## II. What action is the Agency taking?

This document lists the statements of findings made by EPA after review of notices submitted under TSCA section 5(a) that certain new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment. This document presents statements of findings made by EPA during the period from June 1, 2017 to June 30, 2017.

## III. What is the Agency's authority for taking this action?

TSCA section 5(a)(3) requires EPA to review a TSCA section 5(a) notice and make one of the following specific findings:

- The chemical substance or significant new use presents an unreasonable risk of injury to health or the environment;
- The information available to EPA is insufficient to permit a reasoned evaluation of the health and environmental effects of the chemical substance or significant new use;
- The information available to EPA is insufficient to permit a reasoned evaluation of the health and environmental effects and the chemical substance or significant new use may present an unreasonable risk of injury to health or the environment;
- The chemical substance is or will be produced in substantial quantities, and such substance either enters or may reasonably be anticipated to enter the environment in substantial quantities or there is or may be significant or substantial human exposure to the substance; or
- The chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment.

Unreasonable risk findings must be made without consideration of costs or other non-risk factors, including an unreasonable risk to a potentially exposed or susceptible subpopulation identified as relevant under the conditions of use. The term "conditions of use" is defined in TSCA section 3 to mean "the circumstances, as determined

by the Administrator, under which a chemical substance is intended, known, or reasonably foreseen to be manufactured, processed, distributed in commerce, used, or disposed of."

EPA is required under TSCA section 5(g) to publish in the **Federal Register** a statement of its findings after its review of a TSCA section 5(a) notice when EPA makes a finding that a new chemical substance or significant new use is not likely to present an unreasonable risk of injury to health or the environment. Such statements apply to PMNs, MCANs, and SNUNs submitted to EPA under TSCA section 5.

Anyone who plans to manufacture (which includes import) a new chemical substance for a non-exempt commercial purpose and any manufacturer or processor wishing to engage in a use of a chemical substance designated by EPA as a significant new use must submit a notice to EPA at least 90 days before commencing manufacture of the new chemical substance or before engaging in the significant new use.

The submitter of a notice to EPA for which EPA has made a finding of "not likely to present an unreasonable risk of injury to health or the environment" may commence manufacture of the chemical substance or manufacture or processing for the significant new use notwithstanding any remaining portion of the applicable review period.

## IV. Statements of Administrator Findings Under TSCA Section 5(a)(3)(C)

In this unit, EPA provides the following information (to the extent that such information is not claimed as Confidential Business Information (CBI)) on the PMNs, MCANs and SNUNs for which, during this period, EPA has made findings under TSCA section 5(a)(3)(C) that the new chemical substances or significant new uses are not likely to present an unreasonable risk of injury to health or the environment:

The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** This ICR covers the paperwork burden hours and costs associated with the information collection activities under the pesticide registration fee programs implemented through EPA's Office of Pesticide Programs. Pesticide registrants are required by statute to pay an annual registration maintenance fee for all products registered under Section 3 and Section 24(c) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). In addition, the Pesticide Registration Improvement Act (PRIA) amended FIFRA in 2004 to create a registration service fee system for applications for specific pesticide registration, amended registration, and associated tolerance actions (Section 33). This mandatory collection specifically covers the activities related to the annual registration maintenance fees, the registration service fees and the burden associated with the submission of requests for fees to be waived.

**Respondents/Affected Entities:** Entities potentially affected by this ICR are pesticide and other agricultural chemical manufacturers, other basic inorganic chemical manufacturers, other basic organic chemical manufacturers, and regulators of agricultural marketing commodities.

**Respondent's Obligation To Respond:** This information collection is mandatory under FIFRA sections 4(i)(5) and 33.

**Estimated Total Number of Potential Respondents:** 1,471

**Frequency of Response:** Annual and on occasion.

**Estimated Total Burden:** Ranges from 1,681 to 6,840 hours per year depending
