in its petition any alternate test procedures known to the petitioner to evaluate the basic model in a manner representative of its energy consumption characteristics. 10 CFR 430.27(b)(1)(ii). DOE may grant the waiver subject to conditions, including adherence to alternate test procedures. 10 CFR 430.27(f)(2). As soon as practicable after the granting of any waiver, DOE will publish in the Federal Register a notice of proposed rulemaking to amend its regulations so as to eliminate any need for the continuation of such waiver. As soon thereafter as practicable, DOE will publish in the Federal Register a final rule. 10 CFR 430.27(l).

DOE recently published standards for miscellaneous refrigeration products (“MREFs”). See 81 FR 75194 (Oct. 28, 2016). Testing to demonstrate compliance with those standards will require manufacturers to use the MREF test procedure established in a final rule published in July 2016. See 81 FR 46768 (July 18, 2016) (MREF coverage determination). See 81 FR 49868 (July 29, 2016) (MREF test procedure final rule). As those that are at issue here fall into the MREF category. Accordingly, with the exception that it must calculate energy consumption using a correction factor (“K-factor”) of 0.85 with that detailed in the recent waiver decision, DOE announced the following two formulas (according to 10 CFR part 430, subpart B, appendix A):

\[
E = (ET1 - 0.85) + IET. 
\]

Therefore, under this approach, the energy consumption would be defined as

\[
E = (ET1 \times 0.85) + IET. 
\]

If compartment temperatures are not below their respective standardized temperatures for both test settings (according to 10 CFR part 430, subpart B, appendix A, section 6.2.4.1):

\[
E = (ET1 \times 0.85) + IET. 
\]

Energy consumption of the “fresh food compartment”:

\[
E_{\text{Fresh Food Compartment}} = \frac{E}{(ET2–ET1) \times (55°F–TC1)/(TC2–TC1)} \times 0.85 + IET 
\]

Energy consumption of the “cooler compartment”:

\[
E_{\text{Cooler Compartment}} = \frac{E}{ET1 + [(ET2–ET1) \times (55°F–TC1)/(TC2–TC1)]} \times 0.85 + IET 
\]

The following basic model is included in New Shunxiang’s petition: JG50–2D1.

IV. Summary and Request for Comments

This document announces New Shunxiang’s petition for waiver from appendix A for its basic model of a combination cooler-refrigerator and seeks comment on whether the
company should be permitted to use the alternate test procedure described in this document for the identified basic model. DOE will consider the use of the alternate procedure in its subsequent Decision and Order. DOE is publishing New Shunxiang’s request for a petition of waiver in its entirety pursuant to 10 CFR 430.27(b)(1)(iv). The petition contains no confidential information.

DOE solicits comments from interested parties on all aspects of the petition, including the alternate calculation methodology under consideration. New Shunxiang’s cover email and attachment’s text are both reproduced verbatim and are available in the docket identified in the ADDRESSES section in this document. See https://www.regulations.gov/document?D=EERE-2017-BT-WAV-0002-0001 (containing product photographs and related information).

Pursuant to 10 CFR 430.27(d), any person submitting written comments to DOE must also send a copy of such comments to the petitioner. The contact information for the petitioner is Dolly shunxiang187@163.com, New Shunxiang Electrical Appliance Co., Ltd., Zhengxing Road, Nantou, Zhongshan, Guandong, China. All comment submissions to DOE must include the Case No. RF–044 for this proceeding. Submit electronic comments in Microsoft Word, Portable Document Format (PDF), or text (American Standard Code for Information Interchange (ASCII)) file format and avoid the use of special characters or any form of encryption. Wherever possible, include the electronic signature of the author. DOE does not accept telefacsimiles (faxes).

According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit two copies: one copy of the document including all the information believed to be confidential, and one copy of the document with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.
