in the treatment of movement disorders such as Parkinson's disease, essential tremor, or dystonia. The requestor asked that CMS identify those cases with a principal diagnosis of epilepsy, and identified the following ICD-10-CM codes that it believed were representative of potential epilepsy cases.

ICD-10-CM code	ICD-10-CM code title
G40.001	Localization-related (focal) (partial) idiopathic epilepsy and epileptic syndromes with seizures of localized onset, not intractable, with status epilepticus.
G40.009	Localization-related (focal) (partial) idiopathic epilepsy and epileptic syndromes with seizures of localized onset, not intractable, without status epilepticus.
G40.011	Localization-related (focal) (partial) idiopathic epilepsy and epileptic syndromes with seizures of localized onset, intractable, with status epilepticus.
G40.019	Localization-related (focal) (partial) idiopathic epilepsy and epileptic syndromes with seizures of localized onset, intractable, without status epilepticus.
G40.101	Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with simple partial seizures, not intractable, with status epilepticus.
G40.119	Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with simple partial seizures, intractable, without status epilepticus.

ICD-10-CM code	ICD-10-CM code title
G40.201	Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with complex partial seizures, not intractable, with status epilepticus.
G40.209	Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with complex partial seizures, not intractable, without status epilepticus.
G40.211	Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with complex partial seizures, intractable, with status epilepticus.
G40.219	Localization-related (focal) (partial) symptomatic epilepsy and epileptic syndromes with complex partial seizures, intractable, without status epilepticus.
G40.301	Generalized idiopathic epilepsy and epileptic syndromes, not intractable, with status epilepticus.
G40.309	Generalized idiopathic epilepsy and epileptic syndromes, not intractable, without status epilepticus.
G40.311	Generalized idiopathic epilepsy and epileptic syndromes, intractable, with status epilepticus.
G40.319	Generalized idiopathic epilepsy and epileptic syndromes, intractable, without status epilepticus.
G40.401	Other generalized epilepsy and epileptic syndromes, not intractable, with status epilepticus.
G40.409	Other generalized epilepsy and epileptic syndromes, not intractable, without status epilepticus.
G40.411	Other generalized epilepsy and epileptic syndromes, intractable, with status epilepticus.
G40.419	Other generalized epilepsy and epileptic syndromes, intractable, without status epilepticus.
G40.501	Epileptic seizures related to external causes, not intractable, with status epilepticus.
G40.509	Epileptic seizures related to external causes, not intractable, without status epilepticus.
G40.801	Other epilepsy, not intractable, with status epilepticus.
G40.802	Other epilepsy, not intractable, without status epilepticus.
G40.803	Other epilepsy, intractable, with status epilepticus.
G40.804	Other epilepsy, intractable, without status epilepticus.
G40.811	Lennox-Gastaut syndrome, not intractable, with status epilepticus.
G40.812	Lennox-Gastaut syndrome, not intractable, without status epilepticus.
G40.813	Lennox-Gastaut syndrome, intractable, with status epilepticus.
G40.814	Lennox-Gastaut syndrome, intractable, without status epilepticus.
G40.821	Epileptic spasms, not intractable, with status epilepticus.
G40.822	Epileptic spasms, not intractable, without status epilepticus.
G40.823	Epileptic spasms, intractable, with status epilepticus.
G40.824	Epileptic spasms, intractable, without status epilepticus.
G40.89	Other seizures.
G40.901	Epilepsy, unspecified, not intractable, with status epilepticus.
G40.909	Epilepsy, unspecified, not intractable, without status epilepticus.
G40.911	Epilepsy, unspecified, intractable, with status epilepticus.
G40.919	Epilepsy, unspecified, intractable, without status epilepticus.

MS-DRGs 023 and 024 contain a number of cases representing neurostimulator generator and lead code combinations that are captured under a list referred to as “Major Device Implant.” The neurostimulator generators on this list are inserted into the skull, as well as into the subcutaneous areas of the chest, back, or abdomen. The leads are all inserted into the brain. The RNS[®] neurostimulator generators are inserted into the skull and the leads are inserted into the brain. The following three ICD-10-PCS code combinations capture the use of the RNS[®] neurostimulator and leads that would determine an assignment of a case to MS-DRGs 023 and 024, as shown in the “Major Device Implant” list:

- 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H00MZ (Insertion of neurostimulator lead into brain, open approach);
- 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H03MZ (Insertion of neurostimulator lead into brain, percutaneous approach); and
- 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H04MZ (Insertion of neurostimulator lead into brain, percutaneous endoscopic approach).

We examined claims data from the December 2016 update of the FY 2016 MedPAR file for all cases representing

the use of a neurostimulator in MS-DRGs 023 and 024 listed under the “Major Device Implant” list. As requested, we also examined the cases represented by the three neurostimulator code combinations, which capture the use of the RNS[®] neurostimulator that are a subset of the cases listed on the “Major Device Implant” list using the code combinations listed above, and that had a principal diagnosis of epilepsy from the list supplied by the requestor. The following tables show our findings for those cases in MS-DRGs 023 and 024 as well as findings for cases in MS-DRGs 020 and 021.

MS-DRGs 023 AND 024 [Neurostimulator Cases]

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 023—All cases	6,723	10.9	\$39,014
MS-DRG 023—Cases with neurostimulators (Major Device Implant list cases)	21	6.7	48,821
MS-DRG 023—Cases with neurostimulator generators inserted into skull (includes cases involving the use of the RNS [®] neurostimulator) and cases with a principal diagnosis of epilepsy	7	8.0	63,365
MS-DRG 024—All cases	2,275	5.5	27,574

MS-DRGs 023 AND 024—Continued
[Neurostimulator Cases]

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 024—Cases with neurostimulators (Major Device Implant list cases)	394	2.1	31,669
MS-DRG 024—Cases with neurostimulator generators inserted into skull (includes cases involving the use of the RNS [®] neurostimulator) and cases with a principal diagnosis of epilepsy	54	4.3	51,041

CASES IN MS-DRGs 020 AND 021

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 020—All cases	1,372	16.7	\$72,926
MS-DRG 021—All cases	336	13.5	\$54,385

As shown by the table above, for MS-DRG 023, we identified a total of 6,723 cases, with an average length of stay of 10.9 days and average costs of \$39,014. Of the 6,723 cases in MS-DRG 023, there were 21 cases representing the implantation of any type of neurostimulator generator with an average length of stay of 6.7 days, and average costs of \$48,821. Of the 21 neurostimulator generator cases, there were 7 cases with the neurostimulator generators inserted into skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy with an average length of stay of 8.0 days and average costs of \$63,365. For MS-DRG 024, we identified a total of 2,275 cases, with an average length of stay of 5.5 days and average costs of \$27,574. Of the 2,275 cases in MS-DRG 024, there were 394 cases representing the implantation of any type of neurostimulator generator with an average length of stay of 2.1 days and average costs of \$31,669. Of the 394 neurostimulator generator cases, there were 54 cases with the neurostimulator generators inserted into skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy with an average length of stay of 4.3 days and average costs of \$51,041.

There were only 61 cases involving the use of the RNS[®] neurostimulator with a principal diagnosis of epilepsy in MS-DRGs 023 and 024 (7 and 54, respectively). Our clinical advisors reviewed this issue, and agreed that this number of cases is too small on which to base a rationale for creating a new MS-DRG. Basing a new MS-DRG on such a small number of cases (61) could lead to distortion in the relative payment weights for the MS-DRG because several expensive cases could impact the overall relative payment weight. Having larger clinical cohesive

groups within an MS-DRG provides greater stability for annual updates to the relative payment weights.

We also examined the possibility of reassigning cases involving the use of the RNS[®] neurostimulator to MS-DRGs 020 and 021. As the table above shows, for MS-DRG 020, there were a total of 1,372 cases with an average length of stay of 16.7 days and average costs of \$72,926. For MS-DRG 021, there were a total of 336 cases with an average length of stay of 13.5 days and average costs of \$54,385. The cases in MS-DRG 023 with neurostimulator generators inserted into skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy have average costs that are \$9,561 lower than that for all cases in MS-DRG 020 (\$63,365 compared to \$72,926), and the average length of stay is 8.7 days shorter (8.0 days compared to 16.7 days). We do not believe these data support reassigning the cases in MS-DRG 023 with neurostimulator generators inserted into the skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy to MS-DRG 020. While the cases in MS-DRG 024 with neurostimulator generators inserted into the skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy have average costs that are similar to the average costs of cases in MS-DRG 021 (\$51,041 compared to \$54,385), they have an average length of stay that is 9.2 days shorter (4.3 days compared to 13.5 days). Our clinical advisors reviewed the clinical issues and the claims data, and did not support reassigning the cases with neurostimulator generators inserted into skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy from MS-DRGs 023 and 024 to MS-DRGs 020 and 021.

Our clinical advisors pointed out that the cases in MS-DRGs 020 and 021 have a principal diagnosis of a hemorrhage. The RNS[®] neurostimulator generators are not used to treat patients with diagnosis of a hemorrhage. Therefore, our clinical advisors stated that it was inappropriate to reassign cases representing a principal diagnosis of epilepsy to an MS-DRG that contains cases that represent the treatment of intracranial hemorrhage. They also stated that the differences in average length of stay and average costs support this recommendation.

We then explored alternative MS-DRG assignments, as was requested. We noted that the 7 cases with the neurostimulator generators inserted into the skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy had an average length of stay of 8.0 days and average costs of \$63,365, as compared to the 6,723 cases in MS-DRG 023 that had an average length of stay of 10.9 days and average costs of \$39,014. While these neurostimulator cases had average costs that were \$24,351 higher than the average costs of all cases in MS-DRG 023, there were only a total of 7 cases. There may have been other factors contributing to the higher costs. We noted that the 54 cases with the neurostimulator generators inserted into skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy in MS-DRG 024 had average costs of \$51,041 and an average length of stay of 4.3 days, compared to average costs of \$27,574 and average length of stay of 5.5 days for all cases in MS-DRG 024. By reassigning all cases with the neurostimulator generators inserted into the skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy to MS-DRG 023, even if there is not a MCC

present, the cases would receive higher payment. The average costs of MS-DRG 023 were \$39,014, compared to the average costs of \$51,041 for the cases with the neurostimulator generators inserted into skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy in MS-DRG 024. Our clinical advisors reviewed the clinical issues and the claims data, and supported the recommendation to reassign the cases with the neurostimulator generators inserted into skull (including cases involving the use of the RNS[®] neurostimulator) and a principal diagnosis of epilepsy to MS-DRG 023, even if there is not a MCC reported. Therefore, we are proposing to reassign all cases with a principal diagnosis of epilepsy from the epilepsy diagnosis list provided earlier, and one of the following ICD-10-PCS code combinations capturing cases with the neurostimulator generators inserted into the skull (including cases involving the use of the RNS[®] neurostimulator), to MS-DRG 023, even if there is no MCC reported:

- 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H00MZ (Insertion of neurostimulator lead into brain, open approach);
 - 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H03MZ (Insertion of neurostimulator lead into brain, percutaneous approach); and
 - 0NH00NZ (Insertion of neurostimulator generator into skull, open approach), in combination with 00H04MZ (Insertion of neurostimulator lead into brain, percutaneous endoscopic approach).
- We also are proposing to change the title of MS-DRG 023 from “Craniotomy with Major Device Implant or Acute Complex Central Nervous System (CNS) Principal Diagnosis (PDX) with MCC or Chemo Implant” to “Craniotomy with Major Device Implant or Acute Complex Central Nervous System (CNS) Principal Diagnosis (PDX) with MCC or Chemotherapy Implant or Epilepsy with Neurostimulator” to reflect the proposed modifications to MS-DRG assignments.

We are inviting public comments on our proposals.

c. Precerebral Occlusion or Transient Ischemic Attack With Thrombolytic

We received a request to add the ICD-10-CM diagnosis codes currently assigned to MS-DRGs 067 and 068 (Nonspecific CVA and Precerebral Occlusion without Infarction with MCC and without MCC, respectively) and the ICD-10-CM diagnosis codes currently assigned to MS-DRG 069 (Transient Ischemia) to the GROUPE logic for MS-DRGs 061, 062, and 063 (Acute Ischemic Stroke with Use of Thrombolytic Agent with MCC, with CC, and without CC/MCC, respectively) when those conditions are sequenced as the principal diagnosis and reported with an ICD-10-PCS procedure code describing use of a thrombolytic agent (for example, tPA).

The ICD-10-CM diagnosis codes displayed in the table below identify the conditions that are assigned to MS-DRGs 067 and 068 when reported as a principal diagnosis.

ICD-10-CM code	Code description
I65.01	Occlusion and stenosis of right vertebral artery.
I65.02	Occlusion and stenosis of left vertebral artery.
I65.03	Occlusion and stenosis of bilateral vertebral arteries.
I65.09	Occlusion and stenosis of unspecified vertebral artery.
I65.1	Occlusion and stenosis of basilar artery.
I65.21	Occlusion and stenosis of right carotid artery.
I65.22	Occlusion and stenosis of left carotid artery.
I65.23	Occlusion and stenosis of bilateral carotid arteries.
I65.29	Occlusion and stenosis of unspecified carotid artery.
I65.8	Occlusion and stenosis of other precerebral arteries.
I65.9	Occlusion and stenosis of unspecified precerebral artery.
I66.01	Occlusion and stenosis of right middle cerebral artery.
I66.02	Occlusion and stenosis of left middle cerebral artery.
I66.03	Occlusion and stenosis of bilateral middle cerebral arteries.
I66.09	Occlusion and stenosis of unspecified middle cerebral artery.
I66.11	Occlusion and stenosis of right anterior cerebral artery.
I66.12	Occlusion and stenosis of left anterior cerebral artery.
I66.13	Occlusion and stenosis of bilateral anterior cerebral arteries.
I66.19	Occlusion and stenosis of unspecified anterior cerebral artery.
I66.21	Occlusion and stenosis of right posterior cerebral artery.
I66.22	Occlusion and stenosis of left posterior cerebral artery.
I66.23	Occlusion and stenosis of bilateral posterior cerebral arteries.
I66.29	Occlusion and stenosis of unspecified posterior cerebral artery.
I66.3	Occlusion and stenosis of cerebellar arteries.
I66.8	Occlusion and stenosis of other cerebral arteries.
I66.9	Occlusion and stenosis of unspecified cerebral artery.

The ICD-10-CM diagnosis codes displayed in the table below identify the conditions that are assigned to MS-DRG 069 when reported as a principal diagnosis.

ICD-10-CM code	Code description
G45.0	Vertebro-basilar artery syndrome.
G45.1	Carotid artery syndrome (hemispheric).
G45.2	Multiple and bilateral precerebral artery syndromes.
G45.8	Other transient cerebral ischemic attacks and related syndromes.
G45.9	Transient cerebral ischemic attack, unspecified.

ICD-10-CM code	Code description
G46.0	Middle cerebral artery syndrome.
G46.1	Anterior cerebral artery syndrome.
G46.2	Posterior cerebral artery syndrome.
I67.81	Acute cerebrovascular insufficiency.
I67.82	Cerebral ischemia.
I67.841	Reversible cerebrovascular vasoconstriction syndrome.
I67.848	Other cerebrovascular vasospasm and vasoconstriction.
I67.89	Other cerebrovascular disease.

The ICD-10-PCS procedure codes displayed in the table below describe use of a thrombolytic agent. These

procedure codes are designated as non-O.R. procedure codes affecting the MS-

DRG assignment for MS-DRGs 061, 062, and 063.

ICD-10-PCS code	Code description
3E03017	Introduction of other thrombolytic into peripheral vein, open approach.
3E03317	Introduction of other thrombolytic into peripheral vein, percutaneous approach.
3E04017	Introduction of other thrombolytic into central vein, open approach.
3E04317	Introduction of other thrombolytic into central vein, percutaneous approach.
3E05017	Introduction of other thrombolytic into peripheral artery, open approach.
3E05317	Introduction of other thrombolytic into peripheral artery, percutaneous approach.
3E06017	Introduction of other thrombolytic into central artery, open approach.
3E06317	Introduction of other thrombolytic into central artery, percutaneous approach.
3E08017	Introduction of other thrombolytic into heart, open approach.
3E08317	Introduction of other thrombolytic into heart, percutaneous approach.

At the onset of stroke symptoms, tPA must be given within 3 hours (or up to 4.5 hours for certain eligible patients) in an attempt to dissolve a clot and improve blood flow to the specific area affected in the brain. If, upon receiving the tPA, the stroke symptoms completely resolve within 24 hours and imaging studies (if performed) are negative, the patient has suffered what is clinically defined as a transient ischemic attack, not a stroke. According to the requestor, the current MS-DRG

assignments do not account for this subset of patients who were successfully treated with tPA to prevent a stroke.

In addition, the requestor expressed concerns regarding documentation and quality of the data. For example, the requestor noted that the terms “stroke-in-evolution” and “aborted stroke” may be documented as a “workaround” for a patient exhibiting symptoms of a stroke who receives tPA and, regardless of the outcome, would result in assignment to MS-DRG 061, 062, or 063. Therefore, in cases where the

patient’s stroke symptoms completely resolved upon receiving tPA and the patient clinically suffered a precerebral occlusion or transient ischemia, this documentation practice is incorrectly labeling these patients as having had a stroke and ultimately leading to inaccurate data.

We analyzed claims data from the December 2016 update of the FY 2016 MedPAR file for MS-DRGs 061, 062, and 063. Our findings are shown in the tables below.

MS-DRGs FOR ACUTE ISCHEMIC STROKE WITH USE OF THROMBOLYTIC AGENT

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 061—All cases	4,528	6.4	\$20,270
MS-DRG 062—All cases	8,600	4.2	14,124
MS-DRG 063—All cases	1,859	3.0	11,898

Our analysis also consisted of claims data for MS-DRGs 067 and 068 when reported with a procedure code describing the use of tPA. As shown in the table below, the total number of cases reported in MS-DRG 067 was 811, with an average length of stay of 4.8

days and average costs of \$10,248. There were 9 cases in MS-DRG 067 with a precerebral occlusion receiving tPA, with an average length of stay of 5.2 days and average costs of \$20,156. The total number of cases reported in MS-DRG 068 was 3,809, with an average

length of stay of 2.8 days and average costs of \$6,555. There were 33 cases in MS-DRG 068 with a precerebral occlusion receiving tPA, with an average length of stay of 4.3 days and average costs of \$13,814.

MS-DRGs FOR PRECEREBRAL OCCLUSION WITH USE OF THROMBOLYTIC AGENT

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 067—All cases	811	4.8	\$10,248
MS-DRG 067—Cases with tPA	9	5.2	20,156
MS-DRG 068—All cases	3,809	2.8	6,555

MS-DRGs FOR PRECEREBRAL OCCLUSION WITH USE OF THROMBOLYTIC AGENT—Continued

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 068—Cases with tPA	33	4.3	13,814

We recognize that while the volume of cases for patients with a diagnosis of precerebral occlusion receiving tPA in MS-DRGs 067 and 068 is relatively low, the average length of stay is longer, and the average costs for this subset of patients is approximately twice the

amount of the average costs in comparison to all cases in MS-DRGs 067 and 068.

We then analyzed claims data for cases in MS-DRG 069 when reported with a procedure code describing the use of tPA. As shown in the table below,

the total number of cases reported in MS-DRG 069 was 50,633, with an average length of stay of 2.5 days and average costs of \$5,518. There were 554 cases of transient ischemia receiving tPA, with an average length of stay of 3.2 days and average costs of \$12,481.

MS-DRG FOR TRANSIENT ISCHEMIA WITH USE OF THROMBOLYTIC AGENT

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 069—All cases	50,633	2.5	\$5,518
MS-DRG 069—Cases with tPA	554	3.2	12,481

Similar to the findings for MS-DRGs 067 and 068, the number of cases for transient ischemia receiving tPA in MS-DRG 069 was relatively low in comparison to all the cases in the MS-DRG, with a longer average length of stay and approximately twice the amount of average costs in comparison to all cases in MS-DRG 069.

The results of analysis of the data and the advice of our clinical advisors support adding the ICD-10-CM diagnosis codes in MS-DRGs 067, 068, and 069 to the list of principal diagnoses in MS-DRGs 061, 062, and 063 to better account for this subset of patients who were successfully treated with tPA to prevent a stroke, to identify the increasing use of thrombolytics at the onset of symptoms of a stroke, to further encourage appropriate physician documentation for a precerebral occlusion or transient ischemic attack when patients are treated with tPA, and to reflect more appropriate payment for the resources involved in evaluating and treating these patients. We believe this approach will improve accuracy of the data and assist in addressing the concern that facilities may be reporting incorrect diagnoses for this subset of patients.

Therefore, for FY 2018, we are proposing to add the ICD-10-CM diagnosis codes listed earlier in this section that are currently assigned to MS-DRGs 067 and 068 and the ICD-10-CM diagnosis codes currently assigned to MS-DRG 069 to the GROUPE logic for MS-DRGs 061, 062, and 063 when those conditions are sequenced as the principal diagnosis and reported with an ICD-10-PCS procedure code describing use of a thrombolytic agent (for example, tPA). We are inviting public comments on our proposal.

We also are proposing to retitle MS-DRGs 061, 062, and 063 as “Ischemic Stroke, Precerebral Occlusion or Transient Ischemia with Thrombolytic Agent with MCC, with CC and without CC/MCC”, respectively, and to retitle MS-DRG 069 as “Transient Ischemia without Thrombolytic”. We are inviting public comments on our proposals.

3. MDC 2 (Diseases and Disorders of the Eye: Swallowing Eye Drops (Tetrahydrozoline)

We received a request to reassign the following ICD-10-CM diagnosis codes that capture swallowing eye drops from MS-DRGs 124 and 125 (Other Disorders of the Eye with and without MCC, respectively) to MS-DRGs 917 and 918

(Poisoning and Toxic Effects of Drugs with and without MCC, respectively). The requestor described a case where a patient was treated following swallowing eye drops, specifically Tetrahydrozoline, which the provider considers to be a poisoning, not a disorder of the eye.

- T49.5X1A (Poisoning by ophthalmological drugs and preparations, accidental (unintentional), initial encounter);
- T49.5X2A (Poisoning by ophthalmological drugs and preparations, intentional self-harm, initial encounter);
- T49.5X3A (Poisoning by ophthalmological drugs and preparations, assault, initial encounter); and
- T49.5X4A (Poisoning by ophthalmological drugs and preparations, undetermined, initial encounter).

We agree with the requestor that the four diagnosis codes describe a poisoning, not a disorder of the eye. We examined claims data for cases in MS-DRGs 124 and 125 from the December 2016 update of the FY 2016 MedPAR file. Our findings are shown in the table below.

MS-DRG 124 AND 125 CASES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 124—All cases	874	4.8	\$8,826
MS-DRG 124—Cases reporting poisoning by ophthalmological drugs and preparations code	1	2.0	3,007
MS-DRG 125—All cases	3,205	3.3	5,565
MS-DRG 125—Cases reporting poisoning by ophthalmological drugs and preparations code	1	2.0	1,446

As shown in the table above, there were only 2 cases of poisoning by ophthalmological drugs and preparations—1 case in MS-DRG 124 with an average length of stay of 2 days and average costs of \$3,007 and 1 case in MS-DRG 125 with an average length of stay of 2 days and average costs of \$1,446. The case of poisoning by ophthalmological drugs and preparations in MS-DRG 124 had a

shorter average length of stay than the average length of stay for all cases in MS-DRG 124 (2.0 days compared to 4.8 days) and lower average costs than the average costs for all cases in MS-DRG 124 (\$3,007 compared to \$8,826). The case of poisoning by ophthalmological drugs and preparations in MS-DRG 125 also had a shorter average length of stay than the average length of stay for all cases in MS-DRG 125 (2.0 days

compared to 3.3 days) and lower average costs than the average costs for all cases in MS-DRG 125 (\$1,446 compared to \$5,565).

We also examined claims data on cases reported in MS-DRGs 917 and 918 from the December 2016 update of the FY 2016 MedPAR file. Our findings are shown in the table below.

MS-DRGs 917 AND 918 CASES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 917—All cases	32,381	4.8	\$9,882
MS-DRG 918—All cases	24,061	3.0	5,326

As shown in the table above, the 2 cases of poisoning by ophthalmological drugs and preparations also had shorter average lengths of stay than the average length of stay for all cases in MS-DRGs 917 and 918 (2.0 days compared to 4.8 days in MS-DRG 917 and 2.0 days compared to 3.0 days in MS-DRG 918). The average costs also were lower for the 2 cases of poisoning by ophthalmological drugs and preparations than the average costs for all cases in MS-DRGs 917 and 918 (\$3,007 compared to \$9,882 for all cases in MS-DRG 917 and \$1,446 compared to \$5,326 for all cases in MS-DRG 918). Therefore, cases with this type of poisoning had lower average lengths of stay and lower average costs than all other cases assigned to MS-DRGs 124 and 125 and cases in MS-DRGs 917 and 918 where poisonings are assigned.

Because the codes clearly capture a poisoning and not an eye disorder, we believe that these codes are more appropriately assigned to MS-DRGs 917 and 918 where other poisonings are

assigned. Our clinical advisors also reviewed this issue and agreed that the codes should be moved from MS-DRGs 124 and 125 to MS-DRGs 917 and 918 because they clearly capture a poisoning and not a disorder of the eye. Because MS-DRGs 917 and 918 contain cases with multiple types of poisonings, it is expected that some types of poisoning cases will have longer lengths of stay and greater average costs than other types of poisoning cases. Therefore, we are proposing to reassign the following ICD-10-CM diagnosis codes from MS-DRGs 124 and 125 to MS-DRGs 917 and 918 for FY 2018: T49.5X1A; T49.5X2A; T49.5X3A; and T49.5X4A.

We are inviting public comments on our proposal.

4. MDC 5 (Diseases and Disorders of the Circulatory System)

a. Percutaneous Cardiovascular Procedures and Insertion of a Radioactive Element

Currently, under ICD-10-PCS, the logic for MS-DRG 246 (Percutaneous

Cardiovascular Procedures with Drug-Eluting Stent with MCC or 4+ Vessels or Stents), MS-DRG 247 (Percutaneous Cardiovascular Procedures with Drug-Eluting Stent without MCC), MS-DRG 248 (Percutaneous Cardiovascular Procedures with Non-Drug-Eluting Stent with MCC or 4+ Vessels or Stents), and MS-DRG 249 (Percutaneous Cardiovascular Procedures with Non-Drug-Eluting Stent without MCC) includes six procedure codes that describe the insertion of a radioactive element. When any of these six procedure codes are reported without the reporting of a percutaneous cardiovascular procedure code, they are assigned to MS-DRG 264 (Other Circulatory System O.R. Procedures). The six specific procedure codes are shown in the table below.

ICD-10-PCS code	Code description
OWHC01Z	Insertion of radioactive element into mediastinum, open approach.
OWHC31Z	Insertion of radioactive element into mediastinum, percutaneous approach.
OWHC41Z	Insertion of radioactive element into mediastinum, percutaneous endoscopic approach.
OWHD01Z	Insertion of radioactive element into pericardial cavity, open approach.
OWHD31Z	Insertion of radioactive element into pericardial cavity, percutaneous approach.
OWHD41Z	Insertion of radioactive element into pericardial cavity, percutaneous endoscopic approach.

Unlike procedures involving the insertion of stents, none of the procedures described by the procedure codes listed above are performed in conjunction with a percutaneous cardiovascular procedure, and two of the six procedures described by these procedure codes (ICD-10-PCS codes OWHC01Z and OWHD01Z) are not performed using a percutaneous

approach, but rather describe an open approach to performing the specific procedure. Our clinical advisors agreed that these procedures should not be used to classify cases within MS-DRGs 246 through 249 because they are not performed in conjunction with a percutaneous cardiovascular procedure. Furthermore, the indications for the insertion of a radioactive element

typically involve a diagnosis of cancer, whereas the indications for the insertion of a coronary artery stent typically involve a diagnosis of coronary artery disease.

We conducted an analysis for the six procedures described by these procedure codes by reviewing the claims data for MS-DRGs 246 through 249 from the December 2016 update of

the FY 2016 MedPAR file. We did not find any cases where any one of the six procedure codes listed above was reported. As noted earlier, when any of these six procedure codes are reported without the reporting of a percutaneous cardiovascular procedure code, the case is assigned to MS-DRG 264. Therefore, our clinical advisors also agreed that it would be more appropriate to remove these six procedure codes from MS-DRGs 246 through 249, but maintain their current assignment in MS-DRG 264. Based on our analysis and the advice from our clinical advisors, for FY 2018, we are proposing to remove ICD-10-PCS procedure codes 0WHC01Z, 0WHC31Z, 0WHC41Z, 0WHD01Z, 0WHD31Z, and 0WHD41Z from MS-DRGs 246 through 249, but maintain their current assignment in MS-DRG 264.

We are inviting public comments on our proposal to remove the six procedure codes listed above from MS-DRGs 246 through 249. We also are inviting public comments on our proposal to maintain their current assignment in MS-DRG 264.

b. Proposed Modification of the Titles for MS-DRG 246 (Percutaneous Cardiovascular Procedures With Drug-Eluting Stent With MCC or 4+ Vessels or Stents) and MS-DRG 248 (Percutaneous Cardiovascular Procedures With Non-Drug-Eluting Stent with MCC or 4+ Vessels or Stents)

We are proposing to revise the titles for MS-DRGs 246 (Percutaneous Cardiovascular Procedures with Drug-Eluting Stent with MCC or 4+ Vessels or Stents) and MS-DRG 248 (Percutaneous Cardiovascular Procedures with Non-Drug-Eluting Stent with MCC or 4+ Vessels or Stents) to better reflect the ICD-10-PCS terminology of “arteries” versus “vessels” as used in the procedure code titles within the classification. Specifically, we are proposing to revise the title of MS-DRG 246 to “Percutaneous Cardiovascular Procedures with Drug-Eluting Stent with MCC or 4+ Arteries or Stents”. We are proposing to revise the title of MS-DRG 248 to “Percutaneous Cardiovascular Procedures with Non-Drug-Eluting Stent with MCC or 4+ Arteries or Stents”. We are inviting public comments on our proposals.

c. Transcatheter Aortic Valve Replacement (TAVR) and Left Atrial Appendage Closure (LAAC)

We received a request to create new MS-DRGs for cases involving

transcatheter aortic valve replacement (TAVR) and left atrial appendage closure (LAAC) procedures when performed in combination in the same operative episode. The requestor stated that there are both clinical and financial advantages for the patient when performing concomitant procedures. For example, the requestor indicated that the clinical advantages for the patient may include single exposure to anesthesia and a reduction in overall procedure time, while the financial advantages may include lower cost-sharing. The requestor further believed that a single hospitalization for these concomitant procedures could be cost-effective for various providers and payers.

TAVR is indicated and approved as a treatment option for patients diagnosed with symptomatic aortic stenosis who are not surgical candidates for traditional open surgical techniques. Cases involving TAVR procedures are assigned to MS-DRGs 266 and 267 (Endovascular Cardiac Valve Replacement with MCC and without MCC, respectively), and are identified by the following ICD-10-PCS procedure codes shown in the table below.

ICD-10-PCS code	Code description
02RF37Z	Replacement of aortic valve with autologous tissue substitute, percutaneous approach.
02RF38Z	Replacement of aortic valve with zooplasmic tissue, percutaneous approach.
02RF3JZ	Replacement of aortic valve with synthetic substitute, percutaneous approach.
02RF3KZ	Replacement of aortic valve with nonautologous tissue substitute, percutaneous approach.
02RF37H	Replacement of aortic valve with autologous tissue substitute, transapical, percutaneous approach.
02RF38H	Replacement of aortic valve with zooplasmic tissue, transapical, percutaneous approach.
02RF3JH	Replacement of aortic valve with synthetic substitute, transapical, percutaneous approach.
02RF3KH	Replacement of aortic valve with nonautologous tissue substitute, transapical, percutaneous approach.

LAAC is indicated and approved as a treatment option for patients diagnosed with atrial fibrillation. Cases involving LAAC procedures are assigned to MS-DRGs 273 and 274 (Percutaneous Intracardiac Procedures with MCC and without MCC, respectively), and are identified by ICD-10-PCS procedure code 02L73DK (Occlusion of left atrial appendage with intraluminal device, percutaneous approach).

The requestor suggested that the structure of the possible new MS-DRGs for TAVR procedures performed in combination with LAAC procedures could be modeled similar to the structure of MS-DRGs 266 and 267. While contemplating creation of the new MS-DRGs, the requestor asked

CMS to also consider subdividing the possible new MS-DRGs into two severity levels and title them as follows:

- Suggested MS-DRG 26x (Endovascular Cardiac Valve Replacement with LAAC with MCC); and
- Suggested MS-DRG 26x (Endovascular Cardiac Valve Replacement with LAAC without MCC).

We analyzed claims data from the December 2016 update of the FY 2016 MedPAR file for MS-DRGs 266 and 267 and identified the cases reporting TAVR procedures with and without an LAAC procedure. As shown in the table below, the data findings show that the total number of cases reported in MS-DRG 266 was 9,949, with an average length of stay of 7.2 days and average costs of

\$56,762. There were 9,872 cases involving a TAVR procedure, with an average length of stay of 7.2 days and average costs of \$56,628. There was only one case identified in MS-DRG 266 where both a TAVR and an LAAC procedure were reported. This case had an average length of stay of 21.0 days and average costs of \$60,226. For MS-DRG 267, the total number of cases found was 13,290, with an average length of stay of 3.5 days and average costs of \$45,297. There were 13,245 cases involving a TAVR procedure, with an average length of stay of 3.5 days and average costs of \$45,302. There were no cases identified in MS-DRG 267 where both a TAVR and an LAAC procedure were reported.

MS-DRGs FOR TAVR PROCEDURES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 266—All cases	9,949	7.2	\$56,762
MS-DRG 266—Cases with TAVR	9,872	7.2	56,628
MS-DRG 266—Cases TAVR and LAAC	1	21.0	60,226
MS-DRG 267—All cases	13,290	3.5	45,297
MS-DRG 267—Cases with TAVR	13,245	3.5	45,302
MS-DRG 267—Cases TAVR and LAAC	0	0	0

We then analyzed claims data in MS-DRGs 273 and 274 for cases reporting an LAAC procedure. As shown in the table below, the data findings show that the total number of cases reported in MS-DRG 273 was 6,541, with an average

length of stay of 7.7 days and average costs of \$26,042. There were 179 cases involving an LAAC procedure, with an average length of stay of 3.6 days and average costs of \$30,131. For MS-DRG 274, the total number of cases found

was 14,441, with an average length of stay of 3.0 days and average costs of \$20,267. There were 2,428 cases involving an LAAC procedure, with an average length of stay of 1.2 days and average costs of \$26,213.

MS-DRGs FOR LAAC PROCEDURES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 273—All cases	6,541	7.7	\$26,042
MS-DRG 273—Cases with LAAC	179	3.6	30,131
MS-DRG 274—All cases	14,441	3.0	20,267
MS-DRG 274—Cases with LAAC	2,428	1.2	26,213

The analysis of claims data for MS-DRGs 266, 267, 273, and 274 and input from our clinical advisors do not support creating new MS-DRGs for TAVR and LAAC procedures when performed in combination in the same operative episode. We found only one case in MS-DRG 266 where both a TAVR and an LAAC procedure were reported and the claims data for cases reporting an LAAC procedure in MS-DRGs 273 and 274 support their current assignment. Our clinical advisors agreed the current MS-DRG assignments are appropriate for each respective procedure.

Therefore, we are not proposing to create new MS-DRGs for cases involving TAVR and LAAC procedures when performed in combination in the same operative episode. We are inviting public comments on our proposal to maintain the current MS-DRG structure

for TAVR procedures in MS-DRGs 266 and 267, as well as the current MS-DRG structure for LAAC procedures in MS-DRGs 273 and 274.

d. Percutaneous Mitral Valve Replacement Procedures

We received a request to reassign four ICD-10-PCS procedure codes that describe percutaneous mitral valve replacement procedures from MS-DRGs 216 through 221 (Cardiac Valve and Other Major Cardiothoracic Procedures with and without Cardiac Catheterization with MCC, with CC and without CC/MCC, respectively) to MS-DRGs 266 and 267 (Endovascular Cardiac Valve Replacement with MCC and without MCC, respectively). The requestor indicated that there are inconsistencies in the current Grouper logic for endovascular cardiac valve replacement procedures. Specifically, the requestor stated that

the procedure codes that describe both the percutaneous approach and the transapical, percutaneous approach for the aortic and pulmonary valves are included in MS-DRGs 266 and 267. However, for the mitral valve, the Grouper logic only includes the procedure codes that describe the transapical, percutaneous approach.

The requestor also stated that when MS-DRGs 266 and 267 were created, the intent was to include percutaneous replacement procedures for all cardiac valves. Therefore, the requestor recommended that CMS reassign the four ICD-10-PCS procedure codes shown in the table below that describe mitral valve replacement procedures, performed with the percutaneous approach from MS-DRGs 216 through 221 to MS-DRGs 266 and 267 to more appropriately group these procedures within the MS-DRG structure.

ICD-10-PCS procedure code	Code description
02RG37Z	Replacement of mitral valve with autologous tissue substitute, percutaneous approach.
02RG38Z	Replacement of mitral valve with zooplasmic tissue, percutaneous approach.
02RG3JZ	Replacement of mitral valve with synthetic substitute, percutaneous approach.
02RG3KZ	Replacement of mitral valve with nonautologous tissue substitute, percutaneous approach.

We agree with the requestor regarding the intent of the creation of MS-DRGs 266 and 267. As discussed in the FY

2015 IPPS/LTCH PPS final rule (79 FR 49890 through 49893), MS-DRGs 266 and 267 were created to uniquely

classify the subset of high-risk cases representing patients who undergo a cardiac valve replacement procedure

performed by a percutaneous (endovascular) approach. As such, we agree that all cardiac valve replacement procedures should be grouped within the same MS-DRG. In FY 2015, under the ICD-9-CM classification, there was not a specific procedure code for a percutaneous mitral valve replacement procedure. Therefore, when we converted from the ICD-9 based MS-DRGs to the ICD-10 MS-DRGs, there was not a code available from which to replicate. We refer the reader to the FY 2015 IPPS/LTCH PPS final rule (79 FR 49890 through 49893) for a detailed discussion on the initial request to create new MS-DRGs for endovascular

cardiac valve replacement procedures, as well as the FY 2016 IPPS/LTCH PPS final rule (80 FR 49354 through 49358) and the FY 2017 IPPS/LTCH PPS final rule (81 FR 56787 through 56790) for a detailed discussion of the conversion to ICD-10 MS-DRGs, including our analysis of claims data and the need to accurately replicate the ICD-9-CM based MS-DRGs.

The requestor also noted that a proposal was discussed at the September 13-14, 2016 ICD-10 Coordination and Maintenance Committee meeting involving the creation of procedure codes that describe percutaneous tricuspid valve replacement procedures and, if

finalized, these new procedure codes would also be assigned to MS-DRGs 266 and 267.

As shown in the table below and in Table 6B.—New Procedure Codes, which is associated with this proposed rule and available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>, there are eight new procedure codes that describe tricuspid valve replacement procedures performed with percutaneous and transapical types of percutaneous approaches that will be effective October 1, 2017.

ICD-10-PCS procedure code	Code description
02RJ37H	Replacement of tricuspid valve with autologous tissue substitute, transapical, percutaneous approach.
02RJ37Z	Replacement of tricuspid valve with autologous tissue substitute, percutaneous approach.
02RJ38H	Replacement of tricuspid valve with zooplasic tissue, transapical, percutaneous approach.
02RJ38Z	Replacement of tricuspid valve with zooplasic tissue, percutaneous approach.
02RJ3JH	Replacement of tricuspid valve with synthetic substitute, transapical, percutaneous approach.
02RJ3JZ	Replacement of tricuspid valve with synthetic substitute, percutaneous approach.
02RJ3KH	Replacement of tricuspid valve with nonautologous tissue substitute, transapical, percutaneous approach.
02RJ3KZ	Replacement of tricuspid valve with nonautologous tissue substitute, percutaneous approach.

We agree with the requestor and believe that, in addition to the four procedure codes that describe the percutaneous mitral valve replacement procedures listed earlier in this section, the eight codes that describe percutaneous and transapical types of percutaneous tricuspid valve replacement procedures also should be grouped with the other endovascular cardiac valve replacement procedures. Therefore, we are proposing to reassign the four percutaneous mitral valve replacement procedures described by the procedure codes listed in the table above from MS-DRGs 216 through 221 to MS-DRGs 266 and 267. In addition, we are proposing to assign the eight new procedure codes (also listed in a separate table above) that describe percutaneous and transapical, percutaneous tricuspid valve replacement procedures to MS-DRGs 266 and 267.

We are inviting public comments on our proposals.

e. Percutaneous Tricuspid Valve Repair

We received a request to reassign cases reporting ICD-10-PCS procedure code 02UJ3JZ (Supplement tricuspid valve with synthetic substitute, percutaneous approach) from MS-DRGs 216 through 221 (Cardiac Valve and Other Major Cardiothoracic Procedures with and without Cardiac Catheterization with MCC, with CC and without CC/MCC, respectively) to MS-DRGs 228 and 229 (Other Cardiothoracic Procedures with MCC and without MCC, respectively). According to the requestor, reassigning cases involving these procedures would more appropriately align the cohesiveness with other clinically similar procedures, such as percutaneous mitral valve repair (for example, procedures involving the Mitraclip) described by procedure code 02UG3JZ (Supplement mitral valve with synthetic substitute, percutaneous approach), which are assigned to MS-DRGs 228 and 229.

The requestor noted that the FORMA Tricuspid Transcatheter Repair System

(herein after referred to as the FORMA system) is currently in clinical trials in the United States, Europe, and Canada, but has not received FDA approval. However, the FORMA system is presently available for compassionate use purposes. The FORMA system technology is indicated for use in the treatment of patients diagnosed with tricuspid regurgitation and occupies the regurgitant area of the affected valve, providing a surface for native leaflet coaptation. The requestor stated that the technology offers a viable alternative treatment using traditional tricuspid valve surgery. According to the requestor, the technology consists of a rail and a spacer, and the procedure to insert the device involves fluoroscopic imaging guidance.

We analyzed claims data from the December 2016 update of the FY 2016 MedPAR file for MS-DRGs 216 through 221 for cases reporting procedure code 02UJ3JZ (Supplement tricuspid valve with synthetic substitute, percutaneous approach). Our findings are shown in the following table.

MS-DRGs FOR CARDIAC VALVE AND OTHER MAJOR CARDIOTHORACIC PROCEDURES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 216—All cases	9,139	14.4	\$68,304
MS-DRG 216—Cases with percutaneous tricuspid valve repair	1	5.0	14,954
MS-DRG 217—All cases	3,536	8.9	45,857
MS-DRG 217—Cases with percutaneous tricuspid valve repair	1	3.0	16,234

MS-DRGs FOR CARDIAC VALVE AND OTHER MAJOR CARDIOTHORACIC PROCEDURES—Continued

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 218—All cases	498	5.9	41,274
MS-DRG 218—Cases with percutaneous tricuspid valve repair	0	0	0
MS-DRG 219—All cases	16,011	11.1	54,519
MS-DRG 219—Cases with percutaneous tricuspid valve repair	6	9.0	58,075
MS-DRG 220—All cases	18,476	6.8	37,506
MS-DRG 220—Cases with percutaneous tricuspid valve repair	1	5.0	90,155
MS-DRG 221—All cases	3,547	5.0	33,606
MS-DRG 221—Cases with percutaneous tricuspid valve repair	0	0	0

We also analyzed claims data for MS-DRGs 228 and 229. Our findings are shown in the following table below.

MS-DRGs FOR OTHER CARDIOTHORACIC PROCEDURES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 228—All cases	3,466	9.8	\$47,435
MS-DRG 229—All cases	4,553	4.9	33,347

The claims data show that there were very few cases reported for performing a percutaneous tricuspid valve repair procedure in MS-DRGs 216 through 221. Of the 6 cases found in MS-DRG 219, with average costs of \$58,075, the average cost of these cases aligned with the average cost of all cases in the MS-DRG assignment (\$54,519). The data analysis and our clinical advisors do not support reassigning cases reporting procedure code 02UJ3JZ to MS-DRGs 228 and 229. The current MS-DRG assignment for percutaneous tricuspid valve repair procedures to MS-DRGs 216 through 221 is clinically coherent with the other percutaneous procedures performed on the heart valves that are currently assigned to these MS-DRGs. Percutaneous repair of the aortic, pulmonary and tricuspid valves utilizing various tissue substitutes (autologous, nonautologous, zooplasmic, and synthetic) are assigned to MS-DRGs 216 through 221. The exception is the percutaneous mitral valve repair, which, as the requestor pointed out, is assigned to MS-DRGs 228 and 229 as discussed in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56809 through 56813). Our clinical advisors also agreed that the limited number of cases reported in MS-DRGs 216 through 221 does not warrant reassignment.

As a result of our review and the input from our clinical advisors, we are not proposing to reassign cases reporting procedure code 02UJ3JZ from MS-DRGs 216 through 221 to MS-DRGs 228 and 229.

We are inviting public comments on our proposal to maintain the current

MS-DRG assignment for cases reporting procedure code 02UJ3JZ.

5. MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue)

a. Total Ankle Replacement (TAR) Procedures

For FY 2018, we again received two requests for the reassignment of total ankle replacement (TAR) procedures to a different MS-DRG. TAR procedures are currently assigned to MS-DRGs 469 and 470 (Major Joint Replacement or Reattachment of Lower Extremity with and without MCC, respectively). This topic was discussed previously in the FY 2015 IPPS/LTCH PPS proposed and final rules (79 FR 28013 through 28015 and 79 FR 49896 through 49899, respectively) and in the FY 2017 IPPS/LTCH PPS proposed and final rules (81 FR 24989 through 24990 and 81 FR 56814 through 56816, respectively). For FY 2015 and FY 2017, we did not change the MS-DRG assignment for TAR procedures. The requestors indicated that TAR procedures are currently assigned to MS-DRGs 469 and 470, to which total hip replacement and total knee replacement procedures also are assigned. The requestors stated that there are significant clinical and cost differences among these procedures, which results in underpayment for TAR procedures. The requestors asked CMS to examine claims data for the following six ICD-10-PCS codes within MS-DRGs 469 and 470:

- 0SRF0J9 (Replacement of right ankle joint with synthetic substitute, cemented, open approach);
- 0SRF0JA (Replacement of right ankle joint with synthetic substitute, uncemented, open approach);
- 0SRF0JZ (Replacement of right ankle joint with synthetic substitute, open approach);
- 0SRG0J9 (Replacement of left ankle joint with synthetic substitute, cemented, open approach);
- 0SRG0JA (Replacement of left ankle joint with synthetic substitute, uncemented, open approach); and
- 0SRG0JZ (Replacement of left ankle joint with synthetic substitute, open approach).

The requestors recommended that, if the claims data show a disparity in costs between TAR procedures and total hip and knee replacement procedures, the TAR procedures be reassigned to a more appropriate MS-DRG.

The requestors also stated that total ankle replacement is a complicated surgery that involves the replacement of the damaged parts of the three bones that comprise the ankle joint, as compared to the two bones in hip and knee replacement procedures. Furthermore, as the smallest weight-bearing large joint in the body, the requestors stated that TAR procedures demand a complexity of implant device design, engineering, and manufacture to exacting functional specifications that is vastly different from that of total hip and knee replacement devices. One of the requestors stated that the ankle region typically has poorer circulation and thinner soft tissue coverage than the

hip and knee, leading to a higher risk of wound complications and infection that may be more challenging and expensive to treat. In addition, this requestor stated that the unique anatomical characteristics and function of the ankle

joint require a specialized surgical skill set, operative technique, and level of operating room resource utilization that is vastly dissimilar from that of total hip and knee replacement procedures.

We examined claims data from the December 2016 update of the FY 2016 MedPAR file on reported cases of TAR procedures in MS-DRGs 469 and 470. Our findings are shown in the table below.

TOTAL ANKLE REPLACEMENTS PROCEDURES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 469—All cases	25,778	6.7	\$22,139
MS-DRG 469—Cases reporting TAR procedure codes	31	4.6	23,828
MS-DRG 470—All cases	461,553	2.7	14,751
MS-DRG 470—Cases reporting TAR procedure codes	2,114	1.9	20,862

As shown in the table above, for MS-DRG 469, there were a total of 25,778 cases, with an average length of stay of 6.7 days and average costs of \$22,139. Of the 25,778 cases in MS-DRG 469, there were 31 cases reporting a TAR procedure, with an average length of stay of 4.6 days and average costs of \$23,828. For MS-DRG 470, there were a total of 461,553 cases, with an average length of stay of 2.7 days and average costs of \$14,751. Of the 461,553 cases in MS-DRG 470, there were 2,114 cases reporting a TAR procedure, with an average length of stay of 1.9 days and average costs of \$20,862. As mentioned earlier, there were only 31 TAR procedure cases in MS-DRG 469, and these cases had average costs of \$1,689 higher than the average costs of all cases within MS-DRG 469. The relatively small number of cases may have been impacted by other factors. Several expensive cases could impact the average costs for a very small number of patients. We also note that the average length of stay for the TAR procedure cases was 4.6 days, as compared to 6.7 days for all cases within MS-DRG 469. The 2,114 TAR procedure cases in MS-DRG 470 had average costs that were \$6,111 higher than the average costs of all cases in MS-DRG 470 (\$20,862 compared to \$14,751 for all cases). The data support reassigning all of the TAR procedures to MS-DRG 469, even when there is no MCC reported. While the average costs of the TAR procedures in MS-DRG 470 are lower than the average costs for all cases in MS-DRG 469 (\$20,862 compared to \$22,139), the average costs are much closer to the average costs of TAR procedure cases in MS-DRG 470.

Our clinical advisors reviewed this clinical issue and the claims data, and agreed that it is clinically appropriate to reassign all of the TAR procedure cases from MS-DRG 470 to MS-DRG 469, even when there is no MCC reported. The claims data support the fact that

these cases require more resources than other cases assigned to MS-DRG 470. Therefore, we are proposing to reassign the following TAR procedure codes from MS-DRG 470 to MS-DRG 469, even if there is no MCC reported: 0SRF0J9; 0SRF0JA; 0SRF0JZ; 0SRG0J9; 0SRG0JA; and 0SRG0JZ for FY 2018.

We are proposing to change the titles of MS-DRGs 469 and 470 to the following to reflect these proposed MS-DRG reassignments:

- Proposed retitle of MS-DRG 469: “Major Hip and Knee Joint Replacement or Reattachment of Lower Extremity with MCC or Total Ankle Replacement”; and
- Proposed retitle of MS-DRG 470: “Major Hip and Knee Joint Replacement or Reattachment of Lower Extremity without MCC.”

We are inviting public comments on our proposals.

b. Revision of Total Ankle Replacement (TAR) Procedures

We received two requests to modify the MS-DRG assignment for revision of total ankle replacement (TAR) procedures, which are assigned to MS-DRGs 515, 516, and 517 (Other Musculoskeletal System and Connective Tissue O.R. Procedures with MCC, with CC, and without CC/MCC, respectively). This topic was discussed in the FY 2015 IPPS/LTCH PPS proposed and final rules (79 FR 28013 through 28015 and 79 FR 49896 through 49899, respectively) and in the FY 2017 IPPS/LTCH PPS proposed and final rules (81 FR 24992 through 24993 and 81 FR 56819 through 56820, respectively). For FY 2015 and FY 2017, we did not change the MS-DRG assignment for revision of TAR procedures.

The requestors asked that CMS examine the following eight ICD-10-PCS codes for revision of TAR procedures, which are assigned to MS-DRGs 515, 516, and 517:

- 0SWF0JZ (Revision of synthetic substitute in right ankle joint, open approach);
- 0SWF3JZ (Revision of synthetic substitute in right ankle joint, percutaneous approach);
- 0SWF4JZ (Revision of synthetic substitute in right ankle joint, percutaneous endoscopic approach);
- 0SWFXJZ (Revision of synthetic substitute in right ankle joint, external approach);
- 0SWG0JZ (Revision of synthetic substitute in left ankle joint, open approach);
- 0SWG3JZ (Revision of synthetic substitute in left ankle joint, percutaneous approach);
- 0SWG4JZ (Revision of synthetic substitute in left ankle joint, percutaneous endoscopic approach); and
- 0SWGXJZ (Revision of synthetic substitute in left ankle joint, external approach).

One requestor stated that these ICD-10-PCS codes more specifically identify the revision of TAR procedures than the prior ICD-9-CM codes. Specifically, ICD-9-CM code 81.59 (Revision of joint replacement of lower extremity, not elsewhere classified) was an unspecified code, which included toe and foot joint revision procedures in addition to revision of TAR procedures. The requestor stated that claims data reporting these ICD-10-PCS codes would allow CMS to better identify revisions of TAR procedures, and determine if the procedures are assigned to the appropriate MS-DRGs.

One requestor suggested the following three options for MS-DRG assignments:

- Assign the ICD-10-PCS ankle revision procedure codes to MS-DRGs 466, 467, and 468 (Revision of Hip or Knee Replacement with MCC, with CC, and without CC/MCC, respectively), and rename MS-DRGs 466, 467, and 468 as “Revision of Hip, Knee or Ankle with MCC, with CC, and without CC/MCC”, respectively);

- Assign the ICD-10-PCS ankle revision procedure codes to MS-DRG 469 (Major Joint Replacement or Reattachment of Lower Extremity with MCC) to more appropriately recognize higher hospital procedure costs associated with revision of TAR procedures; or

- Establish a new MS-DRG for the assignment of revision of TAR procedures.

The other requestor asked that CMS consider reassigning revision of TAR procedures to MS-DRGs that better address the cost-to-payment differential, such as MS-DRGs 466, 467, and 468.

We examined claims data from the December 2016 update of the FY 2016 MedPAR file on reported cases of revision of TAR procedures, as well as cases assigned to MS-DRGs 466, 467, 468, and MS-DRG 469. Our findings are shown in the tables below.

REVISIONS OF JOINT REPLACEMENTS PROCEDURES

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 515—All cases	5,038	8.0	\$20,562
MS-DRG 515—Cases reporting revision of total ankle replacement procedure codes	0	0	0
MS-DRG 516—All cases	13,276	4.8	13,524
MS-DRG 516—Cases reporting revision of total ankle replacement procedure codes	2	2.5	11,400
MS-DRG 517—All cases	13,330	2.8	10,003
MS-DRG 517—Cases reporting revision of total ankle replacement procedure codes	4	1.5	7,423

CASES IN MS-DRGs 466, 467, 468, AND 469

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 466—All cases	3,886	8.4	\$33,720
MS-DRG 467—All cases	19,145	4.2	24,609
MS-DRG 468—All cases	16,529	2.7	20,208
MS-DRG 469—All cases	25,778	6.7	22,139

As shown in the tables above, there were only 6 cases representing revisions of TAR procedures with no cases in MS-DRG 515, two cases in MS-DRG 516, and four cases in MS-DRG 517. The limited number of six cases does not justify the creation of a new MS-DRG for the assignment of revision of TAR procedures. Our data analysis demonstrates that the average length of stay for the revision of TAR procedures was lower than that for all cases in MS-DRG 516 (2.5 days compared to 4.8 days), and the average costs were lower (\$11,400 compared to \$13,524). The average length of stay for the revision of TAR procedures also was lower than that for all cases in MS-DRG 517 (1.5 days compared to 2.8 days), and the average costs were lower (\$7,423 compared to \$10,003). The data do not support reassigning the cases from MS-DRGs 515, 516, and 517.

Furthermore, the average length of stay and average costs of cases in MS-DRGs 466, 467, 468, and 469 are significantly higher than those for the revision of TAR procedures in MS-DRG 516 and 517. The average length of stay for all cases in MS-DRGs 466, 467, 468, and 469 is 8.4, 4.2, 2.7, and 6.7 days, respectively, compared to the average length of stay of 2.5 and 1.5 days for cases representing revision of TAR procedures in MS-DRGs 516 and 517, respectively. The average costs for all cases in MS-DRGs 466, 467, 468, and

469 are \$33,720, \$24,609, \$20,208, and \$22,139, respectively, compared to the average costs of \$11,400 and \$7,423 for cases representing revision of TAR procedures in MS-DRGs 516 and 517, respectively. Therefore, the data do not support reassigning the cases to MS-DRGs 466, 467, 468, or 469.

Our clinical advisors reviewed the clinical issue and the claims data and agreed that the revision of TAR procedures are appropriately assigned to MS-DRGs 515, 516, and 517, along with other procedures that describe revisions of joint replacements of the lower extremities, including the foot and toe. Our clinical advisors did not support reassigning these cases to MS-DRGs 466, 467, 468, or 469, or creating a new MS-DRG. Therefore, based on the findings of our analysis of claims data and the advice of our clinical advisors, we are proposing to maintain the current MS-DRG assignment for revision of TAR procedures within MS-DRGs 515, 516, and 517 for FY 2018.

We are inviting public comments on our proposal.

c. Magnetic Controlled Growth Rods (MAGEC® System)

We received a request to add six ICD-10-PCS procedure codes that describe the use of magnetically controlled growth rods for the treatment of early onset scoliosis (MAGEC® System) to MS-DRGs 456, 457, and 458 (Spinal

Fusion Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions with MCC, with CC or without CC/MCC, respectively). The MAGEC® System was discussed in the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25040 through 25042) and final rule (81 FR 56888 through 56891) as a new technology add-on payment application. The application was approved for FY 2017 new technology add-on payments, effective with discharges occurring on and after October 1, 2016. The request for new procedure codes to identify the MAGEC® System technology was discussed at the March 9–10, 2016 ICD-10 Coordination and Maintenance Committee meeting. Six new procedure codes were approved, effective October 1, 2016, and were displayed in Table 6B.—New Procedure Codes associated with the FY 2017 IPPS/LTCH PPS final rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2017-IPPS-Final-Rule-Home-Page.html>). These six procedure codes are currently assigned to MS-DRGs 518, 519, and 520 (Back and Neck Procedure Except Spinal Fusion with MCC or Disc Device/Neurostimulator, with CC, or without CC/MCC, respectively) and are shown in the table below.

ICD-10-PCS code	Code description
XNS0032	Reposition of lumbar vertebra using magnetically controlled growth rod(s), open approach, new technology group 2.
XNS0432	Reposition of lumbar vertebra using magnetically controlled growth rod(s), percutaneous endoscopic approach, new technology group 2.
XNS3032	Reposition of cervical vertebra using magnetically controlled growth rod(s), open approach, new technology group 2.
XNS3432	Reposition of cervical vertebra using magnetically controlled growth rod(s), percutaneous endoscopic approach, new technology group 2.
XNS4032	Reposition of thoracic vertebra using magnetically controlled growth rod(s), open approach, new technology group 2.
XNS4432	Reposition of thoracic vertebra using magnetically controlled growth rod(s), percutaneous endoscopic approach, new technology group 2.

According to the requestor, adding these six procedure codes will allow these cases to group to MS-DRGs that more accurately reflect the diagnosis of early onset scoliosis for which the MAGEC® System is indicated. In addition, the requestor stated that because this technology is utilized on a small subset of patients with approximately 2,500 cases per year, adding these procedure codes to MS-DRGs 456, 457, and 458 would have little impact.

Because these six procedure codes shown in the table above were effective as of October 1, 2016, there are no MedPAR claims data available to analyze. More importantly, we note that cases are assigned to MS-DRGs 456, 457, and 458 when an actual spinal fusion procedure is performed. Our clinical advisors agree that use of the MAGEC® System's magnetically controlled growth rods technology alone does not constitute a spinal fusion.

Therefore, because there are no claims data available at this time and based on the advice of our clinical advisors, we are not proposing to add the six procedure codes to MS-DRGs 456, 457, or 458. If a spinal fusion procedure is performed along with the procedure to insert the MAGEC® System's magnetically controlled growth rods, it would be appropriate to report that a spinal fusion was performed and the case would be assigned to one of the spinal fusion MS-DRGs.

We are inviting public comments on our proposal to maintain the current Grouper logic for cases assigned to MS-DRGs 456, 457, and 458 and not add the six procedure codes describing the use of the MAGEC® System magnetically controlled growth rods. We also are inviting public comments on our proposal to maintain the assignment of the six procedure codes in MS-DRGs 518, 519, and 520.

d. Combined Anterior/Posterior Spinal Fusion

It was brought to our attention that 7 of the 10 new ICD-10-PCS procedure codes describing fusion using a nanotextured surface interbody fusion device were not added to the appropriate Grouper logic list for MS-DRGs 453, 454, and 455 (Combined Anterior/Posterior Spinal Fusion with MCC, with CC and without CC/MCC, respectively), effective October 1, 2016. The logic for MS-DRGs 453, 454, and 455 is comprised of two lists: An anterior spinal fusion list and a posterior spinal fusion list. Assignment to one of the combined spinal fusion MS-DRGs requires that a code from each list be reported.

The seven new ICD-10-PCS procedure codes currently included in the posterior spinal fusion list for MS-DRGs 453, 454, and 455 are shown in the table below.

ICD-10-PCS code	Code description
XRG6092	Fusion of thoracic vertebral joint using nanotextured surface interbody fusion device, open approach, new technology group 2.
XRG7092	Fusion of 2 to 7 thoracic vertebral joints using nanotextured surface interbody fusion device, open approach, new technology group 2.
XRG8092	Fusion of 8 or more thoracic vertebral joints using nanotextured surface interbody fusion device, open approach, new technology group 2.
XRGA092	Fusion of thoracolumbar vertebral joint using nanotextured surface interbody fusion device, open approach, new technology group 2.
XRGB092	Fusion of lumbar vertebral joint using nanotextured surface interbody fusion device, open approach, new technology group 2.
XRGC092	Fusion of 2 or more lumbar vertebral joints using nanotextured surface interbody fusion device, open approach, new technology group 2.
XRGD092	Fusion of lumbosacral joint using nanotextured surface interbody fusion device, open approach, new technology group 2.

We note that the remaining three new procedure codes are accurately reflected in the anterior spinal fusion list; that is, ICD-10-PCS code XRG1092 (Fusion of cervical vertebral joint using nanotextured surface interbody fusion device, open approach, new technology group 2); ICD-10-PCS code XRG2092 (Fusion of 2 or more cervical vertebral joints using nanotextured surface interbody fusion device, open approach, new technology group 2); and ICD-10-PCS code XRG4092 (Fusion of cervicothoracic vertebral joint using

nanotextured surface interbody fusion device, open approach, new technology group 2).

The seven procedure codes currently included in the posterior spinal fusion list describe an anterior spinal fusion by use of the interbody fusion device. In an interbody fusion, the anterior column of the spine is being fused. The results of our review of these procedure codes discussed below and the advice of our clinical advisors support moving the seven procedure codes from the posterior spinal fusion list to the

anterior spinal fusion list in the Grouper logic for MS-DRGs 453, 454, and 455. This will improve clinical accuracy and allow appropriate assignment to these MS-DRGs when both an anterior and posterior spinal fusion is performed.

During our review of the spinal fusion codes using a nanotextured surface interbody fusion device in MS-DRGs 453, 454, and 455, we identified 149 additional procedure codes that should be moved from the posterior spinal fusion list to the anterior spinal fusion

list. These codes describe spinal fusion of the anterior column with a posterior approach. As mentioned earlier, the logic for MS-DRGs 453, 454, and 455 is dependent upon a code from the anterior spinal fusion list and a code from the posterior spinal fusion list. Spinal fusion codes involving the anterior column should be included on the anterior spinal fusion list only. We are proposing to move the 149 ICD-10-

PCS procedure codes listed in Table 6P.3a. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) from the posterior spinal fusion list to the anterior spinal fusion list in MS-DRGs 453, 454, and 455.

In addition, we also identified 33 ICD-10-PCS procedure codes in the posterior spinal fusion list in MS-DRGs 453, 454, and 455 that describe an interbody fusion device in the posterior column and, therefore, are not considered clinically valid spinal fusion procedures. These procedure codes are shown in the table below.

ICD-10-PCS code	Code description
ORG00A1	Fusion of occipital-cervical joint with interbody fusion device, posterior approach, posterior column, open approach.
ORG03A1	Fusion of occipital-cervical joint with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORG04A1	Fusion of occipital-cervical joint with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
ORG10A1	Fusion of cervical vertebral joint with interbody fusion device, posterior approach, posterior column, open approach.
ORG13A1	Fusion of cervical vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORG14A1	Fusion of cervical vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
ORG20A1	Fusion of 2 or more cervical vertebral joints with interbody fusion device, posterior approach, posterior column, open approach.
ORG23A1	Fusion of 2 or more cervical vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORG24A1	Fusion of 2 or more cervical vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
ORG40A1	Fusion of cervicothoracic vertebral joint with interbody fusion device, posterior approach, posterior column, open approach.
ORG43A1	Fusion of cervicothoracic vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORG44A1	Fusion of cervicothoracic vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
ORG60A1	Fusion of thoracic vertebral joint with interbody fusion device, posterior approach, posterior column, open approach.
ORG63A1	Fusion of thoracic vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORG64A1	Fusion of thoracic vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
ORG70A1	Fusion of 2 to 7 thoracic vertebral joints with interbody fusion device, posterior approach, posterior column, open approach.
ORG73A1	Fusion of 2 to 7 thoracic vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORG74A1	Fusion of 2 to 7 thoracic vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
ORG80A1	Fusion of 8 or more thoracic vertebral joints with interbody fusion device, posterior approach, posterior column, open approach.
ORG83A1	Fusion of 8 or more thoracic vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORG84A1	Fusion of 8 or more thoracic vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
ORGA0A1	Fusion of thoracolumbar vertebral joint with interbody fusion device, posterior approach, posterior column, open approach.
ORGA3A1	Fusion of thoracolumbar vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous approach.
ORGA4A1	Fusion of thoracolumbar vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
OSG00A1	Fusion of lumbar vertebral joint with interbody fusion device, posterior approach, posterior column, open approach.
OSG03A1	Fusion of lumbar vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous approach.
OSG04A1	Fusion of lumbar vertebral joint with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
OSG10A1	Fusion of 2 or more lumbar vertebral joints with interbody fusion device, posterior approach, posterior column, open approach.
OSG13A1	Fusion of 2 or more lumbar vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous approach.
OSG14A1	Fusion of 2 or more lumbar vertebral joints with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.
OSG30A1	Fusion of lumbosacral joint with interbody fusion device, posterior approach, posterior column, open approach.
OSG33A1	Fusion of lumbosacral joint with interbody fusion device, posterior approach, posterior column, percutaneous approach.
OSG34A1	Fusion of lumbosacral joint with interbody fusion device, posterior approach, posterior column, percutaneous endoscopic approach.

We are proposing to delete these 33 procedure codes from MS-DRGs 453, 454, and 455 for FY 2018. We also note

that some of the above listed codes also may be included in the logic for MS-DRGs 456, 457, and 458 (Spinal Fusion

Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions with MCC, with CC or without

CC/MCC, respectively), MS-DRGs 459 and 460 (Spinal Fusion Except Cervical with MCC and without MCC, respectively), and MS-DRGs 471, 472, and 473 (Cervical Spinal Fusion with MCC, with CC and without CC/MCC, respectively). Therefore, we are proposing to delete the 33 procedure codes from the logic for those spinal fusion MS-DRGs as well. In addition, we are proposing to delete the 33 procedure codes from the ICD-10-PCS classification as shown in Table 6D.—Invalid Procedure Codes associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>).

In summary, we are inviting public comments on our proposal to move the seven procedure codes describing spinal fusion using a nanotextured surface interbody fusion device from the posterior spinal fusion list to the anterior spinal fusion list in the GROUPER logic for MS-DRGs 453, 454, and 455. We also are inviting public comments on our proposal to move the 149 procedure codes describing spinal fusion of the anterior column with a posterior approach from the posterior spinal fusion list to the anterior spinal fusion list in the GROUPER logic for MS-DRGs 453, 454, and 455. In addition, we are inviting public comments on our proposal to delete the 33 procedure codes describing spinal fusion of the posterior column with an interbody fusion device from MS-DRGs 453, 454, 455, 456, 457, 458, 459, 460, 471, 472, and 473, as well as from the ICD-10-PCS classification.

6. MDC 14 (Pregnancy, Childbirth and the Puerperium)

a. Vaginal Delivery and Complicating Diagnoses

In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56854), we noted that the code list as displayed in the ICD-10 MS-DRG Version 33 Definitions Manual for MS-DRG 774 (Vaginal Delivery with Complicating Diagnoses) required further analysis to clarify what constitutes a vaginal delivery to satisfy the ICD-10 MS-DRG logic. We stated our plans to conduct further analysis of the diagnosis code lists in MS-DRG 774 for FY 2018.

We believe that the Version 34 Definitions Manual and GROUPER logic for MS-DRG 774 continue to require additional analysis to determine how best to classify a vaginal delivery. For example, under MS-DRG 774, the Definitions Manual currently states that three conditions must be met, the first

of which is a vaginal delivery. To satisfy this first condition, codes that describe conditions or circumstances from among three lists of codes must be reported. The first list is comprised of ICD-10-CM diagnosis codes that may be reported as a principal diagnosis or a secondary diagnosis. These diagnosis codes describe conditions in which it is assumed that a vaginal delivery has occurred. The second list of codes is a list of ICD-10-PCS procedure codes that also describe circumstances in which it is assumed that a vaginal delivery occurred. The third list of codes identifies diagnoses describing the outcome of the delivery. Therefore, if any code from one of those three lists is reported, the first condition (vaginal delivery) is considered to be met for assignment to MS-DRG 774.

Our continued concern with the first list of ICD-10-CM diagnosis codes as currently displayed in the Definitions Manual under the first condition is that not all of the conditions necessarily reflect that a vaginal delivery occurred. Several of the diagnosis codes listed could also reflect that a cesarean delivery occurred. For example, ICD-10-CM diagnosis code O10.02 (Pre-existing essential hypertension complicating childbirth) does not specify that a vaginal delivery took place; yet it is included in the list of conditions that may be reported as a principal diagnosis or a secondary diagnosis in the GROUPER logic for a vaginal delivery. The reporting of this code also could be appropriate for a delivery that occurred by cesarean section.

As noted earlier, the second list of codes for the first condition are comprised of ICD-10-PCS procedure codes. While we agree that the current list of procedure codes in MS-DRG 774 may appropriately describe that a vaginal delivery occurred, we also believe this list could be improved and warrants closer review.

The third list of codes for the first condition in MS-DRG 774 includes conditions describing the outcome of the delivery that would be reported as secondary diagnoses. Similar to concerns with the first list of codes, we believe the conditions do not necessarily reflect that a vaginal delivery occurred because they also can be reported on claims where a cesarean delivery occurred.

For the second condition in MS-DRG 774 to be met, diagnosis codes that are identified as a complicating diagnosis from among two lists may be reported. The first list is comprised of ICD-10-CM diagnosis codes that may be reported as a principal or secondary

diagnosis. The second list is comprised of ICD-10-CM diagnosis codes that may be reported as a secondary diagnosis. Currently, there is only one code listed under the secondary diagnosis list. We have concerns with these lists and what is classified as a complicating diagnosis when reviewing the code lists for this and other MS-DRGs that use that logic in MDC 14.

For the third condition in MS-DRG 774 to be met, a limited set of O.R. procedures, including both extensive and nonextensive procedures, are listed. We have concerns with this third condition as being needed to satisfy the logic for a vaginal delivery MS-DRG.

In summary, the MS-DRG logic involving a vaginal delivery under MDC 14 is technically complex as a result of the requirements that must be met to satisfy assignment to the affected MS-DRGs. Upon review and discussion, our clinical advisors recommended, and we agree, that we should solicit public comments on further refinement to the following four MS-DRGs related to vaginal delivery: MS-DRG 767 (Vaginal Delivery with Sterilization and/or D&C); MS-DRG 768 (Vaginal Delivery with O.R. Procedure Except Sterilization and/or D&C); MS-DRG 774 (Vaginal Delivery with Complicating Diagnosis); and MS-DRG 775 (Vaginal Delivery without Complicating Diagnosis).

In addition, our clinical advisors agreed that we should solicit public comments on further refinement to the conditions defined as a complicating diagnosis in MS-DRG 774 and MS-DRG 781 (Other Antepartum Diagnoses with Medical Complications).

Therefore, we are soliciting public comments on which diagnosis or procedure codes, or both, should be considered in the logic to identify a vaginal delivery and which diagnosis codes should be considered in the logic to identify a complicating diagnosis. As MS-DRGs 767, 768, 774, 775, and 781 incorporate one or both aspects (vaginal delivery or complicating diagnosis), public comments that we receive from this solicitation will be helpful in determining what proposed revisions to the current logic should be made. We will review public comments received in response to this solicitation as we continue to evaluate these areas under MDC 14 and, if warranted, we would propose refinements for FY 2019. We are requesting that all comments be directed to the CMS MS-DRG Classification Change Request Mailbox located at: MSDRGClassificationChange@cms.hhs.gov by November 1, 2017.

b. MS–DRG 998 (Principal Diagnosis Invalid as Discharge Diagnosis)

The logic for MS–DRG 998 (Principal Diagnosis Invalid as Discharge Diagnosis) currently includes a list of diagnoses that are considered inappropriate for reporting as a principal diagnosis on an inpatient hospital claim. In other words, these conditions would reasonably be expected not to necessitate an inpatient admission. Examples of these diagnosis codes include what are referred to as the “Supervision of pregnancy” codes, as well as pregnancy, maternal care and fetal related codes with an “unspecified trimester”. We refer the reader to the ICD–10 Version 34 Definitions Manual which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2017-IPPS-Final-Rule-Home-Page-Items/FY2017-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending> for the complete list of diagnosis codes in MS–DRG 998 under MDC 14.

In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56840 through 56841), there was discussion regarding the supervision of “high-risk” pregnancy codes, including elderly primigravida

and multigravida specifically, with regard to removing them from the Unacceptable principal diagnosis edit code list in the Medicare Code Editor (MCE). After consultation with the staff at the CDC’s NCHS, we learned that the FY 2017 ICD–10–CM Official Guidelines for Coding and Reporting were updated to explain appropriate coding for this set of codes. As a result, the codes describing supervision of high-risk pregnancy (and other supervision of pregnancy codes) remained on the Unacceptable principal diagnosis edit code list in the MCE. Therefore, the MCE code edit is consistent with the logic of MS–DRG 998 (Principal Diagnosis Invalid as Discharge Diagnosis) for these supervision of pregnancy codes.

However, as a result of our review and consultation with our clinical advisors regarding the “unspecified trimester” codes in MS–DRG 998, we have determined that there are more appropriate MS–DRG assignments for this set of codes. Although it may seem unlikely that a patient would be admitted and ultimately discharged or transferred without the caregiver or medical personnel having any further knowledge of the exact trimester, it is conceivable that a situation may present itself. For example, the pregnant patient

may be from out of town or unable to communicate effectively. The fact that the specific trimester is not known or documented does not preclude the resources required to care for the patient with the particular diagnosis.

Therefore, as shown in Table 6P.3b. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>), we are proposing to remove the 314 ICD–10–CM diagnosis codes identified with “unspecified trimester” from MS–DRG 998 and reassign them to the MS–DRGs in which their counterparts (first trimester, second trimester, or third trimester) are currently assigned as specified in Column C. This would enable more appropriate MS–DRG assignments and payment for these cases. We are inviting public comments on our proposal.

c. MS–DRG 782 (Other Antepartum Diagnoses Without Medical Complications)

The following three ICD–10–CM diagnosis codes are currently on the principal diagnosis list for the MS–DRG 782 (Other Antepartum Diagnoses without Medical Complications) logic.

ICD–10–CM code	Code description
O09.41	Supervision of pregnancy with grand multiparity, first trimester.
O09.42	Supervision of pregnancy with grand multiparity, second trimester.
O09.43	Supervision of pregnancy with grand multiparity, third trimester.

It was brought to our attention that these codes also are included in the MCE Unacceptable principal diagnosis code edit list. As discussed earlier in section II.F.6.b. of the preamble of this proposed rule, the supervision of pregnancy codes are accurately reflected in the MCE code edit list for Unacceptable principal diagnosis. Therefore, it is not appropriate to include the three above listed codes in MS–DRG 782.

We are proposing to remove the three codes describing supervision of pregnancy from MS–DRG 782 and reassign them to MS–DRG 998 (Principal Diagnosis Invalid as Discharge Diagnosis) to reflect a more appropriate MS–DRG assignment. We are inviting public comments on our proposal.

d. Shock During or Following Labor and Delivery

We received a request to review ICD–10–CM diagnosis code O75.1 (Shock during or following labor and delivery),

which is currently assigned to MS–DRG 774 (Vaginal Delivery with Complicating Diagnosis), MS–DRG 767 (Vaginal Delivery with Sterilization and/or D&C), and MS–DRG 768 (Vaginal Delivery with O.R. Procedure Except Sterilization and/or D&C).

The requestor provided an example of a patient that delivered at Hospital A and was transferred to Hospital B for specialized care related to the diagnosis of shock. The claim for Hospital B resulted in assignment to a delivery MS–DRG, despite the fact that a delivery did not occur during that hospitalization. The requestor noted that, by not reporting the diagnosis code for shock, the claim grouped to a postpartum MS–DRG and recommended that we evaluate the issue further.

Our analysis initially involved reviewing the Grouper logic for MS–DRGs 774, 767 and 768. As discussed earlier in section II.F.14.a. of the preamble of this proposed rule, the Grouper logic for classification and assignment to MS–DRG 774 requires

that three conditions must be met, the first of which is a vaginal delivery. Similar Grouper logic applies for assignment to MS–DRGs 767 and 768, except that only two conditions must be met, with the first condition being a vaginal delivery. For each of these three MS–DRGs, to satisfy the first condition, one code that describes a condition or circumstance from among the three separate lists of codes must be reported. The first list is comprised of ICD–10–CM diagnosis codes that may be reported as a principal or secondary diagnosis. These diagnosis codes describe conditions in which it is assumed that a vaginal delivery has occurred. Among this first list is ICD–10–CM diagnosis code O75.1, which is included in the Grouper logic for MS–DRGs 774, 767 and 768 (under the first condition—vaginal delivery). We refer readers to the ICD–10 MS–DRG Version 34 Definitions Manual located via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatient>

PPS/FY2017-IPPS-Final-Rule-Home-Page-Items/FY2017-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending for documentation of the GROUPER logic associated with these MS-DRGs.

In addition, in MS-DRG 774, to satisfy the second condition, diagnosis codes that are identified as a complicating diagnosis from among two lists may be reported. The first list is comprised of ICD-10-CM diagnosis codes that may be reported as a principal or secondary diagnosis. The second list is comprised of ICD-10-CM diagnosis codes that may be reported as a secondary diagnosis. Currently, there is only one code listed under the secondary diagnosis list.

Next, our analysis involved reviewing the GROUPER logic for assignment to post-partum MS-DRG 769 (Postpartum and Post Abortion Diagnoses with Major Procedure) and MS-DRG 776 (Postpartum and Post Abortion Diagnoses without O.R. Procedure). The GROUPER logic for these postpartum MS-DRGs requires that a principal diagnosis be reported from a list of several conditions, such as those

following pregnancy, those complicating the puerperium, conditions that occurred during or following delivery and conditions associated with lactation disorders. For assignment to MS-DRG 769, the GROUPER logic also requires that a major procedure be reported in addition to a principal diagnosis from the list of conditions.

As a result of our analysis, we agree with the requestor that ICD-10-CM diagnosis code O75.1 should be added to the GROUPER logic for assignment to the postpartum MS-DRGs. This diagnosis code is consistent with other diagnosis codes structured within the GROUPER logic for assignment to MS-DRGs 769 and 776, and clearly represents a post-partum diagnosis with the terminology “during or following labor and delivery” in the title. We believe that adding this diagnosis code to the postpartum MS-DRGs will enable more appropriate MS-DRG assignment for cases where a delivery did not occur. Therefore, we are proposing the following:

- Removing ICD-10-CM diagnosis code O75.1 from the list of principal or

secondary diagnosis under the first condition—vaginal delivery GROUPER logic in MS-DRGs 774, 767, and 768;

- Moving ICD-10-CM diagnosis code O75.1 from the list of principal or secondary diagnosis under the second condition—complicating diagnosis for MS-DRG 774 to the secondary diagnosis list only; and

- Adding ICD-10-CM diagnosis code O75.1 to the principal diagnosis list GROUPER logic in MS-DRGs 769 and 776.

We are inviting public comments on our proposals.

7. MDC 15 (Newborns and Other Neonates With Conditions Originating in Perinatal Period): Observation and Evaluation of Newborn

We received a request to add the ICD-10-CM diagnosis codes describing observation and evaluation of newborns for suspected conditions that are ruled out to MS-DRG 795 (Normal Newborn). The 14 diagnosis codes describing observation and evaluation of newborn for suspected conditions ruled out are displayed in the table below.

ICD-10-CM code	Code description
Z05.0	Observation and evaluation of newborn for suspected cardiac condition ruled out.
Z05.1	Observation and evaluation of newborn for suspected infectious condition ruled out.
Z05.2	Observation and evaluation of newborn for suspected neurological condition ruled out.
Z05.3	Observation and evaluation of newborn for suspected respiratory condition ruled out.
Z05.41	Observation and evaluation of newborn for suspected genetic condition ruled out.
Z05.42	Observation and evaluation of newborn for suspected metabolic condition ruled out.
Z05.43	Observation and evaluation of newborn for suspected immunologic condition ruled out.
Z05.5	Observation and evaluation of newborn for suspected gastrointestinal condition ruled out.
Z05.6	Observation and evaluation of newborn for suspected genitourinary condition ruled out.
Z05.71	Observation and evaluation of newborn for suspected skin and subcutaneous tissue condition ruled out.
Z05.72	Observation and evaluation of newborn for suspected musculoskeletal condition ruled out.
Z05.73	Observation and evaluation of newborn for suspected connective tissue condition ruled out.
Z05.8	Observation and evaluation of newborn for other specified suspected condition ruled out.
Z05.9	Observation and evaluation of newborn for unspecified suspected condition ruled out.

The requestor expressed concern that currently when one of these ruled out codes is added to a newborn encounter with a principal diagnosis described by ICD-10-CM code Z38.00 (Single liveborn infant, delivered vaginally), the case is assigned to MS-DRG 794 (Neonate with Other Significant Problems). The requestor stated that this assignment appears to be in error and that the assignment should instead be to MS-DRG 795 (Normal Newborn).

We reviewed Section I.C.16.b. of the 2017 ICD-10-CM Official Guidelines for Coding and Reporting which includes the following instructions for the diagnosis codes listed in the table above:

- Assign a code from category Z05 (Observation and evaluation of newborns and infants for suspected

conditions ruled out) to identify those instances when a healthy newborn is evaluated for a suspected condition that is determined after study not to be present. Do not use a code from category Z05 when the patient has identified signs or symptoms of a suspected problem; in such cases code the sign or symptom.

- A code from category Z05 may also be assigned as a principal or first-listed code for readmissions or encounters when the code from category Z38 code no longer applies. Codes from category Z05 are for use only for healthy newborns and infants for which no condition after study is found to be present.

- A code from category Z05 is to be used as a secondary code after the code from category Z38, Liveborn infants

according to place of birth and type of delivery.

After review of the guidelines and discussion with our clinical advisors, we agree with the requestor that the assignment of these codes to MS-DRG 794 is not accurate because the assignment incorrectly labels the newborns as having a significant problem when the condition does not truly exist. We and our clinical advisors also agree that the above list of diagnosis codes should be added to MS-DRG 795. Therefore, we are proposing to add the 14 diagnosis codes describing observation and evaluation of newborns for suspected conditions that are ruled out listed in the table above to the GROUPER logic for MS-DRG 795. We are inviting public comments on our proposals.

8. MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs): Complication Codes

We received a request to examine the ICD-10-CM diagnosis codes in the T85.8-series of codes that describe other specified complications of internal prosthetic devices, implants and grafts, not elsewhere classified and their respective MS-DRG assignments. According to the requestor, the 7th character values in this series of codes impact the MS-DRG assignment under MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs) and MDC 23 (Factors Influencing Health Status & Other Contacts with Health Services) that have resulted in inconsistencies (that is, shifts) between the MS-DRG

assignments under Version 33 and Version 34 of the ICD-10 MS-DRGs.

Under ICD-10-CM, diagnosis codes in the range of S00 through T88 require a 7th character value of “A-” initial encounter, “D-” subsequent encounter, or “S-” sequela to identify if the patient is undergoing active treatment for a condition. For complication codes, active treatment refers to treatment for the condition described by the code, even though it may be related to an earlier precipitating problem.

The requestor suggested that the following list of diagnosis codes with the 7th character “A” (initial encounter) may have been inadvertently assigned to the GROUPER logic in the list of diagnoses (*Assignment of Diagnosis Codes*) under MDC 23 because when one of these diagnosis codes was

reported with an O.R. procedure, the requestor found claims grouping to MS-DRG 939, 940, or 941 (O.R. Procedures with Diagnoses of Other Contact with Health Services with MCC, with CC and without CC/MCC, respectively) that had previously grouped to MDC 21 under Version 33 of the ICD-10 MS-DRGs. The requestor also suggested these codes may have been inadvertently assigned to the GROUPER logic list of principal diagnoses for MS-DRGs 949 and 950 (Aftercare with CC/MCC and without CC/MCC, respectively) under MDC 23 because it found claims that grouped to these MS-DRGs (949 and 950) when one of the following diagnosis codes was reported as a principal diagnosis that had previously grouped to MDC 21 under Version 33 of the ICD-10 MS-DRGs.

ICD-10-CM diagnosis code	Code description
T85.818A	Embolism due to other internal prosthetic devices, implants and grafts, initial encounter.
T85.828A	Fibrosis due to other internal prosthetic devices, implants and grafts, initial encounter.
T85.838A	Hemorrhage due to other internal prosthetic devices, implants and grafts, initial encounter.
T85.848A	Pain due to other internal prosthetic devices, implants and grafts, initial encounter.
T85.858A	Stenosis due to other internal prosthetic devices, implants and grafts, initial encounter.
T85.868A	Thrombosis due to other internal prosthetic devices, implants and grafts, initial encounter.
T85.898A	Other specified complication of other internal prosthetic devices, implants and grafts, initial encounter.

The requestor believed that the above list of diagnosis codes with the 7th character “A” (initial encounter) would be more appropriately assigned under MDC 21 to MS-DRGs 919, 920, and 921 (Complications of Treatment with MCC, with CC and without CC/MCC, respectively), according to its review of the 2017 Official Coding Guidelines for use of the 7th character and assignment of other diagnoses of associated

complications of care. The requestor also noted that these codes were new, effective October 1, 2016 (FY 2017), and the predecessor codes grouped to MS-DRGs 919, 920, and 921 in MDC 21 under Version 33 of the ICD-10 MS-DRGs in FY 2016.

In addition, the requestor suggested that the following list of diagnosis codes with the 7th character “D” (subsequent encounter) may have been inadvertently

assigned to the GROUPER logic list of principal diagnoses for MS-DRG 919, 920, or 921 in MDC 21. The requestor noted that these codes were new, effective October 1, 2016 (FY 2017), and the predecessor codes grouped to MS-DRGs 949 and 950 (Aftercare with CC/MCC and without CC/MCC, respectively) in MDC 23 under Version 33 of the ICD-10 MS-DRGs in FY 2016.

ICD-10-CM diagnosis code	Code description
T85.810D	Embolism due to nervous system prosthetic devices, implants and grafts, subsequent encounter.
T85.820D	Fibrosis due to nervous system prosthetic devices, implants and grafts, subsequent encounter.
T85.830D	Hemorrhage due to nervous system prosthetic devices, implants and grafts, subsequent encounter.
T85.840D	Pain due to nervous system prosthetic devices, implants and grafts, subsequent encounter.
T85.850D	Stenosis due to nervous system prosthetic devices, implants and grafts, subsequent encounter.
T85.860D	Thrombosis due to nervous system prosthetic devices, implants and grafts, subsequent encounter.
T85.890D	Other specified complication of nervous system prosthetic devices, implants and grafts, subsequent encounter.

The requestor also suggested that the following list of additional diagnosis codes with the 7th character “D” (subsequent encounter) may have been inadvertently assigned to the GROUPER

logic list of principal diagnoses for MS-DRGs 922 and 923 (Other Injury, Poisoning and Toxic Effect with MCC and without MCC, respectively) also under MDC 21. The requestor noted

these codes were also new, effective October 1, 2016 (FY 2017) and that the predecessor codes grouped to MS-DRGs 949 and 950 in MDC 23 under Version 33 of the ICD-10 MS-DRGs in FY 2016.

ICD-10-CM diagnosis code	Code description
T85.818D	Embolism due to other internal prosthetic devices, implants and grafts, subsequent encounter.
T85.828D	Fibrosis due to other internal prosthetic devices, implants and grafts, subsequent encounter.
T85.838D	Hemorrhage due to other internal prosthetic devices, implants and grafts, subsequent encounter.

ICD-10-CM diagnosis code	Code description
T85.848D	Pain due to other internal prosthetic devices, implants and grafts, subsequent encounter.
T85.858D	Stenosis due to other internal prosthetic devices, implants and grafts, subsequent encounter.
T85.868D	Thrombosis due to other internal prosthetic devices, implants and grafts, subsequent encounter.
T85.898D	Other specified complication of other internal prosthetic devices, implants and grafts, subsequent encounter.

The requestor believed that the lists of diagnosis codes above with 7th character “D” (subsequent encounter) would be more appropriately assigned to MS-DRGs 949 and 950 under MDC 23, according to its review of the 2017 Official Coding Guidelines for use of the 7th character and assignment of other diagnoses of associated complications of care.

We ran test cases to determine if we could duplicate the requestor’s findings with regard to the shifts in MS-DRG assignment between Version 33 and Version 34 of the ICD-10 MS-DRGs.

Results of our review were consistent with the requestor’s findings. We found that the T85.8-series of diagnosis codes with the 7th character of “A” (initial encounter) and 7th character of “D” (subsequent encounter) were inadvertently assigned to the incorrect MDC for Version 34 of the ICD-10 MS-DRGs, which led to inconsistencies (MS-DRG shifts) when compared to Version 33 of the ICD-10 MS-DRGs. Our analysis also included review of all of the diagnosis codes in the T85.8-series and their current MDC and MS-DRG assignments, as well as review of

the 2017 Official Coding Guidelines for use of the 7th character and assignment of other diagnoses of associated complications of care. Based on the results of our review, we agree with the requestor’s findings.

In addition, we identified the following list of diagnosis codes with the 7th character “S” (sequela) that appear to have been inadvertently assigned to MS-DRGs 949 and 950 in MDC 23 rather than MDC 21 in MS-DRGs 922 and 923 (Other Injury, Poisoning and Toxic Effect with MCC and without MCC, respectively).

ICD-10-CM diagnosis code	Code description
T85.810S	Embolism due to nervous system prosthetic devices, implants and grafts, sequela.
T85.820S	Fibrosis due to nervous system prosthetic devices, implants and grafts, sequela.
T85.830S	Hemorrhage due to nervous system prosthetic devices, implants and grafts, sequela.
T85.840S	Pain due to nervous system prosthetic devices, implants and grafts, sequela.
T85.850S	Stenosis due to nervous system prosthetic devices, implants and grafts, sequela.
T85.860S	Thrombosis due to nervous system prosthetic devices, implants and grafts, sequela.
T85.890S	Other specified complication of nervous system prosthetic devices, implants and grafts, sequela.

We are inviting public comment on our proposals to (1) reassign the ICD-10-CM diagnosis codes with the 7th character “A” (initial encounter) from MS-DRGs 949 and 950 in MDC 23 to MS-DRGs 919, 920 and 921 in MDC 21; (2) reassign the ICD-10-CM diagnosis codes with the 7th character “D”

(subsequent encounter) from MS-DRGs 919, 920, 921, 922, and 923 in MDC 21 to MS-DRGs 949 and 950 in MDC 23; and (3) reassign the ICD-10-CM diagnosis codes with the 7th character “S” (sequela) from MS-DRGs 949 and 950 in MDC 23 to MS-DRGs 922 and 923 in MDC 21 for FY 2018. The table

below displays the current Version 34 MDC and MS-DRG assignments and the proposed Version 35 MDC and MS-DRG assignments that we are seeking public comment on for the respective ICD-10-CM diagnosis codes.

ICD-10-CM code	Code description	Current V34 MDC	Current V34 MS-DRG	Proposed V35 MDC	Proposed V35 MS-DRG
T85.810D	Embolism due to nervous system prosthetic devices, implants and grafts, subsequent encounter.	21	919, 920, 921	23	949, 950
T85.810S	Embolism due to nervous system prosthetic devices, implants and grafts, sequela.	23	949, 950	21	922, 923
T85.818A	Embolism due to other internal prosthetic devices, implants and grafts, initial encounter.	23	949, 950	21	919, 920, 921
T85.818D	Embolism due to other internal prosthetic devices, implants and grafts, subsequent encounter.	21	922, 923	23	949, 950
T85.820D	Fibrosis due to nervous system prosthetic devices, implants and grafts, subsequent encounter.	21	919, 920, 921	23	949, 950
T85.820S	Fibrosis due to nervous system prosthetic devices, implants and grafts, sequela.	23	949, 950	21	922, 923
T85.828A	Fibrosis due to other internal prosthetic devices, implants and grafts, initial encounter.	23	949, 950	21	919, 920, 921
T85.828D	Fibrosis due to other internal prosthetic devices, implants and grafts, subsequent encounter.	21	922, 923	23	949, 950
T85.830D	Hemorrhage due to nervous system prosthetic devices, implants and grafts, subsequent encounter.	21	919, 920, 921	23	949, 950
T85.830S	Hemorrhage due to nervous system prosthetic devices, implants and grafts, sequela.	23	949, 950	21	922, 923
T85.838A	Hemorrhage due to other internal prosthetic devices, implants and grafts, initial encounter.	23	949, 950	21	919, 920, 921

ICD-10-CM code	Code description	Current V34 MDC	Current V34 MS-DRG	Proposed V35 MDC	Proposed V35 MS-DRG

9. MDC 23 (Factors Influencing Health Status and Other Contacts With Health Services): Updates to MS-DRGs 945 and 946 (Rehabilitation With CC/MCC and Without CC/MCC, Respectively)

In FY 2016, we received requests to modify the MS-DRG assignment for MS-DRGs 945 and 946 (Rehabilitation with CC/MCC and without CC/MCC, respectively). This issue was addressed in the FY 2017 IPPS/LTCH PPS proposed and final rules (81 FR 24998 through 25000 and 81 FR 56826 through 56831). For FY 2017, we did not change the MS-DRG assignments for MS-DRGs 945 and 946.

We did not receive a request to address this issue as part of this FY 2018 IPPS/LTCH PPS proposed rule or suggestions on how to update the MS-DRGs 945 and 946 logic. However, we did refer the FY 2016 requests for a new ICD-10-CM diagnosis code to the Centers for Disease Control and Prevention (CDC) for consideration at a future meeting of the ICD-10 Coordination and Maintenance Committee. CDC has the lead on updating and maintaining ICD-10-CM

codes. CDC did not address the issue at the September 13-14, 2016 ICD-10 Coordination and Maintenance Committee meeting. When the topic was not addressed at the September 13-14, 2016 ICD-10 Coordination and Maintenance Committee meeting, we asked CDC to address the code request at the March 7-8, 2017 meeting of the ICD-10 Coordination and Maintenance Committee. The topic was on the agenda for the March 7-8, 2017 ICD-10 Coordination and Maintenance Committee meeting. The deadline for providing comments on proposals considered at this meeting was April 7, 2017. Any new codes approved after this meeting which will be implemented on October 1, 2017 will be posted on the CMS Web site at: <http://www.cms.gov/Medicare/Coding/ICD10/index.html> and on the CDC Web site at: <http://www.cdc.gov/nchs/icd/icd10.html> in June 2017. New codes also will be included in the FY 2018 IPPS/LTCH PPS final rule.

As addressed in the FY 2017 IPPS/LTCH PPS final rule, the ICD-9-CM MS-DRGs used ICD-9-CM codes

reported as the principal diagnosis that clearly identified an encounter for rehabilitation services, such as diagnosis codes V57.89 (Care involving other specified rehabilitation procedure) and V57.9 (Care involving unspecified rehabilitation procedure), and these codes were not included in ICD-10-CM. Given this lack of ICD-10-CM codes to indicate that the reason for the encounter was for rehabilitation, the ICD-10 MS-DRG logic could not reflect the logic of the ICD-9-CM MS-DRGs. Commenters on the final rule recommended that CDC create new diagnosis codes for these concepts in ICD-10-CM so that the MS-DRG logic could be updated to more closely reflect that of the ICD-9-CM MS-DRGs.

If new ICD-10-CM codes are created for encounter for rehabilitation services, we would address any updates to MS-DRGs 945 and 946 utilizing these new codes in future rulemaking. In the meantime, we welcome other specific recommendations on how to update MS-DRGs 945 and 946. We are sharing the following data on these MS-DRGs from the MedPAR file.

FY 2015 MS-DRGs with ICD-9-CM codes	Number of cases	Average length of stay	Average cost
MS-DRG 945	3,991	10.3	\$8,242
MS-DRG 946	1,184	8.0	7,322

FY 2016 MS-DRGs with ICD-10-CM codes	Number of cases	Average length of stay	Average cost
MS-DRG 945	671	10.8	\$7,814
MS-DRG 946	157	7.3	7,672

As shown by the tables above, there was a decrease of 3,320 MS-DRG 945 cases (from 3,991 to 671) from FY 2015, when claims were submitted with ICD-9-CM codes, to FY 2016 when ICD-10 codes were submitted. There was a decrease of 1,027 MS-DRG 946 cases (from 1,184 to 157) from FY 2015 to FY 2016. The average length of stay increased 0.5 days (from 10.3 to 10.8 days) for MS-DRG 945 and decreased 0.7 days (from 8.0 to 7.3 days) for MS-DRG 946. The average costs decreased by \$428 (from \$8,242 to \$7,814) for MS-DRG 945 cases and increased by \$350 (from \$7,322 to \$7,672) for MS-DRG 946 cases. The number of cases was

significantly lower in FY 2016 compared to FY 2015. However, the difference in average length of stay and average costs did not show large changes.

We also examined possible MS-DRGs where these cases may have been assigned in FY 2016 based on increases in the number of claims. Because there is not a diagnosis code that could be reported as a principal diagnosis, which would indicate if the admissions were for rehabilitation services, we are unable to determine if these were cases admitted for rehabilitation that moved from MS-DRGs 945 and 946 because of the lack of a code for encounter for

rehabilitation, or if there was simply a change in the number of cases. The following tables show our findings for MS-DRG 056 (Degenerative Nervous System Disorders with MCC); MS-DRG 057 (Degenerative Nervous System Disorders without MCC); MS-DRG 079 (Hypertensive Encephalopathy without CC/MCC); MS-DRG 083 (Traumatic Stupor & Coma, Coma >1 Hour with CC); MS-DRG 084 (Traumatic Stupor & Coma, Coma >1 Hour without CC/MCC); MS-DRG 092 (Other Disorders of Nervous System with MCC); and MS-DRG 093 (Other Disorders of Nervous System without CC/MCC).

FY 2015 MS-DRGs with ICD-9-CM codes	Number of cases	Average length of stay	Average cost
MS-DRG 056	9,548	7.3	\$12,606
MS-DRG 057	25,652	5.1	7,918
MS-DRG 079	618	2.7	5,212
MS-DRG 083	2,516	4.3	9,446
MS-DRG 084	1,955	2.8	6,824
MS-DRG 092	12,643	5.7	11,158
MS-DRG 093	7,928	2.8	5,182

FY 2016 MS-DRGs with ICD-10-CM codes	Number of cases	Average length of stay	Average cost
MS-DRG 056	10,817	7.6	\$12,930
MS-DRG 057	28,336	5.3	7,902
MS-DRG 079	1,233	2.7	5,579
MS-DRG 083	4,058	6.2	9,134
MS-DRG 084	3,016	2.7	6,508
MS-DRG 092	19,392	3.9	6,706
MS-DRG 093	8,120	2.7	5,253

As shown by the tables above, some of the MS-DRGs that show the largest increase in number of cases do not show significant changes in the average length of stay or average costs. For instance, MS-DRG 079 cases doubled from FY 2015 to FY 2016 (from 618 to 1,233). However, the average length of stay did not change from 2.7 days and the average costs increased only \$367 (from \$5,212 to \$5,579). MS-DRG 083 cases increased by 1,542 (from 2,516 to 4,058) with a 1.9 day increase in the average length of stay (from 4.3 to 6.2 days); however, the average costs decreased only \$312 (from \$9,446 to \$9,134).

There were large changes for MS-DRG 092 with cases increasing by 6,749 (from 12,643 to 19,392), the average length of stay decreasing by 1.8 days (from 5.7 to 3.9) and the average costs decreasing by \$4,452 (from \$11,158 to \$6,706). Once again, it is not possible to determine if any changes are a result of the impact of not having a code for the encounter for rehabilitation services to report as a principal diagnosis, or if other factors such as changes in types of patient admissions were involved.

Given the lack of a diagnosis code to capture the principal diagnosis of encounter for rehabilitation, we are

unable to update MS-DRG 945 or MS-DRG 946 to better identify those cases in which patients are admitted for rehabilitation services. If the CDC creates a new code, we will consider proposing updates to MS-DRGs 945 and 946 in the future.

We are inviting public comments on our proposal not to update MS-DRGs 945 and 946 for FY 2018.

10. Proposed Changes to the Medicare Code Editor (MCE)

The Medicare Code Editor (MCE) is a software program that detects and reports errors in the coding of Medicare

claims data. Patient diagnoses, procedure(s), and demographic information are entered into the Medicare claims processing systems and are subjected to a series of automated screens. The MCE screens are designed to identify cases that require further review before classification into an MS-DRG.

As discussed in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56831 through 56844), we made available the FY 2017 ICD-10 MCE Version 34 manual file and an ICD-9-CM MCE Version 34.0A manual file (for analysis purposes only). The links to these MCE manual files, along with the links to purchase the mainframe and computer software for the MCE Version 34 (and ICD-10 MS-DRGs) are posted on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html> through the FY 2017 IPPS Final Rule Home Page.

For this FY 2018 IPPS/LTCH PPS proposed rule, below we address the MCE requests we received by the

December 7, 2016 deadline. We also discuss the proposals we are making based on our internal review and analysis.

a. Age Conflict Edit

In the MCE, the Age Conflict edit exists to detect inconsistencies between a patient's age and any diagnosis on the patient's record; for example, a 5-year-old patient with benign prostatic hypertrophy or a 78-year-old patient coded with a delivery. In these cases, the diagnosis is clinically and virtually impossible for a patient of the stated age. Therefore, either the diagnosis or the age is presumed to be incorrect. Currently, in the MCE, the following four age diagnosis categories appear under the Age Conflict edit and are listed in the manual and written in the software program:

- Perinatal/Newborn—Age of 0 years only; a subset of diagnoses which will only occur during the perinatal or newborn period of age 0 (for example, tetanus neonatorum, health examination for newborn under 8 days old).

- Pediatric—Age is 0 to 17 years inclusive (for example, Reye's syndrome, routine child health examination).

- Maternity—Age range is 12 to 55 years inclusive (for example, diabetes in pregnancy, antepartum pulmonary complication).

- Adult—Age range is 15 to 124 years inclusive (for example, senile delirium, mature cataract).

We received a request to provide clarification regarding the overlapping age ranges (0 to 17 years and 15 to 124 years) in the Pediatric and Adult categories under the Age Conflict edit. The requestor questioned which diagnosis code would be most appropriate to identify when a general or routine health examination is performed on patients who are within the age range of 15 to 17 years. The specific ICD-10-CM diagnosis codes that the requestor inquired about related to a child or to an adult encounter for a health examination are displayed in the table below.

ICD-10-CM code	Code description
Z00.00	Encounter for general adult medical examination without abnormal findings.
Z00.01	Encounter for general adult medical examination with abnormal findings.
Z00.121	Encounter for routine child health examination with abnormal findings.
Z00.129	Encounter for routine child health examination without abnormal findings.

The age ranges defined within the Age Conflict edits were established with the implementation of the IPPS. The adult age range includes the minimum age of 15 years for those patients who are declared emancipated minors. We note that, historically, we have not provided coding advice in rulemaking with respect to policy. We collaborate with the American Hospital Association (AHA) through the Coding Clinic for ICD-10-CM and ICD-10-PCS to promote proper coding. We recommend that the requestor and other interested parties submit any questions pertaining to correct coding practices for this specific issue to the AHA.

(1) Perinatal/Newborn Diagnosis Category

Under the ICD-10 MCE, the Perinatal/Newborn Diagnosis category under the Age Conflict edit considers the age of 0 years only; a subset of diagnoses which will only occur during the perinatal or newborn period of age 0 to be inclusive. This includes conditions that have their origin in the fetal or perinatal period (before birth through the first 28 days after birth) even if morbidity occurs later. For that reason, the diagnosis codes on this Age Conflict edit list

would be expected to apply to conditions or disorders specific to that age group only.

In the ICD-10-CM classification, there are two diagnosis codes that describe conditions as occurring during infancy and the neonatal period that are currently not on the Perinatal/Newborn Diagnosis category edit code list. We consulted with staff at the Centers for Disease Control's (CDC's) National Center for Health Statistics (NCHS) because NCHS has the lead responsibility for the ICD-10-CM diagnosis codes. The NCHS' staff confirmed that, although diagnosis codes D80.7 (Transient hypogammaglobulinemia of infancy) and diagnosis code E71.511 (Neonatal adrenoleukodystrophy) do occur during infancy and the neonatal period, both conditions can last beyond the 28-day timeframe which is used to define the perinatal/newborn period. These diagnosis codes are not intended to be restricted for assignment to newborn patients. Therefore, we are proposing to not add these two diagnosis codes to the Perinatal/Newborn Diagnosis category under the Age Conflict edit. We are inviting public comments on our proposal.

(2) Pediatric Diagnosis Category

Under the ICD-10 MCE, the Pediatric diagnosis category under the Age Conflict edit considers the age range of 0 to 17 years inclusive. For that reason, the diagnosis codes on this Age Conflict edit list would be expected to apply to conditions or disorders specific to that age group only.

The ICD-10-CM diagnosis code list for the Pediatric diagnosis category under the Age Conflict edit currently includes a diagnosis code pertaining to dandruff that is not intended to apply to pediatric patients only. We consulted with staff at the Centers for Disease Control's (CDC's) National Center for Health Statistics (NCHS) because NCHS has the lead responsibility for the ICD-10-CM diagnosis codes. The NCHS' staff confirmed that, although diagnosis code L21.0 (Seborrhea capitis) has an inclusion term of "Cradle cap," the description of the diagnosis code is not intended to be restricted for assignment of pediatric patients. Therefore, we are proposing to remove diagnosis code L21.0 from the list of diagnosis codes for the Pediatric diagnosis category under the Age Conflict edit. We are inviting public comments on our proposal.

(3) Maternity Diagnoses

Under the ICD-10 MCE, the Maternity diagnosis category under the Age Conflict edit considers the age range of 12 to 55 years inclusive. For that reason, the ICD-10-CM diagnosis codes on this Age Conflict edit list would be expected to apply to conditions or disorders specific to that age group only.

As discussed in section II.F.12. of the preamble of this proposed rule, Table 6A.—New Diagnosis Codes lists the new ICD-10-CM diagnosis codes that have been approved to date, which will become effective with discharges occurring on and after October 1, 2017. Included on this list are a number of diagnosis codes associated with pregnancy and maternal care that we

believe are appropriate to add to the list of diagnosis codes for the Maternity diagnoses category under the Age Conflict edit. We refer readers to Table 6P.1a. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) for a review of the ICD-10-CM diagnosis codes that we are proposing to add to the Age Conflict edit list. We are inviting public comments on our proposal.

b. Sex Conflict Edit

In the MCE, the Sex Conflict edit detects inconsistencies between a

patient's sex and any diagnosis or procedure on the patient's record; for example, a male patient with cervical cancer (diagnosis) or a female patient with a prostatectomy (procedure). In both instances, the indicated diagnosis or the procedure conflicts with the stated sex of the patient. Therefore, the patient's diagnosis, procedure, or sex is presumed to be incorrect.

(1) Diagnoses for Males Only Edit

We received a request to review the following ICD-10-CM diagnosis codes pertaining to conditions associated with males for possible inclusion on the list of diagnosis codes for the Diagnoses for Males Only edit.

ICD-10-CM code	Code description
B37.42	Candidal balanitis.
N35.011	Post-traumatic bulbous urethral stricture.
N35.012	Post-traumatic membranous urethral stricture.
N35.013	Post-traumatic anterior urethral stricture.
N35.112	Postinfective bulbous urethral stricture, not elsewhere classified.
N35.113	Postinfective membranous urethral stricture, not elsewhere classified.
N35.114	Postinfective anterior urethral stricture, not elsewhere classified.
N99.115	Postprocedural fossa navicularis urethral stricture.

We agree with the requestor that diagnosis code B37.42 describes a condition that is applicable only to males. Balanitis is the inflammation of the glans (rounded head) of the penis. We also agree that the diagnosis codes listed above that align under subcategory N35.01 (Post-traumatic urethral stricture, male) and subcategory N35.11 (Postinfection urethral stricture, not elsewhere classified, male) are appropriate to add to the list of diagnosis codes for the Diagnoses for Males Only edit because these diagnosis codes include specific terminology that is applicable only to males. Further, we agree that diagnosis code N99.115 is appropriate to add to the list of diagnosis codes for the Diagnoses for Males Only edit because subcategory N99.11 (Postprocedural urethral stricture, male) includes specific terminology that is applicable to males

only as well. Therefore, we are proposing to add the ICD-10-CM diagnosis codes listed in the table above to the list of diagnosis codes for the Diagnoses for Males Only edit.

We also are proposing to remove ICD-10-CM diagnosis code Q64.0 (Epispadias) from the list of diagnosis codes for the Diagnoses for Males Only edit because this rare, congenital condition involving the opening of the urethra can occur in both males and females.

In addition, as discussed in section II.F.12. of the preamble of this proposed rule, Table 6A.—New Diagnosis Codes lists the new ICD-10-CM diagnosis codes that have been approved to date, which will become effective with discharges occurring on and after October 1, 2017. Included on this list are a number of diagnosis codes associated with male body parts that we

believe are appropriate to add to the list of diagnosis codes for the Diagnoses for Males Only category under the Sex Conflict edit. We refer readers to Table 6P.1b. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) for a review of the ICD-10-CM diagnosis codes that we are proposing to add to the list of diagnosis codes for the Diagnoses for Males Only category.

We are inviting public comments on our proposals.

(2) Diagnoses for Females Only

We received a request to review the following ICD-10-CM diagnosis codes for possible removal from the list of diagnosis codes for the Diagnoses for Females Only edit.

ICD-10-CM code	Code description
F52.6	Dyspareunia not due to a substance or known physiological condition.
J84.81	Lymphangioliomyomatosis.
R97.1	Elevated cancer antigen 125 [CA 125].

The requestor noted that, in the ICD-10-CM classification, the term "Dyspareunia" (painful sexual intercourse) has specified codes for males and females located in the Alphabetic Index to Diseases for

Reporting Physiological Dyspareunia. However, the indexing for diagnosis code F52.6 (Dyspareunia not due to a substance or known physiological condition) specifies that it is not due to a physiological condition and the entry

is not gender specific. According to the requestor, while the condition is most often associated with female sexual dysfunction, there is a subset of males who also suffer from this condition.

In addition, the requestor stated that diagnosis code J84.81 (Lymphangioleiomyomatosis) describes a rare form of lung disease believed to occur more often in patients with tuberous sclerosis complex (TSC), a disorder due to genetic mutation. Although the condition is described as being exclusive to women, unique cases for men with TSC have also been reported.

Lastly, the requestor indicated that diagnosis code R97.1 (Elevated cancer antigen 125 [CA 125]) describes the tumor marker that commonly identifies ovarian cancer cells in women. However, the requestor stated that high levels have also been demonstrated in men (and women) with lung cancer as well.

We reviewed ICD-10-CM diagnosis codes F52.6, J84.81, and R97.1, and we agree with the requestor that Dyspareunia, not due to a physiological condition, can also occur in males. We also agree that the condition of Lymphangioleiomyomatosis and Elevated CA 125 levels can be found in males. Therefore, we are proposing to remove these three diagnosis codes from the list of diagnosis codes for the Diagnoses for Females Only edit. We are

inviting public comments on our proposals.

In addition, we are proposing to add new diagnosis code Z40.03 (Encounter for prophylactic removal of fallopian tube(s)) to the list of diagnosis codes for the Diagnoses for Females Only edit. Currently, diagnosis code Z40.02 (Encounter for prophylactic removal of ovary) is on the edit's code list; therefore, inclusion of new diagnosis code Z40.03 would be consistent. We refer readers to Table 6A.—New Diagnosis Codes associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) for the list of new ICD-10-CM diagnosis codes finalized to date. We are inviting public comments on our proposal.

c. Non-Covered Procedure Edit: Gender Reassignment Surgery

In the MCE, the Non-Covered Procedure edit identifies procedures for which Medicare does not provide payment. Payment is not provided due to specific criteria that are established in the National Coverage Determination (NCD) process. We refer readers to the Web site at: <https://www.cms.gov/>

Medicare/Coverage/Determination Process/howtorequestanNCD.html for additional information on this process. In addition, there are procedures that would normally not be paid by Medicare but, due to the presence of certain diagnoses, are paid.

We issued instructions on June 27, 2014, as a one-time notification, Pub. 100-03, Transmittal 169, Change Request 8825, effective May 30, 2014, announcing to MACs the invalidation of National Coverage Determination (NCD) 140.3 for Transsexual Surgery. As a result, MACs determined coverage on a case-by-case basis. The transmittal is available via the Internet on the CMS Web site at: <https://www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/2014-Transmittals-Items/R169NCD.html?DLPage=1&DLEntries=10&DLFilter=Transsexual&DLSort=1&DLSortDir=ascending>.

It was brought to our attention that the ICD-10-PCS procedure codes shown in the table below are currently included on the list of procedure codes for the Non-Covered Procedure edit. As a result, when one of these procedure codes is reported on a claim, the edit for Non-Covered Procedure is triggered and claims are not able to process correctly.

ICD-10-CM code	Code description
0W4M070	Creation of vagina in male perineum with autologous tissue substitute, open approach.
0W4M0J0	Creation of vagina in male perineum with synthetic substitute, open approach.
0W4M0K0	Creation of vagina in male perineum with nonautologous tissue substitute, open approach.
0W4M0Z0	Creation of vagina in male perineum, open approach.
0W4N071	Creation of penis in female perineum with autologous tissue substitute, open approach.
0W4N0J1	Creation of penis in female perineum with synthetic substitute, open approach.
0W4N0K1	Creation of penis in female perineum with nonautologous tissue substitute, open approach.
0W4N0Z1	Creation of penis in female perineum, open approach.

Therefore, we are proposing to remove the ICD-10-PCS procedure codes included in the table above from the list of procedure codes for the Non-Covered Procedure edit to help resolve claims processing issues associated with the reporting of these procedure codes. We are inviting public comments on our proposal.

d. Unacceptable Principal Diagnosis Edit

In the MCE, there are select codes that describe a circumstance that influences an individual's health status, but does not actually describe a current illness or injury. There also are codes that are not specific manifestations but may be due to an underlying cause. These codes are considered unacceptable as a principal diagnosis. In limited situations, there are a few codes on the MCE Unacceptable Principal Diagnosis edit

code list that are considered "acceptable" when a specified secondary diagnosis is also coded and reported on the claim.

(1) Bacterial and Viral Infectious Agents (B95 Through B97)

We examined ICD-10-CM diagnosis codes in Chapter 1 (Certain Infectious and Parasitic Diseases) of the Classification Manual that fall within the range of three code categories for "Bacterial and Viral Infectious Agents" (B95 through B97). The instructional note provided at this section states that these categories are provided for use as supplementary or additional codes to identify the infectious agent(s) in diseases classified elsewhere.

We identified 45 ICD-10-CM diagnosis codes within the range of these code categories for "Bacterial and Viral Infectious Agents" (B95 through

B97) that, as a result of the instructional note, are not appropriate to report as a principal diagnosis. We are proposing to add the 45 ICD-10-CM diagnosis codes shown in Table 6P.1c. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(2) Mental Disorders Due to Known Physiological Conditions (F01 Through F09)

We examined ICD-10-CM diagnosis codes in Chapter 5 (Mental and Behavioral Disorders) of the Classification Manual that fall within the range of nine code categories for "Mental Disorders Due to Known

Physiological Conditions” (F01 through F09). The instructional note provided at this section states that this block comprises a range of mental disorders grouped together on the basis of their having in common a demonstrable etiology in cerebral disease, brain injury, or other insult leading to cerebral dysfunction. The dysfunction may be primary, as in diseases, injuries, and insults that affect the brain directly and selectively; or secondary, as in systemic diseases and disorders that attack the brain only as one of the multiple organs or systems of the body that are involved.

We identified 21 ICD–10–CM diagnosis codes that fall within the range of these code categories for “Mental Disorders Due to Known Physiological Conditions” (F01 through F09). Of these nine code categories, seven have a “Code first the underlying physiological condition” note. For example, at code category F01–Vascular dementia, the note reads, “Code first the underlying physiological condition or sequelae of cerebrovascular disease.” There are a total of 19 diagnosis codes that fall under these 7 code categories with a “Code first” note and, therefore, are not appropriate to report as a principal diagnosis. Therefore, we are proposing to add the 19 ICD–10–CM diagnosis codes shown in Table 6P.1d. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(3) Other Obstetric Conditions, Not Elsewhere Classified (O94 Through O9A)

We examined ICD–10–CM diagnosis codes in Chapter 15 (Pregnancy,

Childbirth and the Puerperium) of the Classification Manual that fall within the range of four code categories for “Other Obstetric Conditions, Not Elsewhere Classified” (O94 through O9A). The instructional note provided at this section under category O94 states that “this category is to be used to indicate conditions in O00 through O77, O85 through O94 and O98 through O9A as the cause of late effects. The sequelae include conditions specified as such, or as late effects, which may occur at any time after the puerperium. Code first condition resulting from (sequela) of complication of pregnancy, childbirth, and the puerperium.”

We identified one ICD–10–CM diagnosis code within the range of these code categories for “Other Obstetric Conditions, Not Elsewhere Classified” (O94 through O9A) that, as a result of the instructional note, is not appropriate to report as a principal diagnosis because that code identifies the cause of the late effect. This ICD–10–CM diagnosis code is O94 (Sequelae of complication of pregnancy, childbirth, and the puerperium). We are proposing to add ICD–10–CM diagnosis code O94 to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(4) Symptoms and Signs Involving Cognition, Perception, Emotional State and Behavior (R40 Through R46)

We examined ICD–10–CM diagnosis codes in Chapter 18 (Symptoms, Signs and Abnormal Findings) of the Classification Manual that fall within the range of code categories for “Symptoms and Signs Involving Cognition, Perception, Emotional State and Behavior” (R40 through R46), specifically under code category R40—Somnolence, stupor and coma. At subcategory R40.2—Coma, there is an instructional note, which states “Code

first any associated: Fracture of skull (S02.-); Intracranial injury (S06.-).”

We identified 96 ICD–10–CM diagnosis codes under this subcategory that, as a result of the instructional note, are not appropriate to report as a principal diagnosis. We are proposing to add the 96 ICD–10–CM diagnosis codes shown in Table 6P.1e. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(5) General Symptoms and Signs (R50 Through R69)

We examined ICD–10–CM diagnosis codes in Chapter 18 (Symptoms, Signs and Abnormal Findings) of the Classification Manual that fall within the range of code categories for “General Symptoms and Signs” (R50 through R69), specifically, at code category R65—Symptoms and signs associated with systemic inflammation and infection. There is an instructional note at subcategory R65.1—Systemic inflammatory response syndrome (SIRS) of non-infectious origin, which states “Code first underlying condition, such as: Heatstroke (T67.0); Injury and trauma (S00–T88).” There is also an instructional note at subcategory R65.2—Severe sepsis, which states “Code first underlying infection, such as:” and provides a list of examples.

We identified four ICD–10–CM diagnosis codes in these subcategories that, as a result of the instructional notes described above, are not appropriate to report as a principal diagnosis. These four ICD–10–CM codes are shown in the table below.

ICD–10–CM code	Code description
R65.10	Systemic inflammatory response syndrome (SIRS) of non-infectious origin without acute organ dysfunction.
R65.11	Systemic inflammatory response syndrome (SIRS) of non-infectious origin with acute organ dysfunction.
R65.20	Severe sepsis without septic shock.
R65.21	Severe sepsis with septic shock.

We are proposing to add the four ICD–10–CM diagnosis codes shown in the table above to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(6) Poisoning by, Adverse Effects of, and Underdosing of Drugs, Medicaments and Biological Substances (T36 Through T50)

We examined ICD–10–CM diagnosis codes in Chapter 19 (Injury and Poisoning) of the Classification Manual that fall within the range of code categories for “Poisoning by, Adverse Effects of and Underdosing of Drugs, Medicaments and Biological

Substances” (T36 through T50). The instructional note provided at this section states “Code first, for adverse effects, the nature of the adverse effect, such as:” and provides a list of examples. In addition, the FY 2017 ICD–10–CM Official Guidelines for Coding and Reporting at Section I.C.19.e.5.c., state that “Codes for underdosing should never be assigned as principal or first-listed codes.”

We identified 996 ICD-10-CM diagnosis codes that, as a result of the instructional note for adverse effects and the guideline for reporting diagnosis codes for underdosing, are not appropriate to report as a principal diagnosis. We are proposing to add the 996 ICD-10-CM diagnosis codes shown in Table 6P.1f. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) to the

list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(7) Complications of Surgical and Medical Care, Not Elsewhere Classified (T80 Through T88)

We examined ICD-10-CM diagnosis codes in Chapter 19 (Injury and Poisoning) of the Classification Manual that fall within the range of code categories for “Complications of Surgical and Medical Care, Not Elsewhere Classified” (T80 through

T88), specifically, at code category T81—Complications of procedures, not elsewhere classified. There is an instructional note at subcategory T81.12x—Postprocedural septic shock, which states, “Code first underlying infection.”

We identified two ICD-10-CM diagnosis codes in this subcategory that, as a result of the instructional note, are not appropriate to report as a principal diagnosis. These two ICD-10-CM codes are shown in the table below.

ICD-10-CM code	Code description
T81.12XD	Postprocedural septic shock, subsequent encounter.
T81.12XS	Postprocedural septic shock, sequela.

We are proposing to add the two ICD-10-CM diagnosis codes shown in the table above to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(8) Persons Encountering Health Services for Examinations (Z00 Through Z13)

We examined ICD-10-CM diagnosis codes in Chapter 21 (Factors Influencing Health Status) of the Classification Manual that fall within the range of code categories for “Persons Encountering Health Services for Examinations” (Z00 through Z13), specifically, at code category Z00—Encounter for general examination without complaint, suspected or reported diagnosis. The FY 2017 ICD-10-CM Official Guidelines for Coding and Reporting at Section I.C.21.c.16., state that the following ICD-10-CM Z-codes/categories may only be reported as the principal/first-listed diagnosis, except when there are multiple encounters on the same day and the

medical records for the encounters are combined:

- Z00 (Encounter for general examination without complaint, suspected or reported diagnosis); except Z00.6 (Encounter for examination for normal comparison and control in clinical research program).

Therefore, diagnosis code Z00.6 should not be reported as a principal/first-listed diagnosis. We are proposing to add ICD-10-CM diagnosis code Z00.6 to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

To address a separate issue, we are proposing to remove the diagnosis codes under category Z05 (Encounter for observation and examination of newborn for suspected diseases and conditions ruled out) from the list of codes for the Unacceptable Principal Diagnosis edit. The FY 2017 ICD-10-CM Official Guidelines for Coding and Reporting at Section I.C.16.b. state the following:

- Assign a code from category Z05, Observation and evaluation of newborns and infants for suspected conditions

ruled out, to identify those instances when a healthy newborn is evaluated for a suspected condition that is determined after study not to be present. Do not use a code from category Z05 when the patient has identified signs or symptoms of a suspected problem; in such cases code the sign or symptom.

- A code from category Z05 may also be assigned as a principal or first-listed code for readmissions or encounters when the code from category Z38 no longer applies. Codes from category Z05 are for use only for healthy newborns and infants for which no condition after study is found to be present.

- A code from category Z05 is to be used as a secondary code after the code from category Z38, Liveborn infants according to place of birth and type of delivery.

Therefore, the ICD-10-CM diagnosis codes under category Z05 are allowed to be reported as a principal diagnosis. We are proposing to remove the 14 ICD-10-CM diagnosis codes shown in the table below from the list of codes for the Unacceptable Principal Diagnosis edit.

ICD-10-CM code	Code description
Z05.0	Observation and evaluation of newborn for suspected cardiac condition ruled out.
Z05.1	Observation and evaluation of newborn for suspected infectious condition ruled out.
Z05.2	Observation and evaluation of newborn for suspected neurological condition ruled out.
Z05.3	Observation and evaluation of newborn for suspected respiratory condition ruled out.
Z05.41	Observation and evaluation of newborn for suspected genetic condition ruled out.
Z05.42	Observation and evaluation of newborn for suspected metabolic condition ruled out.
Z05.43	Observation and evaluation of newborn for suspected immunologic condition ruled out.
Z05.5	Observation and evaluation of newborn for suspected gastrointestinal condition ruled out.
Z05.6	Observation and evaluation of newborn for suspected genitourinary condition ruled out.
Z05.71	Observation and evaluation of newborn for suspected skin and subcutaneous tissue condition ruled out.
Z05.72	Observation and evaluation of newborn for suspected musculoskeletal condition ruled out.
Z05.73	Observation and evaluation of newborn for suspected connective tissue condition ruled out.
Z05.8	Observation and evaluation of newborn for other specified suspected condition ruled out.
Z05.9	Observation and evaluation of newborn for unspecified suspected condition ruled out.

We are inviting public comments on our proposal.

(9) Encounters for Other Specific Health Care (Z40 Through Z53)

We examined ICD-10-CM diagnosis codes in Chapter 21 (Factors Influencing Health Status) of the Classification Manual that fall within the range of code categories for “Encounters for Other Specific Health Care” (Z40 through Z53), specifically, at code category Z52—Donors of organs and tissues. The FY 2017 ICD-10-CM Official Guidelines for Coding and Reporting at Section I.C.21.c.16. state that the following Z-codes/categories may only be reported as the principal/first-listed diagnosis, except when there are multiple encounters on the same day and the medical records for the encounters are combined:

- Z52 (Donors of organs and tissues); except Z52.9 (Donor of unspecified organ or tissue).

Therefore, ICD-10-CM diagnosis code Z52.9 should not be reported as a principal/first-listed diagnosis. We are proposing to add ICD-10-CM diagnosis code Z52.9 to the list of codes for the Unacceptable Principal Diagnosis edit. We are inviting public comments on our proposal.

(10) Persons Encountering Health Services in Other Circumstances (Z69 Through Z76)

We examined ICD-10-CM diagnosis codes in Chapter 21 (Factors Influencing Health Status) of the Classification Manual that fall within the range of code categories for “Persons Encountering Health Services in Other Circumstances” (Z69 through Z76), specifically, at subcategory Z71.8—Other specified counseling. Consistent with ICD-10-CM diagnosis codes Z71.81 (Spiritual or religious counseling) and Z71.89 (Other specified counseling), we are proposing to add new diagnosis code Z71.82 (Exercise counseling) to the list of codes for the Unacceptable Principal Diagnosis edit. We refer readers to Table 6A.—New Diagnosis Codes associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) for the list of new ICD-10-CM diagnosis codes finalized to date. We are inviting public comments on our proposal.

(11) Persons With Potential Health Hazards Related to Family and Personal History and Certain Conditions Influencing Health Status (Z77 Through Z99)

We examined ICD-10-CM diagnosis codes in Chapter 21 (Factors Influencing Health Status) of the Classification Manual that fall within the range of code categories for “Persons with Potential Health Hazards Related to Family and Personal History and Certain Conditions Influencing Health Status” (Z77 through Z99), specifically, at code category Z91.8—Other specified personal risk factors, not elsewhere classified. Consistent with ICD-10-CM diagnosis codes Z91.81 (History of falling), Z91.82 (Personal history of military deployment), and Z91.89 (Other specified personal risk factors, not elsewhere classified), we are proposing to add new ICD-10-CM diagnosis codes Z91.841 (Risk for dental caries, low), Z91.842 (Risk for dental caries, moderate), Z91.843 (Risk for dental caries, high), and Z91.849 (Unspecified risk for dental caries) to the list of codes for the Unacceptable Principal Diagnosis edit. We refer readers to Table 6A.—New Diagnosis Codes associated with this proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) for the list of new ICD-10-CM diagnosis codes finalized to date. We are inviting public comments on our proposal.

e. Future Enhancement

Similar to our discussion in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56843 through 56844), with the implementation of ICD-10, it is clear that there are several new concepts in the classification. Looking ahead to the needs and uses of coded data as the data continue to evolve from the reporting, collection, processing, coverage, payment and analysis aspects, we believe the need to ensure the accuracy of the coded data becomes increasingly significant.

The purpose of the MCE is to ensure that errors and inconsistencies in the coded data are recognized during Medicare claims processing. As we continue to evaluate the purpose and function of the MCE with respect to ICD-10, we encourage public input for future discussion. As we discussed in the FY 2017 IPPS/LTCH PPS final rule, we recognize a need to further examine the current list of edits and the definitions of those edits. We encourage public comments on whether there are

additional concerns with the current edits, including specific edits or language that should be removed or revised, edits that should be combined, or new edits that should be added to assist in detecting errors or inaccuracies in the coded data.

11. Proposed Changes to Surgical Hierarchies

Some inpatient stays entail multiple surgical procedures, each one of which, occurring by itself, could result in assignment of the case to a different MS-DRG within the MDC to which the principal diagnosis is assigned. Therefore, it is necessary to have a decision rule within the GROUPE by which these cases are assigned to a single MS-DRG. The surgical hierarchy, an ordering of surgical classes from most resource-intensive to least resource-intensive, performs that function. Application of this hierarchy ensures that cases involving multiple surgical procedures are assigned to the MS-DRG associated with the most resource-intensive surgical class.

Because the relative resource intensity of surgical classes can shift as a function of MS-DRG reclassification and recalibrations, for FY 2018, we reviewed the surgical hierarchy of each MDC, as we have for previous reclassifications and recalibrations, to determine if the ordering of classes coincides with the intensity of resource utilization.

A surgical class can be composed of one or more MS-DRGs. For example, in MDC 11, the surgical class “kidney transplant” consists of a single MS-DRG (MS-DRG 652) and the class “major bladder procedures” consists of three MS-DRGs (MS-DRGs 653, 654, and 655). Consequently, in many cases, the surgical hierarchy has an impact on more than one MS-DRG. The methodology for determining the most resource-intensive surgical class involves weighting the average resources for each MS-DRG by frequency to determine the weighted average resources for each surgical class. For example, assume surgical class A includes MS-DRGs 001 and 002 and surgical class B includes MS-DRGs 003, 004, and 005. Assume also that the average costs of MS-DRG 001 are higher than that of MS-DRG 003, but the average costs of MS-DRGs 004 and 005 are higher than the average costs of MS-DRG 002. To determine whether surgical class A should be higher or lower than surgical class B in the surgical hierarchy, we would weigh the average costs of each MS-DRG in the class by frequency (that is, by the number of cases in the MS-DRG) to determine average resource

consumption for the surgical class. The surgical classes would then be ordered from the class with the highest average resource utilization to that with the lowest, with the exception of “other O.R. procedures” as discussed in this rule.

This methodology may occasionally result in assignment of a case involving multiple procedures to the lower-weighted MS-DRG (in the highest, most resource-intensive surgical class) of the available alternatives. However, given that the logic underlying the surgical hierarchy provides that the Grouper search for the procedure in the most resource-intensive surgical class, in cases involving multiple procedures, this result is sometimes unavoidable.

We note that, notwithstanding the foregoing discussion, there are a few instances when a surgical class with a lower average cost is ordered above a surgical class with a higher average cost. For example, the “other O.R. procedures” surgical class is uniformly ordered last in the surgical hierarchy of each MDC in which it occurs, regardless of the fact that the average costs for the MS-DRG or MS-DRGs in that surgical class may be higher than those for other surgical classes in the MDC. The “other O.R. procedures” class is a group of procedures that are only infrequently related to the diagnoses in the MDC, but are still occasionally performed on patients with cases assigned to the MDC with these diagnoses. Therefore, assignment to these surgical classes should only occur if no other surgical class more closely related to the diagnoses in the MDC is appropriate.

A second example occurs when the difference between the average costs for two surgical classes is very small. We have found that small differences generally do not warrant reordering of the hierarchy because, as a result of reassigning cases on the basis of the hierarchy change, the average costs are likely to shift such that the higher-ordered surgical class has lower average costs than the class ordered below it.

We received a request to examine a case involving the principal procedure for excision of pituitary gland (ICD-10-PCS code 0GB00ZZ Excision of pituitary gland, open approach) with a secondary procedure for harvesting of a fat graft (ICD-10-PCS code 0JB80ZZ Excision of abdomen subcutaneous tissue and fascia, open approach) to treat a condition of pituitary adenoma (ICD-10-CM diagnosis code D35.2 (Benign neoplasm of pituitary gland)) and the resulting sella turcica defect. The requestor noted that when the procedure code for harvesting of the fat graft is reported on the claim, the case

currently groups to MS-DRGs 622, 623, and 624 (Skin Grafts and Wound Debridement for Endocrine, Nutritional, and Metabolic Disorders with MCC, with CC and without CC/MCC, respectively). However, when the procedure code for harvesting of the fat graft is *not* reported on the claim, the case groups to MS-DRGs 614 and 615 (Adrenal and Pituitary Procedures with CC/MCC and without CC/MCC, respectively), which appears to be a more appropriate assignment. The requestor expressed concern regarding the procedure code for harvesting of the fat graft in the secondary position driving the MS-DRG assignment versus the principal procedure of the excision of pituitary gland.

We analyzed the codes provided by the requestor in the Grouper to determine if we could duplicate the requestor's findings. The findings from our analysis were consistent with the requestor's findings. Our clinical advisors reviewed this issue and agreed that it should be the procedure code for excision of the pituitary gland that is used to determine the MS-DRG assignment in this scenario and not the harvesting of the fat graft procedure code.

Therefore, in this FY 2018 IPPS/LTCH PPS proposed rule, we are proposing to move MS-DRGs 614 and 615 above MS-DRGs 622, 623, and 624 in the surgical hierarchy to enable more appropriate MS-DRG assignment for these types of cases.

We are inviting public comments on our proposal.

12. Proposed Changes to the MS-DRG Diagnosis Codes for FY 2018

a. Background of the CC List and the CC Exclusions List

Under the IPPS MS-DRG classification system, we have developed a standard list of diagnoses that are considered CCs. Historically, we developed this list using physician panels that classified each diagnosis code based on whether the diagnosis, when present as a secondary condition, would be considered a substantial complication or comorbidity. A substantial complication or comorbidity was defined as a condition that, because of its presence with a specific principal diagnosis, would cause an increase in the length-of-stay by at least 1 day in at least 75 percent of the patients. However, depending on the principal diagnosis of the patient, some diagnoses on the basic list of complications and comorbidities may be excluded if they are closely related to the principal diagnosis. In FY 2008, we evaluated

each diagnosis code to determine its impact on resource use and to determine the most appropriate CC subclassification (non-CC, CC, or MCC) assignment. We refer readers to sections II.D.2. and 3. of the preamble of the FY 2008 IPPS final rule with comment period for a discussion of the refinement of CCs in relation to the MS-DRGs we adopted for FY 2008 (72 FR 47152 through 47171).

b. Proposed Additions and Deletions to the Diagnosis Code Severity Levels for FY 2018

The following tables identifying the proposed additions and deletions to the MCC severity levels list and the proposed additions and deletions to the CC severity levels list for FY 2018 are available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>.

Table 6L.1—Proposed Additions to the MCC List—FY 2018;

Table 6L.2—Proposed Deletions to the MCC List—FY 2018;

Table 6J.1—Proposed Additions to the CC List—FY 2018; and

Table 6J.2—Proposed Deletions to the CC List—FY 2018.

We are inviting public comments on our proposed severity level designations for the diagnosis codes listed in Table 6L.1. and Table 6J.1. We note that, for Table 6L.2. and Table 6J.2., the proposed deletions are a result of code expansions. Therefore, the diagnosis codes on these lists are no longer valid codes, effective FY 2018. For example, diagnosis code O00.10 (Tubal pregnancy without intrauterine pregnancy) is a current CC for FY 2017 under Version 34 of the ICD-10 MS-DRGs. Effective FY 2018, under Version 35 of the ICD-10 MS-DRGs, this single code has been expanded into three diagnosis codes to include laterality (left/right) and an unspecified option with the addition of a sixth character. Therefore, diagnosis code O00.10 is included in Table 6J.2. for deletion from the CC list because it is no longer a valid code in FY 2018.

c. Principal Diagnosis Is Its Own CC or MCC

CMS' initial goal in developing the ICD-10 MS-DRGs was to ensure that a patient case was assigned to the same MS-DRG, regardless of whether the patient record was to be coded in ICD-9-CM or ICD-10. When certain ICD-10-CM combination codes are reported as a principal diagnosis, it implies that a CC or MCC is present. This occurs as a result of evaluating the cluster of ICD-

9—CM codes that would have been coded on an ICD—9—CM record. If one of the ICD—9—CM codes in the cluster was a CC or an MCC, the single ICD—10—CM combination code used as a principal diagnosis also must imply that the CC or MCC is present.

The ICD—10—CM diagnosis codes to which this logic applies are included in Appendix J of the ICD—10 MS—DRG Version 34 Definitions Manual (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2017-IPPS-Final-Rule-Home-Page-Items/FY2017-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLfxsp0;Entries=10&DLSort=0&DLSortDir=ascending>). Appendix J includes two lists: Part 1 is the list of principal diagnosis codes where the ICD—10—CM code is its own MCC. Part 2 is the list of principal diagnosis codes where the ICD—10—CM code is its own CC. Part 1 of Appendix J corresponds to Table 6L.—Principal Diagnosis Is Its Own MCC List, and Part 2 of Appendix J corresponds to Table 6M.—Principal Diagnosis Is Its Own CC List.

We received a request to add the ICD—10—CM diagnosis codes for acute myocardial infarction, decompensated heart failure and specified forms of shock, which are currently designated as a CC or an MCC when reported as a secondary diagnosis, to Table 6L.—Principal Diagnosis Is Its Own MCC List. According to the requestor, the addition of these codes to the list is necessary for bundled payment initiatives and so that facilities that accept these patients in transfer have resources to care for them.

The purpose of the Principal Diagnosis Is Its Own CC or MCC Lists was to ensure consistent MS—DRG assignment between the ICD—9—CM and ICD—10 MS—DRGs due to the clusters and combination codes. There are a number of other ICD—10—CM combination codes that, due to their prior designation as a CC or an MCC when reported as a secondary diagnosis, are not on either of these lists. Having multiple lists for CC and MCC diagnoses when reported as a principal and/or secondary diagnosis may not provide an accurate representation of resource utilization for the MS—DRGs. As discussed in further detail below, we have plans to conduct a comprehensive review of the CC and MCC lists for FY 2019. We believe the results of that review will help to inform the future of these lists.

Therefore, we are not proposing to add the ICD—10—CM diagnosis codes for acute myocardial infarction,

decompensated heart failure and specified forms of shock to Table 6L.—Principal Diagnosis Is Its Own MCC List. In addition, we are not proposing any changes to Table 6L.—Principal Diagnosis Is Its Own MCC List and Table 6M.—Principal Diagnosis Is Its Own CC List. We are inviting public comments on our proposal to maintain the existing lists of principal diagnosis codes in Tables 6L. and 6M for FY 2018.

d. Proposed CC Exclusions List for FY 2018

In the September 1, 1987 final notice (52 FR 33143) concerning changes to the DRG classification system, we modified the GROUPER logic so that certain diagnoses included on the standard list of CCs would not be considered valid CCs in combination with a particular principal diagnosis. We created the CC Exclusions List for the following reasons: (1) To preclude coding of CCs for closely related conditions; (2) to preclude duplicative or inconsistent coding from being treated as CCs; and (3) to ensure that cases are appropriately classified between the complicated and uncomplicated DRGs in a pair. As previously indicated, we developed a list of diagnoses, using physician panels, to include those diagnoses that, when present as a secondary condition, would be considered a substantial complication or comorbidity.

In previous years, we made changes to the list of CCs, either by adding new CCs or deleting CCs already on the list.

In the May 19, 1987 proposed notice (52 FR 18877) and the September 1, 1987 final notice (52 FR 33154), we explained that the excluded secondary diagnoses were established using the following five principles:

- Chronic and acute manifestations of the same condition should not be considered CCs for one another;
- Specific and nonspecific (that is, not otherwise specified (NOS)) diagnosis codes for the same condition should not be considered CCs for one another;
- Codes for the same condition that cannot coexist, such as partial/total, unilateral/bilateral, obstructed/unobstructed, and benign/malignant, should not be considered CCs for one another;
- Codes for the same condition in anatomically proximal sites should not be considered CCs for one another; and
- Closely related conditions should not be considered CCs for one another.

The creation of the CC Exclusions List was a major project involving hundreds of codes. We have continued to review the remaining CCs to identify additional exclusions and to remove diagnoses

from the master list that have been shown not to meet the definition of a CC. We refer readers to the FY 2014 IPPS/LTCH PPS final rule (78 FR 50541 through 50544) for detailed information regarding revisions that were made to the CC and CC Exclusion Lists under the ICD—9—CM MS—DRGs.

For FY 2018, we are proposing changes to the ICD—10 MS—DRGs Version 35 CC Exclusion List. Therefore, we have developed Table 6G.1.—Proposed Secondary Diagnosis Order Additions to the CC Exclusions List—FY 2018; Table 6G.2.—Proposed Principal Diagnosis Order Additions to the CC Exclusions List—FY 2018; Table 6H.1.—Proposed Secondary Diagnosis Order Deletions to the CC Exclusions List—FY 2018; and Table 6H.2.—Proposed Principal Diagnosis Order Deletions to the CC Exclusions List—FY 2018. Each of these principal diagnosis codes for which there is a CC exclusion is shown in Table 6G.2. with an asterisk and the conditions that will not count as a CC are provided in an indented column immediately following the affected principal diagnosis. Beginning with discharges on or after October 1 of each year, the indented diagnoses are not recognized by the GROUPER as valid CCs for the asterisked principal diagnoses. Tables 6G. and 6H. associated with this proposed rule are available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>.

To identify new, revised and deleted diagnosis and procedure codes, for FY 2018, we have developed Table 6A.—New Diagnosis Codes, Table 6B.—New Procedure Codes, Table 6C.—Invalid Diagnosis Codes, Table 6D.—Invalid Procedure Codes, Table 6E.—Revised Diagnosis Code Titles, and Table 6F.—Revised Procedure Code Titles for this proposed rule.

These tables are not published in the Addendum to this proposed rule but are available via the Internet on the CMS Web site at: (<https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) as described in section VI. of the Addendum to this proposed rule. As discussed in section II.F.15. of the preamble of this proposed rule, the code titles are adopted as part of the ICD—10 (previously ICD—9—CM) Coordination and Maintenance Committee process. Therefore, although we publish the code titles in the IPPS proposed and final rules, they are not subject to comment in the proposed or final rules. We are inviting public comments on the MDC and MS—DRG assignments for the new

diagnosis and procedure codes as set forth in Table 6A.—New Diagnosis Codes and Table 6B.—New Procedure Codes. In addition, we are inviting public comments on the proposed severity level designations for the new diagnosis codes as set forth in Table 6A. and the proposed O.R. status for the new procedure codes as set forth in Table 6B.

13. Comprehensive Review of CC List for FY 2019

In the FY 2008 IPPS final rule (72 FR 47153 through 47175), we discussed our efforts to better recognize severity of illness which began with a comprehensive review of the CC list

and, ultimately, the implementation of the MS-DRGs. Similar to the analysis that was performed at that time, we are providing the public with notice of our plans to conduct a comprehensive review of the CC and MCC lists for FY 2019.

As a result of the time that has elapsed since that review and changes to how inpatient care is currently delivered, we plan to analyze if further refinements to these lists are warranted. For example, over the past several years, there has been a steady increase in the proportion of cases grouping to the MS-DRGs with an MCC severity level than had previously occurred. Our evaluation will assist in determining if the

conditions designated as an MCC continue to represent significant increases in resource utilization that support the MCC designation.

We currently utilize a statistical algorithm to determine the impact on resource use of each secondary diagnosis. Each diagnosis for which Medicare data are available is evaluated to determine its impact on resource use and to determine the most appropriate CC subclass (non-CC, CC, or MCC) assignment. In order to make this determination, the average costs for each subset of cases is compared to the expected costs for cases in that subset. The following format is used to evaluate each diagnosis:

Code	Diagnosis	Cnt1	C1	Cnt2	C2	Cnt3	C3

Count (Cnt) is the number of patients in each subset and C1, C2, and C3 are a measure of the impact on resource use of patients in each of the subsets. The C1, C2, and C3 values are a measure of the ratio of average costs for patients with these conditions to the expected average costs across all cases. The C1 value reflects a patient with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs. The C2 value reflects a patient with at least one other secondary diagnosis that is a CC but none that is an MCC. The C3 value reflects a patient with at least one other secondary diagnosis that is an MCC. A value close to 1.0 in the C1 field would suggest that the code produces the same expected value as a non-CC diagnosis. That is, average costs for the case are similar to the expected average costs for that subset and the diagnosis is not expected to increase resource usage. A higher value in the C1 (or C2 and C3) field suggests more resource usage is associated with the diagnosis and an increased likelihood that it is more like a CC or major CC than a non-CC. Thus, a value close to 2.0 suggests the condition is more like a CC than a non-CC but not as significant in resource usage as an MCC. A value close to 3.0 suggests the condition is expected to consume resources more similar to an MCC than a CC or non-CC. For example, a C1 value of 1.8 for a secondary diagnosis means that for the subset of patients who have the secondary diagnosis and have either no other secondary diagnosis present, or all the other secondary diagnoses present are non-CCs, the impact on resource use of the secondary diagnoses is greater than the expected value for a non-CC by an amount equal to 80 percent of the difference between the expected value

of a CC and a non-CC (that is, the impact on resource use of the secondary diagnosis is closer to a CC than a non-CC).

We are inviting public comments regarding other possible ways we can incorporate meaningful indicators of clinical severity.

14. Review of Procedure Codes in MS DRGs 981 Through 983; 984 Through 986; and 987 Through 989

Each year, we review cases assigned to MS-DRGs 981, 982, and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively); MS-DRGs 984, 985, and 986 (Prostatic O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively); and MS-DRGs 987, 988, and 989 (Nonextensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) to determine whether it would be appropriate to change the procedures assigned among these MS-DRGs. MS-DRGs 981 through 983, 984 through 986, and 987 through 989 are reserved for those cases in which none of the O.R. procedures performed are related to the principal diagnosis. These MS-DRGs are intended to capture atypical cases, that is, those cases not occurring with sufficient frequency to represent a distinct, recognizable clinical group.

Under the ICD-10 MS-DRGs Version 34, MS-DRGs 984 through 986 are assigned when one or more of the procedures described by ICD-10-PCS codes in Table 6P.2. that is associated with this FY 2018 proposed rule (which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service->

Payment/AcuteInpatientPPS/index.html) are performed and are unrelated to the principal diagnosis. All remaining O.R. procedures are assigned to MS-DRGs 981 through 983 and 987 through 989, with MS-DRGs 987 through 989 assigned to those discharges in which the only procedures performed are nonextensive procedures that are unrelated to the principal diagnosis.

We refer the reader to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56847 through 56848) for a discussion of the movement and redesignation of procedure codes from MS-DRGs 984 through 986 related to the transition of the ICD-10 MS-DRGs.

Our review of MedPAR claims data showed that there are no cases that merited movement or should logically be reassigned from ICD-10 MS-DRGs 984 through 986 to any of the other MDCs for FY 2018. Therefore, for FY 2018, we are not proposing to change the procedures assigned among these MS-DRGs. We are inviting public comments on our proposal to maintain the current structure of these MS-DRGs.

a. Moving Procedure Codes From MS-DRGs 981 Through 983 or MS-DRGs 987 Through 989 Into MDCs

We annually conduct a review of procedures producing assignment to MS-DRGs 981 through 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) or MS-DRGs 987 through 989 (Nonextensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively) on the basis of volume, by procedure, to see if it would be appropriate to move procedure codes out of these MS-DRGs

into one of the surgical MS-DRGs for the MDC into which the principal diagnosis falls. The data are arrayed in two ways for comparison purposes. We look at a frequency count of each major operative procedure code. We also compare procedures across MDCs by volume of procedure codes within each MDC.

We identify those procedures occurring in conjunction with certain principal diagnoses with sufficient frequency to justify adding them to one of the surgical MS-DRGs for the MDC in which the diagnosis falls. Upon review of the claims data from the December 2016 update of the FY 2016 MedPAR file, we did not find any cases that merited movement or that should logically be assigned to any of the other MDCs. Therefore, for FY 2018, we are not proposing to remove any procedures from MS-DRGs 981 through 983 or MS-DRGs 987 through 989 into one of the surgical MS-DRGs for the MDC into

which the principal diagnosis is assigned. We are inviting public comments on our proposal to maintain the current structure of these MS-DRGs.

b. Reassignment of Procedures Among MS-DRGs 981 Through 983, 984 Through 986, and 987 Through 989

We also review the list of ICD-10-PCS procedures that, when in combination with their principal diagnosis code, result in assignment to MS-DRGs 981 through 983, 984 through 986, or 987 through 989, to ascertain whether any of those procedures should be reassigned from one of those three groups of MS-DRGs to another of the three groups of MS-DRGs based on average costs and the length of stay. We look at the data for trends such as shifts in treatment practice or reporting practice that would make the resulting MS-DRG assignment illogical. If we find these shifts, we would propose to move cases to keep the MS-DRGs clinically

similar or to provide payment for the cases in a similar manner. Generally, we move only those procedures for which we have an adequate number of discharges to analyze the data.

Based on the results of our review of the December 2016 update of the FY 2016 MedPAR file, we are proposing to reassign the procedure codes currently assigned to MS-DRGs 984 through 986 (Prostatic O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC and without CC/MCC, respectively) to MS-DRGs 987 through 989 (Non-extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC and without CC/MCC, respectively). As shown in the table below, we found a total of 1,001 cases in MS-DRGs 984 through 986 with an average length-of-stay of 7.5 days and average costs of \$16,539. In MS-DRGs 987 through 989, we found a total of 17,772 cases, with an average length of stay of 7.5 days and average costs of \$16,193.

O.R. PROCEDURES UNRELATED TO PRINCIPAL DIAGNOSIS

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRGs 984, 985 and 986 (Prostatic O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively)	1,001	7.5	\$16,539
MS-DRGs 987, 988 and 989 (Non-extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively)	17,772	7.5	16,193

The claims data demonstrate that it is no longer necessary to maintain a separate set of MS-DRGs specifically for the prostatic O.R. procedures. The average length of stay of 7.5 days is identical in both sets of MS-DRGs and the average costs are very similar with a difference of only \$346. Our clinical advisors reviewed the data and support movement of these 1,001 cases into the nonextensive O.R. procedures MS-DRGs. They noted that treatment practices have shifted since the inception of the prostatic O.R. procedures grouping and the average costs are in alignment.

Therefore, for FY 2018, we are proposing to reassign the prostatic O.R. procedure codes from MS-DRGs 984 through 986 to MS-DRGs 987 through 989 and to delete MS-DRGs 984, 985 and 986 because they would no longer be needed as a result of this proposed movement. We are inviting public comments on our proposals.

15. Proposed Changes to the ICD-10-CM and ICD-10-PCS Coding Systems

In September 1985, the ICD-9-CM Coordination and Maintenance Committee was formed. This is a Federal interdepartmental committee,

co-chaired by the National Center for Health Statistics (NCHS), the Centers for Disease Control and Prevention, and CMS, charged with maintaining and updating the ICD-9-CM system. The final update to ICD-9-CM codes was made on October 1, 2013. Thereafter, the name of the Committee was changed to the ICD-10 Coordination and Maintenance Committee, effective with the March 19-20, 2014 meeting. The ICD-10 Coordination and Maintenance Committee addresses updates to the ICD-10-CM and ICD-10-PCS coding systems. The Committee is jointly responsible for approving coding changes, and developing errata, addenda, and other modifications to the coding systems to reflect newly developed procedures and technologies and newly identified diseases. The Committee is also responsible for promoting the use of Federal and non-Federal educational programs and other communication techniques with a view toward standardizing coding applications and upgrading the quality of the classification system.

The official list of ICD-9-CM diagnosis and procedure codes by fiscal year can be found on the CMS Web site at: <http://cms.hhs.gov/Medicare/Coding/>

ICD9ProviderDiagnosticCodes/codes.html. The official list of ICD-10-CM and ICD-10-PCS codes can be found on the CMS Web site at: <http://www.cms.gov/Medicare/Coding/ICD10/index.html>.

The NCHS has lead responsibility for the ICD-10-CM and ICD-9-CM diagnosis codes included in the Tabular List and Alphabetic Index for Diseases, while CMS has lead responsibility for the ICD-10-PCS and ICD-9-CM procedure codes included in the Tabular List and Alphabetic Index for Procedures.

The Committee encourages participation in the previously mentioned process by health-related organizations. In this regard, the Committee holds public meetings for discussion of educational issues and proposed coding changes. These meetings provide an opportunity for representatives of recognized organizations in the coding field, such as the American Health Information Management Association (AHIMA), the American Hospital Association (AHA), and various physician specialty groups, as well as individual physicians, health information management professionals, and other members of the public, to

contribute ideas on coding matters. After considering the opinions expressed at the public meetings and in writing, the Committee formulates recommendations, which then must be approved by the agencies.

The Committee presented proposals for coding changes for implementation in FY 2018 at a public meeting held on September 13–14, 2016, and finalized the coding changes after consideration of comments received at the meetings and in writing by November 13, 2016.

The Committee held its 2017 meeting on March 7–8, 2017. The deadline for submitting comments on these code proposals was April 7, 2017. It was announced at this meeting that any new ICD–10–CM/PCS codes for which there was consensus of public support and for which complete tabular and indexing changes would be made by May 2017 would be included in the October 1, 2017 update to ICD–10–CM/ICD–10–PCS. As discussed in earlier sections of the preamble of this proposed rule, there are new, revised, and deleted ICD–10–CM diagnosis codes and ICD–10–PCS procedure codes that are captured in Table 6A.—New Diagnosis Codes, Table 6B.—New Procedure Codes, Table 6C.—Invalid Diagnosis Codes, Table 6D.—Invalid Procedure Codes, Table 6E.—Revised Diagnosis Code Titles, and Table 6F.—Revised Procedure Code Titles for this proposed rule, which are available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>. Because of the length of these tables, they are not published in the Addendum to this proposed rule. Rather, they are available via the Internet as discussed in section VI. of the Addendum to this proposed rule.

Live Webcast recordings of the discussions of procedure codes at the Committee's September 13–14, 2016 meeting and March 7–8, 2017 meeting can be obtained from the CMS Web site at: http://cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html?redirect=/icd9ProviderDiagnosticCodes/03_meetings.asp. The minutes of the discussions of diagnosis codes at the September 13–14, 2016 meeting and March 7–8, 2017 meeting can be found at: http://www.cdc.gov/nchs/icd/icd10cm_maintenance.html. These Web sites also provide detailed information about the Committee, including information on requesting a new code, attending a Committee meeting, and timeline requirements and meeting dates.

We encourage commenters to address suggestions on coding issues involving

diagnosis codes to: Donna Pickett, Co-Chairperson, ICD–10 Coordination and Maintenance Committee, NCHS, Room 2402, 3311 Toledo Road, Hyattsville, MD 20782. Comments may be sent by Email to: nchsicd10@cdc.gov.

Questions and comments concerning the procedure codes should be addressed to: Patricia Brooks, Co-Chairperson, ICD–10 Coordination and Maintenance Committee, CMS, Center for Medicare Management, Hospital and Ambulatory Policy Group, Division of Acute Care, C4–08–06, 7500 Security Boulevard, Baltimore, MD 21244–1850. Comments may be sent by Email to: ICDProcedureCodeRequest@cms.hhs.gov.

In the September 7, 2001 final rule implementing the IPPS new technology add-on payments (66 FR 46906), we indicated we would attempt to include proposals for procedure codes that would describe new technology discussed and approved at the Spring meeting as part of the code revisions effective the following October.

Section 503(a) of Public Law 108–173 included a requirement for updating diagnosis and procedure codes twice a year instead of a single update on October 1 of each year. This requirement was included as part of the amendments to the Act relating to recognition of new technology under the IPPS. Section 503(a) amended section 1886(d)(5)(K) of the Act by adding a clause (vii) which states that the Secretary shall provide for the addition of new diagnosis and procedure codes on April 1 of each year, but the addition of such codes shall not require the Secretary to adjust the payment (or diagnosis-related group classification) until the fiscal year that begins after such date. This requirement improves the recognition of new technologies under the IPPS system by providing information on these new technologies at an earlier date. Data will be available 6 months earlier than would be possible with updates occurring only once a year on October 1.

While section 1886(d)(5)(K)(vii) of the Act states that the addition of new diagnosis and procedure codes on April 1 of each year shall not require the Secretary to adjust the payment, or DRG classification, under section 1886(d) of the Act until the fiscal year that begins after such date, we have to update the DRG software and other systems in order to recognize and accept the new codes. We also publicize the code changes and the need for a mid-year systems update by providers to identify the new codes. Hospitals also have to obtain the new code books and encoder updates, and make other system changes

in order to identify and report the new codes.

The ICD–10 (previously the ICD–9–CM) Coordination and Maintenance Committee holds its meetings in the spring and fall in order to update the codes and the applicable payment and reporting systems by October 1 of each year. Items are placed on the agenda for the Committee meeting if the request is received at least 2 months prior to the meeting. This requirement allows time for staff to review and research the coding issues and prepare material for discussion at the meeting. It also allows time for the topic to be publicized in meeting announcements in the **Federal Register** as well as on the CMS Web site. Final decisions on code title revisions are currently made by March 1 so that these titles can be included in the IPPS proposed rule. A complete addendum describing details of all diagnosis and procedure coding changes, both tabular and index, is published on the CMS and NCHS Web sites in June of each year. Publishers of coding books and software use this information to modify their products that are used by health care providers. This 5-month time period has proved to be necessary for hospitals and other providers to update their systems.

A discussion of this timeline and the need for changes are included in the December 4–5, 2005 ICD–9–CM Coordination and Maintenance Committee Meeting minutes. The public agreed that there was a need to hold the fall meetings earlier, in September or October, in order to meet the new implementation dates. The public provided comment that additional time would be needed to update hospital systems and obtain new code books and coding software. There was considerable concern expressed about the impact this new April update would have on providers.

In the FY 2005 IPPS final rule, we implemented section 1886(d)(5)(K)(vii) of the Act, as added by section 503(a) of Public Law 108–173, by developing a mechanism for approving, in time for the April update, diagnosis and procedure code revisions needed to describe new technologies and medical services for purposes of the new technology add-on payment process. We also established the following process for making these determinations. Topics considered during the Fall ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee meeting are considered for an April 1 update if a strong and convincing case is made by the requester at the Committee's public meeting. The request must identify the reason why a new code is needed in April for purposes of the new

technology process. The participants at the meeting and those reviewing the Committee meeting summary report are provided the opportunity to comment on this expedited request. All other topics are considered for the October 1 update. Participants at the Committee meeting are encouraged to comment on all such requests. There were no requests approved for an expedited April 1, 2017 implementation of a code at the September 13–14, 2016 Committee meeting. Therefore, there were no new codes implemented on April 1, 2017.

ICD–9–CM addendum and code title information is published on the CMS Web site at: <http://www.cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html?redirect=/icd9ProviderDiagnosticCodes/01overview.asp#TopofPage>. ICD–10–CM and ICD–10–PCS addendum and code title information is published on the CMS Web site at: <http://www.cms.gov/Medicare/Coding/ICD10/index.html>. Information on ICD–10–CM diagnosis codes, along with the Official ICD–10–CM Coding Guidelines, can also be found on the CDC Web site at: <http://www.cdc.gov/nchs/icd/icd10.htm>. Information on new, revised, and deleted ICD–10–CM/ICD–10–PCS codes is also provided to the AHA for publication in the *Coding Clinic for ICD–10*. AHA also distributes information to publishers and software vendors.

CMS also sends copies of all ICD–10–CM and ICD–10–PCS coding changes to its Medicare contractors for use in updating their systems and providing education to providers.

The code titles are adopted as part of the ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee process. Therefore, although

we publish the code titles in the IPPS proposed and final rules, they are not subject to comment in the proposed or final rules.

The following chart shows the number of ICD–10–CM and ICD–10–PCS codes and code changes since FY 2016 when ICD–10 was implemented.

TOTAL NUMBER OF CODES AND CHANGES IN TOTAL NUMBER OF CODES PER FISCAL YEAR ICD–10–CM AND ICD–10–PCS CODES

Fiscal year	Number	Change
FY 2016:		
ICD–10–CM	69,823	
ICD–10–PCS	71,974	
FY 2017:		
ICD–10–CM	71,486	+1,663
ICD–10–PCS	75,789	+3,815
FY 2018:		
ICD–10–CM	71,772	+286
ICD–10–PCS	78,299	+2,510

As mentioned previously, the public is provided the opportunity to comment on any requests for new diagnosis or procedure codes discussed at the ICD–10 Coordination and Maintenance Committee meeting.

At the September 12–13, 2016 and March 7–8, 2017 Committee meetings, we discussed any requests we had received for new ICD–10–CM diagnosis codes and ICD–10–PCS procedure codes that were to be implemented on October 1, 2017. We invited public comments on any code requests discussed at the September 12–13, 2016 and March 7–8, 2017 Committee meetings for implementation as part of the October 1, 2017 update. The deadline for commenting on code proposals discussed at the September 12–13, 2016 Committee meeting was November 13, 2016. The deadline for commenting on code proposals discussed at the March

7–8, 2017 Committee meeting was April 7, 2017.

16. Proposed Replaced Devices Offered Without Cost or With a Credit

a. Background

In the FY 2008 IPPS final rule with comment period (72 FR 47246 through 47251), we discussed the topic of Medicare payment for devices that are replaced without cost or where credit for a replaced device is furnished to the hospital. We implemented a policy to reduce a hospital's IPPS payment for certain MS–DRGs where the implantation of a device that has been recalled determined the base MS–DRG assignment. At that time, we specified that we will reduce a hospital's IPPS payment for those MS–DRGs where the hospital received a credit for a replaced device equal to 50 percent or more of the cost of the device.

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51556 through 51557), we clarified this policy to state that the policy applies if the hospital received a credit equal to 50 percent or more of the cost of the replacement device and issued instructions to hospitals accordingly.

b. Proposed Changes for FY 2018

For FY 2018, we are not proposing to add any MS–DRGs to the policy for replaced devices offered without cost or with a credit. We are proposing to continue to include the existing MS–DRGs currently subject to the policy as displayed in the table below.

MDC	MS–DRG	MS–DRG title
Pre-MDC	001	Heart Transplant or Implant of Heart Assist System with MCC.
Pre-MDC	002	Heart Transplant or Implant of Heart Assist System without MCC.
1	023	Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis with MCC or Chemo Implant.
1	024	Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis without MCC.
1	025	Craniotomy & Endovascular Intracranial Procedures with MCC.
1	026	Craniotomy & Endovascular Intracranial Procedures with CC.
1	027	Craniotomy & Endovascular Intracranial Procedures without CC/MCC.
1	040	Peripheral, Cranial Nerve & Other Nervous System Procedures with MCC.
1	041	Peripheral, Cranial Nerve & Other Nervous System Procedures with CC or Peripheral Neurostimulator.
1	042	Peripheral, Cranial Nerve & Other Nervous System Procedures without CC/MCC.
3	129	Major Head & Neck Procedures with CC/MCC or Major Device.
3	130	Major Head & Neck Procedures without CC/MCC.
5	215	Other Heart Assist System Implant.
5	216	Cardiac Valve & Other Major Cardiothoracic Procedure with Cardiac Catheterization with MCC.
5	217	Cardiac Valve & Other Major Cardiothoracic Procedure with Cardiac Catheterization with CC.
5	218	Cardiac Valve & Other Major Cardiothoracic Procedure with Cardiac Catheterization without CC/MCC.
5	219	Cardiac Valve & Other Major Cardiothoracic Procedure without Cardiac Catheterization with MCC.

MDC	MS-DRG	MS-DRG title
5	220	Cardiac Valve & Other Major Cardiothoracic Procedure without Cardiac Catheterization with CC.
5	221	Cardiac Valve & Other Major Cardiothoracic Procedure without Cardiac Catheterization without CC/MCC.
5	222	Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/Heart Failure/Shock with MCC.
5	223	Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/Heart Failure/Shock without MCC.
5	224	Cardiac Defibrillator Implant with Cardiac Catheterization without AMI/Heart Failure/Shock with MCC.
5	225	Cardiac Defibrillator Implant with Cardiac Catheterization without AMI/Heart Failure/Shock without MCC.
5	226	Cardiac Defibrillator Implant without Cardiac Catheterization with MCC.
5	227	Cardiac Defibrillator Implant without Cardiac Catheterization without MCC.
5	242	Permanent Cardiac Pacemaker Implant with MCC.
5	243	Permanent Cardiac Pacemaker Implant with CC.
5	244	Permanent Cardiac Pacemaker Implant without CC/MCC.
5	245	AICD Generator Procedures.
5	258	Cardiac Pacemaker Device Replacement with MCC.
5	259	Cardiac Pacemaker Device Replacement without MCC.
5	260	Cardiac Pacemaker Revision Except Device Replacement with MCC.
5	261	Cardiac Pacemaker Revision Except Device Replacement with CC.
5	262	Cardiac Pacemaker Revision Except Device Replacement without CC/MCC.
5	265	AICD Lead Procedures.
5	266	Endovascular Cardiac Valve Replacement with MCC.
5	267	Endovascular Cardiac Valve Replacement without MCC.
5	268	Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC.
5	269	Aortic and Heart Assist Procedures Except Pulsation Balloon without MCC.
5	270	Other Major Cardiovascular Procedures with MCC.
5	271	Other Major Cardiovascular Procedures with CC.
5	272	Other Major Cardiovascular Procedures without CC/MCC.
8	461	Bilateral or Multiple Major Joint Procedures Of Lower Extremity with MCC.
8	462	Bilateral or Multiple Major Joint Procedures of Lower Extremity without MCC.
8	466	Revision of Hip or Knee Replacement with MCC.
8	467	Revision of Hip or Knee Replacement with CC.
8	468	Revision of Hip or Knee Replacement without CC/MCC.
8	469	Major Joint Replacement or Reattachment of Lower Extremity with MCC.
8	470	Major Joint Replacement or Reattachment of Lower Extremity without MCC.

We are soliciting public comments on our proposal to continue to include the existing MS-DRGs currently subject to the policy for replaced devices offered without cost or with credit and to not add any additional MS-DRGs to the policy. We note that, as discussed in section II.F.2.b. and in section II.F.5.a. of the preamble of this proposed rule, we are proposing to revise the titles for MS-DRG 023 and MS-DRGs 469 and 470. We refer readers to those discussions of the specific proposed MS-DRG titles. The final list of MS-DRGs subject to the payment policy for devices provided at no cost or with a credit for FY 2018 will be listed in the FY 2018 IPPS/LTCH PPS final rule, as well as issued to providers through guidance and instructions in the form of a Change Request (CR).

17. Other Policy Changes: Other Operating Room (O.R.) and Non-O.R. Issues

a. O.R. Procedures to Non-O.R. Procedures

For this FY 2018 IPPS/LTCH PPS proposed rule, we continued our efforts to address the recommendations for consideration that we received in response to some of the proposals set forth in the FY 2017 IPPS/LTCH PPS

proposed rule pertaining to changing the designation of ICD-10-PCS procedure codes from O.R. procedures to non-O.R. procedures. As we stated in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56871), we received requests and recommendations for over 800 procedure codes that we were not able to fully evaluate and finalize for FY 2017. We discuss these requests and recommendations below.

We also are addressing separate requests that we received regarding changing the designation of specific ICD-10-PCS procedure codes. For each group summarized below, the detailed lists of procedure are shown in Tables 6P.4a. through 6P.4p. (Proposed ICD-10-CM and ICD-10-PCS Code Designations, MCE and MS-DRG Changes—FY 2018) associated with this proposed rule (which are available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>).

(1) Percutaneous/Diagnostic Drainage

One commenter identified 135 ICD-10-PCS procedure codes describing procedures involving percutaneous diagnostic and therapeutic drainage of central nervous system, vascular and

other body sites that generally would not require the resources of an operating room and can be performed at the bedside. The list includes procedure codes that describe procedures involving drainage with or without placement of a drainage device. We agree with the commenter. Therefore, we are proposing that the 135 ICD-10-PCS procedure codes listed in Table 6P.4a. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(2) Percutaneous Insertion of Intraluminal or Monitoring Device

One commenter identified 28 ICD-10-PCS procedure codes describing procedures involving the percutaneous insertion of intraluminal and monitoring devices into central nervous system and other cardiovascular body parts that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 28 ICD-10-

PCS procedure codes listed in Table 6P.4b. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(3) Percutaneous Removal of Drainage, Infusion, Intraluminal or Monitoring Device

One commenter identified 22 ICD–10–PCS procedure codes that describe procedures involving the percutaneous

removal of drainage, infusion, intraluminal and monitoring devices from central nervous system and other vascular body parts that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 22 ICD–10–PCS procedure codes listed in Table 6P.4c. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R.

procedures. We are inviting public comments on our proposal.

(4) External Removal of Cardiac or Neurostimulator Lead

One commenter identified four ICD–10–PCS procedure codes that describe procedures involving the external removal of cardiac leads from the heart and neurostimulator leads from central nervous system body parts that generally would not require the resources of an operating room and can be performed at the bedside. These four ICD–10–PCS codes are shown in the table below.

ICD–10–PCS code	Code description
00P6XMZ	Removal of neurostimulator lead from cerebral ventricle, external approach.
00PEXMZ	Removal of neurostimulator lead from cranial nerve, external approach.
01PYXMZ	Removal of neurostimulator lead from peripheral nerve, external approach.
02PAXMZ	Removal of cardiac lead from heart, external approach.

We agree with the commenter. Therefore, we are proposing that the four ICD–10–PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(5) Percutaneous Revision of Drainage, Infusion, Intraluminal or Monitoring Device

One commenter identified 28 ICD–10–PCS procedure codes that describe procedures involving the percutaneous revision of drainage, infusion,

intraluminal and monitoring devices for vascular and heart and great vessel body parts that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 28 ICD–10–PCS procedure codes listed in Table 6P.4d. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-

O.R. procedures. We are inviting public comments on our proposal.

(6) Percutaneous Destruction

One commenter identified two ICD–10–PCS procedure codes that describe procedures involving the percutaneous destruction of retina body parts that generally would not require the resources of an operating room and can be performed at the bedside. These two ICD–10–PCS codes are shown in the table below.

ICD–10–PCS code	Code description
085E3ZZ	Destruction of right retina, percutaneous approach.
085F3ZZ	Destruction of left retina, percutaneous approach.

We agree with the commenter. Therefore, we are proposing that the two ICD–10–PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(7) External/Diagnostic Drainage

One commenter identified 20 ICD–10–PCS procedure codes that describe procedures involving external drainage for structures of the eye that generally would not require the resources of an

operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 20 ICD–10–PCS procedure codes listed in Table 6P.4e. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(8) External Extirpation

One commenter identified four ICD–10–PCS procedure codes that describe procedures involving external extirpation of matter from eye structures that generally would not require the resources of an operating room and can be performed at the bedside. These four ICD–10–PCS codes are shown in the table below.

ICD–10–PCS code	Code description
08C0XZZ	Extirpation of matter from right eye, external approach.
08C1XZZ	Extirpation of matter from left eye, external approach.
08CSXZZ	Extirpation of matter from right conjunctiva, external approach.
08CTXZZ	Extirpation of matter from left conjunctiva, external approach.

We agree with the commenter. Therefore, we are proposing that the four ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(9) External Removal of Radioactive Element or Synthetic Substitute

One commenter identified three ICD-10-PCS procedure codes that describe procedures involving the external

removal of radioactive or synthetic substitutes from the eye that generally would not require the resources of an operating room and can be performed at the bedside. These three ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
08P0X1Z	Removal of radioactive element from right eye, external approach.
08P0XJZ	Removal of synthetic substitute from right eye, external approach.
08P1XJZ	Removal of synthetic substitute from left eye, external approach.

We agree with the commenter. Therefore, we are proposing that the three ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(10) Endoscopic/Transorifice Diagnostic Drainage

One commenter identified eight ICD-10-PCS procedure codes that describe procedures involving endoscopic/transorifice (via natural or artificial

opening) drainage of ear structures that generally would not require the resources of an operating room and can be performed at the bedside. These eight ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
09977ZX	Drainage of right tympanic membrane, via natural or artificial opening, diagnostic.
09978ZX	Drainage of right tympanic membrane, via natural or artificial opening endoscopic, diagnostic.
09987ZX	Drainage of left tympanic membrane, via natural or artificial opening, diagnostic.
09988ZX	Drainage of left tympanic membrane, via natural or artificial opening endoscopic, diagnostic.
099F7ZX	Drainage of right eustachian tube, via natural or artificial opening, diagnostic.
099F8ZX	Drainage of right eustachian tube, via natural or artificial opening endoscopic, diagnostic.
099G7ZX	Drainage of left eustachian tube, via natural or artificial opening, diagnostic.
099G8ZX	Drainage of left eustachian tube, via natural or artificial opening endoscopic, diagnostic.

We agree with the commenter. Therefore, we are proposing that the eight ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(11) External Release

One commenter identified four ICD-10-PCS procedure codes that describe procedures involving the external release of ear structures that generally

would not require the resources of an operating room and can be performed at the bedside. These four ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
09N0XZZ	Release right external ear, external approach.
09N1XZZ	Release left external ear, external approach.
09N3XZZ	Release right external auditory canal, external approach.
09N4XZZ	Release left external auditory canal, external approach.

We agree with the commenter. Therefore, we are proposing that the four ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(12) External Repair

One commenter identified three ICD-10-PCS procedure codes that describe procedures involving the external repair of body parts that generally would not

require the resources of an operating room and can be performed at the bedside. These three ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
09QKXZZ	Repair nose, external approach.
0CQ4XZZ	Repair buccal mucosa, external approach.
0CQ7XZZ	Repair tongue, external approach.

We agree with the commenter. Therefore, we are proposing that the three ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(13) Endoscopic/Transorifice Destruction

One commenter identified eight ICD-10-PCS procedure codes that describe procedures involving the endoscopic/transorifice

destruction of respiratory system body parts that generally would not require the resources of an operating room and can be performed at the bedside. These eight ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0B538ZZ	Destruction of right main bronchus, via natural or artificial opening endoscopic.
0B548ZZ	Destruction of right upper lobe bronchus, via natural or artificial opening endoscopic.
0B558ZZ	Destruction of right middle lobe bronchus, via natural or artificial opening endoscopic.
0B568ZZ	Destruction of right lower lobe bronchus, via natural or artificial opening endoscopic.
0B578ZZ	Destruction of left main bronchus, via natural or artificial opening endoscopic.
0B588ZZ	Destruction of left upper lobe bronchus, via natural or artificial opening endoscopic.
0B598ZZ	Destruction of lingula bronchus, via natural or artificial opening endoscopic.
0B5B8ZZ	Destruction of left lower lobe bronchus, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the eight ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(14) Endoscopic/Transorifice Drainage

One commenter identified 40 ICD-10-PCS procedure codes that describe procedures involving endoscopic/transorifice (via natural or artificial opening) drainage of respiratory system body parts that generally would not

require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 40 ICD-10-PCS procedure codes listed in Table 6P.4f. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(15) Endoscopic/Transorifice Extirpation

One commenter identified nine ICD-10-PCS procedure codes that describe procedures involving endoscopic/transorifice extirpation of matter from respiratory system body parts that generally would not require the resources of an operating room and can be performed at the bedside. These nine ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0BCC8ZZ	Extirpation of matter from right upper lung lobe, via natural or artificial opening endoscopic.
0BCD8ZZ	Extirpation of matter from right middle lung lobe, via natural or artificial opening endoscopic.
0BCF8ZZ	Extirpation of matter from right lower lung lobe, via natural or artificial opening endoscopic.
0BCG8ZZ	Extirpation of matter from left upper lung lobe, via natural or artificial opening endoscopic.
0BCH8ZZ	Extirpation of matter from lung lingula, via natural or artificial opening endoscopic.
0BCJ8ZZ	Extirpation of matter from left lower lung lobe, via natural or artificial opening endoscopic.
0BCK8ZZ	Extirpation of matter from right lung, via natural or artificial opening endoscopic.
0BCL8ZZ	Extirpation of matter from left lung, via natural or artificial opening endoscopic.
0BCM8ZZ	Extirpation of matter from bilateral lungs, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the nine ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(16) Endoscopic/Transorifice Fragmentation

One commenter identified 16 ICD-10-PCS procedure codes that describe procedures involving endoscopic/

transorifice fragmentation of respiratory system body parts that generally would not require the resources of an operating room and can be performed at the bedside. These 16 ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0BF37ZZ	Fragmentation in right main bronchus, via natural or artificial opening.
0BF38ZZ	Fragmentation in right main bronchus, via natural or artificial opening endoscopic.
0BF47ZZ	Fragmentation in right upper lobe bronchus, via natural or artificial opening.
0BF48ZZ	Fragmentation in right upper lobe bronchus, via natural or artificial opening endoscopic.
0BF57ZZ	Fragmentation in right middle lobe bronchus, via natural or artificial opening.
0BF58ZZ	Fragmentation in right middle lobe bronchus, via natural or artificial opening endoscopic.
0BF67ZZ	Fragmentation in right lower lobe bronchus, via natural or artificial opening.
0BF68ZZ	Fragmentation in right lower lobe bronchus, via natural or artificial opening endoscopic.
0BF77ZZ	Fragmentation in left main bronchus, via natural or artificial opening.
0BF78ZZ	Fragmentation in left main bronchus, via natural or artificial opening endoscopic.
0BF87ZZ	Fragmentation in left upper lobe bronchus, via natural or artificial opening.
0BF88ZZ	Fragmentation in left upper lobe bronchus, via natural or artificial opening endoscopic.
0BF97ZZ	Fragmentation in lingula bronchus, via natural or artificial opening.
0BF98ZZ	Fragmentation in lingula bronchus, via natural or artificial opening endoscopic.
0BFB7ZZ	Fragmentation in left lower lobe bronchus, via natural or artificial opening.
0BFB8ZZ	Fragmentation in left lower lobe bronchus, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the 16 ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(17) Endoscopic/Transorifice Insertion of Intraluminal Device

One commenter identified two ICD-10-PCS procedure codes that describe procedures involving an endoscopic/transorifice (via natural or artificial

opening) insertion of intraluminal devices into respiratory system body parts that generally would not require the resources of an operating room and can be performed at the bedside. These two ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
OBH17DZ	Insertion of intraluminal device into trachea, via natural or artificial opening.
OBH18DZ	Insertion of intraluminal device into trachea, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the two ICD-10-PCS procedure codes shown in the table above be designated non-O.R. procedures. We are inviting public comments on our proposal.

(18) Endoscopic/Transorifice Removal of Radioactive Element

One commenter identified two ICD-10-PCS procedure codes that describe procedures involving the endoscopic/transorifice removal of radioactive

elements from respiratory system body parts that generally would not require the resources of an operating room and can be performed at the bedside. These two ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
OBPK71Z	Removal of radioactive element from right lung, via natural or artificial opening.
OBPK81Z	Removal of radioactive element from right lung, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the two ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(19) Endoscopic/Transorifice Revision of Drainage, Infusion, Intraluminal or Monitoring Device

One commenter identified 18 ICD-10-PCS procedure codes that describe procedures involving the revision of drainage, infusion, intraluminal, or monitoring devices from respiratory system body parts that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 18

ICD-10-PCS procedure codes listed in Table 6P.4g, associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(20) Endoscopic/Transorifice Excision

One commenter identified one ICD-10-PCS procedure code that describes the procedure involving endoscopic/transorifice (via natural or artificial opening) excision of the digestive system body parts that generally would not require the resources of an operating room and can be performed at the

bedside. This code is 0DBQ8ZZ (Excision of anus, via natural or artificial opening endoscopic. We agree with the commenter. Therefore, we are proposing that ICD-10-PCS procedure code 0DBQ8ZZ be designated as a non-O.R. procedure. We are inviting public comments on our proposal.

(21) Endoscopic/Transorifice Insertion

One commenter identified two ICD-10-PCS procedure codes that describe procedures involving the endoscopic/transorifice (via natural or artificial opening) insertion of intraluminal device into the stomach that generally would not require the resources of an operating room and can be performed at the bedside. These two ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
ODH67DZ	Insertion of intraluminal device into stomach, via natural or artificial opening.
ODH68DZ	Insertion of intraluminal device into stomach, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the two ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(22) Endoscopic/Transorifice Removal

One commenter identified six ICD-10-PCS procedure codes that describe procedures involving endoscopic/transorifice (via natural or artificial

opening) removal of feeding devices that generally would not require the resources of an operating room and can be performed at the bedside. These six ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
ODP07UZ	Removal of feeding device from upper intestinal tract, via natural or artificial opening.
ODP08UZ	Removal of feeding device from upper intestinal tract, via natural or artificial opening endoscopic.
ODP67UZ	Removal of feeding device from stomach, via natural or artificial opening.
ODP68UZ	Removal of feeding device from stomach, via natural or artificial opening endoscopic.
ODPD7UZ	Removal of feeding device from lower intestinal tract, via natural or artificial opening

ICD-10-PCS code	Code description
ODPD8UZ	Removal of feeding device from lower intestinal tract, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the six ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(23) External Reposition

One commenter identified two ICD-10-PCS procedure codes that describe procedures involving external reposition of gastrointestinal body parts

that generally would not require the resources of an operating room and can be performed at the bedside. These two ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
ODS5XZZ	Reposition esophagus, external approach.
ODSQXZZ	Reposition anus, external approach.

We agree with the commenter. Therefore, we are proposing that the two ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(24) Endoscopic/Transorifice Drainage

One commenter identified eight ICD-10-PCS procedure codes that describe procedures involving endoscopic/transorifice (via natural or artificial opening) drainage of hepatobiliary

system and pancreatic body parts that generally would not require the resources of an operating room and can be performed at the bedside. These eight ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
OF9580Z	Drainage of right hepatic duct with drainage device, via natural or artificial opening endoscopic.
OF958ZZ	Drainage of right hepatic duct, via natural or artificial opening endoscopic.
OF9680Z	Drainage of left hepatic duct with drainage device, via natural or artificial opening endoscopic.
OF968ZZ	Drainage of left hepatic duct, via natural or artificial opening endoscopic.
OF9880Z	Drainage of cystic duct with drainage device, via natural or artificial opening endoscopic.
OF988ZZ	Drainage of cystic duct, via natural or artificial opening endoscopic.
OF9D8ZZ	Drainage of pancreatic duct, via natural or artificial opening endoscopic.
OF9F8ZZ	Drainage of accessory pancreatic duct, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the eight ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(25) Endoscopic/Transorifice Fragmentation

One commenter identified two ICD-10-PCS procedure codes that describe procedures involving endoscopic/transorifice (via natural or artificial

opening) fragmentation of hepatobiliary system and pancreatic body parts that generally would not require the resources of an operating room and can be performed at the bedside. These two ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
OFFD8ZZ	Fragmentation in pancreatic duct, via natural or artificial opening endoscopic.
OFFF8ZZ	Fragmentation in accessory pancreatic duct, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the two ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(26) Percutaneous Alteration

One commenter identified three ICD-10-PCS procedure codes that describe procedures involving percutaneous alteration of the breast that generally

would not require the resources of an operating room and can be performed at the bedside. These three ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
OH0T3JZ	Alteration of right breast with synthetic substitute, percutaneous approach.
OH0U3JZ	Alteration of left breast with synthetic substitute, percutaneous approach.
OH0V3JZ	Alteration of bilateral breast with synthetic substitute, percutaneous approach.

We agree with the commenter. Therefore, we are proposing that the three ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(27) External Division and Excision of Skin

One commenter identified 41 ICD-10-PCS procedure codes that describe procedures involving external division and excision of the skin for body parts

that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 41 ICD-10-PCS procedure codes listed in Table 6P.4h. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-

O.R. procedures. We are inviting public comments on our proposal.

(28) External Excision of Breast

One commenter identified six ICD-10-PCS procedure codes that describe procedures involving external excision of the breast that they believed would generally not require the resources of an operating room and can be performed at the bedside. These six ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0HBTXZZ	Excision of right breast, external approach.
0HBUXZZ	Excision of left breast, external approach.
0HBVXZZ	Excision of bilateral breast, external approach.
0HBWXZZ	Excision of right nipple, external approach.
0HBXXZZ	Excision of left nipple, external approach.
0HBYXZZ	Excision of supernumerary breast, external approach.

We disagree with the commenter because these procedure codes describe various types of surgery performed on the breast or nipple (for example, partial mastectomy) that would typically involve the use of general anesthesia. Therefore, we are proposing that the six

ICD-10-PCS procedure codes shown in the table above remain designated as O.R. procedures. We are inviting public comments on our proposal.

(29) Percutaneous Supplement

One commenter identified three ICD-10-PCS procedure codes that describe

procedures involving percutaneous supplement of the breast with synthetic substitute that generally would not require the resources of an operating room and can be performed at the bedside. These three ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0HUT3JZ	Supplement right breast with synthetic substitute, percutaneous approach.
0HUU3JZ	Supplement left breast with synthetic substitute, percutaneous approach.
0HUV3JZ	Supplement bilateral breast with synthetic substitute, percutaneous approach.

We agree with the commenter. Therefore, we are proposing that the three ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(30) Open Drainage

One commenter identified 25 ICD-10-PCS procedure codes that describe procedures involving open drainage of subcutaneous tissue and fascia body parts that generally would not require the resources of an operating room and

can be performed at the bedside. The list includes procedure codes for drainage with or without placement of a drainage device. We agree with the commenter. Therefore, we are proposing that the 25 ICD-10-PCS procedure codes listed in Table 6P.4i. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R.

procedures. We are inviting public comments on our proposal.

(31) Percutaneous Drainage

One commenter identified two ICD-10-PCS procedure codes that describe procedures involving percutaneous drainage of subcutaneous tissue and fascia body parts that generally would not require the resources of an operating room and can be performed at the bedside. These two ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0J9J3ZZ	Drainage of right hand subcutaneous tissue and fascia, percutaneous approach.
0J9K3ZZ	Drainage of left hand subcutaneous tissue and fascia, percutaneous approach.

We agree with the commenter. Therefore, we are proposing that the two ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(32) Percutaneous Extraction

One commenter identified 22 ICD-10-PCS procedure codes that describe procedures involving percutaneous extraction of subcutaneous tissue and fascia body parts that generally would not require the resources of an operating room and can be performed at the

bedside. We agree with the commenter. Therefore, we are proposing that the 22 ICD-10-PCS procedure codes listed in Table 6P.4j. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be

designated as non-O.R. procedures. We are inviting public comments on our proposal.

(33) Open Extraction

One commenter identified 22 ICD–10–PCS procedure codes that describe procedures involving open extraction of subcutaneous tissue and fascia body parts that the commenter believed would generally not require the resources of an operating room and can be performed at the bedside. We disagree with the commenter because these codes describe procedures that utilize an open approach and are being performed on the skin and subcutaneous tissue. Depending on the medical reason for the open extraction, the procedures may require an O.R. setting. Therefore, we are proposing that the 22 ICD–10–PCS procedure codes listed in Table 6P.4k. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) remain designated as O.R. procedures. We are inviting public comments on our proposal.

(34) Percutaneous and Open Repair

One commenter identified 44 ICD–10–PCS procedure codes that describe procedures involving percutaneous and open repair of subcutaneous tissue and fascia body parts that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 44 ICD–10–PCS procedure codes listed in Table 6P.4l. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(35) External Release

One commenter identified 28 ICD–10–PCS procedure codes that describe procedures involving external release of bursa and ligament body parts that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 28 ICD–10–PCS procedure codes listed in Table 6P.4m. associated with this proposed rule (which is available via the Internet on

the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(36) External Repair

One commenter identified 135 ICD–10–PCS procedure codes that describe procedures involving external repair of various bones and joints. We believe that these procedures generally would not be performed in the operating room. We are proposing that the 135 ICD–10–PCS procedure codes listed in Table 6P.4n. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(37) External Reposition

One commenter identified 14 ICD–10–PCS procedure codes that describe procedures involving external reposition of various bones. These 14 ICD–10–PCS codes are shown in the table below.

ICD–10–PCS code	Code description
ONS0XZZ	Reposition skull, external approach.
ONS1XZZ	Reposition right frontal bone, external approach.
ONS2XZZ	Reposition left frontal bone, external approach.
ONS3XZZ	Reposition right parietal bone, external approach.
ONS4XZZ	Reposition left parietal bone, external approach.
ONS5XZZ	Reposition right temporal bone, external approach.
ONS6XZZ	Reposition left temporal bone, external approach.
ONS7XZZ	Reposition right occipital bone, external approach.
ONS8XZZ	Reposition left occipital bone, external approach.
OPS3XZZ	Reposition cervical vertebra, external approach.
OPS4XZZ	Reposition thoracic vertebra, external approach.
OQS0XZZ	Reposition lumbar vertebra, external approach.
OQS1XZZ	Reposition sacrum, external approach.
OQSSXZZ	Reposition coccyx, external approach.

We believe that these procedures generally would not be performed in the operating room. Therefore, we are proposing that the 14 ICD–10–PCS procedure codes shown in the table above be designated as non-O.R.

procedures. We are inviting public comments on our proposal.

(38) Endoscopic/Transorifice Dilation

One commenter identified eight ICD–10–PCS procedure codes that describe procedures involving endoscopic/

transorifice (via natural or artificial opening) dilation of urinary system body parts that generally would not require the resources of an operating room and can be performed at the bedside. These eight ICD–10–PCS codes are shown in the table below.

ICD–10–PCS code	Code description
OT767ZZ	Dilation of right ureter, via natural or artificial opening.
OT768ZZ	Dilation of right ureter, via natural or artificial opening endoscopic.
OT777ZZ	Dilation of left ureter, via natural or artificial opening.
OT778ZZ	Dilation of left ureter, via natural or artificial opening endoscopic.
OT7B7DZ	Dilation of bladder with intraluminal device, via natural or artificial opening.
OT7B7ZZ	Dilation of bladder, via natural or artificial opening.
OT7B8DZ	Dilation of bladder with intraluminal device, via natural or artificial opening endoscopic.

ICD-10-PCS code	Code description
0T7B8ZZ	Dilation of bladder, via natural or artificial opening endoscopic.

We agree with the commenter. Therefore, we are proposing that the eight ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(39) Endoscopic/Transorifice Excision

One commenter identified three ICD-10-PCS procedure codes that describe procedures involving endoscopic/transorifice (via natural or artificial opening) excision of urinary system

body parts that the commenter believed would generally not require the resources of an operating room and can be performed at the bedside. These three ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0TBD7ZZ	Excision of urethra, via natural or artificial opening.
0TBD8ZZ	Excision of urethra, via natural or artificial opening endoscopic.
0TBDXZZ	Excision of urethra, external approach.

We disagree with the commenter because, depending on the medical reason for the excision, the procedures may require an O.R. setting. Therefore, we are proposing that the three ICD-10-PCS procedure codes shown in the table above remain designated as O.R.

procedures. We are inviting public comments on our proposal.

(40) External/Transorifice Repair

One commenter identified three ICD-10-PCS procedure codes that describe procedures involving external and

transorifice (via natural or artificial opening) repair of the vagina body part that generally would not require the resources of an operating room and can be performed at the bedside. These three ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
0UQG7ZZ	Repair vagina, via natural or artificial opening.
0UQGXZZ	Repair vagina, external approach.
0UQMXZZ	Repair vulva, external approach.

We agree with the commenter. Therefore, we are proposing that these three ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(41) Percutaneous Transfusion

One commenter identified 20 ICD-10-PCS procedure codes that describe procedures involving percutaneous transfusion of bone marrow and stem cells that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 20 ICD-10-PCS procedure codes listed in Table 6P.4o. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/>)

AcuteInpatientPPS/index.html) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(42) External/Percutaneous/Transorifice Introduction

One commenter identified 51 ICD-10-PCS procedure codes that describe procedures involving external, percutaneous and transorifice (via natural or artificial opening) introduction of substances that generally would not require the resources of an operating room and can be performed at the bedside. We agree with the commenter. Therefore, we are proposing that the 51 ICD-10-PCS procedure codes listed in Table 6P.4p. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/>)

for-Service-Payment/AcuteInpatientPPS/index.html) be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(43) Percutaneous/Diagnostic and Endoscopic/Transorifice Irrigation, Measurement and Monitoring

One commenter identified 15 ICD-10-PCS procedure codes that describe procedures involving percutaneous/diagnostic and endoscopic/transorifice (via natural or artificial opening) irrigation, measurement and monitoring of structures, pressures and flow that generally would not require the resources of an operating room and can be performed at the bedside. These 15 ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
3E1N38X	Irrigation of male reproductive using irrigating substance, percutaneous approach, diagnostic.
3E1N38Z	Irrigation of male reproductive using irrigating substance, percutaneous approach.
3E1N78X	Irrigation of male reproductive using irrigating substance, via natural or artificial opening, diagnostic.
3E1N78Z	Irrigation of male reproductive using irrigating substance, via natural or artificial opening.
3E1N88X	Irrigation of male reproductive using irrigating substance, via natural or artificial opening endoscopic, diagnostic.
3E1N88Z	Irrigation of male reproductive using irrigating substance, via natural or artificial opening endoscopic.
4A0635Z	Measurement of lymphatic flow, percutaneous approach.
4A063BZ	Measurement of lymphatic pressure, percutaneous approach.
4A0C35Z	Measurement of biliary flow, percutaneous approach.

ICD-10-PCS code	Code description
4A0C3BZ	Measurement of biliary pressure, percutaneous approach.
4A0C75Z	Measurement of biliary flow, via natural or artificial opening.
4A0C7BZ	Measurement of biliary pressure, via natural or artificial opening.
4A0C85Z	Measurement of biliary flow, via natural or artificial opening endoscopic.
4A1635Z	Monitoring of lymphatic flow, percutaneous approach.
4A163BZ	Monitoring of lymphatic pressure, percutaneous approach.

We agree with the commenter. Therefore, we are proposing that the 15 ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

(44) Imaging

One commenter identified six ICD-10-PCS procedure codes that describe procedures involving imaging with contrast of hepatobiliary system body

parts that generally would not require the resources of an operating room and can be performed at the bedside. These six ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
BF030ZZ	Plain radiography of gallbladder and bile ducts using high osmolar contrast.
BF031ZZ	Plain radiography of gallbladder and bile ducts using low osmolar contrast.
BF03YZZ	Plain radiography of gallbladder and bile ducts using other contrast.
BF0C0ZZ	Plain radiography of hepatobiliary system, all using high osmolar contrast.
BF0C1ZZ	Plain radiography of hepatobiliary system, all using low osmolar contrast.
BF0CYZZ	Plain radiography of hepatobiliary system, all using other contrast.

We agree with the commenter. Therefore, we are proposing that the six ICD-10-PCS procedure codes shown in the table above be designated as non-

O.R. procedures. We are inviting public comments on our proposal.

(45) Prosthetics

One commenter identified five ICD-10-PCS procedure codes that describe

procedures involving the fitting and use of prosthetics and assistive devices that would not require the resources of an operating room. These five ICD-10-PCS codes are shown in the table below.

ICD-10-PCS code	Code description
F0DZ8ZZ	Prosthesis device fitting.
F0DZ9EZ	Assistive, adaptive, supportive or protective devices device fitting using orthosis.
F0DZ9FZ	Assistive, adaptive, supportive or protective devices device fitting using assistive, adaptive, supportive or protective equipment.
F0DZ9UZ	Assistive, adaptive, supportive or protective devices device fitting using prosthesis.
F0DZ9ZZ	Assistive, adaptive, supportive or protective devices device fitting.

We agree with the commenter. Therefore, we are proposing that the five ICD-10-PCS procedure codes shown in the table above be designated as non-O.R. procedures. We are inviting public comments on our proposal.

b. Revision of Neurostimulator Generator

We received a request to review three ICD-10-PCS procedure codes that describe procedures for revision of a neurostimulator generator that are currently designated as O.R. procedures and assigned to MS-DRGs 252, 253 and 254 (Other Vascular Procedures with MCC, with CC and without CC/MCC, respectively). The three codes are 0JW0T0MZ (Revision of stimulator generator in trunk subcutaneous tissue and fascia, open approach), 0JW0T3MZ (Revision of stimulator generator in trunk subcutaneous tissue and fascia, percutaneous approach), and 0JW0T5MZ (Revision of stimulator generator in

trunk subcutaneous tissue and fascia, external approach).

The requester expressed concern with the MS-DRG assignments and noted that although these codes are used to report revision of a carotid sinus stimulator pulse generator and appropriately assigned to MS-DRGs 252, 253 and 254 in MDC 5 (Diseases and Disorders of the Circulatory System), they also are very frequently used for the revision of the more common (for example, gastric, intracranial, sacral and spinal) neurostimulator generators that would generally not require the resources of an operating room.

The requester also stated that the indication for revision of a neurostimulator generator is typically due to a complication, which would be reflected in a complication code such as ICD-10-CM diagnosis code T85.734A (Infection and inflammatory reaction due to implanted electronic neurostimulator, generator, initial

encounter) or T85.890A (Other specified complication of nervous system prosthetic devices, implants and grafts, initial encounter). Because both of these diagnosis codes are assigned to MDC 1 (Diseases and Disorders of the Nervous System), when either code is reported in combination with one of the three procedure codes that describe revision of neurostimulator generator codes (currently assigned to MDC 5), the resulting MS-DRG assignment is to MS-DRGs 981, 982 and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC and without CC/MCC, respectively).

The requester presented the following three options for consideration.

- Reclassify the ICD-10-PCS procedure codes from O.R. Procedures to non-O.R. procedures that affect MS-DRG assignment only in MDC 5. The requester stated that, under this option, the procedure codes would continue to appropriately group to MDC 5 when representing cases involving carotid

sinus stimulators and the other types of neurostimulator cases would appropriately group to medical MS-DRGs.

- Add the ICD-10-PCS procedure codes to MDC 1, such as to MS-DRGs 040, 041 and 042 (Peripheral, Cranial Nerve and Other Nervous System Procedures with MCC, with CC or Peripheral Neurostimulator and without CC/MCC, respectively) under MDC 1. The requestor stated that this option would resolve the inconsistency between a revision of a carotid sinus stimulator generator being classified as an O.R. procedure, while the other comparable procedures involving a revision of a regular neurostimulator generator are not. The requestor also

stated that this option would preclude cases being assigned to MS-DRGs 981 through 983.

- Stop classifying the ICD-10-PCS procedure codes as O.R. procedures entirely. The requestor stated that, under this option, all cases would then group to medical MS-DRGs, regardless of the type of neurostimulator generator.

We analyzed claims data for the three revision of neurostimulator generator procedure codes from the December 2016 update of the FY 2016 MedPAR file and identified cases under MDC 1 (Diseases and Disorders of the Nervous System) in MS-DRGs 025, 026, and 027 (Craniotomy and Endovascular Intracranial Procedures with MCC, with CC and without CC/MCC, respectively);

MS-DRGs 029 and 030 (Spinal Procedures with CC or Neurostimulators and Spinal Procedures without CC/MCC, respectively); and MS-DRGs 041 and 042 (Peripheral, Cranial Nerve and Other Nervous System Procedures with CC or Peripheral Neurostimulator and without CC/MCC, respectively). We also identified cases in MS-DRGs 982 and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with CC and without CC/MCC, respectively). Lastly, we identified cases under MDC 5 (Diseases and Disorders of the Circulatory System) in MS-DRGs 252, 253 and 254 (Other Vascular Procedures with MCC, with CC and without CC/MCC, respectively). Our findings are shown in the table below.

MS-DRGs FOR REVISION OF NEUROSTIMULATOR GENERATOR

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 025—All cases	18,442	9.1	\$29,984
MS-DRG 025—Cases with revision of neurostimulator generator	1	12.0	73,716
MS-DRG 026—All cases	8,415	5.6	21,557
MS-DRG 026—Cases with revision of neurostimulator generator	1	6.0	4,537
MS-DRG 027—All cases	10,089	2.9	17,320
MS-DRG 027—Cases with revision of neurostimulator generator	4	1.8	13,906
MS-DRG 029—All cases	3,192	5.9	23,145
MS-DRG 029—Cases with revision of neurostimulator generator	6	3.5	32,799
MS-DRG 030—All cases	1,933	2.9	14,901
MS-DRG 030—Cases with revision of neurostimulator generator	11	2.2	18,294
MS-DRG 041—All cases	5,154	5.5	16,633
MS-DRG 041—Cases with revision of neurostimulator generator	1	1.0	14,145
MS-DRG 042—All cases	2,099	3.2	13,725
MS-DRG 042—Cases with revision of neurostimulator generator	2	2.0	28,587
MS-DRG 982—All cases	15,216	6.6	17,341
MS-DRG 982—Cases with revision of neurostimulator generator	11	3.0	15,336
MS-DRG 983—All cases	3,508	3.2	11,627
MS-DRG 983—Cases with revision of neurostimulator generator	9	4.2	19,951
MS-DRG 252—All cases	33,817	7.6	23,384
MS-DRG 252—Cases with revision of neurostimulator generator	1	7.0	18,740
MS-DRG 253—All cases	27,456	5.5	18,519
MS-DRG 253—Cases with revision of neurostimulator generator	7	2.4	19,078
MS-DRG 254—All cases	13,036	2.9	13,253
MS-DRG 254—Cases with revision of neurostimulator generator	3	3.0	11,981

As shown in the table above, the overall volume of cases reporting revision of neurostimulator generator is low, with a total of only 57 cases found across all of the MS-DRGs reviewed. The average length of stay for these cases reporting revision of neurostimulator generators is, in most cases, consistent with the average length of stay for all cases in the respective MS-DRG. Finally, the average costs for cases reporting revision of neurostimulator generator reflect a wide range, with a low of \$4,537 in MS-DRG 026 to a high of \$73,716 in MS-DRG 025. It is clear that, for MS-DRG 025 where the average

costs of all cases were \$29,984 and the average costs of the one case reporting revision of a neurostimulator generator was \$73,716, this is an atypical case. It is also clear from the data that there were other procedures reported on the claims where a procedure code for a revision of a neurostimulator generator was assigned due to the various MS-DRG assignments.

After review of the claims data and discussion with our clinical advisors, we agree with and support the requestor's first option—to reclassify the three ICD-10-PCS procedure codes for revision of neurostimulator generators from O.R. procedures to non-O.R. procedures that affect the assignment for MS-DRGs 252, 253 and 254 to account for the subset of patients undergoing

revision of a carotid sinus neurostimulator generator specifically. In cases where one of the more common (for example, gastric, intracranial, sacral and spinal) neurostimulator generators are undergoing revision, in the absence of another O.R. procedure, these cases would group to a medical MS-DRG. We are inviting public comments on our proposal.

c. External Repair of Hymen

We received a request to examine ICD-10-PCS procedure code 0UQKXZZ (Repair Hymen, External Approach). This procedure code is currently designated as an O.R. procedure in MS-DRGs 746 and 747 (Vagina, Cervix and Vulva Procedures with CC/MCC and without CC/MCC, respectively) under

MDC 13. The requestor provided examples and expressed concern that procedure code 0UQKXZZ was assigned to MS-DRG 987 (Non-Extensive O.R. Procedures Unrelated to Principal Diagnosis with MCC) when reported on a maternal delivery claim. The requestor noted that when a similar code was reported with an external approach (for example, procedure code 0UQMXZZ (Repair vulva, external approach)), the case was appropriately assigned to MS-DRG 774 (Vaginal Delivery with Complicating Diagnosis). The requestor stated that the physician documentation was simply more specific to the location of the repair and this should not affect assignment to one of the MS-DRGs for vaginal delivery.

We reviewed claims data involving the examples provided by the requestor involving ICD-10-PCS procedure code 0UQKXZZ (Repair hymen, external approach). Our clinical advisors agree with the requestor that reporting of this procedure code should not affect assignment to one of the MS-DRGs for vaginal delivery. As discussed earlier in section II.F.15.a. of the preamble of this proposed rule, we are proposing to change the designation for a number of procedure codes from O.R. procedures to non-O.R. procedures. Included in that proposal are ICD-10-PCS procedure codes 0UQGXXZ (Repair vagina, external approach) and 0UQMXZZ (Repair vulva, external approach). Consistent with the change in designation for these procedure codes, we also are proposing to designate ICD-10-PCS procedure code 0UQKXZZ (Repair hymen, external approach) as a non-O.R. procedure. The procedure by itself would generally not require the resources of an operating room. If the procedure is performed following a vaginal delivery, it is the vaginal delivery procedure code 10E0XZZ (Delivery of products of conception) that determines the MS-DRG assignment because this code is designated as a non-O.R. procedure affecting the MS-DRG.

Therefore, we are proposing to change the designation of ICD-10-PCS procedure code 0UQKXZZ (Repair hymen, external approach) to a non-O.R. procedure. This redesignation will enable more appropriate MS-DRG assignment for these cases by eliminating erroneous assignment to MS-DRGs 987 through 989. We are inviting public comments on our proposal.

d. Non-O.R. Procedures in MDC 17 (Myeloproliferative Diseases and Disorders, Poorly Differentiated Neoplasms)

Under MDC 17 (Myeloproliferative Diseases and Disorders, Poorly Differentiated Neoplasms), there are 11 surgical MS-DRGs. Of these 11 surgical MS-DRGs, there are 5 MS-DRGs containing GROUPE logic that includes ICD-10-PCS procedure codes designated as O.R. procedures as well as non-O.R. procedures that affect the MS-DRG. These five MS-DRGs are MS-DRGs 823, 824, and 825 (Lymphoma and Non-Acute Leukemia with Other O.R. Procedure with MCC, with CC and without CC/MCC, respectively) and MS-DRGs 829 and 830 (Myeloproliferative Disorders or Poorly Differentiated Neoplasms with Other O.R. Procedure with CC/MCC and without CC/MCC, respectively). We refer the reader to the ICD-10 Version 34 MS-DRG Definitions Manual which is available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2017-IPPS-Final-Rule-Home-Page-Items/FY2017-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending> for the complete list of ICD-10-PCS procedure codes assigned to these five MS-DRGs under MDC 17.

We reviewed the list of 244 ICD-10-PCS non-O.R. procedure codes currently assigned to these 5 MS-DRGs. Of these 244 procedure codes, we determined that 55 of the procedure codes do not warrant being designated as non-O.R. procedures that affect these MS-DRGs because they describe procedures that would generally not require a greater intensity of resources for facilities to manage the cases included in the definition (logic) of these MS-DRGs. Therefore, we are proposing that the 55 ICD-10-PCS procedure codes listed in Table 6P.3c. associated with this proposed rule (which is available via the Internet on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>) be removed from the logic for MS-DRGs 823, 824, 825, 829 and 830 as non-O.R. procedures affecting the MS-DRG. We also are proposing to revise the titles for these five MS-DRGs by deleting the reference to "O.R." in the title. Specifically, we are proposing to revise the titles for MS-DRGs 823, 824, and 825 to "Lymphoma and Non-Acute Leukemia with Other Procedure with MCC, with CC and without CC/MCC", respectively and we are proposing to

revise the titles for MS-DRGs 829 and 830 to "Myeloproliferative Disorders or Poorly Differentiated Neoplasms with Other Procedure with CC/MCC and without CC/MCC", respectively. We are inviting public comments on our proposals.

G. Recalibration of the Proposed FY 2018 MS-DRG Relative Weights

1. Data Sources for Developing the Proposed Relative Weights

In developing the proposed FY 2018 system of weights, we used two data sources: Claims data and cost report data. As in previous years, the claims data source is the MedPAR file. This file is based on fully coded diagnostic and procedure data for all Medicare inpatient hospital bills. The FY 2016 MedPAR data used in this proposed rule include discharges occurring on October 1, 2015, through September 30, 2016, based on bills received by CMS through December 31, 2016, from all hospitals subject to the IPPS and short-term, acute care hospitals in Maryland (which at that time were under a waiver from the IPPS). The FY 2016 MedPAR file used in calculating the proposed relative weights includes data for approximately 9,607,103 Medicare discharges from IPPS providers. Discharges for Medicare beneficiaries enrolled in a Medicare Advantage managed care plan are excluded from this analysis. These discharges are excluded when the MedPAR "GHO Paid" indicator field on the claim record is equal to "1" or when the MedPAR DRG payment field, which represents the total payment for the claim, is equal to the MedPAR "Indirect Medical Education (IME)" payment field, indicating that the claim was an "IME only" claim submitted by a teaching hospital on behalf of a beneficiary enrolled in a Medicare Advantage managed care plan. In addition, the December 31, 2016 update of the FY 2016 MedPAR file complies with version 5010 of the X12 HIPAA Transaction and Code Set Standards, and includes a variable called "claim type." Claim type "60" indicates that the claim was an inpatient claim paid as fee-for-service. Claim types "61," "62," "63," and "64" relate to encounter claims, Medicare Advantage IME claims, and HMO no-pay claims. Therefore, the calculation of the proposed relative weights for FY 2018 also excludes claims with claim type values not equal to "60." The data exclude CAHs, including hospitals that subsequently became CAHs after the period from which the data were taken. We note that the proposed FY 2018 relative weights are based on the ICD-

10-CM diagnoses and ICD-10-PCS procedure codes from the FY 2016 MedPAR claims data, grouped through the ICD-10 version of the proposed FY 2018 GROUPER (Version 35).

The second data source used in the cost-based relative weighting methodology is the Medicare cost report data files from the HCRIS. Normally, we use the HCRIS dataset that is 3 years prior to the IPPS fiscal year. Specifically, we used cost report data from the December 31, 2016 update of the FY 2015 HCRIS for calculating the proposed FY 2018 cost-based relative weights.

2. Methodology for Calculation of the Proposed Relative Weights

As we explain in section II.E.2. of the preamble of this proposed rule, we calculated the proposed FY 2018 relative weights based on 19 CCRs, as we did for FY 2017. The methodology we are proposing to use to calculate the FY 2018 MS-DRG cost-based relative weights based on claims data in the FY 2016 MedPAR file and data from the FY 2015 Medicare cost reports is as follows. We note that we have provided additional precision in our description of the methodology for FY 2018.

- To the extent possible, all the claims were regrouped using the proposed FY 2018 MS-DRG classifications discussed in sections II.B. and II.F. of the preamble of this proposed rule.

- The transplant cases that were used to establish the proposed relative weights for heart and heart-lung, liver and/or intestinal, and lung transplants (MS-DRGs 001, 002, 005, 006, and 007, respectively) were limited to those Medicare-approved transplant centers that have cases in the FY 2016 MedPAR file. (Medicare coverage for heart, heart-lung, liver and/or intestinal, and lung transplants is limited to those facilities that have received approval from CMS as transplant centers.)

- Organ acquisition costs for kidney, heart, heart-lung, liver, lung, pancreas, and intestinal (or multivisceral organs) transplants continue to be paid on a reasonable cost basis. Because these acquisition costs are paid separately from the prospective payment rate, it is necessary to subtract the acquisition charges from the total charges on each transplant bill that showed acquisition charges before computing the average cost for each MS-DRG and before eliminating statistical outliers.

- Claims with total charges or total lengths of stay less than or equal to zero were deleted. Claims that had an amount in the total charge field that differed by more than \$30.00 from the

sum of the routine day charges, intensive care charges, pharmacy charges, implantable devices charges, supplies and equipment charges, therapy services charges, operating room charges, cardiology charges, laboratory charges, radiology charges, other service charges, labor and delivery charges, inhalation therapy charges, emergency room charges, blood and blood products charges, anesthesia charges, cardiac catheterization charges, CT scan charges, and MRI charges were also deleted.

- At least 92.2 percent of the providers in the MedPAR file had charges for 14 of the 19 cost centers. All claims of providers that did not have charges greater than zero for at least 14 of the 19 cost centers were deleted. In other words, a provider must have no more than five blank cost centers. If a provider did not have charges greater than zero in more than five cost centers, the claims for the provider were deleted.

- Statistical outliers were eliminated by removing all cases that were beyond 3.0 standard deviations from the geometric mean of the log distribution of both the total charges per case and the total charges per day for each MS-DRG.

- Effective October 1, 2008, because hospital inpatient claims include a POA indicator field for each diagnosis present on the claim, only for purposes of relative weight-setting, the POA indicator field was reset to “Y” for “Yes” for all claims that otherwise have an “N” (No) or a “U” (documentation insufficient to determine if the condition was present at the time of inpatient admission) in the POA field.

Under current payment policy, the presence of specific HAC codes, as indicated by the POA field values, can generate a lower payment for the claim. Specifically, if the particular condition is present on admission (that is, a “Y” indicator is associated with the diagnosis on the claim), it is not a HAC, and the hospital is paid for the higher severity (and, therefore, the higher weighted MS-DRG). If the particular condition is not present on admission (that is, an “N” indicator is associated with the diagnosis on the claim) and there are no other complicating conditions, the DRG GROUPER assigns the claim to a lower severity (and, therefore, the lower weighted MS-DRG) as a penalty for allowing a Medicare inpatient to contract a HAC. While the POA reporting meets policy goals of encouraging quality care and generates program savings, it presents an issue for the relative weight-setting process. Because cases identified as HACs are likely to be more complex than similar

cases that are not identified as HACs, the charges associated with HAC cases are likely to be higher as well. Therefore, if the higher charges of these HAC claims are grouped into lower severity MS-DRGs prior to the relative weight-setting process, the relative weights of these particular MS-DRGs would become artificially inflated, potentially skewing the relative weights. In addition, we want to protect the integrity of the budget neutrality process by ensuring that, in estimating payments, no increase to the standardized amount occurs as a result of lower overall payments in a previous year that stem from using weights and case-mix that are based on lower severity MS-DRG assignments. If this would occur, the anticipated cost savings from the HAC policy would be lost.

To avoid these problems, we reset the POA indicator field to “Y” only for relative weight-setting purposes for all claims that otherwise have an “N” or a “U” in the POA field. This resetting “forced” the more costly HAC claims into the higher severity MS-DRGs as appropriate, and the relative weights calculated for each MS-DRG more closely reflect the true costs of those cases.

In addition, in the FY 2013 IPPS/LTCH PPS final rule, for FY 2013 and subsequent fiscal years, we finalized a policy to treat hospitals that participate in the Bundled Payments for Care Improvement (BPCI) initiative the same as prior fiscal years for the IPPS payment modeling and ratesetting process without regard to hospitals’ participation within these bundled payment models (that is, as if hospitals were not participating in those models under the BPCI initiative). The BPCI initiative, developed under the authority of section 3021 of the Affordable Care Act (codified at section 1115A of the Act), is comprised of four broadly defined models of care, which link payments for multiple services beneficiaries receive during an episode of care. Under the BPCI initiative, organizations enter into payment arrangements that include financial and performance accountability for episodes of care. For FY 2018, we are proposing to continue to include all applicable data from subsection (d) hospitals participating in BPCI Models 1, 2, and 4 in our IPPS payment modeling and ratesetting calculations. We refer readers to the FY 2013 IPPS/LTCH PPS final rule for a complete discussion on our final policy for the treatment of hospitals participating in the BPCI initiative in our ratesetting process. For additional information on

the BPCI initiative, we refer readers to the CMS' Center for Medicare and Medicaid Innovation's Web site at: <http://innovation.cms.gov/initiatives/Bundled-Payments/index.html> and to section IV.H.4. of the preamble of the FY 2013 IPPS/LTCH PPS final rule (77 FR 53341 through 53343).

The charges for each of the 19 cost groups for each claim were standardized to remove the effects of differences in proposed area wage levels, IME and DSH payments, and for hospitals located in Alaska and Hawaii, the

applicable proposed cost-of-living adjustment. Because hospital charges include charges for both operating and capital costs, we standardized total charges to remove the effects of differences in proposed geographic adjustment factors, cost-of-living adjustments, and DSH payments under the capital IPPS as well. Charges were then summed by MS-DRG for each of the 19 cost groups so that each MS-DRG had 19 standardized charge totals. Statistical outliers were then removed. These charges were then adjusted to

cost by applying the proposed national average CCRs developed from the FY 2015 cost report data.

The 19 cost centers that we used in the proposed relative weight calculation are shown in the following table. The table shows the lines on the cost report and the corresponding revenue codes that we used to create the proposed 19 national cost center CCRs. If stakeholders have comments about the groupings in this table, we may consider those comments as we finalize our policy.

Cost center group name (19 total)	MedPAR charge field	Revenue codes contained in MedPAR charge field	Cost report line description	Cost from HCRIS (Worksheet C, Part 1, Column 5 and line number) Form CMS-2552-10	Charges from HCRIS (Worksheet C, Part 1, Column 6 & 7 and line number) Form CMS-2552-10	Medicare charges from HCRIS (Worksheet D-3, Column & line number) Form CMS-2552-10

3. Development of Proposed National Average CCRs

We developed the proposed national average CCRs as follows:

Using the FY 2015 cost report data, we removed CAHs, Indian Health

Service hospitals, all-inclusive rate hospitals, and cost reports that represented time periods of less than 1 year (365 days). We included hospitals located in Maryland because we include their charges in our claims database. We then created CCRs for each provider for

each cost center (see prior table for line items used in the calculations) and removed any CCRs that were greater than 10 or less than 0.01. We normalized the departmental CCRs by dividing the CCR for each department by the total CCR for the hospital for the

purpose of trimming the data. We then took the logs of the normalized cost center CCRs and removed any cost center CCRs where the log of the cost center CCR was greater or less than the mean log plus/minus 3 times the standard deviation for the log of that cost center CCR. Once the cost report data were trimmed, we calculated a Medicare-specific CCR. The Medicare-specific CCR was determined by taking the Medicare charges for each line item from Worksheet D-3 and deriving the Medicare-specific costs by applying the hospital-specific departmental CCRs to the Medicare-specific charges for each line item from Worksheet D-3. Once each hospital's Medicare-specific costs were established, we summed the total Medicare-specific costs and divided by the sum of the total Medicare-specific charges to produce national average, charge-weighted CCRs.

After we multiplied the total charges for each MS-DRG in each of the 19 cost centers by the corresponding national average CCR, we summed the 19 "costs" across each MS-DRG to produce a total standardized cost for the MS-DRG. The average standardized cost for each MS-DRG was then computed as the total standardized cost for the MS-DRG divided by the transfer-adjusted case

count for the MS-DRG. The average cost for each MS-DRG was then divided by the national average standardized cost per case to determine the proposed relative weight.

The proposed FY 2018 cost-based relative weights were then normalized by a proposed adjustment factor of 1.736047 so that the average case weight after recalibration was equal to the average case weight before recalibration. The proposed normalization adjustment is intended to ensure that recalibration by itself neither increases nor decreases total payments under the IPPS, as required by section 1886(d)(4)(C)(iii) of the Act.

The proposed 19 national average CCRs for FY 2018 are as follows:

Group	CCR
Routine Days	0.449
Intensive Days	0.375
Drugs	0.197
Supplies & Equipment	0.300
Implantable Devices	0.327
Therapy Services	0.314
Laboratory	0.116
Operating Room	0.186
Cardiology	0.108
Cardiac Catheterization	0.115
Radiology	0.149
MRIs	0.077
CT Scans	0.037

Group	CCR
Emergency Room	0.166
Blood and Blood Products	0.309
Other Services	0.352
Labor & Delivery	0.363
Inhalation Therapy	0.163
Anesthesia	0.080

Since FY 2009, the relative weights have been based on 100 percent cost weights based on our MS-DRG grouping system.

When we recalibrated the DRG weights for previous years, we set a threshold of 10 cases as the minimum number of cases required to compute a reasonable weight. We are proposing to use that same case threshold in recalibrating the MS-DRG relative weights for FY 2018. Using data from the FY 2016 MedPAR file, there were 10 MS-DRGs that contain fewer than 10 cases. For FY 2018, because we do not have sufficient MedPAR data to set accurate and stable cost relative weights for these low-volume MS-DRGs, we are proposing to compute proposed relative weights for the low-volume MS-DRGs by adjusting their final FY 2017 relative weights by the percentage change in the average weight of the cases in other MS-DRGs. The crosswalk table is shown:

Low-volume MS-DRG	MS-DRG title	Crosswalk to MS-DRG
016	Autologous bone marrow transplant w CC/MCC	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
017	Autologous bone marrow transplant w/o CC/MCC	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
789	Neonates, Died or Transferred to Another Acute Care Facility.	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
790	Extreme Immaturity or Respiratory Distress Syndrome, Neonate.	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
791	Prematurity with Major Problems	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
792	Prematurity without Major Problems	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
793	Full-Term Neonate with Major Problems	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
794	Neonate with Other Significant Problems	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).
795	Normal Newborn	Final FY 2017 relative weight (adjusted by percent change in average weight of the cases in other MS-DRGs).

We are inviting public comments on our proposals.

H. Proposed Add-On Payments for New Services and Technologies for FY 2018

1. Background

Sections 1886(d)(5)(K) and (L) of the Act establish a process of identifying and ensuring adequate payment for new medical services and technologies (sometimes collectively referred to in this section as "new technologies") under the IPPS. Section

1886(d)(5)(K)(vi) of the Act specifies that a medical service or technology will be considered new if it meets criteria established by the Secretary after notice and opportunity for public comment. Section 1886(d)(5)(K)(ii)(I) of the Act specifies that a new medical service or technology may be considered for new technology add-on payment if, based on the estimated costs incurred with respect to discharges involving such service or technology, the DRG prospective payment rate otherwise

applicable to such discharges under this subsection is inadequate. We note that, beginning with discharges occurring in FY 2008, CMS transitioned from CMS-DRGs to MS-DRGs.

The regulations at 42 CFR 412.87 implement these provisions and specify three criteria for a new medical service or technology to receive the additional payment: (1) The medical service or technology must be new; (2) the medical service or technology must be costly such that the DRG rate otherwise

applicable to discharges involving the medical service or technology is determined to be inadequate; and (3) the service or technology must demonstrate a substantial clinical improvement over existing services or technologies. Below we highlight some of the major statutory and regulatory provisions relevant to the new technology add-on payment criteria, as well as other information. For a complete discussion on the new technology add-on payment criteria, we refer readers to the FY 2012 IPPS/LTCH PPS final rule (76 FR 51572 through 51574).

Under the first criterion, as reflected in § 412.87(b)(2), a specific medical service or technology will be considered “new” for purposes of new medical service or technology add-on payments until such time as Medicare data are available to fully reflect the cost of the technology in the MS–DRG weights through recalibration. We note that we do not consider a service or technology to be new if it is substantially similar to one or more existing technologies. That is, even if a technology receives a new FDA approval or clearance, it may not necessarily be considered “new” for purposes of new technology add-on payments if it is “substantially similar” to a technology that was approved or cleared by FDA and has been on the market for more than 2 to 3 years. In the FY 2010 IPPS/RV 2010 LTCH PPS final rule (74 FR 43813 through 43814), we established criteria for evaluating whether a new technology is substantially similar to an existing technology, specifically: (1) Whether a product uses the same or a similar mechanism of action to achieve a therapeutic outcome; (2) whether a product is assigned to the same or a different MS–DRG; and (3) whether the new use of the technology involves the treatment of the same or similar type of disease and the same or similar patient population. If a technology meets all three of these criteria, it would be considered substantially similar to an existing technology and would not be considered “new” for purposes of new technology add-on payments. For a detailed discussion of the criteria for substantial similarity, we refer readers to the FY 2006 IPPS final rule (70 FR 47351 through 47352), and the FY 2010 IPPS/LTCH PPS final rule (74 FR 43813 through 43814).

Under the second criterion, § 412.87(b)(3) further provides that, to be eligible for the add-on payment for new medical services or technologies, the MS–DRG prospective payment rate otherwise applicable to discharges involving the new medical service or technology must be assessed for

adequacy. Under the cost criterion, consistent with the formula specified in section 1886(d)(5)(K)(ii)(I) of the Act, to assess the adequacy of payment for a new technology paid under the applicable MS–DRG prospective payment rate, we evaluate whether the charges for cases involving the new technology exceed certain threshold amounts. Table 10 that was released with the FY 2017 IPPS/LTCH PPS final rule contains the final thresholds that we used to evaluate applications for new medical service and new technology add-on payments for FY 2018. We refer readers to the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2017-IPPS-Final-Rule-Home-Page-Items/FY2017-IPPS-Final-Rule-Tables.html> to download and view Table 10.

In the September 7, 2001 final rule that established the new technology add-on payment regulations (66 FR 46917), we discussed the issue of whether the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule at 45 CFR parts 160 and 164 applies to claims information that providers submit with applications for new medical service and new technology add-on payments. We refer readers to the FY 2012 IPPS/LTCH PPS final rule (76 FR 51573) for complete information on this issue.

Under the third criterion, § 412.87(b)(1) of our existing regulations provides that a new technology is an appropriate candidate for an additional payment when it represents an advance that substantially improves, relative to technologies previously available, the diagnosis or treatment of Medicare beneficiaries. For example, a new technology represents a substantial clinical improvement when it reduces mortality, decreases the number of hospitalizations or physician visits, or reduces recovery time compared to the technologies previously available. (We refer readers to the September 7, 2001 final rule for a more detailed discussion of this criterion (66 FR 46902).)

The new medical service or technology add-on payment policy under the IPPS provides additional payments for cases with relatively high costs involving eligible new medical services or technologies, while preserving some of the incentives inherent under an average-based prospective payment system. The payment mechanism is based on the cost to hospitals for the new medical service or technology. Under § 412.88, if the costs of the discharge (determined by applying cost-to-charge ratios (CCRs) as described in § 412.84(h)) exceed the

full DRG payment (including payments for IME and DSH, but excluding outlier payments), Medicare will make an add-on payment equal to the lesser of: (1) 50 percent of the estimated costs of the new technology or medical service (if the estimated costs for the case including the new technology or medical service exceed Medicare’s payment); or (2) 50 percent of the difference between the full DRG payment and the hospital’s estimated cost for the case. Unless the discharge qualifies for an outlier payment, the additional Medicare payment is limited to the full MS–DRG payment plus 50 percent of the estimated costs of the new technology or new medical service.

Section 503(d)(2) of Public Law 108–173 provides that there shall be no reduction or adjustment in aggregate payments under the IPPS due to add-on payments for new medical services and technologies. Therefore, in accordance with section 503(d)(2) of Public Law 108–173, add-on payments for new medical services or technologies for FY 2005 and later years have not been subjected to budget neutrality.

In the FY 2009 IPPS final rule (73 FR 48561 through 48563), we modified our regulations at § 412.87 to codify our longstanding practice of how CMS evaluates the eligibility criteria for new medical service or technology add-on payment applications. That is, we first determine whether a medical service or technology meets the newness criterion, and only if so, do we then make a determination as to whether the technology meets the cost threshold and represents a substantial clinical improvement over existing medical services or technologies. We amended § 412.87(c) to specify that all applicants for new technology add-on payments must have FDA approval or clearance for their new medical service or technology by July 1 of each year prior to the beginning of the fiscal year that the application is being considered.

The Council on Technology and Innovation (CTI) at CMS oversees the agency’s cross-cutting priority on coordinating coverage, coding and payment processes for Medicare with respect to new technologies and procedures, including new drug therapies, as well as promoting the exchange of information on new technologies and medical services between CMS and other entities. The CTI, composed of senior CMS staff and clinicians, was established under section 942(a) of Public Law 108–173. The Council is co-chaired by the Director of the Center for Clinical Standards and Quality (CCSQ) and the Director of the Center for Medicare

(CM), who is also designated as the CTI's Executive Coordinator.

The specific processes for coverage, coding, and payment are implemented by CM, CCSQ, and the local Medicare Administrative Contractors (MACs) (in the case of local coverage and payment decisions). The CTI supplements, rather than replaces, these processes by working to assure that all of these activities reflect the agency-wide priority to promote high-quality, innovative care. At the same time, the CTI also works to streamline, accelerate, and improve coordination of these processes to ensure that they remain up to date as new issues arise. To achieve its goals, the CTI works to streamline and create a more transparent coding and payment process, improve the quality of medical decisions, and speed patient access to effective new treatments. It is also dedicated to supporting better decisions by patients and doctors in using Medicare-covered services through the promotion of better evidence development, which is critical for improving the quality of care for Medicare beneficiaries.

To improve the understanding of CMS' processes for coverage, coding, and payment and how to access them, the CTI has developed an "Innovator's Guide" to these processes. The intent is to consolidate this information, much of which is already available in a variety of CMS documents and in various places on the CMS Web site, in a user-friendly format. This guide was published in 2010 and is available on the CMS Web site at: http://www.cms.gov/CouncilonTechInnov/Downloads/InnovatorsGuide5_10_10.pdf.

As we indicated in the FY 2009 IPPS final rule (73 FR 48554), we invite any product developers or manufacturers of new medical services or technologies to contact the agency early in the process of product development if they have questions or concerns about the evidence that would be needed later in the development process for the agency's coverage decisions for Medicare.

The CTI aims to provide useful information on its activities and initiatives to stakeholders, including Medicare beneficiaries, advocates, medical product manufacturers, providers, and health policy experts. Stakeholders with further questions about Medicare's coverage, coding, and payment processes, or who want further guidance about how they can navigate these processes, can contact the CTI at CTI@cms.hhs.gov.

We note that applicants for add-on payments for new medical services or

technologies for FY 2019 must submit a formal request, including a full description of the clinical applications of the medical service or technology and the results of any clinical evaluations demonstrating that the new medical service or technology represents a substantial clinical improvement, along with a significant sample of data to demonstrate that the medical service or technology meets the high-cost threshold. Complete application information, along with final deadlines for submitting a full application, will be posted as it becomes available on the CMS Web site at: <http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/newtech.html>. To allow interested parties to identify the new medical services or technologies under review before the publication of the proposed rule for FY 2019, the CMS Web site also will post the tracking forms completed by each applicant.

2. Public Input Before Publication of a Notice of Proposed Rulemaking on Add-On Payments

Section 1886(d)(5)(K)(viii) of the Act, as amended by section 503(b)(2) of Public Law 108–173, provides for a mechanism for public input before publication of a notice of proposed rulemaking regarding whether a medical service or technology represents a substantial clinical improvement or advancement. The process for evaluating new medical service and technology applications requires the Secretary to—

- Provide, before publication of a proposed rule, for public input regarding whether a new service or technology represents an advance in medical technology that substantially improves the diagnosis or treatment of Medicare beneficiaries;
- Make public and periodically update a list of the services and technologies for which applications for add-on payments are pending;
- Accept comments, recommendations, and data from the public regarding whether a service or technology represents a substantial clinical improvement; and
- Provide, before publication of a proposed rule, for a meeting at which organizations representing hospitals, physicians, manufacturers, and any other interested party may present comments, recommendations, and data regarding whether a new medical service or technology represents a substantial clinical improvement to the clinical staff of CMS.

In order to provide an opportunity for public input regarding add-on payments

for new medical services and technologies for FY 2018 prior to publication of the FY 2018 IPPS/LTCH PPS proposed rule, we published a notice in the **Federal Register** on November 9, 2016 (81 FR 78814), and held a town hall meeting at the CMS Headquarters Office in Baltimore, MD, on February 14, 2017. In the announcement notice for the meeting, we stated that the opinions and presentations provided during the meeting would assist us in our evaluations of applications by allowing public discussion of the substantial clinical improvement criterion for each of the FY 2018 new medical service and technology add-on payment applications before the publication of the FY 2018 IPPS/LTCH PPS proposed rule.

Approximately 66 individuals registered to attend the town hall meeting in person, while additional individuals listened over an open telephone line. We also live-streamed the town hall meeting and posted the town hall on the CMS YouTube Web page at: <https://www.youtube.com/watch?v=9niqfxXe4oA&t=217s>. We considered each applicant's presentation made at the town hall meeting, as well as written comments submitted on the applications that were received by the due date of February 24, 2017, in our evaluation of the new technology add-on payment applications for FY 2018 in this proposed rule.

In response to the published notice and the February 14, 2017 New Technology Town Hall meeting, we received written comments regarding the applications for FY 2018 new technology add-on payments. We note that we do not summarize comments that are unrelated to the "substantial clinical improvement" criterion. As explained above and in the **Federal Register** notice announcing the New Technology Town Hall meeting (81 FR 78814 through 78816), the purpose of the meeting was specifically to discuss the substantial clinical improvement criterion in regard to pending new technology add-on payment applications for FY 2018. Therefore, we are not summarizing these comments in this proposed rule. We summarize below a general comment that does not relate to a specific application for FY 2018 new technology add-on payments. We also summarize comments regarding individual applications, or, if applicable, indicate that there were no comments received in section II.H.5. of the preamble of this proposed rule at the end of each discussion of the individual applications.

Comment: One commenter recommended that CMS: (1) Prohibit local MACs from denying coverage and add-on payments for new medical services or technologies approved by the Secretary; and (2) broaden the criteria applied in making substantial clinical improvement determinations to require, in addition to existing criteria, that the Secretary consider whether the new technology or medical service meets one or more of the following criteria: (a) Results in a reduction of the length of a hospital stay; (b) improves patient quality of life; (c) creates long-term clinical efficiencies in treatment; (d) addresses patient-centered objectives as defined by the Secretary; or (e) meets such other criteria as the Secretary may specify.

Response: We appreciate the commenter's comments and will consider them in future rulemaking.

3. ICD-10-PCS Section "X" Codes for Certain New Medical Services and Technologies

As discussed in the FY 2016 IPPS/LTCH final rule (80 FR 49434), the ICD-10-PCS includes a new section containing the new Section "X" codes, which began being used with discharges occurring on or after October 1, 2015. Decisions regarding changes to ICD-10-PCS Section "X" codes will be handled in the same manner as the decisions for all of the other ICD-10-PCS code changes. That is, proposals to create, delete, or revise Section "X" codes under the ICD-10-PCS structure will be referred to the ICD-10 Coordination and Maintenance Committee. In addition, several of the new medical services and technologies that have been, or may be, approved for new technology add-on payments may now, and in the future, be assigned a Section "X" code within the structure of the ICD-10-PCS. We posted ICD-10-PCS Guidelines on the CMS Web site at: <http://www.cms.gov/Medicare/Coding/ICD10/2016-ICD-10-PCS-and-GEMs.html>, including guidelines for ICD-10-PCS Section "X" codes. We encourage providers to view the material provided on ICD-10-PCS Section "X" codes.

4. Proposal To Revise the Reference to an ICD-9-CM Code in § 412.87(b)(2) of the Regulations

The existing regulations under § 412.87(b)(2) state that a medical service or technology may be considered new within 2 or 3 years after the point at which data begin to become available reflecting the ICD-9-CM code assigned to the new service or technology (depending on when a new code is assigned and data on the new service or

technology become available for DRG recalibration). After CMS has recalibrated the DRGs, based on available data, to reflect the costs of an otherwise new medical service or technology, the medical service or technology will no longer be considered "new" under the criterion of this section.

As discussed in the FY 2016 IPPS/LTCH final rule (80 FR 49454), HIPAA covered entities are required, as of October 1, 2015, to use the ICD-10 coding system (ICD-10-PCS codes for procedures and ICD-10-CM codes for diagnoses), instead of the ICD-9-CM coding system, to report diagnoses and procedures for Medicare hospital inpatient services provided to Medicare beneficiaries as classified under the MS-DRG system and paid for under the IPPS. The language in § 412.87(b)(2) only references an "ICD-9-CM code." Therefore, we are proposing to revise the regulations at § 412.87(b)(2) to replace the term "ICD-9-CM code" with the term "inpatient hospital code," as defined in section 1886(d)(5)(K)(iii) of the Act. Section 1886(d)(5)(K)(iii) of the Act defines an "inpatient hospital code" as any code that is used with respect to inpatient hospital services for which payment may be made under this subsection of the Act and includes an alphanumeric code issued under the International Classification of Diseases, 9th Revision, Clinical Modification ("ICD-9-CM") and its subsequent revisions. We are inviting public comments on our proposal.

5. Proposed FY 2018 Status of Technologies Approved for FY 2017 Add-On Payments

a. CardioMEMS™ HF (Heart Failure) Monitoring System

CardioMEMS, Inc. submitted an application for new technology add-on payments for FY 2015 for the CardioMEMS™ HF (Heart Failure) Monitoring System, which is an implantable hemodynamic monitoring system comprised of an implantable sensor/monitor placed in the distal pulmonary artery. Pulmonary artery hemodynamic monitoring is used in the management of heart failure. The CardioMEMS™ HF Monitoring System measures multiple pulmonary artery pressure parameters for an ambulatory patient to measure and transmit data via a wireless sensor to a secure Web site.

The CardioMEMS™ HF Monitoring System utilizes radiofrequency (RF) energy to power the sensor and to measure pulmonary artery (PA) pressure and consists of three components: An Implantable Sensor with Delivery

Catheter, an External Electronics Unit, and a Pulmonary Artery Pressure Database. The system provides the physician with the patient's PA pressure waveform (including systolic, diastolic, and mean pressures) as well as heart rate. The sensor is permanently implanted in the distal pulmonary artery using transcatheter techniques in the catheterization laboratory where it is calibrated using a Swan-Ganz catheter. PA pressures are transmitted by the patient at home in a supine position on a padded antenna, pushing one button which records an 18-second continuous waveform. The data also can be recorded from the hospital, physician's office, or clinic.

The hemodynamic data, including a detailed waveform, are transmitted to a secure Web site that serves as the Pulmonary Artery Pressure Database, so that information regarding PA pressure is available to the physician or nurse at any time via the Internet. Interpretation of trend data allows the clinician to make adjustments to therapy and can be used along with heart failure signs and symptoms to adjust medications.

The applicant received FDA approval on May 28, 2014. After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for the CardioMEMS™ HF Monitoring System and consideration of the public comments we received in response to the FY 2015 IPPS/LTCH PPS proposed rule, we approved the CardioMEMS™ HF Monitoring System for new technology add-on payments for FY 2015 (79 FR 49940). Cases involving the CardioMEMS™ HF Monitoring System that are eligible for new technology add-on payments are identified by either ICD-10-PCS procedure code 02HQ30Z (Insertion of pressure sensor monitoring device into right pulmonary artery, percutaneous approach) or ICD-10-PCS procedure code 02HR30Z (Insertion of pressure sensor monitoring device into left pulmonary artery, percutaneous approach). With the new technology add-on payment application, the applicant stated that the total operating cost of the CardioMEMS™ HF Monitoring System is \$17,750. Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the device or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum new technology add-on payment for a case involving the CardioMEMS™ HF Monitoring System is \$8,875. We refer the reader to the FY 2015 IPPS/LTCH PPS final rule (79 FR 49937) for complete details on the CardioMEMS™ HF Monitoring System.

Our policy is that a medical service or technology may be considered new within 2 or 3 years after the point at which data begin to become available reflecting the inpatient hospital code assigned to the new service or technology. Our practice has been to begin and end new technology add-on payments on the basis of a fiscal year, and we have generally followed a guideline that uses a 6-month window before and after the start of the fiscal year to determine whether to extend the new technology add-on payment for an additional fiscal year. In general, we extend add-on payments for an additional year only if the 3-year anniversary date of the product's entry onto the U.S. market occurs in the latter half of the fiscal year (70 FR 47362).

With regard to the newness criterion for the CardioMEMS™ HF Monitoring System, we considered the beginning of the newness period to commence when the CardioMEMS™ HF Monitoring System was approved by the FDA on May 28, 2014. The 3-year anniversary date of the entry of the CardioMEMS™ HF Monitoring System onto the U.S. market (May 28, 2017) will occur prior to the beginning of FY 2018. Therefore, we are proposing to discontinue new technology add-on payments for this technology for FY 2018. We are inviting public comments on this proposal.

b. Defitelio® (Defibrotide)

Jazz Pharmaceuticals submitted an application for new technology add-on payments for FY 2017 for defibrotide (Defitelio®), a treatment for patients diagnosed with hepatic veno-occlusive disease (VOD) with evidence of multiorgan dysfunction. VOD, also known as sinusoidal obstruction syndrome (SOS), is a potentially life-threatening complication of hematopoietic stem cell transplantation (HSCT), with an incidence rate of 8 percent to 15 percent. Diagnoses of VOD range in severity from what has been classically defined as a disease limited to the liver (mild) and reversible, to a severe syndrome associated with multi-organ dysfunction or failure and death. Patients treated with HSCT who develop VOD with multi-organ failure face an immediate risk of death, with a mortality rate of more than 80 percent when only supportive care is used. The applicant asserted that Defitelio® improves the survival rate of patients diagnosed with VOD with multi-organ failure by 23 percent.

Defitelio® was granted Orphan Drug Designation for the treatment of VOD in 2003 and for the prevention of VOD in 2007. It has been available to patients as an investigational drug through an

expanded access program since 2007. The applicant's New Drug Application (NDA) for Defitelio® received FDA approval on March 30, 2016. The applicant confirmed that Defitelio® was not available on the U.S. market as of the FDA NDA approval date of March 30, 2016. According to the applicant, commercial packaging could not be completed until the label for Defitelio® was finalized with FDA approval, and that commercial shipments of Defitelio® to hospitals and treatment centers began on April 4, 2016. Therefore, we agreed that, based on this information, the newness period for Defitelio® begins on April 4, 2016, the date of its first commercial availability.

The applicant received unique ICD-10-PCS procedure codes to describe the use of Defitelio® that became effective October 1, 2016. The approved procedure codes are XW03392 (Introduction of defibrotide sodium anticoagulant into peripheral vein, percutaneous approach) and XW04392 (Introduction of defibrotide sodium anticoagulant into central vein, percutaneous approach).

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for Defitelio® and consideration of the public comments we received in response to the FY 2017 IPPS/LTCH PPS proposed rule, we approved Defitelio® for new technology add-on payments for FY 2017 (81 FR 56906). With the new technology add-on payment application, the applicant estimated that the average Medicare beneficiary would require a dosage of 25 mg/kg/day for a minimum of 21 days of treatment. The recommended dose is 6.25 mg/kg given as a 2-hour intravenous infusion every 6 hours. Dosing should be based on a patient's baseline body weight, which is assumed to be 70 kg for an average adult patient. All vials contain 200 mg at a cost of \$825 per vial. Therefore, we determined that cases involving the use of the Defitelio® technology would incur an average cost per case of \$151,800 (70 kg adult × 25 mg/kg/day × 21 days = 36,750 mg per patient/200 mg vial = 184 vials per patient × \$825 per vial = \$151,800). Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the technology or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum new technology add-on payment amount for a case involving the use of Defitelio® is \$75,900.

Because the 3-year anniversary date of the entry of Defitelio® onto the U.S. market will occur after FY 2018 (April

4, 2019), we are proposing to continue new technology add-on payments for this technology for FY 2018. The maximum payment for a case involving Defitelio® would remain at \$75,900 for FY 2018. We are inviting public comments on our proposal to continue new technology add-on payments for Defitelio®.

c. GORE® EXCLUDER® Iliac Branch Endoprosthesis (Gore IBE Device)

W. L. Gore and Associates, Inc. submitted an application for new technology add-on payments for the GORE® EXCLUDER® Iliac Branch Endoprosthesis (GORE IBE device) for FY 2017. The device consists of two components: The Iliac Branch Component (IBC) and the Internal Iliac Component (IIC). The applicant indicated that each endoprosthesis is pre-mounted on a customized delivery and deployment system allowing for controlled endovascular delivery via bilateral femoral access. According to the applicant, the device is designed to be used in conjunction with the GORE® EXCLUDER® AAA Endoprosthesis for the treatment of patients requiring repair of common iliac or aortoiliac aneurysms. When deployed, the GORE IBE device excludes the common iliac aneurysm from systemic blood flow, while preserving blood flow in the external and internal iliac arteries.

With regard to the newness criterion, the applicant received pre-market FDA approval of the GORE IBE device on February 29, 2016. The applicant submitted a request for an unique ICD-10-PCS procedure code and was granted approval for the following procedure codes to describe to use of this technology: 04VC0EZ (Restriction of right common iliac artery with branched or fenestrated intraluminal device, one or two arteries, open approach); 04VC0FZ (Restriction of right common iliac artery with branched or fenestrated intraluminal device, three or more arteries, open approach); 04VC3EZ (Restriction of right common iliac artery with branched or fenestrated intraluminal device, one or two arteries, percutaneous approach); 04VC3FZ (Restriction of right common iliac artery with branched or fenestrated intraluminal device, three or more arteries, percutaneous approach); 04VC4EZ (Restriction of right common iliac artery with branched or fenestrated intraluminal device, one or two arteries, percutaneous approach); 04VC4FZ (Restriction of right common iliac artery with branched or fenestrated intraluminal device, three or more, arteries, percutaneous endoscopic, approach); 04VD0EZ (Restriction of left

common iliac artery with branched or fenestrated intraluminal device, one or two arteries, open approach); 04VD0FZ (Restriction of left common iliac artery with branched or fenestrated, intraluminal device, three or more arteries, open approach); 04VD3EZ (Restriction of left common iliac artery with branched or fenestrated intraluminal device, one or two arteries, percutaneous approach); 04VD3FZ (Restriction of left common iliac artery with branched or fenestrated intraluminal device, three or more arteries, percutaneous approach); 04VD4EZ (Restriction of left common iliac artery with branched or fenestrated intraluminal device, one or two arteries, percutaneous endoscopic approach); and 04VD4FZ (Restriction of left common iliac artery with branched or fenestrated intraluminal device, three or more arteries, percutaneous endoscopic approach). These new ICD-10-PCS procedure codes became effective on October 1, 2016.

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for the GORE IBE device and consideration of the public comments we received in response to the FY 2017 IPPS/LTCH PPS proposed rule, we approved the GORE IBE device for new technology add-on payments for FY 2017 (81 FR 56909). With the new technology add-on payment application, the applicant indicated that the total operating cost of the GORE IBE device is \$10,500. Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the device or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum new technology add-on payment for a case involving the GORE IBE device is \$5,250.

With regard to the newness criterion for the GORE IBE device, we considered the beginning of the newness period to commence when the GORE IBE device received FDA approval on February 29, 2016. Because the 3-year anniversary date of the entry of the GORE IBE device onto the U.S. market will occur after FY 2018 (February 28, 2019), we are proposing to continue new technology add-on payments for this technology for FY 2018. The maximum payment for a case involving the GORE IBE device would remain at \$5,250 for FY 2018. We are inviting public comments on our proposal to continue new technology add-on payments for the GORE IBE device.

d. Praxbind® Idarucizumab

Boehringer Ingelheim Pharmaceuticals, Inc. submitted an application for new technology add-on payments for FY 2017 for Praxbind® Idarucizumab (Idarucizumab), a product developed as an antidote to reverse the effects of PRADAXAR (Dabigatran), which is also manufactured by Boehringer Ingelheim Pharmaceuticals, Inc.

Dabigatran is an oral direct thrombin inhibitor currently indicated to: (1) Reduce the risk of stroke and systemic embolism in patients who have been diagnosed with nonvalvular atrial fibrillation (NVAf); (2) treat deep venous thrombosis (DVT) and pulmonary embolism (PE) in patients who have been administered a parenteral anticoagulant for 5 to 10 days; and (3) reduce the risk of recurrence of DVT and PE in patients who have been previously diagnosed with NVAf. Currently, unlike the anticoagulant Warfarin, there is no specific way to reverse the anticoagulant effect of Dabigatran in the event of a major bleeding episode. Idarucizumab is a humanized fragment antigen binding (Fab) molecule, which specifically binds to Dabigatran to deactivate the anticoagulant effect, thereby allowing thrombin to act in blood clot formation. The applicant stated that Idarucizumab represents a new pharmacologic approach to neutralizing the specific anticoagulant effect of Dabigatran in emergency situations.

Idarucizumab was approved by the FDA on October 16, 2015. Based on the FDA indication for Idarucizumab, the product can be used in the treatment of patients who have been diagnosed with NVAf and administered Dabigatran to reverse life-threatening bleeding events, or who require emergency surgery or medical procedures and rapid reversal of the anticoagulant effects of Dabigatran is necessary and desired.

The applicant received unique ICD-10-PCS procedure codes that became effective October 1, 2016, to describe the use of this technology. The approved procedure codes are XW03331 (Introduction of Idarucizumab, Dabigatran reversal agent into peripheral vein, percutaneous approach, New Technology Group 1) and XW04331 (Introduction of Idarucizumab, Dabigatran reversal agent into central vein, percutaneous approach, New Technology Group 1).

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for Idarucizumab and consideration of the public comments

we received in response to the FY 2017 IPPS/LTCH PPS proposed rule, we approved Idarucizumab for new technology add-on payments for FY 2017 (81 FR 56897). With the new technology add-on payment application, the applicant indicated that the total operating cost of Idarucizumab is \$3,500. Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the technology or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum new technology add-on payment for a case involving Idarucizumab is \$1,750.

With regard to the newness criterion for Idarucizumab, we considered the beginning of the newness period to commence when Idarucizumab was approved by the FDA on October 16, 2015. Because the 3-year anniversary date of the entry of Idarucizumab onto the U.S. market will occur after FY 2018 (October 15, 2018), we are proposing to continue new technology add-on payments for this technology for FY 2018. The maximum payment for a case involving Idarucizumab would remain at \$1,750 for FY 2018. We are inviting public comments on our proposal to continue new technology add-on payments for Idarucizumab.

e. Lutonix® Drug Coated Balloon PTA Catheter and In.PACT™ Admiral™ Paclitaxel Coated Percutaneous Transluminal Angioplasty (PTA) Balloon Catheter

Two manufacturers, CR Bard Inc. and Medtronic, submitted applications for new technology add-on payments for FY 2016 for LUTONIX® Drug-Coated Balloon (DCB) Percutaneous Transluminal Angioplasty (PTA) Catheter (LUTONIX®) and IN.PACT™ Admiral™ Paclitaxel Coated Percutaneous Transluminal Angioplasty (PTA) Balloon Catheter (IN.PACT™ Admiral™), respectively. Both of these technologies are drug-coated balloon angioplasty treatments for patients diagnosed with peripheral artery disease (PAD). Typical treatments for patients with PAD include angioplasty, stenting, atherectomy and vascular bypass surgery. PAD most commonly occurs in the femoropopliteal segment of the peripheral arteries, is associated with significant levels of morbidity and impairment in quality of life, and requires treatment to reduce symptoms and prevent or treat ischemic events.¹

¹ Tepe G, Zeller T, Albrecht T, Heller S, Schwarzwald U, Beregi JP, Claussen CD, Oldenburg A, Scheller B, Speck U., Local delivery of paclitaxel to inhibit restenosis during angioplasty of the leg, *N Engl J Med* 2008; 358: 689–99.

Treatment options for symptomatic PAD include noninvasive treatment such as medication and life-style modification (for example, exercise programs, diet, and smoking cessation) and invasive options, which include endovascular treatment and surgical bypass. The 2013 American College of Cardiology and American Heart Association (ACC/AHA) guidelines for the management of PAD recommend endovascular therapy as the first-line treatment for femoropopliteal artery lesions in patients suffering from claudication (Class I, Level A recommendation).²

According to both applicants, LUTONIX® and IN.PACT™ Admiral™ are the first drug coated balloons that can be used for treatment of patients who are diagnosed with PAD. In the FY 2016 IPPS/LTCH PPS final rule, we stated that because cases eligible for the two devices would group to the same MS-DRGs and we believe that these devices are substantially similar to each other (that is, they are intended to treat the same or similar disease in the same or similar patient population and are purposed to achieve the same therapeutic outcome using the same or similar mechanism of action), we evaluated both technologies as one application for new technology add-on payments under the IPPS. The applicants submitted separate cost and

clinical data, and we reviewed and discussed each set of data separately. However, we made one determination regarding new technology add-on payments that applied to both devices. We believe that this is consistent with our policy statements in the past regarding substantial similarity. Specifically, we have noted that approval of new technology add-on payments would extend to all technologies that are substantially similar (66 FR 46915), and we believe that continuing our current practice of extending a new technology add-on payment without a further application from the manufacturer of the competing product or a specific finding on cost and clinical improvement if we make a finding of substantial similarity among two products is the better policy because we avoid—

- Creating manufacturer-specific codes for substantially similar products;
- Requiring different manufacturers of substantially similar products from having to submit separate new technology add-on payment applications;
- Having to compare the merits of competing technologies on the basis of substantial clinical improvement; and
- Bestowing an advantage to the first applicant representing a particular new technology to receive approval (70 FR 47351).

CR Bard, Inc. received FDA approval for LUTONIX® on October 9, 2014. Commercial sales in the U.S. market began on October 10, 2014. Medtronic received FDA approval for IN.PACT™ Admiral™ on December 30, 2014. Commercial sales in the U.S. market began on January 29, 2015.

In accordance with our policy, we stated in the FY 2016 IPPS/LTCH final rule (80 FR 49463) that we believe it is appropriate to use the earliest market availability date submitted as the beginning of the newness period. Accordingly, for both devices, we stated that the beginning of the newness period will be October 10, 2014.

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for the LUTONIX® and IN.PACT™ Admiral™ technologies and consideration of the public comments we received in response to the FY 2016 IPPS/LTCH PPS proposed rule, we approved the LUTONIX® and IN.PACT™ Admiral™ technologies for new technology add-on payments for FY 2016 (80 FR 49469). Cases involving the LUTONIX® and IN.PACT™ Admiral™ technologies that are eligible for new technology add-on payments are identified using one of the ICD-10-PCS procedure codes in the following table:

ICD-10-PCS code	Code description
047K041	Dilation of right femoral artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047K0D1	Dilation of right femoral artery with intraluminal device using drug-coated balloon, open approach.
047K0Z1	Dilation of right femoral artery using drug-coated balloon, open approach.
047K341	Dilation of right femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047K3D1	Dilation of right femoral artery with intraluminal device using drug-coated balloon, percutaneous approach.
047K3Z1	Dilation of right femoral artery using drug-coated balloon, percutaneous approach.
047K441	Dilation of right femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047K4D1	Dilation of right femoral artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047K4Z1	Dilation of right femoral artery using drug-coated balloon, percutaneous endoscopic approach.
047L041	Dilation of left femoral artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047L0D1	Dilation of left femoral artery with intraluminal device using drug-coated balloon, open approach.
047L0Z1	Dilation of left femoral artery using drug-coated balloon, open approach.
047L341	Dilation of left femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047L3D1	Dilation of left femoral artery with intraluminal device using drug-coated balloon, percutaneous approach.
047L3Z1	Dilation of left femoral artery using drug-coated balloon, percutaneous approach.
047L441	Dilation of left femoral artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047L4D1	Dilation of left femoral artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047L4Z1	Dilation of left femoral artery using drug-coated balloon, percutaneous endoscopic approach.
047M041	Dilation of right popliteal artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047M0D1	Dilation of right popliteal artery with intraluminal device using drug-coated balloon, open approach.
047M0Z1	Dilation of right popliteal artery using drug-coated balloon, open approach.
047M341	Dilation of right popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047M3D1	Dilation of right popliteal artery with intraluminal device using drug-coated balloon, percutaneous approach.
047M3Z1	Dilation of right popliteal artery using drug-coated balloon, percutaneous approach.
047M441	Dilation of right popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047M4D1	Dilation of right popliteal artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.

peripheral artery disease (compilation of 2005 and 2011 ACCF/AHA guideline recommendations): A report of the American College of Cardiology Foundation/American Heart Association Task Force

on Practice Guidelines, J Am Coll Cardiol 2013, 61:1555–70. Available at: <http://dx.doi.org/10.1016/j.jacc.2013.01.004>.

ICD-10-PCS code	Code description
047M4Z1	Dilation of right popliteal artery using drug-coated balloon, percutaneous endoscopic approach.
047N041	Dilation of left popliteal artery with drug-eluting intraluminal device using drug-coated balloon, open approach.
047N0D1	Dilation of left popliteal artery with intraluminal device using drug-coated balloon, open approach.
047N0Z1	Dilation of left popliteal artery using drug-coated balloon, open approach.
047N341	Dilation of left popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous approach.
047N3D1	Dilation of left popliteal artery with intraluminal device using drug-coated balloon, percutaneous approach.
047N3Z1	Dilation of left popliteal artery using drug-coated balloon, percutaneous approach.
047N441	Dilation of left popliteal artery with drug-eluting intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047N4D1	Dilation of left popliteal artery with intraluminal device using drug-coated balloon, percutaneous endoscopic approach.
047N4Z1	Dilation of left popliteal artery using drug-coated balloon, percutaneous endoscopic approach.

As discussed in the FY 2016 IPPS/LTCH final rule (80 FR 49469), each of the applicants submitted operating costs for its DCB. The manufacturer of the LUTONIX® stated that a mean of 1.37 drug-coated balloons was used during the LEVANT 2 clinical trial. The acquisition price for the hospital will be \$1,900 per drug-coated balloon, or \$2,603 per case ($1.37 \times \$1,900$). The applicant projected that approximately 8,875 cases will involve use of the LUTONIX® for FY 2016. The manufacturer for the IN.PACT™ Admiral™ stated that a mean of 1.4 drug-coated balloons was used during the IN.PACT™ Admiral™ DCB arm. The acquisition price for the hospital will be \$1,350 per drug-coated balloon, or \$1,890 per case ($1.4 \times \$1,350$). The applicant projected that approximately 26,000 cases will involve use of the IN.PACT™ Admiral™ for FY 2016.

For FY 2016, we based the new technology add-on payment for cases involving these technologies on the weighted average cost of the two DCBs described by the ICD-10-PCS procedure codes listed above (which are not manufacturer specific). Because ICD-10 codes are not manufacturer specific, we cannot set one new technology add-on payment amount for IN.PACT™ Admiral™ and a different new technology add-on payment amount for LUTONIX®; both technologies will be captured by using the same ICD-10-PCS procedure code. As such, we stated that we believe that the use of a weighted average of the cost of the standard DCBs based on the projected number of cases involving each technology to determine the maximum new technology add-on payment would be most appropriate. To compute the weighted cost average, we summed the total number of projected cases for each of the applicants, which equaled 34,875 cases (26,000 plus 8,875). We then divided the number of projected cases for each of the applicants by the total number of cases, which resulted in the following case-weighted percentages: 25 percent for the LUTONIX® and 75 percent for the

IN.PACT™ Admiral™. We then multiplied the cost per case for the manufacturer specific DCB by the case-weighted percentage ($0.25 \times \$2,603 = \$662.41$ for LUTONIX® and $0.75 \times \$1,890 = \$1,409.03$ for the IN.PACT™ Admiral™). This resulted in a case-weighted average cost of \$2,071.45 for DCBs. Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the device or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum payment for a case involving the LUTONIX® or IN.PACT™ Admiral™ DCBs is \$1,035.72.

With regard to the newness criterion for the LUTONIX® and IN.PACT™ Admiral™ technologies, we considered the beginning of the newness period to commence when LUTONIX® gained entry onto the U.S. market on October 10, 2014. As discussed previously in this section, in general, we extend new technology add-on payments for an additional year only if the 3-year anniversary date of the product's entry onto the U.S. market occurs in the latter half of the upcoming fiscal year. Because the 3-year anniversary date of the entry of LUTONIX® onto the U.S. market (October 10, 2017) will occur in the first half of FY 2018, we are proposing to discontinue new technology add-on payments for both the LUTONIX® and IN.PACT™ Admiral™ technologies for FY 2018. We are inviting public comments on this proposal.

f. MAGEC® Spinal Bracing and Distraction System (MAGEC® Spine)

Ellipse Technologies, Inc. submitted an application for new technology add-on payments for FY 2017 for the MAGEC® Spine. According to the applicant, the MAGEC® Spine has been developed for use in the treatment of children diagnosed with severe spinal deformities, such as scoliosis. The system can be used in the treatment of skeletally immature patients less than 10 years of age who have been

diagnosed with severe progressive spinal deformities associated with or at risk of Thoracic Insufficiency Syndrome (TIS).

The MAGEC® Spine consists of a (spinal growth) rod that can be lengthened through the use of magnets that are controlled by an external remote controller (ERC). The rod(s) can be implanted into children as young as 2 years of age. According to the applicant, use of the MAGEC® Spine has proven to be successfully used in the treatment of patients diagnosed with scoliosis who have not been responsive to other treatments.

The MAGEC® Spine initially received FDA clearance for use of the predicate device, which used a Harrington Rod on February 27, 2014. The applicant verified that, due to manufacturing delays, the MAGEC® Spine was not available for implant until April 1, 2014. Specifically, the complete MAGEC® Spine system was produced and available for shipment for the first implant on April 1, 2014. Therefore, the newness period for the MAGEC® Spine began on April 1, 2014. Subsequent FDA clearance was granted for use of the modified device, which uses a shorter 70 mm rod on September 18, 2014. After minor modification of the product, the MAGEC® Spine received FDA clearances on March 24, 2015, and May 29, 2015, respectively.

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for the MAGEC® Spine and consideration of the public comments we received in response to the FY 2017 IPPS/LTCH PPS proposed rule, we approved the MAGEC® Spine for new technology add-on payments for FY 2017 (81 FR 56891). Cases involving the MAGEC® Spine that are eligible for new technology add-on payments are identified by ICD-10-PCS procedure codes XNS0032 (Reposition of lumbar vertebra using magnetically controlled growth rod(s), open approach); XNS0432 (Reposition of lumbar vertebra using magnetically controlled growth

rod(s), percutaneous endoscopic approach); XNS3032 (Reposition of cervical vertebra using magnetically controlled growth rod(s), open approach); XNS3432 (Reposition of cervical vertebra using magnetically controlled growth rod(s), percutaneous endoscopic approach); XNS4032 (Reposition of thoracic vertebra using magnetically controlled growth rod(s), open approach); and XNS4432 (Reposition of thoracic vertebra using magnetically controlled growth rod(s)).

With the new technology add-on payment application, the applicant stated that the total operating cost of the MAGEC® Spine was \$17,500 for a single rod and \$35,000 for a dual rod. It is historical practice for CMS to make the new technology add-on payment based on the average cost of the technology and not the maximum. For example, in the FY 2013 IPPS/LTCH PPS final rule (77 FR 53358), we approved new technology add-on payments for DIFICID™ based on the average dosage of 6.2 days, rather than the maximum 10-day dosage. The applicant noted that 20 percent of cases use a single rod, while 80 percent of cases use a dual rod. As a result, the weighted average cost for a single and dual MAGEC® Spine is \$31,500 $((0.2 * \$17,500) + (0.8 * \$35,000))$. Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the device or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum new technology add-on payment for a case involving the MAGEC® Spine is \$15,750. We refer the reader to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56888) for complete details on the MAGEC® Spine.

With regard to the newness criterion for the MAGEC® Spine, we considered the beginning of the newness period to commence when the MAGEC® Spine was produced and available for shipment for the first implant on April 1, 2014. As discussed previously in this section, in general, we extend new technology add-on payments for an additional year only if the 3-year anniversary date of the product's entry onto the U.S. market occurs in the latter half of the upcoming fiscal year. Because the 3-year anniversary date of the entry of the MAGEC® Spine onto the U.S. market (April 1, 2017) will occur prior to the beginning of FY 2018, we are proposing to discontinue new technology add-on payments for this technology for FY 2018. We are inviting public comments on this proposal.

g. Vistogard™ (Uridine Triacetate)

BTG International Inc., submitted an application for new technology add-on payments for the Vistogard™ for FY 2017. Vistogard™ was developed as an antidote to Fluorouracil toxicity.

Chemotherapeutic agent 5-fluorouracil (5-FU) is used to treat specific solid tumors. It acts upon deoxyribonucleic acid (DNA) and ribonucleic acid (RNA) in the body, as uracil is a naturally occurring building block for genetic material. Fluorouracil is a fluorinated pyrimidine. As a chemotherapy agent, Fluorouracil is absorbed by cells and causes the cell to metabolize into byproducts that are toxic and used to destroy cancerous cells. According to the applicant, the byproducts fluorodeoxyuridine monophosphate (F-dUMP) and floxuridine triphosphate (FUTP) are believed to do the following: (1) Reduce DNA synthesis; (2) lead to DNA fragmentation; and (3) disrupt RNA synthesis. Fluorouracil is used to treat a variety of solid tumors such as colorectal, head and neck, breast, and ovarian cancer. With different tumor treatments, different dosages, and different dosing schedules, there is a risk for toxicity in these patients. Patients may suffer from fluorouracil toxicity/death if 5-FU is delivered in slight excess or at faster infusion rates than prescribed. The cause of overdose can happen for a variety of reasons including: Pump malfunction, incorrect pump programming or miscalculated doses, and accidental or intentional ingestion.

Vistogard™ is an antidote to Fluorouracil toxicity and is a prodrug of uridine. Once the drug is metabolized into uridine, it competes with the toxic byproduct FUTP in binding to RNA, thereby reducing the impact FUTP has on cell death.

The Vistogard™ received FDA approval on December 11, 2015. In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56910), we stated that we agreed with the manufacturer that, due to the delay in availability, the date the newness period begins for Vistogard™ is March 2, 2016, instead of December 11, 2015.

The applicant noted that the Vistogard™ is the first FDA-approved antidote used to reverse fluorouracil toxicity. The applicant received a unique ICD-10-PCS procedure code that became effective October 1, 2016, to describe the use of this technology. The approved procedure code is XW0DX82 (Introduction of Uridine Triacetate into Mouth and Pharynx, External Approach, New Technology Group 2).

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for Vistogard™ and consideration of the public comments we received in response to the FY 2017 IPPS/LTCH PPS proposed rule, we approved Vistogard™ for new technology add-on payments for FY 2017 (81 FR 56912). With the new technology add-on payment application, the applicant stated that the total operating cost of Vistogard™ is \$75,000. Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the technology or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum new technology add-on payment for a case involving Vistogard™ is \$37,500.

As noted previously, with regard to the newness criterion for the Vistogard™, we considered the beginning of the newness period to commence on March 2, 2016. Because the 3-year anniversary date of the entry of the Vistogard™ onto the U.S. market (March 2, 2019) will occur after FY 2018, we are proposing to continue new technology add-on payments for this technology for FY 2018. The maximum payment for a case involving the Vistogard™ would remain at \$37,500 for FY 2018. We are inviting public comments on our proposal to continue new technology add-on payments for the Vistogard™.

h. Blinatumomab (BLINCYTO®)

Amgen, Inc. submitted an application for new technology add-on payments for FY 2016 for Blinatumomab (BLINCYTO®), a bi-specific T-cell engager (BiTE) used for the treatment of Philadelphia chromosome-negative (Ph-) relapsed or refractory (R/R) B-cell precursor acute-lymphoblastic leukemia (ALL), which is a rare aggressive cancer of the blood and bone marrow. Approximately 6,050 individuals are diagnosed with Ph- R/R B-cell precursor ALL in the United States each year, and approximately 2,400 individuals, representing 30 percent of all new cases, are adults. Ph- R/R B-cell precursor ALL occurs when there are malignant transformations of B-cell or T-cell progenitor cells, causing an accumulation of lymphoblasts in the blood, bone marrow, and occasionally throughout the body. As a bi-specific T-cell engager, the BLINCYTO® technology attaches to a molecule on the surface of the tumorous cell, as well as to a molecule on the surface of normal T-cells, bringing the two into closer proximity and allowing the normal T-cell to destroy the tumorous cell.

Specifically, the BLINCYTO® technology attaches to a cell identified as CD19, which is present on all of the cells of the malignant transformations that cause Ph- R/R B-cell precursor ALL and helps attract the cell into close proximity of the T-cell CD3 with the intent of getting close enough to allow the T-cell to inject toxins that destroy the cancerous cell. According to the applicant, the BLINCYTO® technology is the first, and the only, bi-specific CD19-directed CD3 T-cell engager single-agent immunotherapy approved by the FDA.

BLINCYTO® is administered as a continuous IV infusion delivered at a constant flow rate using an infusion pump. A single cycle of treatment consists of 28 days of continuous infusion, and each treatment cycle is followed by 2 weeks without treatment prior to administering any further treatments. A course of treatment would consist of two phases. Phase 1 consists of initial inductions or treatments intended to achieve remission followed by additional inductions and treatments to maintain consolidation; or treatments given after remission has been achieved to prolong the duration. During Phase 1 of a single treatment course, up to two cycles of BLINCYTO® are administered, and up to three additional cycles are administered during consolidation. The recommended dosage of BLINCYTO® administered during the first cycle of treatment is 9 mcg per day for the first 7 days of treatment. The dosage is then increased to 28 mcg per day for 3 weeks until completion. During Phase 2 of the treatment course, all subsequent doses are administered as 28 mcg per day throughout the entire duration of the 28-day treatment period.

With regard to the newness criterion, the BLINCYTO® technology received FDA approval on December 3, 2014, for the treatment of patients diagnosed with Ph- R/R B-cell precursor ALL, and the product gained entry onto the U.S. market on December 17, 2014.

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for BLINCYTO® and consideration of the public comments we received in response to the FY 2016 IPPS/LTCH PPS proposed rule, we approved BLINCYTO® for new technology add-on payments for FY 2016 (80 FR 49449). Cases involving BLINCYTO® that are eligible for new technology add-on payments are identified using one of the following ICD-10-PCS procedure codes: XW03351 (Introduction of Blinatumomab antineoplastic immunotherapy into peripheral vein,

percutaneous approach, New Technology Group 1), or XW04351 (Introduction of Blinatumomab antineoplastic immunotherapy into central vein, percutaneous approach, New Technology Group 1).

As discussed in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49449), the applicant recommended that CMS consider and use the cost of the full 28-day inpatient treatment cycle as the expected length of treatment when determining the maximum new technology add-on payment for cases involving the BLINCYTO®, rather than the average cost of lesser number of days used as other variables. For the reasons discussed, we disagreed with the applicant and established the maximum new technology add-on payment amount for a case involving the BLINCYTO® technology for FY 2016 using the weighted average of the cycle 1 and cycle 2 observed treatment length. Specifically, in the Phase II trial, the most recent data available, 92 patients received cycle 1 treatment for an average length of 21.2 days, and 52 patients received cycle 2 treatment for an average length of 10.2 days. The weighted average of cycle 1 and cycle 2 treatment length is 17 days. We noted that a small number of patients also received 3 to 5 treatment cycles. However, based on the data provided, these cases do not appear to be typical at this point and we excluded them from this calculation. We noted that, if we included all treatment cycles in this calculation, the weighted average number of days of treatment is much lower, 10 days. Using the clinical data provided by the applicant, we stated that we believe setting the maximum new technology add-on payment amount for a case involving the BLINCYTO® technology for FY 2016 based on a 17-day length of treatment cycle is representative of historical and current practice. We also stated that, for FY 2017, if new data on length of treatment are available, we would consider any such data in evaluating the maximum new technology add-on payment amount. However, we did not receive any new data from the applicant to evaluate for FY 2017.

In the application, the applicant estimated that the average Medicare beneficiary would require a dosage of 9mcg/day for the first 7 days under the first treatment cycle, followed by a dosage of 28mcg/day for the duration of the treatment cycle, as well as all days included in subsequent cycles. All vials contain 35mcg at a cost of \$3,178.57 per vial. The applicant noted that all vials are single-use. Therefore, we determined that cases involving the use

of the BLINCYTO® technology would incur an average cost per case of \$54,035.69 (1 vial/day × 17 days × \$3,178.57/vial). Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the technology or 50 percent of the costs in excess of the MS-DRG payment for the case. As a result, the maximum new technology add-on payment amount for a case involving the use of the BLINCYTO® is \$27,017.85.

With regard to the newness criterion for BLINCYTO®, we consider the beginning of the newness period to commence when the product gained entry onto the U.S. market on December 17, 2014. As discussed previously in this section, in general, we extend new technology add-on payments for an additional year only if the 3-year anniversary date of the product's entry onto the U.S. market occurs in the latter half of the upcoming fiscal year. Because the 3-year anniversary date of the entry of the BLINCYTO® onto the U.S. market will occur in the first half of FY 2018 (December 17, 2017), we are proposing to discontinue new technology add-on payments for this technology for FY 2018. We are inviting public comments on this proposal.

6. FY 2018 Applications for New Technology Add-On Payments

We received nine applications for new technology add-on payments for FY 2018. In accordance with the regulations under § 412.87(c), applicants for new technology add-on payments must have received FDA approval or clearance by July 1 of the year prior to the beginning of the fiscal year that the application is being considered. Three applicants withdrew their applications prior to the issuance of this proposed rule. We are addressing the remaining six applications below.

a. Bezlotoxumab (ZINPLAVA™)

Merck & Co., Inc. submitted an application for new technology add-on payments for ZINPLAVA™ for FY 2018. ZINPLAVA™ is indicated for use in adult patients who are receiving antibacterial drug treatment for a diagnosis of *Clostridium difficile* infection (CDI) who are at high risk for CDI recurrence. ZINPLAVA™ is not indicated for the treatment of the presenting episode of CDI and is not an antibacterial drug.

Clostridium difficile (C-diff) is a disease-causing anaerobic, spore forming bacteria that can affect the gastrointestinal (GI) tract. Some people carry the C-diff bacterium in their intestines, but never develop symptoms

of an infection. The difference between asymptomatic colonization and pathogenicity is caused primarily by the production of an enterotoxin (Toxin A) and/or a cytotoxin (Toxin B). The presence of either or both toxins can lead to symptomatic CDI, which is defined as the acute onset of diarrhea with a documented infection with toxigenic *C-diff*, or the presence of either toxin A or B. The GI tract contains millions of bacteria, commonly referred to as “normal flora” or “good bacteria,” which play a role in protecting the body from infection. Antibiotics can kill these good bacteria and allow the *C-diff* bacteria to multiply and release toxins that damage the cells lining the intestinal wall, resulting in a CDI. CDI is a leading cause of hospital-associated gastrointestinal illnesses. Persons at increased risk for CDI include people who are treated with current or recent antibiotic use, people who have encountered current or recent hospitalization, people who are older than 65 years, immunocompromised patients, and people who have recently had a diagnosis of CDI. CDI symptoms include, but are not limited to, diarrhea, abdominal pain, and fever. CDI symptoms range in severity from mild (abdominal discomfort, loose stools) to severe (profuse, watery diarrhea, severe pain, and high fevers). Severe CDI can be life-threatening and, in rare cases, can cause bowel rupture, sepsis and organ failure. CDI is responsible for 14,000 deaths per year in the United States.

C-diff produces two virulent, pro-inflammatory toxins, Toxin A and Toxin B, which target host colonocytes (that is, large intestine endothelial cells) by binding to endothelial cell surface receptors via combined repetitive oligopeptide (CROP) domains. These toxins cause the release of inflammatory cytokines leading to intestinal fluid secretion and intestinal inflammation. The applicant asserted that ZINPLAVA™ targets Toxin B sites within the CROP domain rather than the *C-diff* organism itself. According to the applicant, by targeting *C-diff* Toxin B, ZINPLAVA™ neutralizes Toxin B, prevents large intestine endothelial cell inflammation, symptoms associated with CDI, and reduces the recurrence of CDI. ZINPLAVA™ binds to sites within the CROP domain, which prevents Toxin B from binding to the host cell, thereby preventing the inflammation and symptoms associated with CDI. ZINPLAVA™ is used concomitantly with standard of care (SOC) antibiotics. Typical treatment of CDI includes antibiotic therapy using vancomycin,

metronidazole, fidaxomicin, or other antibiotics. Alternative therapies include fecal microbiota transplant (FMT) and the use of probiotics.

The primary goal of CDI treatment is resolving the infection. Antibacterial drug treatment remains the cornerstone of treatment of CDI. However, this treatment option alone may not be adequate for patients diagnosed with recurrent CDI. A major concern with respect to a CDI is that even when treatment with an antibacterial drug of a primary infection is successful, generally, 25 percent to 30 percent of patients experience a recurrence of the infection within days or weeks of the presenting episode's symptom resolution. The risk of recurrence increases to 65 percent with subsequent CDI episodes. Disease recurrence results from continued disruption of the intestinal microbiota by SOC CDI antibiotics (or use of other antibiotics used to treat non-gastrointestinal conditions), combined with persistence of resistant *C-diff* spores (relapse) or acquisition of new spores from the environment (reinfection).

Antibacterial drug use may inhibit the intestinal microbiota from reestablishing itself, allowing *C-diff* spores potentially to germinate and colonize the intestines when the antibacterial drug is discontinued. If regrowth of *C-diff* overtakes the reestablishment of the intestinal microbiota, then spore germination and toxin production from vegetative *C-diff* may restart the cycle of CDI and the need for subsequent treatment. These challenges highlight the need for nonantibiotic therapies. ZINPLAVA™ targets Toxin B rather than the *C-diff* bacteria itself. According to the applicant, unlike antibacterial drugs, ZINPLAVA™ is a human monoclonal antibody and does not affect the microbiota. According to the applicant, ZINPLAVA™ neutralizes *C-diff* Toxin B and reduces recurrence of CDI. ZINPLAVA™ is given concomitantly during the course of SOC antibacterial treatment of a CDI.

With respect to the newness criterion, ZINPLAVA™ received FDA approval on October 21, 2016, for reduction of recurrence of CDI in patients receiving antibacterial drug treatment for CDI and who are at high risk of CDI recurrence. ZINPLAVA™ is anticipated to be commercially available as of February 2017. We note that the applicant anticipates submitting a request for a unique ICD-10-PCS code for the administration of ZINPLAVA™. Currently, there is a pending ICD-10-CM request to differentiate CDI recurrence. If approved, the codes will

become effective on October 1, 2017 (FY 2018).

As discussed above, if a technology meets all three of the substantial similarity criteria, it would be considered substantially similar to an existing technology and would not be considered “new” for purposes of new technology add-on payments.

With regard to the first criterion, whether a product uses the same or a similar mechanism of action to achieve a therapeutic outcome, according to the applicant, ZINPLAVA™ is a human monoclonal antibody with an innovative mechanism of action. The applicant asserted that ZINPLAVA™ is a novel treatment, with a unique mechanism of action relative to SOC CDI antibiotics that target *C-diff*. The applicant explained that ZINPLAVA™ is the first human monoclonal antibody that targets and neutralizes *C. diff* Toxin B because the technology specifically binds to and neutralizes *C-diff* Toxin B (which is an exotoxin that contributes to intestinal tissue damage and immune system effects that underlie the symptoms of CDI) and inhibits binding of the toxin to mammalian cells. The applicant further asserted that the administration of ZINPLAVA™, in addition to standard of care antibacterial drug treatment, reduces CDI recurrence by providing passive immunity against Toxin B resulting from persistent or newly acquired *C-diff* spores. According to the applicant, ZINPLAVA™ is the only FDA-approved treatment indicated for reducing CDI recurrence as adjunctive therapy in adult patients who are receiving antibacterial drug treatment for CDI and who are at high risk for CDI recurrence.

With respect to the second criterion, whether a product is assigned to the same or a different MS-DRG, the applicant maintained that patients who may be eligible to receive treatment using ZINPLAVA™ could be in an acute-care hospital setting for a wide variety of reasons and may develop a secondary CDI as a hospital-acquired infection and, therefore, cases representing patients that may be eligible for treatment using the technology can map to a wide range of MS-DRGs. ZINPLAVA™ is indicated for patients receiving SOC treatment for CDI and who are at a high risk for CDI recurrence. In order to identify the range of MS-DRGs for which cases representing patients that may be eligible for treatment using ZINPLAVA™ may map to, the applicant identified all MS-DRGs containing cases that represent patients presenting with CDI as a primary or secondary diagnosis. The applicant used

FY 2015 MedPAR data to map the identified cases to 543 MS-DRGs, with 12 MS-DRGs accounting for approximately 40 percent of all cases. The applicant segmented these cases based on age because patients 65 years and older are at higher risk for CDI recurrence. Based on the FY 2015 MedPAR data, MS-DRG distribution was found to be similar, irrespective of CDI status (primary or secondary), for patients over 65 years of age and those under 65 years of age. The top 7 MS-DRGs across both age groups account for nearly 54 percent (over 65 years of age) and 49 percent (under 65 years of age). The applicant further segmented these cases to determine if status of CDI as a primary or secondary diagnosis influenced MS-DRG mapping. Regardless of age, when CDI is the primary diagnosis, approximately 98 percent of patient cases map to the same 3 MS-DRGs: MS-DRG 371 (Major Gastrointestinal Disorders and Peritoneal Infections with MCC); MS-DRG 372 (Major Gastrointestinal Disorders and Peritoneal Infections with CC); and MS-DRG 373 (Major Gastrointestinal Disorders and Peritoneal Infections without CC/MCC), respectively. Potential cases representing patients who may be eligible for treatment with ZINPLAVA™ would be assigned to the same MS-DRGs as cases representing patients who receive SOC treatment for a diagnosis of CDI.

With respect to the third criterion, whether the new use of the technology involves the treatment of the same or similar type of disease and the same or similar patient population, according to the applicant, ZINPLAVA™ is administered concomitantly or as adjunctive therapy with SOC antibacterial treatment for recurrent CDI. The applicant stated that ZINPLAVA™ is indicated to reduce recurrence of CDI in adult patients at high risk of CDI recurrence who are receiving antibacterial drug treatment for CDI. According to the applicant, the addition of ZINPLAVA™ to SOC antibacterial drug treatment reduces CDI recurrence by providing passive immunity against Toxin B resulting from persistent or newly acquired *C-diff* spores. ZINPLAVA™ is used to treat the same or similar type of disease (recurrent CDI) and a similar patient population receiving SOC therapy for the treatment of recurrent CDI.

Based on the applicant's statements presented above, because ZINPLAVA™ has a unique mechanism of action, we do not believe that the technology is substantially similar to existing technologies and, therefore, meets the

newness criterion. We are inviting public comments on whether ZINPLAVA™ meets the newness criterion.

With regard to the cost criterion, the applicant conducted the following analysis to demonstrate that the technology meets the cost criterion. In order to identify the range of MS-DRGs that cases representing potential patients who may be eligible for treatment using ZINPLAVA™ may map to, the applicant identified all MS-DRGs for patients diagnosed with CDI as a primary or secondary diagnosis. Specifically, the applicant searched the FY 2015 MedPAR file for claims that included target patients over 65 years of age and identified cases reporting diagnoses of CDI by ICD-9-CM diagnosis code 008.45 (Intestinal infection due to *Clostridium difficile*) as a primary or secondary diagnosis. This resulted in 139,135 cases across 543 MS-DRGs, with approximately 40 percent of all cases mapping to the following 12 MS-DRGs: MS-DRG 177 (Respiratory Infections and Inflammations with MCC); MS-DRG 193 (Simple Pneumonia and Pleurisy with MCC); MS-DRG 291 (Heart Failure and Shock with MCC); MS-DRGs 371, 372, and 373 (Major Gastrointestinal Disorders and Peritoneal Infections with MCC, with CC, and without CC/MCC, respectively); MS-DRGs 682 and 683 (Renal Failure with MCC and with CC, respectively); MS-DRG 853 (Infectious and Parasitic Diseases with O.R. Procedure with MCC); MS-DRGs 870, 871, and 872 (Septicemia or Severe Sepsis with Mechanical Ventilation >96 Hours, with MCC, and without MCC, respectively).

Using the 139,135 identified cases, the average unstandardized case-weighted charge per case was \$80,677. The applicant then standardized the charges. The applicant did not remove charges for the current treatment because, as discussed above, ZINPLAVA™ will be used concomitantly with SOC antibacterial treatments for the treatment of CDI as an additive, or adjunctive treatment option, to reduce the recurrence of CDI infection. The applicant then applied the 2-year inflation factor of 1.098446 from the FY 2017 IPPS/LTCH final rule (81 FR 57286) to inflate the charges from FY 2015 to FY 2017. The applicant noted that the anticipated price for ZINPLAVA™ has yet to be determined; therefore, no charges for ZINPLAVA™ were added in the analysis. Based on the FY 2017 IPPS/LTCH PPS Table 10 thresholds, the average case-weighted threshold amount was \$56,871. The inflated average case-weighted

standardized charge per case was \$78,929. Because the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount, the applicant maintained that the technology meets the cost criterion. The applicant noted that the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount without the average per patient cost of the technology. As such, the applicant anticipated that the inclusion of the cost of ZINPLAVA™, at any price point, will further increase charges above the average case-weighted threshold amount. We are inviting public comments on whether ZINPLAVA™ meets the cost criterion.

With respect to the substantial clinical improvement criterion, the applicant asserted that the addition of ZINPLAVA™ to SOC antibacterial drug treatment reduces CDI recurrence because it provides passive immunity against Toxin B resulting from persistent or newly acquired *C-diff* spores.

The applicant conducted two Phase III studies, MODIFY I and MODIFY II. The primary endpoint of the studies was recurrent CDI within 12 weeks after completion of treatment with ZINPLAVA™. The first study design initially included actoxumab, an antitoxin A monoclonal antibody treatment arm that was later discontinued due to a high failure rate and increase in mortality compared to other treatment arms.³ Clinical data on ZINPLAVA™ is provided exclusively from the FDA briefing document available on the FDA Web site at: <http://www.fda.gov/AdvisoryCommittees/CommitteesMeetingMaterials/Drugs/Anti-InfectiveDrugsAdvisoryCommittee>. Information is also provided in the package insert by the manufacturer, Merck & Company, Inc. The FDA briefing provided data on the safety and efficacy of ZINPLAVA™. The FDA considered sustained clinical responses defined as clinical cure of the initial CDI episode and the absence of CDI recurrence as an appropriate endpoint to assess the efficacy of ZINPLAVA™ in the prevention of CDI recurrences.

In MODIFY I trial, the clinical cure rate of the presenting CDI episode was lower in the ZINPLAVA™ arm as compared to the placebo arm, whereas in MODIFY II trial the clinical cure rate was lower in the placebo arm as compared to the ZINPLAVA™ arm. Additional analyses showed that, by 3

³ Wilcox MH et al. Bezlotoxumab for Prevention of Recurrent *Clostridium difficile* Infection. *N Engl J Med*. 2017 Jan 26;376(4):305–317.

weeks post study drug infusion, the clinical cure rates of the presenting CDI episode were similar between treatment arms.

In MODIFY I, the rate of sustained clinical response was numerically in favor of ZINPLAVA™ (60.1 percent) in comparison to placebo (55.2 percent) with an adjusted difference and 95 percent CI of 4.8 percent (– 2.1 percent; 11.7 percent). In MODIFY II, the proportion of subjects with sustained clinical response in the ZINPLAVA™ arm (66.8 percent) was also higher than in the placebo arm (52.1 percent) with an adjusted difference of 14.6 percent and 95 percent CI (7.8 percent; 21.4 percent). The treatment did not significantly decrease mortality.

Recurrence rates, including CDI-related hospital readmission rates, reportedly were between 10 and 25 percent. No clinically meaningful differences in the exposure of bezlotoxumab were found between patients 65 years of age and older and patients under 65 years of age.

In the Phase III trials, the safety profile of ZINPLAVA™ was similar overall to that of placebo. However, heart failure was reported more commonly in the two Phase III clinical trials of ZINPLAVA™-treated patients compared to placebo-treated patients. These adverse reactions occurred primarily in patients with underlying congestive heart failure (CHF). In patients with a history of CHF, 12.7 percent (15/118) of ZINPLAVA™-treated patients and 4.8 percent (5/104) of placebo-treated patients had the serious adverse reaction of heart failure during the 12-week study period. In addition, in patients with a history of CHF, there were more deaths in ZINPLAVA™-treated patients (19.5 percent (23/118)) than in placebo-treated patients (12.5 percent (13/104)) during the 12-week study period. We are concerned regarding the safety of ZINPLAVA™ in patients diagnosed with CHF. In regard to safety, data from the MODIFY I and MODIFY II studies suggest few adverse events associated with ZINPLAVA™, with no significant differences in the number of serious adverse events, deaths or discontinuations of study drug that occurred between the ZINPLAVA™ and the placebo groups. However, both the ZINPLAVA™ and the ZINPLAVA™ plus actoxumab treatment groups experienced more episodes of cardiac failure (defined as acute or chronic cardiac failure) then compared to the placebo group (2.2 percent versus 1 percent). We are unsure if the cardiac failure reported in the studies may be the result of a higher number of baseline patients with heart failure in the

treatment arms or the result of an adverse effect to ZINPLAVA™. Therefore, we are concerned with regard to the adverse event of cardiac failure of ZINPLAVA™.

We are inviting public comments on whether ZINPLAVA™ meets the substantial clinical improvement criterion.

We did not receive any written public comments in response to the New Technology Town Hall meeting notice regarding the application of ZINPLAVA™ for new technology add-on payments.

b. EDWARDS INTUITY Elite™ Valve System (INTUITY) and LivaNova Perceval Valve (Perceval)

Two manufacturers, Edwards Lifesciences and LivaNova, submitted applications for new technology add-on payments for FY 2018 for the INTUITY Elite™ Valve System (INTUITY) and the Perceval Valve (Perceval), respectively. Both of these technologies are prosthetic aortic valves inserted using surgical aortic valve replacement (AVR). We note that, while Edwards Lifesciences submitted an application for new technology add-on payments for FY 2017 for the INTUITY valve, FDA approval was not received by July 1, 2016, and, therefore, the device was not eligible for consideration for new technology add-on payments for FY 2017.

Aortic valvular disease is relatively common, primarily manifested by aortic stenosis. Most aortic stenosis is due to calcification of the valve, either on a normal tri-leaflet valve or on a congenitally bicuspid valve. The resistance to outflow of blood is progressive over time, and as the size of the aortic orifice narrows, the heart must generate increasingly elevated pressures to maintain blood flow. Symptoms such as angina, heart failure, and syncope eventually develop, and portend a very serious prognosis. There is no effective medical therapy for aortic stenosis, so the diseased valve must be replaced or, less commonly, repaired.

The INTUITY valve incorporates the expansion feature of a catheter implanted valve, but is designed to be placed during cardiac surgery. The manufacturer explained that the INTUITY valve requires fewer stitches to hold the device in place because of the balloon expanded design and, therefore, can be inserted more quickly than a standard valve, and also facilitates minimally invasive cardiac surgery; that is, use of a smaller incision to allow faster recovery. The manufacturer of the INTUITY valve indicated that the device is comprised of: (1) A bovine pericardial aortic

bioprosthetic valve; (2) a balloon expandable stainless steel frame; and (3) a textured sealing cloth. The manufacturer of the Perceval valve indicated that the Perceval valve device is comprised of: (1) Sizers used to determine the correct size of the prosthesis; (2) a dual holder used for positioning and deployment (available in two models, one for sternal approaches and one for MIS); (3) a “smart clip” to assist during assembly of the valve on the dual holder to prevent release during positioning; (4) a dual collapse used to evenly reduce the diameter of the prosthesis allowing it to mount onto the holder prior to implantation; (5) a dual collapse base used to allow proper positioning; and (6) a postdilation catheter used for in situ dilation of the prosthesis after implantation (available in two models, one for sternal approaches and one for MIS). According to both applicants, the INTUITY valve and the Perceval valve are the first sutureless, rapid deployment aortic valves that can be used for the treatment of patients who are candidates for surgical AVR. The applicants indicated that the two new device innovations facilitate MIS approaches through: (1) The device rapid deployment mechanisms; and (2) the design of the prosthetic valve that allows for markedly fewer to no sutures to securely fasten the prosthetic valve to the aortic orifice. The applicants explained that both of these aspects of their devices are credited with the reduction of operating time.

As noted, according to both applicants, the INTUITY valve and the Perceval valve are the first sutureless, rapid deployment aortic valves that can be used for the treatment of patients who are candidates for surgical AVR. Because potential cases representing patients who are eligible for treatment using the INTUITY and the Perceval aortic valve devices would group to the same MS-DRGs, and we believe that these devices are intended to treat the same or similar disease in the same or similar patient population, and are purposed to achieve the same therapeutic outcome using the same or similar mechanism of action, we believe these two devices are substantially similar to each other and that it is appropriate to evaluate both technologies as one application for new technology add-on payments under the IPPS.

With respect to the newness criterion, the INTUITY valve received FDA approval on August 12, 2016, and was commercially available on the U.S. market on August 19, 2016. The Perceval valve received FDA approval

on January 8, 2016, and was commercially available on the U.S. market on February 29, 2016. We believe that, in accordance with our policy, it is appropriate to use the earliest market availability date submitted as the beginning of the newness period. Therefore, based on our policy, with regard to both devices, if the technologies are approved for new technology add-on payments, we believe that the beginning of the newness period would be February 29, 2016. In addition, both applicants indicated that ICD-10-PCS code X2RF032 (Replacement of Aortic Valve using Zooplastic Tissue, Rapid Deployment Technique, Open Approach, New Technology Group 2) would identify procedures involving the use of the devices when surgically implanted.

We previously stated that, because we believe these two devices are substantially similar to each other, we believe it is appropriate to evaluate both technologies as one application for new technology add-on payment under the IPPS. The applicants submitted separate cost and clinical data, and we reviewed and discuss each set of data separately. However, we intend to make one determination regarding new technology add-on payments that will apply to both devices. We believe that this is consistent with our policy statements in the past regarding substantial similarity. Specifically, we have noted that approval of new technology add-on payments would extend to all technologies that are substantially similar (66 FR 46915), and we believe that continuing our current practice of extending new technology add-on payments without a further application from the manufacturer of the competing product, or a specific finding on cost and clinical improvement if we make a finding of substantial similarity among two products is the better policy because we avoid—

- Creating manufacturer-specific codes for substantially similar products;
- Requiring different manufacturers of substantially similar products to submit separate new technology applications;
- Having to compare the merits of competing technologies on the basis of substantial clinical improvement; and
- Bestowing an advantage to the first applicant representing a particular new technology to receive approval (70 FR 47351).

If these substantially similar technologies were submitted for review in different (and subsequent) years, rather than the same year, we would evaluate and make a determination on

the first application and apply that same determination to the second application. However, because the technologies have been submitted for review in the same year, we believe that it is appropriate to consider both sets of cost data and clinical data in making a determination and we do not believe that it is possible to choose one set of data over another set of data in an objective manner.

As stated above, we believe that the INTUITY valve and the Perceval valve are substantially similar to each other for purposes of analyzing these two applications as one application. We also need to determine whether the INTUITY valve and the Perceval valve are substantially similar to existing technologies prior to their approval by the FDA and their release on the market. As discussed earlier, if a technology meets all three of the substantial similarity criteria, it would be considered substantially similar to an existing technology and would not be considered “new” for purposes of new technology add-on payments.

With respect to the first criterion, whether a product uses the same or a similar mechanism of action to achieve a therapeutic outcome, the applicant for the INTUITY valve asserted that its unique design, which utilizes features that were not previously included in conventional aortic valves, constitutes a new mechanism of action. The deployment mechanism allows for rapid deployment. The expandable frame can reshape the native valve’s orifice, creating a larger and more efficiently shaped effective orifice area. In addition, the expandable skirt allows for structural differentiation upon fixation of the valve requiring 3 permanent, guiding sutures rather than the 12 to 18 permanent sutures used to fasten standard prosthetic aortic valves. The applicant for the Perceval valve described the Perceval valve’s mechanism of action as including: (a) No permanent sutures; (b) a dedicated delivery system that increases the surgeon’s visibility; (c) an enabler of minimally invasive approach; (d) a complexity reduction and reproducibility of the procedure; and (e) a unique device assembly and delivery systems.

With respect to the second and third criteria, whether a product is assigned to the same or a different MS-DRG and whether the new use of the technology involves the treatment of the same or similar type of disease and the same or similar patient population, the applicant for the INTUITY valve indicated that the technology is used in the treatment of the same patient population and potential cases representing patients

that may be eligible for treatment using the INTUITY valve would be assigned to the same MS-DRGs as cases involving the use of other prosthetic aortic valves (that is, MS-DRGs 216 (Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization with MCC), 217 (Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization with CC), 218 (Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization without CC/MCC), 219 (Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization with MCC), 220 (Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization with CC), and 221 (Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization without CC/MCC). The applicant for the Perceval valve also indicated that the Perceval valve device is used in the treatment of the same patient population and potential cases representing patients that may be eligible for treatment using the technology would be assigned to the same MS-DRGs (MS-DRGs 216 through 221) as cases involving the use of other prosthetic aortic valves.

After considering the materials included with both applications, we remain concerned as to whether the mechanism of action described by the applicants represents an improvement to an existing surgical technique and technology or a new technology. While the INTUITY and Perceval valves address some of the challenges posed by implantation of existing valves, including improving the visibility of the orifice and the physiological function of the valves, we do not believe that their mechanisms of action are fundamentally different from that of other aortic valves. As one of the applicants stated in its application, the goal of the prosthetic aortic valve is to mimic the native valve that it has replaced via the incorporation of three leaflets that open and close in response to pressure gradients developed during the cardiac cycle. We believe that the INTUITY and Perceval valves are the same or similar to other prosthetic aortic valves used to treat the same or similar diagnoses.

We are inviting public comments on whether the mechanisms of action of the sutureless, rapid deployment of the INTUITY and Perceval valves differs from the mechanism of action of standard AVR valves and whether the technologies meet the newness criterion.

As we stated above, each applicant submitted separate analyses regarding the cost criterion for each of their devices, and both applicants maintained

that their device meets the cost criterion. We summarize each analysis below.

With regard to the cost criterion, the INTUITY valve's applicant researched the FY 2015 MedPAR claims data file to identify cases representing patients who

may be potential recipients of treatment using the INTUITY valve. The applicant identified claims that reported an ICD-9-CM diagnosis code of 424.1 (Aortic valve disorder), in combination with an ICD-9-CM procedure code of 35.21 (Replacement of aortic valve with

tissue) or 35.22 (Open and other replacement of aortic valve). The applicant also identified cases with or without a coronary artery bypass graft (CABG) using the ICD-9-CM procedure codes in the table below.

ICD-9-CM code	Code description
36.10	Aortocoronary bypass for heart revascularization, not otherwise specified.
36.11	(Aorto)coronary bypass of one coronary artery.
36.12	(Aorto)coronary bypass of two coronary arteries.
36.13	(Aorto)coronary bypass of three coronary arteries.
36.14	(Aorto)coronary bypass of four or more coronary arteries.
36.15	Single internal mammary-coronary artery bypass.
36.16	Double internal mammary-coronary artery bypass.
36.17	Abdominal-coronary artery bypass.

The applicant identified a total of 25,173 cases that mapped to MS-DRGs 216 through 221. Of these cases, the applicant identified 10,251 CABG cases and 14,922 non-CABG cases. According to the applicant, patients that undergo a procedure without need of a concomitant CABG are more likely to receive treatment with the INTUITY valve than patients in need of a concomitant CABG. Therefore, the applicant weighted the non-CABG cases at 90 percent of total cases and the CABG cases at 10 percent of total cases under each of the six MS-DRGs. The final case count is a weighted average of 14,455 cases.

The applicant calculated an average unstandardized charge per case of \$192,506 for all cases. The applicant then removed 100 percent of the charges for pacemakers, investigational devices, and other implants that would not be required for patients receiving treatment using the INTUITY valve. The applicant standardized the charges and then applied an inflation factor of 1.098446, which is the 2-year inflation factor in the FY 2017 IPPS/LTCH PPS final rule (81 FR 57286), to update the charges from FY 2015 to FY 2017. The applicant calculated the average expected charge for the INTUITY valve based on the current list price of the device. Although the applicant submitted data related to the cost of the INTUITY valve, the applicant noted that the cost of the device is proprietary information. To add charges for the device, the applicant assumed a hospital mark-up of approximately 3.00 percent, based on the current average CCR for implantable devices (0.331) as reported in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56876). Based on the FY 2017 IPPS/LTCH PPS Table 10 thresholds, the average case-weighted threshold amount was \$170,321. The applicant computed an inflated average case-weighted

standardized charge per case of \$194,291, which is \$23,970 above the average case-weighted threshold amount. Because the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount, the applicant maintained that the technology meets the cost criterion.

We thank the applicant for the analysis above. However, we would like more information from the applicant regarding how it decided upon which cases to include in the sensitivity analysis, as well as further details about how and on what basis the applicant weighted CABG and non-CABG cases. We are inviting public comments on whether the INTUITY valve meets the cost criterion.

With regard to the cost criterion in reference to the Perceval valve, the applicant conducted the following analysis. The applicant examined FY 2015 MedPAR claims data that included cases reporting an ICD-9 procedure code of 35.21 or 35.22, in combination with diagnosis code: 424.1. Noting that MS-DRGs 216 through 221 contained 97 percent of these cases, the applicant limited its analysis to these 6 MS-DRGs. The applicant identified 25,193 cases across these MS-DRGs, resulting in an average case-weighted unstandardized charge per case of \$173,477. The applicant then standardized charges using FY 2015 standardization factors and applied an inflation factor of 1.089846 from the FY 2017 IPPS/LTCH proposed rule (81 FR 25271). The applicant indicated that the technology meets the cost criterion by applying the inflation factor from the proposed rule and, therefore, would meet the cost criterion by applying the higher inflation factor from the final rule.

Included in the average case-weighted standardized charge per case were charges for the current valve prosthesis.

Therefore, the applicant removed all charges associated with revenue center 0278, and calculated the adjusted average case-weighted standardized charge per case by subtracting these charges from the standardized charge per case. The applicant then added the charge for the new technology by taking the anticipated hospital cost of the new technology and dividing it by the national average implantable devices CCR of 0.331. The applicant then added the charge for the new technology to the inflated average case-weighted standardized charges per case to arrive at the final inflated average case-weighted standardized charge per case, which was then case-weighted based on the distribution of cases within the six MS-DRGs. This resulted in an inflated average case-weighted standardized charge per case of \$206,109. Using the FY 2017 IPPS Table 10 thresholds, the average case-weighted threshold amount was \$173,477. Because the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount, the applicant maintained that the technology meets the cost criterion. We are inviting public comments on whether the Perceval technology meets the cost criterion.

With regard to substantial clinical improvement for the INTUITY valve, the applicant asserted that several aspects of the valve system represent a substantial clinical improvement over existing technologies. The applicant believed that the flexible deployment arm allows improved surgical access and visualization, making the surgery less challenging for the surgeon, improving the likelihood that the surgeon can use a minimally invasive approach. According to the applicant, the assembly of the device only allows the correct valve size to be fitted, which ensures that the valve does not slip or

migrate, which prevents paravalvular leaks and patient prosthetic mismatch. The applicant indicated that the device improves clinical outcomes for patients undergoing minimally invasive AVR and full-sternotomy AVR. The applicant stated that the rapid deployment technology enables reduced operative time, specifically cross-clamp time, thereby reducing the period of myocardial ischemia. In addition, the applicant indicated that the device offers a reduction in operative time for full-sternotomy AVR. The applicant noted that clinical results document significant patient outcome and utilization improvements, including improved patient satisfaction, faster return to normal activity, decreased post-operative pain, reduced mortality and decreased complications, including need for reoperation due to bleeding, reduced recovery time, reduced length of stay (both ICU and overall), more access to minimally invasive surgery, and improved hemodynamics.

The INTUITY valve has been tested clinically in several trials. In the TRITON trial (Kocher et al., 2013⁴), 287 patients diagnosed with aortic stenosis underwent surgery in 1 of 6 European centers. The first 149 patients received the first generation Model 8300A valve, and the next 138 patients received the second generation Model 8300AB. The average age of the patients was 75.7 years. Early, 30-day mortality was 1.7 percent (5/287), the post-op valve gradient was low, and 75 percent of the patients improved functionally. A total of 4 valves were explanted in the final 30 days due to bleeding, and 3 were explanted later for paravalvular leak, endocarditis, and aortic root aneurysms. Follow-up extended to 3 years (mean 1.8 years).

Implantation of the INTUITY valve using minimally invasive surgery was compared with conventional aortic valve replacement via full sternotomy in the CADENCE–MIS randomized trial (Borger et al., 2015⁵) of 100 patients treated in 1 of 5 centers in Germany. The authors found no significant difference in 30-day mortality, the need for pacemaker implantation, significant paravalvular regurgitation, and quality of life scores at 3 months. Aortic cross-

clamp time was significantly reduced from 54.0 to 41.3 minutes ($p < 0.0001$), and cardiopulmonary bypass time was reduced from 74.4 to 68.8 minutes ($p = 0.21$). Early clinical outcomes were similar: No significant differences in mortality, reoperation, or other clinical outcomes. The aortic valve gradient was significantly lower in the MIS group: 8.5 versus 10.3 mmHg.

The TRANSFORM trial (Barnhart et al. 2017⁶) was a single-arm, non-randomized, multicenter trial, in which 839 patients underwent rapid deployment AVR surgery. The average age of the patients was 73.5 years. The mean cross-clamp time and cardiopulmonary bypass times for full sternotomy were 49.3 ± 26.9 min and 69.2 ± 34.7 min, respectively, and for MIS, 63.1 ± 25.4 min and 84.6 ± 33.5 min, respectively. The authors compared these times to STS database comparators: For full sternotomy, 76.3 minutes and 104.2 minutes, respectively, and for MIS, 82.9 minutes and 111.4 minutes, respectively. All cause early mortality was 0.8 percent, mean EOA at 1 year was 1.7 cm²; mean gradient, 10.3 mmHg; and moderate and severe PVL, 1.2 percent and 0.4 percent, respectively. The authors indicated that the INTUITY valve “. . . may lead to a relative reduction in aortic cross-clamp time and cardiopulmonary bypass time” and “may confer benefits to patients, such as decreased mortality and morbidity.” The authors noted the possibility of potential bias resulting from the level of experience of the study surgeons relative to typical cardiac surgeons. In addition, long-term follow-up is not available, and study comparators from the Society of Thoracic Surgeons (STS) database were not matched.

In the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25057), after reviewing the studies provided by the applicant with its application for FY 2017, we expressed some specific concerns. We indicated that we were concerned that the INTUITY valve does not have sufficient advantages over alternative surgically implanted valves to constitute a substantial clinical improvement. We noted that, while some of the studies included with the application demonstrate reduced aortic cross-clamp time, conventional aortic valve replacement was used in the comparison group. Therefore, it is

unclear whether the reduced aortic cross-clamp time is associated with the use of the INTUITY valve or as a result of the MIS surgery in general.

In response to these concerns, the INTUITY valve's applicant stated that the INTUITY valve is associated with significant clinical benefits outside of the benefits achieved by use of an MIS approach. The applicant referenced the sub-study of the TRANSFORM trial, which compared the MISAVR with the INTUITY valve to MISAVR with a conventional valve, stating that the results indicated reduced cross-clamp time and other benefits that are not simply a function of the MIS approach. The applicant also referenced trials that indicated that the INTUITY valve had excellent hemodynamic performance (Haverich et al.,⁷ Borger et al.,⁸ Barnhart et al.⁹), one of which found a significant improvement in functional status (Haverich et al.).

After considering the studies provided by the INTUITY valve applicant, we are concerned about the possibility of potential bias resulting from the level of experience of the study surgeons relative to typical cardiac surgeons, as well as the lack of long-term follow-up in these studies.

With regard to substantial clinical improvement for the Perceval valve, the applicant submitted several studies examining the Perceval valve. The following discussion summarizes some of these studies.

Pollari and colleagues¹⁰ (2014) utilized a propensity score analysis to examine 82 matched pairs as part of a larger trial that included 566 patients treated with bioprosthetic aortic valve replacement, 166 of which received treatment using the Perceval sutureless valve and 400 of which received treatment using a stented valve. Aortic cross-clamp, cardiopulmonary bypass, and operation times were significantly shorter in the group that received treatment using the Perceval sutureless

valve. The Perceval sutureless group also had shorter ICU stays, hospital stays, and intubation times, and lower incidence of postoperative atrial fibrillation and respiratory insufficiency. The authors noted that, despite the promising preliminary results, longer follow-up is warranted before drawing definite conclusions.

In a nonrandomized trial of 100 patients in a German hospital, Santarpino and colleagues¹¹ (2013) found that procedures completed using the Perceval valve were associated with significantly shorter cross-clamp and cardiopulmonary bypass times (40 ± 13.8 and 69 ± 19.1 versus 66 ± 20.4 and 105 ± 34.8) relative to conventional stented bioprosthetic valves, as well as less frequent use of blood transfusions, shorter ICU stays and shorter use of intubation. In contrast, Gilmanov and colleagues¹² (2013) found that a MIS approach resulted in improved outcomes, albeit longer aortic cross-clamp times. A meta-analysis by Hurley and colleagues¹³ (2015) found reduced cross-clamp and cardiopulmonary bypass times, but found a significantly higher permanent pacemaker rate with the use of Perceval sutureless valves.

A study conducted by Dalen and colleagues¹⁴ (2015) used propensity score matching to examine early post-operative outcomes and 2-year survival between 171 pairs of patients who underwent ministernotomy using the Perceval device or a full sternotomy with stented prosthesis. There were no differences in 30-day mortality or 2-year survival between the groups. The aortic cross-clamp time and cardiopulmonary bypass time were shorter, and there were fewer blood transfusions in the group that received treatment using the Perceval device. However, this group was also at higher risk for post-operative permanent pacemaker implantation.

After reviewing the publications submitted by the applicant, we are concerned that the lack of randomization and blinded investigators may have influenced the outcomes in many of the studies provided. For

example, in the discussion following Santarpino et al.'s 2013 study, one of the participants suggested that medical decision-making regarding ventilation times, ICU times, and blood transfusions may be affected by the knowledge of investigators as to which valve the patient received treatment using. Also, as indicated above with respect to the INTUITY valve, the experience of the surgeons in these studies may be confounding factors that may have influenced the length of surgical procedures and/or surgical outcomes.

We are inviting public comments on whether rapid deployment valves, specifically the INTUITY and Perceval valves, meet the substantial clinical improvement criterion.

We did not receive any written public comments regarding the INTUITY and Perceval valves in response to the New Technology Town Hall meeting notice.

c. Ustekinumab (Stelara®)

Janssen Biotech submitted an application for new technology add-on payments for the Stelara® induction therapy for FY 2018. Stelara® received FDA approval as an intravenous (IV) infusion treatment of Crohn's disease (CD) on September 23, 2016, which added a new indication for the use of Stelara® and route of administration for this monoclonal antibody. IV infusion of Stelara® is indicated for the treatment of adult patients (18 years and older) diagnosed with moderately to severely active CD who have: (1) Failed or were intolerant to treatment using immunomodulators or corticosteroids, but never failed a tumor necrosis factor (TNF) blocker; or (2) failed or were intolerant to treatment using one or more TNF blockers. Stelara® for IV infusion has only one purpose, induction therapy. Stelara® must be administered intravenously by a health care professional in either an inpatient hospital setting or an outpatient hospital setting.

Stelara® for IV infusion is packaged in single 130mg vials. Induction therapy consists of a single IV infusion dose using the following weight-based dosing regimen: Patients weighing less than (<) 55kg are administered 260mg of Stelara® (2 vials); patients weighing more than (>) 55kg, but less than (<) 85kg are administered 390mg of Stelara® (3 vials); and patients weighing more than (>) 85kg are administered 520mg of Stelara® (4 vials). An average dose of Stelara® administered through IV infusion is 390mg (3 vials). Maintenance doses of Stelara® are administered at 90mg, subcutaneously, at 8-week intervals and may occur in the outpatient hospital setting.

CD is an inflammatory bowel disease of unknown etiology, characterized by transmural inflammation of the gastrointestinal (GI) tract. Symptoms of CD may include fatigue, prolonged diarrhea with or without bleeding, abdominal pain, weight loss and fever. CD can affect any part of the GI tract including the mouth, esophagus, stomach, small intestine, and large intestine.

Conventional pharmacologic treatments of CD include antibiotics, mesalamines, corticosteroids, immunomodulators, tumor necrosis alpha (TNF α) inhibitors, and anti-integrin agents. Surgery may be necessary for some patients diagnosed with CD in which conventional therapies have failed. The applicant asserted that use of Stelara® offers an alternative to conventional pharmacologic treatments, and has been shown to be successful in the treatment of patients who have failed treatment using the conventional agents currently being used for a diagnosis of CD, including TNF α inhibitors.

Although the precise cause of CD is unknown, the environment, genetics, and the patient's immune system are thought to play a role in this form of inflammatory bowel disease (IBD). Conventional pharmacologic therapy is directed against many different inflammatory mediators that produce inflammation and ultimately lead to gastrointestinal damage. The applicant asserted that it is of paramount importance to have a variety of pharmacologic agents that can address the proper inflammatory mediator for a particular patient. The applicant also asserted that, while the currently available anti-inflammatory agents used in the treatment of a diagnosis of CD are excellent medications, these agents do not successfully treat all patients diagnosed with CD, nor do they reliably sustain disease remission once a response has been achieved. The applicant believed that the use of Stelara® offers an alternative to currently available treatment options.

With regard to the newness criterion, Stelara® is not a newly formulated drug. Stelara®, administered subcutaneously, received FDA approval in 2009 (September 25, 2009) for the treatment of moderate to severe plaque psoriasis and psoriatic arthritis in adults. Its IV use for the treatment of patients diagnosed with CD was approved by the FDA in 2016 (September 23, 2016). With regard to the new use of an existing technology, in the September 1, 2001 final rule (66 FR 46915), we stated that if the new use of an existing technology was for treating patients not expected to

¹¹ Santarpino, G. et al. (2013), The Perceval S aortic valve has the potential of shortening surgical time: Does it also result in improved outcome?, *Ann Thorac Surg*, 96, 77–81.

¹⁴ Dalén, M. (2015), Aortic valve replacement through full sternotomy with a stented bioprosthesis versus minimally invasive sternotomy with a sutureless bioprosthesis, *Eur J Cardiothorac Surg* 2015; doi:10.1093/ejcts/ezv014.

be assigned to the same MS-DRG as the patients receiving the existing technology, it may be considered for approval, but it must also meet the cost and substantial clinical improvement criteria in order to qualify for the new technology add-on payment. We do not believe that potential cases representing patients that may be eligible for treatment with the new use of the Stelara® for IV treatment of a diagnosis of CD would be assigned to the same MS-DRGs as cases treated using the prior indications.

As discussed above, if a technology meets all three of the substantial similarity criteria, it would be considered substantially similar to an existing technology and would not be considered “new” for purposes of new technology add-on payments.

With regard to the first criterion, whether a product uses the same or a similar mechanism of action to achieve a therapeutic outcome, we are concerned that Stelara®’s mechanism of action does not appear to differ from the mechanism of action of other monoclonal antibodies, which also target unique gastrointestinal-selective cytokines. The applicant believed that the Stelara® uses a different mechanism of action than other medications currently available for the treatment of patients diagnosed with CD. However, we believe that the mechanism of action for the new use of the Stelara® may be similar to the mechanism of action of other cytokine-selective monoclonal antibodies that disrupt cytokine mediated signals crucial to the inflammatory process in patients diagnosed with CD.

The applicant stated that the Stelara® is a human IgG1κ monoclonal antibody that binds with specificity to the p40 protein subunit, which is common to both the interleukin-12 (IL-12) and interleukin (IL-23) cytokines. IL-12 and IL-23 are naturally occurring cytokines that are involved in inflammatory and immune responses, such as natural killer cell activation and CD4+ T-cell differentiation and activation. In *in vitro* models, the Stelara® was shown to disrupt IL-12 and IL-23 mediated signaling and cytokine cascades by blocking the interaction of these cytokines with a shared cell-surface receptor chain, IL-12Rβ1. The cytokines IL-12 and IL-23 have been implicated as important contributors to chronic inflammation. According to the applicant, IV induction therapy quickly achieves optimal blood levels of Stelara® so that blockade of IL-12 and IL-23 is most effective. This level of blockade is not achieved with subcutaneous administration.

The applicant further stated that other available CD anti-inflammatory or immune modulator therapies do not target the IL-12/IL-23p40 substrate. Rather, these therapies may target other integrin pairs such as the alpha4- beta7 integrins. Therefore, the applicant believed that the Stelara® drug is not substantially similar to any other approved drug for the treatment of moderately to severely active CD. As previously noted, the applicant asserted that, while the currently available agents are excellent medications, these agents do not successfully treat all patients diagnosed with CD, nor do these agents reliably sustain remission once a clinical response has been achieved. According to the applicant, the new use of the Stelara® offers an alternative to currently available treatment options, and has been shown to be successful in the treatment of patients who have failed treatment with the conventional agents currently being used for a diagnosis of CD, including TNF blockers. We are concerned that the Stelara®’s mechanism of action is similar to that of other immune system suppressors used in the treatment of patients diagnosed with moderately to severely active CD because other cytokine-selective monoclonal antibodies also disrupt cytokine mediated signals crucial to the inflammatory process in patients diagnosed with CD.

With respect to the second criterion, whether a product is assigned to the same or a different MS-DRG, the applicant maintained that MS-DRGs 386, 387, and 385 (Inflammatory Bowel Disease with CC, without CC/MCC, and with MCC, respectively) and MS-DRGs 330, 329 and 331 (Major Small and Large Bowel Procedures with CC, without CC/MCC, and with MCC, respectively) are used to identify cases representing patients who may potentially be eligible for treatment using the Stelara®. The applicant researched claims data from the FY 2015 MedPAR file and found 10,344 cases. About 85 percent of potentially eligible cases mapped to MS-DRGs for inflammatory bowel disease and most of the remainder of cases mapped to MS-DRGs for bowel surgery. We believe that potential cases involving Stelara® induction therapy may be assigned to the same MS-DRGs as cases representing patients who have been treated using currently available treatment options.

With respect to the third criterion, whether the new use of the technology involves the treatment of the same or similar type of disease and the same or similar patient population, according to

the applicant, currently available pharmacologic treatments include antibiotics, mesalamines, corticosteroids, immunomodulators, tumor necrosis alfa (TNFα) inhibitors and anti-integrins. The applicant stated that the new use of the Stelara® for IV infusion is indicated for the treatment of adults (18 years and older) diagnosed with moderately to severely active CD who have: (1) Failed or were intolerant to treatment with immunomodulators or corticosteroids, but never failed treatment using a TNF blocker; or (2) failed or were intolerant to treatment with one or more TNF blockers. The applicant asserted that Stelara® for induction therapy is not substantially similar to other treatment options because it does not involve the treatment of the same or similar type of patient population. Patients who are eligible for treatment using the Stelara® induction therapy have failed other CD treatment modalities. The applicant believed that the subset of primary and secondary nonresponder patients to TNF inhibitor treatments is a patient population unresponsive to, or ineligible for, currently available treatments for diagnoses of moderate to severe CD. Based on the indications for the use of Stelara®, there is a class of patients who failed, or were intolerant to, treatment using immunomodulators or corticosteroids, but never failed treatment using a TNF blocker. The applicant indicated that, for those patients who never failed treatment with a TNF blocker, this class of patients can be recognized as two separate patient populations: One population of patients who have never received treatment using a TNF blocker, or the other population of patients who have received and responded to treatment using a TNF blocker. We believe that, if the new use of the Stelara® has the same mechanism of action as other immune system suppressors such as TNF blockers, the patient population that did not receive treatment using a TNF blocker may not be a new patient population because those patients may be able to receive treatment using, and would successfully respond to treatment using, a TNF blocker. Moreover, if the mechanism of action is the same as other immune system suppressors, we believe that the new use of the Stelara® may be targeted at a new patient population in some circumstances and instances, but we are concerned that it may not be targeted at a new patient population in all circumstances and instances.

We are inviting public comments on whether the Stelara® meets the newness criterion.

With regard to the cost criterion, the applicant conducted the following analysis to demonstrate that Stelara® meets the cost criterion. The applicant searched claims from the FY 2015 MedPAR file for cases with a principal ICD-9-CM diagnosis of 555.x (Regional Enteritis), which are cases of a diagnosis of Crohn's Disease that may be eligible for treatment using Stelara®.

The applicant identified 10,344 cases that mapped to 35 MS-DRGs. Approximately 85 percent of cases mapped to the following Inflammatory Bowel MS-DRGs: MS-DRGs 385 (Inflammatory Bowel Disease with MCC), 386 (Inflammatory Bowel Disease with CC), and 387 (Inflammatory Bowel Disease without CC/MCC). Similarly, 11 percent of the cases mapped to the following MS-DRGs for bowel surgery: MS-DRGs 329 (Major Small and Large Bowel Procedures with MCC), 330 (Major Small and Large Bowel Procedures with CC), and 331 (Major Small and Large Bowel Procedures without CC/MCC). The remaining cases (4 percent) represented all other digestive system disorders.

Using the 10,344 identified cases, the average unstandardized case-weighted charge per case was \$39,935. The applicant then standardized the charges. The applicant did not remove charges for the current treatment because as discussed above Stelara® is indicated for use in patients who fail other treatments. The applicant then applied the 2-year inflation factor of 1.098446 from the FY 2017 IPPS/LTCH final rule (81 FR 57286) to inflate the charges from FY 2015 to FY 2017. The applicant then added charges for the Stelara® technology. Specifically, the applicant assumed that hospitals would mark up Stelara® IV to the same extent that they currently mark-up Stelara® SC (J3357, ustekinumab, 1 mg). The applicant used the actual hospital mark-up based on charges in the 2017 OPPS proposed rule file (OPPS claims incurred and paid in CY 2015). Based on the FY 2017 IPPS/LTCH PPS Table 10 thresholds, the average case-weighted threshold amount was \$55,023. The inflated average case-weighted standardized charge per case was \$69,826. Because the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount, the applicant maintained that the technology meets the cost criterion. We are inviting public comments whether Stelara® meets the cost criterion.

With regard to the third criterion, whether a technology represents a

substantial clinical improvement over existing technologies, according to the applicant, the new use of the Stelara® has been shown to produce clinical response and remission in patients diagnosed with moderate to severe CD who have failed treatment using conventional therapies, including antibiotics, mesalamine, corticosteroids, immunomodulators, and TNF α inhibitors. Stelara® has been commercially available on the U.S. market for the treatment of patients diagnosed with psoriasis (PsO) since 2009 and the treatment of patients diagnosed with psoriatic arthritis (PsA) since 2013, and the applicant has maintained a safety registry, which enrolled over 12,000 patients since 2007. According to the applicant, the drug has been extremely well-tolerated, and the safety profile in patients diagnosed with CD has been consistent with that experienced in cases representing patients diagnosed with PsO and PsA.

The applicant presented the results of three pivotal trials involving over 1,300 patients diagnosed with moderate to severe CD. All three trials utilized a multicenter, double-blind, placebo controlled study design. There were two single-dose IV induction trials, which included patients who had failed treatment using one or more TNF α inhibitors (UNITI-1) (N= 741), and patients who had failed treatment using corticosteroids and/or immunomodulators (UNITI-2) (N =628). Responders to the single IV induction dose were then eligible to be enrolled in a maintenance trial (IM-UNITI) (N= 397), which began 8 weeks after administration of the single IV induction dose. IM-UNITI patients were given subcutaneous Stelara® and were treated for 44 weeks. Over half of the patients treated with 90mg of Stelara® every 12 weeks were able to achieve remission; a highly significant response compared to placebo, according to the applicant. The results of these trials have been published by the *New England Journal of Medicine* and the applicant provided the published studies.¹⁵ The published study supported the applicant's assertion that Stelara® single IV dose induces response and remission in patients diagnosed with moderately to severely active CD that is refractory to either TNF antagonists or conventional therapy. Of the patients in the IM-UNITI trial receiving subcutaneous Stelara® at 8

weeks or 12 weeks, 53.1 percent and 48 percent, respectively, were in remission at week 44 as compared with 35.9 percent of those patients receiving treatment using placebo.

The applicant submitted published results of a multicenter, double-blind, placebo controlled Phase III study of Stelara®.¹⁶ We are concerned that the study did not effectively establish the need for Stelara® induction therapy. Also, the median age of patients in the study was 37 years, and we are concerned that the study did not include a significant amount of older patients.

We also are concerned that we do not have enough information to determine that the new use of the Stelara® is a substantial clinical improvement over existing technologies for the treatment of moderate to severe CD. We note that the UNITI-1, UNITI-2, and IMUNITI trials were completed to evaluate efficacy and safety of Stelara®, not superiority of Stelara® to current conventional therapy. Our concerns are based on a lack of head-to-head trials comparing IV induction and maintenance Stelara® therapy with conventional therapy in patients diagnosed with moderate to severe CD that are also primary and secondary nonresponders to treatment using TNF alpha inhibitor¹⁷ therapy. We recognize the subset of primary and secondary nonresponder patients to

TNF inhibitor treatments as a patient population unresponsive to, or ineligible for, currently available treatments for diagnoses of moderate to severe CD. However, we believe that this primary and secondary TNF alpha inhibitor non-responder patient population represents patients that experience a gap in treatment for diagnoses of moderate to severe CD. Specifically, we recognize the nonresponder patient population as described by Simon et al.¹⁸ as those patients who are TNF inhibitor immunogenicity failures, pharmacokinetic failures, and/or pharmacodynamics failures. We also note the supplement data in Feagan et al.'s publication¹⁹ summarized the primary and secondary nonresponders in UNITI-1. However, we are not clear how the inclusion of the TNF alpha

¹⁶ Ibid.

¹⁷ Ibid.

¹⁸ Simon E.G., et al., (2016) Ustekinumab for the treatment of Crohn's disease: can it find its niche? *Therapeutic Advances in Gastroenterology*. 2016 Jan; 9(1):26-36.

¹⁹ Feagan, W.J., et al. (2016) Ustekinumab as Induction and Maintenance Therapy for Crohn' Disease. *The New England Journal of Medicine*. 2016 Nov 17; 3745(20):1946-60.

¹⁵ Feagan, W.J., et al. (2016) Ustekinumab as Induction and Maintenance Therapy for Crohn' Disease. *The New England Journal of Medicine*. 2016 Nov 17; 3745(20):1946-60.

inhibitor intolerant patients with primary and secondary TNF alpha inhibitor failure patients impacts the final comparison of the placebo and treatment arms. In addition, we note that in the UNITI-1, UNITI-2, and IMUNITI studies all treatment arms were allowed to continue conventional treatments for diagnoses of CD throughout the study. We are concerned that it is difficult to determine whether the new use of the Stelara® represents a substantial clinical improvement over existing technologies with the concomitant use of other conventional CD medications throughout the duration of the UNITI-1, UNITI-2, and IMUNITI studies.

Also, as mentioned earlier, based on the indications for the use of the Stelara®, there is a class of patients who failed, or were intolerant to, treatment with immunomodulators or corticosteroids, but never failed treatment using a TNF blocker. According to the applicant, for those patients who never failed treatment using a TNF blocker, this patient population can be recognized as two separate patient populations: one patient population representing patients who never received treatment using a TNF blocker, or the other patient population representing patients who received and responded to treatment using a TNF blocker. In the patient population that did not receive treatment using a TNF blocker, we are unsure if the new use of the Stelara® represents a substantial clinical improvement because it is possible that some patients will have a positive response to treatment using a TNF blocker and will not respond successfully to treatment using Stelara®, or some patients may have a positive response to both treatment using a TNF blocker and using Stelara®, or some patients may not respond to treatment using a TNF blocker, but will have a positive response to treatment using Stelara®.

We are inviting public comments on whether the Stelara® meets the substantial clinical improvement criterion.

We did not receive any written public comments in response to the New Technology Town Hall meeting notice regarding the application of Stelara® for new technology add-on payments.

d. KTE-C19 (Axicabtagene Ciloleucel)

Kite Pharma, Inc. submitted an application for new technology add-on payments for KTE-C19 (axicabtagene ciloleucel) for FY 2018. The KTE-C19 technology has not received FDA approval as of the time of the

development of this proposed rule. KTE-C19 is an engineered autologous T-cell immunotherapy used for the treatment of adult patients with relapsed/refractory aggressive B-cell non-Hodgkin lymphoma (NHL) who are ineligible for autologous stem cell transplant (ASCT). KTE-C19 is a single intravenous infusion of T-cell immunotherapy.

The applicant noted that KTE-C19 was granted Breakthrough Therapy Designation by the FDA on December 3, 2015, for the treatment of patients with refractory DLBCL, PMBCL, and TFL forms of aggressive B-cell NHL. The applicant submitted a request for priority review by the FDA in December 2016. The applicant stated that, when approved by the FDA, KTE-C19 would represent the only FDA-approved treatment for adult patients with relapsed refractory aggressive B-cell NHL who are ineligible for ASCT. Currently, there are no ICD-10-CM/PCS codes that describe the administration and use of KTE-C19. The applicant has submitted an application for a unique ICD-10-PCS procedure code to uniquely identify KTE-C19. If approved, the code will be effective October 1, 2017 (FY 2018).

According to the applicant, adult NHL represents by a heterogeneous group of B-cell malignancies with varying patterns of behavior and response to treatment. B-cell NHL can be classified as either aggressive, or indolent disease, with aggressive variants including diffuse large B-cell lymphoma (DLBCL); primary mediastinal large B cell lymphoma (PMBCL) and transformed follicular lymphoma (TFL). Within NHL, DLBCL is the most common subtype of NHL, accounting for approximately 30 percent of patients with NHL, and survival without treatment is measured in months.^{20 21}

The applicant stated that, since the 1970s, cyclophosphamide, doxorubicin, vincristine, and prednisone (CHOP) has been the mainstay of therapy with more intensive regimens failing to show improved overall survival. The applicant further stated that the approval in 2006 of the anti-CD20 monoclonal antibody rituximab and its addition to the traditional CHOP regimen, R-CHOP, for patients with newly diagnosed aggressive NHL resulted in a dramatic improvement in NHL therapy. The combination of CHOP and R-CHOP is now first-line therapy

for treatment of patients diagnosed with DLBCL with complete response rates upwards of 76 percent.²² Data from the Surveillance, Epidemiology and End Results (SEER) registries have reflected an observed increase of the median overall survival from 20 to 47 months over the last two decades. Despite the improved therapies, only 50 to 70 percent of newly diagnosed patients are cured by standard first-line therapy alone.²³ Furthermore, relapsed or refractory (r/r) disease continues to carry a poor prognosis because only 50 percent of patients are eligible for more intensive second-line regimens, followed by high dose chemotherapy (HDT) and ASCT. Second-line chemotherapy regimens studied to date include rituximab, ifosfamide, carboplatin and etoposide (R-ICE) and rituximab, dexamethasone, cytarabine, and cisplatin (R-DHAP), followed by consolidative HDT/ASCT. Both regimens offer similar overall response rates (ORR) of 51 percent with 1 in 4 patients achieving long-term complete response (CR) at the expense of increased toxicity.²⁴ Given the modest response to second line therapy and/or HDT/ASCT, the population of patients with the highest unmet need is those with chemorefractory disease, which include DLBCL, PMBCL and TFL. These patients are defined as either progressive disease (PD) as best response to chemotherapy, stable disease as best response following 4 cycles of first-line or 2 cycles of later-line therapy, or relapse within 12 months of ASCT.^{25 26} Based on these definitions and available data from a multicenter retrospective study (SCHOLAR-1), chemorefractory disease treated with current and historical poor

outcomes with an ORR of 26 percent and median OS of 6.6 months.

According to the applicant, KTE-C19 is a different pathway to treat patients diagnosed with relapsed or refractory disease. KTE-C19 is supplied as a T-cell suspension for infusion. With KTE-C19 treatment, a patient's own T-cells are harvested and engineered ex vivo by retroviral transduction of a chimeric antigen receptor (CAR) construct encoding an anti-CD19 CD28/CD3-zeta. The anti-CD19 CAR T-cells are expanded and infused back into the patient. The new anti-CD19 CAR T-cells can recognize and eliminate CD19 antigen expressing target cells, an antigen also expressed on the cell surface of B-cell lymphomas and leukemias. According to the applicant, prior to KTE-C19 immunotherapy, the patient would have received outpatient administration of a non-myeloablative conditioning chemotherapy regimen consisting of cyclophosphamide 500 mg/m² IV and fludarabine 30 mg/m² IV for 3 days at days -5, -4, and -3 before the infusion of KTE-C19 at Day 0. The applicant noted that, if KTE-C19 infusion is delayed more than 2 weeks, readministration of the conditioning chemotherapy regimen may be required. Hospitalization is recommended for the infusion of KTE-C19.

As discussed earlier, if a technology meets all three of the substantial similarity criteria, it would be considered substantially similar to an existing technology and would not be considered "new" for purposes of new technology add-on payments.

With regard to the first criterion, the applicant stated that KTE-C19 does not use the same or similar mechanism of action to achieve a therapeutic outcome as any other drug or therapy assigned to the same or a different MS-DRG. The applicant further stated that KTE-C19 is the first engineered autologous cellular immunotherapy comprised of CAR T-cells that recognizes CD19 express cancer cells and normal B-cells; therefore, the applicant believed that KTE-C19's mechanism of action is distinct and unique from any other cancer drug or biologic that is currently approved for use in the treatment of aggressive B-cell NHL, namely single-agent or combination chemotherapy regimens.

With regard to the second criterion, whether a product is assigned to the same or a different MS-DRG, the applicant noted that based on the 2014 and 2015 100 Percent Inpatient Standard Analytic files, cases potentially eligible for treatment using the KTE-C19 and representing the target patient population span 50 unique MS-

DRGs and 73 percent of all of the cases within these 50 unique MS-DRGs that represent potentially eligible cases for treatment using KTE-C19 map to the following 4 MS-DRGs: MS-DRG 840 (Lymphoma & Non-Acute Leukemia with MCC); MS-DRG 841 (Lymphoma & Non-Acute Leukemia with CC); MS-DRG 846 (Chemotherapy without Acute Leukemia as Secondary Diagnosis with MCC); and MS-DRG 847 (Chemotherapy without Acute Leukemia as Secondary Diagnosis with CC). The applicant stated that, with the assignment of the unique KTE-C19-specific ICD-10-PCS code, patient cases where KTE-C19 is used will be distinguishable. However, patient cases where KTE-C19 is used and patient cases that are treated for DLBCL map to the same MS-DRGs.

With regard to the third criterion, whether the new use of the technology involves the treatment of the same or similar type of disease and the same or similar patient population, the applicant asserted that when approved by the FDA, KTE-C19 would represent the only FDA-approved treatment for adult patients diagnosed with relapsed or refractory aggressive B-cell NHL who are ineligible for ASCT. As a result, the applicant stated that KTE-C19 is not substantially similar to any existing technology and meets the newness criterion. CMS is concerned the CAR technology used in KTE-C19 may have a mechanism of action similar to that seen with the use of bispecific T cell engager (BiTE) technology.

We are inviting public comments on whether KTE-C19 meets the substantial similarity criteria and the newness criterion.

With respect to the cost criterion, the applicant provided an analysis to demonstrate that KTE-C19 meets the cost criterion. The applicant used the 2014 and 2015 100 Percent Inpatient Standard Analytic File (SAF) to assess the MS-DRGs that are most relevant to patients that may be potentially eligible for treatment using KTE-C19. The sample was restricted to patients discharged in FY 2015. The applicant searched for cases with an ICD-9-CM diagnosis code from the series of 200.7x (large cell lymphoma).

The applicant sought to ensure that claims included in the cost criterion analysis reflected charges for treating patients diagnosed with DLBCL and, therefore, minimized the chance that charges were related to other conditions. Therefore, the applicant searched for cases with the following criteria:

- A primary diagnosis with a ICD-9-CM diagnosis code from the series of 200.7x (large cell lymphoma) to identify

cases of DLBCL with or without chemotherapy; or

- A secondary diagnosis with a ICD-9-CM diagnosis code from the series of 200.7x (large cell lymphoma) combined with an ICD-9-CM diagnosis code of V58.11, or V58.12, or ICD-9-CM procedure code 99.25, 99.28, 00.15 or 00.10 to identify cases of DLBCL that received chemotherapy during their hospitalization.

The applicant excluded claims where the MS-DRG was missing, Medicare was not the primary payer, there were zero covered charges or zero covered days, or the provider was not in the FY 2017 IPPS/LTCH PPS Final Rule Impact File. Additionally, patients under age 18 were excluded to align with the proposed label that is being prepared for submission with the KTE-C19 Biologics License Application (BLA). After applying the trims above, the results showed 762 cases that mapped to 50 MS-DRGs with 11 MS-DRGs containing more than 10 cases. The 11 MS-DRGs contained a total of 702 cases.

The applicant noted that MS-DRGs 840, 841, 846, and 847 accounted for 554 (73 percent) of the 762 cases in the cohort.

Using the 702 identified cases, the average unstandardized case-weighted charge per case was \$71,725. The applicant then standardized the charges. The applicant noted that adult patients with relapsed/refractory aggressive B-cell NHL who are ineligible for ASCT would generally not be receiving treatment with both chemotherapy and KTE-C19. Therefore, all charges listed in the chemotherapy revenue centers (331, 332, and 335) were removed. The applicant then applied the 2-year inflation factor of 1.098446 from the FY 2017 IPPS/LTCH final rule (81 FR 57286) to inflate the charges from FY 2015 to FY 2017. Based on the FY 2017 IPPS/LTCH PPS Table 10 thresholds, the average case-weighted threshold amount was \$55,023. The inflated average case-weighted standardized charge per case was \$69,826. Because the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount, the applicant maintained that the technology meets the cost criterion. The applicant noted that it was not necessary to take into account the average per patient cost of the technology because the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount without the average per patient cost of the technology.

The applicant provided the following three sensitivity analyses to further demonstrate that the technology meets

the cost criterion. The three sensitivity analyses consisted of: (1) cases representing patients identified with an ICD-9-CM diagnosis code 200.7x (large cell lymphoma) and cases representing patients identified with a secondary DLBCL diagnosis who did not receive chemotherapy; (2) cases representing patients identified with a primary or secondary ICD-9-CM diagnosis code from the series of 200.7x (large cell lymphoma) who received chemotherapy; and (3) cases representing patients under a broader ICD-9-CM diagnosis code range to capture other types of lymphoma. In all three of the sensitivity analyses, the inflated average case-weighted standardized charge per case exceeded the average case-weighted threshold amount. We are inviting public comments on whether KTE-C19 meets the cost criterion.

According to the applicant, KTE-C19 represents a substantial clinical improvement over existing technologies used in the treatment of patients with aggressive B-cell NHL. The applicant asserted that KTE-C19 can benefit the patient population with the highest unmet need, patients with refractory or relapsed disease after failure of first-line or second-line therapy, and patients who have failed or are ineligible for ASCT. These patients otherwise have adverse outcomes as demonstrated by historical control data.

Regarding clinical data for KTE-C19, the applicant stated that historical control data was the only ethical and feasible comparison information for these chemorefractory, aggressive NHL patients who have no other available treatment options and have a very short lifespan without therapy. According to the applicant, based on meta-analysis of outcomes in chemorefractory DLBCL, there are no curative options for aggressive B-cell NHL patients regardless of refractory subgroup, line of therapy, and disease stage with their median overall survival being 6.6 months.

The applicant provided clinical data from the pivotal Study 1 (ZUMA-1, KTE-C19-101), Phase I and II. The applicant also provided supportive evidence from Study 2 (NCI 009-C-0082). Study 1 is a Phase I-II multicenter, open label study evaluating the safety and efficacy of the use of KTE-C19 in patients diagnosed with aggressive refractory NHL. The trial consists of two distinct phases designed as Phase I (n=7) and Phase II (n=92). Phase II is a multi-cohort open label study evaluating the efficacy of KTE-C19. Study 1 subjects were treated with cyclophosphamide and fludarabine

conditioning chemotherapy, followed by a target dose of 2×10^6 anti-CD19 CAR T-cells per kg body weight. Study 2 subjects were treated with cryopreserved autologous anti-CD19 CAR T cells, which were manufactured by a similar, but different process than that used for KTE-C19. The applicant noted that, as of the analysis cutoff date for the interim analysis, the results of Study 1 demonstrated rapid and substantial improvement in objective, or overall response rate. The overall response rate was 79 percent (49 responders among 62 subjects), with 76 percent overall response rate in Cohort 1 (39 responders among 51 subjects) and 91 percent in Cohort 2 (10 responders among 11 subjects) versus historical control of 26 percent. According to the applicant, Study 1 overall response rates were consistent across all age groups, with those patients greater than 65 years of age responding at the rates consistent with those under age 65 years and consistent with earlier, positive results from Study 2. The applicant further stated that pre-specified criteria for demonstration of early efficacy were met and an independent safety monitoring board (DSMB) confirmed the efficacy results and found no additional safety signals.

The applicant further stated that evidence of substantial improvement regarding the efficacy of KTE-C19 for the treatment of chemorefractory, aggressive B-cell NHL is supported by the complete response rates of KTE-C19 in Study 1 (52 percent) versus the historical control (8 percent). Additionally, the applicant noted that the results of Study 1 have demonstrated that treated patients experienced a rapid response to KTE-C19 with 52 percent showing complete response at 3 months, and 41 percent at 1 month.

As noted above, the applicant cited data results from Study 2, which is an ongoing Phase 1 safety and efficacy study in which anti-CD19 CAR T-cells were manufactured using a process similar to, but different from, KTE-C19 to yield cryopreserved autologous anti-CD19 CAR T cells. From Study 2, a subset of 13 patients with a diagnosis of DLBCL/PMBC was noted to be comparable to those treated in Study 1. The applicant noted that all patients were diagnosed with refractory DLBCL, received similar doses of conditioning chemotherapy, and were infused with the cryopreserved autologous anti-CD19 CAR T-cells (which have been shown to result in an immunotherapy comparable to KTE-C19). The applicant noted that the results from Study 2 demonstrated the following: (a) an overall response

rate of 69 percent (9 responders among 13 patients) (95 percent CI 38.6, 90.9); (b) 47 percent of patients had complete response at month 3 (ongoing 6+ to 20+ months); and (c) complete response was observed as early as 1 month in 57 percent of patients in Study 2. According to the applicant, further results will be reported in February 2017.

The applicant also cited safety results from the pivotal Study 1, Phase II. According to the applicant, almost all patients in Study 1 (95 percent) experienced Grade 3 or higher adverse events with onset on or after commencement of conditioning chemotherapy, including cytopenias (Grade 3 and 4 anemia, neutropenia, thrombocytopenia, and lymphopenia were 40 percent, 40 percent, 29 percent, and 5 percent respectively), and infection (Grade 3 or worse urinary tract infection, clostridium difficile colitis and lung infection were 5 percent, 5 percent, and 6 percent respectively). All patients were treated according to standard of care. The clinical trial protocol stipulated that patients were infused with KTE-C19 in the hospital inpatient setting and were monitored in the inpatient setting for at least 7 days for early identification and treatment of KTE-C19 related toxicities, which primarily include cytokine release syndrome and neurotoxicities. The applicant stated that KTE-C19 is expected to be administered in the hospital inpatient setting to assure appropriate monitoring of patient adverse events. The applicant noted that the interim analysis of Study 1 showed the following: length of stay following KTE-C19 infusion was a median of 15 days; cytokine release syndrome (Grade 3 or higher, 18 percent) and neurotoxicity (Grade 3 or higher, 34 percent) were self-limiting and generally reversible; two patients died from KTE-C19 related adverse events (hemophagocytic lymphohistiocytosis and cardiac arrest in the setting of cytokine release syndrome). The medications most often used to treat KTE-C19 clinical trial complications included growth factors, blood products, anti-infectives, steroids, tocilizumab, and vasopressors. In the majority of patients (92 percent), the applicant noted that predominant toxicities associated with the use of KTE-C19, cytokine release syndrome and neurologic events, resolved by data cutoff. Median days to resolution of cytokine release syndrome complications post-KTE-C19 infusion was 9 days, with median days to resolution of KTE-C19-related

neurologic events post-KTE-C19 infusion of 18 days. According to the applicant, there were no clinically important differences in adverse event rates across age groups (younger than 65; 65 or older), including cytokine release syndrome and neurotoxicity, and KTE-C19-related adverse events in Study 1 were consistent with the earlier Study 2 experience.

The applicant further noted that by the cutoff date for the interim analysis of Study 1, among all KTE-C19 treated patients, 12 patients in Study 1, Phase II, including 10 from Cohort 1 and 2 from Cohort 2, died. Eight of these deaths were due to disease progression. One subject had disease progression after KTE-C19 treatment and subsequently had ASCT. After ASCT, the subject died due to sepsis. Two subjects (3 percent) died due to KTE-C19 related AEs (Grade 5 hemophagocytic lymphohistiocytosis event and Grade 5 anoxic brain injury), and one died due to an AE deemed unrelated to KTE-C19 (Grade 5 pulmonary embolism), without disease progression.

We are concerned that there are no published results showing any survival benefit from the treatment. We also are concerned with the limited number of subjects (n=82) that were studied after infusion of KTE-C19 T-cell immunotherapy. Although the applicant references Study 2, we are concerned that the applicant has included data on DLBCL/PMBCL patients that did not specifically receive KTE-C19. Additionally, we are concerned that Study 2 was based on 13 patients which can result in skewed outcomes due to a small patient population. Finally, we note that, for Study 1 and Study 2, the data on overall survival are not reported.

We are inviting public comments on whether KTE-C19 meets the substantial clinical improvement criterion.

Comment: The applicant stated that it has been notified by the United States Adopted Names Council (USAN Council) that the technology's name for KTE-C19 has been revised from "axicabtagene ciloretroleucel" to "axicabtagene ciloleucel." In addition, the applicant requested that all references by CMS to the technology's name of KTE-C19 use this final naming convention of "axicabtagene ciloleucel."

Response: We appreciate the applicant's updated information and have correlated the name of the technology throughout the discussion above.

e. VYXEOS™ (Cytarabine and Daunorubicin Liposome for Injection)

Celator Pharmaceuticals, Inc. submitted an application for new technology add-on payments for VYXEOS™ for FY 2018. The proposed indication for the use of VYXEOS™, which has not received FDA approval as of the time of the development of this proposed rule, is the treatment of adult patients diagnosed with acute myeloid leukemia (AML).

AML is a type of cancer in which the bone marrow makes abnormal myeloblasts (immature bone marrow white blood cells), red blood cells, and platelets. If left untreated, AML progresses rapidly. Normally, the bone marrow makes blood stem cells that develop into mature blood cells over time. Stem cells have the potential to develop into many different cell types in the body. Stem cells can act as an internal repair system, dividing, essentially without limit, to replenish other cells. When a stem cell divides, each new cell has the potential to either remain a stem cell or become a specialized cell, such as a muscle cell, a red blood cell or a brain cell, etc. A blood stem cell may become a myeloid stem cell or a lymphoid stem cell. Lymphoid stem cells become white blood cells. A myeloid stem cell becomes one of three types of mature blood cells: (1) red blood cells that carry oxygen and other substances to body tissues; (2) white blood cells that fight infection; or (3) platelets that form blood clots and help to control bleeding. In patients diagnosed with AML, the myeloid stem cells usually become a type of myeloblast. The myeloblasts in patients diagnosed with AML are abnormal and do not become healthy white blood cells. Sometimes in patients diagnosed with AML, too many stem cells become abnormal red blood cells or platelets. These abnormal cells are called leukemia cells or blasts.

AML is defined by the World Health Organization (WHO) as >20 percent blasts in the bone marrow or blood. AML can also be diagnosed if the blasts are found to have a chromosome change that occurs only in a specific type of AML, even if the blast percentage does not reach 20 percent. Leukemia cells can build up in the bone marrow and blood, resulting in less room for healthy white blood cells, red blood cells, and platelets. When this occurs, infection, anemia, or increased risk for bleeding may result. Leukemia cells can spread outside the blood to other parts of the body, including the central nervous system (CNS), skin, and gums.

Treatment of AML diagnoses usually consists of two phases; remission induction and post-remission therapy. Phase one, remission induction, is aimed at eliminating as many myeloblasts as possible. The most common used remission induction regimens for AML diagnoses are the "7+3" regimens using an antineoplastic and an anthracycline. Cytarabine and daunorubicin are two commonly used drugs for "7+3" remission induction therapy. Cytarabine is continuously administered intravenously over the course of 7 days, while daunorubicin is intermittently administered intravenously for the first 3 days. The "7+3" regimen typically achieves a 70 to 80 percent complete remission (CR) rate in most patients under 60 years of age.

High rates of CR are not generally seen in older patients for a number of reasons, such as different leukemia biology, much higher incidence of adverse cytogenetic abnormalities, higher rate of multidrug resistant leukemic cells, and comparatively lower patient performance status (the standard criteria for measuring how the disease impacts a patient's daily living abilities). Intensive induction therapy has worse outcomes in this patient population.²⁷ The applicant asserted that many older adults diagnosed with AML have a poor performance status²⁸ at presentation and multiple medical comorbidities that make the use of intensive induction therapy quite difficult or contraindicated altogether. Moreover, the CR rates of poor-risk patients diagnosed with AML are substantially higher in patients >60 years old; owing to a higher proportion of secondary AML, disease developing in the setting of a prior myeloid disorder, or prior cytotoxic chemotherapy. Therefore, less than half of older adults diagnosed with AML achieve CR with combination induction regimens.²⁹

The combination of cytarabine and an anthracycline, either as "7+3" regimens or as part of a different regimen incorporating other cytotoxic agents, may be used as so-called "salvage" induction therapy in the treatment of adults diagnosed with AML who experience relapse in an attempt to

²⁷ Juliusson G, Lazarevic V, Horstedt AS, Hagberg O, Hoglund M. Acute myeloid leukemia in the real world: why population-based registries are needed. *Blood*. 2012 Apr 26; 119(17):3890–9.

²⁸ Stone RM, et al. (2004). Acute myeloid leukemia. *Hematology Am Soc Hematol Educ Program*. 2004:98–117.

²⁹ Appelbaum FR, Gundacker H, Head DR. "Age and acute myeloid leukemia." *Blood* 2006; 107:3481–3485.

achieve CR. According to the applicant, while CR rates of success vary widely depending on underlying disease biology and host factors, there is a lower success rate overall in achievement of CR with “7+3” regimens compared to VYXEOS™ therapy. In addition, “7+3” regimens produce a CR rate of approximately 50 percent in younger adult patients who have relapsed, but were in CR for at least 1 year.³⁰

VYXEOS™ is a nano-scale liposomal formulation containing a fixed combination of cytarabine and daunorubicin in a 5:1 molar ratio. This formulation was developed by the applicant using a proprietary system known as CombiPlex. According to the applicant, CombiPlex addresses several fundamental shortcomings of conventional combination regimens, specifically the conventional “7+3” free drug dosing, as well as the challenges inherent in combination drug development, by identifying the most effective synergistic molar ratio of the drugs being combined *in vitro*, and fixing this ratio in a nano-scale drug delivery complex to maintain the optimized combination after administration and ensuring exposure of this ratio to the tumor.

Cytarabine and daunorubicin are co-encapsulated inside the VYXEOS™ liposome at a fixed ratiometrically, optimized 5:1 cytarabine:daunorubicin molar ratio. According to the applicant, encapsulation maintains the synergistic ratios, reduces degradation, and minimizes the impact of drug transporters and the effect of known resistant mechanisms. The applicant stated that the 5:1 molar ratio has been shown, *in vitro*, to maximize synergistic antitumor activity across multiple leukemic and solid tumor cell lines, including AML, and in animal model studies to be optimally efficacious compared to other cytarabine:daunorubicin ratios. In addition, the applicant stated that in clinical studies, the use of VYXEOS™ has demonstrated consistently more efficacious results than the conventional “7+3” free drug dosing. VYXEOS™ is intended for intravenous administration after reconstitution with 19 mL sterile water for injection. VYXEOS™ is administered as a 90-minute intravenous infusion on days 1, 3, and 5 (induction therapy), as compared to the “7+3” free drug dosing, which consists of two individual drugs

administered on different days, including 7 days of continuous infusion.

With regard to the “newness” criterion, the applicant indicated that the rolling New Drug Application (NDA) submission to the FDA for VYXEOS™ began on September 30, 2016. The applicant stated that it intends to request Priority Review from the FDA. VYXEOS™ is currently available in the United States only on an investigational basis, under an Investigational New Drug (IND) designation. Breakthrough Therapy designation was granted on May 19, 2016, for the treatment of adults diagnosed with therapy-related AML (t-AML) or AML with myelodysplasia-related changes (AML-MRC). Fast Track designation was granted by the FDA in January 2015 for the treatment of elderly patients diagnosed with secondary AML. Orphan Drug designation was granted by the FDA on August 22, 2008, for the treatment of acute AML. VYXEOS™ had not received pre-market (PMA) approval from the FDA at the time of development of this proposed rule. However, the applicant anticipates receiving approval from the FDA by July 1, 2017. The applicant also has submitted a request for a unique ICD-10-PCS code, beginning with FY 2018.

As discussed earlier, if a technology meets all three of the substantial similarity criteria, it would be considered substantially similar to an existing technology and would not be considered “new” for purposes of new technology add-on payments.

With regard to the first criterion, whether a product uses the same or a similar mechanism of action to achieve a therapeutic outcome, the applicant asserted that VYXEOS™ does not use the same or similar mechanism of action to achieve a therapeutic outcome as any other drug assigned to the same or a different DRG. The applicant stated that no other AML treatment is designed, nor is able, to deliver a fixed, ratiometrically optimized and synergistic drug:drug ratio of 5:1 cytarabine to daunorubicin, and selectively target and accumulate at the site of malignancy, while minimizing unwanted exposure, which the applicant based on the data results of preclinical and clinical studies of the use of VYXEOS™. The applicant indicated that VYXEOS™ is a nano-scale liposomal formulation of a fixed combination of cytarabine and daunorubicin. Further, the applicant stated that the rationale for the development of VYXEOS™ is based on prolonged delivery of synergistic drug ratios utilizing the applicant's proprietary, ratiometric CombiPlex technology. According to the applicant, conventional “7+3” free drug dosing has

no delivery complex, and these individual drugs are administered without regard to their ratio dependent interaction. According to the applicant, enzymatic inactivation and imbalanced drug efflux and transporter expression reduce drug levels in the cell. Decreased cytotoxicity leads to cell survival, emergence of drug resistant cells, and decreased overall survival.

The applicant provided the results of clinical studies to demonstrate that the CombiPlex technology and the ratiometric dosing of VYXEOS™ represent a shift in anticancer agent delivery, whereby the fixed, optimized dosing provides less drug to achieve improved efficacy, while maintaining a favorable risk-benefit profile. The results of this ratiometric dosing approach are in contrast to the typical combination chemotherapy development that establishes the recommended dose of one agent and then adds subsequent drugs to the combination at increasing concentrations until the aggregate effects of toxicity are considered to be limiting (the “7+3” drug regimen). According to the applicant, this current approach to combination chemotherapy development assumes that maximum therapeutic activity will be achieved with maximum dose intensity for all drugs in the combination, and ignores the possibility that more subtle concentration-dependent drug interactions could result in frankly synergistic outcomes.

The applicant maintained that, while VYXEOS™ contains no novel active agents, its innovative drug delivery mechanism appears to be a superior way to deliver the two active compounds in an effort to optimize their efficacy in killing leukemic blasts. However, we are concerned it is possible that VYXEOS™ may use a similar mechanism of action compared to current treatment because both the current treatment regimen and VYXEOS™ are used in the treatment of AML by intravenous administration of cytarabine and daunorubicin.

With respect to the second criterion, whether a product is assigned to the same or a different MS-DRG, the applicant maintained that based on the 2014 and 2015 100 Percent Inpatient Standard Analytic files, cases representing patients potentially eligible for treatment using VYXEOS™ and the target patient population span 134 unique MS-DRGs, and 78 percent of all of the cases within these 134 unique MS-DRGs map to the following 4 MS-DRGs: 834 (Acute Leukemia Without Major O.R. Procedure With MCC), 837 (Chemotherapy With Acute Leukemia as SDX or With High Dose Chemotherapy

³⁰ Kantarjian H, Rayandi F, O'Brien S *et al.*

“Intensive chemotherapy does not benefit most older patients (age 70 years and older) with acute myeloid leukemia.” *Blood* 2010; 116(22):4422.

Agent with MCC), 838 (Chemotherapy With Acute Leukemia as SDX With CC or High Dose Chemotherapy Agent), and 839 (Chemotherapy With Acute Leukemia as SDX Without CC/MCC). We believe that these are the same MS-DRGs that identify cases representing patients who are treated for AML.

With respect to the third criterion, whether the new use of the technology involves the treatment of the same or similar type of disease and the same or similar patient population, the applicant asserted that VYXEOS™ is indicated for the use in patients diagnosed with high-risk AML. However, we believe that VYXEOS™ involves the treatment of the same patient population as other AML treatment therapies.

We are inviting public comments on whether VYXEOS™ is substantially similar to existing technology, including whether the mechanism of action of VYXEOS™ differs from the mechanism of action of the current treatment regimen. We also are inviting public comments on whether VYXEOS™ meets the newness criterion.

With regard to the cost criterion, the applicant conducted the following analysis. The applicant used the 2014 and 2015 100 Percent Inpatient Standard Analytic Files (SAFs) to assess the MS-DRGs assigned for hospitalizations most likely to represent patients that may be eligible for treatment with VYXEOS™. The sample of claims was limited to discharges occurring in FY 2015 (that is, from October 1, 2014 to September 30, 2015).

The applicant identified patients as potential VYXEOS™ candidates by searching for cases indicating a diagnosis of AML. Specifically, the applicant searched for cases that met the following criteria:

- Had an ICD-9-CM diagnosis code of 205.00 (Acute myeloid leukemia, without mention of having achieved remission), or 205.02 (Acute myeloid leukemia, in relapse); or
- The patient received chemotherapy during their hospital stay as indicated by the following principal/secondary ICD-9-CM diagnosis codes or ICD-9-CM procedure codes: V58.11 (Encounter for antineoplastic chemotherapy); V58.12 (Encounter for antineoplastic immunotherapy); 00.10 (Implantation of chemotherapeutic agent); 00.15 (High-Dose infusion interleukin-2); 99.25 (Injection or Infusion of cancer chemotherapeutic substance); or 99.28 (Injection or infusion of biological response modifier as an antineoplastic agent); and
- Excluded cases that had a bone marrow transplant based on the following ICD-9-CM procedure codes:

41.00 (Bone marrow transplant, not otherwise specified); 41.01 (Autologous bone marrow transplant without purging); 41.02 (Allogeneic bone marrow transplant with purging); 41.03 (Allogeneic bone marrow transplant without purging); 41.04 (Autologous hematopoietic stem cell transplant without purging); 41.05 (Allogeneic hematopoietic stem cell transplant without purging); 41.06 (Cord blood stem cell transplant); 41.07 (Autologous hematopoietic stem cell transplant with purging); 41.08 (Allogeneic hematopoietic stem cell transplant); and 41.09 (Autologous bone marrow transplant with purging).

According to the applicant, the eligible cases span 134 unique MS-DRGs, 14 of which contain more than 10 cases. The most common MS-DRGs are MS-DRGs 834, 837, 838, and 839. These 4 MS-DRGs account for 3,601 (78 percent) of the 4,613 potential eligible cases.

Using the 4,613 identified cases, the average unstandardized case-weighted charge per case was \$203,234. The applicant then standardized the charges. The applicant removed charges for the current treatment. The applicant then applied the 2-year inflation factor of 1.098446 from the FY 2017 IPPS/LTCH final rule (81 FR 57286) to inflate the charges from FY 2015 to FY 2017. Based on the FY 2017 IPPS/LTCH PPS Table 10 thresholds, the average case-weighted threshold amount was \$84,639. The inflated average case-weighted standardized charge per case was \$178,392. Because the inflated average case-weighted standardized charge per case exceeds the average case-weighted threshold amount, the applicant maintained that the technology meets the cost criterion.

The applicant noted that the average case-weighted standardized charge per case for the applicable MS-DRGs exceeds the average case-weighted threshold amount without taking into account the average per patient cost of the technology to the hospital. Therefore, the analysis above did not include the cost of VYXEOS™.

As previously stated, according to the applicant, the potentially eligible cases used for the cost criterion analysis included patients diagnosed with AML who received chemotherapy during their hospital stay, but did not receive a bone marrow transplant. The applicant asserted that this patient cohort is inclusive of all likely potential patients that may be eligible for treatment using VYXEOS™. The applicant conducted the same analysis, but excluded all pharmacy and IV therapy charges. Additionally, to test

the sensitivity of cohort specification, the applicant conducted the following four additional sensitivity analyses that used alternative cohort definitions: (1) Included AML cases with ICD-9-CM diagnosis code 205.00 and chemotherapy; (2) included AML cases with ICD-9-CM diagnosis code 205.02 and chemotherapy; (3) included cases with AML principal diagnosis and chemotherapy; and (4) included AML cases without requiring chemotherapy. In all of these analyses, the inflated average case-weighted standardized charge per case exceeded the average case-weighted threshold amount. We are inviting public comments whether VYXEOS™ meets the cost criterion.

With regard to substantial clinical improvement, according to the applicant, clinical data results have shown that the use of VYXEOS™ represents a substantial clinical improvement for the treatment of AML in newly diagnosed high-risk, older (60 years and older) patients, marked by statistically significant improvements in overall survival, event free survival and response rates, and in relapsed patients age 18 to 65 years of age, where a statistically significant improvement in overall survival was documented for the poor-risk subset of patients as defined by the European Prognostic Index. In both groups of patients, the applicant stated that there was significant improvement in survival for the high-risk patient group. The applicant provided the following specific clinical data results.

- The applicant stated the clinical data results show that treatment with VYXEOS™ in older patients (60 years of age and older) diagnosed with untreated, high-risk AML will result in superior survival rates, as compared to patients treated with conventional “7+3” free drug dosing. The applicant provided a summary of the pivotal Phase III Study 301 in which 309 patients were enrolled, with 153 patients randomized to the VYXEOS™ arm and 156 to the “7+3” free drug dosing arm. Among patients aged 60 to 69 years, there were 96 patients in the VYXEOS™ arm and 102 in the “7+3” free drug dosing arm; for patients aged 70 to 75 years, there were 57 and 54 patients in each arm, respectively. The applicant noted that the data results from the Phase III Study 301 demonstrated that first-line treatment of patients diagnosed with high-risk AML in the VYXEOS™ arm resulted in substantially greater median overall survival of 9.56 months versus 5.95 months in the “7+3” free drug dosing arm (hazard ratio of 0.69; $p=0.005$).

• The applicant further asserted that high-risk, older patients (60 years of age and older) previously untreated for diagnoses of AML will have a lower risk of early death when treated with VYXEOS™ than those treated with the conventional “7+3” free drug dosing. The applicant cited Medeiros, et al. 2015,³¹ which reported a large observational study of Medicare beneficiaries and noted the following: The data result of the study showed that 50 to 60 percent of elderly patients diagnosed with AML remain untreated following diagnosis; treated patients were more likely younger, male, and married, and less likely to have secondary diagnoses of AML, poor performance indicators, and poor comorbidity scores compared to untreated patients; and in multivariate survival analyses, treated patients exhibited a significant 33 percent lower risk of death compared to untreated patients.

Based on data from the Phase III Study 301,³² the applicant cited the following results: The rate of 60-day mortality was less in the VYXEOS™ arm (13.7 percent) versus the “7+3” free drug dosing arm (21.2 percent); the reduction in early mortality was due to fewer deaths from refractory AML (3.3 percent versus 11.3 percent), with very similar rates of 60-day mortality due to adverse events (10.4 percent versus 9.9 percent); there were fewer deaths in the VYXEOS™ arm versus the “7+3” free drug dosing arm during the treatment phase (7.8 percent versus 11.3 percent); and there were fewer deaths in the VYXEOS™ arm during the follow-up phase than in the “7+3” free drug dosing arm (59.5 percent versus 71.5 percent).

• The applicant asserted that high-risk, older patients (60 years of age and older) previously untreated for a diagnosis of AML exhibited statistically significant improvements in response rates after treatment with VYXEOS™ versus treatment with the conventional “7+3” free drug chemotherapy dosing, suggesting that the use of VYXEOS™ is a superior pre-transplant induction treatment versus “7+3” free drug dosing. Restoration of normal hematopoiesis is the ultimate goal of any therapy for AML diagnoses. The

first phase of treatment consists of induction chemotherapy, in which the goal is to “empty” the bone marrow of all hematopoietic elements (both benign and malignant), and to allow repopulation of the marrow with normal cells, thereby yielding remission. According to the applicant, post-induction response rates were significantly higher following the use of VYXEOS™, which elicited a 47.7 percent total response rate and a 37.3 percent rate for CR, whereas the total response and CR rates for the “7+3” free drug dosing arm were 33.3 percent and 25.6 percent, respectively. The CR + CRi rates for patients aged 60 to 69 years were 50.0 percent in the VYXEOS™ arm and 36.3 percent in the “7+3” free drug dosing arm, with an odds ratio of 1.76 (95 percent CI, 1.00–3.10). For patients aged 70 to 75, the rates of CR + CRi were 43.9 percent in the VYXEOS™ arm and 27.8 percent in the “7+3” free drug dosing arm.

• The applicant asserted that VYXEOS™ treatment will enable high-risk, older patients (60 years of age and older) to bridge to allogeneic transplant, and VYXEOS™ responding patients will have markedly better outcomes following transplant. The applicant stated that diagnoses of secondary AML are considered incurable with standard chemotherapy approaches and, as with other high-risk hematological malignancies, transplantation is a useful treatment alternative. The applicant further stated that autologous HSCT has limited effectiveness and at this time, only allogeneic HSCT with full intensity conditioning has been reported to produce long-term remissions. However, the applicant stated that the clinical study by Medeiros et al., 2015, reported that, while the use of allogeneic HSCT is considered a potential cure for AML, its use is limited in older patients because of significant baseline comorbidities and increased transplant-related morbidity and mortality. Patients in either arm of the Phase III Study 301 responding to induction with a CR or CR+CRi (n=125) were considered for allogeneic hematopoietic cell transplant (HCT) when possible. In total, 91 patients were transplanted: 52 (34 percent) from the VYXEOS™ arm and 39 (25 percent) from the “7+3” free drug dosing arm. Patient and AML characteristics were similar according to randomized arm, including percentage of patients in each arm that underwent transplant in CR+CRi status. However, the applicant noted that the VYXEOS™ arm contained a higher percentage of older patients (aged 70 or greater) who were transplanted (VYXEOS™, 31

percent; “7+3” free drug dosing, 15 percent).³³

According to the applicant, patient outcome following transplant strongly favored patients in the VYXEOS™ arm. The Kaplan-Meier analysis of the 91 transplanted patients landmarked at the time of HCT showed that patients in the VYXEOS™ arm had markedly better overall survival (hazard ratio 0.46; $p=0.0046$). The time-dependent Adjustment Model (Cox proportional hazard ratio) was used to evaluate the contribution of VYXEOS™ to overall survival rate after adjustment for transplant and showed that VYXEOS™ remained a significant contributor, even after adjusting for transplant. The time-dependent Cox hazard ratio for overall survival rates in the VYXEOS™ arm versus the “7+3” free drug dosing arm was 0.51 (95 percent CI, 0.35–0.75; $P=.0007$).

• The applicant asserted that VYXEOS™ treatment of previously untreated older patients (60 years of age and older) diagnosed with high-risk AML increases the response rate and improves survival compared to conventional “7+3” free drug dosing in patients diagnosed with FLT3 mutation. The applicant noted the following: approximately 20 to 30 percent of AML patients harbor some form of FLT3 mutation, AML patients with a FLT3 mutation have a higher relapse rate and poorer prognosis than the overall population diagnosed with AML, and the most common type of mutation is internal tandem duplication (ITD) mutation localized to a membrane region of the receptor.

The applicant cited Gordon et al., 2016,³⁴ which reported on the significant anti-leukemic activity of VYXEOS™ in AML blasts exhibiting high-risk characteristics, including FLT3-ITD, that are typically associated with poor outcomes when treated with conventional “7+3” free drug dosing. To determine whether the improved complete remission and overall survival rates of VYXEOS™ as compared to conventional “7+3” free drug dosing are attributable to liposome-mediated altered drug PK or direct cellular interactions with specific AML blast samples, the authors evaluated cytotoxicity in 53 AML patient specimens. Cytotoxicity results were correlated with patient characteristics,

³² Lancet J, et al. (2016). Final results of a Phase III randomized trial of VYXEOS (CPX–351) versus 7+3 in older patients with newly diagnosed, high-risk (secondary) AML. Abstract and oral presentation at American Society of Clinical Oncology (ASCO), June 2016.

³³ Stone Hematology 2004; Gordon AACR 2016; NCI, cancer.gov.

³⁴ Gordon M, Tardi P, Lawrence MD et al. “CPX–351 cytotoxicity against fresh AML blasts increased for FLT3–ITD+ cells and correlates with drug uptake and clinical outcomes.” Abstract 287 and poster presented at AACR (American Association for Cancer Research). April 2016.

as well as VYXEOS™ cellular uptake and molecular phenotype status including FLT3-ITD, which is a predictor of poor patient outcomes to conventional “7+3” free drug dosing. The applicant stated that a notable result from this research was the observation that AML blasts exhibiting the FLT3-ITD phenotype exhibited some of the lowest IC₅₀ (the 50 percent inhibitory concentration) values and, as a group, were five-fold more sensitive to VYXEOS™ than those with wild type FLT3. In addition, there was evidence that increased sensitivity to VYXEOS™ was associated with increased uptake of the drug-laden liposomes by the patient-derived AML blasts. The applicant noted that Gordon, et al. 2016,³⁵ concluded taken together, the data are consistent with clinical observations where VYXEOS™ retains significant anti-leukemic activity in AML patients exhibiting high-risk characteristics. The applicant also noted that a sub analysis of Phase III Study 301 identified 22 patients diagnosed with FLT3 mutation in the VYXEOS™ arm and 20 in the “7+3” free drug dosing arm, which resulted in the following response rates of FLT3 mutated patients, which were higher with VYXEOS™ (15 of 22, 68.2 percent) versus “7+3” free drug dosing (5 of 20, 25.0 percent); and the Kaplan-Meier analysis of the 42 FLT3 mutated patients showed that patients in the VYXEOS™ arm had a trend towards better overall survival rates (hazard ratio 0.57; *p*=0.093).

- The applicant asserted that younger patients (18 to 65 years of age) with poor risk first relapse AML have shown higher response rates with VYXEOS™ versus conventional “salvage” chemotherapy. Overall, the applicant stated that the use of VYXEOS™ had an acceptable safety profile in this patient population based on 60-day mortality data. Study 205³⁶ was a randomized study comparing VYXEOS™ against the investigator’s choice of first “salvage” chemotherapy in patients diagnosed with relapsed AML after a first remission lasting greater than 1 month (VYXEOS™ arm, *n*=81 and “7+3” free drug dosing arm, *n*=44; ages 18 to 65 year of age). Investigator’s choice was almost always based on cytarabine + anthracycline, usually with the addition of one or two new agents. According to the applicant, VYXEOS™ demonstrated a higher rate of morphological leukemia clearance among all patients, 43.2

percent versus 40.0 percent, and the advantage was most apparent in poor-risk patients, 78.7 percent versus 44.4 percent, as defined by the European Prognostic Index (EPI). In the subset analysis of this EPI poor-risk patient subset, the applicant stated there was a significant improvement in survival rate (6.6 versus 4.2 months median, hazard ratio=0.55, *p*=0.02) and improved response rate (39.3 percent versus 27 percent). The applicant also noted the following: the safety profile for the use of VYXEOS™ was qualitatively similar to that of control “salvage” therapy, with nearly identical 60-day mortality rates (14.8 percent versus 15.9 percent); among VYXEOS™ treated patients, those with no history of prior HSCT (*n*=59) had higher response rates (54.2 percent versus 37.8 percent) and lower 60-day mortality (10.2 percent versus 16.2 percent); overall, the use of VYXEOS™ had acceptable safety based on 60-day mortality data, with somewhat higher frequency of neutropenia and thrombocytopenia-related grade 3–4 adverse events. Even though these patients are younger (18 to 65 years of age) than the population studied in Phase III Study 301 (60 years and older), Study 205 patients were at a later stage of disease and almost all had responded to first-line therapy (cytarabine + anthracycline) and had relapsed. The applicant also cited Cortes, et al. 2015,³⁶ which reported that patients diagnosed with first relapse AML have limited likelihood of response and short expected survival following “salvage” treatment with the results from literature showing that:

- Mitoxantrone, etoposide, and cytarabine induced response in 23 percent of patients, with median overall survival of only 2 months.
- Modulation of deoxycytidine kinase by fludarabine led to the combination of fludarabine and cytarabine, resulting in a 36 percent CR rate with median remission duration of 39 weeks.
- First salvage gemtuzumab ozogamicin induced CR+CRp (or CR+CRi) response in 30 percent of patients with CD33+ AML and, for patients with short first CR durations, appeared to be superior to cytarabine-based therapy.

The applicant noted that Study 205 results showed the use of VYXEOS™ retained greater anti-leukemic efficacy in patients diagnosed with poor-risk first relapse AML, and produced higher morphological leukemia clearance rates

(78.7 percent) compared to conventional “salvage” therapy (44 percent). The applicant further noted that, overall, the use of VYXEOS™ had acceptable safety profile in this patient population based on 60-day mortality data.

Based on all of the data presented above, the applicant concluded that VYXEOS™ represents a substantial clinical improvement over existing technologies. However, we are concerned that, although there was an improvement in a number of outcomes in Phase III Study 301, specifically overall survival rate, lower risk of early death, improved response rates, better outcomes following transplant, increased response rate and overall survival in patients diagnosed with FLT3 mutation, and higher response rates versus conventional “salvage” chemotherapy in younger patients diagnosed with poor-risk first relapse, the improved outcomes may not be statistically significant. Furthermore, we are concerned that the overall improvement in survival from 5.95 months to 9.56 months may not represent a substantial clinical improvement. In addition, the rate of adverse events in both arms of Study 205, given the theoretical benefit of reduced toxicity with the liposomal formulation, was similar for both the VYXEOS™ and “7+3” free drug treatment groups. Therefore, we also are concerned that there is a similar rate of adverse events, such as febrile neutropenia (68 percent versus 71 percent), pneumonia (20 percent versus 15 percent), and hypoxia (13 percent versus 15 percent), with the use of VYXEOS™ as compared with the conventional “7+3” free drug regimen.

We are inviting public comments on whether the VYXEOS™ meets the substantial clinical improvement criterion.

Below we summarize and respond to comments submitted on VYXEOS™ during the open comment period in response to the New Technology Town Hall meeting notice.

Comment: The applicant provided a written response regarding the definition of “free drug” as “Unbound drug pharmacology;” an active drug or other compound that is not bound to a carrier protein—for example, albumin or alpha-1-acid glycoprotein. The applicant explained that the term “free-drug dosing” is used to describe the two different non-encapsulated, separately administered drugs in the “7+3” free drug regimen (cytarabine and daunorubicin), each an unrestricted uniform aqueous solution of the drug in water for continuous administration of cytarabine and separate intravenous

³⁵ Cortes J, et al. (2011). Significance of prior HSCT on the outcome of salvage therapy with CPX-351 or conventional chemotherapy among first relapse AML patients. Abstract and poster presented at ASH 2011.

³⁶ Cortes J, et al. (2015). Phase II, multicenter, randomized trial of CPX-351 (cytarabine:daunorubicin) liposome injection versus intensive salvage therapy in adults with first relapse AML. *Cancer*. January 2015, 234–42.

administration of daunorubicin according to the “7+3” dosing schedule. The applicant then stated that the fixed molar drug ratio delivered by VYXEOS™ is not relevant to the conventional dosing of the two free drugs, cytarabine and daunorubicin. The applicant explained that the doses of cytarabine and daunorubicin used in the conventional “7+3” free drug dosing regimen were based on the maximum tolerated dose of the two agents, not on any concept related to a drug ratio that provides optimal synergy. Finally, the ratio of cytarabine and daunorubicin administered in free (non-liposomal) form is irrelevant because the administered ratio cannot be maintained when these drugs are infused separately. This is because the drugs will be distributed and eliminated differentially and independently of one another and the ratio will change rapidly and continuously. Consequently, according to the applicant, the inability to control drug ratios following administration in conventional dosage forms likely results in exposure of tumor cells to antagonistic drug ratios with a corresponding loss of therapeutic activity.

Response: We appreciate the applicant’s comments. We will take these comments into consideration when deciding whether to approve new technology add-on payments for VYXEOS™.

f. GammaTile™

Isoray Medical, Inc. & GammaTile, LLC submitted an application for new technology add-on payments for FY 2018 for the GammaTile™. The GammaTile™ is a brachytherapy technology for use in the treatment of patients diagnosed with brain tumors using cesium-131 radioactive sources embedded in a collagen matrix. GammaTile™ is designed to provide adjuvant radiation therapy to eliminate remaining tumor cells in patients who required surgical resection of brain tumors. According to the applicant, the GammaTile™ is a new vehicle of delivery for and inclusive of cesium-131 brachytherapy sources embedded within the product. The applicant stated that the technology has been manufactured for use in the setting of a craniotomy resection site where there is a high chance of local recurrence of a CNS or dual-based tumor. The applicant asserted that the use of GammaTile™ provides a new, unique modality for treating patients who require radiation therapy to augment surgical resection of malignancies of the brain. By offsetting the radiation sources with a 3mm gap of a collagen matrix, the applicant asserted

that the use of GammaTile™ resolves issues with “hot” and “cold” spots associated with brachytherapy, improves safety, and potentially offers a treatment option for patients with limited, or no other, available options. The GammaTile™ is biocompatible and bioabsorbable, and is left in the body permanently without need for future surgical removal. The applicant asserted that the commercial manufacturing of the product will significantly improve on the process of constructing customized implants with greater speed, efficiency, and accuracy than is currently available, and require less surgical expertise in placement of the radioactive sources, allowing a greater number of surgeons to utilize brachytherapy techniques in a wider variety of hospital settings.

The applicant for GammaTile™ has applied for FDA approval and anticipated FDA approval by the spring of 2017. In its application, the applicant indicated that it anticipated that the product would be approved by the FDA for use in both the primary and salvage treatment of radiosensitive malignancies of the brain. However, the applicant had not received FDA approval at the time of development of this proposed rule. In subsequent discussions with the applicant, the applicant indicated that it is only seeking FDA approval for use in the salvage treatment of recurrent radiosensitive malignancies of the brain. The applicant submitted a request for a unique ICD-10-PCS code for the administration of GammaTile™. If approved, the procedure codes will be effective October 1, 2017 (FY 2018).

As discussed earlier, if a technology meets all three of the substantial similarity criteria, it would be considered substantially similar to an existing technology and would not be considered “new” for purposes of new technology add-on payments.

With regard to the first criterion, whether a product uses the same or a similar mechanism of action to achieve a therapeutic outcome, the applicant stated that when compared to treatment using external beam radiation therapy, GammaTile™ uses a new and unique mechanism of action to achieve a therapeutic outcome. The applicant explained that the GammaTile™ is fundamentally different in structure, function, and safety from all external beam radiation therapies, and delivers treatment through a different mechanism of action. In contrast to external beam radiation modalities, the applicant further explained that the GammaTile™ is a form of internal radiation termed brachytherapy. Brachytherapy treatments are performed

using radiation sources positioned very close to the area requiring radiation treatment and only deliver radiation to the tissues that are immediately adjacent to the margin of the surgical resection. For this reason, brachytherapy is a current standard of care treatment for many non-central nervous system tumors, including breast, cervical, and prostate cancers.

Due to the custom positioning of the radiological sources and the use of the cesium-131 isotope, the applicant noted that the GammaTile™ focuses therapeutic levels of radiation on an extremely small area of the brain. Unlike all external beam techniques, the applicant stated that this radiation does not pass externally inward through the skull and healthy areas of the brain to reach the targeted tissue and, therefore, may limit neurocognitive deficits seen with the use of external beam techniques. Because of the rapid reduction in radiation intensity that is characteristic of cesium-131, the applicant asserted that the GammaTile™ can target the margin of the excision with greater precision than any alternative treatment option, while sparing healthy brain tissue from unnecessary and potentially damaging radiation exposure.

The applicant also stated that, when compared to other types of brain brachytherapy, GammaTile™ uses a new and unique mechanism of action to achieve a therapeutic outcome. The applicant explained that cancerous cells at the margins of a tumor resection cavity can also be irradiated with the placement of brachytherapy sources in the tumor cavity. However, the applicant asserted that the GammaTile™ is a pioneering form of brachytherapy for the treatment of brain tumors that uses the isotope cesium-131 embedded in a collagen implant that is customized to the geometry of the brain cavity. According to the applicant, use of cesium-131 and the custom distribution of seeds in a three-dimensional collagen device result in a unique and highly effective delivery of radiation therapy to brain tissue.

With regard to the second criterion, whether a product is assigned to the same or a different MS-DRG, GammaTile™ is a treatment option for patients diagnosed with brain tumors that progress locally after initial treatment with external beam radiation therapy, and cases representing patients that may be eligible for treatment involving this technology are assigned to the same MS-DRGs (MS-DRGs 25, 26, and 27 (Craniotomy & Endovascular Intracranial Procedure with MCC, with CC, and without CC/MCC), respectively)

as other current treatment forms of brachytherapy and external beam radiation therapy.

With regard to third criterion, whether the new use of the technology involves the treatment of the same or similar type of disease and the same or similar patient population, the applicant stated that the GammaTile™ offers a treatment option for a patient population with limited, or no other, available treatment options. The applicant explained that treatment options for patients diagnosed with brain tumors that progress locally after initial treatment with external beam radiation therapy are limited, and there is no current standard of care in this setting. According to the applicant, surgery alone for recurrent tumors may provide symptom relief, but does not remove all of the cancer cells. The applicant further stated that repeating external beam radiation therapy for adjuvant treatment is hampered by an increasing risk of brain injury because additional external beam radiation therapy will increase the total dose of radiation to brain tissue, as well as increase the total volume of irradiated brain tissue. Secondary treatment with external beam radiation therapy is often performed with a reduced and, therefore, less effective dose. The applicant asserted that brachytherapy with GammaTile™ may be the only effective treatment option for these patients.

Based on the above, the applicant concluded that the GammaTile™ is not substantially similar to other existing technologies and meets the newness criterion. However, we are concerned that the mechanism of action for this device may be the same or similar to current forms of radiation or brachytherapy. Specifically, while the placement of the cesium-131 source (or any radioactive source) in a collagen matrix offset may constitute a new delivery vehicle, we are concerned that this sort of improvement in brachytherapy for use in the salvage treatment of radiosensitive malignancies of the brain may not represent a new mechanism of action. We also have concerns as to whether GammaTile™ would represent the first approved use of offset radioactive material in brachytherapy for recurrent brain malignancies. The applicant cited studies that used a similar predicate device, but did not indicate whether these researchers or institutions are seeking separate FDA approval.

We are inviting public comments on whether GammaTile™ meets the substantial similarity criteria and the newness criterion.

With regard to the cost criterion, the applicant conducted the following analysis. The applicant worked with the Barrow Neurological Institute at St. Joseph's Hospital and Medical Center (St. Joseph's) to obtain actual claims for craniotomies using a prototype brain brachytherapy device of stranded cesium-131 seeds held in place with a collagen tile. The application found a total of 23 claims from FY 2001 through FY 2016 data that used a cesium-131 brachytherapy predicate device. All 23 claims were assigned to MS-DRGs 25 through 27. Of the 23 cases, 13 cases were assigned to MS-DRG 25, 4 cases were assigned to MS-DRG 26, and 6 cases were assigned to MS-DRG 27. Using hospital data, the applicant estimated and then subtracted all charges for the predicate device and all charges for ancillary services associated with the device delivery for each case. The applicant standardized the remaining charges for each case and inflated each case's charges by applying the FY 2017 IPPS/LTCH PPS final rule outlier charge inflation factor of 1.043957 by the age of each case (that is, the factor was applied to FY 2011 claims six times, to FY 2012 claims five times, etc.). The applicant then calculated the average inflated standardized charges for the cases assigned to MS-DRG 25 (\$124,064), MS-DRG 26 (\$131,677) and MS-DRG 27 (\$90,615). The applicant then calculated an estimate for ancillary charges associated with placement of the GammaTile™ device, as well as standardized charges for the GammaTile™ device itself. The applicant determined it meets the cost criterion because the final average case-weighted standardized charge per case (including the charges associated with the GammaTile™ device) of \$226,741 exceeds the average case-weighted threshold amount of \$95,783.

We are concerned that the applicant submitted a small sample of cases to determine it meets the cost criterion. A small sample size may not be statistically significant to determine if the GammaTile™ meets the cost criterion. We also note that, while the applicant has attributed reduced operating room times as a significant benefit to the GammaTile™, a reduction in the associated costs does not appear to be reflected in its calculations. We are inviting public comments on whether the GammaTile™ meets the cost criterion.

With regard to substantial clinical improvement, the applicant stated that the GammaTile™ offers a treatment option for a patient population unresponsive to, or ineligible for,

currently available treatments and significantly improves clinical outcomes when compared to currently available treatment options. The applicant explained that therapeutic options for patients diagnosed with large or recurrent brain metastases are limited. However, according to the applicant, the GammaTile™ provides a treatment option for patients diagnosed with radiosensitive recurrent brain tumors that are not eligible for treatment with any other currently available treatment option. Specifically, the applicant stated that GammaTile™ may provide the only radiation treatment option for patients diagnosed with tumors located close to sensitive vital brain sites (for example, brain stem); patients diagnosed with recurrent brain tumors may not be eligible for additional treatment involving the use of external beam radiation therapy. There is a lifetime limit for the amount of radiation therapy a specific area of the body can receive. Patients whose previous treatment includes external beam radiation therapy may be precluded from receiving high doses of radiation associated with subsequent external beam radiation therapy, and the GammaTile™ can also be used to treat tumors that are too large for treatment with external beam radiation therapy. These large tumors are not eligible for treatment with external beam radiation therapy because the radiation dose to healthy brain tissue would be too high.

The applicant described how the GammaTile™ improves clinical outcomes compared to existing treatment options, including external beam radiation therapy and other forms of brain brachytherapy. To demonstrate that the GammaTile™ represents a substantial clinical improvement over existing technologies, the applicant submitted data from three abstracts, with one associated paper demonstrating feasibility or superior progression-free survival compared to the patient's own historical control rate.

In a presentation at the Society for Neuro-Oncology in November 2014 (Dardis, Christopher; Surgery and permanent intraoperative brachytherapy improves time to progression of recurrent intracranial neoplasms), the outcomes of 20 patients diagnosed with 27 tumors covering a variety of histological types treated with the GammaTile™ prototype were presented. The applicant noted the following with regard to the patients: (1) All tumors were intracranial, supratentorial masses and included low and high-grade meningiomas, metastases from various primary cancers, high-grade gliomas, and others;

(2) all treated masses were recurrent following treatment with surgery and/or radiation and the group averaged two prior craniotomies and two prior courses of external beam radiation treatment; and (3) following surgical excision, prototype GammaTiles™ were placed in the resection cavity to deliver a dose of 60 Gray to a depth of 5 mm of tissue; and all patients had previously experienced re-growth of their tumors at the site of treatment and the local control rate of patients entering the study was 0 percent.

With regard to outcomes, the applicant stated that, after their initial treatment, patients had a median progression-free survival time of 5.8 months; post treatment with prototype GammaTiles™, at the time of this analysis, only one patient had progressed at the treatment site, for a local control rate of 96 percent; and median progression-free survival time, a measure of how long a patient lives without recurrence of the treated tumor, has not been reached (as this value can only be calculated when more than 50 percent of treated patients have failed the prescribed treatment).

A second set of outcomes on prototype GammaTiles™ was presented at the Society for Neuro-Oncology Conference on Meningioma in June 2016 (Brachman, David; Surgery and permanent intraoperative brachytherapy improves time to progress of recurrent intracranial neoplasms). This study enrolled 16 patients with 20 recurrent grade 2 or 3 meningiomas, who had undergone prior surgical excision external beam radiation therapy. These patients underwent surgical excision of the tumor, followed by adjuvant radiation therapy with prototype GammaTiles™. The applicant noted the following outcomes: (1) Of the 20 treated tumors, 19 showed no evidence of radiographic progression at last follow-up, yielding a local control rate of 95 percent; two of the 20 patients exhibited radiation necrosis (one symptomatic, one asymptomatic); and (2) the median time to failure from the prior treatment with external beam radiation therapy was 10.3 months and after treatment with prototype GammaTiles™ only one patient failed at 18.2 months. Therefore, the median time to same site failure after prototype GammaTile™ treatment has not yet been reached (average follow up of 16.7 months, range 1–37 months).

A third prospective study was accepted for presentation at the November 2016 Society for Neuro-Oncology annual meeting (Youssef, Emad; Cs131 implants for salvage therapy of recurrent high grade

gliomas). In this study, 13 patients diagnosed with recurrent high-grade gliomas (9 with glioblastoma and 4 with grade 3 astrocytoma) were treated in an identical manner to the cases described above. Previously, all patients had failed the international standard treatment for high-grade glioma, a combination of surgery, radiation therapy, and chemotherapy referred to as the “Stupp regimen.” For the prior therapy, the median time to failure was 9.2 months (range 1–40 months). After therapy with a prototype GammaTile™, the applicant noted the following: (1) The median time to same site local failure has not been reached and one failure was seen at 18 months (local control 92 percent); and (2) with a median follow-up time of 8.1 months (range 1–23 months) one symptomatic patient (8 percent) and two asymptomatic patients (15 percent) had radiation-related MRI changes. However, no patients required re-operation for radiation necrosis or wound breakdown.

The applicant asserted that, when considered in total, the data reported in these three studies support the conclusion that a significant therapeutic effect results from the addition of GammaTile™ radiation therapy to the site of surgical removal. According to the applicant, the fact that these patients had failed prior best available treatments (aggressive surgical and adjuvant radiation management) presents the unusual scenario of a salvage therapy outperforming the current standard-of-care. The applicant noted that follow-up data continues to accrue on these patients. The applicant further noted that, although these reported experiences with the GammaTile™ are as a salvage therapy in patients who currently have no standard treatment options, it is anticipated GammaTile™ will also be used as first-line therapy due to these promising results.

The applicant stated that the use of GammaTile™ reduces rates of mortality compared to alternative treatment options. The applicant explained that clinical studies on GammaTile™ have shown improved local control of tumor recurrence. According to the applicant, the results of these studies showed local control rates of 92 percent to 96 percent for tumor sites that had local control rates of 0 percent from previous treatment. The applicant noted that these studies also have not reached median progression-free survival time with follow-up times ranging from 1 to 37 months. Previous treatment at these same sites resulted in median progression-free survival times of 5.8 to 10.3 months.

The applicant further stated that the use of GammaTile™ reduces rates of radiation necrosis compared to alternative treatment options. The applicant explained that the rate of symptomatic radiation necrosis in the GammaTile™ clinical studies of 5 to 8 percent is substantially lower than the 26 percent to 57 percent rate of symptomatic radiation necrosis requiring re-operation historically associated with brain brachytherapy, and lower than the rates reported for initial treatment of similar tumors with modern external beam and stereotactic radiation techniques. The applicant indicated that this is consistent with the customized and ideal distribution of radiation therapy provided by GammaTile™.

The applicant also asserted that the use of GammaTile™ reduces the need for re-operation compared to alternative treatment options. The applicant explained that patients receiving a craniotomy, followed by external beam radiation therapy or brachytherapy, could require re-operation in the following three scenarios:

- Tumor recurrence at the excision site could require additional surgical removal;
- Symptomatic radiation necrosis could require excision of the affected tissue; and
- Certain forms of brain brachytherapy require the removal of brachytherapy sources after a given period of time.

However, according to the applicant, because of the high local control rates, low rates of symptomatic radiation necrosis, and short half-life of cesium-131, GammaTile™ will reduce the need for re-operation compared to external beam radiation therapy and other forms of brain brachytherapy.

Additionally, the applicant stated that the use of GammaTile™ reduces the need for additional hospital visits and procedures compared to alternative treatment options. The applicant noted that the GammaTile™ is placed during surgery, and does not require any additional visits or procedures. The applicant contrasted this improvement with external beam radiation therapy, which is often delivered in multiple fractions that must be administered over multiple days. The applicant provided an example where WBRT is delivered over 2 to 3 weeks, while the placement of GammaTile™ occurs during the craniotomy and does not add any time to a patient's recovery.

The applicant further stated that the GammaTile™'s high local control rates and low rates of symptomatic radiation necrosis will reduce the need for

additional hospital visits and procedures, and provides a more rapid initiation and complement of the treatment compared to alternative treatment options.

Based on consideration of all of the data presented above, the applicant believed that the use of GammaTile™ represents a substantial clinical improvement over existing technologies. The studies were limited to patients diagnosed with recurrent tumors after previous surgical resection. As previously discussed, the applicant explained that it is seeking FDA approval for the use of the GammaTile™ in the treatment of recurrent malignancies.

We are inviting public comments on whether GammaTile™ meets the substantial clinical improvement criterion.

We did not receive any written public comments in response to the New Technology Town Hall meeting notice regarding the application of GammaTile™ for new technology add-on payments.

III. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals

A. Background

1. Legislative Authority

Section 1886(d)(3)(E) of the Act requires that, as part of the methodology for determining prospective payments to hospitals, the Secretary adjust the standardized amounts for area differences in hospital wage levels by a factor (established by the Secretary) reflecting the relative hospital wage level in the geographic area of the hospital compared to the national average hospital wage level. We currently define hospital labor market areas based on the delineations of statistical areas established by the Office of Management and Budget (OMB). A discussion of the proposed FY 2018 hospital wage index based on the statistical areas appears under sections III.A.2. and G. of the preamble of this proposed rule.

Section 1886(d)(3)(E) of the Act requires the Secretary to update the wage index annually and to base the update on a survey of wages and wage-related costs of short-term, acute care hospitals. (CMS collects these data on the Medicare cost report, CMS Form 2552–10, Worksheet S–3, Parts II, III, and IV. The OMB control number for approved collection of this information is 0938–0050.) This provision also requires that any updates or adjustments to the wage index be made in a manner that ensures that aggregate payments to hospitals are not affected by the change

in the wage index. The proposed adjustment for FY 2018 is discussed in section II.B. of the Addendum to this proposed rule.

As discussed in section III.J. of the preamble of this proposed rule, we also take into account the geographic reclassification of hospitals in accordance with sections 1886(d)(8)(B) and 1886(d)(10) of the Act when calculating IPPS payment amounts. Under section 1886(d)(8)(D) of the Act, the Secretary is required to adjust the standardized amounts so as to ensure that aggregate payments under the IPPS after implementation of the provisions of sections 1886(d)(8)(B), 1886(d)(8)(C), and 1886(d)(10) of the Act are equal to the aggregate prospective payments that would have been made absent these provisions. The proposed budget neutrality adjustment for FY 2018 is discussed in section II.A.4.b. of the Addendum to this proposed rule.

Section 1886(d)(3)(E) of the Act also provides for the collection of data every 3 years on the occupational mix of employees for short-term, acute care hospitals participating in the Medicare program, in order to construct an occupational mix adjustment to the wage index. A discussion of the occupational mix adjustment that we are proposing to apply to the FY 2018 wage index, appears under sections III.E.3. and F. of the preamble of this proposed rule.

2. Core-Based Statistical Areas (CBSAs) for the Proposed FY 2018 Hospital Wage Index

The wage index is calculated and assigned to hospitals on the basis of the labor market area in which the hospital is located. Under section 1886(d)(3)(E) of the Act, beginning with FY 2005, we delineate hospital labor market areas based on OMB-established Core-Based Statistical Areas (CBSAs). The current statistical areas (which were implemented beginning with FY 2015) are based on revised OMB delineations issued on February 28, 2013, in OMB Bulletin No. 13–01. OMB Bulletin No. 13–01 established revised delineations for Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas in the United States and Puerto Rico based on the 2010 Census, and provided guidance on the use of the delineations of these statistical areas using standards published on June 28, 2010 in the **Federal Register** (75 FR 37246 through 37252). We refer readers to the FY 2015 IPPS/LTCH PPS final rule (79 FR 49951 through 49963) for a full discussion of our implementation of the OMB labor

market area delineations beginning with the FY 2015 wage index.

Generally, OMB issues major revisions to statistical areas every 10 years, based on the results of the decennial census. However, OMB occasionally issues minor updates and revisions to statistical areas in the years between the decennial censuses through OMB Bulletins. On July 15, 2015, OMB issued OMB Bulletin No. 15–01, which provides updates to and supersedes OMB Bulletin No. 13–01 that was issued on February 28, 2013. The attachment to OMB Bulletin No. 15–01 provides detailed information on the update to statistical areas since February 28, 2013. The updates provided in OMB Bulletin No. 15–01 are based on the application of the 2010 Standards for Delineating Metropolitan and Micropolitan Statistical Areas to Census Bureau population estimates for July 1, 2012 and July 1, 2013. In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56913), we adopted the updates set forth in OMB Bulletin No. 15–01 effective October 1, 2016, beginning with the FY 2017 wage index. For a complete discussion of the adoption of the updates set forth in OMB Bulletin No. 15–01, we refer readers to the FY 2017 IPPS/LTCH PPS final rule.

For FY 2018, we are continuing to use the OMB delineations that we adopted beginning with FY 2015 to calculate the area wage indexes, with updates as reflected in OMB Bulletin No. 15–01 specified in the FY 2017 IPPS/LTCH PPS final rule.

3. Codes for Constituent Counties in CBSAs

CBSAs are made up of one or more constituent counties. Each CBSA and constituent county has its own unique identifying codes. There are two different lists of codes associated with counties: Social Security Administration (SSA) codes and Federal Information Processing Standard (FIPS) codes. Historically, CMS has listed and used SSA and FIPS county codes to identify and crosswalk counties to CBSA codes for purposes of the hospital wage index. We have learned that SSA county codes are no longer being maintained and updated. However, the FIPS codes continue to be maintained by the U.S. Census Bureau. The Census Bureau's most current statistical area information is derived from ongoing census data received since 2010; the most recent data are from 2015. For the purposes of crosswalking counties to CBSAs, we are proposing to discontinue the use of SSA county codes and begin using only the FIPS county codes.

The Census Bureau maintains a complete list of changes to counties or county equivalent entities on the Web site at: <https://www.census.gov/geo/reference/county-changes.html>. In our proposed transition to using only FIPS codes for counties for the hospital wage index, we are proposing to update the FIPS codes used for crosswalking counties to CBSAs for the hospital wage index to incorporate changes to the counties or county equivalent entities included in the Census Bureau's most recent list. Based on information included in the Census Bureau's Web site, since 2010, the Census Bureau has made the following updates to the FIPS codes for counties or county equivalent entities:

- Petersburg Borough, AK (FIPS State County Code 02–195), CBSA 02, was created from part of former Petersburg Census Area (02–195) and part of Hoonah-Angoon Census Area (02–105). The CBSA code remains 02.
- The name of La Salle Parish, LA (FIPS State County Code 22–059), CBSA 14, is now LaSalle Parish, LA (FIPS State County Code 22–059). The CBSA code remains as 14.
- The name of Shannon County, SD (FIPS State County Code 46–113), CBSA 43, is now Oglala Lakota County, SD (FIPS State County Code 46–102). The CBSA code remains as 43.

We believe that it is important to use the latest counties or county equivalent entities in order to properly crosswalk hospitals from a county to a CBSA for purposes of the hospital wage index used under the IPPS. In addition, we believe that using the latest FIPS codes will allow us to maintain a more accurate and up-to-date payment system that reflects the reality of population shifts and labor market conditions. Therefore, we are proposing to implement these FIPS code updates, effective October 1, 2017, beginning with the FY 2018 wage indexes. We are proposing to use these update changes to calculate area wage indexes in a manner that is generally consistent with the CBSA-based methodologies finalized in the FY 2005 IPPS final rule and the FY 2015 IPPS/LTCH PPS final rule. We note that while the county update changes listed earlier changed the county names, the CBSAs to which these counties map did not change from the prior counties. Therefore, there is no impact or change to hospitals in these counties; they continue to be considered rural for the hospital wage index under these changes. For FY 2018, Tables 2 and 3 associated with this proposed rule and the County to CBSA Crosswalk File and Urban CBSAs and Constituent Counties for Acute Care Hospitals File

posted on the CMS Web site reflect these county changes. We are inviting public comments on our proposals.

B. Worksheet S–3 Wage Data for the Proposed FY 2018 Wage Index

The proposed FY 2018 wage index values are based on the data collected from the Medicare cost reports submitted by hospitals for cost reporting periods beginning in FY 2014 (the FY 2017 wage indexes were based on data from cost reporting periods beginning during FY 2013).

1. Included Categories of Costs

The proposed FY 2018 wage index includes all of the following categories of data associated with costs paid under the IPPS (as well as outpatient costs):

- Salaries and hours from short-term, acute care hospitals (including paid lunch hours and hours associated with military leave and jury duty);
- Home office costs and hours;
- Certain contract labor costs and hours, which include direct patient care, certain top management, pharmacy, laboratory, and nonteaching physician Part A services, and certain contract indirect patient care services (as discussed in the FY 2008 final rule with comment period (72 FR 47315 through 47317)); and
- Wage-related costs, including pension costs (based on policies adopted in the FY 2012 IPPS/LTCH PPS final rule (76 FR 51586 through 51590)) and other deferred compensation costs.

2. Excluded Categories of Costs

Consistent with the wage index methodology for FY 2017, the proposed wage index for FY 2018 also excludes the direct and overhead salaries and hours for services not subject to IPPS payment, such as skilled nursing facility (SNF) services, home health services, costs related to GME (teaching physicians and residents) and certified registered nurse anesthetists (CRNAs), and other subprovider components that are not paid under the IPPS. The proposed FY 2018 wage index also excludes the salaries, hours, and wage-related costs of hospital-based rural health clinics (RHCs), and Federally qualified health centers (FQHCs) because Medicare pays for these costs outside of the IPPS (68 FR 45395). In addition, salaries, hours, and wage-related costs of CAHs are excluded from the wage index for the reasons explained in the FY 2004 IPPS final rule (68 FR 45397 through 45398).

3. Use of Wage Index Data by Suppliers and Providers Other Than Acute Care Hospitals Under the IPPS

Data collected for the IPPS wage index also are currently used to calculate wage indexes applicable to suppliers and other providers, such as SNFs, home health agencies (HHAs), ambulatory surgical centers (ASCs), and hospices. In addition, they are used for prospective payments to IRFs, IPFs, and LTCHs, and for hospital outpatient services. We note that, in the IPPS rules, we do not address comments pertaining to the wage indexes of any supplier or provider except IPPS providers and LTCHs. Such comments should be made in response to separate proposed rules for those suppliers and providers.

C. Verification of Worksheet S–3 Wage Data

The wage data for the proposed FY 2018 wage index were obtained from Worksheet S–3, Parts II and III of the Medicare cost report (Form CMS–2552–10) for cost reporting periods beginning on or after October 1, 2013, and before October 1, 2014. For wage index purposes, we refer to cost reports during this period as the “FY 2014 cost report,” the “FY 2014 wage data,” or the “FY 2014 data.” Instructions for completing the wage index sections of Worksheet S–3 are included in the Provider Reimbursement Manual (PRM), Part 2 (Pub. No. 15–2), Chapter 40, Sections 4005.2 through 4005.4. The data file used to construct the proposed FY 2018 wage index includes FY 2014 data submitted to us as of February 10, 2017. As in past years, we performed an extensive review of the wage data, mostly through the use of edits designed to identify aberrant data.

We asked our MACs to revise or verify data elements that result in specific edit failures. For the proposed FY 2018 wage index, we identified and excluded 51 providers with aberrant data that should not be included in the wage index, although if data elements for some of these providers are corrected, we intend to include data from those providers in the final FY 2018 wage index. We also adjusted certain aberrant data and included these data in the proposed wage index. For example, in situations where a hospital did not have documentable salaries, wages, and hours for housekeeping and dietary services, we imputed estimates, in accordance with policies established in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49965 through 49967). We instructed MACs to complete their data verification of questionable data elements and to transmit any changes to

the wage data no later than March 24, 2017. The revised data will be reflected in the FY 2018 IPPS/LTCH PPS final rule.

In constructing the proposed FY 2018 wage index, we included the wage data for facilities that were IPPS hospitals in FY 2014, inclusive of those facilities that have since terminated their participation in the program as hospitals, as long as those data did not fail any of our edits for reasonableness. We believed that including the wage data for these hospitals is, in general, appropriate to reflect the economic conditions in the various labor market areas during the relevant past period and to ensure that the current wage index represents the labor market area's current wages as compared to the national average of wages. However, we excluded the wage data for CAHs as discussed in the FY 2004 IPPS final rule (68 FR 45397 through 45398). For the this proposed rule, we removed 7 hospitals that converted to CAH status on or after January 22, 2016, the cut-off date for CAH exclusion from the FY 2017 wage index, and through and including January 23, 2017, the cut-off date for CAH exclusion from the FY 2018 wage index. After excluding CAHs and hospitals with aberrant data, we calculated the proposed wage index using the Worksheet S-3, Part II and III wage data of 3,325 hospitals.

For the proposed FY 2018 wage index, we allotted the wages and hours data for a multicampus hospital among the different labor market areas where its campuses are located in the same manner that we allotted such hospitals' data in the FY 2017 wage index (81 FR 56915). Table 2, which contains the proposed FY 2018 wage index associated with proposed rule (available via the Internet on the CMS Web site), includes separate wage data for the campuses of 9 multicampus hospitals.

D. Method for Computing the Proposed FY 2018 Unadjusted Wage Index

1. Proposed Methodology for FY 2018

The method used to compute the proposed FY 2018 wage index without an occupational mix adjustment follows the same methodology that we used to compute the proposed wage indexes without an occupational mix adjustment since FY 2012 (76 FR 51591 through 51593).

As discussed in the FY 2012 IPPS/LTCH PPS final rule, in "Step 5," for each hospital, we adjust the total salaries plus wage-related costs to a common period to determine total adjusted salaries plus wage-related costs. To make the wage adjustment, we

estimate the percentage change in the employment cost index (ECI) for compensation for each 30-day increment from October 14, 2013, through April 15, 2015, for private industry hospital workers from the BLS' *Compensation and Working Conditions*. We have consistently used the ECI as the data source for our wages and salaries and other price proxies in the IPPS market basket, and we are not proposing any changes to the usage of the ECI for FY 2018. The factors used to adjust the hospital's data were based on the midpoint of the cost reporting period, as indicated in the following table.

MIDPOINT OF COST REPORTING PERIOD

After	Before	Adjustment factor
10/14/2013	11/15/2013	1.02310
11/14/2013	12/15/2013	1.02155
12/14/2013	01/15/2014	1.02004
01/14/2014	02/15/2014	1.01866
02/14/2014	03/15/2014	1.01740
03/14/2014	04/15/2014	1.01615
04/14/2014	05/15/2014	1.01482
05/14/2014	06/15/2014	1.01339
06/14/2014	07/15/2014	1.01193
07/14/2014	08/15/2014	1.01048
08/14/2014	09/15/2014	1.00905
09/14/2014	10/15/2014	1.00761
10/14/2014	11/15/2014	1.00614
11/14/2014	12/15/2014	1.00463
12/14/2014	01/15/2015	1.00309
01/14/2015	02/15/2015	1.00155
02/14/2015	03/15/2015	1.00000
03/14/2015	04/15/2015	0.99845

For example, the midpoint of a cost reporting period beginning January 1, 2014, and ending December 31, 2014, is June 30, 2014. An adjustment factor of 1.01193 would be applied to the wages of a hospital with such a cost reporting period.

Using the data as previously described, the proposed FY 2018 national average hourly wage (unadjusted for occupational mix) is \$42.0043.

Previously, we also would provide a Puerto Rico overall average hourly wage. As discussed in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56915), prior to January 1, 2016, Puerto Rico hospitals were paid based on 75 percent of the national standardized amount and 25 percent of the Puerto Rico-specific standardized amount. As a result, we calculated a Puerto Rico-specific wage index that was applied to the labor share of the Puerto Rico-specific standardized amount. Section 601 of the Consolidated Appropriations Act, 2016 (Pub. L. 114-113) amended section 1886(d)(9)(E) of the Act to

specify that the payment calculation with respect to operating costs of inpatient hospital services of a subsection (d) Puerto Rico hospital for inpatient hospital discharges on or after January 1, 2016, shall use 100 percent of the national standardized amount. As we stated in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56915 through 56916), because Puerto Rico hospitals are no longer paid with a Puerto Rico-specific standardized amount as of January 1, 2016, under section 1886(d)(9)(E) of the Act, as amended by section 601 of the Consolidated Appropriations Act, 2016, there is no longer a need to calculate a Puerto Rico-specific average hourly wage and wage index. Hospitals in Puerto Rico are now paid 100 percent of the national standardized amount and, therefore, are subject to the national average hourly wage (unadjusted for occupational mix) (which is \$42.0043 for this FY 2018 proposed rule) and the national wage index, which is applied to the national labor share of the national standardized amount. For FY 2018, we are not proposing a Puerto Rico-specific overall average hourly wage or wage index.

2. Clarification of Other Wage Related Costs in the Wage Index

Section 1886(d)(3)(E) of the Act requires the Secretary to update the wage index based on a survey of hospitals' costs that are attributable to wages and wage-related costs. In the September 1, 1994 IPPS final rule (59 FR 45356), we developed a list of "core" wage-related costs that hospitals may report on Worksheet S-3, Part II of the Medicare hospital cost report in order to include those costs in the wage index. Core wage-related costs include categories of retirement cost, plan administrative costs, health and insurance costs, taxes, and other specified costs such as tuition reimbursement. In addition to these categories of core wage-related costs, we allow hospitals to report wage-related costs other than those on the core list if the other wage-related costs meet certain criteria. The criteria for including other wage-related costs in the wage index are discussed in the September 1, 1994 IPPS final rule (59 FR 45357) and also are listed in the Provider Reimbursement Manual (PRM), Part II, Chapter 40, Sections 4005.2 through 4005.4, Line 18 of the Medicare cost report (Form CMS-2552-10, OMB control number 0938-0050). Specifically, "other" wage-related costs are allowable for the wage index if the cost for employees whose services are paid under the IPPS exceeds 1 percent of the total adjusted salaries net of

excluded area salaries, is a fringe benefit as defined by the IRS and has been reported to the IRS (as income to the employees or contractors), is not being furnished for the convenience of the provider, and is not listed on Worksheet S-3, Part IV.

We note that other wage-related costs are not to include benefits already included in Line 1 salaries on Worksheet S-3, Part II (refer to the cost report instructions for Worksheet S-3, Part II, Line 18, which state, “‘Other’ wage-related costs do not include wage-related costs reported on line 1 of this worksheet.”). We also note that the 1-percent test is conducted by dividing each individual category of the other wage-related cost (that is, the numerator) by the sum of the following lines on the Medicare hospital cost report (Form CMS-2552-10): Worksheet S-3, Part II, Lines 11, 12, 13, and 14, Column 4, and Worksheet S-3, Part III, Line 3, Column 4 (that is, the denominator). The other wage-related costs associated with contract labor and home office/related organization personnel are included in the numerator because these other wage-related costs are allowed in the wage index (in addition to other wage related costs for direct employees), assuming the requirements for inclusion in the wage index are met. For example, if a hospital is trying to include a parking garage as an other-wage related cost that is reported on the W-2 or 1099 form, when running the 1-percent test, include in the numerator all the parking garage other wage-related cost for direct salary employees, contracted employees, and home office employees and divide by the sum of Worksheet S-3, Part II, Lines 11, 12, 13, and 14, Column 4, and Worksheet S-3, Part III, Line 3, Column 4. For the category of parking other wage-related costs, the 1-percent test would be run only one time, inclusive of other wage related costs for employee salaries, contracted employees, and home office employees. We intend to clarify the hospital cost report instructions to reflect that contract labor and home office/related organization salaries should be added to the subtotal of salaries on Worksheet S-3, Part III, Line 3, Column 4 (Line 3 is the difference of net salaries minus excluded area salaries) for purposes of performing the 1-percent test. If a hospital has more than one other wage-related cost, the 1-percent must be conducted separately for each other wage-related cost (for example, parking and cafeteria separately; do not sum all the different types of other wage-related costs together and then run the 1-

percent test). If the 1-percent test is met for a particular type of other wage-related costs, and the other criteria listed earlier are met as well, the other wage-related cost may be reported on Worksheet S-3, Part II, Line 18 of the hospital cost report.

We originally allowed for the inclusion of wage-related costs other than those on the core list because we were concerned that individual hospitals might incur unusually large wage-related costs that are not reflected on the core list but that may represent a significant wage-related cost. However, we are reconsidering allowing other wage-related costs to be included in the wage index because recent internal reviews of the FY 2018 wage data show that only a small minority of hospitals are reporting other wage-related costs that meet the 1-percent test described earlier. In the calculation of the proposed FY 2018 wage index, for each hospital reporting other wage-related costs on Line 18 of Worksheet S-3, we performed the 1-percent test. We then made internal edits removing other wage-related costs on Line 18 where hospitals reported data that failed to meet the mathematical requirement that other wage-related costs must exceed 1 percent of total adjusted salaries net of excluded area salaries. After this review, only approximately 80 hospitals of approximately 3,320 hospitals had other wage-related costs on Line 18 meeting the 1-percent test. We believe that such a limited number of hospitals nationally reporting and meeting the 1-percent test may indicate that other wage-related costs might not constitute an appropriate part of a relative measure of wage costs in a particular labor market area, a longstanding tenet of the wage index. In other words, while other wage-related costs may represent costs that may have an impact on an individual hospital's average hourly wage, we do not believe that costs reported by only a very small minority of hospitals accurately reflect the economic conditions of the labor market areas in which those hospitals are located. Therefore, it is possible that inclusion of other wage-related costs in the wage index in such a limited manner may distort the average hourly wage of a particular labor market area so that its wage index does not accurately represent that labor market area's current wages relative to national wages.

Furthermore, the open-ended nature of the types of other wage-related costs that may be included on Line 18 of Worksheet S-3, in contrast to the concrete list of core wage-related costs, may hinder consistent and proper reporting of fringe benefits. Our internal

review indicates widely divergent types of costs that hospitals are reporting as other wage-related costs on Line 18. We are concerned that inconsistent reporting of other wage-related costs on Line 18 further compromises the accuracy of the wage index as a representation of the relative average hourly wage for each labor market area. Our intent in creating a core list of wage-related costs in the September 1, 1994 IPPS final rule was to promote consistent reporting of fringe benefits, and we are increasingly concerned that inconsistent reporting of wage-related costs on Line 18 of Worksheet S-3 undermines this effort. Specifically, we expressed in the September 1, 1994 IPPS final rule that since we began including fringe benefits in the wage index, we have been concerned with the inconsistent reporting of fringe benefits, whether because of a lack of provider proficiency in identifying fringe benefit costs or varying interpretations across fiscal intermediaries of the definition for fringe benefits in PRM-I, Section 2144.1 (59 FR 45356).

We believe that the limited and inconsistent use of Line 18 of Worksheet S-3 for reporting wage-related costs other than the core list might indicate that including other wage-related costs in the wage index compromises the accuracy of the wage index as a relative measure of wages in a given labor market area. Therefore, we are seeking public comments on whether we should, in future rulemaking, propose to only include the wage-related costs on the core list in the calculation of the wage index and not to include any other wage-related costs in the calculation of the wage index.

Meanwhile, in this FY 2018 IPPS/LTCH PPS proposed rule, we are clarifying that, under our current policy, an other wage-related cost (which we define as the value of a benefit) must be a fringe benefit as described by the IRS (refer to IRS Publication 15-B) and must be reported to the IRS on employees' or contractors' W-2 or 1099 forms as taxable income in order to be considered an other wage-related cost on Line 18 of Worksheet S-3 and for the wage index. That is, other wage-related costs that are not reported to the IRS on employees' or contractors' W-2 or 1099 forms as taxable income, *even if not required to be reported to the IRS according to IRS requirements*, will not be included in the wage index. This is consistent with current cost report instructions for Line 18 of Worksheet S-3, Part II of the Medicare cost report, Form 2552-10, which state that, to be considered an allowable other wage-related costs, the cost “has been

reported to the IRS.” We will apply this policy to the process for calculating the wage index for FY 2019, including the FY 2019 desk reviews beginning in September 2017.

We believe this clarification is necessary because some hospitals have incorrectly interpreted prior manual and existing preamble language to mean that a cost could be considered an other wage-related cost if the provider’s reporting (or not reporting) of the cost was in accordance with IRS requirements, rather than if the cost was actually reported on an employee’s or contractor’s W-2 or 1099 form as taxable income. We believe that such an interpretation of our policy would require an analysis of whether the reporting or not reporting of the cost to the IRS was done properly in accordance with IRS regulations and guidance in order to allow the cost as an other wage-related cost. We believe that the determinations regarding the proper or improper reporting of certain other wage-related costs to the IRS for the purpose of inclusion in the Medicare wage index are impractical for CMS and the MACs because we do not have the expertise and fluency in IRS regulations and tax law sufficient to perform such technical reviews of hospital wage-related costs. In contrast, our current policy of including an amount as an other wage-related cost for wage index purposes only if the amount was actually reported to the IRS on employees’ or contractors’ W-2 or 1099 forms as taxable income is a straightforward policy that we believe provides clarity to all involved parties. The brightline test of allowing an other wage-related cost to be included in the wage index only if it has been reported on an employee’s or contractor’s W-2 or 1099 form as taxable income helps ensure consistent treatment of other wage-related costs for all hospitals. Considering the variety of types of costs that may be included on Line 18 of Worksheet S-3 of the cost report for other wage-related costs (assuming the 1-percent test is met and other criteria are met), we believe that a straightforward policy that is simple for hospitals and CMS to apply is particularly important.

In addition, we believe the policy we are clarifying in this proposed rule, that an other wage-related cost can be included in the wage index only if it was reported to the IRS as taxable income on the employee’s or contractor’s W-2 or 1099, is consistent with CMS’ longstanding position that a fringe benefit is not furnished for the convenience of the employer or otherwise excludable from income as a

fringe benefit (such as a working condition fringe) and that inappropriate types of costs may not be included in the wage index. In response to a comment when we finalized the criteria for other wage-related costs in the September 1, 1994 IPPS final rule (59 FR 45359), we stated that “items such as the unrecovered cost of employee meals, tuition reimbursement, and auto allowances will only be allowed as a wage-related cost for purposes of the wage index if properly reported to the IRS on an employee’s W-2 form as a fringe benefit.” (We note that the September, 1 1994 IPPS final rule does not mention the 1099 form for contractors, as contract labor was not allowed at that time in the wage index. Consistent with our treatment of costs for contract labor similar to that of employees for the wage index, we are clarifying that the requirement that a cost be reported to the IRS to be allowed as a wage-related cost for the wage index also applies to contract labor, which must be reported on the contractor’s 1099 to be allowed as a wage-related cost for the wage index.) We believe that requiring other wage-related costs to be reported on employees’ or contractors’ W-2 or 1099 forms to be allowable for Line 18 of Worksheet S-3 of the Medicare cost report is consistent with the requirement that the cost is not being furnished for the convenience of the employer. A cost reported on an employee’s or contractor’s W-2 or 1099 form as taxable income is clearly a wage-related cost that is provided solely for the benefit of the employee. We believe that the requirement that other wage-related costs be a benefit to the employee also guarantees that administrative costs such as overhead and capitalized costs are excluded from other wage-related costs in the wage index.

Therefore, for the reasons discussed above, we are clarifying that a cost must be a fringe benefit as described by the IRS and must be reported to the IRS on employees’ or contractors’ W-2 or 1099 forms as taxable income in order to be considered an other wage-related cost on Line 18 of Worksheet S-3 and for the wage index. In addition, as discussed earlier, we are seeking public comments on whether we should consider in future rulemaking removing other wage-related costs from the wage index.

Because some hospitals have incorrectly interpreted prior manual and existing preamble language, as stated earlier, we are restating the criteria from the September 1, 1994 IPPS final rule (59 FR 45357) for allowing other wage-related costs for the wage index, with

clarifications. The criteria follow below, and we intend to update the manual with these clarifications:

Other Wage-Related Costs. A hospital may be able to report a wage-related cost (defined as the value of the benefit) that does not appear on the core list if it meets all of the following criteria:

- The wage-related cost is provided at a significant financial cost to the employer. To meet this test, the individual wage-related cost must be greater than 1 percent of total salaries after the direct excluded salaries are removed (the sum of Worksheet S-3, Part II, Lines 11, 12, 13, 14, column 4, and Worksheet S-3, Part III, Line 3, Column 4).

- The wage-related cost is a fringe benefit as described by the IRS and is reported to the IRS on an employee’s or contractor’s W-2 or 1099 form as taxable income.

- The wage-related cost is not furnished for the convenience of the provider or otherwise excludable from income as a fringe benefit (such as a working condition fringe).

We note that those wage-related costs reported as salaries on Line 1 (for example, loan forgiveness and sick pay accruals) should not be included as other wage-related costs on Line 18.

E. Proposed Occupational Mix Adjustment to the FY 2018 Wage Index

As stated earlier, section 1886(d)(3)(E) of the Act provides for the collection of data every 3 years on the occupational mix of employees for each short-term, acute care hospital participating in the Medicare program, in order to construct an occupational mix adjustment to the wage index, for application beginning October 1, 2004 (the FY 2005 wage index). The purpose of the occupational mix adjustment is to control for the effect of hospitals’ employment choices on the wage index. For example, hospitals may choose to employ different combinations of registered nurses, licensed practical nurses, nursing aides, and medical assistants for the purpose of providing nursing care to their patients. The varying labor costs associated with these choices reflect hospital management decisions rather than geographic differences in the costs of labor.

1. Use of 2013 Occupational Mix Survey for the FY 2018 Wage Index

Section 304(c) of the Consolidated Appropriations Act, 2001 (Pub. L. 106-554) amended section 1886(d)(3)(E) of the Act to require CMS to collect data every 3 years on the occupational mix of employees for each short-term, acute care hospital participating in the

Medicare program. We collected data in 2013 to compute the occupational mix adjustment for the FY 2016, FY 2017, and FY 2018 wage indexes. A new measurement of occupational mix is required for FY 2019.

The 2013 survey included the same data elements and definitions as the previous 2010 survey and provided for the collection of hospital-specific wages and hours data for nursing employees for calendar year 2013 (that is, payroll periods ending between January 1, 2013 and December 31, 2013). We published the 2013 survey in the **Federal Register** on February 28, 2013 (78 FR 13679 through 13680). This survey was approved by OMB on May 14, 2013, and is available on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/Medicare-Wage-Index-Occupational-Mix-Survey2013.html>. The 2013 Occupational Mix Survey Hospital Reporting Form CMS-10079 for the Wage Index Beginning FY 2016 (in Excel format) is available on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/Medicare-Wage-Index-Occupational-Mix-Survey2013.html>. Hospitals were required to submit their completed 2013 surveys to their MACs by July 1, 2014. The preliminary, unaudited 2013 survey data were posted on the CMS Web site on July 11, 2014. As with the Worksheet S-3, Parts II and III cost report wage data, we asked our MACs to revise or verify data elements in hospitals' occupational mix surveys that result in certain edit failures.

2. Use of the 2016 Medicare Wage Index Occupational Mix Survey for the FY 2019 Wage Index

As stated earlier, a new measurement of occupational mix is required for FY 2019. The FY 2019 occupational mix adjustment will be based on a new calendar year (CY) 2016 survey. The CY 2016 survey (CMS Form CMS-10079) received OMB approval on September 27, 2016. The final CY 2016 Occupational Mix Survey Hospital Reporting Form is available on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/2016-Occupational-Mix-Survey-Hospital-Reporting-Form-CMS-10079-for-the-Wage-Index-Beginning-FY-2019.html>. Hospitals are required to submit their completed 2016 surveys to their MACs by July 3, 2017. The preliminary, unaudited CY 2016 survey data will be posted on the CMS

Web site in mid-July 2017. As with the Worksheet S-3, Parts II and III cost report wage data, as part of the FY 2019 desk review process, the MACs will revise or verify data elements in hospitals' occupational mix surveys that result in certain edit failures.

3. Calculation of the Proposed Occupational Mix Adjustment for FY 2018

For FY 2018, we are proposing to calculate the occupational mix adjustment factor using the same methodology that we have used since the FY 2012 wage index (76 FR 51582 through 51586) and to apply the occupational mix adjustment to 100 percent of the FY 2018 wage index. Because the statute requires that the Secretary measure the earnings and paid hours of employment by occupational category not less than once every 3 years, all hospitals that are subject to payments under the IPPS, or any hospital that would be subject to the IPPS if not granted a waiver, must complete the occupational mix survey, unless the hospital has no associated cost report wage data that are included in the FY 2018 wage index. For the proposed FY 2018 wage index, we are using the Worksheet S-3, Parts II and III wage data of 3,325 hospitals, and we are using the occupational mix surveys of 3,128 hospitals for which we also have Worksheet S-3 wage data, which represented a "response" rate of 94 percent (3,128/3,325). For the proposed FY 2018 wage index, we are applying proxy data for noncompliant hospitals, new hospitals, or hospitals that submitted erroneous or aberrant data in the same manner that we applied proxy data for such hospitals in the FY 2012 wage index occupational mix adjustment (76 FR 51586). As a result of applying this methodology, the proposed FY 2018 occupational mix adjusted national average hourly wage is \$41.9599.

F. Analysis and Implementation of the Proposed Occupational Mix Adjustment and the Proposed FY 2018 Occupational Mix Adjusted Wage Index

As discussed in section III.E. of the preamble of this proposed rule, for FY 2018, we are proposing to apply the occupational mix adjustment to 100 percent of the FY 2018 wage index. We calculated the proposed occupational mix adjustment using data from the 2013 occupational mix survey data, using the methodology described in the FY 2012 IPPS/LTCH PPS final rule (76 FR 51582 through 51586). Using the occupational mix survey data and applying the occupational mix

adjustment to 100 percent of the FY 2017 wage index results in a proposed national average hourly wage of \$41.9599.

The proposed FY 2018 national average hourly wages for each occupational mix nursing subcategory as calculated in Step 2 of the occupational mix calculation are as follows:

Occupational mix nursing subcategory	Average hourly wage
National RN	\$38.84760578
National LPN and Surgical Technician	22.72715122
National Nurse Aide, Orderly, and Attendant	15.94890269
National Medical Assistant ...	17.97139786
National Nurse Category	32.84544016

The proposed national average hourly wage for the entire nurse category as computed in Step 5 of the occupational mix calculation is \$32.84544016. Hospitals with a nurse category average hourly wage (as calculated in Step 4) of greater than the national nurse category average hourly wage receive an occupational mix adjustment factor (as calculated in Step 6) of less than 1.0. Hospitals with a nurse category average hourly wage (as calculated in Step 4) of less than the national nurse category average hourly wage receive an occupational mix adjustment factor (as calculated in Step 6) of greater than 1.0.

Based on the 2013 occupational mix survey data, we determined (in Step 7 of the occupational mix calculation) that the national percentage of hospital employees in the nurse category is 42.6 percent, and the national percentage of hospital employees in the all other occupations category is 57.4 percent. At the CBSA level, the percentage of hospital employees in the nurse category ranged from a low of 25.7 percent in one CBSA to a high of 73.5 percent in another CBSA.

We compared the FY 2018 proposed occupational mix adjusted wage indexes for each CBSA to the unadjusted wage indexes for each CBSA. As a result of applying the proposed occupational mix adjustment to the wage data, the proposed wage index values for 223 (54.7 percent) urban areas and 23 (48.9 percent) rural areas would increase. The proposed wage index values for 108 (26.5 percent) urban areas would increase by greater than or equal to 1 percent but less than 5 percent, and the proposed wage index values for 6 (1.5 percent) urban areas would increase by 5 percent or more. The proposed wage index values for 10 (21.3 percent) rural areas would increase by greater than or equal to 1 percent but less than 5

percent, and no rural areas' proposed wage index values would increase by 5 percent or more. However, the proposed wage index values for 184 (45.1 percent) urban areas and 24 (51.1 percent) rural areas would decrease. The proposed wage index values for 85 (20.8 percent) urban areas would decrease by greater than or equal to 1 percent but less than 5 percent, and no urban areas' final wage index value would decrease by 5 percent or more. The proposed wage index values of 8 (17.0 percent) rural areas would decrease by greater than or equal to 1 percent and less than 5 percent, and no rural areas' final wage index values would decrease by 5 percent or more. The largest proposed positive impacts would be 17.4 percent for an urban area and 2.9 percent for a rural area. The largest proposed negative impacts would be 4.9 percent for an urban area and 2.3 percent for a rural area. One urban area's proposed wage index, but no rural area wage indexes, would remain unchanged by application of the occupational mix adjustment. These results indicate that a larger percentage of urban areas (54.7 percent) would benefit from the occupational mix adjustment than would rural areas (48.9 percent).

G. Proposed Application of the Rural, Imputed, and Frontier Floors

1. Proposed Rural Floor

Section 4410(a) of Public Law 105–33 provides that, for discharges on or after October 1, 1997, the area wage index applicable to any hospital that is located in an urban area of a State may not be less than the area wage index applicable to hospitals located in rural areas in that State. This provision is referred to as the “rural floor”. Section 3141 of Public Law 111–148 also requires that a national budget neutrality adjustment be applied in implementing the rural floor. Based on the proposed FY 2018 wage index associated with this proposed rule (which is available via the Internet on the CMS Web site), we estimated that 366 hospitals would receive an increase in their FY 2018 proposed wage index due to the application of the rural floor.

2. Proposed Expiration of the Imputed Floor Policy

In the FY 2005 IPPS final rule (69 FR 49109 through 49111), we adopted the “imputed floor” policy as a temporary 3-year regulatory measure to address concerns from hospitals in all-urban States that have argued that they are disadvantaged by the absence of rural hospitals to set a wage index floor for those States. Since its initial implementation, we have extended the

imputed floor policy seven times, the last of which was adopted in the FY 2017 IPPS/LTCH PPS final rule and is set to expire on September 30, 2017. (We refer readers to further discussions of the imputed floor in the FY 2014, FY 2015, FY 2016, and FY 2017 IPPS/LTCH PPS final rules (78 FR 50589 through 50590, 79 FR 49969 through 49970, 80 FR 49497 through 49498, and 81 FR 56921 through 56922, respectively) and to the regulations at 42 CFR 412.64(h)(4).) Currently, there are three all-urban States—Delaware, New Jersey, and Rhode Island—with a range of wage indexes assigned to hospitals in these States, including through reclassification or redesignation. (We refer readers to discussions of geographic reclassifications and redesignations in section III.J. of the preamble of this proposed rule.)

In computing the imputed floor for an all-urban State under the original methodology, which was established beginning in FY 2005, we calculated the ratio of the lowest-to-highest CBSA wage index for each all-urban State as well as the average of the ratios of lowest-to-highest CBSA wage indexes of those all-urban States. We then compared the State's own ratio to the average ratio for all-urban States and whichever is higher is multiplied by the highest CBSA wage index value in the State—the product of which established the imputed floor for the State. As of FY 2012, there were only two all-urban States—New Jersey and Rhode Island—and only New Jersey benefitted under this methodology. Under the previous OMB labor market area delineations, Rhode Island had only one CBSA (Providence-New Bedford-Fall River, RI–MA) and New Jersey had 10 CBSAs. Therefore, under the original methodology, Rhode Island's own ratio equaled 1.0, and its imputed floor was equal to its original CBSA wage index value. However, because the average ratio of New Jersey and Rhode Island was higher than New Jersey's own ratio, this methodology provided a benefit for New Jersey, but not for Rhode Island.

In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53368 through 53369), we retained the imputed floor calculated under the original methodology as discussed above, and established an alternative methodology for computing the imputed floor wage index to address the concern that the original imputed floor methodology guaranteed a benefit for one all-urban State with multiple wage indexes (New Jersey) but could not benefit the other all-urban State (Rhode Island). The alternative methodology for calculating the imputed floor was established using data from the

application of the rural floor policy for FY 2013. Under the alternative methodology, we first determined the average percentage difference between the post-reclassified, pre-floor area wage index and the post-reclassified, rural floor wage index (without rural floor budget neutrality applied) for all CBSAs receiving the rural floor. (Table 4D associated with the FY 2013 IPPS/LTCH PPS final rule (which is available via the Internet on the CMS Web site) included the CBSAs receiving a State's rural floor wage index.) The lowest postreclassified wage index assigned to a hospital in an all-urban State having a range of such values then is increased by this factor, the result of which establishes the State's alternative imputed floor. We amended § 412.64(h)(4) of the regulations to add new paragraphs to incorporate the finalized alternative methodology, and to make reference and date changes. In summary, for the FY 2013 wage index, we did not make any changes to the original imputed floor methodology at § 412.64(h)(4) and, therefore, made no changes to the New Jersey imputed floor computation for FY 2013. Instead, for FY 2013, we adopted a second, alternative methodology for use in cases where an all-urban State has a range of wage indexes assigned to its hospitals, but the State cannot benefit under the original methodology.

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50589 through 50590), we extended the imputed floor policy (both the original methodology and the alternative methodology) for 1 additional year, through September 30, 2014, while we continued to explore potential wage index reforms.

In the FY 2015 IPPS/LTCH PPS final rule (79 FR 49969 through 49970), for FY 2015, we adopted a policy to extend the imputed floor policy (both the original methodology and alternative methodology) for another year, through September 30, 2015, as we continued to explore potential wage index reforms. In that final rule, we revised the regulations at § 412.64(h)(4) and (h)(4)(vi) to reflect the 1-year extension of the imputed floor.

As discussed in section III.B. of the preamble of that FY 2015 final rule, we adopted the new OMB labor market area delineations beginning in FY 2015. Under the new OMB delineations, Delaware became an all-urban State, along with New Jersey and Rhode Island. Under the new OMB delineations, Delaware has three CBSAs, New Jersey has seven CBSAs, and Rhode Island continues to have only one CBSA (Providence-Warwick, RI–MA). We refer readers to a detailed discussion of our adoption of the new

OMB labor market area delineations in section III.B. of the preamble of the FY 2015 IPPS/LTCH PPS final rule. Therefore, under the adopted new OMB delineations discussed in section III.B. of the preamble of the FY 2015 IPPS/LTCH PPS final rule, Delaware became an all-urban State and was subject to an imputed floor as well for FY 2015.

In the FY 2016 IPPS/LTCH PPS final rule (80 FR 49497 through 49498), for FY 2016, we extended the imputed floor policy (under both the original methodology and the alternative methodology) for 1 additional year, through September 30, 2016. In that final rule, we revised the regulations at § 412.64(h)(4) and (h)(4)(vi) to reflect this additional 1-year extension.

In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56921 through 56922), for FY 2017, we extended the imputed floor policy (under both the original methodology and the alternative methodology) for 1 additional year, through September 30, 2017. In that final rule, we revised the regulations at § 412.64(h)(4) and (h)(4)(vi) to reflect this additional 1-year extension.

The imputed floor is set to expire effective October 1, 2017, and we are not proposing to extend the imputed floor policy. In the FY 2005 IPPS final rule (69 FR 49110), we adopted the imputed floor policy for all-urban States under the authority of section 1886(d)(3)(E) of the Act, which gives the Secretary broad authority to adjust the proportion (as estimated by the Secretary from time to time) of hospitals' costs which are attributable to wages and wage-related costs of the DRG prospective payment rates for area differences in hospital wage levels by a factor (established by the Secretary). However, we have expressed reservations about establishment of an imputed floor, considering that the imputed rural floor methodology creates a disadvantage in the application of the wage index to hospitals in States with rural hospitals but no urban hospitals receiving the rural floor (72 FR 24786 and 72 FR 47322). As we discussed in the FY 2008 IPPS final rule (72 FR 47322), the application of the rural and imputed floors requires transfer of payments from hospitals in States with rural hospitals but where the rural floor is not applied to hospitals in States where the rural or imputed floor is applied. For this reason, in this proposed rule, we are proposing not to apply an imputed floor to wage index calculations and payments for hospitals in all-urban States for FY 2018 and subsequent years. That is, hospitals in New Jersey, Delaware, and Rhode Island (and in any other all-urban State) would

receive a wage index that is calculated without applying an imputed floor for FY 2018 and subsequent years. Therefore, only States containing both rural areas and hospitals located in such areas (including any hospital reclassified as rural under the provisions of § 412.103 of the regulations) would benefit from the rural floor, in accordance with section 4410 of Public Law 105–33. In addition, we would no longer include the imputed floor as a factor in the national budget neutrality adjustment. Therefore, the proposed wage index and impact tables associated with this FY 2018 IPPS/LTCH PPS proposed rule (which are available via the Internet on the CMS Web site) do not reflect the imputed floor policy, and there is no proposed national budget neutrality adjustment for the imputed floor for FY 2018. We are inviting public comments on our proposal not to extend the imputed floor for FY 2018 and subsequent years.

3. Proposed State Frontier Floor for FY 2018

Section 10324 of Public Law 111–148 requires that hospitals in frontier States cannot be assigned a wage index of less than 1.0000. (We refer readers to the regulations at 42 CFR 412.64(m) and to a discussion of the implementation of this provision in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50160 through 50161).) Fifty-two hospitals would receive the frontier floor value of 1.0000 for their FY 2018 wage index in this proposed rule. These hospitals are located in Montana, Nevada, North Dakota, South Dakota, and Wyoming. We are not proposing any changes to the frontier floor policy for FY 2018. The areas affected by the proposed rural and frontier floor policies for the proposed FY 2018 wage index are identified in Table 2 associated with this proposed rule, which is available via the Internet on the CMS Web site.

H. Proposed FY 2018 Wage Index Tables

In the FY 2016 IPPS/LTCH PPS final rule (80 FR 49498 and 49807 through 49808), we finalized a proposal to streamline and consolidate the wage index tables associated with the IPPS proposed and final rules for FY 2016 and subsequent fiscal years. Prior to FY 2016, the wage index tables had consisted of 12 tables (Tables 2, 3A, 3B, 4A, 4B, 4C, 4D, 4E, 4F, 4J, 9A, and 9C) that were made available via the Internet on the CMS Web site. Effective beginning FY 2016, with the exception of Table 4E, we streamlined and consolidated 11 tables (Tables 2, 3A, 3B, 4A, 4B, 4C, 4D, 4F, 4J, 9A, and 9C) into

2 tables (Tables 2 and 3). We refer readers to section VI. of the Addendum to this proposed rule for a discussion of the proposed wage index tables for FY 2018.

I. Revisions to the Wage Index Based on Hospital Redesignations and Reclassifications

1. General Policies and Effects of Reclassification and Redesignation

Under section 1886(d)(10) of the Act, the Medicare Geographic Classification Review Board (MGCRB) considers applications by hospitals for geographic reclassification for purposes of payment under the IPPS. Hospitals must apply to the MGCRB to reclassify not later than 13 months prior to the start of the fiscal year for which reclassification is sought (usually by September 1). Generally, hospitals must be proximate to the labor market area to which they are seeking reclassification and must demonstrate characteristics similar to hospitals located in that area. The MGCRB issues its decisions by the end of February for reclassifications that become effective for the following fiscal year (beginning October 1). The regulations applicable to reclassifications by the MGCRB are located in 42 CFR 412.230 through 412.280. (We refer readers to a discussion in the FY 2002 IPPS final rule (66 FR 39874 and 39875) regarding how the MGCRB defines mileage for purposes of the proximity requirements.) The general policies for reclassifications and redesignations and the policies for the effects of hospitals' reclassifications and redesignations on the wage index are discussed in the FY 2012 IPPS/LTCH PPS final rule for the FY 2012 final wage index (76 FR 51595 and 51596). In addition, in the FY 2012 IPPS/LTCH PPS final rule, we discussed the effects on the wage index of urban hospitals reclassifying to rural areas under 42 CFR 412.103. Hospitals that are geographically located in States without any rural areas are ineligible to apply for rural reclassification in accordance with the provisions of 42 CFR 412.103.

On April 21, 2016, we published an interim final rule with comment period (IFC) in the **Federal Register** (81 FR 23428 through 23438) that included provisions amending our regulations to allow hospitals nationwide to have simultaneous § 412.103 and MGCRB reclassifications. For reclassifications effective beginning FY 2018, a hospital may acquire rural status under § 412.103 and subsequently apply for a reclassification under the MGCRB using distance and average hourly wage criteria designated for rural hospitals. In

addition, we provided that a hospital that has an active MGCRB reclassification and is then approved for redesignation under § 412.103 will not lose its MGCRB reclassification; such a hospital receives a reclassified urban wage index during the years of its active MGCRB reclassification and is still considered rural under section 1886(d) of the Act and for other purposes.

We discussed that when there is both a § 412.103 redesignation and an MGCRB reclassification, the MGCRB reclassification controls for wage index calculation and payment purposes. We exclude hospitals with § 412.103 redesignations from the calculation of the reclassified rural wage index if they also have an active MGCRB reclassification to another area. That is, if an application for urban reclassification through the MGCRB is approved, and is not withdrawn or terminated by the hospital within the established timelines, we consider the hospital's geographic CBSA and the urban CBSA to which the hospital is reclassified under the MGCRB for the wage index calculation. We refer readers to the April 21, 2016 IFC (81 FR 23428 through 23438) and the FY 2017 IPPS/LTCH PPS final rule (81 FR 56922 through 56930) for a full discussion of the effect of simultaneous reclassifications under both the § 412.103 and the MGCRB processes on wage index calculations.

2. MGCRB Reclassification and Redesignation Issues for FY 2018

a. FY 2018 Reclassification Requirements and Approvals

As previously stated, under section 1886(d)(10) of the Act, the MGCRB considers applications by hospitals for geographic reclassification for purposes of payment under the IPPS. The specific procedures and rules that apply to the geographic reclassification process are outlined in regulations under 42 CFR 412.230 through 412.280.

At the time this proposed rule was constructed, the MGCRB had completed its review of FY 2018 reclassification requests. Based on such reviews, there are 375 hospitals approved for wage index reclassifications by the MGCRB starting in FY 2018. Because MGCRB wage index reclassifications are effective for 3 years, for FY 2018, hospitals reclassified beginning in FY 2016 or FY 2017 are eligible to continue to be reclassified to a particular labor market area based on such prior reclassifications for the remainder of their 3-year period. There were 257 hospitals approved for wage index reclassifications in FY 2016 that will

continue for FY 2018, and 274 hospitals approved for wage index reclassifications in FY 2017 that will continue for FY 2018. Of all the hospitals approved for reclassification for FY 2016, FY 2017, and FY 2018, based upon the review at the time of this proposed rule, 906 hospitals are in a MGCRB reclassification status for FY 2018.

Under the regulations at 42 CFR 412.273, hospitals that have been reclassified by the MGCRB are permitted to withdraw their applications if the request for withdrawal is received by the MGCRB within 45 days of the publication of CMS' annual notice of proposed rulemaking concerning changes to the inpatient hospital prospective payment system and proposed payment rates for the fiscal year for which the application has been filed. (We note that in section III.I.4. of the preamble of this proposed rule, we are proposing to revise the above described regulation text to specify that written notice to the MGCRB must be provided within 45 days from the date of public display of the proposed rule at the Office of the Federal Register. If finalized, that proposal would be effective beginning with the FY 2019 IPPS/LTCH PPS proposed rule.) For information about withdrawing, terminating, or canceling a previous withdrawal or termination of a 3-year reclassification for wage index purposes, we refer readers to § 412.273, as well as the FY 2002 IPPS final rule (66 FR 39887 through 39888) and the FY 2003 IPPS final rule (67 FR 50065 through 50066). Additional discussion on withdrawals and terminations, and clarifications regarding reinstating reclassifications and "fallback" reclassifications were included in the FY 2008 IPPS final rule (72 FR 47333).

Changes to the wage index that result from withdrawals of requests for reclassification, terminations, wage index corrections, appeals, and the Administrator's review process for FY 2018 will be incorporated into the wage index values published in the FY 2018 IPPS/LTCH PPS final rule. These changes affect not only the wage index value for specific geographic areas, but also the wage index value that redesignated/reclassified hospitals receive; that is, whether they receive the wage index that includes the data for both the hospitals already in the area and the redesignated/reclassified hospitals. Further, the wage index value for the area from which the hospitals are redesignated/reclassified may be affected.

Applications for FY 2019 reclassifications are due to the MGCRB

by September 1, 2017 (the first working day of September 2017). We note that this is also the deadline for canceling a previous wage index reclassification, withdrawal, or termination under 42 CFR 412.273(d). Applications and other information about MGCRB reclassifications may be obtained, beginning in mid-July 2017, via the Internet on the CMS Web site at: <https://www.cms.gov/Regulations-and-Guidance/Review-Boards/MGCRB/index.html>, or by calling the MGCRB at (410) 786-1174. The mailing address of the MGCRB is: 2520 Lord Baltimore Drive, Suite L, Baltimore, MD 21244-2670.

Under previous regulations at 42 CFR 412.256(a)(1), applications for reclassification were required to be mailed or delivered to the MGCRB, with a copy to CMS, and were not allowed to be submitted through the facsimile (FAX) process or by other electronic means. Because we believed this previous policy was outdated and overly restrictive and to promote ease of application for FY 2018 and subsequent years, in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56928), we revised this policy to require applications and supporting documentation to be submitted via the method prescribed in instructions by the MGCRB, with an electronic copy to CMS. We revised § 412.256(a)(1) to specify that an application must be submitted to the MGCRB according to the method prescribed by the MGCRB, with an electronic copy of the application sent to CMS. We specified that CMS copies should be sent via email to wageindex@cms.hhs.gov.

In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56928), we reiterated that MGCRB application requirements will be published separately from the rulemaking process, and paper applications will likely still be required. The MGCRB makes all initial determinations for geographic reclassification requests, but CMS requests copies of all applications to assist in verifying a reclassification status during the wage index development process. We stated that we believed that requiring electronic versions would better aid CMS in this process, and would reduce the overall burden upon hospitals.

b. Extension of PRA Information Collection Requirement Approval for MGCRB Applications

As stated earlier, under section 1886(d)(10) of the Act, the MGCRB considers applications by hospitals for geographic reclassification for purposes of payment under the IPPS. The specific

procedures and rules that apply to the geographic reclassification process are outlined in the regulations under 42 CFR 412.230 through 412.280. The current information collection requirements for the MGCRB procedures and criteria and supporting regulations in 42 CFR 412.256 subject to the Paperwork Reduction Act provisions are currently approved under OMB Control Number 0938–0573 and expired on February 28, 2017. An extension of the currently approved collection is required in time for applications due to the MGCRB September 1, 2017 for FY 2019 reclassifications. As discussed in section XIII.B. of the preamble of this proposed rule, a request for an extension of the current information collection requirements for the MGCRB procedures and criteria and supporting regulations is currently awaiting approval by OMB and can be accessed at: https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201612-0938-023.

c. Proposed Deadline for Submittal of Documentation of Sole Community Hospital (SCH) and Rural Referral Center (RRC) Classification Status to the MGCRB

The regulations at 42 CFR 412.230(a)(3), consistent with section 1886(d)(10)(D)(i)(III) of the Act, set special rules for sole community hospitals (SCHs) and rural referral centers (RRCs) that are reclassifying under the MGCRB. Specifically, a hospital that is an RRC or an SCH, or both, does not have to demonstrate a close proximity to the area to which it seeks redesignation. If a hospital that is an RRC or an SCH, or both, qualifies for urban redesignation, it is redesignated to the urban area that is closest to the hospital. If the hospital is closer to another rural area than to any urban area, it may seek redesignation to either the closest rural or the closest urban area.

In addition, section 1886(d)(10)(D)(iii) of the Act, as implemented in the regulations at § 412.230(d)(3)(i), provides an exception to certain wage comparison criteria for RRCs and former RRCs reclassifying under the MGCRB. Under § 412.230(d)(3)(i), if a hospital was ever an RRC, it does not have to demonstrate that it meets the average hourly wage criterion at § 412.230(d)(1)(iii), which would require that the hospital's average hourly wage be at least 106 percent for rural hospitals and at least 108 percent for urban hospitals of the average hourly wage of all other hospitals in the area in which the hospital is located. Rather, as codified at § 412.230(d)(3)(ii), consistent with our authority under section

1886(d)(10)(D)(i) of the Act, if a hospital was ever an RRC, it is required to meet only the criterion for rural hospitals at § 412.230(d)(1)(iv), which requires that the hospital's average hourly wage is equal to at least 82 percent of the average hourly wage of hospitals in the area to which it seeks redesignation. The regulations at § 412.96 set forth the criteria that a hospital must meet in order to qualify as an RRC.

For a hospital to use the special rules at § 412.230(a)(3) for SCHs and RRCs, the existing regulation at § 412.230(a)(3) requires that the hospital be an active SCH or an RRC as of the date of the MGCRB's review. In addition, for a hospital to use the RRC exceptions at § 412.230(d)(3), a hospital must either be an RRC at the time of the MGCRB's review or have previously been classified as an RRC in the past. In other words, under the existing regulations, if a hospital is approved by CMS as an SCH or an RRC but the approval is not yet effective at the time of the MGCRB's review, the hospital's status as an SCH or an RRC would not be considered in the MGCRB's decision, unless the hospital was a former RRC, in which case it would be able to use the RRC exceptions at § 412.230(d)(3).

The MGCRB currently accepts supporting documentation of SCH and RRC classification (the CMS approval letter) up until the date of MGCRB's review, which varies annually. A hospital may apply at any time for classification as an SCH, and the classification is effective 30 days after the date of CMS' written notification of approval, in accordance with § 412.92. Considering that the MGCRB usually meets in early February, hospitals typically seek to obtain SCH approval letters no later than early January (30 days prior to the date of MGCRB review) for the SCH status to be effective as of the date of the MGCRB's review. However, consistent with section 1886(d)(5)(C)(i) of the Act, a hospital must submit its application for RRC status during the quarter before the first quarter of the hospital's cost reporting period, to be effective at the beginning of the next cost reporting period. The existing regulation at § 412.230(a)(3), combined with the statutory timeframe for RRC classification, require that a hospital's cost reporting period as an RRC begin on or before the date of the MGCRB's review in order to be considered an RRC by the MGCRB for purposes of the special rules under § 412.230(a)(3). Similarly, in order to use the RRC exceptions under § 412.230(d)(3), a hospital's RRC status must be effective on the date of the MGCRB's review, or (unlike

§ 412.230(a)(3)) the hospital must have had RRC status in the past. For example, a hospital with a cost reporting period beginning in March would obtain RRC approval, in accordance with the statutory timeframe, during the December through February quarter (potentially before the MGCRB's decision), but would not be considered an RRC by the MGCRB because the approval would not be effective until the next cost reporting period begins in March, after the MGCRB's decision (unless, for purposes of § 412.230(d)(3), the hospital had previously been classified as an RRC in the past).

The current practice of accepting SCH and RRC approvals up until the date of MGCRB review does not ensure adequate time for the MGCRB to include SCH and RRC approvals in its review. We note that many hospitals now obtain SCH or RRC status based on a § 412.103 reclassification in order to reclassify using the special rules and exceptions under the MGCRB following the April 21, 2016 IFC (81 FR 23428), which revised the regulations to allow hospitals nationwide to reclassify based on acquired rural status. We believe that the additional volume of SCH and RRC approvals submitted to the MGCRB increases the need for an earlier deadline for documentation of SCH and RRC classifications to be submitted to the MGCRB for purposes of the special rules at § 412.230(a)(3) and the exception for RRCs at § 412.230(d)(3). In addition, because the date of the MGCRB's review varies annually, we believe hospitals would benefit from the certainty of a set date by which documentation of RRC or SCH status must be submitted in order to have that status considered by the MGCRB under 412.230(a)(3) and § 412.230(d)(3).

Therefore, to ensure sufficient time for the MGCRB to include SCH and RRC status approvals in its review and increase clarity for hospitals, while allowing as much time and flexibility as possible for hospitals applying for RRC status to be considered RRCs by the MGCRB, we are proposing to revise the regulations at § 412.230(a)(3) and § 412.230(d)(3). We are proposing to revise the regulations at § 412.230(a)(3) in two ways. First, we are proposing to establish a deadline of the first business day after January 1 for hospitals to submit to the MGCRB documentation of SCH or RRC status approval (the CMS approval letter) in order to take advantage of the special rules under § 412.230(a)(3) when reclassifying under the MGCRB. We believe that this date of the first business day after January 1 would provide sufficient time for the MGCRB to consider documentation of

SCH or RRC status approval in its review, without negatively affecting hospitals seeking to obtain SCH or RRC status, as explained below. Second, we are proposing to revise § 412.230(a)(3) to require hospitals to submit documentation of SCH or RRC status approval (the CMS approval letter) by the deadline above, rather than to have SCH or RRC classification that is effective as of the date of MGCRB review, in order to use the special rules for SCHs and RRCs under § 412.230(a)(3). Likewise, we are proposing to revise the regulations at § 412.230(d)(3) so that a hospital qualifies for these RRC exceptions if it was ever *approved* as a RRC. In other words, the exceptions at § 412.230(d)(3) would continue to apply to hospitals that were ever classified as RRCs, but consistent with our authority under section 1886(d)(10)(D)(i) of the Act to publish guidelines to be utilized by the MGCRB, we would also extend these exceptions to hospitals that were ever approved as RRCs. Similar to § 412.230(a)(3), we also are proposing to establish a deadline of the first business day after January 1 for hospitals to submit documentation of RRC status approval (the CMS approval letter) in order to take advantage of the exception under § 412.230(d)(3) when reclassifying under the MGCRB. These proposed revisions would more appropriately allow the MGCRB to prepare for its review and would allow hospitals obtaining SCH or RRC status approval as late as the first business day after January 1 to have these classifications considered by the MGCRB under § 412.230(a)(3) and (d)(3), irrespective of the effective date of these classifications. These proposals would not substantially affect hospitals seeking SCH classification for purposes of reclassifying under the MGCRB because a hospital must obtain SCH status approval by early January under the existing regulation in order to have that classification effective 30 days later by the time the Board usually meets in early February. For hospitals seeking RRC classification for purposes of reclassifying under the MGCRB, however, the proposed deadline of no later than the first business day after January 1, in concert with our proposal to accept documentation of approval (the CMS approval letter) instead of requiring the hospital to be an active RRC at the time of the MGCRB review in order to take advantage of the special rules and exceptions under § 412.230(a)(3) and (d)(3), is beneficial. The proposed revisions to the regulations at § 412.230(a)(3) and (d)(3)

accommodate more hospitals with various cost reporting year ends by allowing hospitals with cost reporting periods beginning soon after the MGCRB's decision to have RRC status approvals included in the MGCRB's review. Under the proposals, the MGCRB would consider an RRC status approval obtained as late as the first business day after January 1 instead of requiring the RRC classification to be effective by the time the Board meets, which has been in February in past years. For example, a hospital with a cost reporting period beginning as late as March, which could apply for RRC status approval in accordance with the statutory timeframe starting in December, would be considered an RRC by the MGCRB if it submits documentation of approval of RRC status no later than the first business day after January 1, even though the approval would not be effective until after the MGCRB's decision.

For the reasons discussed above, consistent with our authority under section 1886(d)(10)(D)(i) of the Act to publish guidelines to be utilized by the MGCRB, we are proposing to revise the regulations at § 412.230(a)(3) to specify that, to be redesignated under the special rules in that paragraph, the hospital must submit documentation of the approval of SCH or RRC status to the MGCRB no later than the first business day after January 1. In addition, we are proposing conforming revisions to paragraphs (a)(3)(i) and (ii) of § 412.230 to reflect that these paragraphs apply to hospitals with SCH and RRC approval as specified above (and not only effective status). Specifically, we are proposing to revise § 412.230(a)(3)(i) to specify that a hospital that is approved as an RRC or SCH, or both, does not have to demonstrate a close proximity to the area to which it seeks redesignation; and to revise § 412.230(a)(3)(ii) to specify that this paragraph applies if a hospital that is approved as an RRC or SCH, or both, qualifies for urban redesignation. We note that we are proposing additional revisions to § 412.230(a)(3)(ii) as discussed in section III.I.2.d. of the preamble of this proposed rule.

In addition, for the reasons discussed above, consistent with our authority under section 1886(d)(10)(D)(i) of the Act to publish guidelines to be utilized by the MGCRB, we are proposing to revise the regulations at § 412.230(d)(3). Specifically, we are proposing to add introductory language to § 412.230(d)(3) to specify that for the exceptions in this paragraph to apply, the hospital must submit documentation of the approval of RRC status (current or past) to the

MGCRB no later than the first business day after January 1. In addition, we are proposing to revise § 412.230(d)(3)(i) to specify that if a hospital was ever approved as an RRC, it does not have to demonstrate that it meets the average hourly wage criterion set forth in § 412.230(d)(1)(iii); and to revise § 412.230(d)(3)(ii) to specify that if a hospital was ever approved as an RRC, it is required to meet only the criterion that applies to rural hospitals under § 412.230(d)(1)(iv), regardless of its actual location in an urban or rural area.

We are inviting public comments on these proposals.

d. Clarification of Special Rules for SCHs and RRCs Reclassifying to Geographic Home Area

Following issuance of the April 21, 2016 IFC (81 FR 23428), hospitals may simultaneously be redesignated as rural under § 412.103 and reclassified under the MGCRB. An urban hospital seeking benefits of rural status, such as rural payments for disproportionate share hospitals (DSH) and eligibility for the 340B Drug Pricing Program administered by HRSA, without the associated rural wage index may be redesignated as rural under § 412.103 (if it meets the applicable requirements) and also reclassify under the MGCRB to an urban area (again, if it meets the applicable requirements). As discussed earlier and in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56922 through 56927), a hospital with simultaneous § 412.103 redesignation and MGCRB reclassification receives the wage index of the CBSA to which it is reclassified under the MGCRB while still maintaining § 412.103 reclassified rural status for other purposes.

Hospitals that are redesignated under § 412.103 may seek MGCRB reclassification to their geographic home area. Such hospitals automatically meet the criteria for proximity, but must still demonstrate that they meet the wage comparison requirements using the criteria for rural hospitals at § 412.230(d). Specifically, a hospital with a § 412.103 redesignation seeking reclassification under the MGCRB must demonstrate that its average hourly wage is at least 106 percent of the average hourly wage of all other hospitals in the area in which the hospital is located in accordance with § 412.230(d)(1)(iii), and the hospital's average hourly wage is equal to at least 82 percent of the average hourly wage of hospitals in the area to which it seeks redesignation, in accordance with § 412.230(d)(1)(iv). In this case, both the area in which the hospital is located and

the area to which it seeks redesignation are the geographic home area.

If a hospital with a § 412.103 rural redesignation also has SCH or RRC status based on its acquired rural status, the hospital may use the exception at § 412.230(d)(3) for RRCs seeking reclassification under the MGCRB and the special reclassification rules at § 412.230(a)(3) for SCHs and RRCs. Specifically, under § 412.230(d)(3)(ii), an RRC or former RRC must only demonstrate that its average hourly wage is equal to at least 82 percent of the average hourly wage of hospitals in the area to which it seeks redesignation. In other words, a hospital with RRC status based on a § 412.103 rural redesignation that is seeking additional reclassification under the MGCRB to its geographic home area must only demonstrate that its average hourly wage is equal to at least 82 percent of the average hourly wage of hospitals in its geographic home area. The proximity requirement is waived under § 412.230(a)(3) for SCHs and RRCs, and SCHs and RRCs are redesignated to the urban area that is closest to the hospital (or if the hospital is closer to another rural area than to any urban area, it may seek redesignation to either the closest rural area or the closest urban area).

The existing regulation at § 412.230(a)(3)(ii) states that if an SCH or RRC qualifies for urban redesignation, it is redesignated to the urban area that is closest to the hospital. As currently worded, we believe it is unclear how this provision would apply to a hospital with a § 412.103 rural redesignation and SCH or RRC status. If the urban area that is closest to the hospital is interpreted to mean the hospital's geographic home area, a hospital with a § 412.103 rural redesignation and SCH or RRC status would not be able to reclassify to any closest area outside of the hospital's geographic home area, but would only be allowed to reclassify to the geographic home area. Alternatively, if the urban area that is closest to the hospital is interpreted to mean the closest urban area to the hospital's geographic home area, the hospital would seem to be precluded from reclassifying under the MGCRB to its geographic home area. In other words, under the existing language of this regulation, the urban area that is closest to the hospital can either be interpreted to mean the hospital's geographic home area, or the closest area outside of the hospital's geographic home area.

We believe it would be appropriate to revise § 412.230(a)(3)(ii) to clarify that it allows for redesignation to either the hospital's geographic home area or to

the closest area outside of the hospital's geographic home area. Prior to the April 21, 2016 interim final rule with comment period (IFC) (81 FR 23428), it was not possible for a hospital with § 412.103 rural redesignation to seek reclassification to its geographic home area or to the closest area outside its geographic home area under the MGCRB because dual reclassification under § 412.103 and under the MGCRB was not permitted. However, the IFC allowed dual § 412.103 and MGCRB reclassifications, so a hospital may now reclassify to a rural area under § 412.103 and then reclassify back to its geographic home area or another area under the MGCRB for wage index purposes (if it meets all criteria). Thus, depending on the circumstances, a hospital may seek to reclassify to either its geographic home area or the closest area outside of its geographic home area.

Therefore, we are proposing to revise the regulations at § 412.230(a)(3)(ii) to clarify that a hospital with a § 412.103 rural redesignation and SCH or RRC approval may reclassify under the MGCRB to its geographic home area or to the closest area outside of its geographic home area. Specifically, we are proposing to revise § 412.230(a)(3)(ii) to state that if a hospital that is approved as an RRC or an SCH, or both, qualifies for urban redesignation, it is redesignated to the urban area that is closest to the hospital or to the hospital's geographic home area. If the hospital is closer to another rural area than to any urban area, it may seek redesignation to either the closest rural or the closest urban area.

3. Redesignations Under Section 1886(d)(8)(B) of the Act

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51599 through 51600), we adopted the policy that, beginning with FY 2012, an eligible hospital that waives its Lugar status in order to receive the out-migration adjustment has effectively waived its deemed urban status and, thus, is rural for all purposes under the IPPS effective for the fiscal year in which the hospital receives the out-migration adjustment. In addition, we adopted a minor procedural change that would allow a Lugar hospital that qualifies for and accepts the out-migration adjustment (through written notification to CMS within 45 days from the publication of the proposed rule) to waive its urban status for the full 3-year period for which its out-migration adjustment is effective. (We note that, in section III.I.4. of the preamble of this proposed rule, we are proposing to revise this policy to require a Lugar hospital that qualifies for and accepts

the out-migration adjustment, or that no longer wishes to accept the out-migration adjustment and instead elects to return to its deemed urban status, to notify CMS within 45 days from the date of public display of the proposed rule at the Office of the Federal Register.) By doing so, such a Lugar hospital would no longer be required during the second and third years of eligibility for the out-migration adjustment to advise us annually that it prefers to continue being treated as rural and receive the out-migration adjustment. In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56930), we again clarified that such a request to waive Lugar status, received within 45 days of the publication of the proposed rule, is valid for the full 3-year period for which the hospital's out-migration adjustment is effective. We further clarified that if a hospital wishes to reinstate its urban status for any fiscal year within this 3-year period, it must send a request to CMS within 45 days of publication of the proposed rule for that particular fiscal year. We indicated that such reinstatement requests may be sent electronically to wageindex@cms.hhs.gov. We wish to further clarify that both requests to waive and to reinstate "Lugar" status may be sent to this mailbox. To ensure proper accounting, we request hospitals to include their CCN, and either "waive Lugar" or "reinstate Lugar", in the subject line of these requests.

4. Proposed Changes to the 45-Day Notification Rules

Certain Medicare regulations specify that hospitals have 45 days from the publication of the annual proposed rule for the hospital inpatient prospective payment system to inform CMS or the MGCRB of certain requested reclassification/redesignation and out-migration adjustment changes relating to the development of the hospital wage index. Specifically, 42 CFR 412.64(i)(3)(iii), which provides for adjusting the wage index to account for commuting patterns of hospital workers, and 42 CFR 412.211(f)(3)(iii), which provides for the same adjustment for hospitals in Puerto Rico, state that a hospital may waive the application of this wage index adjustment by notifying CMS in writing within 45 days after the publication of the annual notice of proposed rulemaking for the hospital inpatient prospective payment system. The regulations at § 412.273(c) concerning withdrawing an MGCRB application, terminating an approved 3-year reclassification, or canceling a previous withdrawal or termination, also state (specifically § 412.273(c)(1)(ii)

and (2)) that a request for withdrawal or termination must be received by the MGCRB within 45 days of publication of CMS' annual notice of proposed rulemaking concerning changes to the inpatient hospital prospective payment system and proposed payment rates. Similarly, the policy outlined in the FY 2012 IPPS/LTCH PPS final rule (76 FR 51599 through 51600) allows a Lugar hospital that qualifies for and accepts the out-migration adjustment, or that no longer wishes to accept the out-migration adjustment and instead elects to return to its deemed urban status to notify CMS within 45 days from the publication of the proposed rule.

We are proposing to revise the above described regulation text and policies as follows to specify that written notification to CMS or the MGCRB (as applicable) must be provided within 45 days from the date of public display of the annual proposed rule for the hospital inpatient prospective payment system at the Office of the Federal Register. We believe that the public has access to the necessary information from the date of public display of the proposed rule at the Office of the Federal Register and on its Web site in order to make the decisions at issue. Specifically, we are proposing to revise the regulations at § 412.64(i)(3)(iii) and § 412.211(f)(3)(iii) to provide that a hospital may waive the application of the wage index adjustment by notifying CMS within 45 days of the date of public display of the annual notice of proposed rulemaking for the hospital inpatient prospective payment system at the Office of the Federal Register. In addition, we are proposing to revise the regulations at § 412.273(c)(1)(ii) and (c)(2) to provide that a request for withdrawal or termination of an MGCRB reclassification must be received by the MGCRB within 45 days of the date of public display at the Office of the Federal Register of the annual notice of proposed rulemaking concerning changes to the inpatient hospital prospective payment system and proposed payment rates for the fiscal year for which the application has been filed (in the case of a withdrawal under § 412.273(c)(1)(ii)), or for the fiscal year for which the termination is to apply (under § 412.273(c)(2)). We also are proposing to revise our policy outlined in the FY 2012 IPPS/LTCH PPS final rule (76 FR 51599 through 51600) (as described above) to require a Lugar hospital that qualifies for and accepts the out-migration adjustment, or that no longer wishes to accept the out-migration adjustment and instead elects to return to its deemed urban status to

notify CMS within 45 days from the date of public display of the proposed rule at the Office of the Federal Register. We are inviting public comments on these proposals.

J. Proposed Out-Migration Adjustment Based on Commuting Patterns of Hospital Employees

In accordance with section 1886(d)(13) of the Act, as added by section 505 of Pub. L. 108–173, beginning with FY 2005, we established a process to make adjustments to the hospital wage index based on commuting patterns of hospital employees (the “out-migration” adjustment). The process, outlined in the FY 2005 IPPS final rule (69 FR 49061), provides for an increase in the wage index for hospitals located in certain counties that have a relatively high percentage of hospital employees who reside in the county but work in a different county (or counties) with a higher wage index.

Section 1886(d)(13)(B) of the Act requires the Secretary to use data the Secretary determines to be appropriate to establish the qualifying counties. When the provision of section 1886(d)(13) of the Act was implemented for the FY 2005 wage index, we analyzed commuting data compiled by the U.S. Census Bureau that were derived from a special tabulation of the 2000 Census journey-to-work data for all industries (CMS extracted data applicable to hospitals). These data were compiled from responses to the “long-form” survey, which the Census Bureau used at the time and which contained questions on where residents in each county worked (69 FR 49062). However, the 2010 Census was “short form” only; information on where residents in each county worked was not collected as part of the 2010 Census. The Census Bureau worked with CMS to provide an alternative dataset based on the latest available data on where residents in each county worked in 2010, for use in developing a new out-migration adjustment based on new commuting patterns developed from the 2010 Census data beginning with FY 2016.

To determine the out-migration adjustments and applicable counties for FY 2016, we analyzed commuting data compiled by the Census Bureau that were derived from a custom tabulation of the American Community Survey (ACS), an official Census Bureau survey, utilizing 2008 through 2012 (5-Year) Microdata. The data were compiled from responses to the ACS questions regarding the county where workers reside and the county to which workers

commute. As we discussed in the FY 2016 and FY 2017 IPPS/LTCH PPS final rules (80 FR 49501 and 81 FR 56930, respectively), the same policies, procedures, and computation that were used for the FY 2012 out-migration adjustment were applicable for FY 2016 and FY 2017, and we are proposing to use them again for FY 2018. We have applied the same policies, procedures, and computations since FY 2012, and we believe they continue to be appropriate for FY 2018. We refer readers to the FY 2016 IPPS/LTCH PPS final rule (80 FR 49500 through 49502) for a full explanation of the revised data source.

For FY 2018, until such time that CMS finalizes out-migration adjustments based on the next Census, the out-migration adjustment continues to be based on the data derived from the custom tabulation of the ACS utilizing 2008 through 2012 (5-Year) Microdata. For FY 2018, we are not proposing any changes to the methodology or data source that we used for FY 2016 (81 FR 25071). (We refer readers to a full discussion of the out-migration adjustment, including rules on deeming hospitals reclassified under section 1886(d)(8) or section 1886(d)(10) of the Act to have waived the out-migration adjustment, in the FY 2012 IPPS/LTCH PPS final rule (76 FR 51601 through 51602).) Table 2 associated with this proposed rule (which is available via the Internet on the CMS Web site) includes the proposed out-migration adjustments for the FY 2018 wage index.

K. Reclassification From Urban to Rural Under Section 1886(d)(8)(E) of the Act, Implemented at 42 CFR 412.103

Under section 1886(d)(8)(E) of the Act, a qualifying prospective payment hospital located in an urban area may apply for rural status for payment purposes separate from reclassification through the MGCRB. Specifically, section 1886(d)(8)(E) of the Act provides that, not later than 60 days after the receipt of an application (in a form and manner determined by the Secretary) from a subsection (d) hospital that satisfies certain criteria, the Secretary shall treat the hospital as being located in the rural area (as defined in paragraph (2)(D)) of the State in which the hospital is located. We refer readers to the regulations at 42 CFR 412.103 for the general criteria and application requirements for a subsection (d) hospital to reclassify from urban to rural status in accordance with section 1886(d)(8)(E) of the Act. The FY 2012 IPPS/LTCH PPS final rule (76 FR 51595 through 51596) includes our policies

regarding the effect of wage data from reclassified or redesignated hospitals.

Hospitals must meet the criteria to be reclassified from urban to rural status under § 412.103, as well as fulfill the requirements for the application process. There may be one or more reasons that a hospital applies for the urban to rural reclassification, and the timeframe that a hospital submits an application is often dependent on those reason(s). Because the wage index is part of the methodology for determining the prospective payments to hospitals for each fiscal year, we believe there should be a definitive timeframe within which a hospital should apply for rural status in order for the reclassification to be reflected in the next Federal fiscal year's wage data used for setting payment rates.

Therefore, after notice of proposed rulemaking and consideration of public comments, in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56931 through 56932), we revised § 412.103(b) by adding paragraph (6) to specify that, in order for a hospital to be treated as rural in the wage index and budget neutrality calculations under § 412.64(e)(1)(ii), (e)(2), (e)(4), and (h) for payment rates for the next Federal fiscal year, the hospital's filing date must be no later than 70 days prior to the second Monday in June of the current Federal fiscal year and the application must be approved by the CMS Regional Office in accordance with the requirements of § 412.103. We refer readers to the FY 2017 IPPS/LTCH PPS final rule for a full discussion of this policy. We clarified that the lock-in date does not affect the timing of payment changes occurring at the hospital-specific level as a result of reclassification from urban to rural under § 412.103. This lock-in date also does not change the current regulation that allows hospitals that qualify under § 412.103(a) to request, at any time during a cost reporting period, to reclassify from urban to rural. A hospital's rural status and claims payment reflecting its rural status continue to be effective on the filing date of its reclassification application, which is the date the CMS Regional Office receives the application, in accordance with § 412.103(d). The hospital's IPPS claims will be paid reflecting its rural status on the filing date (the effective date) of the reclassification, regardless of when the hospital applies.

L. Clarification of Application Deadline for Rural Referral Center (RRC) Classification

Section 1886(d)(5)(C)(i) of the Act, implemented at 42 CFR 412.96,

provides for the classification and special treatment of rural referral centers (RRCs). The regulations at § 412.96 set forth the criteria that a hospital must meet in order to qualify as an RRC. Under § 412.96(b)(1)(ii), a hospital may qualify as an RRC if it is located in a rural area and has 275 or more beds during its most recently completed cost reporting period. The hospital also can obtain RRC status by showing that at least 50 percent of its Medicare patients are referred from other hospitals or from physicians not on the staff of the hospital, and at least 60 percent of the hospital's Medicare patients live more than 25 miles from the hospital, and at least 60 percent of all the services that the hospital furnishes to Medicare beneficiaries are furnished to beneficiaries who live more than 25 miles from the hospital (§ 412.96(b)(2)), or by showing that the hospital meets the alternative criteria at § 412.96(c). We refer readers to 42 CFR 412.96 for a full description of the criteria for classification as an RRC.

Consistent with section 1886(d)(5)(C)(i) of the Act, the hospital must submit its application for RRC status during the last quarter of the hospital's cost reporting period, to be effective with the beginning of the next cost reporting period. Specifically, section 1886(d)(5)(C)(i) of the Act provides that an appeal allowed under this paragraph must be submitted to the Secretary (in such form and manner as the Secretary may prescribe) during the quarter before the first quarter of the hospital's cost reporting period (or, in the case of a cost reporting period beginning during October 1984, during the first quarter of that period), and the Secretary must make a final determination with respect to such appeal within 60 days after the date the appeal was submitted. Any payment adjustments necessitated by a reclassification based upon the appeal will be effective at the beginning of such cost reporting period. Therefore, in this proposed rule, we are clarifying that applications for RRC status must be submitted during this timeframe. That is, applications for RRC status must be submitted during the last quarter of the cost reporting period before the first quarter of a hospital's cost reporting year. If approved, the RRC status is effective with the beginning of the hospital's cost reporting period occurring after the last quarter of the cost reporting period in which the hospital submits an application.

We also are clarifying in this proposed rule that, while RRC applications must be submitted only within the timeframe described above,

applications for urban-to-rural reclassification under § 412.103 may be submitted at any time for the hospital to be approved for rural reclassification. This includes hospitals seeking rural reclassification under § 412.103(a)(3), which states that a hospital meets criteria for urban-to-rural reclassification if the hospital would qualify as a RRC as set forth in § 412.96, or as an SCH as set forth in § 412.92, if the hospital were located in a rural area. A hospital seeking RRC status based on a rural reclassification under § 412.103, including § 412.103(a)(3), must still submit an application for RRC status during the last quarter of its cost reporting year before the next cost reporting period in accordance with section 1886(d)(5)(C)(i) of the Act. While the § 412.103 rural redesignation would be effective as of the date of filing the application, in accordance with § 412.103(d), the RRC status would be effective beginning with the hospital's cost reporting period occurring after the last quarter of the cost reporting period in which the hospital submits an application.

Because a hospital may only apply for RRC status during the last quarter of its cost reporting year in accordance with section 1886(d)(5)(C)(i) of the Act, hospitals seeking RRC status, in order to reclassify through the MGCRB using the special rules for SCHs and RRCs at § 412.230(a)(3) and the exceptions at § 412.230(d)(3) for RRCs, may be disadvantaged due to their cost reporting year end. As discussed in section III.I.2. of the preamble of this proposed rule, we are proposing to revise the regulations at § 412.230(a)(3) and (d)(3) to allow hospitals to submit documentation of the approval of SCH or RRC status (as applicable) to the MGCRB no later than the first business day after January 1. We believe our proposal to accept documentation of approval of RRC classification, instead of requiring that the hospital be classified as a RRC at the time of Board review, would accommodate more hospitals with various cost reporting period endings. We refer readers to section III.I.2. of the preamble of this proposed rule for further discussion of this proposal.

M. Process for Wage Index Data Corrections

1. Process for Hospitals To Request Wage Index Data Corrections

The preliminary, unaudited Worksheet S-3 wage data files for the proposed FY 2018 wage index were made available on May 16, 2016, and the preliminary CY 2013 occupational

mix data files on May 16, 2016, through the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/FY2018-Wage-Index-Home-Page.html>.

On January 30, 2017, we posted a public use file (PUF) at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/FY2018-Wage-Index-Home-Page.html> containing FY 2018 wage index data available as of January 29, 2017. This PUF contains a tab with the Worksheet S–3 wage data (which includes Worksheet S–3, Parts II and III wage data from cost reporting periods beginning on or after October 1, 2013 through September 30, 2014; that is, FY 2014 wage data), a tab with the occupational mix data (which includes data from the CY 2013 occupational mix survey, Form CMS–10079), a tab containing the Worksheet S–3 wage data of hospitals deleted from the January 30, 2017 wage data PUF, and a tab containing the CY 2013 occupational mix data (if any) of the hospitals deleted from the January 30, 2017 wage data PUF. In a memorandum dated January 27, 2017, we instructed all MACs to inform the IPPS hospitals that they service of the availability of the January 30, 2017 wage index data PUFs, and the process and timeframe for requesting revisions in accordance with the FY 2018 Wage Index Timetable.

In the interest of meeting the data needs of the public, beginning with the proposed FY 2009 wage index, we post an additional PUF on our Web site that reflects the actual data that are used in computing the proposed wage index. The release of this file does not alter the current wage index process or schedule. We notify the hospital community of the availability of these data as we do with the current public use wage data files through our Hospital Open Door Forum. We encourage hospitals to sign up for automatic notifications of information about hospital issues and about the dates of the Hospital Open Door Forums at the CMS Web site at: <http://www.cms.gov/Outreach-and-Education/Outreach/OpenDoorForums/index.html>.

In a memorandum dated May 16, 2016, we instructed all MACs to inform the IPPS hospitals that they service of the availability of the wage index data files and the process and timeframe for requesting revisions. We also instructed the MACs to advise hospitals that these data were also made available directly through their representative hospital organizations.

If a hospital wished to request a change to its data as shown in the May 16, 2016 wage data files and May 16, 2016 occupational mix data files, the hospital had to submit corrections along with complete, detailed supporting documentation to its MAC by September 2, 2016. Hospitals were notified of this deadline and of all other deadlines and requirements, including the requirement to review and verify their data as posted in the preliminary wage index data files on the Internet, through the letters sent to them by their MACs.

November 4, 2016 was the date by when MACs notified State hospital associations regarding hospitals that failed to respond to issues raised during the desk reviews. The MACs notified the hospitals by mid-January 2017 of any changes to the wage index data as a result of the desk reviews and the resolution of the hospitals' revision requests. The MACs also submitted the revised data to CMS by January 20, 2017. CMS published the wage index PUFs that included hospitals' revised wage index data on January 30, 2017. Hospitals had until February 17, 2017, to submit requests to the MACs for reconsideration of adjustments made by the MACs as a result of the desk review, and to correct errors due to CMS' or the MAC's mishandling of the wage index data. Hospitals also were required to submit sufficient documentation to support their requests.

After reviewing requested changes submitted by hospitals, MACs were required to transmit to CMS any additional revisions resulting from the hospitals' reconsideration requests by March 24, 2017. Under our current policy, the deadline for a hospital to request CMS intervention in cases where a hospital disagreed with a MAC's policy interpretation was April 5, 2017. Beginning next year (that is, April 2018 for wage data revisions for the FY 2019 wage index), we are proposing to require that a hospital that seeks to challenge the MAC's handling of wage data on any basis (including a policy, factual, or any other dispute) must request CMS to intervene by the date in April that is specified as the deadline for hospitals to appeal MAC determinations and request CMS' intervention in cases where the hospital disagrees with the MAC's determination (the wage index timetable would be updated to reflect the specified date). We note that, as we did for the FY 2017 wage index, for the FY 2018 wage index, in accordance with the FY 2018 wage index timeline posted on the CMS Web site at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/>

AcuteInpatientPPS/Wage-Index-Files-Items/FY2018-Wage-Index-Home-Page.html, the April appeals have to be sent via mail and email. We refer readers to the wage index timeline for complete details.

Hospitals are given the opportunity to examine Table 2, which is listed in section VI. of the Addendum to this proposed rule and available via the Internet on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/FY2018-Wage-Index-Home-Page.html>. Table 2 contains each hospital's proposed adjusted average hourly wage used to construct the wage index values for the past 3 years, including the FY 2014 data used to construct the proposed FY 2018 wage index. We note that the proposed hospital average hourly wages shown in Table 2 only reflect changes made to a hospital's data that were transmitted to CMS by early February 2017.

We plan to post the final wage index data PUFs in late April 2017 on the Internet at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/FY2018-Wage-Index-Home-Page.html>. The April 2017 PUFs are made available solely for the limited purpose of identifying any potential errors made by CMS or the MAC in the entry of the final wage index data that resulted from the correction process previously described (revisions submitted to CMS by the MACs by March 24, 2017).

After the release of the April 2017 wage index data PUFs, changes to the wage and occupational mix data can only be made in those very limited situations involving an error by the MAC or CMS that the hospital could not have known about before its review of the final wage index data files. Specifically, neither the MAC nor CMS will approve the following types of requests:

- Requests for wage index data corrections that were submitted too late to be included in the data transmitted to CMS by the MACs on or before March 24, 2017.
- Requests for correction of errors that were not, but could have been, identified during the hospital's review of the January 30, 2017 wage index PUFs.
- Requests to revisit factual determinations or policy interpretations made by the MAC or CMS during the wage index data correction process.

If, after reviewing the April 2017 final wage index data PUFs, a hospital believes that its wage or occupational

mix data were incorrect due to a MAC or CMS error in the entry or tabulation of the final data, the hospital is given the opportunity to notify both its MAC and CMS regarding why the hospital believes an error exists and provide all supporting information, including relevant dates (for example, when it first became aware of the error). The hospital is required to send its request to CMS and to the MAC no later than May 30, 2017. Similar to the April appeals, beginning with the FY 2015 wage index, in accordance with the FY 2018 wage index timeline posted on the CMS Web site at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/Wage-Index-Files-Items/FY2018-Wage-Index-Home-Page.html>, the May appeals must be sent via mail and email to CMS and the MACs. We refer readers to the wage index timeline for complete details.

Verified corrections to the wage index data received timely by CMS and the MACs (that is, by May 30, 2017) will be incorporated into the final FY 2018 wage index, which will be effective October 1, 2017.

We created the processes previously described to resolve all substantive wage index data correction disputes before we finalize the wage and occupational mix data for the FY 2018 payment rates. Accordingly, hospitals that do not meet the procedural deadlines set forth above will not be afforded a later opportunity to submit wage index data corrections or to dispute the MAC's decision with respect to requested changes. Specifically, our policy is that hospitals that do not meet the procedural deadlines set forth above (requiring requests to MACs by the specified date in February and, where such requests are unsuccessful, requests for intervention by CMS by the specified date in April) will not be permitted to challenge later, before the PRRB, the failure of CMS to make a requested data revision. We refer readers also to the FY 2000 IPPS final rule (64 FR 41513) for a discussion of the parameters for appeals to the PRRB for wage index data corrections.

Again, we believe the wage index data correction process described earlier provides hospitals with sufficient opportunity to bring errors in their wage and occupational mix data to the MAC's attention. Moreover, because hospitals have access to the final wage index data PUFs by late April 2017, they have the opportunity to detect any data entry or tabulation errors made by the MAC or CMS before the development and publication of the final FY 2018 wage index by August 2017, and the implementation of the FY 2018 wage

index on October 1, 2017. Given these processes, the wage index implemented on October 1 should be accurate. Nevertheless, in the event that errors are identified by hospitals and brought to our attention after May 30, 2017, we retain the right to make midyear changes to the wage index under very limited circumstances.

Specifically, in accordance with 42 CFR 412.64(k)(1) of our regulations, we make midyear corrections to the wage index for an area only if a hospital can show that: (1) The MAC or CMS made an error in tabulating its data; and (2) the requesting hospital could not have known about the error or did not have an opportunity to correct the error, before the beginning of the fiscal year. For purposes of this provision, "before the beginning of the fiscal year" means by the May deadline for making corrections to the wage data for the following fiscal year's wage index (for example, May 30, 2017 for the FY 2018 wage index). This provision is not available to a hospital seeking to revise another hospital's data that may be affecting the requesting hospital's wage index for the labor market area. As indicated earlier, because CMS makes the wage index data available to hospitals on the CMS Web site prior to publishing both the proposed and final IPPS rules, and the MACs notify hospitals directly of any wage index data changes after completing their desk reviews, we do not expect that midyear corrections will be necessary. However, under our current policy, if the correction of a data error changes the wage index value for an area, the revised wage index value will be effective prospectively from the date the correction is made.

In the FY 2006 IPPS final rule (70 FR 47385 through 47387 and 47485), we revised 42 CFR 412.64(k)(2) to specify that, effective on October 1, 2005, that is, beginning with the FY 2006 wage index, a change to the wage index can be made retroactive to the beginning of the Federal fiscal year only when CMS determines all of the following: (1) The MAC or CMS made an error in tabulating data used for the wage index calculation; (2) the hospital knew about the error and requested that the MAC and CMS correct the error using the established process and within the established schedule for requesting corrections to the wage index data, before the beginning of the fiscal year for the applicable IPPS update (that is, by the May 30, 2017 deadline for the FY 2018 wage index); and (3) CMS agreed before October 1 that the MAC or CMS made an error in tabulating the

hospital's wage index data and the wage index should be corrected.

In those circumstances where a hospital requested a correction to its wage index data before CMS calculated the final wage index (that is, by the May 30, 2017 deadline for the FY 2018 wage index), and CMS acknowledges that the error in the hospital's wage index data was caused by CMS' or the MAC's mishandling of the data, we believe that the hospital should not be penalized by our delay in publishing or implementing the correction. As with our current policy, we indicated that the provision is not available to a hospital seeking to revise another hospital's data. In addition, the provision cannot be used to correct prior years' wage index data; and it can only be used for the current Federal fiscal year. In situations where our policies would allow midyear corrections other than those specified in 42 CFR 412.64(k)(2)(ii), we continue to believe that it is appropriate to make prospective-only corrections to the wage index.

We note that, as with prospective changes to the wage index, the final retroactive correction will be made irrespective of whether the change increases or decreases a hospital's payment rate. In addition, we note that the policy of retroactive adjustment will still apply in those instances where a final judicial decision reverses a CMS denial of a hospital's wage index data revision request.

2. Process for Data Corrections by CMS After the January Public Use File (PUF)

The process set forth with the wage index timeline discussed in section III.M.1. of the preamble of this proposed rule allows hospitals to request corrections to their wage index data within prescribed timeframes. In addition to hospitals' opportunity to request corrections of wage index data errors or MACs' mishandling of data, CMS has the authority under section 1886(d)(3)(E) of the Act to make corrections to hospital wage index and occupational mix data in order to ensure the accuracy of the wage index. As we explained in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49490 through 49491) and the FY 2017 IPPS/LTCH PPS final rule (81 FR 56914), section 1886(d)(3)(E) of the Act requires the Secretary to adjust the proportion of hospitals' costs attributable to wages and wage-related costs for area differences reflecting the relative hospital wage level in the geographic areas of the hospital compared to the national average hospital wage level. We believe that, under section 1886(d)(3)(E) of the Act, we have discretion to make

corrections to hospitals' data to help ensure that the costs attributable to wages and wage-related costs in fact accurately reflect the relative hospital wage level in the hospitals' geographic areas.

We have an established multistep, 15-month process for the review and correction of the hospital wage data that is used to create the IPPS wage index for the upcoming fiscal year. Since the origin of the IPPS, the wage index has been subject to its own annual review process, first by the MACs, and then by CMS. As a standard practice, after each annual desk review, CMS reviews the results of the MACs' desk reviews and focuses on items flagged during the desk review, requiring that, if necessary, hospitals provide additional documentation, adjustments, or corrections to the data. This ongoing communication with hospitals about their wage data may result in the discovery by CMS of additional items that were reported incorrectly or other data errors, even after the posting of the January PUF, and throughout the remainder of the wage index development process. In addition, the fact that CMS analyzes the data from a regional and even national level, unlike the review performed by the MACs that review a limited subset of hospitals, can facilitate additional editing of the data that may not be readily apparent to the MACs. In these occasional instances, an error may be of sufficient magnitude that the wage index of an entire CBSA is affected. Accordingly, CMS uses its authority to ensure that the wage index accurately reflects the relative hospital wage level in the geographic area of the hospital compared to the national average hospital wage level, by continuing to make corrections to hospital wage data upon discovering incorrect wage data, distinct from instances in which hospitals request data revisions.

We note that CMS corrects errors to hospital wage data as appropriate, regardless of whether that correction will raise or lower a hospital's average hourly wage. For example, as discussed in section III.D.2. of the preamble of this proposed rule, in the calculation of the proposed FY 2018 wage index, upon discovering that hospitals reported other wage-related costs on Line 18 of Worksheet S-3, despite those other wage-related costs failing to meet the requirement that other wage related costs must exceed 1 percent of total adjusted salaries net of excluded area salaries, CMS made internal edits to remove those other wage-related costs from Line 18. Conversely, if CMS discovers after conclusion of the desk

review, for example, that a MAC inadvertently failed to incorporate positive adjustments resulting from a prior year's wage index appeal to a hospital's wage related costs such as pension, CMS would correct that data error and the hospital's average hourly wage would likely increase as a result.

While we maintain CMS' authority to conduct additional review and make resulting corrections at any time during the wage index development process, we are proposing a process for hospitals to request further review of a correction made by CMS starting with the FY 2019 wage index. In order to allow opportunity for input from hospitals concerning corrections made by CMS after the posting of the January PUF, we are proposing a process similar to the existing process in which hospitals may request corrections to wage index data displayed in the January PUF. Instances where CMS makes a correction to a hospital's data after the January PUF based on a different understanding than the hospital about certain reported costs, for example, could potentially be resolved using this proposed process before the final wage index is calculated. We believe this proposed process and timeline (as described above) would bring additional transparency to instances where CMS makes data corrections after the January PUF, and would provide opportunities for hospitals to request further review of CMS changes in time for the most accurate data to be reflected in the final wage index calculations.

Effective beginning with the FY 2019 wage index development cycle, we are proposing to use existing appeal deadlines (in place for hospitals to appeal determinations made by the MAC during the desk review process) for hospitals to dispute corrections made by CMS after posting of the January PUF that do not arise from a hospital request for a wage data revision. Starting with the April appeal deadline, hospitals would use the soonest approaching appeal deadline to dispute any adjustments made by CMS. However, if a hospital was notified of an adjustment within 14 days of an appeal deadline, the hospital would have until the next appeal deadline to dispute any adjustments. We believe this would give hospitals sufficient time to prepare an appeal of adjustments made by CMS after the January PUF. Specifically, for any adjustments made by CMS between the date the January PUF is posted and at least 14 calendar days before the April appeals deadline, we are proposing that hospitals would have until the April appeals deadline (which, for example, is April 5 in the FY 2018

Wage Index Timetable) to dispute the adjustments. For any adjustments made by CMS between 13 calendar days before the April appeals deadline and 14 calendar days before the May appeals deadline, we are proposing that hospitals would have until the May appeals deadline (which, for example, is May 30 in the FY 2018 Wage Index Timetable) to dispute the adjustments. In cases where hospitals disagree with CMS adjustments of which they were notified 13 calendar days before the May appeals deadline or later, the hospitals could appeal to the PRRB with no need for further review by CMS before such appeal.

We are using dates from the FY 2018 Wage Index Timetable in the following example (we reiterate that this appeals process would be effective beginning with the FY 2019 wage index cycle, but for illustrative purposes, we are using dates from the FY 2018 Wage Index Timetable, the most recently published wage index timetable): A hospital that is notified by the MAC or CMS of an adjustment to its wage data after the release of the January 30, 2017 PUF could use the April 5, 2017 appeals deadline to dispute the adjustment. If the hospital is notified of an adjustment by CMS or the MAC to its wage data after March 22, 2017 (that is, less than 14 days prior to the April 5 appeals deadline), it could use the May 30, 2017 appeals deadline to dispute the adjustment. If the hospital is first notified about the adjustment after May 16, 2017 (that is, less than 14 days prior to the May 30 deadline), and disagrees with the adjustment, the hospital could appeal directly to the PRRB.

As with the existing process for requesting wage data corrections, we are proposing that a hospital disputing an adjustment made by CMS after the posting of the January PUF would be required to request a correction by the first applicable deadline. For example, if a hospital was notified on March 20 of an adjustment to its data by CMS and does not appeal by April 5, the hospital would not be able to appeal by May 30 or bring the case before the PRRB. That is, hospitals that did not meet the procedural deadlines set forth above would not be afforded a later opportunity to submit wage index data corrections or to dispute CMS' decision with respect to requested changes. As with the existing process for hospitals to request wage data corrections, our policy is that hospitals that do not meet the procedural deadlines set forth earlier would not be permitted to challenge later, before the PRRB, the failure of CMS to make a requested data revision.

In summary, under the statute, CMS has discretion to make corrections and revisions to hospitals' wage data throughout the multistep wage index development process, and we are proposing a pathway for hospitals to request additional review of corrections to their wage data made by CMS. Beginning with the development of the FY 2019 wage index, we are proposing a process whereby CMS could continue to correct data after the posting of the January PUF, while allowing hospitals to appeal changes made by CMS using existing deadlines from the process for hospitals to request wage data corrections. As with the existing process, a hospital would be required to appeal by the first applicable deadline, if relevant, to maintain the right to appeal to the PRRB to dispute a correction to its wage data made by CMS.

We are inviting public comments on our proposals.

N. Proposed Labor Market Share for the Proposed FY 2018 Wage Index

Section 1886(d)(3)(E) of the Act directs the Secretary to adjust the proportion of the national prospective payment system base payment rates that are attributable to wages and wage-related costs by a factor that reflects the relative differences in labor costs among geographic areas. It also directs the Secretary to estimate from time to time the proportion of hospital costs that are labor-related and to adjust the proportion (as estimated by the Secretary from time to time) of hospitals' costs which are attributable to wages and wage-related costs of the DRG prospective payment rates. We refer to the portion of hospital costs attributable to wages and wage-related costs as the labor-related share. The labor-related share of the prospective payment rate is adjusted by an index of relative labor costs, which is referred to as the wage index.

Section 403 of Public Law 108–173 amended section 1886(d)(3)(E) of the Act to provide that the Secretary must employ 62 percent as the labor-related share unless this would result in lower payments to a hospital than would otherwise be made. However, this provision of Public Law 108–173 did not change the legal requirement that the Secretary estimate from time to time the proportion of hospitals' costs that are attributable to wages and wage-related costs. Thus, hospitals receive payment based on either a 62-percent labor-related share, or the labor-related share estimated from time to time by the Secretary, depending on which labor-

related share resulted in a higher payment.

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50596 through 50607), we rebased and revised the hospital market basket. We established a FY 2010-based IPPS hospital market basket to replace the FY 2006-based IPPS hospital market basket, effective October 1, 2013. In that final rule, we presented our analysis and conclusions regarding the frequency and methodology for updating the labor-related share for FY 2014. Using the FY 2010-based IPPS market basket, we finalized a labor-related share for FY 2014, FY 2015, FY 2016, and FY 2017 of 69.6 percent. In addition, in FY 2014, we implemented this revised and rebased labor-related share in a budget neutral manner (78 FR 51016). However, consistent with section 1886(d)(3)(E) of the Act, we did not take into account the additional payments that would be made as a result of hospitals with a wage index less than or equal to 1.0000 being paid using a labor-related share lower than the labor-related share of hospitals with a wage index greater than 1.0000.

For FY 2018, as described in section IV. of the preamble of this proposed rule, we are proposing to rebase and revise the IPPS market basket reflecting 2014 data. We also are proposing to recalculate the labor-related share for discharges occurring on or after October 1, 2017 using the proposed 2014-based IPPS market basket. As discussed in Appendix A of this proposed rule, we are proposing this revised and rebased labor-related share in a budget neutral manner. However, consistent with section 1886(d)(3)(E) of the Act, we did not take into account the additional payments that would be made as a result of hospitals with a wage index less than or equal to 1.0000 being paid using a labor-related share lower than the labor-related share of hospitals with a wage index greater than 1.0000.

The labor-related share is used to determine the proportion of the national IPPS base payment rate to which the area wage index is applied. We include a cost category in the labor-related share if the costs are labor intensive and vary with the local labor market. As described in section IV. of the preamble of this proposed rule, we are proposing to include in the labor-related share the national average proportion of operating costs that are attributable to Wages and Salaries, Employee Benefits, Professional Fees: Labor-Related, Administrative and Facilities Support Services, Installation, Maintenance, and Repair Services, and All Other: Labor-Related Services as measured in the proposed 2014-based IPPS market

basket. Therefore, for FY 2018, we are proposing to use a labor-related share of 68.3 percent for discharges occurring on or after October 1, 2017.

Prior to January 1, 2016, Puerto Rico hospitals were paid based on 75 percent of the national standardized amount and 25 percent of the Puerto Rico-specific standardized amount. As a result, we applied the Puerto Rico-specific labor-related share percentage and nonlabor-related share percentage to the Puerto Rico-specific standardized amount. Section 601 of the Consolidated Appropriations Act, 2016 (Pub. L. 114–113) amended section 1886(d)(9)(E) of the Act to specify that the payment calculation with respect to operating costs of inpatient hospital services of a subsection (d) Puerto Rico hospital for inpatient hospital discharges on or after January 1, 2016, shall use 100 percent of the national standardized amount. Because Puerto Rico hospitals are no longer paid with a Puerto Rico-specific standardized amount as of January 1, 2016, under section 1886(d)(9)(E) of the Act as amended by section 601 of the Consolidated Appropriations Act, 2016, there is no longer a need for us to calculate a Puerto Rico-specific labor-related share percentage and nonlabor-related share percentage for application to the Puerto Rico-specific standardized amount. Hospitals in Puerto Rico are now paid 100 percent of the national standardized amount and, therefore, are subject to the national labor-related share and nonlabor-related share percentages that are applied to the national standardized amount. Accordingly, for FY 2018, we are not proposing a Puerto Rico-specific labor-related share percentage or a nonlabor-related share percentage.

Tables 1A and 1B, which are published in section VI. of the Addendum to this FY 2018 IPPS/LTCH PPS proposed rule and available via the Internet on the CMS Web site, reflect the proposed national labor-related share, which is also applicable to Puerto Rico hospitals. For FY 2018, for all IPPS hospitals (including Puerto Rico hospitals) whose wage indexes are less than or equal to 1.0000, we are proposing to apply the wage index to a labor-related share of 62 percent of the national standardized amount. For all hospitals (including Puerto Rico hospitals) whose wage indexes are greater than 1.0000, for FY 2018, we are proposing to apply the wage index to a proposed labor-related share of 68.3 percent of the national standardized amount.

IV. Proposed Rebasing and Revising of the Hospital Market Baskets for Acute Care Hospitals

A. Background

Effective for cost reporting periods beginning on or after July 1, 1979, we developed and adopted a hospital input price index (that is, the hospital market basket for operating costs). Although “market basket” technically describes the mix of goods and services used in providing hospital care, this term is also commonly used to denote the input price index (that is, cost category weights and price proxies combined) derived from that market basket. Accordingly, the term “market basket” as used in this document refers to the hospital input price index.

The percentage change in the market basket reflects the average change in the price of goods and services hospitals purchase in order to provide inpatient care. We first used the market basket to adjust hospital cost limits by an amount that reflected the average increase in the prices of the goods and services used to provide hospital inpatient care. This approach linked the increase in the cost limits to the efficient utilization of resources.

Since the inception of the IPPS, the projected change in the hospital market basket has been the integral component of the update factor by which the prospective payment rates are updated every year. An explanation of the hospital market basket used to develop the prospective payment rates was published in the **Federal Register** on September 1, 1983 (48 FR 39764). We also refer readers to the FY 2014 IPPS/LTCH PPS final rule (78 FR 50596) in which we discussed the most recent previous rebasing of the hospital input price index.

The hospital market basket is a fixed-weight, Laspeyres-type price index. A Laspeyres-type price index measures the change in price, over time, of the same mix of goods and services purchased in the base period. Any changes in the quantity or mix of goods and services (that is, intensity) purchased over time are not measured.

The index itself is constructed in three steps. First, a base period is selected (in this proposed rule, we are proposing to use 2014 as the base period) and total base period expenditures are estimated for a set of mutually exclusive and exhaustive spending categories, with the proportion of total costs that each category represents being calculated. These proportions are called “cost weights” or “expenditure weights.” Second, each expenditure category is matched to an

appropriate price or wage variable, referred to as a “price proxy.” In almost every instance, these price proxies are derived from publicly available statistical series that are published on a consistent schedule (preferably at least on a quarterly basis). Finally, the expenditure weight for each cost category is multiplied by the level of its respective price proxy. The sum of these products (that is, the expenditure weights multiplied by their price index levels) for all cost categories yields the composite index level of the market basket in a given period. Repeating this step for other periods produces a series of market basket levels over time. Dividing an index level for a given period by an index level for an earlier period produces a rate of growth in the input price index over that timeframe.

As noted above, the market basket is described as a fixed-weight index because it represents the change in price over time of a constant mix (quantity and intensity) of goods and services needed to provide hospital services. The effects on total expenditures resulting from changes in the mix of goods and services purchased subsequent to the base period are not measured. For example, a hospital hiring more nurses to accommodate the needs of patients would increase the volume of goods and services purchased by the hospital, but would not be factored into the price change measured by a fixed-weight hospital market basket. Only when the index is rebased would changes in the quantity and intensity be captured, with those changes being reflected in the cost weights. Therefore, we rebase the market basket periodically so that the cost weights reflect recent changes in the mix of goods and services that hospitals purchase (hospital inputs) to furnish inpatient care between base periods.

We last rebased the hospital market basket cost weights effective for FY 2014 (78 FR 50596), with FY 2010 data used as the base period for the construction of the market basket cost weights. For this FY 2018 IPPS/LTCH PPS proposed rule, we are proposing to rebase the cost structure for the IPPS hospital index from FY 2010 to 2014, as discussed below.

B. Rebasing and Revising the IPPS Market Basket

The terms “rebasing” and “revising,” while often used interchangeably, actually denote different activities. “Rebasing” means moving the base year for the structure of costs of an input price index (for example, in this proposed rule, we are proposing to shift the base year cost structure for the IPPS

hospital index from FY 2010 to 2014). We note that we are no longer referring to the market basket as a “FY 2014-based” market basket and instead refer to the proposed market basket as simply “2014-based”. We are proposing this change in naming convention for the market basket because the base year cost weight data for the proposed market basket does not reflect only fiscal year data. For example, the proposed 2014-based IPPS market basket uses Medicare cost report data and other government data that reflect 2014 fiscal year, 2014 calendar year, and 2014 State fiscal year expenses to determine the base year cost weights. Given that it is based on a mix of classifications of 2014 data, we are proposing to refer to the market basket as “2014-based” instead of “FY 2014-based” or “CY 2014-based”.

“Revising” means changing data sources or price proxies used in the input price index. As published in the FY 2006 IPPS final rule (70 FR 47387), in accordance with section 404 of Public Law 108–173, CMS determined a new frequency for rebasing the hospital market basket. We established a rebasing frequency of every 4 years and, therefore, for the FY 2018 IPPS update, we are proposing to rebase and revise the IPPS market basket from FY 2010 to 2014. We are inviting public comments on our proposed methodology.

1. Development of Cost Categories and Weights

a. Use of Medicare Cost Report Data

The major source of expenditure data for developing the proposed rebased and revised hospital market basket cost weights is the 2014 Medicare cost reports. These 2014 Medicare cost reports are for cost reporting periods beginning on and after October 1, 2013 and before October 1, 2014. We note that while these dates appear to reflect fiscal year data, in order to be classified as a “2014 cost report,” a hospital’s cost reporting period must begin between these dates. For example, we found that of the 2014 Medicare cost reports for IPPS hospitals, approximately 40 percent of the reports had a begin date on January 1, 2014, approximately 30 percent had a begin date on July 1, 2014, and approximately 18 percent had a begin date on October 1, 2013. For this reason, we are defining the base year of the market basket as “2014-based” instead of “FY 2014-based”. We are proposing to use 2014 as the base year because we believe that the 2014 Medicare cost reports represent the most recent, complete set of Medicare cost report data available to develop cost weights for IPPS hospitals. As was done

in previous rebasings, these cost reports are from IPPS hospitals only (hospitals excluded from the IPPS and CAHs are not included) and are based on IPPS Medicare-allowable operating costs. IPPS Medicare-allowable operating costs are costs that are eligible to be paid under the IPPS. For example, the IPPS market basket excludes home health agency (HHA) costs as these costs would be paid under the HHA PPS and, therefore, these costs are not IPPS Medicare-allowable costs.

We are proposing to derive costs for eight major expenditures or cost categories for the 2014-based IPPS market basket from the CMS Medicare cost reports (Form 2552-10, OMB Control Number 0938-0050): Wages and Salaries, Employee Benefits, Contract Labor, Pharmaceuticals, Professional Liability Insurance (Malpractice), Blood and Blood Products, Home Office Contract Labor, and a residual "All Other" category. The residual "All Other" category reflects all remaining costs that are not captured in the other seven cost categories. We are proposing that, for the 2014-based IPPS market basket, we obtain costs for one additional major cost category from the Medicare cost reports compared to the FY 2010-based IPPS market basket—Home Office Contract Labor Costs. We describe below the detailed methodology for obtaining costs for each of the seven cost categories directly determined from the Medicare cost reports.

(1) Wages and Salaries Costs

To derive wages and salaries costs for the Medicare allowable cost centers, we are proposing to first calculate total unadjusted wages and salaries costs as reported on Worksheet S-3, part II. We are then proposing to remove the wages and salaries attributable to non-Medicare allowable cost centers (that is, excluded areas) as well as a portion of overhead wages and salaries attributable to these excluded areas. Specifically, wages and salaries costs are equal to total wages and salaries as reported on Worksheet S-3, Part II, Column 4, Line 1, less excluded area wages and salaries (reported on Worksheet S-3, Part II, Column 4, Lines 3 and 5 through 10) and less overhead wages and salaries attributable to the excluded areas.

Overhead wages and salaries are attributable to the entire IPPS facility. Therefore, we are proposing to only include the proportion attributable to the Medicare allowable cost centers. We are proposing to estimate the proportion of overhead wages and salaries that are not attributable to Medicare allowable cost centers (that is, excluded areas) by

multiplying the ratio of excluded area wages and salaries (as defined earlier) to total wages and salaries (Worksheet S-3, part II, Column 4, Line 1) by total overhead wages and salaries (Worksheet A, Column 1, Lines 4 through 18). A similar methodology was used to derive wages and salaries costs in the FY 2010-based IPPS market basket.

(2) Employee Benefits Costs

We are proposing to derive employee benefits costs using a similar methodology as the wages and salaries costs; that is, reflecting employee benefits costs attributable to the Medicare allowable cost centers. First, we calculate total unadjusted employee benefits costs as the sum of Worksheet S-3, Part II, Column 4, Lines 17, 18, 20, and 22. We then exclude those employee benefits attributable to the overhead wages and salaries for the non-Medicare allowable cost centers (that is, excluded areas). Employee benefits attributable to the non-Medicare allowable cost centers are derived by multiplying the ratio of total employee benefits (equal to the sum of Worksheet S-3, Part II, Column 4, Lines 17 through 25) to total wages and salaries (Worksheet S-3, Part II, Column 4, Line 1) by excluded overhead wages and salaries (as derived above for wages and salaries costs). A similar methodology was used in the FY 2010-based IPPS market basket.

(3) Contract Labor Costs

Contract labor costs are primarily associated with direct patient care services. Contract labor costs for services such as accounting, billing, and legal are estimated using other government data sources as described below. We are proposing to derive contract labor costs for the 2014-based IPPS market basket as the sum of Worksheet S-3, Part II, Column 4, Lines 11, 13 and 15. A similar methodology was used in the FY 2010-based IPPS market basket.

(4) Professional Liability Insurance Costs

We are proposing that professional liability insurance (PLI) costs (often referred to as malpractice costs) be equal to premiums, paid losses, and self-insurance costs reported on Worksheet S-2, Part I, Columns 1 through 3, Line 118.01. A similar methodology was used for the FY 2010-based IPPS market basket.

(5) Pharmaceuticals Costs

We are proposing to calculate pharmaceuticals costs using nonsalary costs reported for the Pharmacy cost

center (Worksheet A, Column 2, Line 15) and Drugs Charged to Patients cost center (Worksheet A, Column 2, Line 73) less estimated employee benefits attributable to these two cost centers. We are proposing to estimate these employee benefits costs by multiplying the ratio of total employee benefits (equal to the sum of Worksheet S-3, Part II, Column 4, Lines 17 through 25) to total wages and salaries (Worksheet S-3, Part II, Column 4, Line 1) by total wages and salaries costs for the Pharmacy and Drugs Charged to Patients cost centers (equal to the sum of Worksheet A, Column 1, Lines 15 and 73). A similar methodology was used for the FY 2010-based IPPS market basket.

(6) Blood and Blood Products Costs

We are proposing to calculate blood and blood products costs using nonsalary costs reported for the Whole Blood & Packed Red Blood Cells cost center (Worksheet A, Column 2, Line 62) and the Blood Storing, Processing, & Transfusing cost center (Worksheet A, Column 2, Line 63) less estimated employee benefits attributable to these two cost centers. We estimate these employee benefits costs by multiplying the ratio of total employee benefits (equal to the sum of Worksheet S-3, Part II, Column 4, Lines 17 through 25) to total wages and salaries (Worksheet S-3, Part II, Column 4, Line 1) by total wages and salaries for the Whole Blood & Packed Red Blood Cells and Blood Storing, Processing, & Transfusing cost centers (equal to the sum of Worksheet A, Column 1, Lines 62 and 63). A similar methodology was used for the FY 2010-based IPPS market basket.

(7) Home Office Contract Labor Costs

We are proposing to determine home office contract labor costs using data reported on Worksheet S-3, Part II, Column 4, line 14. Specifically, we are proposing to determine the Medicare allowable portion of these costs by multiplying them by the ratio of total Medicare allowable operating costs (as defined below in section IV.B.1.b. of the preamble to this proposed rule) to total operating costs (calculated as Worksheet B, Part I, Column 26, Line 202, less Worksheet B, Part I, Column 0, Lines 1 through 3). Home office contract labor costs in the FY 2010-based IPPS market basket were calculated using the U.S. Census Bureau's Bureau of Economic Analysis (BEA) Benchmark Input-Output (I-O) data, as described below in section IV.B.1.c. of the preamble to this proposed rule.

b. Final Major Cost Category Computation

After we derived costs for the seven major cost categories for each provider using the Medicare cost report data as previously described, we address data outliers using the following steps. First, we divide the costs for each of the seven categories by total Medicare allowable operating costs calculated for the provider to obtain cost weights for each PPS hospital. We are proposing that total Medicare allowable operating costs are equal to noncapital costs (Worksheet

B, part I, Column 26 less Worksheet B, part II, Column 26) that are attributable to the Medicare allowable cost centers of the hospital. Medicare allowable cost centers are Lines 30 through 35, 50, 51, 53 through 60, 62 through 76, 90, 91, 92.01 and 93.

We then remove those providers whose derived cost weights fall in the top and bottom five percent of provider-specific cost weights to ensure the removal of outliers. After the outliers have been removed, we sum the costs for each category across all remaining

providers. We then divide this by the sum of total Medicare allowable operating costs across all remaining providers to obtain a cost weight for the proposed 2014-based IPPS market basket for the given category. Finally, we calculate the residual “All Other” cost weight that reflects all remaining costs that are not captured in the seven cost categories listed.

Table IV–01 below shows the major cost categories and their respective cost weights as derived from the Medicare cost reports for this proposed rule.

TABLE IV–01—MAJOR COST CATEGORIES AS DERIVED FROM THE MEDICARE COST REPORTS

Major cost categories	FY 2010	Proposed 2014
Wages and Salaries	45.8	42.1
Employee Benefits	12.7	12.0
Contract Labor	1.8	1.8
Professional Liability Insurance (Malpractice)	1.3	1.2
Pharmaceuticals	5.4	5.9
Blood and Blood Products	1.1	0.8
Home Office Contract Labor*		4.2
“All Other” Residual	31.9	32.0

* Home office contract labor costs were included in the “All Other” residual cost weight of the FY 2010-based IPPS market basket.

From FY 2010 to 2014, the Wages and Salaries and Employee Benefits cost weights as calculated directly from the Medicare cost reports decreased by approximately 3.7 and 0.7 percentage points, respectively, while the Contract Labor cost weight was unchanged. The decrease in the Wages and Salaries cost weight occurred among most cost centers and in aggregate for the General Service (overhead), Inpatient Routine Service, Ancillary Service, and Outpatient Service cost centers.

As we did for the FY 2010-based IPPS market basket (78 FR 50597), we are

proposing to allocate contract labor costs to the Wages and Salaries and Employee Benefits cost weights based on their relative proportions for employed labor under the assumption that contract labor costs are comprised of both wages and salaries and employee benefits. The contract labor allocation proportion for wages and salaries is equal to the Wages and Salaries cost weight as a percent of the sum of the Wages and Salaries cost weight and the Employee Benefits cost weight. Using the 2014 Medicare cost report data, this percentage is 78

percent. Therefore, we are proposing to allocate approximately 78 percent of the Contract Labor cost weight to the Wages and Salaries cost weight and 22 percent to the Employee Benefits cost weight. The FY 2010-based IPPS market basket also allocated 78 percent of the Contract Labor cost weight to the Wages and Salaries cost weight.

Table IV–02 below shows the Wages and Salaries and Employee Benefits cost weights after contract labor allocation for the FY 2010-based IPPS market basket and the proposed 2014-based IPPS market basket.

TABLE IV–02—WAGES AND SALARIES AND EMPLOYEE BENEFITS COST WEIGHTS AFTER CONTRACT LABOR ALLOCATION

Major cost categories	FY 2010-based IPPS market basket	Proposed 2014-based IPPS market basket
Wages and Salaries	47.2	43.4
Employee Benefits	13.1	12.4

c. Derivation of the Detailed Cost Weights

To further divide the “All Other” residual cost weight estimated from the 2014 Medicare cost report data into more detailed cost categories, we are proposing to use the 2007 Benchmark I–O “Use Tables/Before Redefinitions/Purchaser Value” for NAICS 622000, Hospitals, published by the BEA. These data are publicly available at the following Web site: <http://www.bea.gov/>

industry/io_annual.htm. The BEA Benchmark I–O data are generally scheduled for publication every 5 years on a lagged basis, with the most recent data available for 2007. The 2007 Benchmark I–O data are derived from the 2007 Economic Census and are the building blocks for BEA’s economic accounts. Therefore, they represent the most comprehensive and complete set of data on the economic processes or mechanisms by which output is

produced and distributed.³⁷ BEA also produces Annual I–O estimates. However, while based on a similar methodology, these estimates reflect less comprehensive and less detailed data sources and are subject to revision when benchmark data become available. Instead of using the less detailed Annual I–O data, we are proposing to

³⁷ http://www.bea.gov/papers/pdf/IOmanual_092906.pdf.

inflate the detailed 2007 Benchmark I–O data forward to 2014 by applying the annual price changes from the respective price proxies to the appropriate market basket cost categories that are obtained from the 2007 Benchmark I–O data. In our calculations for this proposed rule, we repeated this practice for each year. We then calculated the cost shares that each cost category represents of the 2007 data inflated to 2014. These resulting 2014 cost shares were applied to the “All Other” residual cost weight to obtain the detailed cost weights for the proposed 2014-based IPPS market basket. For example, the cost for Food: Direct Purchases represents 7.3 percent of the sum of the “All Other” 2007 Benchmark I–O Hospital Expenditures inflated to 2014. Therefore, the Food: Direct Purchases cost weight represents 7.3 percent of the proposed 2014-based IPPS market basket’s “All Other” cost category (32.0 percent), yielding a Food: Direct Purchases proposed cost weight of 2.3 percent in the proposed 2014-based IPPS market basket (0.073×32.0 percent = 2.3 percent). For the FY 2010-based IPPS market basket (78 FR 50597), we used the same methodology utilizing the 2002 Benchmark I–O data (aged to FY 2010).

Using this methodology, we are proposing to derive 18 detailed cost categories from the proposed 2014-based IPPS market basket residual cost weight (32.0 percent). These categories are: (1) Fuel: Oil and Gas; (2) Electricity; (3) Water and Sewerage; (4) Food: Direct Purchases; (5) Food: Contract Services; (6) Chemicals; (7) Medical Instruments; (8) Rubber and Plastics; (9) Paper and Printing Products; (10) Miscellaneous Products; (11) Professional Fees: Labor-Related; (12) Administrative and Facilities Support Services; (13) Installation, Maintenance, and Repair Services; (14) All Other: Labor-Related Services; (15) Professional Fees: Nonlabor-Related; (16) Financial Services; (17) Telephone Services; and (18) All Other: Nonlabor-Related Services.

Similar to the 2013-based LTCH market basket, the proposed 2014-based IPPS market basket does not include separate cost categories for Apparel, Machinery and Equipment, and Postage. Due to the small weights associated with these detailed categories and relatively stable price growth in the applicable price proxy, we believe that consolidating these smaller cost category weights with other cost categories in the proposed market basket that experience similar price increases eliminates unnecessary complexity to the market basket without having a

material impact on the total market basket increase. Therefore, we are proposing to include Apparel and Machinery and Equipment in the Miscellaneous Products cost category and Postage in the All-Other: Nonlabor-Related Services cost category. We note that the machinery and equipment expenses are for equipment that is paid for in a given year and not depreciated over the asset’s useful life. Depreciation expenses for movable equipment are reflected in the proposed 2014-based Capital Input Price Index (described in section IV.D. of the preamble of this proposed rule). For the proposed 2014-based IPPS market basket, we also are proposing to include a separate cost category for Installation, Maintenance, and Repair Services in order to proxy these costs by a price index that better reflects the price changes of labor associated with maintenance-related services.

2. Selection of Proposed Price Proxies

After computing the proposed 2014 cost weights for the IPPS market basket, it was necessary to select appropriate wage and price proxies to reflect the rate of price change for each expenditure category. With the exception of the proxy for professional liability insurance (PLI), all the proxies we are proposing are based on Bureau of Labor Statistics (BLS) data and are grouped into one of the following BLS categories:

- **Producer Price Indexes—**Producer Price Indexes (PPIs) measure price changes for goods sold in markets other than the retail market. PPIs are preferable price proxies for goods and services that hospitals purchase as inputs because PPIs better reflect the actual price changes encountered by hospitals. For example, we are proposing to use a PPI for prescription drugs, rather than the Consumer Price Index (CPI) for prescription drugs, because hospitals generally purchase drugs directly from a wholesaler. The PPIs that we are proposing to use measure price changes at the final stage of production.
- **Consumer Price Indexes—**Consumer Price Indexes (CPIs) measure change in the prices of final goods and services bought by the typical consumer. Because they may not represent the price faced by a producer, we are proposing to use CPIs only if an appropriate PPI is not available, or if the expenditures are more like those faced by retail consumers in general rather than by purchasers of goods at the wholesale level. For example, the CPI for food purchased away from home is proposed to be used as a proxy for contracted food services.

- **Employment Cost Indexes—**Employment Cost Indexes (ECIs) measure the rate of change in employee wage rates and employer costs for employee benefits per hour worked. These indexes are fixed-weight indexes and strictly measure the change in wage rates and employee benefits per hour. Appropriately, they are not affected by shifts in employment mix.

We evaluated the price proxies using the criteria of reliability, timeliness, availability, and relevance. Reliability indicates that the index is based on valid statistical methods and has low sampling variability. Timeliness implies that the proxy is published regularly, preferably at least once a quarter. Availability means that the proxy is publicly available. Finally, relevance means that the proxy is applicable and representative of the cost category weight to which it is applied. We believe the proposed PPIs, CPIs, and ECIs selected meet these criteria.

Below we present a detailed explanation of the price proxies that we are proposing for each cost category weight. We note that many of the proxies that we are proposing to use for the 2014-based IPPS market basket are the same as those used for the FY 2010-based IPPS market basket.

(1) Wages and Salaries

We are proposing to use the ECI for Wages and Salaries for All Civilian Workers in Hospitals (BLS series code CIU10262200000001) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(2) Employee Benefits

We are proposing to use the ECI for Total Benefits for All Civilian Workers in Hospitals to measure the price growth of this cost category. This ECI is calculated using the ECI for Total Compensation for All Civilian Workers in Hospitals (BLS series code CIU10162200000001) and the relative importance of wages and salaries within total compensation. This is the same price proxy used in the FY 2010-based IPPS market basket.

(3) Fuel: Oil and Gas

We are proposing to change the proxy used for the Fuel: Oil and Gas cost category. The FY 2010-based IPPS market basket uses the PPI Industry for Petroleum Refineries (BLS series code PCU32411–32411–) to proxy these expenses.

For the proposed 2014-based IPPS market basket, we are proposing to use a blend of the PPI Industry for Petroleum Refineries (BLS series code

PCU32411–32411–) and the PPI Commodity for Natural Gas (BLS series code WPU0531). Our analysis of the BEA 2007 Benchmark I–O data (use table before redefinitions, purchaser's value for NAICS 622000 [Hospitals]) shows that petroleum refineries expenses account for approximately 70 percent and Natural Gas expenses account for approximately 30 percent of the Fuel: Oil and Gas expenses. Therefore, we are proposing a blended proxy of 70 percent of the PPI Industry for Petroleum Refineries (BLS series code PCU32411–32411–) and 30 percent of the PPI Commodity for Natural Gas (BLS series code WPU0531). We believe that these two price proxies are the most technically appropriate indices available to measure the price growth of the Fuel: Oil and Gas cost category in the proposed 2014-based IPPS market basket.

(4) Electricity

We are proposing to use the PPI Commodity for Commercial Electric Power (BLS series code WPU0542) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(5) Water and Sewerage

We are proposing to use the CPI for Water and Sewerage Maintenance (All Urban Consumers) (BLS series code CUUR0000SEHG01) to measure the price growth of this cost category. This

is the same price proxy used in the FY 2010-based IPPS market basket.

(6) Professional Liability Insurance

We are proposing to proxy price changes in hospital professional liability insurance premiums (PLI) using percentage changes as estimated by the CMS Hospital Professional Liability Index. To generate these estimates, we collected commercial insurance premiums for a fixed level of coverage while holding nonprice factors constant (such as a change in the level of coverage). This is the same price proxy used in the FY 2010-based IPPS market basket.

(7) Pharmaceuticals

We are proposing to use the PPI Commodity for Pharmaceuticals for Human Use, Prescription (BLS series code WPUSI07003) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(8) Food: Direct Purchases

We are proposing to use the PPI Commodity for Processed Foods and Feeds (BLS series code WPU02) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(9) Food: Contract Services

We are proposing to use the CPI for Food Away From Home (All Urban Consumers) (BLS series code CUUR0000SEFV) to measure the price

growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(10) Chemicals

We are proposing to continue to use a four-part blended index composed of the PPI Industry for Industrial Gas Manufacturing (BLS series code PCU325120325120P), the PPI Industry for Other Basic Inorganic Chemical Manufacturing (BLS series code PCU32518–32518–), the PPI Industry for Other Basic Organic Chemical Manufacturing (BLS series code PCU32519–32519–), and the PPI Industry for Soap and Cleaning Compound Manufacturing (BLS series code PCU32561–32561–). We are proposing to update the blended weights using 2007 Benchmark I–O data, which we also are proposing to use for the proposed 2014-based IPPS market basket. The FY 2010-based IPPS market basket included the same blended chemical price proxy, but used the 2002 Benchmark I–O data to determine the weights of the blended chemical price index. The 2007 Benchmark I–O data has a higher weight for organic chemical products and a lower weight for the other chemical products compared to the 2002 Benchmark I–O data.

Table IV–03 below shows the proposed weights for each of the four PPIs used to create the blended index compared to those used for the FY 2010-based IPPS market basket.

TABLE IV–03—BLENDED CHEMICAL WEIGHTS

Name	FY 2010-based IPPS weights (%)	Proposed 2014-based IPPS weights (%)	NAICS
PPI for Industrial Gas Manufacturing	35	32	325120
PPI for Other Basic Inorganic Chemical Manufacturing	25	17	325180
PPI for Other Basic Organic Chemical Manufacturing	30	45	325190
PPI for Soap and Cleaning Compound Manufacturing	10	6	325610

(11) Blood and Blood Products

We are proposing to use the PPI Industry for Blood and Organ Banks (BLS series code PCU621991621991) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(12) Medical Instruments

We are proposing to use a blended price proxy for the Medical Instruments cost category. The 2007 Benchmark Input-Output data shows an approximate 50/50 split between

Surgical and Medical Instruments and Medical and Surgical Appliances and Supplies for this cost category.

Therefore, we are proposing a blend composed of 50 percent of the PPI Commodity for Surgical and Medical Instruments (BLS series code WPU1562) and 50 percent of the PPI Commodity for Medical and Surgical Appliances and Supplies (BLS series code WPU1563). The FY 2010-based IPPS market basket used the single, higher level PPI Commodity for Medical, Surgical, and Personal Aid Devices (BLS series code WPU156). We believe that

the proposed price proxy better reflects the mix of expenses for this cost category as obtained from the 2007 Benchmark I–O data.

(13) Rubber and Plastics

We are proposing to use the PPI Commodity for Rubber and Plastic Products (BLS series code WPU07) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(14) Paper and Printing Products

We are proposing to use the PPI Commodity for Converted Paper and Paperboard Products (BLS series code WPU0915) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(15) Miscellaneous Products

We are proposing to use the PPI Commodity for Finished Goods Less Food and Energy (BLS series code WPUFD4131) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(16) Professional Fees: Labor-Related

We are proposing to use the ECI for Total Compensation for Private Industry Workers in Professional and Related (BLS series code CIU2010000120000I) to measure the price growth of this category. It includes occupations such as legal, accounting, and engineering services. This is the same price proxy used in the FY 2010-based IPPS market basket.

(17) Administrative and Facilities Support Services

We are proposing to use the ECI for Total Compensation for Private Industry Workers in Office and Administrative Support (BLS series code CIU2010000220000I) to measure the price growth of this category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(18) Installation, Maintenance, and Repair Services

We are proposing to use the ECI for Total Compensation for All Civilian Workers in Installation, Maintenance, and Repair (BLS series code CIU1010000430000I) to measure the price growth of this new cost category. Previously these costs were included in the All Other: Labor-Related Services category and were proxied by the ECI for Total Compensation for Private Industry Workers in Service Occupations (BLS series code CIU2010000300000I). We believe that this index better reflects the price changes of labor associated with maintenance-related services and its incorporation represents a technical improvement to the market basket.

(19) All Other: Labor-Related Services

We are proposing to use the ECI for Total Compensation for Private Industry Workers in Service Occupations (BLS series code CIU2010000300000I) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(20) Professional Fees: Nonlabor-Related

We are proposing to use the ECI for Total Compensation for Private Industry Workers in Professional and Related (BLS series code CIU2010000120000I) to measure the price growth of this category. This is the same price proxy that we are proposing to use for the Professional Fees: Labor-Related cost category and the same price proxy used in the FY 2010-based IPPS market basket.

(21) Financial Services

We are proposing to use the ECI for Total Compensation for Private Industry Workers in Financial Activities (BLS series code CIU201520A000000I) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(22) Telephone Services

We are proposing to use the CPI for Telephone Services (BLS series code CUUR0000SEED) to measure the price growth of this cost category. This is the same price proxy used in the FY 2010-based IPPS market basket.

(23) All Other: Nonlabor-Related Services

We are proposing to use the CPI for All Items Less Food and Energy (BLS series code CUUR0000SA0L1E) to measure the price growth of this cost category. We believe that using the CPI for All Items Less Food and Energy avoids double counting of changes in food and energy prices as they are already captured elsewhere in the market basket. This is the same price proxy used in the FY 2010-based IPPS market basket.

Table IV–04 below sets forth the proposed 2014-based IPPS market basket, including the cost categories and their respective weights and price proxies. For comparison purposes, the corresponding FY 2010-based IPPS market basket cost weights also are listed.

TABLE IV–04—PROPOSED 2014-BASED IPPS MARKET BASKET COST CATEGORIES, COST WEIGHTS, AND PRICE PROXIES COMPARED TO FY 2010-BASED IPPS MARKET BASKET COST WEIGHTS

Cost categories	FY 2010-based IPPS market basket cost weights	Proposed 2014-based IPPS market basket cost weights	Proposed 2014-based IPPS market basket price proxies
1. Compensation	60.3	55.8	
A. Wages and Salaries ¹	47.2	43.4	ECI for Wages and Salaries for All Civilian Workers in Hospitals.
B. Employee Benefits ¹	13.1	12.4	ECI for Total Benefits for All Civilian Workers in Hospitals.
2. Utilities	2.2	2.5	
A. Fuel: Oil and Gas	0.4	1.3	Blend of PPIs for Petroleum Refineries and Natural Gas.
B. Electricity	1.7	1.0	PPI Commodity for Commercial Electric Power.
C. Water and Sewerage	0.1	0.1	CPI for Water and Sewerage Maintenance (All Urban Consumers).
3. Professional Liability Insurance	1.3	1.2	CMS Hospital Professional Liability Insurance Premium Index.
4. All Other	36.1	40.5	
A. All Other Products	19.5	17.4	
(1.) Pharmaceuticals	5.4	5.9	PPI Commodity for Pharmaceuticals for Human Use, Prescription.
(2.) Food: Direct Purchases	4.2	2.3	PPI Commodity for Processed Foods and Feeds.

TABLE IV-04—PROPOSED 2014-BASED IPPS MARKET BASKET COST CATEGORIES, COST WEIGHTS, AND PRICE PROXIES COMPARED TO FY 2010-BASED IPPS MARKET BASKET COST WEIGHTS—Continued

Cost categories	FY 2010-based IPPS market basket cost weights	Proposed 2014-based IPPS market basket cost weights	Proposed 2014-based IPPS market basket price proxies
(3.) Food: Contract Services	0.6	1.3	CPI for Food Away From Home (All Urban Consumers).
(4.) Chemicals	1.5	0.9	Blend of Chemical PPIs.
(5.) Blood and Blood Products	1.1	0.8	PPI Industry for Blood and Organ Banks.
(6.) Medical Instruments	2.6	2.9	Blend of PPI for Surgical and Medical Instruments and PPI for Medical and Surgical Appliances and Supplies.
(7.) Rubber and Plastics	1.6	0.8	PPI Commodity for Rubber and Plastic Products.
(8.) Paper and Printing Products	1.5	1.5	PPI Commodity for Converted Paper and Paperboard Products.
(9.) Miscellaneous Products ²	1.0	1.1	PPI Commodity for Finished Goods less Food and Energy.
B. Labor-Related Services	9.2	12.5	
(1.) Professional Fees: Labor-Related	5.5	6.8	ECI for Total Compensation for Private Industry Workers in Professional and Related.
(2.) Administrative and Facilities Support Services	0.6	1.0	ECI for Total Compensation for Private Industry Workers in Office and Administrative Support.
(3.) Installation, Maintenance and Repair Services		2.4	ECI for Total Compensation for Civilian Workers in Installation, Maintenance, and Repair.
(4.) All Other: Labor-Related Services	3.1	2.3	ECI for Total Compensation for Private Industry Workers in Service Occupations.
C. Nonlabor-Related Services	7.4	10.7	
(1.) Professional Fees: Nonlabor-Related	3.7	5.1	ECI for Total Compensation for Private Industry Workers in Professional and Related.
(2.) Financial Services	1.2	3.0	ECI for Total Compensation for Private Industry Workers in Financial Activities.
(3.) Telephone Services	0.6	0.8	CPI for Telephone Services.
(4.) All Other: Nonlabor-Related Services ³	1.9	1.7	CPI for All Items less Food and Energy.
Total	100.0	100.0	

Note: The cost weights are calculated using three decimal places. For presentational purposes, we are displaying one decimal and therefore, the detail may not add to the total due to rounding.

¹ Contract labor is distributed to wages and salaries and employee benefits based on the share of total compensation that each category represents.

² The FY 2010-based IPPS market basket Miscellaneous Products cost category also includes Apparel and Machinery and Equipment cost categories. These costs were not broken out separately in the 2014-based IPPS market basket.

³ The FY 2010-based IPPS market basket All Other: Nonlabor-Related Services cost category also includes the Postage cost category. These costs were not broken-out separately in the 2014-based IPPS market basket.

Table IV-05 below compares both the historical and forecasted percent changes in the FY 2010-based IPPS market basket and the proposed 2014-based IPPS market basket. The forecasted growth rates in Table IV-05 are based on IHS Global Insight, Inc.'s (IGI) fourth quarter 2016 forecast with historical data through third quarter 2016.

TABLE IV-05.—FY 2010-BASED AND PROPOSED 2014-BASED IPPS HOSPITAL OPERATING INDEX PERCENT CHANGE, FY 2013 THROUGH FY 2020

Fiscal Year (FY)	FY 2010-based IPPS market basket percent change	Proposed 2014-based IPPS market basket percent change
Historical data:		
FY 2013	2.0	2.0
FY 2014	1.8	1.8
FY 2015	1.8	1.6
FY 2016	1.7	1.7
Average FYs 2013–2016	1.8	1.8
Forecast:		
FY 2017	2.6	2.7
FY 2018	2.9	2.9
FY 2019	3.0	3.0
FY 2020	3.0	3.0

TABLE IV—05.—FY 2010-BASED AND PROPOSED 2014-BASED IPPS HOSPITAL OPERATING INDEX PERCENT CHANGE, FY 2013 THROUGH FY 2020—Continued

Fiscal Year (FY)	FY 2010-based IPPS market basket percent change	Proposed 2014-based IPPS market basket percent change
Average FYs 2017–2020	2.9	2.9

Source: IHS Global Insight, Inc., 4th Quarter 2016 forecast.

There is no difference between the average percent change in the FY 2010-based and the proposed 2014-based IPPS market basket over the FY 2013 through FY 2016 time period. For FY 2018, the increase is 2.9 percent for both the FY 2010-based and proposed 2014-based IPPS market baskets.

3. Labor-Related Share

Under section 1886(d)(3)(E) of the Act, the Secretary estimates from time to time the proportion of payments that are labor-related. Section 1886(d)(3)(E) of the Act states that the Secretary shall adjust the proportion, (as estimated by the Secretary from time to time) of hospitals' costs which are attributable to wages and wage-related costs, of the DRG prospective payment rates. We refer to the proportion of hospitals' costs that are attributable to wages and wage-related costs as the "labor-related share."

The labor-related share is used to determine the proportion of the national PPS base payment rate to which the area wage index is applied. We include a cost category in the labor-related share if the costs are *labor intensive* and *vary with the local labor market*. For the FY 2018 IPPS/LTCH PPS proposed rule, we are proposing to include in the labor-related share the national average proportion of operating costs that are attributable to the following cost categories in the proposed 2014-based IPPS market basket: Wages and Salaries, Employee Benefits, Professional Fees: Labor-Related, Administrative and Facilities Support Services, Installation, Maintenance, and Repair Services, and All Other: Labor-Related Services, as we did in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50594). As noted in section IV.B.1.c. of the preamble of this proposed rule, for the proposed 2014-based IPPS market basket, we are proposing the creation of a separate cost category for Installation, Maintenance, and Repair Services. These expenses were previously included in the All Other: Labor-Related Services cost category in the FY 2010-based IPPS market basket, along with other services, including, but not limited to, janitorial,

waste management, security, and dry cleaning/laundry services. Because these services tend to be labor-intensive and are mostly performed at the facility (and, therefore, unlikely to be purchased in the national market), we continue to believe that they meet our definition of labor-related services.

Similar to the FY 2010-based IPPS market basket, we are proposing that the Professional Fees: Labor-Related cost category includes expenses associated with advertising and a proportion of legal services, accounting and auditing, engineering, management consulting, and management of companies and enterprises expenses. As was done in the FY 2010-based IPPS market basket rebasing, we are proposing to determine the proportion of legal, accounting and auditing, engineering, and management consulting services that meet our definition of labor-related services based on a survey of hospitals conducted by CMS in 2008. We notified the public of our intent to conduct this survey on December 9, 2005 (70 FR 73250) and received no comments (71 FR 8588).

A discussion of the composition of the survey and poststratification can be found in the FY 2010 IPPS/LTCH PPS final rule (74 FR 43850 through 43856). Based on the weighted results of the survey, we determined that hospitals purchase, on average, the following portions of contracted professional services outside of their local labor market:

- 34 percent of accounting and auditing services;
- 30 percent of engineering services;
- 33 percent of legal services; and
- 42 percent of management consulting services.

We are proposing to apply each of these percentages to its respective Benchmark I–O cost category underlying the professional fees cost category. This is the methodology that we used to separate the FY 2010-based IPPS market basket professional fees cost category into Professional Fees: Labor-Related and Professional Fees: Nonlabor-Related cost categories. We are proposing to use the same methodology and survey results to

separate the professional fees costs for the 2014-based IPPS market basket into Professional Fees: Labor-Related and Professional Fees: Nonlabor-Related cost categories. We believe these survey results are appropriate to use for the 2014-based IPPS market basket as they empirically determine the proportion of contracted professional services purchased by the industry that is attributable to local firms and the proportion that is purchased from national firms.

In the proposed 2014-based IPPS market basket, nonmedical professional fees that were subject to allocation based on these survey results represent 4.9 percent of total operating costs (and are limited to those fees related to Accounting & Auditing, Legal, Engineering, and Management Consulting services). Based on our survey results, we are proposing to apportion 3.1 percentage points of the 4.9 percentage point figure into the Professional Fees: Labor-Related share cost category and designating the remaining 1.8 percentage point into the Professional Fees: Nonlabor-Related cost category.

In addition to the professional services listed earlier, we also classify a proportion of the home office expenses into the Professional Fees: Labor-Related cost category as was done in the previous rebasing. For the FY 2010-based IPPS market basket, we obtained home office expenses from the Benchmark I–O data for the NAICS 55 industry (Management of Companies and Enterprises). As stated in section IV.B.1.a. of the preamble to this proposed rule, for the 2014-based IPPS market basket, we are proposing to obtain these data from the Medicare cost reports. We believe that many of the home office costs are labor-intensive and vary with the local labor market. However, data indicate that not all IPPS hospitals with home offices have home offices located in their local labor market. Therefore, we are proposing to include in the labor-related share only a proportion of the home office expenses based on the methodology described below.

For the FY 2010-based IPPS market basket, we used data primarily from the Medicare cost reports and a CMS database of Home Office Medicare Records (HOMER) (a database that provides city and state information (addresses) for home offices). We determined the proportion of costs that should be allocated to the labor-related share based on the percent of hospital home office compensation as reported in Worksheet S-3, Part II. Using this methodology, we determined that 62 percent of hospitals' home office compensation costs were for home offices located in their respective local labor markets (defined as the same Metropolitan Statistical Area (MSA)). Therefore, we classified 62 percent of these costs into the Professional Fees: Labor-Related Services cost category and the remaining 38 percent into the Professional Fees: Nonlabor-Related Services cost category for the FY 2010-based IPPS market basket. For a detailed discussion of this analysis, we refer readers to the FY 2014 IPPS/LTCH PPS final rule (78 FR 50601).

For the proposed 2014-based IPPS market basket, we conducted a similar analysis of home office data. For consistency, we believe that it is important for our analysis on home office data to be conducted on the same IPPS hospitals used to derive the proposed 2014-based IPPS market basket cost weights. The Medicare cost

report requires a hospital to report information regarding their home office provider. Approximately 64 percent of IPPS hospitals reported some type of home office information on their Medicare cost report for 2014 (for example, city, State, and zip code). Using the data reported on the Medicare cost report, we compared the location of the hospital with the location of the hospital's home office. We then determined the proportion of costs that should be allocated to the labor-related share based on the percent of total hospital home office compensation costs for those hospitals that had home offices located in their respective local labor markets—defined as being in the same MSA. We determined a hospital's and home office's MSAs using their zip code information from the Medicare cost report.

Similar to the FY 2010-based IPPS market basket, we determined the proportion of costs that should be allocated to the labor-related share based on the percent of hospital home office compensation as reported in Worksheet S-3, Part II. Using this methodology, we determined that 60 percent of hospitals' home office compensation costs were for home offices located in their respective local labor markets. Therefore, we are proposing to allocate 60 percent of home office expenses to the labor-related share.

In the proposed 2014-based IPPS market basket, home office expenses that were subject to allocation based on the home office allocation methodology represent 4.2 percent of total operating costs. Based on the results of the home office analysis discussed above, we are apportioning 2.5 percentage points of the 4.2 percentage points figure into the Professional Fees: Labor-Related cost category and designating the remaining 1.7 percentage points into the Professional Fees: Nonlabor-Related cost category. In summary, based on the two allocations mentioned above, we apportioned 5.6 percentage points of the professional fees and home office cost weights into the Professional Fees: Labor-Related cost category. This amount is added to the portion of professional fees that we already identified as labor-related using the I-O data such as contracted advertising and marketing costs (approximately 1.2 percentage point of total operating costs) resulting in a Professional Fees: Labor-Related cost weight of 6.8 percent.

Below is a table comparing the proposed 2014-based labor-related share and the FY 2010-based labor-related share. As discussed in section IV.B.1.b. of the preamble of this proposed rule, the Wages and Salaries and Employee Benefits cost weights reflect contract labor costs.

TABLE IV-06—COMPARISON OF THE FY 2010-BASED LABOR-RELATED SHARE AND THE PROPOSED 2014-BASED LABOR-RELATED SHARE

	FY 2010-based IPPS market basket cost weights	Proposed 2014-based IPPS market basket cost weights
Wages and Salaries	47.2	43.4
Employee Benefits	13.1	12.4
Professional Fees: Labor-Related	5.5	6.8
Administrative and Facilities Support Services	0.6	1.0
Installation, Maintenance, and Repair Services ¹		2.4
All Other: Labor-Related Services	3.1	2.3
Total Labor-Related Share	69.6	68.3

Note: Detail may not add to total due to rounding.

¹ Installation, Maintenance, and Repair Services costs were previously included in the All Other: Labor-Related Services cost category of the FY 2010-based IPPS market basket.

Using the cost category weights from the proposed 2014-based IPPS market basket, we calculated a labor-related share of 68.3 percent, approximately 1.3 percentage points lower than the current labor-related share of 69.6 percent. Therefore, we are proposing to use a labor-related share of 68.3 percent for discharges occurring on or after October 1, 2017. We continue to believe, as we

have stated in the past, that these operating cost categories are related to, influenced by, or vary with the local markets. Therefore, our definition of the labor-related share continues to be consistent with section 1886(d)(3) of the Act. We note that section 403 of Pub. L. 108-173 amended sections 1886(d)(3)(E) and 1886(d)(9)(C)(iv) of the Act to provide that the Secretary must employ

62 percent as the labor-related share unless 62 percent would result in lower payments to a hospital than would otherwise be made.

C. Market Basket for Certain Hospitals Presently Excluded From the IPPS

In the FY 2010 IPPS/R Y 2010 LTCH PPS final rule (74 FR 43857), we adopted the use of the FY 2006-based IPPS operating market basket percentage

increase to update the target amounts for children's hospitals, PPS-excluded cancer hospitals and religious nonmedical health care institutions (RNHCIs). Children's hospitals and PPS-excluded cancer hospitals and RNHCIs are still reimbursed solely under the reasonable cost-based system, subject to the rate-of-increase limits. Under these limits, an annual target amount (expressed in terms of the inpatient operating cost per discharge) is set for each hospital based on the hospital's own historical cost experience trended forward by the applicable rate-of-increase percentages.

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50603), under the broad authority in sections 1886(b)(3)(A) and (B), 1886(b)(3)(E), and 1871 of the Act and section 4454 of the BBA, consistent with our use of the IPPS operating market basket percentage increase to update target amounts, we adopted the use of the FY 2010-based IPPS operating market basket percentage increase to update the target amounts for children's hospitals, PPS-excluded cancer hospitals, and RNHCIs that are paid on the basis of reasonable cost subject to the rate-of-increase limits under § 413.40. In addition, as discussed in the FY 2015 IPPS/LTCH PPS final rule (79 FR 50156 through 50157), consistent with §§ 412.23(g), 413.40(a)(2)(ii)(A), and 413.40(c)(3)(viii), we also have used the percentage increase in the FY 2010-based IPPS operating market basket to update the target amounts for short-term acute care hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). These hospitals also are paid on the basis of reasonable cost, subject to the rate-of-increase limits under § 413.40.

Due to the small number of children's and cancer hospitals and RNHCIs and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico and because these facilities provide limited Medicare cost report data, we are unable to create a separate market basket specifically for these facilities. Due to the limited cost report data available, we believe that the proposed 2014-based IPPS operating market basket most closely represents the cost structure of children's hospitals, PPS-excluded cancer hospitals, RNHCIs, and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico. We believe this is appropriate as the IPPS operating market basket would reflect the input price growth for providing inpatient hospital services (similar to the services provided by the

above excluded facilities) based on the specific mix of goods and services required. Therefore, we are proposing to use the 2014-based IPPS market basket percentage increase to update the target amounts for children's hospitals, PPS-excluded cancer hospitals, RNHCIs, and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico that are paid on the basis of reasonable cost subject to the rate-of-increase limits under § 413.40. We believe it is the best available measure of the average increase in the prices of the goods and services purchased by children's hospitals, the cancer hospitals, RNHCIs, and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico in order to provide care.

D. Rebasings and Revising the Capital Input Price Index (CIPI)

The CIPI was originally described in the FY 1993 IPPS final rule (57 FR 40016). There have been subsequent discussions of the CIPI presented in the IPPS proposed and final rules. The FY 2014 IPPS/LTCH PPS final rule (78 FR 50603 through 50607) described the most recent rebasing and revision of the CIPI to a FY 2010 base year, which reflected the capital cost structure of IPPS hospitals available at that time.

For the FY 2018 IPPS update, we are proposing to rebase and revise the CIPI to a 2014 base year to reflect a more current structure of capital costs for IPPS hospitals. This proposed 2014-based CIPI was derived using 2014 cost reports for IPPS hospitals, which includes providers whose cost reporting period began on or after October 1, 2013, and prior to September 30, 2014. While we proposed and finalized the title of the current CIPI in the FY 2014 IPPS/LTCH proposed and final rules as "FY 2010-based CIPI", for the proposed CIPI, we are now proposing to simply refer to the proposed CIPI as "2014-based CIPI" (dropping the reference to FY). As discussed in section IV.B. of the preamble of this proposed rule, for the 2014-based IPPS operating market basket, we are proposing this change in naming convention for the market basket because the base year cost weight data for the proposed market basket do not reflect only fiscal year data. Similarly, the proposed 2014-based CIPI uses Medicare cost report data and other government data that reflect 2014 fiscal year, 2014 calendar year, and 2014 State fiscal year expenses to determine the base year cost weights and vintage weights. Given that it is based on a mix of classifications of 2014 data, we are proposing to refer to the CIPI as "2014-based" instead of "FY 2014-based" or

"CY 2014-based". However, the methods and data used to derive each of these CIPI are similar. As with the FY 2010-based index, we are proposing to develop two sets of weights to derive the proposed 2014-based CIPI. The first set of weights identifies the proportion of hospital capital expenditures attributable to each expenditure category, while the second set of weights is a set of relative vintage weights for depreciation and interest. The set of vintage weights is used to identify the proportion of capital expenditures within a cost category that is attributable to each year over the useful life of the capital assets in that category. A more thorough discussion of vintage weights is provided later in this section.

Using 2014 Medicare cost reports, we are able to group capital costs into the following categories: Depreciation, Interest, Lease, and Other. For each of these categories, we are proposing to determine what proportion of total capital costs the category represents using the data reported by IPPS hospitals on Worksheet A-7, which is the same methodology used for the FY 2010-based CIPI. As shown in the left column of Table IV-07, in 2014 depreciation expenses accounted for 66.4 percent of total capital costs, interest expenses accounted for 16.3 percent, leasing expenses accounted for 11.8 percent, and other capital expenses accounted for 5.5 percent.

We also are proposing to allocate lease costs across each of the remaining capital cost categories as was done in the FY 2010-based CIPI. This would result in three primary capital cost categories in the proposed 2014-based CIPI: Depreciation, Interest, and Other. Lease costs are unique in that they are not broken out as a separate cost category in the proposed 2014-based CIPI. Rather, we are proposing to proportionally distribute leasing costs among the cost categories of Depreciation, Interest, and Other, reflecting the assumption that the underlying cost structure of leases is similar to that of capital costs in general. As was done for the FY 2010-based CIPI, we are proposing to assume that 10 percent of the lease costs as a proportion of total capital costs represents overhead and to assign those costs to the Other capital cost category accordingly. Therefore, we are assuming that approximately 1.2 percent (11.8 percent x 0.1) of total capital costs represent lease costs attributable to overhead, and we are proposing to add this 1.2 percent to the 5.5 percent Other cost category weight. We are then proposing to distribute the remaining lease costs

(10.6 percent, or 11.8 percent – 1.2 percent) proportionally across the three cost categories (Depreciation, Interest, and Other) based on the proportion that these categories comprise of the sum of the Depreciation, Interest, and Other cost categories (excluding lease expenses). For example, the Other cost category represented 6.3 percent of all

three cost categories (Depreciation, Interest, and Other) prior to any lease expenses being allocated. This 6.3 percent is applied to the 10.6 percent of remaining lease expenses so that another 0.7 percent of lease expenses as a percent of total capital costs is allocated to the Other cost category. Therefore, the resulting proposed Other

cost weight is 7.4 percent (5.5 percent + 1.2 percent + 0.7 percent). This is the same methodology used for the FY 2010-based CIPI. The resulting cost weights of the proposed allocation of lease expenses are shown in the right column of Table IV–07.

TABLE IV–07—PROPOSED ALLOCATION OF LEASE EXPENSES FOR THE PROPOSED 2014-BASED CIPI

Cost categories	Proposed cost shares obtained from medicare cost reports (percent of total capital costs)	Proposed cost shares after allocation of lease expenses (percent of total capital costs)
Depreciation	66.4	74.4
Interest	16.3	18.2
Lease	11.8	
Other	5.5	7.4

Finally, we are proposing to further divide the Depreciation and Interest cost categories. We are proposing to separate the Depreciation cost category into the following two categories: (1) Building and Fixed Equipment and (2) Movable Equipment. We also are proposing to separate the Interest cost category into the following two categories: (1) Government/Nonprofit; and (2) For-profit.

To disaggregate the depreciation cost weight, we needed to determine the percent of total depreciation costs for IPPS hospitals (after the allocation of lease costs) that are attributable to building and fixed equipment, which we hereafter refer to as the “fixed percentage.” Based on Worksheet A–7 data from the 2014 IPPS Medicare cost reports, we have determined that depreciation costs for building and fixed equipment account for approximately 49 percent of total depreciation costs, while depreciation costs for movable equipment account for approximately 51 percent of total depreciation costs. As was done for the FY 2010-based CIPI, we are proposing to apply this fixed percentage to the depreciation cost weight (after leasing costs are included) to derive a Depreciation cost weight attributable to Building and Fixed Equipment and a Depreciation cost weight attributable to Movable Equipment.

To disaggregate the interest cost weight, we needed to determine the percent of total interest costs for IPPS hospitals that are attributable to government and nonprofit facilities, which we hereafter refer to as the

“nonprofit percentage,” because interest price pressures tend to differ between nonprofit and for-profit facilities. We are proposing to use interest costs data from Worksheet A–7 of the 2014 Medicare cost reports for IPPS hospitals, which is the same methodology used for the FY 2010-based CIPI. The nonprofit percentage determined using this method is 86 percent. Table IV–08 provides a comparison of the FY 2010-based CIPI cost weights and the proposed 2014-based CIPI cost weights.

After the capital cost category weights were computed, it was necessary to select appropriate price proxies to reflect the rate-of-increase for each expenditure category. We are proposing to apply the same price proxies as were used in the FY 2010-based CIPI, which are listed below and provided in Table IV–08. We also are proposing to continue to vintage weight the capital price proxies for Depreciation and Interest to capture the long-term consumption of capital. This vintage weighting method is the same method that was used for the FY 2010-based CIPI and is described below.

We are proposing to continue to proxy the: Depreciation—Building and Fixed Equipment cost category by the BEA Chained Price Index for Private Fixed Investment in Structures, Nonresidential, Hospitals and Special Care (BEA Table 5.4.4. Price Indexes for Private Fixed Investment in Structures by Type). As stated in the FY 2010 IPPS/LTCH final rule (74 FR 43860), for the FY 2006-based CIPI we finalized the use of this index to measure the price growth of this cost category. This BEA

index is intended to capture prices for construction of facilities such as hospitals, nursing homes, hospices, and rehabilitation centers. For the Depreciation—Movable Equipment cost category, we are proposing to continue to measure the price growth using the PPI Commodity for Machinery and Equipment (BLS series code WPU11). This price index reflects price inflation associated with a variety of machinery and equipment that would be utilized by hospitals including but not limited to communication equipment, computers, and medical equipment. For the Nonprofit Interest and For-profit Interest cost categories, we are proposing to continue to measure the price growth using the average yield on domestic municipal bonds (Bond Buyer 20-bond index) and the average yield on Moody’s Aaa bonds (Federal Reserve), respectively. As stated above, we are proposing two proxies because interest price pressures tend to differ between nonprofit and for-profit facilities. For the Other capital cost category (including insurances, taxes, and other capital-related costs), we are proposing to continue to measure the price growth using the CPI for Rent of Primary Residence (All Urban Consumers) (BLS series code CUUS0000SEHA), which would reflect the price growth of these costs. We believe that these price proxies continue to be the most appropriate proxies for IPPS capital costs that meet our selection criteria of relevance, timeliness, availability, and reliability.

TABLE IV-08—PROPOSED 2014-BASED CIPI COST WEIGHTS AND PRICE PROXIES WITH FY 2010-BASED CIPI COST WEIGHTS INCLUDED FOR COMPARISON

Cost categories	FY 2010 cost weights	Proposed 2014 cost weights	Proposed price proxy
Total	100.0	100.0	
Depreciation	74.0	74.4	
Building and Fixed Equipment	36.2	36.7	BEA's Chained Price Index for Private Fixed Investment in Structures, Nonresidential, Hospitals and Special Care.
Movable Equipment	37.9	37.7	PPI Commodity for Machinery and Equipment.
Interest	19.2	18.2	
Government/Nonprofit	17.1	15.7	Average Yield on Domestic Municipal Bonds (Bond Buyer 20-Bond Index).
For-Profit	2.1	2.5	Average Yield on Moody's Aaa Bonds.
Other	6.8	7.4	CPI for Rent of Primary Residence.

Note: The cost weights are calculated using three decimal places. For presentational purposes, we are displaying one decimal and therefore, the detail may not add to the total due to rounding.

Because capital is acquired and paid for over time, capital expenses in any given year are determined by both past and present purchases of physical and financial capital. The proposed vintage-weighted 2014-based CIPI is intended to capture the long-term consumption of capital, using vintage weights for depreciation (physical capital) and interest (financial capital). These vintage weights reflect the proportion of capital purchases attributable to each year of the expected life of building and fixed equipment, movable equipment, and interest. We are proposing to use vintage weights to compute vintage-weighted price changes associated with depreciation and interest expenses.

Vintage weights are an integral part of the CIPI. Capital costs are inherently complicated and are determined by complex capital purchasing decisions, over time, based on such factors as interest rates and debt financing. In addition, capital is depreciated over time instead of being consumed in the same period it is purchased. By accounting for the vintage nature of capital, we are able to provide an accurate and stable annual measure of price changes. Annual nonvintage price changes for capital are unstable due to the volatility of interest rate changes and, therefore, do not reflect the actual annual price changes for IPPS capital costs. The CIPI reflects the underlying stability of the capital acquisition process.

To calculate the vintage weights for depreciation and interest expenses, we first needed a time series of capital purchases for building and fixed equipment and movable equipment. We found no single source that provides an appropriate time series of capital purchases by hospitals for all of the above components of capital purchases. The early Medicare cost reports did not have sufficient capital data to meet this

need. Data we obtained from the American Hospital Association (AHA) did not include annual capital purchases. However, we were able to obtain data on total expenses back to 1963 from the AHA. Consequently, we are proposing to use data from the AHA Panel Survey and the AHA Annual Survey to obtain a time series of total expenses for hospitals. We then are proposing to use data from the AHA Panel Survey supplemented with the ratio of depreciation to total hospital expenses obtained from the Medicare cost reports to derive a trend of annual depreciation expenses for 1963 through 2014. We are proposing to separate these depreciation expenses into annual amounts of building and fixed equipment depreciation and movable equipment depreciation as determined earlier. From these annual depreciation amounts, we derived annual end-of-year book values for building and fixed equipment and movable equipment using the expected life for each type of asset category. We used the AHA data and similar methodology to derive the FY 2010-based IPPS capital market basket (78 FR 50604).

To continue to calculate the vintage weights for depreciation and interest expenses, we also needed to account for the expected lives for building and fixed equipment, movable equipment, and interest for the proposed 2014-based CIPI. We are proposing to calculate the expected lives using Medicare cost report data. The expected life of any asset can be determined by dividing the value of the asset (excluding fully depreciated assets) by its current year depreciation amount. This calculation yields the estimated expected life of an asset if the rates of depreciation were to continue at current year levels, assuming straight-line depreciation. Using this proposed method, we determined the average expected life of

building and fixed equipment to be equal to 27 years, and the average expected life of movable equipment to be equal to 12 years. For the expected life of interest, we believe that vintage weights for interest should represent the average expected life of building and fixed equipment because, based on previous research described in the FY 1997 IPPS final rule (61 FR 46198), the expected life of hospital debt instruments and the expected life of buildings and fixed equipment are similar. We note that the FY 2010-based CIPI was based on an expected average life of building and fixed equipment of 26 years and an expected average life of movable equipment of 12 years.

Multiplying these expected lives by the annual depreciation amounts results in annual year-end asset costs for building and fixed equipment and movable equipment. We then calculated a time series, beginning in 1964, of annual capital purchases by subtracting the previous year's asset costs from the current year's asset costs.

For the building and fixed equipment and movable equipment vintage weights, we are proposing to use the real annual capital-related purchase amounts for each asset type to capture the actual amount of the physical acquisition, net of the effect of price inflation. These real annual capital-related purchase amounts are produced by deflating the nominal annual purchase amount by the associated price proxy as provided earlier in this proposed rule. For the interest vintage weights, we are proposing to use the total nominal annual capital-related purchase amounts to capture the value of the debt instrument (including, but not limited to, mortgages and bonds). Using these capital purchases time series specific to each asset type, we are proposing to calculate the vintage weights for building and fixed

equipment, for movable equipment, and for interest.

The vintage weights for each asset type are deemed to represent the average purchase pattern of the asset over its expected life (in the case of building and fixed equipment and interest, 27 years, and in the case of movable equipment, 12 years). For each asset type, we are proposing to use the time series of annual capital purchases amounts available from 2014 back to 1964. These data allow us to derive

twenty-five 27-year periods of capital purchases for building and fixed equipment and interest, and forty 12-year periods of capital purchases for movable equipment. For each 27-year period for building and fixed equipment and interest, or 12-year period for movable equipment, we are proposing to calculate annual vintage weights by dividing the capital-related purchase amount in any given year by the total amount of purchases over the entire 27-year or 12-year period. This calculation

was done for each year in the 27-year or 12-year period and for each of the periods for which we have data. We then calculated the average vintage weight for a given year of the expected life by taking the average of these vintage weights across the multiple periods of data.

The vintage weights for the proposed 2014-based CIPI and the FY 2010-based CIPI are presented in Table IV–09 below.

TABLE IV–09—PROPOSED 2014-BASED CIPI AND FY 2010-BASED CIPI VINTAGE WEIGHTS

Year ¹	Building and fixed equipment		Movable equipment		Interest	
	Proposed 2014-based 27 years	FY 2010-based 26 years	Proposed 2014-based 12 years	FY 2010-based 12 years	Proposed 2014-based 27 years	FY 2010-based 26 years
1	0.024	0.023	0.062	0.064	0.012	0.012
2	0.025	0.024	0.064	0.068	0.014	0.013
3	0.027	0.026	0.070	0.071	0.015	0.015
4	0.028	0.028	0.074	0.073	0.017	0.017
5	0.030	0.029	0.078	0.076	0.019	0.018
6	0.031	0.031	0.082	0.078	0.021	0.021
7	0.033	0.032	0.086	0.084	0.023	0.023
8	0.034	0.034	0.088	0.088	0.025	0.025

23	0.042	0.045			0.055	0.060
24	0.042	0.046			0.057	0.062
25	0.043	0.045			0.059	0.064
26	0.043	0.045			0.061	0.066
27	0.043				0.062	
Total	1.000	1.000	1.000	1.000	1.000	1.000

Note: Numbers may not add to total due to rounding.

¹ Vintage weight in the last year (for example, year 27 for the proposed 2014-based CIPI) is applied to the most recent data point and prior vintage weights are applied going back in time. For example, year 27 vintage weight would be applied to the 2018q3 fixed price proxy level, year 26 vintage weight would be applied to the 2017q3 fixed price proxy level, etc.

The process of creating vintage-weighted price proxies requires applying the vintage weights to the price proxy index where the last applied vintage weight in Table IV–09 is applied to the most recent data point. We have provided on the CMS Web site an example of how the vintage weighting

price proxies are calculated, using example vintage weights and example price indices. The example can be found under the following CMS Web site link: <http://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/MedicareProgramRatesStats/>

MarketBasketResearch.html in the zip file titled “Weight Calculations as described in the IPPS FY 2010 Proposed Rule.”

Table IV–10 below compares both the historical and forecasted percent changes in the FY 2010-based CIPI and the proposed 2014-based CIPI.

TABLE IV–10—COMPARISON OF FY 2010-BASED AND PROPOSED 2014-BASED CAPITAL INPUT PRICE INDEX, PERCENT CHANGE, FY 2013 THROUGH FY 2020

Fiscal year	CIPI, FY 2010-based	Proposed CIPI, 2014-based
Historical Data:		
FY 2013	1.1	1.0
FY 2014	1.2	1.2
FY 2015	1.2	1.1
FY 2016	1.1	1.0
Average FYs 2013–2016	1.2	1.1
Forecast:		
FY 2017	1.1	1.0
FY 2018	1.3	1.2
FY 2019	1.5	1.4
FY 2020	1.5	1.5
Average FYs 2017–2020	1.4	1.3

Source: IHS Global Insight, Inc., 4th quarter 2016 forecast.

IHS Global Insight, Inc. forecasts a 1.2 percent increase in the proposed 2014-based CIPI for FY 2018, as shown in Table IV–10. The underlying vintage-weighted price increases for depreciation (including building and fixed equipment and movable equipment) and interest (including government/nonprofit and for-profit) based on the proposed 2014-based CIPI are included in Table IV–11.

TABLE IV–11—PROPOSED 2014-BASED CAPITAL INPUT PRICE INDEX PERCENT CHANGES, TOTAL AND DEPRECIATION AND INTEREST COMPONENTS—FYs 2013 THROUGH 2020

Fiscal year	Total	Depreciation	Interest
Historical Data:			
FY 2013	1.0	1.7	–2.5
FY 2014	1.2	1.8	–1.8
FY 2015	1.1	1.8	–2.7
FY 2016	1.0	1.7	–3.0
Forecast:			
FY 2017	1.0	1.6	–2.7
FY 2018	1.2	1.6	–1.6
FY 2019	1.4	1.6	–0.6
FY 2020	1.5	1.6	0.1

Source: IHS Global Insight, Inc., 4th quarter 2016 forecast.

Rebasing the CIPI from FY 2010 to 2014 decreased the percent change in the forecasted update for FY 2018 by 0.1 percentage point, from 1.3 percent to 1.2 percent, as shown in Table IV–10. The lower FY 2018 update is primarily due to a change in the vintage weights for the proposed 2014-based CIPI, which includes updating the asset purchase data through 2014 and changing the building and fixed equipment and interest asset lives from 26 years to 27 years. This lower update is only partially offset by the change in the base year weights, which produce a faster increase due to more weight being given to the Depreciation cost category and less weight being given to the Interest cost category. As shown in Table IV–11, for FY 2018, vintage-weighted price growth is projected to be positive for the Depreciation cost category and negative for Interest cost category.

V. Other Decisions and Proposed Changes to the IPPS for Operating System

A. Proposed Changes to MS–DRGs Subject to the Postacute Care Transfer and MS–DRG Special Payment Policies (§ 412.4)

1. Background

Existing regulations at 42 CFR 412.4(a) define discharges under the IPPS as situations in which a patient is formally released from an acute care hospital or dies in the hospital. Section 412.4(b) defines acute care transfers, and § 412.4(c) defines postacute care transfers. Our policy set forth in § 412.4(f) provides that when a patient is transferred and his or her length of stay is less than the geometric mean length of stay for the MS–DRG to which the case is assigned, the transferring hospital is generally paid based on a graduated per diem rate for each day of stay, not to exceed the full MS–DRG

payment that would have been made if the patient had been discharged without being transferred.

The per diem rate paid to a transferring hospital is calculated by dividing the full MS–DRG payment by the geometric mean length of stay for the MS–DRG. Based on an analysis that showed that the first day of hospitalization is the most expensive (60 FR 45804), our policy generally provides for payment that is twice the per diem amount for the first day, with each subsequent day paid at the per diem amount up to the full MS–DRG payment (§ 412.4(f)(1)). Transfer cases also are eligible for outlier payments. In general, the outlier threshold for transfer cases, as described in § 412.80(b), is equal to the fixed-loss outlier threshold for nontransfer cases (adjusted for geographic variations in costs), divided by the geometric mean length of stay for the MS–DRG, and multiplied by the length of stay for the case, plus 1 day.

We established the criteria set forth in § 412.4(d) for determining which DRGs qualify for postacute care transfer payments in the FY 2006 IPPS final rule (70 FR 47419 through 47420). The determination of whether a DRG is subject to the postacute care transfer policy was initially based on the Medicare Version 23.0 GROUPER (FY 2006) and data from the FY 2004 MedPAR file. However, if a DRG did not exist in Version 23.0 or a DRG included in Version 23.0 is revised, we use the current version of the Medicare GROUPER and the most recent complete year of MedPAR data to determine if the DRG is subject to the postacute care transfer policy. Specifically, if the MS-DRG's total number of discharges to postacute care equals or exceeds the 55th percentile for all MS-DRGs and the proportion of short-stay discharges to postacute care to total discharges in the MS-DRG exceeds the 55th percentile for all MS-DRGs, CMS will apply the postacute care transfer policy to that MS-DRG and to any other MS-DRG that shares the same base MS-DRG. The statute directs us to identify MS-DRGs based on a high volume of discharges to postacute care facilities and a disproportionate use of postacute care services. As discussed in the FY 2006 IPPS final rule (70 FR 47416), we determined that the 55th percentile is an appropriate level at which to establish these thresholds. In that same final rule (70 FR 47419), we stated that we will not revise the list of DRGs subject to the postacute care transfer policy annually unless we are making a change to a specific MS-DRG.

To account for MS-DRGs subject to the postacute care policy that exhibit exceptionally higher shares of costs very early in the hospital stay, § 412.4(f) also includes a special payment methodology. For these MS-DRGs, hospitals receive 50 percent of the full MS-DRG payment, plus the single per diem payment, for the first day of the stay, as well as a per diem payment for subsequent days (up to the full MS-DRG payment (§ 412.4(f)(6))). For an MS-DRG to qualify for the special payment methodology, the geometric mean length of stay must be greater than 4 days, and the average charges of 1-day discharge cases in the MS-DRG must be at least 50 percent of the average charges for all cases within the MS-DRG. MS-DRGs that are part of an MS-DRG severity level group will qualify under the MS-DRG special payment methodology policy if any one of the MS-DRGs that share that same base MS-DRG qualifies (§ 412.4(f)(6)).

2. Proposed Changes for FY 2018

Based on our annual review of MS-DRGs, we have identified three MS-DRGs that we are proposing to be included on the list of MS-DRGs subject to the special payment transfer policy. As we discuss in section II.F. of the preamble of this proposed rule, in response to public comments and based on our analysis of FY 2016 MedPAR claims data, we are proposing to make changes to MS-DRGs, effective for FY 2018.

As discussed in section II.F.14.b. of the preamble of this proposed rule, we are proposing to delete MS-DRGs 984,

985, and 986 (Prostatic O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC and without CC/MCC, respectively) and reassign the procedure codes currently assigned to these three MS-DRGs to MS-DRGs 987, 988, and 989 (Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC and without CC/MCC, respectively).

In light of these proposed changes to the MS-DRGs for FY 2018, according to the regulations under § 412.4(d), we evaluated proposed revised MS-DRGs 987, 988, and 989 (which would contain the proposed reassigned procedures from MS-DRGs 984, 985, and 986) against the general postacute care transfer policy criteria using the FY 2016 MedPAR data. If an MS-DRG qualified for the postacute care transfer policy, we also evaluated that MS-DRG under the special payment methodology criteria according to regulations at § 412.4(f)(6). We continue to believe it is appropriate to reassess MS-DRGs when proposing reassignment of procedure or diagnosis codes that would result in material changes to an MS-DRG. MS-DRGs 987, 988, and 989 are currently subject to the postacute care transfer policy. As a result of our review, the proposed revised MS-DRGs 987, 988, and 989 continue to qualify to be included on the list of MS-DRGs that are subject to the postacute care transfer policy. We are not proposing to change the postacute care transfer policy status for MS-DRGs 987, 988, and 989.

LIST OF PROPOSED REVISED MS-DRGS SUBJECT TO REVIEW OF POSTACUTE CARE TRANSFER POLICY STATUS FOR FY 2018

Proposed revised MS-DRG	MS-DRG title	Total cases	Postacute care transfers (55th percentile: 1,419)	Short-stay postacute care transfers	Percent of short-stay postacute care transfers to all cases (55th percentile: 8.01068%)	Postacute care transfer policy status
987	Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC.	8,131	4,210	1,355	16.66462	YES.
988	Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis with CC.	8,239	3,416	706	8.56900	YES.
989	Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis without MCC/CC.	2,216	* 499	47	* 2.12094	** YES.

* Indicates a current postacute care transfer policy criterion that the MS-DRG did not meet.

** As described in the policy at 42 CFR 412.4(d)(3)(ii)(D), MS-DRGs that share the same base MS-DRG will all qualify under the postacute care transfer policy if any one of the MS-DRGs that share that same base MS-DRG qualifies.

We also have determined that proposed revised MS-DRGs 987, 988, and 989 would meet the criteria for the

MS-DRG special payment methodology. MS-DRGs 987, 988, and 989 are not currently listed as being subject to the

special payment policy. Therefore, we are proposing that these three proposed revised MS-DRGs would be subject to

the MS-DRG special payment methodology, effective FY 2018.

LIST OF PROPOSED REVISED MS-DRGS SUBJECT TO REVIEW OF SPECIAL PAYMENT POLICY STATUS FOR FY 2018

Proposed revised MS-DRG	MS-DRG title	Geometric mean length of stay	Average charges of 1-day discharges	50 Percent of average charges for all cases within MS-DRG	Special payment policy status
987	Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC.	8.1	\$36,526	\$53,449	* YES.
988	Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis with CC.	8.6	35,629	29,119	YES.
989	Non-Extensive O.R. Procedure Unrelated to Principal Diagnosis without MCC/CC.	2.2	0	0	* YES.

* As described in the policy at 42 CFR 412.4(d)(6)(iv), MS-DRGs that share the same base MS-DRG will all qualify under the MS-DRG special payment policy if any one of the MS-DRGs that share that same base MS-DRG qualifies.

The proposed postacute care transfer policy status and special payment policy status of these MS-DRGs are reflected in Table 5 associated with this proposed rule, which is listed in section VI. of the Addendum to this proposed rule and available via the Internet on the CMS Web site.

B. Proposed Changes in the Inpatient Hospital Update for FY 2018 (§ 412.64(d))

1. Proposed FY 2018 Inpatient Hospital Update

In accordance with section 1886(b)(3)(B)(i) of the Act, each year we update the national standardized amount for inpatient hospital operating costs by a factor called the “applicable percentage increase.” For FY 2018, we are setting the applicable percentage increase by applying the adjustments listed in this section in the same sequence as we did for FY 2017. Specifically, consistent with section 1886(b)(3)(B) of the Act, as amended by sections 3401(a) and 10319(a) of the Affordable Care Act, we are setting the applicable percentage increase by applying the following adjustments in the following sequence. The applicable percentage increase under the IPPS is equal to the rate-of-increase in the hospital market basket for IPPS hospitals in all areas, subject to—

(a) A reduction of one-quarter of the applicable percentage increase (prior to the application of other statutory adjustments; also referred to as the market basket update or rate-of-increase (with no adjustments)) for hospitals that fail to submit quality information under rules established by the Secretary in accordance with section 1886(b)(3)(B)(viii) of the Act;

(b) A reduction of three-quarters of the applicable percentage increase (prior to the application of other statutory adjustments; also referred to as the

market basket update or rate-of-increase (with no adjustments)) for hospitals not considered to be meaningful EHR users in accordance with section 1886(b)(3)(B)(ix) of the Act;

(c) An adjustment based on changes in economy-wide productivity (the multifactor productivity (MFP) adjustment); and

(d) An additional reduction of 0.75 percentage point as required by section 1886(b)(3)(B)(xii) of the Act.

Sections 1886(b)(3)(B)(xi) and (b)(3)(B)(xii) of the Act, as added by section 3401(a) of the Affordable Care Act, state that application of the MFP adjustment and the additional FY 2018 adjustment of 0.75 percentage point may result in the applicable percentage increase being less than zero.

We note that, in compliance with section 404 of the MMA, in this proposed rule, we are proposing to replace the FY 2010-based IPPS operating and capital market baskets with the revised and rebased 2014-based IPPS operating and capital market baskets for FY 2018.

We are proposing to base the proposed FY 2018 market basket update used to determine the applicable percentage increase for the IPPS on IHS Global Insight, Inc.’s (IGI’s) fourth quarter 2016 forecast of the proposed 2014-based IPPS market basket rate-of-increase with historical data through third quarter 2016, which is estimated to be 2.9 percent. We are proposing that if more recent data subsequently become available (for example, a more recent estimate of the market basket and the MFP adjustment), we would use such data, if appropriate, to determine the FY 2018 market basket update and the MFP adjustment in the final rule.

For FY 2018, depending on whether a hospital submits quality data under the rules established in accordance with section 1886(b)(3)(B)(viii) of the Act

(hereafter referred to as a hospital that submits quality data) and is a meaningful EHR user under section 1886(b)(3)(B)(ix) of the Act (hereafter referred to as a hospital that is a meaningful EHR user), there are four possible applicable percentage increases that can be applied to the standardized amount as specified in the table that appears later in this section.

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51689 through 51692), we finalized our methodology for calculating and applying the MFP adjustment. As we explained in that rule, section 1886(b)(3)(B)(xi)(II) of the Act, as added by section 3401(a) of the Affordable Care Act, defines this productivity adjustment as equal to the 10-year moving average of changes in annual economy-wide, private nonfarm business MFP (as projected by the Secretary for the 10-year period ending with the applicable fiscal year, calendar year, cost reporting period, or other annual period). The Bureau of Labor Statistics (BLS) publishes the official measure of private nonfarm business MFP. We refer readers to the BLS Web site at <http://www.bls.gov/mfp> for the BLS historical published MFP data.

MFP is derived by subtracting the contribution of labor and capital input growth from output growth. The projections of the components of MFP are currently produced by IGI, a nationally recognized economic forecasting firm with which CMS contracts to forecast the components of the market baskets and MFP. As we discussed in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49509), beginning with the FY 2016 rulemaking cycle, the MFP adjustment is calculated using the revised series developed by IGI to proxy the aggregate capital inputs. Specifically, in order to generate a forecast of MFP, IGI forecasts BLS aggregate capital inputs using a

regression model. A complete description of the MFP projection methodology is available on the CMS Web site at: <http://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/MedicareProgramRatesStats/MarketBasketResearch.html>. As discussed in the FY 2016 IPPS/LTCH PPS final rule, if IGI makes changes to the MFP methodology, we will

announce them on our Web site rather than in the annual rulemaking.

For FY 2018, we are proposing an MFP adjustment of 0.4 percentage point. Similar to the market basket update, for the proposed rule, we used IGI's fourth quarter 2016 forecast of the MFP adjustment with historical data through third quarter 2016 to compute the proposed MFP adjustment. We are proposing that if more recent data

subsequently become available, we would use such data, if appropriate, to determine the FY 2018 market basket update and MFP adjustment for the final rule.

Based on these data, for this proposed rule, we have determined four proposed applicable percentage increases to the standardized amount for FY 2018, as specified in the following table:

PROPOSED FY 2018 APPLICABLE PERCENTAGE INCREASES FOR THE IPPS

FY 2018	Hospital submitted quality data and is a meaningful EHR user	Hospital submitted quality data and is NOT a meaningful EHR user	Hospital did NOT submit quality data and is a meaningful EHR user	Hospital did NOT submit quality data and is NOT a meaningful EHR user
Proposed Market Basket Rate-of-Increase	2.9	2.9	2.9	2.9
Proposed Adjustment for Failure to Submit Quality Data under Section 1886(b)(3)(B)(viii) of the Act	0.0	0.0	-0.725	-0.725
Proposed Adjustment for Failure to be a Meaningful EHR User under Section 1886(b)(3)(B)(ix) of the Act	0.0	-2.175	0.0	-2.175
Proposed MFP Adjustment under Section 1886(b)(3)(B)(xi) of the Act	-0.4	-0.4	-0.4	-0.4
Statutory Adjustment under Section 1886(b)(3)(B)(xii) of the Act	-0.75	-0.75	-0.75	-0.75
Proposed Applicable Percentage Increase Applied to Standardized Amount	1.75	-0.425	1.025	-1.15

We are proposing to revise the existing regulations at 42 CFR 412.64(d) to reflect the current law for the FY 2018 update. Specifically, in accordance with section 1886(b)(3)(B) of the Act, we are proposing to revise paragraph (vii) of § 412.64(d)(1) to include the applicable percentage increase to the FY 2018 operating standardized amount as the percentage increase in the market basket index, subject to the reductions specified under § 412.64(d)(2) for a hospital that does not submit quality data and § 412.64(d)(3) for a hospital that is not a meaningful EHR user, less an MFP adjustment and less an additional reduction of 0.75 percentage point.

Section 1886(b)(3)(B)(iv) of the Act provides that the applicable percentage increase to the hospital-specific rates for SCHs equals the applicable percentage increase set forth in section 1886(b)(3)(B)(i) of the Act (that is, the same update factor as for all other hospitals subject to the IPPS). Therefore, the update to the hospital-specific rates for SCHs also is subject to section 1886(b)(3)(B)(i) of the Act, as amended by sections 3401(a) and 10319(a) of the Affordable Care Act.

As discussed in section V.H. of the preamble of this proposed rule, section 205 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. 114–10, enacted on April 16, 2015) extended the MDH program (which, under previous law, was to be in effect for discharges on or before

March 31, 2015 only) for discharges occurring on or after April 1, 2015, through FY 2017 (that is, for discharges occurring on or before September 30, 2017). Therefore, under current law, the MDH program will expire at the end of FY 2017.

For FY 2018, we are proposing the following updates to the hospital-specific rates applicable to SCHs: A proposed update of 1.75 percent for a hospital that submits quality data and is a meaningful EHR user; a proposed update of 1.025 percent for a hospital that fails to submit quality data and is a meaningful EHR user; a proposed update of -0.425 percent for a hospital that submits quality data and is not a meaningful EHR user; and a proposed update of -1.15 percent for a hospital that fails to submit quality data and is not a meaningful EHR user. As mentioned previously, for this FY 2018 proposed rule, we are using IGI's fourth quarter 2016 forecast of the proposed 2014-based IPPS market basket update with historical data through third quarter 2016. Similarly, we are using IGI's fourth quarter 2016 forecast of the MFP adjustment. We are proposing that if more recent data subsequently become available (for example, a more recent estimate of the market basket increase and the MFP adjustment), we would use such data, if appropriate, to determine the update in the final rule.

2. Proposed FY 2018 Puerto Rico Hospital Update

As discussed in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56937 through 56938), prior to January 1, 2016, Puerto Rico hospitals were paid based on 75 percent of the national standardized amount and 25 percent of the Puerto Rico-specific standardized amount. Section 601 of Public Law 114–113 amended section 1886(d)(9)(E) of the Act to specify that the payment calculation with respect to operating costs of inpatient hospital services of a subsection (d) Puerto Rico hospital for inpatient hospital discharges on or after January 1, 2016, shall use 100 percent of the national standardized amount. Because Puerto Rico hospitals are no longer paid with a Puerto Rico-specific standardized amount under the amendments to section 1886(d)(9)(E) of the Act, there is no longer a need for us to propose an update to the Puerto Rico standardized amount. Hospitals in Puerto Rico are now paid 100 percent of the national standardized amount and, therefore, are subject to the same update to the national standardized amount discussed under section V.B.1. of the preamble of this proposed rule. Accordingly, for FY 2018, we are proposing an applicable percentage increase of 1.75 to the standardized amount for hospitals located in Puerto Rico.

We note that section 1886(b)(3)(B)(viii) of the Act, which specifies the adjustment to the

applicable percentage increase for “subsection (d)” hospitals that do not submit quality data under the rules established by the Secretary, is not applicable to hospitals located in Puerto Rico.

In addition, section 602 of Public Law 114–113 amended section 1886(n)(6)(B) of the Act to specify that Puerto Rico hospitals are eligible for incentive payments for the meaningful use of certified EHR technology, effective beginning FY 2016, and also to apply the adjustments to the applicable percentage increase under section 1886(b)(3)(B)(ix) of the Act to Puerto Rico hospitals that are not meaningful EHR users, effective FY 2022.

Accordingly, because the provisions of section 1886(b)(3)(B)(ix) of the Act are not applicable to hospitals located in Puerto Rico until FY 2022, the adjustments under this provision are not applicable for FY 2018.

C. Proposed Change to Volume Decrease Adjustment for Sole Community Hospitals (SCHs) and Medicare-Dependent, Small Rural Hospitals (MDHs) (§ 412.92)

1. Background

Sections 1886(d)(5)(D) and (d)(5)(G) of the Act provide special payment protections under the IPPS to sole community hospitals (SCHs) and Medicare-dependent, small rural hospitals (MDHs), respectively. Section 1886(d)(5)(D)(iii) of the Act defines an SCH in part as a hospital that the Secretary determines is located more than 35 road miles from another hospital or that, by reason of factors such as isolated location, weather conditions, travel conditions, or absence of other like hospitals (as determined by the Secretary), is the sole source of inpatient hospital services reasonably available to Medicare beneficiaries. The regulations at 42 CFR 412.92 set forth the criteria that a hospital must meet to be classified as a SCH. For more information on SCHs, we refer readers to the FY 2009 IPPS/LTCH PPS final rule (74 FR 43894 through 43897).

Section 1886(d)(5)(G)(iv) of the Act defines an MDH as a hospital that is located in a rural area, has not more than 100 beds, is not an SCH, and has a high percentage of Medicare discharges (that is, not less than 60 percent of its inpatient days or discharges during the cost reporting period beginning in FY 1987 or two of the three most recently audited cost reporting periods for which the Secretary has a settled cost report were attributable to inpatients entitled to benefits under Part A). The regulations

at 42 CFR 412.108 set forth the criteria that a hospital must meet to be classified as an MDH. The MDH program is not authorized by statute beyond September 30, 2017. Therefore, beginning October 1, 2017, all hospitals that previously qualified for MDH status under section 1886(d)(5)(G) of the Act will no longer have MDH status and will be paid based on the IPPS Federal rate. For additional information on the MDH program and the payment methodology, we refer readers to the FY 2012 IPPS/LTCH PPS final rule (76 FR 51683 through 51684).

2. Proposed Changes to the Volume Decrease Adjustment Calculation Methodology for SCHs

Section 1886(d)(5)(D)(ii) and section 1886(d)(5)(G)(iii) of the Act require that the Secretary adjust the payments made to an SCH and MDH, respectively, as may be necessary to fully compensate the hospital for the fixed costs it incurs in providing inpatient hospital services, including the reasonable cost of maintaining necessary core staff and services, when it experiences a decrease of more than 5 percent in its total number of inpatient discharges due to circumstances beyond its control. These adjustments are known as “volume decrease adjustments.”

The regulations governing volume decrease adjustments are found at § 412.92(e) for SCHs and § 412.108(d) for MDHs. As noted earlier, the MDH program is set to expire as of October 1, 2017. As such, we are not proposing specific amendments to the regulations at § 412.108(d) for MDHs. However, we are proposing that if the MDH program ends up being extended by law, similar to how it was extended by section 205 of the MACRA (Pub. L. 114–10) and prior legislation, the following proposed changes to the volume decrease adjustment methodology and the proposed amendment to § 412.92(e)(3) for SCHs would also be made to the parallel requirements for MDHs under § 412.108(d)(3).

To qualify for a volume decrease adjustment, the SCH must: (a) Submit documentation demonstrating the size of the decrease in discharges and the resulting effect on per discharge costs; and (b) show that the decrease is due to circumstances beyond the hospital’s control. If an SCH demonstrates to the MAC’s satisfaction that it has suffered a qualifying decrease in total inpatient discharges, the MAC determines the appropriate amount, if any, due to the SCH as an adjustment.

As we have noted in the PRM and in adjudications rendered by the PRRB and the CMS Administrator, under the

current methodology, the MAC determines a volume decrease adjustment amount not to exceed the cap calculated as the difference between the lesser of (1) the hospital’s current year’s Medicare inpatient operating costs or (2) its prior year’s Medicare inpatient operating costs multiplied by the appropriate IPPS update factor and the hospital’s total MS–DRG revenue for inpatient operating costs (including outlier payments, DSH payments, and IME payments). In determining the volume decrease adjustment amount, the MAC considers the individual hospital’s needs and circumstances, including the reasonable cost of maintaining necessary core staff and services in view of minimum staffing requirements imposed by State agencies; the hospital’s fixed costs (including whether any semi-fixed costs are to be considered fixed) other than those costs paid on a reasonable cost basis; and the length of time the hospital has experienced a decrease in utilization.

We have set forth interpretive guidance regarding volume decrease adjustments in the preambles to various rules and in Section 2810.1 of the Provider Reimbursement Manual, Part 1 (PRM–1). The adjustment also has been the subject of a series of adjudications, rendered by the PRRB and the CMS Administrator. For example, we refer readers to *Greenwood County Hospital Eureka, Kansas, v. Blue Cross Blue Shield Association/Blue Cross Blue Shield of Kansas*, 2006 WL 3050893 (PRRB, August 29, 2006); *Unity Healthcare Muscatine, Iowa v. Blue Cross Blue Shield Association/Wisconsin Physicians Service*, 2014 WL 5450066 (CMS Administrator September 4, 2014); *Lakes Regional Healthcare Spirit Lake, Iowa v. Blue Cross Blue Shield Association/Wisconsin Physicians Service*, 2014 WL 5450078 (CMS Administrator September 4, 2014); and *Fairbanks Memorial Hospital v. Wisconsin Physician Services/BlueCross BlueShield Association*, 2015 WL 5852432 (CMS Administrator, August 5, 2015). In those adjudications, the PRRB and the CMS Administrator have recognized that: (1) The volume decrease adjustment is intended to compensate qualifying SCHs for their fixed costs only, and that variable costs are to be excluded from the adjustment; and (2) an SCH’s volume decrease adjustment should be reduced to reflect the compensation of fixed costs that has already been made through MS–DRG payments.

However, some hospitals have recently expressed concerns regarding the exact calculations that the MACs use when determining the volume decrease

adjustment. The issue also has been addressed in some recent decisions of the PRRB. Under the current calculation methodology, the MACs calculate the volume decrease adjustment by subtracting the hospital's total MS-DRG revenue for inpatient operating costs, including outlier payments and IME and DSH payments in the cost reporting period in which the volume decrease occurred, from fixed costs in the cost reporting period in which the volume decrease occurred, minus any adjustment for excess staff. If the result of that calculation is greater than zero and less than the cap, the hospital receives that amount in a lump-sum payment. If the result of that calculation is zero or less than zero, the hospital does not receive a volume decrease payment adjustment.

Under the IPPS, MS-DRG payments are not based on an individual hospital's actual costs in a given cost reporting period. However, the main issue raised by the PRRB and individual hospitals is that, under the current calculation methodology, if the hospital's total MS-DRG revenue for treating Medicare beneficiaries for which it incurs inpatient operating costs (consisting of fixed, semi-fixed, and variable costs) exceeds the hospital's fixed costs, the calculation by the MACs results in no volume decrease adjustment for the hospital. In some recent decisions, the PRRB has indicated that it believes it would be more appropriate for the MACs to adjust the hospital's total MS-DRG revenue from Medicare by looking at the ratio of a hospital's fixed costs to its total costs (as determined by the MAC) and applying that ratio as a proxy for the share of the hospital's MS-DRG payments that it assumes are attributable (or allocable) to fixed costs, and then comparing that estimate of the fixed portion of MS-DRG payments to the hospital's fixed costs. In this way, the calculation would compare estimated Medicare revenue for fixed costs to the hospital's fixed costs when determining the volume decrease adjustment.

We continue to believe that our current approach in calculating volume decrease adjustments is reasonable and consistent with the statute. Nevertheless, we understand why hospitals might take the view that CMS should make an effort, in some way, to ascertain whether a portion of MS-DRG payments can be allocated or attributed to fixed costs in order to fulfill the statutory mandate to "fully compensate" a qualifying SCH for its fixed costs.

Accordingly, after considering these views, we are proposing to prospectively change how the MACs calculate the volume decrease adjustments and require that the MACs compare estimated Medicare revenue for fixed costs to the hospital's fixed costs to remove any conceivable possibility that a hospital that qualifies for the volume decrease adjustment could ever be less than fully compensated for fixed costs as a result of the application of the adjustment. We are proposing that, in order to estimate the fixed portion of the Medicare revenue, the MACs would apply the ratio of the hospital's fixed costs to total costs in the cost reporting period when it experienced the volume decrease to the hospital's total Medicare revenue in that same cost reporting period. We are proposing to revise the regulations at 42 CFR 412.92(e)(3) to reflect our proposed change in the MAC's calculation of the volume decrease adjustment that would apply prospectively to cost reporting periods beginning on or after October 1, 2017, and to reflect that the language requiring that the volume decrease adjustment amount not exceed the difference between the hospital's Medicare inpatient operating costs and the hospital's total DRG revenue for inpatient operating costs would only apply to cost reporting periods beginning before October 1, 2017, but not to subsequent cost reporting periods. Under the proposed methodology, if a hospital's total MS-DRG payment is less than its total Medicare inpatient operating costs, the sum of any resulting volume decrease adjustment payment and its MS-DRG payment would never exceed its total Medicare inpatient operating costs due to the fact that the fixed cost percentage is applied to the MS-DRG payment in calculating the volume decrease adjustment amount. By taking the ratio derived from the subset of fixed costs to total costs and applying that same ratio to the MS-DRG payment, we ensure that the sum of a hospital's IPPS payment and its volume decrease adjustment payment would never exceed its total Medicare inpatient operating costs, thus negating the need for a cap calculation. Thus, the proposed methodology renders the current volume decrease adjustment cap calculation obsolete. Conversely, if a hospital's total MS-DRG payment is greater than its total Medicare inpatient operating costs, calculating a volume decrease adjustment using the proposed methodology would result in a negative payment amount, which would yield a volume decrease adjustment payment of

zero. Finally, if a hospital's total MS-DRG payment is equal to its total Medicare inpatient operating costs, calculating a volume decrease adjustment using the proposed methodology would also yield a volume decrease adjustment payment of zero. Furthermore, we believe that because a hospital could not foresee a decrease in its volume from one year to the next and would therefore not plan for a volume decrease adjustment, the volume decrease adjustment payment should therefore not be limited to a cap that is based on the previous year's costs. For these reasons, we are proposing to remove the cap calculation from the volume decrease adjustment calculation methodology in future periods.

We are proposing that these proposed changes in the MAC's calculation of the volume decrease adjustment would be prospective, effective for cost reporting periods beginning on or after October 1, 2017. If these proposed changes are adopted, we also intend to update Section 2810.1 of the PRM-1 to reflect the changes in the calculation of the volume decrease adjustment by the MAC. For volume decrease adjustments for earlier cost reporting periods, the current calculation methodology will continue. In addition, we are not proposing to change any part of the methodology, criteria, rules, or presumptions we consider and apply in determining whether to classify a given cost as fixed, semi-fixed, or variable for purposes of the volume decrease adjustment.

The following example illustrates the calculation of the volume decrease adjustment by the MAC under our proposed change.

Example: In its cost reporting period beginning October 1, 2017, Hospital A has total Medicare inpatient operating costs equaling \$1,600,000 and total MS-DRG revenue (including outlier payments, IME and DSH) of \$1,400,000. The MAC determines that the hospital qualifies for a volume decrease adjustment for this cost reporting period. The MAC classifies \$1,360,000 of Hospital A's costs as fixed and \$240,000 as variable. Hospital A's fixed cost ratio is therefore $.85 = \$1,360,000 / \$1,600,000$. The MAC applies this ratio to the total MS-DRG revenue of \$1,400,000 to estimate the hospital's fixed MS-DRG revenue to be \$1,190,000. The volume decrease adjustment payment is then calculated by comparing the fixed MS-DRG revenue of \$1,190,000 to the fixed costs of \$1,360,000, resulting in a volume decrease adjustment payment of \$170,000 (\$1,360,000 minus \$1,190,000).

Under the current methodology used by the MACs, Hospital A would receive no volume decrease adjustment payment because its total MS–DRG revenue from Medicare of \$1,400,000 exceeded the hospital's fixed costs of \$1,360,000. Furthermore, under the current methodology, but not under our proposed methodology, it is possible that a hospital would still receive no volume decrease adjustment payment even if its fixed costs exceeded its total MS–DRG revenue if those fixed costs exceeded the previous year's costs updated for inflation.

We also are proposing changes to an adjustment that might be made to a hospital's staffing costs in calculating the volume decrease adjustment. The statute and regulations and the PRM imply, and we have expressly indicated in prior rulemaking, most recently in the FY 2006 rulemaking, our belief that not all staff costs can necessarily be considered fixed costs (71 FR 48056 through 48060). Therefore, we currently require a hospital, when applying for a volume decrease adjustment, to demonstrate that it appropriately adjusted the number of staff in inpatient areas of the hospital based on the decrease in the number of inpatient days but not beyond minimum levels as required by State or local laws. If a hospital does not appropriately adjust its number of staff, the cost of maintaining those staff members is deducted from the total volume decrease adjustment payment. In reviewing the volume decrease adjustment calculation, we have also weighed the administrative burden on the hospital of making this demonstration to CMS, as compared to an assumption that it is likely that a hospital would, in its normal course of business, adjust its staffing levels as revenue declines. In the absence of evidence to contrary, we believe that a hospital would adjust its staffing levels as revenue declines rather than maintain those staffing levels for the sole purpose of potentially having those staffing costs eventually reflected in a Medicare volume decrease adjustment payment that the hospital may or may not qualify for when it files its cost report. Therefore, we are proposing to modify the volume decrease adjustment process to no longer require that a hospital explicitly demonstrate that it appropriately adjusted the number of staff in inpatient areas of the hospital based on the decrease in the number of inpatient days and to no longer require the MAC to adjust the volume decrease adjustment payment amount for excess staffing. We are proposing that these

changes would be effective for cost reporting periods beginning on or after October 1, 2017.

In summary, we are proposing to prospectively require that the MACs compare Medicare revenue allocable to fixed costs from the cost reporting period when the hospital experienced the volume decrease to the hospital's fixed costs from that same cost reporting period when calculating a volume decrease adjustment and that the cap will no longer be applied to the volume decrease adjustment calculation methodology. We are proposing to revise the regulations at § 412.92(e)(3) to reflect our proposed changes. We also are proposing to prospectively modify the volume decrease adjustment process to no longer require that a hospital explicitly demonstrate that it appropriately adjusted the number of staff in inpatient areas of the hospital based on the decrease in the number of inpatient days and to no longer require the MAC to adjust the volume decrease adjustment payment amount for excess staffing. We are proposing that these changes be effective for cost reporting periods beginning on or after October 1, 2017. As we noted earlier, we are proposing that if the MDH program ends up being extended by law, similar to how it was extended by section 205 of the MACRA (Pub. L. 114–10) and prior legislation, these proposed changes to the volume decrease adjustment methodology and the proposed amendment to § 412.92(e)(3) for SCHs would also be made to the parallel requirements for MDHs under § 412.108(d)(3).

D. Rural Referral Centers (RRCs): Proposed Annual Updates to Case-Mix Index and Discharge Criteria (§ 412.98)

Under the authority of section 1886(d)(5)(C)(i) of the Act, the regulations at § 412.96 set forth the criteria that a hospital must meet in order to qualify under the IPPS as a rural referral center (RRC). RRCs receive some special treatment under both the DSH payment adjustment and the criteria for geographic reclassification.

Section 402 of Public Law 108–173 raised the DSH payment adjustment for RRCs such that they are not subject to the 12-percent cap on DSH payments that is applicable to other rural hospitals. RRCs also are not subject to the proximity criteria when applying for geographic reclassification. In addition, they do not have to meet the requirement that a hospital's average hourly wage must exceed, by a certain percentage, the average hourly wage of the labor market area in which the hospital is located.

Section 4202(b) of Public Law 105–33 states, in part, that any hospital classified as an RRC by the Secretary for FY 1991 shall be classified as such an RRC for FY 1998 and each subsequent fiscal year. In the August 29, 1997 IPPS final rule with comment period (62 FR 45999), we reinstated RRC status for all hospitals that lost that status due to triennial review or MGCRB reclassification. However, we did not reinstate the status of hospitals that lost RRC status because they were now urban for all purposes because of the OMB designation of their geographic area as urban. Subsequently, in the August 1, 2000 IPPS final rule (65 FR 47089), we indicated that we were revisiting that decision. Specifically, we stated that we would permit hospitals that previously qualified as an RRC and lost their status due to OMB redesignation of the county in which they are located from rural to urban, to be reinstated as an RRC. Otherwise, a hospital seeking RRC status must satisfy all of the other applicable criteria. We use the definitions of “urban” and “rural” specified in subpart D of 42 CFR part 412. One of the criteria under which a hospital may qualify as an RRC is to have 275 or more beds available for use (§ 412.96(b)(1)(ii)). A rural hospital that does not meet the bed size requirement can qualify as an RRC if the hospital meets two mandatory prerequisites (a minimum case-mix index (CMI) and a minimum number of discharges), and at least one of three optional criteria (relating to specialty composition of medical staff, source of inpatients, or referral volume). (We refer readers to § 412.96(c)(1) through (c)(5) and the September 30, 1988 **Federal Register** (53 FR 38513) for additional discussion.) With respect to the two mandatory prerequisites, a hospital may be classified as an RRC if—

- The hospital's CMI is at least equal to the lower of the median CMI for urban hospitals in its census region, excluding hospitals with approved teaching programs, or the median CMI for all urban hospitals nationally; and
- The hospital's number of discharges is at least 5,000 per year, or, if fewer, the median number of discharges for urban hospitals in the census region in which the hospital is located. The number of discharges criterion for an osteopathic hospital is at least 3,000 discharges per year, as specified in section 1886(d)(5)(C)(i) of the Act.

1. Case-Mix Index (CMI)

Section 412.96(c)(1) provides that CMS establish updated national and regional CMI values in each year's annual notice of prospective payment

rates for purposes of determining RRC status. The methodology we used to determine the national and regional CMI values is set forth in the regulations at § 412.96(c)(1)(ii). The proposed national median CMI value for FY 2018 is based on the CMI values of all urban hospitals nationwide, and the proposed regional median CMI values for FY 2018 are based on the CMI values of all urban hospitals within each census region, excluding those hospitals with approved teaching programs (that is,

those hospitals that train residents in an approved GME program as provided in § 413.75). These proposed values are based on discharges occurring during FY 2016 (October 1, 2015 through September 30, 2016), and include bills posted to CMS' records through December 2016.

In this proposed rule, we are proposing that, in addition to meeting other criteria, if rural hospitals with fewer than 275 beds are to qualify for initial RRC status for cost reporting periods beginning on or after October 1,

2017, they must have a CMI value for FY 2016 that is at least—

- 1.6635 (national—all urban); or
- The median CMI value (not transfer-adjusted) for urban hospitals (excluding hospitals with approved teaching programs as identified in § 413.75) calculated by CMS for the census region in which the hospital is located.

The proposed median CMI values by region are set forth in the following table.

Region	Case-mix index value
1. New England (CT, ME, MA, NH, RI, VT)	1.4186
2. Middle Atlantic (PA, NJ, NY)	1.5126
3. South Atlantic (DE, DC, FL, GA, MD, NC, SC, VA, WV)	1.5393
4. East North Central (IL, IN, MI, OH, WI)	1.5921
5. East South Central (AL, KY, MS, TN)	1.5179
6. West North Central (IA, KS, MN, MO, NE, ND, SD)	1.6346
7. West South Central (AR, LA, OK, TX)	1.6949
8. Mountain (AZ, CO, ID, MT, NV, NM, UT, WY)	1.7614
9. Pacific (AK, CA, HI, OR, WA)	1.6466

We intend to update these proposed CMI values in the FY 2018 final rule to reflect the updated FY 2016 MedPAR file, which will contain data from additional bills received through March 2017.

A hospital seeking to qualify as an RRC should obtain its hospital-specific CMI value (not transfer-adjusted) from its MAC. Data are available on the Provider Statistical and Reimbursement (PS&R) System. In keeping with our policy on discharges, the CMI values are computed based on all Medicare patient discharges subject to the IPPS MS-DRG-based payment.

2. Discharges

Section 412.96(c)(2)(i) provides that CMS set forth the national and regional numbers of discharges criteria in each year's annual notice of prospective payment rates for purposes of determining RRC status. As specified in section 1886(d)(5)(C)(ii) of the Act, the national standard is set at 5,000 discharges. In this proposed rule, for FY 2018, we are proposing to update the regional standards based on discharges for urban hospitals' cost reporting periods that began during FY 2015 (that is, October 1, 2014 through September 30, 2015), which are the latest cost

report data available at the time this proposed rule was developed. Therefore, we are proposing that, in addition to meeting other criteria, a hospital, if it is to qualify for initial RRC status for cost reporting periods beginning on or after October 1, 2017, must have, as the number of discharges for its cost reporting period that began during FY 2015, at least—

- 5,000 (3,000 for an osteopathic hospital); or
- The median number of discharges for urban hospitals in the census region in which the hospital is located as reflected in the following table.

Region	Number of discharges
1. New England (CT, ME, MA, NH, RI, VT)	7,991
2. Middle Atlantic (PA, NJ, NY)	10,268
3. South Atlantic (DE, DC, FL, GA, MD, NC, SC, VA, WV)	10,503
4. East North Central (IL, IN, MI, OH, WI)	8,202
5. East South Central (AL, KY, MS, TN)	8,697
6. West North Central (IA, KS, MN, MO, NE, ND, SD)	7,532
7. West South Central (AR, LA, OK, TX)	5,189
8. Mountain (AZ, CO, ID, MT, NV, NM, UT, WY)	8,887
9. Pacific (AK, CA, HI, OR, WA)	8,856

We intend to update these numbers in the FY 2018 final rule based on the latest available cost report data.

We note that the median number of discharges for hospitals in each census region is greater than the national standard of 5,000 discharges. Therefore, under this proposed rule, 5,000 discharges is the minimum criterion for all hospitals, except for osteopathic

hospitals for which the minimum criterion is 3,000 discharges.

E. Proposed Payment Adjustment for Low-Volume Hospitals (§ 412.101)

1. Expiration of Temporary Changes to Low-Volume Hospital Payment Policy

Under section 1886(d)(12) of the Act, as amended, most recently by section 204 of the Medicare Access and CHIP

Reauthorization Act of 2015 (MACRA), Public Law 114–10, the temporary changes in the low-volume hospital payment policy originally provided by the Affordable Care Act and extended through subsequent legislation are effective through FY 2017. Beginning with FY 2018, the preexisting low-volume hospital payment adjustment and qualifying criteria, as implemented

in FY 2005 and discussed later in this section, will resume. We discuss the proposed payment policies for FY 2018 in section V.E.3. of the preamble of this proposed rule.

2. Background

Section 1886(d)(12) of the Act, as added by section 406(a) of Public Law 108–173, provides for a payment adjustment to account for the higher costs per discharge for low-volume hospitals under the IPPS, effective beginning FY 2005. Sections 3125 and 10314 of the Affordable Care Act amended section 1886(d)(12) of the Act by modifying the definition of a low-volume hospital and the methodology for calculating the payment adjustment for low-volume hospitals, effective only for discharges occurring during FYs 2011 and 2012. Specifically, the provisions of the Affordable Care Act amended the qualifying criteria for low-volume hospitals to specify, for FYs 2011 and 2012, that a hospital qualifies as a low-volume hospital if it is more than 15 road miles from another subsection (d) hospital and has less than 1,600 discharges of individuals entitled to, or enrolled for, benefits under Medicare Part A during the fiscal year. In addition, the statute, as amended by the Affordable Care Act, provides that the low-volume hospital payment adjustment (that is, the percentage increase) is determined using a continuous linear sliding scale ranging from 25 percent for low-volume hospitals with 200 or fewer discharges of individuals entitled to, or enrolled for, benefits under Medicare Part A in the fiscal year to 0 percent for low-volume hospitals with greater than 1,600 discharges of such individuals in the fiscal year. The temporary changes to the low-volume hospital qualifying criteria and the payment adjustment originally provided by the Affordable Care Act were extended by subsequent legislation, most recently through FY 2017 by section 204 of the MACRA. (We refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56941 through 59943) for a detailed summary of the applicable legislation.) Under current law, beginning with FY 2018, the preexisting low-volume hospital qualifying criteria and payment adjustment, as implemented in FY 2005 and described in this section, will resume. The regulations implementing the low-volume hospital adjustment provided by section 1886(d)(12) of the Act are located at 42 CFR 412.101.

The additional payment adjustment to a low-volume hospital provided for under section 1886(d)(12) of the Act is in addition to any payment calculated

under this section. Therefore, the additional payment adjustment is based on the per discharge amount paid to the qualifying hospital under section 1886 of the Act. In other words, the low-volume add-on payment amount is based on total per discharge payments made under section 1886 of the Act, including capital, DSH, IME, and outliers. For hospitals paid based on the hospital-specific rate, the low-volume add-on payment amount is based on either the Federal rate or the hospital-specific rate, whichever results in a greater operating IPPS payment.

Section 1886(d)(12)(C)(i) of the Act defines a low-volume hospital, for fiscal years other than FYs 2011 through 2017, as a subsection (d) hospital (as defined in paragraph (1)(B)) that the Secretary determines is located more than 25 road miles from another subsection (d) hospital and that has less than 800 discharges during the fiscal year. Section 1886(d)(12)(C)(ii) of the Act further stipulates that the term “discharge” means an inpatient acute care discharge of an individual, regardless of whether the individual is entitled to benefits under Medicare Part A. Therefore, for fiscal years other than FYs 2011 through 2017, the term “discharge” refers to total discharges, regardless of payer (that is, not only Medicare discharges). Furthermore, section 1886(d)(12)(B) of the Act requires, for discharges occurring in FYs 2005 through 2010 and FY 2018 and subsequent years, that the Secretary determine an applicable percentage increase for these low-volume hospitals based on the “empirical relationship” between the standardized cost-per-case for such hospitals and the total number of discharges of such hospitals and the amount of the additional incremental costs (if any) that are associated with such number of discharges. The statute thus mandates that the Secretary develop an empirically justifiable adjustment based on the relationship between costs and discharges for these low-volume hospitals. Section 1886(d)(12)(B)(iii) of the Act limits the applicable percentage increase adjustment to no more than 25 percent.

Based on an analysis we conducted for the FY 2005 IPPS final rule (69 FR 49099 through 49102), a 25-percent low-volume adjustment to all qualifying hospitals with less than 200 discharges was found to be most consistent with the statutory requirement to provide relief to low-volume hospitals where there is empirical evidence that higher incremental costs are associated with low numbers of total discharges. In the FY 2006 IPPS final rule (70 FR 47432 through 47434), we stated that

multivariate analyses supported the existing low-volume adjustment implemented in FY 2005.

3. Proposed Payment Adjustment for FY 2018 and Subsequent Fiscal Years

In accordance with section 1886(d)(12) of the Act, beginning with FY 2018, the low-volume hospital definition and payment adjustment methodology will revert back to the statutory requirements that were in effect prior to the amendments made by the Affordable Care Act and extended by subsequent legislation. Therefore, effective for FY 2018 and subsequent years, in order to qualify as a low-volume hospital, a subsection (d) hospital must be more than 25 road miles from another subsection (d) hospital and have less than 200 discharges (that is, less than 200 discharges total, including both Medicare and non-Medicare discharges) during the fiscal year. As discussed earlier, the statute specifies that a low-volume hospital must have less than 800 discharges during the fiscal year. However, as required by section 1886(d)(12)(B)(i) of the Act and as discussed earlier, the Secretary has developed an empirically justifiable payment adjustment based on the relationship, for IPPS hospitals with less than 800 discharges, between the additional incremental costs (if any) that are associated with a particular number of discharges. Based on an analysis we conducted for the FY 2005 IPPS final rule (69 FR 49099 through 49102), a 25-percent low-volume adjustment to all qualifying hospitals with less than 200 discharges was found to be most consistent with the statutory requirement to provide relief for low-volume hospitals where there is empirical evidence that higher incremental costs are associated with low numbers of total discharges. (Under the policy we established in that same final rule, hospitals with between 200 and 799 discharges do not receive a low-volume hospital adjustment.)

As described earlier, for FYs 2005 through 2010 and FY 2018 and subsequent years, the discharge determination is made based on the hospital's number of total discharges, that is, Medicare and non-Medicare discharges. The hospital's most recently submitted cost report is used to determine if the hospital meets the discharge criterion to receive the low-volume payment adjustment in the current year (§ 412.101(b)(2)(i)). We use cost report data to determine if a hospital meets the discharge criterion because this is the best available data source that includes information on

both Medicare and non-Medicare discharges. We note that, for FYs 2011 through 2017, we used the most recently available MedPAR data to determine the hospital's Medicare discharges because only Medicare discharges were used to determine if a hospital met the discharge criterion for those years.

For FY 2018 and for subsequent fiscal years, in addition to a discharge criterion, the eligibility for the low-volume payment adjustment is also dependent upon the hospital meeting the mileage criterion specified at § 412.101(b)(2)(i). Specifically, to meet the mileage criterion to qualify for the low-volume payment adjustment for FY 2018 and subsequent fiscal years, a hospital must be located more than 25 road miles from the nearest subsection (d) hospital. We define, at § 412.101(a), the term "road miles" to mean "miles" as defined at § 412.92(c)(1) (75 FR 50238 through 50275 and 50414).

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50238 through 50275 and 50414) and subsequent rulemaking, most recently in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56942 through 56943), we discussed the process for requesting and obtaining the low-volume hospital payment adjustment. In order to qualify for the low-volume hospital payment adjustment, a hospital must provide to its MAC sufficient evidence to document that it meets the discharge and distance requirements. The MAC will determine, based on the most recent data available, if the hospital qualifies as a low-volume hospital, so that the hospital will know in advance whether or not it will receive a payment adjustment. The MAC and CMS may review available data, in addition to the data the hospital submits with its request for low-volume hospital status, in order to determine whether or not the hospital meets the qualifying criteria.

In order to receive a low-volume hospital payment adjustment under § 412.101, a hospital must notify and provide documentation to its MAC that it meets the mileage criterion. The use of a Web-based mapping tool as part of documenting that the hospital meets the mileage criterion for low-volume hospitals is acceptable. The MAC will determine if the information submitted by the hospital, such as the name and street address of the nearest hospitals, location on a map, and distance (in road miles, as defined in the regulations at § 412.101(a)) from the hospital requesting low-volume hospital status, is sufficient to document that it meets the mileage criterion. If not, the MAC will follow up with the hospital to obtain additional necessary information

to determine whether or not the hospital meets the low-volume mileage criterion. In addition, the MAC will refer to the hospital's most recently submitted cost report to determine whether or not the hospital meets the discharge criterion. A hospital should refer to its most recently submitted cost report for total discharges (Medicare and non-Medicare) in order to decide whether or not to apply for low-volume hospital status for a particular fiscal year. A hospital must continue to meet the qualifying criteria at § 412.101(b)(2)(i) as a low-volume hospital (that is, the discharge criterion and the mileage criterion) in order to receive the payment adjustment in that year; that is, low-volume hospital status is not based on a "one-time" qualification (75 FR 50238 through 50275).

In order to be a low-volume hospital in FY 2018 and subsequent fiscal years, in accordance with our previously established procedure, a hospital must make a written request for low-volume hospital status that is received by its MAC by September 1 immediately preceding the start of the Federal fiscal year for which the hospital is applying for low-volume hospital status in order for the 25-percent, low-volume, add-on payment adjustment to be applied to payments for its discharges for the fiscal year beginning on or after October 1 immediately following the request (that is, the start of the Federal fiscal year). For a hospital whose request for low-volume hospital status is received after September 1, if the MAC determines the hospital meets the criteria to qualify as a low-volume hospital, the MAC will apply the 25-percent, low-volume, add-on payment adjustment to determine payment for the hospital's discharges for the fiscal year, effective prospectively within 30 days of the date of the MAC's low-volume status determination.

Specifically, for FY 2018, a hospital must make a written request for low-volume hospital status that is received by its MAC no later than September 1, 2017, in order for the 25-percent, low-volume, add-on payment adjustment to be applied to payments for its discharges beginning on or after October 1, 2017 (through September 30, 2018). Under this procedure, a hospital that qualified for the low-volume hospital payment adjustment for FY 2017 may continue to receive a low-volume hospital payment adjustment for FY 2018 without reapplying if it meets both the discharge criterion and the mileage criterion applicable for FY 2018. As in previous years, we are proposing that such a hospital must send written verification that is received by its MAC no later than September 1, 2017, stating

that it meets the mileage criterion applicable for FY 2018. For FY 2018, we are further proposing that this written verification must also state, based upon the most recently submitted cost report, that the hospital meets the discharge criterion applicable for FY 2018 (that is, less than 200 discharges total, including both Medicare and non-Medicare discharges). If a hospital's request for low-volume hospital status for FY 2018 is received after September 1, 2017, and if the MAC determines the hospital meets the criteria to qualify as a low-volume hospital, the MAC will apply the 25-percent, low-volume, add-on payment adjustment to determine the payment for the hospital's FY 2018 discharges, effective prospectively within 30 days of the date of the MAC's low-volume hospital status determination. We note that this process mirrors our established application process but is updated to ensure that providers currently receiving the low-volume hospital payment adjustment verify that they meet both the mileage criterion and the discharge criterion applicable for FY 2018 to continue receiving the adjustment for FY 2018. For additional information on our established application process for the low-volume hospital payment adjustment, we refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56942 through 56943).

In the FY 2016 IPPS interim final rule with comment period (80 FR 49594 through 49597 and 49767), we made conforming changes to the regulations at 42 CFR 412.101 to reflect the extension of the changes to the qualifying criteria and the payment adjustment methodology for low-volume hospitals through FY 2017 in accordance with section 204 of the MACRA. Under these revisions, beginning with FY 2018, consistent with current law, the low-volume hospital qualifying criteria and payment adjustment methodology will return to the criteria and methodology that were in effect prior to the amendments made by the Affordable Care Act (that is, the low-volume hospital payment policy in effect for FYs 2005 through 2010). Therefore, no further revisions to the policy or to the regulations at § 412.101 are required to conform them to the statutory requirement that the low-volume hospital policy in effect prior to the Affordable Care Act will again be in effect for FY 2018 and subsequent years.

For this reason, we are not proposing specific amendments to the regulations at § 412.101 to reflect the expiration of the temporary changes to the low-volume hospital payment adjustment policy originally provided for by the

Affordable Care Act. However, we are proposing that if these temporary changes to the low-volume hospital payment policy were to be extended by law, similar to extensions provided through FY 2013, by the American Taxpayer Relief Act of 2012 (ATRA), Public Law 112–240; through March 31, 2014, by the Pathway for SGR Reform Act of 2013, Public Law 113–167; through March 31, 2015, by the Protecting Access to Medicare Act of 2014 (PAMA), Public Law 113–93; and most recently through FY 2017, by the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA), Public Law 114–10, we would make conforming changes to the regulations at § 412.101(b) through (d), as appropriate, to reflect any such extension.

These conforming changes would only be made if the temporary changes to the low-volume hospital payment adjustment policy were to be extended by statute beyond the current expiration date of September 30, 2017. If these temporary changes were to be extended by statute, for FY 2018, consistent with our historical policy and our implementation of the prior extensions, qualifying low-volume hospitals and their payment adjustment would be determined using the most recently available Medicare discharge data available at the time of the final rule, which we expect would be from the March 2017 update of the FY 2016 MedPAR file. Consistent with past practice, if these temporary changes were to be extended for FY 2018 before the development of the final rule, we would list the subsection (d) hospitals with fewer than 1,600 Medicare discharges based on the claims data from the March 2017 update of the FY 2016 MedPAR file and their potential low-volume hospital payment adjustment for FY 2018 in Table 14 listed in the Addendum of the final rule. In such an event, hospitals would still submit requests or verification to the MAC, as outlined earlier, but updated as needed to reflect the applicable discharge and mileage criteria in accordance with any such extension for FY 2018.

4. Proposed Parallel Low-Volume Hospital Payment Adjustment Regarding Hospitals Operated by the Indian Health Services (IHS) or a Tribe

As previously stated, section 1886(d)(12)(C) of the Act and our regulations at 42 CFR 412.101(b)(2) require that, in order to qualify for the low-volume hospital payment adjustment, a hospital must be located more than a specified number of miles from the nearest subsection (d) hospital

(referred to as the mileage criterion). Section 1886(d)(1)(B) of the Act defines a “subsection (d) hospital” as a hospital located in one of the 50 States or District of Columbia, other than the specified excluded types of hospitals. As stated in prior rulemaking (for example, 79 FR 50153), CMS considers IHS and Tribal hospitals to be subsection (d) hospitals. However, given the unique nature of IHS and Tribal hospitals and the populations they serve, as discussed below, we believe it would be appropriate to provide additional flexibility in determining eligibility for the low-volume hospital payment adjustment for IHS and non-IHS hospitals and Tribal hospitals that are located less than the specified mileage from one another. Specifically, we are proposing that, for an IHS or Tribal hospital, only its proximity to other IHS or Tribal hospitals would be used to determine if the mileage criterion is met. Similarly, for a non-IHS hospital, only its proximity to other non-IHS hospitals would be used to determine if the mileage criterion is met.

Except for emergencies and a few other limited special cases, those individuals who are not members of a Federally recognized Tribe are not eligible for treatment at IHS or Tribal hospitals. Therefore, such a hospital is not a valid option for the general Medicare population, including local residents who are not members of a Federally recognized Tribe or not otherwise eligible for IHS services. Therefore, we believe it would be appropriate to not consider IHS and Tribal hospitals when evaluating whether a non-IHS hospital meets the mileage criterion.

Likewise, we believe it would be appropriate to not consider non-IHS hospitals when evaluating whether an IHS or Tribal hospital meet the mileage criterion. The principal mission of the IHS is the provision of health care to American Indians and Alaska Natives throughout the United States. In carrying out that mission, IHS operates under two primary authorizing statutes. The first statute, the Snyder Act, authorizes IHS to expend such moneys as Congress may determine from time to time appropriate for the conservation of the health of American Indians or Alaska Natives. We refer readers to 25 U.S.C. 13 (providing that the Bureau of Indian Affairs (BIA) will expend funds as appropriated for, among other things, the conservation of health of American Indians and Alaska Natives); and 42 U.S.C. 2001(a) (transferring the responsibility for American Indian and Alaska Native health care from BIA to HHS). The second statute, the Indian

Health Care Improvement Act (IHCA), established IHS as an agency within the Public Health Service of HHS and provides authority for numerous programs to address particular health initiatives for American Indians and Alaska Natives, such as alcohol and substance abuse and diabetes (25 U.S.C. 1601 *et seq.*).

IHS and Tribal hospitals are charged with addressing the health of American Indians and Alaska Natives and are uniquely situated to provide services to this population. For this reason, we believe it would be appropriate to not consider the non-IHS hospitals when evaluating whether an IHS or Tribal hospital meets the mileage criterion.

Because IHS and Tribal hospitals are subsection (d) hospitals, we are proposing to use our authority under section 1886(d)(5)(I)(i) of the Act to provide an adjustment equal to the applicable low-volume adjustment provided for under section 1886(d)(12) of the Act for an IHS or Tribal hospital whose sole disqualifier for the low-volume hospital adjustment is its proximity to a non-IHS hospital, and for a non-IHS hospital whose sole disqualifier is its proximity to an IHS or Tribal hospital. Such an adjustment would provide that, practically speaking, an IHS or Tribal hospital would be able to receive a low-volume hospital adjustment based on its distance to the nearest IHS or Tribal hospital, and a non-IHS hospital would be able to qualify to receive a low-volume hospital adjustment based on its distance to the nearest non-IHS hospital. We believe it is appropriate to apply this authority here, given the unique characteristics of IHS and Tribal hospitals, as discussed above. To implement this proposed adjustment, we are proposing to revise 42 CFR 412.101 by adding paragraph (e) to provide that, for discharges occurring in FY 2018 and subsequent years, only the distance between IHS or Tribal hospitals would be considered when assessing whether an IHS or Tribal hospital meets the mileage criterion under § 412.101(b)(2). Similarly, only the distance between non-IHS hospitals would be considered when assessing whether a non-IHS hospital meets the mileage criterion under § 412.101(b)(2).

F. Indirect Medical Education (IME) Payment Adjustment Factor for FY 2018 (§ 412.105)

Under the IPPS, an additional payment amount is made to hospitals with residents in an approved graduate medical education (GME) program in order to reflect the higher indirect patient care costs of teaching hospitals

relative to nonteaching hospitals. The payment amount is determined by use of a statutorily specified adjustment factor. The regulations regarding the calculation of this additional payment, known as the IME adjustment, are located at § 412.105. We refer readers to the FY 2012 IPPS/LTCH PPS final rule (76 FR 51680) for a full discussion of the IME adjustment and IME adjustment factor. Section 1886(d)(5)(B)(ii)(XII) of the Act provides that, for discharges occurring during FY 2008 and fiscal years thereafter, the IME formula multiplier is 1.35. Accordingly, for discharges occurring during FY 2018, the formula multiplier is 1.35. We estimate that application of this formula multiplier for the FY 2018 IME adjustment will result in an increase in IPPS payment of 5.5 percent for every approximately 10 percent increase in the hospital's resident to bed ratio.

G. Proposed Payment Adjustment for Medicare Disproportionate Share Hospitals (DSHs) for FY 2018 (§ 412.106)

1. General Discussion

Section 1886(d)(5)(F) of the Act provides for additional Medicare payments to subsection (d) hospitals that serve a significantly disproportionate number of low-income patients. The Act specifies two methods by which a hospital may qualify for the Medicare disproportionate share hospital (DSH) adjustment. Under the first method, hospitals that are located in an urban area and have 100 or more beds may receive a Medicare DSH payment adjustment if the hospital can demonstrate that, during its cost reporting period, more than 30 percent of its net inpatient care revenues are derived from State and local government payments for care furnished to needy patients with low incomes. This method is commonly referred to as the "Pickle method." The second method for qualifying for the DSH payment adjustment, which is the most common, is based on a complex statutory formula under which the DSH payment adjustment is based on the hospital's geographic designation, the number of beds in the hospital, and the level of the hospital's disproportionate patient percentage (DPP). A hospital's DPP is the sum of two fractions: The "Medicare fraction" and the "Medicaid fraction." The Medicare fraction (also known as the "SSI fraction" or "SSI ratio") is computed by dividing the number of the hospital's inpatient days that are furnished to patients who were entitled to both Medicare Part A and Supplemental Security Income (SSI)

benefits by the hospital's total number of patient days furnished to patients entitled to benefits under Medicare Part A. The Medicaid fraction is computed by dividing the hospital's number of inpatient days furnished to patients who, for such days, were eligible for Medicaid, but were not entitled to benefits under Medicare Part A, by the hospital's total number of inpatient days in the same period.

Because the DSH payment adjustment is part of the IPPS, the statutory references to "days" in section 1886(d)(5)(F) of the Act have been interpreted to apply only to hospital acute care inpatient days. Regulations located at § 412.106 govern the Medicare DSH payment adjustment and specify how the DPP is calculated as well as how beds and patient days are counted in determining the Medicare DSH payment adjustment. Under § 412.106(a)(1)(i), the number of beds for the Medicare DSH payment adjustment is determined in accordance with bed counting rules for the IME adjustment under § 412.105(b).

Section 3133 of the Patient Protection and Affordable Care Act, as amended by section 10316 of the same Act and section 1104 of the Health Care and Education Reconciliation Act (Pub. L. 111–152), added a section 1886(r) to the Act that modifies the methodology for computing the Medicare DSH payment adjustment. (For purposes of this proposed rule, we refer to these provisions collectively as section 3133 of the Affordable Care Act.) Beginning with discharges in FY 2014, hospitals that qualify for Medicare DSH payments under section 1886(d)(5)(F) of the Act receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments. This provision applies equally to hospitals that qualify for DSH payments under section 1886(d)(5)(F)(i)(I) of the Act and those hospitals that qualify under the Pickle method under section 1886(d)(5)(F)(i)(II) of the Act.

The remaining amount, equal to an estimate of 75 percent of what otherwise would have been paid as Medicare DSH payments, reduced to reflect changes in the percentage of individuals who are uninsured, is available to make additional payments to each hospital that qualifies for Medicare DSH payments and that has uncompensated care. The payments to each hospital for a fiscal year are based on the hospital's amount of uncompensated care for a given time period relative to the total amount of uncompensated care for that same time period reported by all

hospitals that receive Medicare DSH payments for that fiscal year.

As provided by section 3133 of the Affordable Care Act, section 1886(r) of the Act requires that, for FY 2014 and each subsequent fiscal year, a subsection (d) hospital that would otherwise receive DSH payments made under section 1886(d)(5)(F) of the Act receives two separately calculated payments. Specifically, section 1886(r)(1) of the Act provides that the Secretary shall pay to such subsection (d) hospital (including a Pickle hospital) 25 percent of the amount the hospital would have received under section 1886(d)(5)(F) of the Act for DSH payments, which represents the empirically justified amount for such payment, as determined by the MedPAC in its March 2007 Report to Congress. We refer to this payment as the "empirically justified Medicare DSH payment."

In addition to this empirically justified Medicare DSH payment, section 1886(r)(2) of the Act provides that, for FY 2014 and each subsequent fiscal year, the Secretary shall pay to such subsection (d) hospital an additional amount equal to the product of three factors. The first factor is the difference between the aggregate amount of payments that would be made to subsection (d) hospitals under section 1886(d)(5)(F) of the Act if subsection (r) did not apply and the aggregate amount of payments that are made to subsection (d) hospitals under section 1886(r)(1) of the Act for each fiscal year. Therefore, this factor amounts to 75 percent of the payments that would otherwise be made under section 1886(d)(5)(F) of the Act.

The second factor is, for FYs 2014 through 2017, 1 minus the percent change in the percent of individuals under the age of 65 who are uninsured, determined by comparing the percent of such individuals who were uninsured in 2013, the last year before coverage expansion under the Affordable Care Act (as calculated by the Secretary based on the most recent estimates available from the Director of the Congressional Budget Office before a vote in either House on the Health Care and Education Reconciliation Act of 2010 that, if determined in the affirmative, would clear such Act for enrollment), and the percent of individuals who were uninsured in the most recent period for which data are available (as so calculated) minus 0.1 percentage point for FY 2014, and minus 0.2 percentage point for FYs 2015 through 2017. For FYs 2014 through 2017, the baseline for the estimate of the change in uninsurance is fixed by the

most recent estimate of the Congressional Budget Office before the final vote on the Health Care and Education Reconciliation Act of 2010, which is contained in a March 20, 2010 letter from the Director of the Congressional Budget Office to the Speaker of the House. (The March 20, 2010 letter is available for viewing on the following Web site: <http://www.cbo.gov/sites/default/files/cbofiles/ftpdocs/113xx/doc11379/amendreconprop.pdf>.)

For FY 2018 and subsequent fiscal years, the second factor is 1 minus the percent change in the percent of individuals who are uninsured, as determined by comparing the percent of individuals who were uninsured in 2013 (as estimated by the Secretary, based on data from the Census Bureau or other sources the Secretary determines appropriate, and certified by the Chief Actuary of CMS), and the percent of individuals who were uninsured in the most recent period for which data are available (as so estimated and certified), minus 0.2 percentage point for FYs 2018 and 2019.

The third factor is a percent that, for each subsection (d) hospital, represents the quotient of the amount of uncompensated care for such hospital for a period selected by the Secretary (as estimated by the Secretary, based on appropriate data), including the use of alternative data where the Secretary determines that alternative data are available which are a better proxy for the costs of subsection (d) hospitals for treating the uninsured, and the aggregate amount of uncompensated care for all subsection (d) hospitals that receive a payment under section 1886(r) of the Act. Therefore, this third factor represents a hospital's uncompensated care amount for a given time period relative to the uncompensated care amount for that same time period for all hospitals that receive Medicare DSH payments in the applicable fiscal year, expressed as a percent.

For each hospital, the product of these three factors represents its additional payment for uncompensated care for the applicable fiscal year. We refer to the additional payment determined by these factors as the "uncompensated care payment."

Section 1886(r) of the Act applies to FY 2014 and each subsequent fiscal year. In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50620 through 50647) and the FY 2014 IPPS interim final rule with comment period (78 FR 61191 through 61197), we set forth our policies for implementing the required changes to the Medicare DSH payment methodology made by section 3133 of

the Affordable Care Act for FY 2014. In those rules, we noted that, because section 1886(r) of the Act modifies the payment required under section 1886(d)(5)(F) of the Act, it affects only the DSH payment under the operating IPPS. It does not revise or replace the capital IPPS DSH payment provided under the regulations at 42 CFR part 412, subpart M, which were established through the exercise of the Secretary's discretion in implementing the capital IPPS under section 1886(g)(1)(A) of the Act.

Finally, section 1886(r)(3) of the Act provides that there shall be no administrative or judicial review under section 1869, section 1878, or otherwise of any estimate of the Secretary for purposes of determining the factors described in section 1886(r)(2) of the Act or of any period selected by the Secretary for the purpose of determining those factors. Therefore, there is no administrative or judicial review of the estimates developed for purposes of applying the three factors used to determine uncompensated care payments, or the periods selected in order to develop such estimates.

2. Eligibility for Empirically Justified Medicare DSH Payments and Uncompensated Care Payments

As indicated earlier, the payment methodology under section 3133 of the Affordable Care Act applies to "subsection (d) hospitals" that would otherwise receive a DSH payment made under section 1886(d)(5)(F) of the Act. Therefore, hospitals must receive empirically justified Medicare DSH payments in a fiscal year in order to receive an additional Medicare uncompensated care payment for that year. Specifically, section 1886(r)(2) of the Act states that, in addition to the payment made to a subsection (d) hospital under section 1886(r)(1) of the Act, the Secretary shall pay to such subsection (d) hospitals an additional amount. Because section 1886(r)(1) of the Act refers to empirically justified Medicare DSH payments, the additional payment under section 1886(r)(2) of the Act is limited to hospitals that receive empirically justified Medicare DSH payments in accordance with section 1886(r)(1) of the Act for the applicable fiscal year.

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50622) and the FY 2014 IPPS interim final rule with comment period (78 FR 61193), we provided that hospitals that are not eligible to receive empirically justified Medicare DSH payments in a fiscal year will not receive uncompensated care payments for that year. We also specified that we

would make a determination concerning eligibility for interim uncompensated care payments based on each hospital's estimated DSH status for the applicable fiscal year (using the most recent data that are available). We indicated that our final determination on the hospital's eligibility for uncompensated care payments will be based on the hospital's actual DSH status at cost report settlement for that payment year.

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50622) and the FY 2015 IPPS/LTCH PPS final rule (79 FR 50006), we specified our policies for several specific classes of hospitals within the scope of section 1886(r) of the Act. We refer readers to those two final rules for a detailed discussion of our policies. In summary, we specified the following:

- *Subsection (d) Puerto Rico hospitals* that are eligible for DSH payments also are eligible to receive empirically justified Medicare DSH payments and uncompensated care payments under the new payment methodology (78 FR 50623 and 79 FR 50006).

- *Maryland hospitals* are not eligible to receive empirically justified Medicare DSH payments and uncompensated care payments under the payment methodology of section 1886(r) of the Act because they are not paid under the IPPS. As discussed in the FY 2015 IPPS/LTCH PPS final rule (79 FR 50007), effective January 1, 2014, the State of Maryland elected to no longer have Medicare pay Maryland hospitals in accordance with section 1814(b)(3) of the Act and entered into an agreement with CMS that Maryland hospitals will be paid under the Maryland All-Payer Model. However, under the Maryland All-Payer Model, Maryland hospitals still are not paid under the IPPS. Therefore, they remain ineligible to receive empirically justified Medicare DSH payments or uncompensated care payments under section 1886(r) of the Act.

- *SCHs that are paid under their hospital-specific rate* are not eligible for Medicare DSH payments. SCHs that are paid under the IPPS Federal rate receive interim payments based on what we estimate and project their DSH status to be prior to the beginning of the Federal fiscal year (based on the best available data at that time) subject to settlement through the cost report, and if they receive interim empirically justified Medicare DSH payments in a fiscal year, they also will receive interim uncompensated care payments for that fiscal year on a per discharge basis, subject as well to settlement through the cost report. Final eligibility determinations will be made at the end

of the cost reporting period at settlement, and both interim empirically justified Medicare DSH payments and uncompensated care payments will be adjusted accordingly (78 FR 50624 and 79 FR 50007).

- *MDHs* are paid based on the IPPS Federal rate or, if higher, the IPPS Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the updated hospital-specific rate from certain specified base years (76 FR 51684). The IPPS Federal rate used in the MDH payment methodology is the same IPPS Federal rate that is used in the SCH payment methodology. Section 205 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA), Public Law 114–10, enacted April 16, 2015, extended the MDH program for discharges on or after April 1, 2015, through September 30, 2017. Because MDHs are paid based on the IPPS Federal rate, for FY 2017, MDHs continue to be eligible to receive empirically justified Medicare DSH payments and uncompensated care payments if their DPP is at least 15 percent. We apply the same process to determine MDHs' eligibility for empirically justified Medicare DSH and uncompensated care payments, as we do for all other IPPS hospitals, through September 30, 2017. We note that there has not been legislation at the time of development of this proposed rule that would extend the MDH program beyond September 30, 2017. However, if the MDH program were to be extended beyond its current expiration date, similar to how it was extended under MACRA, MDHs would continue to be paid based on the IPPS Federal rate or, if higher, the IPPS Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the updated hospital-specific rate from certain specified base years. Accordingly, if the MDH program were to be extended beyond its current expiration date of September 30, 2017, we would continue to make a determination concerning eligibility for interim uncompensated care payments based on each hospital's estimated DSH status for the applicable fiscal year (using the most recent data that are available). Our final determination on the hospital's eligibility for uncompensated care payments would be based on the hospital's actual DSH status at cost report settlement for that payment year. In addition, as we do for all IPPS hospitals, we would calculate a numerator for Factor 3 for all MDHs, regardless of whether they are projected to be eligible for Medicare DSH

payments during the fiscal year, but the denominator for Factor 3 would be based on the uncompensated care data from the hospitals that we have projected to be eligible for Medicare DSH payments during the fiscal year.

These policies for MDHs would only apply in FY 2018 if the MDH program is extended by statute, beyond its current expiration date of September 30, 2017.

- *IPPS hospitals that have elected to participate in the Bundled Payments for Care Improvement initiative and IPPS hospitals that are participating in the mandatory Comprehensive Care for Joint Replacement Model, the Episodic Payment Models, or the Cardiac Rehabilitation Incentive Payment Model* continue to be paid under the IPPS (77 FR 53342) and, therefore, are eligible to receive empirically justified Medicare DSH payments and uncompensated care payments (78 FR 50625 and 79 FR 50008).

- *Hospitals Participating in the Rural Community Hospital Demonstration Program* are not eligible to receive empirically justified Medicare DSH payments and uncompensated care payments under section 1886(r) of the Act because they are not paid under the IPPS (78 FR 50625 and 79 FR 50008). The Rural Community Hospital Demonstration Program was originally authorized for a 5-year period by section 410A of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173), and extended for another 5-year period by sections 3123 and 10313 of the Affordable Care Act (Pub. L. 114–255). The period of performance for this 5-year extension period ended December 31, 2016. Section 15003 of the 21st Century Cures Act (Pub. L. 114–255), enacted December 13, 2016, again amended section 410A of Public Law 108–173 to require a 10-year extension period (in place of the 5-year extension required by the Affordable Care Act), to begin on the date immediately following the last day of the initial 5-year period. Section 15003 also requires that, no later than 120 days after enactment of Public Law 114–255, the Secretary issue a solicitation to select additional hospitals to participate in the demonstration program for the second 5 years of the 10-year extension period so long as the maximum number of 30 hospitals stipulated by the Affordable Care Act is not exceeded. (We refer readers to section V.L. of the preamble of this proposed rule for a full discussion of the provisions of section 15003 of Public Law 114–255 and our proposals for implementation.) As of the time of development of this proposed

rule, the entire set of hospitals that will participate in the second 5 years of the extension period is unknown. However, we intend to apply a similar payment methodology during the remainder of the extension period. As a result, we expect that hospitals participating in the demonstration will not receive empirically justified DSH payments, and that they will be excluded from receiving interim and final uncompensated care payments for FY 2018 and subsequent fiscal years for the duration of the second 5 years of the extension period.

3. Empirically Justified Medicare DSH Payments

As we have discussed earlier, section 1886(r)(1) of the Act requires the Secretary to pay 25 percent of the amount of the Medicare DSH payment that would otherwise be made under section 1886(d)(5)(F) of the Act to a subsection (d) hospital. Because section 1886(r)(1) of the Act merely requires the program to pay a designated percentage of these payments, without revising the criteria governing eligibility for DSH payments or the underlying payment methodology, we stated in the FY 2014 IPPS/LTCH PPS final rule that we did not believe that it was necessary to develop any new operational mechanisms for making such payments. Therefore, in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50626), we implemented this provision by advising MACs to simply adjust the interim claim payments to the requisite 25 percent of what would have otherwise been paid. We also made corresponding changes to the hospital cost report so that these empirically justified Medicare DSH payments can be settled at the appropriate level at the time of cost report settlement. We provided more detailed operational instructions and cost report instructions following issuance of the FY 2014 IPPS/LTCH PPS final rule that are available on the CMS Web site at: <http://www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/2014-Transmittals-Items/R5P240.html>.

4. Uncompensated Care Payments

As we discussed earlier, section 1886(r)(2) of the Act provides that, for each eligible hospital in FY 2014 and subsequent years, the uncompensated care payment is the product of three factors. These three factors represent our estimate of 75 percent of the amount of Medicare DSH payments that would otherwise have been paid, an adjustment to this amount for the percent change in the national rate of uninsurance compared to the rate of

uninsurance in 2013, and each eligible hospital's estimated uncompensated care amount relative to the estimated uncompensated care amount for all eligible hospitals. Below we discuss the data sources and methodologies for computing each of these factors, our final policies for FYs 2014 through 2017, and our proposed policies for FY 2018.

a. Proposed Calculation of Factor 1 for FY 2018

Section 1886(r)(2)(A) of the Act establishes Factor 1 in the calculation of the uncompensated care payment. Section 1886(r)(2)(A) of the Act states that this factor is equal to the difference between (1) the aggregate amount of payments that would be made to subsection (d) hospitals under section 1886(d)(5)(F) of the Act if section 1886(r) of the Act did not apply for such fiscal year (as estimated by the Secretary); and (2) the aggregate amount of payments that are made to subsection (d) hospitals under section 1886(r)(1) of the Act for such fiscal year (as so estimated). Therefore, section 1886(r)(2)(A)(i) of the Act represents the estimated Medicare DSH payments that would have been made under section 1886(d)(5)(F) of the Act if section 1886(r) of the Act did not apply for such fiscal year. Under a prospective payment system, we would not know the precise aggregate Medicare DSH payment amount that would be paid for a Federal fiscal year until cost report settlement for all IPPS hospitals is completed, which occurs several years after the end of the Federal fiscal year. Therefore, section 1886(r)(2)(A)(i) of the Act provides authority to estimate this amount, by specifying that, for each fiscal year to which the provision applies, such amount is to be estimated by the Secretary. Similarly, section 1886(r)(2)(A)(ii) of the Act represents the estimated empirically justified Medicare DSH payments to be made in a fiscal year, as prescribed under section 1886(r)(1) of the Act. Again, section 1886(r)(2)(A)(ii) of the Act provides authority to estimate this amount.

Therefore, Factor 1 is the difference between our estimates of: (1) The amount that would have been paid in Medicare DSH payments for the fiscal year, in the absence of the new payment provision; and (2) the amount of empirically justified Medicare DSH payments that are made for the fiscal year, which takes into account the requirement to pay 25 percent of what would have otherwise been paid under section 1886(d)(5)(F) of the Act. In other words, this factor represents our estimate of 75 percent (100 percent

minus 25 percent) of our estimate of Medicare DSH payments that would otherwise be made, in the absence of section 1886(r) of the Act, for the fiscal year.

As we did for FY 2017, in this FY 2018 IPPS/LTCH PPS proposed rule, in order to determine Factor 1 in the uncompensated care payment formula for FY 2018, we are proposing to continue the policy established in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50628 through 50630) and in the FY 2014 IPPS interim final rule with comment period (78 FR 61194) of determining Factor 1 by developing estimates of both the aggregate amount of Medicare DSH payments that would be made in the absence of section 1886(r)(1) of the Act and the aggregate amount of empirically justified Medicare DSH payments to hospitals under 1886(r)(1) of the Act. These estimates will not be revised or updated after we know the final Medicare DSH payments for FY 2018.

Therefore, in order to determine the two elements of proposed Factor 1 for FY 2018 (Medicare DSH payments *prior* to the application of section 1886(r)(1) of the Act, and empirically justified Medicare DSH payments *after* application of section 1886(r)(1) of the Act), for this proposed rule, we used the most recently available projections of Medicare DSH payments for the fiscal year, as calculated by CMS' Office of the Actuary using the most recently filed Medicare hospital cost report with Medicare DSH payment information and the most recent Medicare DSH patient percentages and Medicare DSH payment adjustments provided in the IPPS Impact File.

For purposes of calculating proposed Factor 1 and modeling the impact of this FY 2018 IPPS/LTCH PPS proposed rule, we used the Office of the Actuary's January 2017 Medicare DSH estimates, which are based on data from the December 2016 update of the Medicare Hospital Cost Report Information System (HCRIS) and the FY 2017 IPPS/LTCH PPS final rule IPPS Impact file, published in conjunction with the publication of the FY 2017 IPPS/LTCH PPS final rule. Because SCHs that are projected to be paid under their hospital-specific rate are excluded from the application of section 1886(r) of the Act, these hospitals also were excluded from the January 2017 Medicare DSH estimates. Furthermore, because section 1886(r) of the Act specifies that the uncompensated care payment is in addition to the empirically justified Medicare DSH payment (25 percent of DSH payments that would be made without regard to section 1886(r) of the

Act), Maryland hospitals participating in the Maryland All-Payer Model that do not receive DSH payments were also excluded from the Office of the Actuary's January 2017 Medicare DSH estimates. Hospitals that had been participating in the Rural Community Hospital Demonstration Program through December 31, 2016 were included in these estimates. (As discussed earlier, the Affordable Care Act authorized a 5-year extension period for the demonstration, which ended December 31, 2016.) The demonstration was extended for an additional 5 years by section 15003 of Public Law 114–255. Although the hospitals that will participate in the second 5 years of the extension period had not been determined at the time of development of this proposed rule, we intend to apply a similar payment methodology during the second 5 years of the extension period as for the earlier periods of the demonstration. Therefore, hospitals participating in the demonstration would not be eligible to receive DSH payments. If the hospitals participating in the second 5 years of the extension period are known prior to the development of the Medicare DSH estimates for the FY 2018 final rule, these hospitals would be excluded from the Office of the Actuary's final Medicare DSH estimates for FY 2018.

For this proposed rule, using the data sources discussed above, the Office of the Actuary used the most recently submitted Medicare cost report data to identify Medicare DSH payments and the most recent Medicare DSH payment adjustments and applied inflation updates and assumptions for future changes in utilization and case-mix to estimate Medicare DSH payments for the upcoming fiscal year. The January 2017 Office of the Actuary estimate for Medicare DSH payments for FY 2018, without regard to the application of section 1886(r)(1) of the Act, is approximately \$16.003 billion. This estimate excludes Maryland hospitals participating in the Maryland All-Payer Model and SCHs paid under their hospital-specific payment rate. Therefore, based on the January 2017 estimate, the estimate for empirically justified Medicare DSH payments for FY 2018, with the application of section 1886(r)(1) of the Act, is approximately \$4.001 billion (or 25 percent of the total amount of estimated Medicare DSH payments for FY 2018). Under § 412.106(g)(1)(i) of the regulations, Factor 1 is the difference between these two estimates of the Office of the Actuary. Therefore, in this proposed rule, we are proposing that Factor 1 for

FY 2018 is \$12,001,915,095.04, which is equal to 75 percent of the total amount of estimated Medicare DSH payments for FY 2018 (\$16,002,553,460.05 minus \$4,000,638,365.01).

The Office of the Actuary's estimates for FY 2018 for this proposed rule began with a baseline of \$12.405 billion in Medicare DSH expenditures for FY 2014. The following table shows the

factors applied to update this baseline through the current estimate for FY 2018:

FACTORS APPLIED FOR FY 2015 THROUGH FY 2018 TO ESTIMATE MEDICARE DSH EXPENDITURES USING 2014 BASELINE

FY	Update	Discharge	Case-mix	Other	Total	Estimated DSH payment (in billions) *
2015	1.014	1.0068	1.005	1.0493	1.076581	\$13.355
2016	1.009	0.9757	1.027	1.0689	1.080724	14.433
2017	1.0015	1.0058	1.005	1.0535	1.066506	15.393
2018	1.022088	1.0188	1.005	0.9934	1.039603	16.003

* Rounded.

In this table, the discharge column shows the increase in the number of Medicare fee-for-service (FFS) inpatient hospital discharges. The figures for FY 2015 are based on Medicare claims data that have been adjusted by a completion factor. The discharge figure for FY 2016 is based on preliminary data for 2016. The discharge figures for FYs 2017 and 2018 are assumptions based on recent trends recovering back to the long-term trend and assumptions related to how many beneficiaries will be enrolled in Medicare Advantage (MA) plans. The case-mix column shows the increase in case-mix for IPPS hospitals. The case-mix figures for FY 2015 are based on actual data adjusted by a completion factor. The FY 2016 increase is based on preliminary data adjusted by a completion factor. The FYs 2017 and 2018 increases are based on the recommendation of the 2010–2011 Medicare Technical Review Panel. The “Other” column shows the increase in

other factors that contribute to the Medicare DSH estimates. These factors include the difference between the total inpatient hospital discharges and the IPPS discharges, and various adjustments to the payment rates that have been included over the years but are not reflected in the other columns (such as the change in rates for the 2-midnight stay policy). In addition, the “Other” column includes a factor for the Medicaid expansion due to the Affordable Care Act. In the past, commentators have contended that the “Other” column understates the effect of the Medicaid expansion. The factor for Medicaid expansion was developed using public information and statements for each State regarding its intent to implement the expansion. Based on this information, it is assumed that 50 percent of all individual who were potentially newly eligible Medicaid enrollees in 2016 resided in States that had elected to expand Medicaid

eligibility and, for 2017 and thereafter, that 55 percent of such individuals would reside in expansion States. In the future, these assumptions may change based on actual participation by States. For a discussion of general issues regarding Medicaid projections, we refer readers to the 2016 Actuarial Report on the Financial Outlook for Medicaid (<https://www.cms.gov/Research-Statistics-Data-and-Systems/Research/ActuarialStudies/Downloads/MedicaidReport2016.pdf>). We note that, in developing their estimates of the effect of Medicaid expansion on Medicare DSH expenditures, our actuaries have assumed that the new Medicaid enrollees are healthier than the average Medicaid recipient and, therefore, use fewer hospital services.

The table below shows the factors that are included in the “Update” column of the above table:

FY	Market basket percentage	Affordable Care Act payment reductions	Multifactor productivity adjustment	Documentation and coding	Total update percentage
2015	2.9	–0.2	–0.5	–0.8	1.4
2016	2.4	–0.2	–0.5	–0.8	0.9
2017	2.7	–0.75	–0.3	–1.5	0.15
2018	2.9	–0.75	–0.4	0.4588	2.2088

Note: All numbers are based on FY 2018 President's Budget projections.

We are inviting public comments on our proposed calculation of Factor 1 for FY 2018.

b. Proposed Calculation of Factor 2 for FY 2018

(1) Background

Section 1886(r)(2)(B) of the Act establishes Factor 2 in the calculation of the uncompensated care payment. Specifically, section 1886(r)(2)(B)(i) of the Act provides that, for each of FYs

2014, 2015, 2016, and 2017, a factor equal to 1 minus the percent change in the percent of individuals under the age of 65 who are uninsured, as determined by comparing the percent of such individuals (1) who were uninsured in 2013, the last year before coverage expansion under the Affordable Care Act (as calculated by the Secretary based on the most recent estimates available from the Director of the Congressional Budget Office before a

vote in either House on the Health Care and Education Reconciliation Act of 2010 that, if determined in the affirmative, would clear such Act for enrollment); and (2) who are uninsured in the most recent period for which data are available (as so calculated), minus 0.1 percentage point for FY 2014 and minus 0.2 percentage point for each of FYs 2015, 2016, and 2017.

Section 1886(r)(2)(B)(i)(I) of the Act further indicates that the percent of

individuals under 65 without insurance in 2013 must be the percent of such individuals who were uninsured in 2013, the last year before coverage expansion under the Affordable Care Act (as calculated by the Secretary based on the most recent estimates available from the Director of the Congressional Budget Office before a vote in either House on the Health Care and Education Reconciliation Act of 2010 that, if determined in the affirmative, would clear such Act for enrollment). The Health Care and Education Reconciliation Act (Pub. L. 111–152) was enacted on March 30, 2010. It was passed in the House of Representatives on March 21, 2010, and by the Senate on March 25, 2010. Because the House of Representatives was the first House to vote on the Health Care and Education Reconciliation Act of 2010 on March 21, 2010, we have determined that the most recent estimate available from the Director of the Congressional Budget Office “before a vote in either House on the Health Care and Education Reconciliation Act of 2010 . . .” (emphasis added) appeared in a March 20, 2010 letter from the director of the CBO to the Speaker of the House. Therefore, we believe that only the estimates in this March 20, 2010 letter meet the statutory requirement under section 1886(r)(2)(B)(i)(I) of the Act. (To view the March 20, 2010 letter, we refer readers to the Web site at: <https://www.cbo.gov/sites/default/files/111th-congress-2009-2010/costestimate/amendreconprop.pdf>.)

In its March 20, 2010 letter to the Speaker of the House of Representatives, the CBO provided two estimates of the “post-policy uninsured population.” The first estimate is of the “Insured Share of the Nonelderly Population Including All Residents” (82 percent) and the second estimate is of the “Insured Share of the Nonelderly Population Excluding Unauthorized Immigrants” (83 percent). In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50631), we used the first estimate that includes all residents, including unauthorized immigrants. We stated that we believe this estimate is most consistent with the statute, which requires us to measure “the percent of individuals under the age of 65 who are uninsured” and provides no exclusions except for individuals over the age of 65. In addition, we stated that we believe that this estimate more fully reflects the levels of uninsurance in the United States that influence uncompensated care for hospitals than the estimate that reflects only legal

residents. The March 20, 2010 CBO letter reports these figures as the estimated percentage of individuals with insurance. However, because section 1886(r)(2)(B)(i) of the Act requires that we compare the percent of individuals who are uninsured in the most recent period for which data are available with the percent of individuals who were uninsured in 2013, in the FY 2014 IPPS/LTCH PPS final rule, we used the CBO insurance rate figure and subtracted that amount from 100 percent (that is, the total population without regard to insurance status) to estimate the 2013 baseline percent of individuals without insurance. Therefore, for FYs 2014 through 2017, our estimate of the uninsurance percentage for 2013 was 18 percent.

Section 1886(r)(2)(B)(i) of the Act requires that we compare the baseline uninsurance rate to the percent of such individuals who are uninsured in the most recent period for which data are available (as so calculated). In the FY 2014, FY 2015, FY 2016, and FY 2017 IPPS/LTCH PPS final rules (78 FR 50634, 79 FR 50014, 80 FR 49522, and 81 FR 56952, respectively), we used the same data source, CBO estimates, to calculate this percent of individuals without insurance. In response to public comments, we also agreed that we should normalize the CBO estimates, which are based on the calendar year, for the Federal fiscal years for which each calculation of Factor 2 is made (78 FR 50633). Therefore, for the FY 2017 IPPS/LTCH PPS final rule (81 FR 56952), we used the most recently available estimate of the uninsurance rate, which was based on the CBO’s March 2016 estimates of the effects of the Affordable Care Act on health insurance coverage (which are available at <https://www.cbo.gov/sites/default/files/114th-congress-2015-2016/reports/51385-HealthInsuranceBaseline.pdf>). The CBO’s March 2016 estimate of individuals under the age of 65 with insurance in CY 2016 was 90 percent. Therefore, the CBO’s most recent estimate of the rate of uninsurance in CY 2016 was 10 percent (that is, 100 percent minus 90 percent). The CBO’s March 2016 estimate of individuals under the age of 65 with insurance in CY 2017 was also 90 percent. Therefore, the CBO’s most recent estimate of the rate of uninsurance in CY 2017 available for the FY 2017 final rule was also 10 percent (that is, 100 percent minus 90 percent).

The calculation of the final Factor 2 for FY 2017, employing a weighted average of the CBO projections for CY 2016 and CY 2017, was as follows:

- CY 2016 rate of insurance coverage (March 2016 CBO estimate): 90 percent.
- CY 2017 rate of insurance coverage (March 2016 CBO estimate): 90 percent.
- FY 2016 rate of insurance coverage: (90 percent * .25) + (90 percent * .75) = 90 percent.

- Percent of individuals without insurance for 2013 (March 2010 CBO estimate): 18 percent.

- Percent of individuals without insurance for FY 2017 (weighted average): 10 percent.

$$1 - \sqrt[10]{((0.10 - 0.18) / 0.18)} = 1 - 0.4444 = 0.5555 \text{ (55.56 percent)}$$

$$0.5555 \text{ (55.56 percent)} - .002 \text{ (0.2 percentage points for FY 2017 under section 1886(r)(2)(B)(i) of the Act)} = 0.5536 \text{ or 55.36 percent}$$

$$0.5536 = \text{Factor 2}$$

Therefore, the final Factor 2 for FY 2017 was 55.36 percent.

The FY 2017 final uncompensated care amount was: \$10,797,476,782.62 × 0.5536 = \$5,977,483,146.86.

FY 2017 uncompensated care total available	\$5,977,483,146.86

(2) Proposed Methodology for Calculation of Factor 2 for FY 2018

Section 1886(r)(2)(B)(ii) of the Act permits the use of a data source other than the CBO estimates to determine the percent change in the rate of uninsurance beginning in FY 2018. In addition, for FY 2018 and subsequent years, the statute does not require that the estimate of the percent of individuals who are uninsured be limited to individuals who are under 65. Specifically, the statute states that, for FY 2018 and subsequent fiscal years, the second factor is 1 minus the percent change in the percent of individuals who are uninsured, as determined by comparing the percent of individuals who were uninsured in 2013 (as estimated by the Secretary, based on data from the Census Bureau or other sources the Secretary determines appropriate, and certified by the Chief Actuary of CMS) and the percent of individuals who were uninsured in the most recent period for which data are available (as so estimated and certified), minus 0.2 percentage point for FYs 2018 and 2019. In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56952), we indicated that we planned to address changes to the methodology for determining Factor 2 and the viability of potential alternative data sources in the FY 2018 IPPS/LTCH PPS proposed rule.

In our analysis of a potential data source for the rate of uninsurance for purposes of computing Factor 2 in FY 2018, we considered the following: (a)

The extent to which the source accounted for the full U.S. population; (b) the extent to which the source comprehensively accounted for both public and private health insurance coverage in deriving its estimates of the number of uninsured; (c) the extent to which the source utilized data from the Census Bureau; (d) the timeliness of the estimates; (e) the continuity of the estimates over time; (f) the accuracy of the estimates; and (g) the availability of projections (including the availability of estimation methodology that would allow for calculation of the rate of uninsurance for the applicable Federal fiscal year). These considerations are consistent with the statutory requirement that this estimate be based on data from the Census Bureau or other sources the Secretary determines appropriate and help to ensure the data source will provide reasonable estimates for the rate of uninsurance that are available in conjunction with the IPPS rulemaking cycle.

We have determined that the source that, on balance, best meets all of these considerations is the uninsured estimates produced by CMS' Office of the Actuary (OACT) as part of the development of the National Health Expenditure Accounts (NHEA). The NHEA represents the government's official estimates of economic activity (spending) within the health sector. The information contained in the NHEA has been used to study numerous topics related to the health care sector, including, but not limited to, changes in the amount and cost of health services purchased and the payers or programs that provide or purchase these services; the economic causal factors at work in the health sector; the impact of policy changes, including major health reform; and comparisons to other countries' health spending. Of relevance to the determination of Factor 2 is that the comprehensive and integrated structure of the NHEA creates an ideal tool for evaluating changes to the health care system, such as the mix of the insured and uninsured because this mix is integral to the well-established NHEA methodology. Below we describe some aspects of the methodology used to develop the NHEA that we believe are particularly relevant in estimating the percent change in the rate of uninsurance for FY 2018. A full description of the methodology used to develop the NHEA is available on the CMS Web site at: <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/>

NationalHealthExpendData/Downloads/DSM-15.pdf.

The NHEA estimates of U.S. population reflect the Census Bureau's definition of the resident-based population, which includes all people who usually reside in the 50 States or the District of Columbia, but excludes residents living in Puerto Rico and areas under U.S. sovereignty, members of the U.S. Armed Forces overseas, and U.S. citizens whose usual place of residence is outside of the United States, plus a small (typically less than 0.2 percent of population) adjustment to reflect Census undercounts. In past years, the estimates for Factor 2 were made using the CBO's uninsured population estimates for the under 65 population. For FY 2018 and subsequent years, the statute does not restrict the estimate to the measurement of the percent of individuals under the age of 65 who are uninsured. Accordingly, we believe it is appropriate to use an estimate that reflects the rate of uninsurance in the United States across all age groups. In addition, we continue to believe that a resident-based population estimate more fully reflects the levels of uninsurance in the United States that influence uncompensated care for hospitals than an estimate that reflects only legal residents. The NHEA estimates of uninsurance are for the total U.S. population (all ages) and not by specific age cohort, such as the population under the age of 65.

The NHEA includes comprehensive enrollment estimates for total private health insurance (PHI) (including direct and employer-sponsored plans), Medicare, Medicaid, the Children's Health Insurance Program (CHIP), and other public programs, and estimates of the number of individuals who are uninsured. Estimates of total PHI enrollment are available for 1960 through 2015, estimates of Medicaid, Medicare, and CHIP enrollment are available for the length of the respective programs, and all other estimates (including the more detailed estimates of direct-purchased and employer-sponsored insurance) are available for 1987 through 2015. The NHEA data are publicly available on the CMS Web site at: <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/NationalHealthExpendData/index.html>.

In order to compute Factor 2, the first metric that is needed is the proportion of the total U.S. population that was uninsured in 2013. In developing the estimates for the NHEA, OACT's methodology included using the number of uninsured individuals for 1987 through 2009 based on the

enhanced Current Population Survey (CPS) from the State Health Access Data Assistance Center (SHADAC). The CPS, sponsored jointly by the U.S. Census Bureau and the U.S. Bureau of Labor Statistics (BLS), is the primary source of labor force statistics for the population of the United States. (We refer readers to the Web site at: <http://www.census.gov/programs-surveys/cps.html>.) The enhanced CPS, available from SHADAC (available at <http://datacenter.shadac.org>) accounts for changes in the CPS methodology over time. OACT further adjusts the enhanced CPS for an estimated undercount of Medicaid enrollees (a population that is often not fully captured in surveys that include Medicaid enrollees due to a perceived stigma associated with being enrolled in the Medicaid program or confusion about the source of their health insurance).

To estimate the number of uninsured individuals for 2010 through 2014, OACT extrapolates from the 2009 CPS data using data from the National Health Interview Survey (NHIS). The NHIS is one of the major data collection programs of the National Center for Health Statistics (NCHS), which is part of the Centers for Disease Control and Prevention (CDC). The U.S. Census Bureau is the data collection agent for the NHIS. The NHIS results have been instrumental over the years in providing data to track health status, health care access, and progress toward achieving national health objectives. For further information regarding the NHIS, we refer readers to the CDC Web site at: <https://www.cdc.gov/nchs/nhis/index.htm>. For 2015, the estimate of the rate of uninsurance in the NHEA matches with the estimate from the NHIS.

The next metrics needed to compute Factor 2 are projections of the rate of uninsurance in both calendar years 2017 and 2018. On an annual basis, the OACT projects enrollment and spending trends for the coming 10-year period. Those projections (currently for years 2016 through 2025) use the latest NHEA historical data, which presently run through 2015. The NHEA projection methodology accounts for expected changes in enrollment across all of the categories of insurance coverage previously listed. The sources for projected growth rates in enrollment for Medicare, Medicaid, and CHIP include the latest Medicare Trustees Report, the Medicaid Actuarial Report, or other updated estimates as produced by the OACT. Projected rates of growth in enrollment for private health insurance and the uninsured are based largely on

OACT's econometric models, which rely on the set of macroeconomic assumptions underlying the latest Medicare Trustees Report. Greater detail can be found in OACT's report titled "Projections of National Health Expenditure: Methodology and Model Specification," which is available on the CMS Web site at: <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/NationalHealthExpendData/Downloads/ProjectionsMethodology.pdf>.

The use of data from the NHEA to estimate the rate of uninsurance is consistent with the statute and meets the criteria we have identified for determining the appropriate data source. Section 1886(r)(2)(B)(ii) of the Act instructs the Secretary to estimate the rate of uninsurance for purposes of Factor 2 based on data from the Census Bureau or other sources the Secretary determines appropriate. The NHEA utilizes data from the Census Bureau; the estimates are available in time for the IPPS rulemaking cycle; the estimates are produced by OACT on an annual basis and are expected to continue to be produced for the foreseeable future; and projections are available for calendar year time periods that span the upcoming fiscal year. Timeliness and continuity are important considerations because of our need to be able to update this estimate annually. Accuracy is also a very important consideration and, all things being equal, we would choose the most accurate data source that sufficiently meets our other criteria.

Using these data sources and the methodologies described above, OACT estimates that the uninsured rate for the historical, baseline year of 2013 was 14 percent and for CYs 2017 and 2018 is 8.3 percent and 8.1 percent respectively. As required by section 1886(r)(2)(B)(ii) of the Act, the Chief Actuary of CMS has certified these estimates.

As with the CBO estimates on which we based Factor 2 in prior fiscal years, the NHEA estimates are for a calendar year. In the rulemaking for FY 2014, many commenters noted that the uncompensated care payments are made on fiscal year and not a calendar year basis and requested that CMS normalize the CBO estimate to reflect a fiscal year basis. Specifically, commenters requested that CMS calculate a weighted average of the CBO estimate for October through December 2013 and the CBO estimate for January through September 2014 when determining Factor 2 for FY 2014. We agreed with the commenters that normalizing the estimate to cover FY 2014 rather than CY 2014 would more accurately reflect the rate of uninsurance that hospitals would

experience during the FY 2014 payment year. Accordingly, we estimated the rate of uninsurance for FY 2014 by calculating a weighted average of the CBO estimates for CY 2013 and CY 2014 (78 FR 50633). We have continued this weighted average approach in each fiscal year since FY 2014.

We continue to believe that, in order to estimate the rate of uninsurance during a fiscal year more accurately, Factor 2 should reflect the estimated rate of uninsurance that hospitals will experience during the fiscal year, rather than the rate of uninsurance during only one of the calendar years that the fiscal year spans. However, we have concerns about the future potential for the uninsured rate to vary nonuniformly in the 2 calendar years that the fiscal year spans (for example, due to changes in the economy or changes in legislation). Nevertheless, for FY 2018, because OACT's current estimates of the percent of individuals without insurance in CY 2017 and CY 2018 are relatively close, we do not believe this is a significant policy issue and are proposing to continue with the weighted average approach used in past fiscal years in order to estimate the rate of uninsurance for FY 2018.

The calculation of the proposed Factor 2 for FY 2018 using a weighted average of OACT's projections for CY 2017 and CY 2018 is as follows:

- Percent of individuals without insurance for CY 2013: 14 percent.
- Percent of individuals without insurance for CY 2017: 8.3 percent.
- Percent of individuals without insurance for CY 2018: 8.1 percent.
- Percent of individuals without insurance for FY 2018 (0.25 times 0.083) + (0.75 times 0.081): 8.15 percent

$$1 - [(0.0815 - 0.14) / 0.14] = 1 - 0.4179 = 0.5821 \text{ (58.21 percent)}$$

$$0.5821 \text{ (58.21 percent)} - .002 \text{ (0.2 percentage points for FY 2018 under section 1886(r)(2)(B)(ii) of the Act)} = 0.5801 \text{ or } 58.01 \text{ percent}$$

0.5801 = Factor 2

Therefore, the proposed Factor 2 for FY 2018 is 58.01 percent.

The proposed FY 2018 uncompensated care amount is:
 $\$12,001,915,095.04 \times 0.5801 =$
 $\$6,962,310,946.63$.

Proposed FY 2018 uncompensated care total available	\$6,962,310,946.63

We are inviting public comments on our proposed methodology for calculation of Factor 2 for FY 2018.

c. Calculation of Proposed Factor 3 for FY 2018

(1) Background

Section 1886(r)(2)(C) of the Act defines Factor 3 in the calculation of the uncompensated care payment. As we have discussed earlier, section 1886(r)(2)(C) of the Act states that Factor 3 is equal to the percent, for each subsection (d) hospital, that represents the quotient of (1) the amount of uncompensated care for such hospital for a period selected by the Secretary (as estimated by the Secretary, based on appropriate data (including, in the case where the Secretary determines alternative data are available that are a better proxy for the costs of subsection (d) hospitals for treating the uninsured, the use of such alternative data)); and (2) the aggregate amount of uncompensated care for all subsection (d) hospitals that receive a payment under section 1886(r) of the Act for such period (as so estimated, based on such data).

Therefore, Factor 3 is a hospital-specific value that expresses the proportion of the estimated uncompensated care amount for each subsection (d) hospital and each subsection (d) Puerto Rico hospital with the potential to receive Medicare DSH payments relative to the estimated uncompensated care amount for all hospitals estimated to receive Medicare DSH payments in the fiscal year for which the uncompensated care payment is to be made. Factor 3 is applied to the product of Factor 1 and Factor 2 to determine the amount of the uncompensated care payment that each eligible hospital will receive for FY 2014 and subsequent fiscal years. In order to implement the statutory requirements for this factor of the uncompensated care payment formula, it was necessary to determine: (1) The definition of uncompensated care or, in other words, the specific items that are to be included in the numerator (that is, the estimated uncompensated care amount for an individual hospital) and the denominator (that is, the estimated uncompensated care amount for all hospitals estimated to receive Medicare DSH payments in the applicable fiscal year); (2) the data source(s) for the estimated uncompensated care amount; and (3) the timing and manner of computing the quotient for each hospital estimated to receive Medicare DSH payments. The statute instructs the Secretary to estimate the amounts of uncompensated care for a period based on appropriate data. In addition, we note that the statute permits the Secretary to use alternative data in the

case where the Secretary determines that such alternative data are available that are a better proxy for the costs of subsection (d) hospitals for treating individuals who are uninsured.

In the course of considering how to determine Factor 3 during the rulemaking process for FY 2014, we considered defining the amount of uncompensated care for a hospital as the uncompensated care costs of each hospital and determined that Worksheet S-10 of the Medicare cost report potentially provides the most complete data regarding uncompensated care costs for Medicare hospitals. However, because of concerns regarding variations in the data reported on Worksheet S-10 and the completeness of these data, we did not propose to use data from Worksheet S-10 to determine Factor 3 for FY 2014, the first year this provision was in effect, or for FY 2015, 2016, or 2017. When we first discussed using Worksheet S-10 to allocate hospitals' shares of uncompensated care costs in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50638), we explained why we believed that it was premature to use uncompensated care costs reported on Worksheet S-10 for FY 2014. Specifically, at that time, the most recent available cost reports would have been from FYs 2010 and 2011, which were submitted on or after May 1, 2010, when the new Worksheet S-10 went into effect. We believed that concerns about the standardization and completeness of the Worksheet S-10 data could be more acute for data collected in the first year of the Worksheet's use (78 FR 50635). In addition, we believed that it would be most appropriate to use data elements that have been historically publicly available, subject to audit, and used for payment purposes (or that the public understands will be used for payment purposes) to determine the amount of uncompensated care for purposes of Factor 3 (78 FR 50635). At the time we issued the FY 2014 IPPS/LTCH PPS final rule, we did not believe that the available data regarding uncompensated care from Worksheet S-10 met these criteria and, therefore, we believed they were not reliable enough to use for determining FY 2014 uncompensated care payments. Accordingly, for FY 2014, we concluded that utilization of insured low-income patients would be a better proxy for the costs of hospitals in treating the uninsured. For FYs 2015, 2016, and 2017, the cost reports used for calculating uncompensated care payments (that is, FYs 2011, 2012, and 2013) were also submitted prior to the time that hospitals were on notice that

Worksheet S-10 could be the data source for calculating uncompensated care payments. Therefore, we believed it was also appropriate to use proxy data to calculate Factor 3 for these years.

We stated in the preamble of the FY 2017 IPPS/LTCH PPS proposed rule that we believed that, for FY 2018, many of the above concerns would no longer be relevant. That is, hospitals were on notice as of FY 2014 that Worksheet S-10 could eventually become the data source for CMS to calculate uncompensated care payments. Furthermore, hospitals' cost reports from FY 2014 had been publicly available for some time, and CMS had analyses of Worksheet S-10 conducted both internally and by stakeholders demonstrating that Worksheet S-10 accuracy had improved over time. Specifically, as discussed in the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25090), MedPAC has provided analyses that found that current Worksheet S-10 data are a better proxy for predicting audited uncompensated care costs than Medicaid/Medicare SSI days, and that the data on Worksheet S-10 would improve over time as the data are actually used to make payments. CMS has also undertaken an extensive analysis of the Worksheet S-10 data, benchmarking it against the data on uncompensated care costs reported to the Internal Revenue Service (IRS) on Form 990 by not-for-profit hospitals. (This analysis, performed by Dobson DaVanzo & Associates, LLC, under contract to CMS, was included in a report entitled "Improvements to Medicare Disproportionate Share Hospital (DSH) Payments Report: Benchmarking S-10 Data Using IRS Form 990 Data and Worksheet S-10 Trend Analyses," which is available on the CMS Web site at: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/dsh.html> under the Downloads section.) The analysis determined a strong and converging correlation between the amounts for Factor 3 derived using the IRS Form 990 and Worksheet S-10 data suggesting that Worksheet S-10 uncompensated care data are becoming more stable over time. Given these results and in light of the fact that hospitals have been on notice since the FY 2014 rulemaking that CMS intended eventually to use Worksheet S-10 as the data source for calculating uncompensated care payments, we believed it would be appropriate to propose to begin incorporating Worksheet S-10 data for purposes of calculating Factor 3 starting in FY 2018. In section IV.F.4.d. of the

preamble of the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25090 through 25094), we proposed a methodology and timeline for incorporating Worksheet S-10 data in the calculation of Factor 3 beginning in FY 2018 and invited public comments on that proposal.

While some commenters, including MedPAC, were supportive of the proposal, many other commenters expressed concerns about a perceived lack of clarity in the Worksheet S-10 instructions and their belief in the necessity of a strict audit mechanism to capture aberrant uncompensated care costs reported on Worksheet S-10. Many commenters also cited the report from Dobson DaVanzo, which concluded that hospitals are doing a better job of reporting their uncompensated care data on Worksheet S-10 than they did a few years ago. However, these commenters disagreed with CMS about the significance of this observation. One commenter stated that even if it is true in the aggregate that hospitals are reporting data more accurately on Worksheet S-10, the zero-sum nature of the calculation of uncompensated care payments is such that the remaining inaccuracy and lack of uniformity in the data reported can have a very large impact on hospitals. The commenter asserted that if hospitals, for whatever reason, over-report their uncompensated care, they benefit financially from doing so, while those that do not aggressively report suffer financial harm. The commenter concluded that, for this reason, the possibility that some hospitals are generally "doing better" with reporting data is not good enough. All hospitals must do better, and until they do, the commenter believed that data from Worksheet S-10 are not accurate enough for public policymaking purposes. Other commenters asserted that the Dobson/DaVanzo study did not illustrate or even evaluate whether data from Worksheet S-10 are a reasonable proxy for the costs hospitals incur in providing care to the uninsured. These commenters pointed to their own analyses, which indicated that the most notable aberrations in Worksheet S-10 data reporting occur among public hospitals, which do not file a Form 990 and are therefore missing from the Dobson/DaVanzo analysis.

On balance, after considering all of the comments, we elected not to finalize our proposal to begin to incorporate Worksheet S-10 into the calculation of Factor 3 for FY 2018 in the FY 2017 IPPS/LTCH PPS final rule. We stated that we were postponing the decision regarding when to begin incorporating

data from Worksheet S–10 and proceeding with certain additional quality control and data improvement measures to the Worksheet S–10 instructions as commenters had requested. We indicated that we would consider further whether the current Worksheet S–10 data or a proxy should be used to calculate Factor 3 for FY 2018 and subsequent fiscal years. We also expressed our intention to explore whether there is an appropriate proxy for uncompensated care that could be used to calculate Factor 3 until we determine that data from the revised Worksheet S–10 can be used for this purpose. We stated that we would undertake notice-and-comment rulemaking to address the issue of the appropriate data to use to determine Factor 3 for FY 2018 and subsequent years.

(2) Proposed Data Sources for FY 2018

Since the publication of the FY 2017 final rule and as part of our ongoing quality control and data improvement measures for Worksheet S–10, we have updated the benchmarking analysis described in the report “Improvements to Medicare Disproportionate Share Hospital (DSH) Payments Report: Benchmarking S–10 Data Using IRS Form 990 Data and Worksheet S–10 Trend Analyses” posted with the FY 2017 IPPS/LTCH PPS proposed rule. As discussed in the FY 2017 IPPS/LTCH PPS proposed rule, the purpose of this analysis was to determine if Worksheet S–10 uncompensated care data are becoming more stable over time (81 FR 25090). In the report issued in conjunction with the FY 2017 rulemaking, we conducted an analysis of 2010, 2011, and 2012 Worksheet S–10 data and IRS Form 990 data from the same years. Using IRS Form 990 data for tax years 2010, 2011, and 2012 (the latest available years at that time) as a benchmark, we compared key variables derived from Worksheet S–10 and IRS Form 990 data, such as charity care and bad debt. The analysis was completed using data from hospitals that had completed both Worksheet S–10 and IRS Form 990 across all study years, yielding a sample of 788 not-for-profit hospitals (representing 668 unique Taxpayer Identification Numbers). Because Factor 3 is used to determine the Medicare uncompensated care payment amount for each hospital, we calculated the amounts for Factor 3 for the matched hospitals using charity care and bad debt, and compared the Factor 3 distributions calculated using data from IRS Form 990 and Worksheet S–10. Key findings indicated that the amounts for Factor 3 derived using the

IRS Form 990 and Worksheet S–10 data were highly correlated. In addition, the correlation coefficient between the amounts for Factor 3 calculated from the IRS Form 990 and Worksheet S–10 had increased over time, from 0.71 in 2010 to 0.77 in 2011 and 0.80 in 2012, demonstrating an increasing convergence between the data sources.
