Purpose of Meeting: In accordance with Federal Advisory Committee Act and to promote transparency of the process, deliberations of the Committee will occur in a public forum. At this meeting, the Committee will continue its deliberations from the last public meeting.

Background: The Committee, a federal advisory committee, is charged with issuing recommendations for the Secretary regarding the development and implementation of national health promotion and disease prevention objectives for 2030. The Committee will discuss the nation's health promotion and disease prevention objectives and will provide recommendations to improve health status and reduce health risks for the nation by the year 2030. The Committee will develop recommendations regarding the criteria for identifying a more focused set of measurable, nationally representative objectives for improving the health of the nation by the year 2030 and recommendations for engaging

stakeholders in the implementation and achievement of the objectives. The Committee's advice must assist the Secretary in reducing the number of objectives, while ensuring that the selection criteria identifies the most critical public health issues that are high-impact priorities supported by current national data. Through the Healthy People initiative, HHS leverages scientific insights and lessons from the past decade, along with new knowledge of current data, trends, and innovations, to develop the next iteration of national health promotion and disease prevention objectives. Healthy People provides science-based, 10-year national objectives for promoting health and preventing disease. Since 1979, Healthy People has set and monitored national health objectives that meet a broad range of health needs, encourage collaboration across sectors, guide individuals toward making informed health decisions, and measure the impact of our prevention and health promotion activities. Healthy People 2030 health objectives will reflect assessments of major risks to health and wellness, changing public health priorities, and emerging technologies related to our nation's health preparedness and prevention.
