Introduction

The Agenda is a compilation of all rulemaking activities on which an agency has recently completed action or has proposed or is considering action. The Agenda reports rulemaking activities in three major categories: Completed, active, and long-term. Completed rulemaking activities are those that were completed since publication of an agency’s last Agenda; active rulemaking activities are those that an agency currently plans to have an Advance Notice of Proposed Rulemaking, a Proposed Rule, or a Final Rule issued within the next 12 months; and long-term rulemaking activities are rulemaking activities under development but for which an agency does not expect to have a regulatory action within the 12 months after publication of the current edition of the Unified Agenda.

We assign a “Regulation Identifier Number” (RIN) to a rulemaking activity when our Commission initiates a rulemaking and approves a rulemaking plan, or when the NRC staff begins work on a Commission delegated rulemaking that does not require a rulemaking plan. The Office of Management and Budget uses this number to track all relevant documents throughout the entire “lifecycle” of a particular rulemaking activity. We report all rulemaking activities in the Agenda that have been assigned a RIN and meet the definition for a completed, an active, or a long-term rulemaking activity.

The information contained in this Agenda is updated to reflect any action that has occurred on a rulemaking activity since publication of our last Agenda on December 23, 2016 (81 FR 94894). Specifically, the information in this Agenda has been updated through March 31, 2017. The NRC provides additional information on planned

rulemaking and petition for rulemaking activities, including priority and schedule, on our Web site at <https://www.nrc.gov/about-nrc/regulatory/rulemaking/rules-petitions.html#cpulist>.

The date for the next scheduled action under the heading “Timetable” is the date the next regulatory action for the rulemaking activity is scheduled to be published in the **Federal Register**. The date is considered tentative and is not binding on the Commission or its staff. The Agenda is intended to provide the public early notice and opportunity to participate in our rulemaking process. However, we may consider or act on any

rulemaking activity even though it is not included in the Agenda.

Section 610 Periodic Reviews Under the Regulatory Flexibility Act

Section 610 of the Regulatory Flexibility Act (RFA) requires agencies to conduct a review within 10 years of promulgation of those regulations that have or will have a *significant* economic impact on a *substantial* number of small entities. We undertake these reviews to decide whether the rules should be unchanged, amended, or withdrawn. At this time, we do not have any rules that have a *significant* economic impact on a *substantial* number of small entities;

therefore, we have not included any RFA Section 610 periodic reviews in this edition of the Agenda. A complete listing of our regulations that impact small entities and related Small Entity Compliance Guides are available from the NRC’s Web site at <http://www.nrc.gov/about-nrc/regulatory/rulemaking/flexibility-act/small-entities.html>.

Dated at Rockville, Maryland, this 31st day of March 2017.

For the Nuclear Regulatory Commission.
Cindy Bladey,
Chief, Rules, Announcements, and Directives Branch, Division of Administrative Services, Office of Administration.

Proposed Rule Stage

377. • Revision of Fee Schedules: Fee Recovery for FY 2018 [NRC–2017–0026]

Legal Authority: 31 U.S.C. 483; 42 U.S.C. 2201; 42 U.S.C. 2214; 42 U.S.C. 5841

Abstract: This rule would implement the Omnibus Budget Reconciliation Act of 1990 (OBRA–90), as amended, which requires the Nuclear Regulatory Commission to recover approximately 90 percent of its budget authority in a given fiscal year, less the amounts appropriated from the Waste Incidental to Reprocessing, generic homeland security activities, and Inspector General services for the Defense Nuclear Facilities Safety Board, through fees assessed to licensees. This rulemaking would amend the Commission’s fee schedules for licensing, inspection, and annual fees charged to its applicants and licensees. The licensing and inspection fees are established under 10 CFR part 170 and recover the Nuclear

Regulatory Commission’s cost of providing services to identifiable applicants and licensees. Examples of services provided by the Nuclear Regulatory Commission for which 10 CFR part 170 fees are assessed include license application reviews, license renewals, license amendment reviews, and inspections. The annual fees established under 10 CFR part 171 recover budgeted costs for generic (*e.g.*, research and rulemaking) and other regulatory activities not recovered under 10 CFR part 170 fees.
