I. Introduction

On July 28, 2017, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider changes to an analytical method relating to periodic reports.¹ The Petition identifies the proposed analytical method changes filed in this docket as Proposal Seven.

II. Proposal Seven

The Postal Service explains that for many years it has calculated the “USPS Marketing Mail” dropship passthroughs for flats and parcels rate categories only with reference to the per-pound price element above the piece-pound breakpoint. For greater accuracy it proposes to include the per-piece price element below the breakpoint in the calculation. Petition, Proposal Seven at 1.
