Title: Federal Case Registry (FCR)

OMB No.: 0970-0421.

Description: Established within the Federal Parent Locator Service (FPLS) on October 1, 1998, the Federal Case Registry (FCR) is a database that contains basic case and participant data from each of the State Case Registries (SCRs). The SCRs are central registries of child support cases and orders in each state.

The FCR is a national database that includes all child support cases handled by state child support agencies (referred to as IV-D cases), and all support orders established or modified on or after October 1, 1998 (referred to as non-IV-D orders). It assists states in locating parties that live in different states to establish, modify, or enforce child support obligations; establish paternity; enforce state law regarding parental kidnapping; and establish or enforce

child custody or visitation determinations.

When a state sends the FCR information about persons in a new case or child support order, this new information is automatically compared to existing person information in the FCR. If matches are found, the FPLS notifies all appropriate state child support enforcement agencies of the record match. In this way, a state will know if another state has a case or support order with participants in common with it, and can take appropriate action.

The information collection activities pertaining to the FCR are authorized by: (1) 42 U.S.C. 653(h), requiring the establishment of the Federal Case Registry (FCR) within the Federal Parent Locator Service (FPLS). (2) 42 U.S.C. 654A(e), requiring State child support agencies to include a State Case Registry (SCR) in the state's automated system. (3) 42 U.S.C. 654A(f)(1), requiring states to conduct information comparison activities between the SCR and the FCR.

Respondents: State Child Support Agencies.
