Project Description

WBI Energy proposes to construct a new 2,600-horsepower electric-driven compressor station in Cass County, North Dakota; 38 miles of new 16-inch-diameter pipeline between Mapleton, North Dakota and Felton, Minnesota; and farm taps, valve settings, and ancillary facilities. Additionally, WBI Energy proposes to replace two existing town border station delivery points and construct one regulator station in Burleigh, Stutsman, and Barnes Counties, North Dakota, respectively, to increase the operating pressure of a portion of its Line Section 24.

Background

On November 23, 2016, the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Planned Valley Expansion Project and Request for Comments on Environmental Issues* (NOI). The NOI was issued during the pre-filing review of the Project in Docket No. PF16-10 and was sent to affected landowners; federal, state, and local government agencies; elected officials; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, commenters raised concerns regarding: watershed and waterbody crossings; stormwater discharge; groundwater impacts; flood zone impacts; reseeding and species review requirements; Section 106 consultation; cultural resources and land valuation impacts; route variations; project impacts on the Fargo-Moorhead Area Diversion Project; and fugitive dust emissions and noise impacts.
