**40 CFR Part 52**

[EPA-R04-OAR-2016-0614; FRL-9961-74-Region 4]

**Air Plan Approval; North Carolina Repeal of Transportation Facilities Rules**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Direct final rule.

**SUMMARY:** The U.S. Environmental Protection Agency (EPA) is taking action to approve a State Implementation Plan (SIP) revision, submitted by the North Carolina Department of Environmental Quality through the Division of Air Quality (DAQ) on September 16, 2016, for the purpose of removing the statewide transportation facilities rules. The State provided a Clean Air Act section 110(l) noninterference demonstration establishing that removal of the North Carolina transportation facilities rules will not interfere with the maintenance of the 8-hour carbon monoxide standard or any other national ambient air quality standards (NAAQS). EPA is approving this SIP revision because the DAQ has demonstrated that it is consistent with the Clean Air Act (CAA or Act).

**DATES:** This direct final rule is effective July 11, 2017 without further notice, unless EPA receives adverse comment by June 12, 2017. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA-R04-OAR-2016-0614 at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www2.epa.gov/dockets/commenting-epa-dockets>.

Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303-8960. The telephone number is (404) 562-9222. Ms. Sheckler can also be reached via electronic mail at [sheckler.kelly@epa.gov](mailto:sheckler.kelly@epa.gov).

**SUPPLEMENTARY INFORMATION:**

**I. Background**

In 1978, EPA designated Mecklenburg County, North Carolina (hereinafter the “Charlotte Area”) as nonattainment for the NAAQS for carbon monoxide (CO). Then, under the CAA amendments of 1990, the Charlotte Area was designated as “not-classifiable” and had five years to attain the CO NAAQS (*i.e.*, November 15, 1995). On November 15, 1990, Durham and Wake Counties (hereinafter the “Raleigh-Durham/Chapel Hill Area”) and Forsyth County (hereinafter the “Winston-Salem Area”) in North Carolina were designated as “moderate” nonattainment and had until December 31, 1995, to attain the standard.

In April 1994, DAQ submitted a request to EPA to redesignate the Winston-Salem Area to attainment status, and in November 1994, EPA approved the maintenance plan for CO (59 FR 48402), and redesignated the area to attainment/maintenance for CO. Next, in 1995, EPA approved the Charlotte and Raleigh-Durham/Chapel Hill Areas’ maintenance plans for CO and redesignated the area to attainment/maintenance for CO (60 FR 39262). In

2015, these areas completed the 20-year maintenance periods, and EPA redesignated them to attainment.

North Carolina adopted the transportation facility rules on November 15, 1973, pursuant to the federal requirement (40 CFR part 51.18) to control emissions from indirect (complex) sources. North Carolina identifies transportation facilities as complex sources in its rules (N.C.G.S. 143–213(22)) and includes any facilities that cause increased emissions from motor vehicles. In 1974, EPA suspended the indirect source review programs, including 40 CFR part 51.18. The 1977 CAA amendments codified this suspension in section 110(a)(5)(A)(i); this suspension allowed states to include indirect source review regulations in their State Implementation Plans (61 FR 3584; 62 FR 41277; 63 FR 72193; 64 FR 61213), but EPA could not require them as a condition of its approval of the SIP.

In 2013, the North Carolina General Assembly enacted Session Law 2013–2014 that sought to streamline the regulatory process and eliminate unnecessary regulation. The State Environmental Management Commission recommended repealing the transportation facility rules in 15A NCAC 02D .0800—Complex Sources and 02Q .0600—Transportation Facilities Procedures. The transportation facility rules are aimed at addressing CO emissions, and North Carolina does not have any CO nonattainment areas. As a result, DAQ proposes to repeal the transportation facilities rule.

## II. Analysis of State's Submittal

Section 110(l) of the CAA requires that a revision to the SIP not interfere with any applicable requirement concerning attainment and reasonable further progress (RFP) (as defined in section 171), or any other applicable requirement of the Act. EPA evaluates each section 110(l) noninterference demonstration on a case-by-case basis considering the circumstances of each SIP revision. DAQ provided a demonstration that shows that the repeal of the statewide North Carolina transportation facilities rules will not interfere with the maintenance of the CO standards or any other NAAQS or other CAA requirement. The rules, which are focused on addressing CO emissions, offer no environmental benefit to the State now that it no longer has any CO nonattainment areas. The Charlotte, Raleigh-Durham/Chapel Hill and Winston-Salem Areas have been redesignated to maintenance (60 FR 39262 and 59 FR 48402), and the

monitoring data for CO in 2016 shows that all three areas are well below the 8-hour CO standard. The complex sources (transportation facilities) rules do not set requirements for any other NAAQS, including ozone, particulate matter, sulfur dioxide, nitrogen dioxide and lead, and therefore, removing the transportation facilities rules in 15A NCAC 02D .0800—Complex Sources and 02Q .0600—Transportation Facilities Procedures would not result in violations of the NAAQS.

## III. Final Action

EPA is approving the aforementioned changes to remove 15A NCAC 02D .0800—Complex Sources and 02Q .0600—Transportation Facilities Procedures, from the SIP for North Carolina. EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision should adverse comments be filed. This rule will be effective July 11, 2017 without further notice unless the Agency receives adverse comments by June 12, 2017.

If EPA receives such comments, then EPA will publish a document withdrawing the final rule and informing the public that the rule will not take effect. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period. Parties interested in commenting should do so at this time. If no such comments are received, the public is advised that this rule will be effective on July 11, 2017 and no further action will be taken on the proposed rule.

## IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under

Executive Order 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it

is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 11, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today’s **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

#### List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: March 31, 2017.

V. Anne Heard,

Acting Regional Administrator, Region 4.

#### Chemical Substances When Manufactured or Processed as Nanoscale Materials; TSCA Reporting and Recordkeeping Requirements

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; delay of effective date.

**SUMMARY:** EPA is hereby extending the effective date of the final rule that appeared in the **Federal Register** of January 12, 2017, and established final reporting and recordkeeping requirements for certain chemical substances when they are manufactured or processed at the nanoscale as described in that rule.

**DATES:** The effective date of the final rule that appeared in the **Federal Register** of January 12, 2017 (82 FR 3641), is delayed from May 12, 2017, to August 14, 2017.

**ADDRESSES:** The docket for this action, identified by docket identification (ID) number EPA–HQ–OPPT–2010–0572, is available electronically at <http://www.regulations.gov> or in person at the Office of Pollution Prevention and Toxics Docket (OPPT Docket), Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPPT Docket is (202) 566–0280. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

**FOR FURTHER INFORMATION CONTACT:** *For technical information contact:* Jim Alwood, Chemical Control Division (7405M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (202) 564–8974; email address: [alwood.jim@epa.gov](mailto:alwood.jim@epa.gov).

*For general information contact:* The TSCA–Hotline, ABVI–Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: [TSCA-Hotline@epa.gov](mailto:TSCA-Hotline@epa.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. What action is the Agency taking?

EPA is extending the effective date for a final rule that appeared in the **Federal Register** of January 12, 2017 (82 FR 3641; FRL–9957–81) from May 12, 2017 to August 14, 2017. That rule established final reporting and recordkeeping requirements for certain chemical substances when they are manufactured or processed at the nanoscale as described in that rule. Specifically, the rule requires persons that manufacture (defined by statute to include import) or process, or intend to manufacture or process these chemical substances to electronically report to EPA certain information, which includes insofar as known to or reasonably ascertainable by the person making the report, the specific chemical identity, production volume, methods of manufacture and processing, exposure and release information, and existing information concerning environmental and health effects. The rule involves one-time reporting for existing discrete forms of certain nanoscale materials, and a standing one-time reporting requirement for new discrete forms of certain nanoscale materials before those new forms are manufactured or processed.

Section 553(b)(1)(B) of the Administrative Procedure Act, 5 U.S.C. 553(b)(1)(B), allows an action to be taken without opportunity for notice or comment when the agency for good cause finds that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. In addition, Section 553(d)(3), 5 U.S.C. 553(d)(3), allows the effective date of an action to be less than 30 days when a good cause finding is made. Because of the complex issues regarding reporting requirements of the rule and the immediate pendency of the effective date of the reporting requirements, it would be impractical to make the effective date of this extension 30 days after its publication, and it would be impractical to get public comments on an extension of the effective date of the rule. In addition, the public interest is served by complete and accurate reporting under the rule, which would be greatly facilitated by publication of the guidance. Therefore, EPA finds good cause to extend the effective date of the rule without notice and comment.
