

revised estimates reflect input obtained by the EEOC during a limited survey of school districts with varying resource levels and student populations. The school districts provided information on the types of employees that participate in preparation of the EEO-5 report and the amount of time spent by each type of employee. After accounting for the

time spent by the various employees who have a role in preparing an EEO-5, the EEOC estimates that a school district will spend 17.07 hours to prepare the report, and estimates that the aggregate biennial hour burden for all respondents is 102,839.32. The cost associated with the burden hours was calculated using median hourly wage

rates obtained from the Department of Labor² for each job identified above as participating in the submission of the survey; the burden hour cost per school district will be approximately \$539.57, while the estimated total biennial burden cost for all 6024 school districts will be \$3,250,361.25 (See Table 1³).

These estimates are based on an assumption of paper reporting. However, the EEOC has made electronic filing much easier for respondents required to file the EEO-5 Report. As a result, more respondents are using this filing method. This development, along with the greater availability of human resource information software, is expected to significantly reduce the actual burden of reporting. The Commission continues to develop more reliable estimates of reporting burdens given the significant increase in electronic filing and explore new approaches to make such reporting even less burdensome. In order to help reduce survey burden, respondents are encouraged to report data electronically, whenever possible.

Dated: July 24, 2017.
For the Commission.

Acting Chair.
