Needs and Uses: On April 28, 2017, the Commission released the *Business Data Services Order*, WC Docket No. 16-143 *et al.*, FCC 17-43, reforming the business data services/special access regulations for incumbent and competitive LECs. The Commission's reforms included replacing the application-based pricing flexibility rules with a new framework under which: (a) Packet-based services, time division multiplexing (TDM) services with bandwidth greater than 45 mbps, and TDM transport services are not subject to ex ante pricing regulation; (b) a new standard is applied to determine the extent to which the Commission regulates price cap LECs' TDM end user channel terminations with bandwidth less than 45 mbps and certain other low bandwidth business data services.

Under this standard, a price cap LEC is not subject to ex ante pricing regulation in the provision of these services in counties deemed competitive under the Commission's competitive market test or for which the price cap LEC previously obtained Phase II pricing flexibility; (c) the price cap LEC is subject to ex ante pricing regulation in other counties where it is the incumbent LEC, but in these counties the price cap LEC has downward pricing flexibility (*i.e.*, the equivalent of Phase I pricing flexibility under the prior rules); and (d) the Commission will update the competitive market test results every three years using data already collected in FCC Form 477.

Among other rules changes, the *Business Data Services Report and Order* repealed section 1.774, which set forth requirements for pricing flexibility applications, and added section 1.776, which limits the circumstances under which price cap LECs must file their business data services contracts as contract-based tariffs. The Commission also amended section 69.701 of its rules to specify that its pricing flexibility rules no longer apply to business data services.

General Description of Collection: Regulation B (12 CFR part 1002) issued by the Consumer Financial Protection Bureau, prohibits creditors from discriminating against applicants on any bases specified by the Equal Credit Opportunity Act; imposes, reporting, record keeping and disclosure requirements; establishes guidelines for gathering and evaluating credit information; and requires creditors to give applicants certain written notices. There is no change in the method or substance of the collection. The overall reduction in burden hours is a result of economic fluctuation. In particular, the

number of respondents has decreased while the reporting frequency and the estimated time per response remain the same.
 2. *Title:* Flood Insurance.
OMB Number: 3064-0120.
Form Number: None.
Affected Public: Insured state nonmember banks and state savings associations.
Burden Estimate: There is no change in the method or substance of the collection. There is an overall reduction in burden hours which is the result of (1) economic fluctuation reflected by a decrease in the number of FDIC-

supervised institutions and (2) a decrease in the number of flood insurance policies nationally. In particular, the number of respondents and the frequency of response (number of loans) have decreased while the hours per response remain the same. FDIC estimates total annual burden to be 111,540 hours. To obtain this figure, FDIC relied on: (a) Data from the Federal Emergency Management Agency (FEMA) as of May 2017; (b) FDIC Call Report data as of March 31, 2017; and (c) Federal Reserve Board mortgage data as of March 31, 2017.

Sources: FDIC, FEMA, Federal Reserve Board.

FEMA reported there were 4,983,954 flood insurance policies in effect with a total insured value of \$1,238,657,149,400.¹

FDIC Call Report data showed that as of March 31, 2017, there were a total of 5,790 FDIC-insured institutions with a total of \$4.25 trillion in 1-4 family; multifamily; nonfarm, nonresidential, and agricultural loans secured by real estate. As of March 31, 2017, there were 3,718 FDIC-regulated institutions with a

total value of about \$1.19 trillion in these loans. Based on the foregoing, we estimate that FDIC-regulated banks hold 27.9% of these assets.

The Federal Reserve Board reported \$14.41 trillion in mortgage debt outstanding in the U.S., with \$4.63 trillion (32.4%) held by depository

institutions.² Since this total debt held by banks is close to the value of these real estate loans from Call Report data, we have confidence that we can meld the data sets for estimation purposes. We therefore assume that 32.4% of the value of flood insurance policies will be held by U.S. commercial banks: \$401 billion.

In the absence of any data on the number of real estate loans with flood insurance at any bank, we resort to apportion 32.4% of the number of flood insurance policies (1,614,801) to commercial banks, and 27.9% of those to FDIC-regulated institutions (451,177). Because the value of property varies greatly between different geographical regions and different banks, it is doubtful that this estimation of the number of policies is accurate. However, there exists no other reasonable method for deriving the number of policies at each bank given available data.

Next, we apportioned the 451,177 flood insurance policies to each FDIC-regulated institution according to its share of real estate loans to total real estate loans. The resulting apportionment results in an average of 121 policies per bank, and a median of 30 policies per bank. Because the average is skewed by the large number of policies at large banks, we believe the median is a better measure for calculating burden hours.

Our subject-matter experts (SMEs) for this rule believe that the total burden to the public for complying with this rule is 1.0 hours per policy. We find four PRA related tasks in this rule: (1) Disclosure to Borrowers, (2) Disclosure to Servicers, (3) Reporting to FEMA of Changes in Coverage, and (4) Recordkeeping for tasks 1–3 above. We assume that Recordkeeping will comprise ½ hour, and the remaining ½ is split between the other tasks. We assume that 90% of policies will involve a new origination, and 10% of policies will involve a change in status. With 3,718 respondents holding a median of 30 policies and 1 hour of burden per policy, we calculate a total burden of 111,540 hours. This burden is apportioned to each task as shown in Table 1 above.

General Description of Collection: Each supervised lending institution is currently required to provide a notice of special flood hazards to each borrower with a loan secured by a building or mobile home located or to be located in an area identified by the Director of the

Federal Emergency Management Agency as being subject to special flood hazards. The Riegle Community Development Act requires that each institution also provide a copy of the notice to the servicer of the loan (if different from the originating lender).
