

delivery system, which represent the capacity to deliver quality care, but not the care itself. The outcome evaluation will focus on outputs, which are the most immediate or proximal results of project activities (e.g., changes in partner collaboration, the number of clients enrolled in mainstream benefits), and client outcomes, particularly those related to behavioral health and homelessness and housing instability. Data collection efforts that will support the evaluation are described below.

The Client Interview—Baseline and the Client Interview—6-Month Follow-up have been developed to provide descriptive information about clients, and assess changes in client outcomes and their association with project characteristics. The tools were developed based on review of the literature and consultation with a panel of national experts, grantees, and SAMHSA. The tools were successfully used with over 7,000 clients during the previous evaluation of SAMHSA’s Homeless programs.

The Client Interview is comprised of questions (unique from SAMHSA’s Government Performance and Results Act [GPRA] client-level tool) that measure the outcomes of interest and subpopulations of focus: homelessness, housing, treatment history, trauma symptoms, housing and treatment choice, burden and satisfaction, and criminal justice involvement. For the CABHI Evaluation, the Client Interview Baseline and 6-Month Follow-up have

been updated to (1) reflect changes to the GPRA client-level tool which allowed the questions on military service to be removed, (2) align with the newest version of the Diagnostic and Statistical Manual of Mental Disorders (DSM), (3) remove the Readiness to Change measure, and (4) add detailed housing and homelessness questions. For the 6-Month Follow-up only, questions documenting services and evidence based practices received were added to improve data on client service receipt. Immediately following the SAMHSA-required administration of the GPRA client-level tools, which are completed by enrolled clients for each grantee project at baseline and 6-month follow-up, the paper and pencil Client Interview will be administered face-to-face by the GPRA interviewer. Questions regarding perception of care and treatment coercion will be self-administered by participating clients and returned to the interviewer in a sealed envelope to be included in the full package mailed to the evaluation coordinating center. Client participation is voluntary; gift card incentives will be given at baseline worth a \$15 value and at 6-month follow-up worth a \$30 value. Clients will be assigned unique identifiers by local projects; responses will be recorded on a paper and pencil answer sheet, mailed by the grantee project to the evaluation coordinating center, and scanned into a secure dataset. This process will eliminate the

need for data entry, thereby reducing cost and potential for data entry error, and ensuring privacy for evaluation data.

The Stakeholder Survey will be conducted with CABHI project stakeholders and partners via a web survey to assess the types of stakeholder partnerships involved in the CABHI projects, the services provided, and the effectiveness of implementation and collaboration in the CABHI projects. For the CABHI Evaluation, the survey has been divided into three waves so that questions are relevant to the current phase of grant implementation (e.g. wave 1 will be administered in year 1 of the project). Also, a section on healthcare services was added and the current section on collaboration was expanded to include new measures on collaboration. One wave of the survey will be administered each year of the three year grants. Each survey respondent will be issued a username and password to login to and complete the secure web-based survey. The web-based survey format will reduce burden on the respondent and minimize potential for measurement error.

Annual burden has increased from 4,006 to 5,098 hours per year as the response burden times have been revised to reflect real-world experience during the Homeless Programs evaluation and the number of respondents has been increased for the Stakeholder Survey.
