

actively pursue bluefin tuna to those with only authorized gear.

The CCCFA would like to test the effectiveness of EM for confirming authorized gear is used to catch Atlantic tunas, while unauthorized gear (for tunas) is onboard. Fishermen would be targeting groundfish with benthic longline, jigging machines, handgear, demersal gillnet (6.5-inch groundfish and 10–12-inch tie-down monkfish gillnet), or otter trawl. The applicants would commit to 100 percent of the trips being recorded and 100 percent of the footage being reviewed. Video footage would be reviewed by Ecotrust Canada, a third-party EM service provider. Also, vessels using harpoon gear would have EM camera views that would allow for viewing all fishing operations to ensure compliance, including adding necessary cameras to cover the pulpit and harpoon throw.

The CCCFA has requested that four vessels be exempted from the regulations at 50 CFR 635.19(b). These vessels would be listed as authorized vessels on the EFP and would also possess Atlantic Tunas General Category permits and/or Swordfish General Commercial permits. If granted, this EFP would expire on December 31, 2017.

NMFS finds this application warrants further consideration. The agency may impose possible conditions on this EFP, if it is granted, based on consideration of public comments and further analyses. The submission of reports on the exempted fishing activities would be due within 5 days of the completion of fishing trips, as well as a summary report within 30 days of the expiration of the EFP, if issued.

NMFS requests comments and offers a 15-day comment period on this notice, consistent with EFP regulations at 50 CFR 600.745.

Proposed Information Collection; Comment Request; Scientific Research, Exempted Fishing, and Exempted Activity Submissions

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Craig Cockrell, Highly Migratory Species Management Division, 13533 F/SF1, 1315 East-West Highway, Silver Spring, MD 20910; (301) 427–8503; or craig.cockrell@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

Exempted fishing permits (EFPs), scientific research permits (SRPs), display permits, letters of acknowledgment (LOAs), and shark research fishery permits are issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (Magnuson-Stevens Act) (16 U.S.C. 1801 *et seq.*) and/or the Atlantic Tunas Convention Act (ATCA) (16 U.S.C. 971 *et seq.*). Issuance of EFPs and related permits is necessary for the collection of Highly Migratory Species (HMS) for public display and scientific research that requires exemption from regulations (*e.g.*, seasons, prohibited species, authorized gear, and minimum sizes) that otherwise may prohibit such

collection. Display permits are issued for the collection of HMS for the purpose of public display, and a limited number of shark research fishery permits are issued for the collection of fishery-dependent data for future stock assessments and cooperative research with commercial fishermen to meet the shark research objectives of the Agency.

Regulations at 50 CFR 600.745 and 50 CFR 635.32 govern scientific research activity, exempted fishing, and exempted educational activities with respect to Atlantic HMS. Since the Magnuson-Stevens Act does not include scientific research within the definition of “fishing”, scientific research is exempt from this statute, and the National Marine Fisheries Service (NMFS) does not issue EFPs for bona fide research activities (*e.g.*, research conducted from a research vessel and not a commercial or recreational fishing vessel) involving species that are only regulated under the Magnuson-Stevens Act (*e.g.*, most species of sharks) and not under ATCA. NMFS requests copies of scientific research plans for these activities and indicates concurrence by issuing a LOA to researchers to indicate that the proposed activity meets the definition of scientific research and is therefore exempt from regulation.

Scientific research is not exempt from regulation under ATCA. NMFS issues SRPs for collection of species managed under this statute (*e.g.*, tunas, swordfish, billfish, and some shark species), which authorize researchers to collect HMS from bona fide research vessels (*e.g.*, NMFS or university research vessel.) NMFS will issue an EFP when research/ collection involving such species occurs from commercial or recreational fishing platforms.

To regulate these fishing activities, NMFS needs information to determine the justification for granting an EFP, LOA, SRP, display, or shark research fishery permit. The application requirements are detailed at 50 CFR 600.745(b)(2). Interim, annual, and no-catch/fishing reports must also be submitted to the HMS Management Division within NMFS. The authority for the NMFS requiring this information is found at 50 CFR 635.32(a).

NMFS has updated the burden estimates based on participation in the Atlantic HMS Management Division’s exempted fishing program from 2014 to 2016 and the Shark Research Fishery from 2014–2016. Since 2014 the shark research fishery application and the exempted fishing permit application have been separate applications. The burden estimates for these two applications remain the same for each application (40 minutes).
