**Compliance Date Extension; Formaldehyde Emission Standards for Composite Wood Products**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is proposing to amend a final rule that published in the **Federal Register** on December 12, 2016, concerning formaldehyde emission standards for composite wood products. EPA is publishing this proposed amendment to extend the Toxic Substances Control Act (TSCA) Title VI final rule compliance dates including: extending the December 12, 2017 date for emission standards, recordkeeping, and labeling provisions until March 22, 2018; extending the December 12, 2018 date for import certification provisions until March 22, 2019; and extending the December 12, 2023 date for provisions applicable to producers of laminated products until March 22, 2024. Additionally, this proposed amendment would extend the transitional period during which the California Air Resources Board (CARB) Third Party Certifiers (TPC) may certify composite wood products under TSCA Title VI without an accreditation issued by an EPA TSCA Title VI Accreditation Body so long as the TPC remains approved by CARB, is recognized by EPA, and complies with all aspects of the December 12, 2016 final rule. Extension of these compliance dates and the transitional period for CARB TPCs adds regulatory flexibility for regulated entities, reduces compliance burdens, and helps to prevent disruptions to supply chains. EPA believes that the proposed amendment is non-controversial and does not expect to receive any adverse comments. Therefore, in addition to this Notice of Proposed Rulemaking, elsewhere in this issue of the **Federal Register**, EPA is promulgating the amendment as a direct final rule.

**DATES:** Written comments must be received on or before June 8, 2017. Comments postmarked after the close of the comment period will be stamped “late” and may or may not be considered by the Agency.

#### Fisheries of the Northeastern United States; Regulatory Omnibus Framework Adjustment To Modify Reporting Requirements for Electronic Vessel Trip Reports by Federally Permitted Party and Charter Vessel Operators in the Mid-Atlantic Region

**AGENCY:** National Marine Fisheries  
Service (NMFS), National Oceanic and  
Atmospheric Administration (NOAA),  
Commerce.

**ACTION:** Proposed rule, request for  
comments.

**SUMMARY:** The Omnibus Electronic  
Vessel Trip Report Framework proposes  
management measures to increase the  
timeliness, accuracy, and quality of  
fisheries data submitted to NMFS while  
also reducing the burden on the charter  
and party fishing fleets. The electronic  
vessel trip report Framework would  
implement a requirement for charter  
and party vessels that hold a permit to  
fish for Atlantic bluefish, black sea bass,  
scup, summer flounder, tilefish, squid,  
Atlantic mackerel, and/or butterfish,  
while on a trip carrying passengers for  
hire, to submit required VTRs by  
electronic means. These proposed  
measures are intended to improve the  
timeliness and accuracy of charter and  
party vessel trip reporting.

**DATES:** Public comments must be  
received by June 23, 2017.

**ADDRESSES:** Copies of supporting  
documents used by the Mid-Atlantic  
Fishery Management Council, including  
the Proposed Framework Adjustment  
with Regulatory Impact Review (RIR) is  
available from: Dr. Christopher M.  
Moore, Executive Director, Mid-Atlantic  
Fishery Management Council, 800 North  
State Street, Suite 201, Dover, DE 19901,

#### SUPPLEMENTARY INFORMATION:

##### Background

For the past 25 years, NMFS has  
mandated reporting of catch, landings,  
and trip information through vessel trip  
reports (VTRs). Between 1992 and 1996,  
NMFS implemented this requirement  
for most vessels holding Federal fishing  
permits in Northeast Atlantic fisheries.  
In 2004, mandatory electronic reporting  
by federally permitted dealers was  
implemented for almost all federally-  
managed species. Requirements for  
weekly submissions of VTRs were  
implemented in 2010 for fisheries under  
catch shares, with weekly reporting later  
expanded to herring, mackerel, and surf  
clam/ocean quahog IFQ fisheries. In July  
2011, the NMFS Greater Atlantic  
Regional Fisheries Office approved the  
use of electronic reporting of VTRs on

a limited and voluntary basis for a  
segment of the groundfish fleet, and, in  
2013, NMFS made electronic vessel trip  
reports (eVTRs) available as an  
alternative to submitting handwritten  
hardcopies for all Mid-Atlantic and New  
England Fishery Management Council  
fishery management plans (FMPs).

Owners and operators of vessels  
possessing permits for fisheries  
managed by Mid-Atlantic Fishery  
Management Council (MAFMC) FMPs  
are required to submit a VTR for every  
commercial, party, or charter trip taken,  
regardless of where they fish (state or  
Federal waters) or what they catch.  
MAFMC-managed species that include a  
for-hire VTR requirement include black  
sea bass, bluefish, scup, summer  
flounder, tilefish, Atlantic mackerel,  
squid, and butterfish.

Current regulations require vessel  
owners or operators with permits for  
MAFMC-managed species to submit  
VTRs monthly to NMFS’s Greater  
Atlantic Regional Fisheries Office  
(GARFO) by the 15th day of the month  
following the month in which the trip  
occurred. The Atlantic Mackerel, Squid,  
and Butterfish FMP requires weekly  
VTR reporting. If a trip encompasses  
multiple NMFS statistical areas, a  
separate VTR must be submitted for  
each statistical area where fishing  
activity takes place. A separate VTR is  
also required for each reporting period.  
If a vessel does not land any fish on a  
trip, all trip information must be  
completed and “No Catch” entered in as  
the species code name. A VTR is  
required regardless of where fishing  
occurs, meaning that a vessel subject to  
these requirements in the Greater  
Atlantic must report even if they fish in  
the Southeast or any other region (does  
not apply to vessels holding only an  
American lobster permit). Since VTRs  
are in addition to any other reports  
which may be required by other Regions  
or plans, multiple reports may be  
required. VTRs, and any records upon  
which the reports were based, must be  
kept on board the vessel for at least one  
year and retained by the owner/operator  
for a total of three years after the date  
of the last entry on the report.

##### Proposed Measure

The Omnibus eVTR Framework  
would require charter and party vessels  
that hold a permit for species managed  
by MAFMC FMPs, while on a trip  
carrying passengers for hire, to submit  
VTRs by electronic means. These  
vessels would also be required to submit  
the eVTRs within 48 hours following  
the completion of a fishing trip.  
Federally permitted vessel owners and  
operators on commercial fishing trips
