

*States*, which is followed closely by other government agencies, the banking industry, the financial press, and other users. The H.8 release provides a balance sheet for the banking industry as a whole and data disaggregated by its large domestic, small domestic, and foreign-related bank components.

*Proposed revisions:* The Board proposes several revisions to simplify and reduce the overall reporting burden associated with the FR 2644 report. The proposed FR 2644 reporting form would consist of 29 balance-sheet items and 2 memoranda items, an overall reduction of six data items.

*Combine Asset Items 3.a and 3.b Into One Data Item, and Liability Items 9.a and 9.b Into One Data Item*

The Board proposes to combine (1) Federal funds sold and securities purchased under agreements to resell with commercial banks in the U.S. (including U.S. branches and agencies of foreign banks) (item 3.a) and (2) Federal funds sold and securities purchased under agreements to resell with others (including nonbank brokers and dealers in securities and FHLB) (item 3.b) into one new item: Federal funds sold and securities purchased under agreements to resell (item 3) and to combine (1) Borrowings (including federal funds purchased and securities sold under agreements to repurchase and other borrowed money) from commercial banks in the U.S. (including U.S. branches and agencies of foreign banks) (item 9.a) and (2) Borrowings (including federal funds purchased and securities sold under agreements to repurchase and other borrowed money) from others (including FRB and FHLB) (item 9.b) into one new item: Borrowings (including federal funds purchased and securities sold under agreements to repurchase and other borrowed money) (item 9).

Counterparty-level detail on federal funds sold and securities purchased under agreements to resell (federal funds) has been collected from large banks since mid-1969 and from small banks since July 2009. Similar information for borrowings has been reported by both large and small banks since October 1996. In the H.8 release, federal funds sold to commercial banks have been included in interbank loans and federal funds sold to others have been included in non-core loans as part of other loans and leases.

These asset/liability breakdowns have provided useful information on counterparties, especially during the financial crisis. However, this information may now be obtained from the Report of Selected Money Market

Rates (FR 2420; OMB No. 7100-0357), which collects transaction-level data, including counterparty information, for both federal funds purchased and other borrowings. Therefore, the Board recommends dropping the counterparty detail from the FR 2644 report.

*Replace Item 8 With New Item 8.b*

The Board proposes to replace Total deposits (item 8) with All other deposits (item 8.b). This new item will consist of all deposits other than time deposits of \$100,000 or more. The Board assesses that reporting accuracy will be higher if banks report the two pieces of total deposits separately, rather than reporting total deposits and time deposits of \$100,000 or more, a subset of the former. The Board believes that this small change will reduce the incidence of misreporting, leading to fewer edit failures and less need for explanatory contact with respondents.

*Proposed Elimination of Data Items*

The Board proposes to stop separately collecting two data items related to banks' derivative and other trading activities: (1) Trading assets, other than securities and loans included above (item 5) and (2) Trading liabilities (item 10). Data item 5 would be included in All other assets (item 6.b), while data item 10 would be rolled into All other liabilities (including subordinated notes and debentures) (item 11.b). Successive data items would be renumbered as appropriate.

During the 2015 renewal of the FR 2644, derivatives with positive and negative fair values, items 5.a and 10.a, the major components of trading assets and trading liabilities respectively, were dropped from the reporting form. Weekly changes in the total items could reasonably be attributed to movements in derivatives, since they accounted for the preponderance of the trading items. However, in the intervening period, the Board has assessed that the benefits of collecting the two trading assets and liabilities items separately, in terms of analytical usefulness, do not exceed the costs of collection.

The Board also proposes to stop collecting two memoranda items: (1) Loans to small businesses amount currently outstanding of "Loans secured by nonfarm nonresidential properties" with original amounts of \$1,000,000 or less (included in item 4.a.(5) above) (item M.2 a) and (2) Loans to small businesses amount currently outstanding of "Commercial and industrial loans to U.S. addressees" with original amounts of \$1,000,000 or less (included in item 4.c above) (item M.2. b).

These memoranda items were added to the FR 2644 reporting form as of January 7, 2015, due to increasing interest in the health of small business lending and the lack of other timely sources of information. The recommendation to discontinue the collection of these data items is based on three factors:

(1) The new FFIEC 051 Call Report for eligible small banks with assets less than \$1 billion will require only semiannual reporting (June and December) for the related Call Report data items. This new Call Report was implemented as of March 31, 2017. Semiannual, rather than quarterly, reporting by three-fourths of the domestic banks in the universe would severely limit the Board's ability to estimate universe data from the weekly sample FR 2644 data and to sufficiently benchmark those estimates, leading to deterioration in the universe estimates.

(2) During the development of the FFIEC 051, both in-person conversations with bankers and their comments in response to the associated **Federal Register** notices identified these items as among the most burdensome for banks to provide, in some cases requiring manual intervention to do so.

(3) Many of the panel respondents, including most of the largest banks, repeat their latest quarterly Call Report figures for these data items. This practice does not provide the Board with the more up-to-date information that it had been seeking.

*Legal authorization and confidentiality:* The FR 2644 is authorized by section 2A and 11(a)(2) of the Federal Reserve Act (12 U.S.C. 225(a) and 248(a)(2)) and by section 7(c)(2) of the International Banking Act (12 U.S.C. 3105(c)(2)) and is voluntary. Individual respondent data are regarded as confidential under the Freedom of Information Act (5 U.S.C. 552(b)(4)).
