Report for at least six months from the effective date of the reduced delay period.16 FINRA disagreed that an additional implementation delay related to the Historic TRACE Data product was necessary for the Security Activity Report. FINRA stated that proposed features of the Security Activity Report, such as the 90-day publication delay and other grouping of activity reduce information leakage risks and mitigate any potential impacts.17 FINRA stated that it intends for the effective date of the Security Activity Report to be no sooner than February 1, 2018.18 This commenter also believed there would be confidentiality concerns if market concentration percentages were not aggregated across the top five MPIDs for each particular security.19 In its Response Letter, FINRA clarified and reiterated that the activity of the top five MPIDs will be expressed in aggregate figures.20

Finally, this commenter stated that it would be beneficial for FINRA to publicly share a draft template of the Security Activity Report so that market participants could educate themselves on the format and contents of the report.21 FINRA responded that it intends to post a file layout for the Security Activity Report on its Web site at least 30 days before the Security Activity Report’s effective date.22
