

responsibility of the CC is to coordinate all ECDS-related institutional communications. In the second stage, the 2017 ECDS will select a sample of up to 22,855 ECD to participate in the survey with the goal of attaining 18,000 eligible ECD respondents. The HA, with the help of the CC, will notify the sampled individuals of their selection and NSF will survey these individuals.

Estimate of Burden: In the 2017 ECDS, taking into account all five respondent types (HA, CC, LC, ECD, and ineligible respondents), we estimate the total

respondent burden to be 12,641 hours. We estimate a total burden of 157 hours for HAs, 470 hours for CCs, 2,400 hours for list coordinators, 9,600 hours for ECD, and 14 hours for ineligible respondents. These estimates use the burden information collected during the Pilot ECDS and assume that 300 institutions will participate (approximately 86%) during stage 1 of the 2017 ECDS data collection, 240 of the participating institutions (80%) will send pre-notification emails to potential

respondents in stage 2 of data collection, and that the 22,855 sample size will result in 18,000 eligible responding ECD and 410 ineligible respondents. The amount of time for eligible responding ECD to complete the 2017 ECDS questionnaire may vary depending on an individual's circumstances; however, NCSES estimate it will take approximately 32 minutes. The below table shows the estimated burden by stage and respondent type.

ESTIMATED BURDEN BY STAGE AND RESPONDENT TYPE: 2017 ECDS

Respondent type	Sample members	Minutes per respondent	Estimated total burden hours
Stage 1: Frame Creation:			
High Authority (HA)	350	20	117
Communication Coordinator (CC)	350	60	350
List Coordinator (LC)	300	480	2,400
<i>Subtotal</i>			<i>2,867</i>
Stage 2: Individual Survey			
High Authority (HA) Communication	240	10	40
Coordinator (CC)	240	30	120
Early Career Doctorate (ECD)	18,000	32	9,600
Ineligible Respondents	410	2	14
<i>Subtotal</i>			<i>9,774</i>
<i>Total</i>			<i>12,641</i>

Updates: Relative to the first notice, there are three substantive changes: (1) The first notice included the statement that “NSF will request lists of ECD from approximately 390 institutions nationwide, and sample 24,000 individuals from these lists” was based on the initial sample design plan. Based on additional analysis, the final sample sizes decreased to a sample of approximately 350 institutions and 22,855 individuals. (2) The first notice also stated “Sample members will be invited to participate in a 40-minute web-based questionnaire.” Since the first notice, NCSES further revised the Pilot ECDS questionnaire to reduce the time needed to complete the survey to 32 minutes. (3) NCSES reduced the estimated burden to 12,641 hours from the 19,900 hours provided in the first notice. This reduction in the estimated burden was a result of the smaller sample sizes, a reduction in the time to complete the survey, and a change in the expected response rate.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to

the collection of information unless it displays a currently valid OMB control number.

NUCLEAR REGULATORY COMMISSION

[NRC-2017-0161]

Assessment of the Assumption of Normality (Employing Individual Observed Values)

AGENCY: Nuclear Regulatory Commission.

ACTION: Regulatory guide; withdrawal.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is withdrawing Regulatory Guide (RG) 5.22, "Assessment of the Assumption of Normality (Employing Individual Observed Values)." This RG is being withdrawn because the guidance for licensees to develop written procedures describing statistical analyses of nuclear material accounting data, specifically when assessing the assumption of normality in a data set, is no longer needed.

DATES: The effective date of the withdrawal of RG 5.22 is July 21, 2017.

ADDRESSES: Please refer to Docket ID NRC-2017-0161 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document, using the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2017-0161. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Document collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then

select "*Begin Web-based ADAMS Search.*" For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. The basis for the withdrawal of this guide is found in ADAMS under Accession No. ML16225A659.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT:

Glenn Tuttle, Office of Nuclear Materials Safety and Safeguards, telephone: 301-415-7230; email: Glenn.Tuttle@nrc.gov; and Harriet Karagiannis, Office of Nuclear Regulatory Research, telephone: 301-415-2493; email: Harriet.Karagiannis@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION: Regulatory Guide 5.22 was published in April 1974 to provide guidance on meeting the requirements related to material control and accounting (MC&A) statistical control procedures in § 70.22(b) of title 10 of the *Code of Federal Regulations* (10 CFR), "Contents of applications." This requirement, regarding submittal of the licensees' description of its MC&A procedures, did not specifically require the methodology that the guidance in RG 5.22 addressed and no longer exists in 10 CFR 70.22(b). The MC&A requirements have all been moved to 10 CFR part 74 and no specific requirements exist for assessing the assumption of normality.

Regulatory Guide 5.22 endorsed the American National Standards Institute (ANSI) Standard N15.15-1973, "Assessment of the Assumption of Normality (Employing Individual Observed Values)," with qualifications. The ANSI Standard N15.15-1973 provided a common method used in assessing the assumption of normality in a data set. However, the NRC is not aware that any licensee ever used this particular RG or the ANSI standard it endorsed since the method is not required by NRC regulations. Instructions on performing such an analysis, if a licensee chose to test their MC&A data for the assumption of

normality, can be found in NUREG/CR-4604 (PNL-5849), "Statistical Methods for Nuclear Material Management" (ADAMS Accession No. ML103430339). NUREG/CR-4604 was developed to be a comprehensive guidance document on statistical methods that licensees may use in evaluating MC&A data.

Withdrawal of a RG means that the guide no longer provides useful information or has been superseded by other guidance, technological innovations, congressional actions, or other events. The NRC is withdrawing RG 5.22 because it is no longer needed. The withdrawal of RG 5.22 does not alter any prior or existing NRC licensing approvals or the acceptability of licensee commitments to RG 5.22. Although RG 5.22 is withdrawn, current licensees may continue to use it, and withdrawal does not affect any existing licenses or agreements. However, by withdrawing RG 5.22, the NRC will no longer approve its use in future requests or applications for NRC licensing actions.
