

E. Environmental Considerations

Pursuant to 10 CFR 51.21, “Criteria for and identification of licensing and regulatory actions requiring environmental assessments,” the NRC has prepared an Environmental Assessment (EA) summarizing the findings of its review of the environmental impacts of the proposed action under the National Environmental Policy Act. The NRC staff determined that special circumstances under 10 CFR 51.21 exist to warrant preparation of an EA because STP is the pilot plant to propose a risk-informed approach to resolve GSI-191 as recognized in Staff Requirement Memorandum SECY-12-0093, “Closure Options for Generic Safety Issue-191, Assessment of Debris Accumulation on Pressurized-Water Reactor Sump

Performance,” dated December 14, 2012. Because this is the first approval of a risk-informed approach, the NRC staff considered preparations of an EA to be a prudent course of action that would further the purposes of the National Environmental Policy Act. Based on its review, the NRC concluded that an environmental impact statement is not required and that the proposed action will have no significant impact on the environment.

The NRC published a final EA on the proposed action in the **Federal Register** on May 9, 2017 (82 FR 21568).

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, exemptions are authorized by law, will not present an undue risk to the public health and safety, are

consistent with the common defense and security, and special circumstances are present pursuant to 10 CFR 50.12(a)(2)(ii). Therefore, the NRC hereby grants STPNOC a one-time exemption from 10 CFR 50.46(a)(1), and 10 CFR part 50, appendix A, GDCs 35, 38, and 41 to use a risk-informed methodology in lieu of a deterministic methodology to show conformance with the ECCS and CSS performance criteria accounting for debris in containment for large-break hot-leg LOCAs and those breaks that exceed the plant-specific STP testing threshold.

PBGC, the Department of Labor (DOL), and the Internal Revenue Service (IRS) work together to produce the Form 5500 Annual Return/Report for Employee Benefit Plan and Form 5500–SF Short Form Annual Return/Report for Small Employee Benefit Plan (Form 5500 Series), through which the regulated public can satisfy the combined reporting/filing requirements applicable to employee benefit plans.

The collection of information has been approved by OMB under control number 1212–0057 through July 31, 2017. PBGC is requesting that OMB extend its approval for another three years without change. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

On May 1, 2017 (82 FR 20396), PBGC published a notice informing the public that it intended to request OMB approval and soliciting public comment. Only one comment was received and it supported the information collection.

Estimates are that PBGC will receive approximately 23,700 filings per year under this collection of information. PBGC further estimates that the total annual burden of this collection of information will be 1,200 hours and \$1,655,000.

Issued in Washington, DC.
