Project: 2018 National Survey on Drug Use and Health (OMB No. 0930-0110)—Revision

The National Survey on Drug Use and Health (NSDUH) is a survey of the U.S. civilian, non-institutionalized population aged 12 years old or older. The data are used to determine the prevalence of use of tobacco products, alcohol, illicit substances, and illicit use of prescription drugs. The results are used by SAMHSA, the Office of National Drug Control Policy (ONDCP), federal government agencies, and other organizations and researchers to establish policy, direct program activities, and better allocate resources.

While NSDUH must be updated periodically to reflect changing substance use and mental health issues and to continue producing current data, for the 2018 NSDUH only the following minor changes are planned: (1) At the request of ONDCP, re-inserted the marijuana marketplace module, previously included in the 2014 NSDUH (as well as prior years), into the respondent-administered portion of the

2018 questionnaire; (2) the addition of four new questions, asked only of respondents age 18 and older, about the perception of problems with and recovery from drug/alcohol and mental health problems; and (3) included other minor wording changes to improve the flow of the interview, increase respondent comprehension or to be consistent with text in other questions.

The marijuana marketplace module consists of a series of questions that seek to gather data such as the location, quantity, cost and type of marijuana being purchased across the nation. This module is unchanged from the version last included in the 2014 NSDUH. As with all NSDUH/NHSDA surveys conducted since 1999, the sample size of the survey for 2018 will be sufficient to permit prevalence estimates for each of the fifty states and the District of Columbia. Prior to 2002, the NSDUH was referred to as the National Household Survey on Drug Abuse (NHSDA).

The total annual burden estimate is shown below.

ANNUALIZED ESTIMATED BURDEN FOR 2018 NSDUH

Instrument	Number of respondents	Responses per respondent	Total number of responses	Hours per response	Total burden hours
