Written comments should be received within 30 days of this notice.

Proposed Project

Characterization of Exposure Potential during Activities Conducted on Synthetic Turf with Crumb Rubber Infill—New—Agency for Toxic Substances and Disease Registry (ATSDR).

Background and Brief Description

Currently in the United States, there are more than 12,000 synthetic turf fields in use. While the Synthetic Turf Council has set guidelines for the content of crumb rubber used as infill in synthetic turf fields, manufacturing processes result in differences among types of crumb rubber. Additionally, the chemical composition may vary highly between different processes and source materials and may vary even within granules from the same origin.

In July, 2016, the Agency for Toxic Substances and Disease Registry (ATSDR) and the United States Environmental Protection Agency (US EPA) were granted an emergency Paperwork Reduction Act (PRA) clearance for a research study titled “Collections Related to Synthetic Turf Fields with Crumb Rubber Infill” (OMB
