I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0203 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

• NRC’s Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at http://www.nrc.gov/reading-rm/adams.html. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. A copy of the collection of information and related instructions may be obtained without charge by accessing ADAMS Accession ML17197A612.
• NRC’s PDR: You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.
• NRC’s Clearance Officer: A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC’s Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: INFOCOLLECTS.Resource@NRC.GOV.

B. Submitting Comments

Please include Docket ID NRC–2016–0203 in the subject line of your comment submission, in order to ensure that the NRC is able to make your comment submission available to the public in this docket. The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at http://www.regulations.gov and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission, hereafter, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, NRC Form 64, “Travel Voucher” (Part 1); NRC Form 64A, “Travel Voucher” (Part 2); and NRC Form 64B, “Optional Travel Voucher” (Part 2). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a Federal Register notice with a 60-day comment period on this information collection on March 31, 2017; 82 FR16074.

1. The title of the information collection: NRC Form 64, “Travel Voucher” (Part 1); NRC Form 64A, “Travel Voucher” (Part 2); and NRC Form 64B, “Optional Travel Voucher” (Part 2).
2. OMB approval number: 3150–0192.
3. Type of submission: Extension.
4. The form number if applicable: NRC Form 64, 64A, and 64B.
5. How often the collection is required or requested: On occasion.
6. Who will be required or asked to respond: Contractors, consultants and invited NRC travelers who travel in the course of conducting business for the NRC.
7. The estimated number of annual responses: 100.
8. The estimated number of annual respondents: 100.
9. An estimate of the total number of hours needed annually to comply with the information collection requirement or request: 100 (1 hour per form).
10. Abstract: Consultants, contractors, and those invited by the NRC to travel (e.g., prospective employees) must file travel vouchers and trip reports in order to be reimbursed for their travel expenses. The information collected includes the name, address, social security number, and the amount to be reimbursed. Travel expenses that are reimbursed are confined to those expenses essential to the transaction of official business for an approved trip.

Dated at Rockville, Maryland, this 9th day of August, 2017.

For the Nuclear Regulatory Commission.

Dave Cullison,
NRC Clearance Officer, Office of the Chief Information Officer.

[NR Doc. 2017–17124 Filed 8–11–17; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 70–1151; License No. SNM–1107; EA–16–173; NRC–2017–0176]

Westinghouse Electric Company, LLC

AGENCY: Nuclear Regulatory Commission.

ACTION: Confirmatory order; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) issued a confirmatory order (Order) to Westinghouse Electric Company, LLC, (the licensee) confirming the agreement reached in an Alternative Dispute Resolution mediation session held on May 19, 2017, and follow-up discussions held between May 19, 2017, and August 3, 2017. This Order will ensure the licensee restores compliance with NRC’s regulations.

DATES: The Order was issued on August 9, 2017.

ADDRESSES: Please refer to Docket ID NRC–2017–0176 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

• Federal Rulemaking Web site: Go to http://www.regulations.gov and search for Docket ID NRC–2017–0176. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the FOR FURTHER INFORMATION CONTACT section of this document.

• NRC’s Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at http://www.nrc.gov/reading-rm/adams.html. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in...
ADAMS) is provided the first time that it is mentioned in this document. 

- NRC’s PDR: You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Scott Sparks, Region II, U.S. Nuclear Regulatory Commission, Atlanta, Georgia 30303–1257; telephone: 404–997–4422; email: Scott.Sparks@nrc.gov.

SUPPLEMENTARY INFORMATION: The text of the Order is attached.

Dated at Atlanta, Georgia, this 9th day of August, 2017.

For the Nuclear Regulatory Commission.

Catherine Haney, Regional Administrator.

NUCLEAR REGULATORY COMMISSION

CONCLUSIVE ORDER (EFFECTIVE UPON ISSUANCE)

I

Westinghouse Electric Company (Westinghouse, or the licensee) is the holder of NRC License No. SNM–1107, issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR part 70 on September 30, 2007. The licensee authorizes the operation of the Columbia Fuel Fabrication Facility (CFFF) in accordance with the conditions specified therein. The facility is located on the licensee’s site in Hopkins, South Carolina.

This Conclusive Order (CO) is the result of an agreement reached during an alternative dispute resolution (ADR) mediation session conducted on May 19, 2017, and follow-up discussions held between May 19, 2017, and August 3, 2017.

II

On May 28, 2016, as part of the licensee’s routine maintenance activities, the licensee started the S–1030 scrubber inspection and cleanup activities. The licensee completed the S–1030 scrubber cleanup activities on June 1, 2016, removing a total of 197 kilograms (kg) of material. The scrubber was subsequently restarted following the maintenance outage on June 2, 2016. On July 13, 2016, the preliminary results of samples taken of the material removed from the S–1030 scrubber indicated a 40–50% concentration of uranium (U) enriched to less than 5%. This equates to approximately 100 kg of U in the scrubber, exceeding the mass limit in the Criticality Safety Evaluation (CSE) of 29 kg U.

The scrubber was shut down on July 14, 2016, when the determination was made by the licensee that the mass limit in the CSE had been exceeded. The licensee reported this event to the NRC as a 24-hour event due to a high consequence event being “unlikely” (EN 52090). On July 31, 2016, the event report was updated to a one hour report per 10 CFR 70 Appendix A (a)(4) because no items relied upon for safety (IROFS) remained available and reliable to perform their function.

On August 11, 2016, the NRC issued a Conclusive Action Letter (CAL) to Westinghouse (ML162248082). The purpose of the CAL was to confirm the commitments made by Westinghouse regarding additional actions Westinghouse will take in response to the U buildup reported to the NRC in July 2016. These actions were intended to ensure that the causes of the U buildup have been adequately identified and evaluated and that appropriate corrective actions have been implemented to improve the performance of the Nuclear Criticality Safety (NCS) program.

On September 27, 2016, the NRC completed an Augmented Inspection at the Westinghouse facility, the details of which are documented in NRC Inspection Report 70–1151/2016–007 (ML16301A001). A follow-up NRC inspection (70–1151/2017–007) was also conducted, the results of which were issued on February 27, 2017 (ML17058A448). This inspection report identified the following four Apparent Violations (AVs), all of which were considered for enforcement aspects of this matter.

A. Westinghouse acknowledges that four violations occurred, as stated in NRC Inspection Report 70–1151/2017–007.

B. Based on ADR, the parties agreed that the safety significance of violations described in Section II above is characterized as escalated enforcement as described in the NRC Enforcement Policy.

C. Approximately two years (+/– 6 months) after issuance of the CO, Westinghouse shall conduct an additional Nuclear Safety Culture (NSC) survey by the Westinghouse corporate nuclear safety culture organization or an experienced independent third party, consistent with the depth and scope of the NSC survey completed under the CAL dated August 11, 2016. Identified deficiencies shall be entered into the corrective action program (CAP) for tracking corrective actions to completion.

D. Westinghouse shall implement improvements to reduce uranium carryover from the Calciner scrubbbers, and implement additional design changes to reduce U carryover from the Blue M oven filtration system.

Specifically:

1. For the calciner scrubbbers, within eighteen (18) months of issuance of the CO, an engineering evaluation of the calciner and calciner off-gas scrubber design and operation shall be completed to determine methods to reduce uranium carry-over into the S–1030 scrubber.

2. For the Blue M oven, within eighteen (18) months of issuance of the CO, an engineering evaluation of the Conversion Scrub and Blue M oven shall be completed to determine methods to improve the functionality of...
the Blue M oven in a wet environment and improve accessibility for inspection and maintenance activities.

3. Within three (3) years of issuance of the CO, improvements based on the engineering evaluations described above shall be implemented.

5. In response to the May 2016 event, Westinghouse implemented several modifications to the S–1030 scrubber system, as part of its overall corrective actions to preclude recurrence and enhance performance. These modifications were considered by the NRC, under the CAL, in support of a safety basis to authorize restart of conversion process equipment and the S–1030 scrubber system, as documented in the NRC’s letter to Westinghouse dated October 20, 2016 (ML16294A296).

The modifications included but were not limited to:

1. The plenums for the scrap cage Blue M oven hoods were equipped with a filter to capture at least 95% of the mass entrained in the air stream based on particle size distribution and the manufacturer’s published efficiency data.

2. Packing baskets were implemented to permit complete removal and inspection of the packed media and to maintain clearance between the packed media and the scrubber floor.

3. A feed and bleed system for the scrubber recirculating liquid was maintained at a minimum output flow of 0.5 gallons per minute. If feed and bleed is not available, a controlled shutdown of the scrubber would be initiated in accordance with plant procedures.

4. The scrubber was opened to remove the packed media baskets, to clean and inspect the inlet transition and scrubber body on a quarterly basis.

5. Weekly visual inspections of the scrubber inlet transition were to be conducted.

6. Within two (2) years of issuance of the CO, Westinghouse shall develop and implement additional methods to monitor system parameters that are early indicators of an abnormal accumulation in the S–1030 scrubber from a process upset that could challenge the accumulation rate and/or criticality safety mass limits. The methods will provide timely indications to enable the operators to take appropriate actions in accordance with approved procedures.

7. A member of senior Westinghouse leadership shall present training on lessons learned from the scrubber event at Fuel Cycle Information Exchange (an industry-wide forum), including NSC and criticality safety standards aspects.

8. Within eighteen (18) months of issuance of the CO, Westinghouse shall develop and implement a criticality safety basis/IROFS database to help maintain the proper flow down of the safety basis into implementing documents.

9. Within six (6) months of issuance of the CO, Westinghouse shall develop a method to reinforce positive NSC leadership behavior and monitor for effectiveness in the NSC monitoring panel. Westinghouse shall implement such method for three years, after which it may evaluate the need to continue this item.

10. Within three (3) months of issuance of the CO, Westinghouse shall develop and implement a new metric or periodic report that creates an aggregate picture of the health of the criticality safety program. This shall include items such as IROFS challenges, trends, audit and inspection finding status, violations, and health of management measures and be made available for inspection. Identified deficiencies shall be evaluated in accordance with the CAP.

11. Within nine (9) months, Westinghouse shall implement risk-informed standards for the preparation of procedures and data sheets informed by appropriate guidance in INPO 11–003, “Guideline for Excellence in Procedure and Work Instruction Use and Adherence.” This will consist of issuance of a procedure writers’ guide, procedure format template, and a procedure use and adherence standard.

12. The NRC agrees that issuance of this CO serves to close the CAL issued to Westinghouse on August 11, 2016. NRC acknowledges that Westinghouse has taken extensive actions to address items in the CAL including completing a root cause analysis (RCA), completing a review of criticality safety evaluations, performing inspections to validate system design and operating parameters, installing physical modifications to support the safety basis to improve safety performance, conducting an independent third party nuclear safety culture assessment, and completing several corrective actions designed to preclude recurrence.

NRC also acknowledges that Westinghouse has taken some actions to close post-restart CAL Items 1, 3, and 5, but are not yet complete. Therefore, post-restart CAL Items 1, 3, and 5, as modified below, are transferred to this CO. Upon completion of these items, Westinghouse will notify the NRC Region II Administrator.

a. CAL Item 1—Westinghouse shall implement the remaining corrective actions to prevent recurrence identified in their RCA.

b. CAL Item 3—Westinghouse shall conduct effectiveness reviews of corrective actions to prevent recurrence specified in their RCA.

c. CAL Item 5—Westinghouse shall evaluate the results of the independent third party nuclear safety culture assessment, and any identified deficiencies will be entered into the CAP to track to completion.

The NRC concludes that CAL post-restart items 2 and 4 are closed because these items will be sampled as part of the NRC’s inspection program.

The NRC concludes that CAL post-restart item 6 is closed because of the extensive corrective actions completed by Westinghouse to date.

13. Within three (3) months of completion of the terms of the CO, Westinghouse will provide the NRC with a letter discussing its basis for concluding that the CO has been satisfied.

14. In consideration of the commitments delineated herein, the NRC agrees to refrain from proposing a civil penalty or issuing a Notice of Violation for all four AVs identified in NRC Inspection Report 70–1151/2017–007 (EA–16–173).

15. The NRC and Westinghouse agree that the above elements will be incorporated into a CO.

16. This agreement is binding upon successors and assigns of Westinghouse.

On August 8, 2017, Westinghouse consented to issuance of this CO with the commitments, as described in Section V below. Westinghouse further agreed that this CO is to be effective upon issuance and that it has waived its right to a hearing.

IV

Because Westinghouse has taken corrective actions to address NRC concerns, as set forth in Section III above, and has agreed to take additional corrective actions as set forth in Section V below, the NRC has concluded that its concerns can be resolved through issuance of this CO.

I find that Westinghouse’s commitments as set forth in Section V are acceptable and necessary and conclude that with these commitments, the public health and safety are reasonably assured. In view of the foregoing, I have determined that public health and safety require that Westinghouse’s commitments be confirmed by this CO. Based on the
above and Westinghouse’s consent, this CO is effective upon issuance.

V

Accordingly, pursuant to Sections 104b., 161b., 161l., 161o., 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission’s regulations in 10 CFR 2.202 and 10 CFR part 70, it is hereby ordered, that License No. SNM-1107 is modified as follows:

1. In recognition of the corrective actions taken in response to the four violations, as discussed at the ADR, and in response to the Confirmatory Action Letter dated August 11, 2016 (ML16224B082), Westinghouse agrees to submit a written statement or explanation to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, with a copy to the Document Control Desk, Washington, DC 20555–0001, within 30 days of the date of the CO. This reply should include for each of the four violations: (1) The reason for the violation; (2) the corrective steps that have been taken to restore compliance; and (3) additional corrective actions and enhancements taken to preclude repetition.

2. Approximately two years (+/− 6 months) after issuance of the CO, Westinghouse shall conduct an additional NSC survey by the Westinghouse corporate nuclear safety culture organization or an experienced independent third party, consistent with the depth and scope of the NSC survey completed under the CAL dated August 11, 2011. Identified deficiencies shall be entered into the CAP for tracking corrective actions to completion.

3. Westinghouse shall implement improvements to reduce uranium carryover from the Calciners scrubbers, and implement additional design changes to reduce U carryover from the Blue M oven filtration system. Specifically:

   (1) For the calciners scrubbers, within eighteen (18) months of issuance of the CO, an engineering evaluation of the calciners and calciner off-gas scrubber design and operation shall be completed to determine methods to reduce uranium carry-over into the S–1030 scrubber.

   (2) For the Blue M oven, within eighteen (18) months of issuance of the CO, an engineering evaluation of the Conversion Scrap Cage Blue M oven shall be completed to determine methods to improve the functionality of the Blue M oven in a wet environment and improve accessibility for inspection and maintenance activities.

   (3) Within three (3) years of issuance of the CO, improvements based on the engineering evaluations described above shall be implemented.

4. Westinghouse shall notify the NRC within fifteen (15) working days prior to implementing changes to the modifications to the S–1030 scrubber system, as discussed below. This requirement ends once the Regional Administrator determines that the CO has been satisfied. These modifications were incorporated as corrective actions prior to the October 20, 2016, system restart authorization (ML16294A296) and support, in part, the safety basis for the S–1030 scrubber. Specifically, these modifications are:

   (1) The plenums for the scrap cage Blue M oven hoods shall be equipped with a filter to capture at least 95% of the mass entrained in the air stream based on particle size distribution and the manufacturer’s published efficiency data.

   (2) Packing baskets were implemented to permit complete removal and inspection of the packed media and to maintain clearance between the packed media and the scrubber floor.

   (3) A feed and bleed system for the scrubber recirculating liquid shall be maintained at a minimum output flow of 0.5 gallons per minute. If feed and bleed is not available, a controlled shutdown of the scrubber shall be initiated in accordance with plant procedures.

   (4) The scrubber shall be opened to remove the packed media baskets, to clean and inspect the inlet transition and scrubber body on a quarterly basis.

   (5) Westinghouse shall implement risk-informed standards for criticality safety mass limits. The criticality safety mass limits shall be re-evaluated in accordance with plant procedures.

5. Within two (2) years of issuance of the CO, Westinghouse shall develop and implement additional methods to monitor system parameters that are early indicators of an abnormal accumulation in the S–1030 scrubber from a process upset that could challenge the accumulation rate and/or criticality safety mass limits. The methods will provide timely indications to enable the operators to take appropriate actions in accordance with approved procedures.

6. Within eighteen (18) months of issuance of the CO, Westinghouse shall conduct effectiveness reviews of corrective actions to prevent recurrence identified in their RCA.

7. Within six (6) months of issuance of the CO, Westinghouse shall implement a method to reinforce positive NSC leadership behavior and monitor for effectiveness in the NSC monitoring panel. Westinghouse shall implement such method for three (3) years, after which it may evaluate the need to continue this item.

8. Within three (3) months of issuance of the CO, Westinghouse shall develop and implement a new metric or periodic report that creates an aggregate picture of the health of the criticality safety program. This shall include items such as IROFS challenges, trends, audit and inspection finding status, violations, and health of management measures and be made available for inspection.

9. Within nine (9) months of issuance of the CO, Westinghouse shall implement risk-informed standards for the preparation of procedures and data sheets informed by appropriate guidance in INPO 11–003, “Guideline for Excellence in Procedure and Work Instruction Use and Adherence.” This shall consist of issuance of a procedure writers’ guide, procedure format template, and a procedure use and adherence standard.

The NRC acknowledges that issuance of this CO serves to close the CAL issued to Westinghouse on August 11, 2016. NRC acknowledges that Westinghouse has taken extensive actions to address items in the CAL including completing an RCA, completing a review of criticality safety evaluations, performing inspections to validate system design and operating parameters, installing physical modifications to support the safety basis to improve safety performance, conducting an independent third party nuclear safety culture assessment, and completing several corrective actions designed to preclude recurrence.

The NRC also acknowledges that Westinghouse has taken some actions to close post-restart CAL items 1, 3, and 5, but are not yet complete. Therefore, post-restart CAL items 1, 3, and 5, as modified below, are transferred to this CO. Upon completion of these items, Westinghouse will notify the NRC Region II Administrator.

a. CAL Item 1—Westinghouse shall implement the remaining corrective actions to prevent recurrence identified in their RCA.

b. CAL Item 3—Westinghouse shall conduct effectiveness reviews of corrective actions to prevent recurrence specified in their RCA.

c. CAL Item 5—Westinghouse shall evaluate the results of the independent third party nuclear safety culture assessment, and any identified deficiencies will be entered into the CAP to track to completion.

This CO supersedes the CAL issued to Westinghouse on August 11, 2016. Post-restart CAL items 2 and 4 will be
sampled as part of the NRC's inspection program.

Post-restart CAL item 6 is closed because of the extensive corrective actions completed by Westinghouse to date.

11. Within three (3) months of completing implementation of the terms of the CO, Westinghouse will provide the NRC with a letter discussing its basis for concluding that the CO has been satisfied.

This agreement is binding upon successors and assigns of Westinghouse. Unless otherwise specified, all dates are from the date of issuance of the CO.

The Regional Administrator, NRC Region II, may relax or rescind, in writing, any of the above conditions upon a showing by Westinghouse of good cause.

VI

In accordance with 10 CFR 2.202 and 10 CFR 2.309, any person adversely affected by this CO, other than Westinghouse, may request a hearing within 30 calendar days of the date of issuance of this CO. Where good cause is shown, consideration will be given to extending the time to request a hearing. A request for extension of time must be made in writing to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and include a statement of good cause for the extension.

All documents filed in the NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139, August 28, 2007, as amended at 77 FR 46562, August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Detailed guidance on making electronic submissions may be found in the Guidance for Electronic Submissions to the NRC and on the NRC’s Web site at http://www.nrc.gov/site-help/e-submittals.html. Submissions should be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public Web site at http://www.nrc.gov/site-help/e-submittals.html.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission,
WASHINGTON, DC 20555–0001. Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland, 20852. Attention: Rulemaking and Adjudications Staff. Participants filing adjudicatory documents in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at https://adams.nrc.gov/ehd, unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click cancel when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

If a person (other than Westinghouse) requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this CO and shall address the criteria set forth in 10 CFR 2.309(d) and (f).

If a hearing is requested by a person whose interest is adversely affected, the Commission will issue an order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this CO should be sustained.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section V above shall be final 30 days from the date of this CO without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section V shall be final when the extension expires if a hearing request has not been received.

Dated at Atlanta, Georgia, this 9th day of August, 2017.

For the Nuclear Regulatory Commission.

Catherine Haney,
Regional Administrator.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–458; NRC–2017–0141]

Entergy Operations, Inc.; River Bend Station, Unit 1

AGENCY: Nuclear Regulatory Commission.

ACTION: License renewal application; opportunity to request a hearing and to petition for leave to intervene.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering an application for the renewal of operating license NPF–47, which authorizes Entergy Operations, Inc., to operate River Bend Station, Unit 1 (RBS). The renewed license would authorize the applicant to operate RBS for an additional 20 years beyond the period specified in the current license. The current operating license for RBS expires at midnight on August 29, 2025.

DATES: A request for a hearing or petition for leave to intervene must be filed by October 13, 2017.

ADDRESSES: Please refer to Docket ID NRC–2017–0141 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- Federal Rulemaking Web site: Go to http://www.regulations.gov and search for Docket ID NRC–2017–0141. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the FOR FURTHER INFORMATION CONTACT section of this document.

- NRC’s Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at http://www.nrc.gov/reading-rm/adams.html. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The License Renewal Application is available in ADAMS under Accession No. ML17153A282.

- NRC’s PDR: You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC’s staff has determined that Entergy Operations, Inc. has submitted sufficient information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, 54.45, and 51.53(c), to enable the staff to undertake a review of the application, and that the application is, therefore, acceptable for docketing. The current docket No., 50–458, for operating license No. NPF–47, will be retained.

The determination to accept the LRA for docketing does not constitute a determination that a renewed license should be issued, and does not preclude the NRC staff from requesting additional information as the review proceeds.

Before issuance of the requested renewed license, the NRC will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s rules and regulations. In accordance with 10 CFR 54.29, the NRC may issue a
