The second agenda item, a discussion of potential NSTAC study topics, will address areas of critical cybersecurity vulnerabilities and priorities for Government. Government officials will share data with NSTAC members on initiatives, assessments, and future security requirements across public and private sector networks. The information will include specific vulnerabilities within cyberspace that affect the United States’ information and communication technology infrastructures and proposed mitigation strategies. Disclosure of this information to the public would provide criminals with an incentive to focus on these vulnerabilities to increase attacks on the Nation’s critical infrastructure and communications networks. As disclosure of this portion of the meeting is likely to significantly frustrate implementation of proposed DHS actions, it is required to be closed pursuant to 5 U.S.C. 552b(c)(9)(B).

Dated: April 21, 2017.

Helen Jackson,
Designated Federal Officer for the NSTAC.
