would be physically or chemically restrained; measured and weighed; have a variety of samples taken, including: blood, skin, blubber, and mucus membrane swabs; and have tracking or data recording instruments attached. For proposed take numbers by species and location and details on sampling methodologies, see the application. The applicant has requested authorization for the unintentional research related mortality of up to four animals of each species annually.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the Federal Register, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: July 12, 2017.

Donna S. Wieting,
Director, Office of Protected Resources,
National Marine Fisheries Service.

[FR Doc. 2017–15039 Filed 7–17–17; 8:45 am]

SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA NMFS would like to conduct an intercept survey to assess the extent of interactions between recreational anglers on piers and other shore-based fishing structures, and sea turtles. This survey will also assess the feasibility of an intercept survey for this purpose in terms response rates and data collection. The survey will be administered on piers and other fixed structures nationwide, but focused within NOAA Fisheries Greater Atlantic Region and Southeast Region, and will survey approximately 36,000 individual recreational fishermen. The respondents will be verbally asked a series of questions, no longer than 5 minutes, and the interviewer will record answers.

II. Method of Collection

The survey will be implemented through verbal interviews.

III. Data

OMB Control Number: 0648–XXXX. Form Number(s): None. Type of Review: Regular submission. Affected Public: Individuals or households.

Estimated Number of Respondents: 36,000. Estimated Time per Response: 5 minutes. Estimated Total Annual Burden Hours: 3,000. Estimated Total Annual Cost to Public: $0 in recordkeeping/recording costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: July 12, 2017.

Sarah Brabson,
NOAA PRA Clearance Officer.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Recreational Angler Survey of Sea Turtle Interactions

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before September 18, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at pracomments@doc.gov).

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument and instructions should be directed to Melissa Cook, NOAA’s National Marine Fisheries Service (NMFS), Southeast Fisheries Science Center (SFSC), 3209 Frederic Street, Pascagoula, MS, 39567, (228) 549–1628, or melissa.cook@noaa.gov, or Ellen Koane, NOAA’s NMFS, Greater Atlantic Regional Fisheries Office (GARFO), 55 Great Republic Drive, Gloucester, MA, 01930, (978) 282–8476, or ellen.keane@noaa.gov.

BILLING CODE 3510–22–P
The Honorable Paul D. Ryan  
Speaker of the House  
U.S. House of Representativs  
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 17-33, concerning the Air Force’s proposed Letter(s) of Offer and Acceptance to the Government of India for defense articles and services estimated to cost $366.2 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

JM Ricey  
Vice Admiral, USN  
Director

Enclosures:  
1. Transmittal  
2. Policy Justification  
3. Sensitivity of Technology
Transmittal No. 17–33
Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) Prospective Purchaser: The Government of India
(ii) Total Estimated Value:

| Major Defense Equipment | $285.0 million |
| Other | $81.2 million |
| **Total** | **$366.2 million** |

(iii) Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:

- **Major Defense Equipment (MDE):**
  - One (1) C–17 Transport Aircraft
  - Four (4) Engines, Turbofan F–117–PW–100

Non-MDE includes:

- Also included in the proposed sale are one (1) AN/AAR–47 Missile Warning System, one (1) AN/ALE–47 Countermeasures Dispensing System (CMDS), one (1) AN/APX–119 Identification Friend or Foe (IFF) Transponder, precision navigation equipment, spare and repair parts, maintenance, support and test equipment, publications and technical documentation, warranty, quality assurance, ferry support, U.S. Government and contractor engineering, logistics and technical support services, and other related elements of logistics and program support.

(iv) Military Department: Air Force [X7–D–SAE]
(v) Prior Related Cases, if any: IN–D–SAC–$4,128, 29 Jun 2011
(vi) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None
(vii) Sensitivity of Technology

**Contents in the Defense Article or Defense Services Proposed to be Sold:**
See Attached Annex

(viii) Date Report Delivered to Congress: 26 JUN 2017

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Government of India—C–17 Transport Aircraft

The Government of India has requested the possible sale of one (1) C–17 transport aircraft with four (4) Turbofan F–117–PW–100 engines. The sale would also include one (1) AN/AAR–47 Missile Warning System, one (1) AN/ALE–47 Countermeasures Dispensing System (CMDS), one (1) AN/APX–119 Identification Friend or Foe (IFF) Transponder, precision navigation equipment, spare and repair parts, maintenance, support and test equipment, publications and technical documentation, warranty, quality assurance, ferry support, U.S. Government and contractor engineering, logistics and technical support services, and other related elements of logistics and program support. The estimated cost is $366.2 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to strengthen the U.S.-India relationship and to improve the security of an important partner which has been, and continues to be, an important force for economic progress and stability in South Asia.

The proposed sale will improve India’s capability to meet current and future strategic airlift requirements. India lies in a region prone to natural disasters and will use the additional capability for Humanitarian Assistance and Disaster Relief (HA/DR). In addition, through this purchase India will be able to provide more rapid strategic combat airlift capabilities for its armed forces. India currently operates C–17 aircraft and will have no difficulty absorbing this aircraft into its armed forces.

The proposed sale will not alter the basic military balance in the region.

The principal contractor will be the Boeing Company, Chicago, IL. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to India.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17–33
Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act
Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The Boeing C–17A Globemaster III military airlift aircraft is the most flexible cargo aircraft to enter the U.S. Air Force fleet. The C–17 is capable of strategic delivery of up to 170,000 pounds of personnel and/or equipment to main operating bases or forward operating locations. The aircraft is also capable short field landings with a full cargo load. The aircraft can perform tactical airlift and airdrop missions as well as transport litters and ambulatory patients during aeromedical evacuation when required. A fully integrated electronic cockpit and advanced cargo delivery system allow a crew of three: Pilot, co-pilot, and loadmaster, to operate the aircraft on any type of mission.

2. The AN/AAR–47 is a small, lightweight, passive, electro-optic, threat warning device used to detect surface-to-air missiles fired at helicopters and low-flying fixed-wing aircraft and automatically provide countermeasures, as well as audio and visual-sector warning messages to the aircrew. The basic system consists of multiple Optical Sensor Converter (OSC) units, a Computer Processor (CP) and a Control Indicator (CI). The set of OSC units, which normally consists of four, is mounted on the aircraft exterior to provide omni-directional protection. The OSC detects the rocket plume of missiles and sends appropriate signals to the CP for processing. The CP analyzes the data from each OSC and automatically deploys the appropriate countermeasures. The CP also contains comprehensive Built-in-Test (BIT) circuitry. The CI displays the incoming direction of the threat, so that the pilot can take appropriate action. Hardware is UNCLASSIFIED. Software is SECRET.

3. The AN/ALE–47 Countermeasures Dispensing System (CMDS) is an integrated, threat-adaptive, software-programmable dispensing system capable of dispensing chaff, flares, and active radio frequency expendables. The threats countered by the CMDS include radar-directed anti-aircraft artillery (AAA), radar command-guided missiles, radar homing guided missiles, and infrared (IR) guided missiles. The system is internally mounted and may be operated as a stand-alone system or may be integrated with other on-board electronic warfare and avionics systems. The AN/ALE–47 uses threat data received over the aircraft interfaces to assess the threat situation and to determine a response. Expendable decoys tailored to the immediate aircraft and threat environment may be dispensed using one of four operational modes. The hardware, technical data, and documentation to be provided are UNCLASSIFIED.

4. The AN/APX–119 Identification Friend or Foe (IFF) Digital Transponder is an identification system designed for command and control. It enables military and civilian air traffic control interrogation systems to identify aircraft. The hardware, technical data, and documentation to be provided are UNCLASSIFIED.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used...
to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that the Government of India can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

7. All defense articles and services listed in this transmittal are authorized for release and export to the Government of India.
