4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: This information collection is FBI National Academy students that represent state and local police and sheriffs' departments, military police organizations, and federal law enforcement agencies from the United States and over 150 foreign nations.

This information collection is FBI National Academy. These questionnaires have been designed to collect feedback from National Academy graduates and their supervisors to determine the type of impact the National Academy program had on their organization. The results are used to help determine if the National Academy program is functioning as intended and meeting its goals and objectives. We will utilize the students' comments to improve the current curriculum.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* Approximately 1,000 FBI National Academy Post-Graduate Questionnaire for Graduates. It is predicted we will receive a 50% response rate. The average response time for reading the questionnaire directions for the FBI National Academy Post-Graduate Questionnaire for Graduates is estimated to be two (2) minutes; the time to complete each questionnaire is estimated to be 30 minutes. Thus the total time to complete the Post-Graduate Questionnaire for Graduates is 32 minutes.

The total estimated time to complete each questionnaire per respondent for each group is 32 minutes.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection given that approximately 50% of those surveyed or (500 from each group) will respond, the total public burden for completing all questionnaires is 533 hours.

SUPPLEMENTARY INFORMATION:

I. Background

The Producer Price Index (PPI), one of the Nation's leading economic indicators, is used as a measure of price movements, as an indicator of inflationary trends, for inventory valuation, and as a measure of purchasing power of the dollar at the primary-market level. It also is used for market and economic research and as a basis for escalation in long-term contracts and purchase agreements.

This family of indexes are closely followed, monthly statistics which are viewed as sensitive indicators of the economic environment. Price data are vital in helping both the President and Congress set fiscal-spending targets. Federal policy-makers at the Department of Treasury and the Council of Economic Advisors utilize these statistics to help form and evaluate monetary and fiscal measures and to help interpret the general business environment. In addition, it is common to find one or more PPIs, alone or in combination with other measures, used to escalate the delivered price of goods for government purchases.

In addition to governmental uses, PPI data are regularly put to use by the private sector. Private industry uses PPI data for contract price adjustment. For one particular method of tax-related Last-In-First-Out (LIFO) inventory accounting, the Internal Revenue
