Meeting Accessibility: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public.

Committee’s Designated Federal Officer or Point of Contact: Dr. Jane M. Arabian, Assistant Director, Accession Policy, Office of the Under Secretary of Defense for Personnel and Readiness, Room 3D1066, The Pentagon, Washington, DC 20301–4000, email: jane.m.arabian.civ@mail.mil, telephone (703) 697–9271.

Written Statements: Persons desiring to make oral presentations or submit written statements for consideration at the committee meeting must contact the DFO, Dr. Jane Arabian at the address or telephone number in FOR FURTHER INFORMATION CONTACT no later than July 14, 2017.

FOR FURTHER INFORMATION CONTACT:

Aaron Siegel, Alternate OSD Federal Register Liaison Officer, Department of Defense. [FR Doc. 2017–14155 Filed 7–5–17; 8:45 am]

BILLING CODE 5001–06–P
transportation improvements from SC 31, in Little River, Horry County, South Carolina, to US 17, near Shallotte, Brunswick County, North Carolina. This proposed project is called the “Carolina Bays Parkway Extension” and is NCDOT Project 44604 and SCDOT Project P029554.

Based on the 2006 Feasibility Study, the Carolina Bays Parkway (CBP) Extension is needed to improve motorists’ mobility and manage existing and future traffic congestion projected along US 17 and other roadways such as S–57/SR 1303 (Hickman Road) within Horry and Brunswick Counties. The preliminary project study area is roughly bounded on the southwest at the interchange of SC 31 and SC 9 near Little River, Horry County, South Carolina, and runs northeast near SR 1303 (Hickman Road) and finally along the existing US 17 corridor up to the Town of Shallotte, Brunswick County, North Carolina. The final project study area and purpose and need for the project will be further defined during development of the DEIS.

To the extent practicable and consistent with COE oversight, this project is expected to be reviewed using the same or similar procedures as set forth in the merger process, as implemented in the State of North Carolina. This merger process is a synchronized review process performing the various environmental review and permitting procedures or consultation requirements necessary for a proposed project in a concurrent fashion. The process would provide a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the CWA during the NEPA/SEPA decision-making phase of transportation projects.

The CBP project has roots back to the 1980s and was revitalized with coordination in the 2000s culminating in a feasibility study produced in July of 2006. The feasibility study can be located on the project Web page at: https://www.ncdot.gov/projects/CBP/. The current effort by the COE, NCDOT and SCDOT anticipates a DEIS completed by 2020 and the Final Environmental Impact Statement (FEIS) completed by 2022.

Environmental consequences: CEQ regulations (40 CFR 1502.16) state the EIS will include the environmental impacts of the alternatives including the proposed action, any adverse environmental effects which cannot be avoided should the proposal be implemented, the relationship between short-term uses of man’s environment and the maintenance and enhancement of long-term productivity, and any irreversible or irretrievable commitments of resources which would be involved in the proposal should it be implemented. The EIS will assess a reasonable number of alternatives and identify and disclose the direct impacts of the proposed project on the following: Topography, geology, soils, climate, biotic communities, wetlands, fish and wildlife resources, endangered and threatened species, hydrology, water resources and water quality, floodplains, hazardous materials, air quality, noise, aesthetics, recreational resources, historical and cultural resources, socioeconomics, land use, public health and safety, energy requirements and conservation, natural or non-renewable resources, drinking waters, and environmental justice.

Secondary and cumulative environmental impacts: Cumulative impacts result from the incremental impact of the proposed action when added to past, present, and reasonably foreseeable future actions, regardless of what agency or person undertakes the action. Geographic Information System (GIS) data and mapping will be used to evaluate and quantify secondary and cumulative impacts of the proposed project with particular emphasis given to wetlands and surface/groundwater resources.

Mitigation: CEQ regulations (40 CFR 1502.14, 1502.16, and 1508.20) require the EIS to include appropriate mitigation measures. The COE has adopted a mitigation policy which embraces the concepts of “no net loss of wetlands” and project sequencing. This policy supports the overall goal to restore and maintain the chemical, biological, and physical integrity of “Waters of the United States,” specifically wetlands. Mitigation of wetland impacts has been defined by the CEQ to include: Avoidance of impacts (to wetlands), minimizing impacts, rectifying impacts, reducing impacts over time, and compensating for impacts (40 CFR 1508.20). Each of these aspects (avoidance, minimization, and compensatory mitigation) must be considered in sequential order. As part of the EIS, and in accordance with CEQ regulations and COE regulations (33 CFR 320.4(r) and 33 CFR part 332), the NCDOT and SCDOT will develop a compensatory mitigation plan detailing the methodology and approach to compensate for unavoidable impacts to waters of the U.S., including streams and wetlands.

NEPA/SEPA Preparation and Permitting: The proposed project requires approvals from federal and state agencies under both the NEPA and the SEPA, respectively. Therefore, the COE will serve as the lead Federal agency for the NEPA process. The EIS will serve as the NEPA document for the COE, and as the SEPA document for the State of North Carolina.

Within the EIS, the COE will conduct a thorough environmental review, including an evaluation of a reasonable number of alternatives. After distribution and review of the Draft EIS, consideration of public comment, and issuance of a Final EIS, the Wilmington District and the Charleston District will produce a Federal ROD that will document the completion of the EIS process and serve as a basis for permitting decisions. In accordance with SEPA, the State of North Carolina will issue a separate NC State ROD.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the COE at the address provided. The Wilmington District and Charleston District will issue Public Notices consistent with CEQ requirements. Dated: June 27, 2017.

Scott McLendon,
Chief, Regulatory Division.

DEPARTMENT OF EDUCATION

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Federal Direct Loan Program and Federal Family Education Loan Program Teacher Loan Forgiveness Forms

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before August 7, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use http://www.regulations.gov by
