

security code sent to the individual's selected second factor. SSA expanded its existing capabilities to require second factor authentication for every online sign in. We also allow for maintenance of the second factor options. An individual who forgets the password can reset it automatically without contacting SSA.

Social Security's Enrollment Process

The enrollment process is a one-time only activity. SSA requires the individuals to agree to the "Terms of Service" detailed on our Web site before we allow them to begin the enrollment process. The "Terms of Service" inform the individuals what we will and will not do with their personal information, and the privacy and security protections we provide on all data we collect. These terms also detail the consequences of misusing this service.

To verify the individual's identity, we ask the individual to give us minimal

personal information, which may include:

- Name;
- SSN;
- Date of birth;
- Address—mailing and residential;
- Telephone number;
- Email address;
- Financial information;
- Cell phone number; and
- Selecting and answering password reset questions.

We send a subset of this information to the ISP, who then generates a series of out-of-wallet questions back to the individual. The individual must answer all or most of the questions correctly before continuing in the process. The exact questions generated are unique to each individual. This collection of information, or a subset of it, is mandatory for respondents who want to do business with SSA via the Internet. We collect this information via the Internet, on SSA's public-facing Web site. We also offer an in-person identification verification process for

individuals who cannot, or are not willing, to register online. For this process, the individual must go to a local SSA field office and provide identifying information. We do not ask for financial information with the in-person process.

We only collect the identity information one time, when the individual registers for a credential. We ask for the User ID (username and password), and we send a security code to the individual's registered second factor (cell phone or email), for every sign in. The individual is required to provide the security code back to us during the online registration and sign in processes, for both standard accounts and accounts with extra security. The respondents are individuals who choose to use the Internet or Automated Telephone Response System to conduct business with SSA.

Type of Request: Revision of an OMB-approved information collection.

| Modality of completion | Number of respondents | Frequency of response | Average burden per response (minutes) | Estimated total annual burden (hours) |
