

estimated 9.6 acres of MA-8. Standards and Guidelines for Soil and Water, MA-8 require that not more than 10 percent of the total riparian zone in an activity area be in a detrimental soil condition upon the completion of a project (LRMP page 4-137, 2). The amendment would provide an exception from these standards for the Pacific Connector Pipeline Project and include specific mitigation measures and project design requirements for the project. This is a project-specific plan amendment applicable only to the Pacific Connector Pipeline Project and would not change future management direction for any other project.

The 36 CFR 219 planning rule requirements that are likely to be directly related to this amendment include:

§ 219.8(a)(2)(ii)—[The plan must include plan components to maintain or restore . . .] “Soils and soil productivity, including guidance to reduce soil erosion and sedimentation”

If any of the proposed amendments to the Winema NF LRMP described above are determined to be directly related to a substantive rule requirement, the Responsible Official must apply that requirement within the scope and scale of the proposed amendment and, if necessary, make adjustments to the proposed amendment to meet the rule requirement (36 CFR 219.13 (b)(5) and (6)).
