

and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing these final priorities, requirements, definitions, and selection criteria only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the

analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this final regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

In this regulatory impact analysis, we discuss the need for regulatory action, the potential costs and benefits, net budget impacts, assumptions, limitations, and data sources, as well as regulatory alternatives we considered.

Need for Regulatory Action

These final priorities, requirements, definitions, and selection criteria are needed to implement the SRCL program award process in the manner that the Department believes will best enable the program to achieve its objectives of implementing effective literacy and pre-literacy interventions and practices, at the local level, for disadvantaged children.

Potential Costs and Benefits

The Department believes that the final priorities, requirements, definitions, and selection criteria will not impose significant costs on SEAs. Program

participation is voluntary, and the costs imposed on applicants by the final priorities, requirements, definitions, and selection criteria are limited to paperwork burden related to preparing an application. The potential benefits of implementing the program using the final priorities, requirements, definitions, and selection criteria are designed to outweigh any costs incurred by applicants, and the costs of actually carrying out activities associated with the application may be paid for with program funds. For these reasons, the Department has determined that the costs of implementation will not be an undue burden for eligible applicants, including small entities.

Accounting Statement

As required by OMB Circular A-4 (available at www.whitehouse.gov/sites/default/files/omb/assets/omb/circulars/a004/a-4.pdf), in the following table we have prepared an accounting statement showing the classification of the expenditures associated with the provisions of this regulatory action. This table provides our best estimate of the changes in annual monetized transfers as a result of this regulatory action. Expenditures are classified as transfers from the Federal Government to SEAs.

ACCOUNTING STATEMENT CLASSIFICATION OF ESTIMATED EXPENDITURES

Category	Transfers
Annualized Monetized Transfers	\$357.2M.
From Whom To Whom?	From Federal Government to SEAs.

The SRCL program will provide approximately \$357,200,000 in competitive grants to eligible SEAs.
