NUCLEAR REGULATORY COMMISSION

[Docket No. 72-09; NRC-2017-0051]

U.S. Department of Energy; Fort St. Vrain Independent Spent Fuel Storage Installation

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment application; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) reviewed an application by the U.S. Department of Energy (DOE) for an amendment to Materials License No. SNM-2504, for the Fort St. Vrain (FSV) independent spent fuel storage installation (ISFSI), located in Platteville, Colorado. The amendment revises the licensee delegation of authority in the license, the technical specifications, and the final safety analysis report. These documents currently delegate authority under the license to the Manager, DOE Idaho Operations Office. The amendment would replace that reference with the Deputy Manager, Idaho Cleanup Project in each of the documents.

DATES: Notice of issuance of amendment to Materials License No. SNM-2504 given on June 13, 2017.

FOR FURTHER INFORMATION CONTACT: Jose Cuadrado, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-0606; email: Jose.Cuadrado@nrc.gov.

SUPPLEMENTARY INFORMATION: By letter dated September 8, 2016, DOE submitted to the NRC an application to amend the Materials License No. SNM-2504 for the FSV ISFSI, located in Platteville, Colorado (ADAMS Accession No. ML16258A179). Materials License No. SNM-2504 authorizes the licensee to receive, possess, store, and transfer spent nuclear fuel from the decommissioned FSV Nuclear Generating Station. The proposed amendment revises the licensee delegation of authority in the license, the technical specifications, and the final safety analysis report. These documents currently delegate authority under the license to the Manager, DOE Idaho Operations Office. The amendment would replace that

reference with the Deputy Manager, Idaho Cleanup Project in each of the documents.

In a letter to DOE dated December 9, 2016, NRC notified DOE that the application was acceptable to begin a technical review (ADAMS Accession No. ML16347A129). In accordance with § 72.16 of title 10 of the *Code of Federal Regulations* (10 CFR), a notice of docketing was published in the **Federal Register** on February 23, 2017 (82 FR 11484).

The NRC prepared a safety evaluation report (SER) (ADAMS Accession No. ML17151A391) to document its review and evaluation of the amendment request. As further explained in the SER, the NRC has also determined that the license amendment is administrative in nature, and therefore satisfies the 10 CFR 51.22(c)(11) criteria for a categorical exclusion from the requirement to prepare an environmental impact statement. Under 10 CFR 51.22(c)(11), this action is eligible for categorical exclusion, because it is an amendment to a materials license which is administrative, organizational, or procedural in nature, or which results in a change in process operations or equipment, provided that (i) there is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite, (ii) there is no significant increase in individual or cumulative occupational radiation exposure, (iii) there is no significant construction impact, and (iv) there is no significant increase in the potential for or consequences from radiological accidents. Consequently, an environmental assessment and finding of no significant impact are not required.

Upon completing its review, the NRC staff determined the request complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), as well as the NRC's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment. The NRC approved and issued Amendment No. 11 to Special Nuclear Materials License No. SNM-2504, held by DOE for the receipt, possession, transfer, and storage of spent fuel and associated radioactive materials at the FSV ISFSI. Amendment No. 11 was effective as of the date of issuance.

In accordance with 10 CFR 72.46(b)(2), the NRC has determined that Amendment No. 11 does not
