SYSTEM MANAGER(S):

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:
42 U.S.C. 3543—Preventing fraud and abuse in Department of Housing and Urban Development Programs (enacted as part of the Housing and Community Development Act of 1987)—(a) Disclosure of social security account number. As a condition of initial or continuing eligibility for participation in any program of the Department of Housing and Urban Development involving loans, grants, interest or rental assistance of any kind, or mortgage or loan insurance, and to ensure that the level of benefits provided under such programs is proper, the Secretary of Housing and Urban Development may require that an applicant or participant (including members of the household of an applicant or participant) disclose his or her social security account number or employer identification number to the Secretary.

Section 184 of the Housing and Community Development Act of 1992 (Pub. L. 102–550, approved October 28, 1992), as amended by the Native American Housing Assistance and Self-Determination Act of 1996 (Pub. L. 104–330, approved October 26, 1996) and 2013 Consolidated and Further Continuing Appropriations Act (Pub. L. 113–6, approved March 26, 2013), established the Section 184 program to provide access to sources of private mortgage financing to Indian families, Indian housing authorities, and Indian tribes. Congress established this program in 1992 to facilitate homeownership and increase access to capital in Native American Communities. The Section 184 program addresses obstacles to mortgage financing on trust land and in other Indian and Alaska Native areas by giving HUD the authority to guarantee loans to eligible persons and entities to construct, acquire, refinance, or rehabilitate one- to four-family dwellings in these areas. ONAP–LOS is being developed to provide automated capabilities for the ONAP Office of Loan Guarantee. FR Doc. 2016–26331 Filed 10–31–16.

PURPOSE(S) OF THE SYSTEM:
ONAP–LOS will automate and expedite the processes required to originate a loan guarantee under the Section 184 Indian Home Loan Guarantee Program. ONAP–LOS will enable lender institutions to register new Section 184 loans, request reservations of funds, and submit completed loan case binders to HUD electronically to support the loan endorsement process. In addition, the ONAP–LOS system will include a lender registration and re-certification capability. ONAP–LOS will allow for increased data collection on borrowers, properties, and transactions. Once fully implemented, ONAP–LOS will integrate loan performance data collection and analysis, loss mitigation efforts on delinquent loans, and default loan tracking. The system will enable the expansion of the credit model to include more econometric-, borrower- and transaction-level analysis to better model the program and overall risk. It will provide for better case tracking, reporting and program management, and analysis.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:
The ONAP–LOS system, in support of the Section 184 Indian Home Loan Guarantee Program, will capture and maintain data across the following major information categories:

a. Section 184 Direct Guarantee Lenders describe the lending institutions that register the loans, log property appraisals, reserve funds for obligation, and request endorsements of loans.

b. Native American and Alaskan Native Borrowers and any Co-Borrowers who have applied for and/or obtained a loan guarantee certificate under HUD’s Section 184 Indian Home Loan Guarantee Program.

c. Property and Appraisals associated with the Section 184 loans to be endorsed.

d. Section 184 Loans.

These information categories, particularly “Primary Borrowers and Co-Borrowers” will include personally identifiable information (PII).

For ONAP–LOS, a unique case number is assigned to each Section 184 loan and is used to identify and retrieve the loan information including the borrower/co-borrower SSN (see section above, “AUTHORITY FOR MAINTENANCE OF THE SYSTEM”). To secure this information, ONAP–LOS data is transmitted electronically and is protected by the following electronic security systems: Password, encryption, user ID, authorization and authentication processes, Transport Layer Security (TLS), firewall, Public Key Infrastructure, and additional controls for internal users including Personal Identity Verification (PIV) Cards and Virtual Private Network (VPN).

CATEGORIES OF RECORDS IN THE SYSTEM:
The following are the categories of information that is collected and stored by ONAP–LOS. The information is used to verify factors necessary to ensure accurate and complete endorsement review and approval of Section 184 loans. A detailed data dictionary has been developed for ONAP–LOS and is available upon request.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:**

The records collected and contained in the ONAP–LOS system will not be shared outside the HUD firewall during the routine use of the system. However, in addition to those disclosures generally permitted under 5 U.S.C. Section 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside HUD as a routine use pursuant to 5 U.S.C. 552a(b)(3) for the following exceptions:

1. To appropriate agencies, entities, and persons to the extent such disclosures are compatible with the purpose for which the records in this system were collected, as set forth by Appendix I—HUD’s Routine Use Inventory Notice published in the *Federal Register*.

2. To appropriate agencies, entities, and persons when:
   a. HUD suspects or has confirmed that the security or confidentiality of information in a system of records has been compromised;
   b. HUD has determined that as a result of the suspected, or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of systems or programs (whether maintained by HUD or another agency or entity) that rely upon the compromised information;
   c. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with HUD’s efforts to respond to the suspected or confirmed compromise and prevent, remedy or remedy such harm for purposes of facilitating responses and remediation efforts in the event of a data breach.

3. To the National Archives and Records Administration (NARA) or to the General Services Administration (GSA) for records having sufficient historical or other value to warrant continued preservation by the United States Government, or for inspection under Title 44 U.S.C. 2904 and 2906.

4. To another Federal agency or Federal entity, HUD will follow the Department’s standard procedures in determining and then disseminating information from ONAP–LOS that is reasonably necessary to assist the recipient agency or entity in:
   a. Responding to a suspected or confirmed breach or, (b) Preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

5. To a congressional office from the record of an individual, in response to an inquiry from that congressional office made at the request of that individual.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

ONAP–LOS is adopting the Single-Family Home Mortgage Insurance Program records disposition schedule, which covers electronic management and references to Appendix 20 of the HUD Records Disposition Schedules Handbook (2225.6 Rev-1).

Currently, HUD prints and builds the loan case binder which comprises all documentation associated with the loan. Each loan case binder is shipped and stored to a record storage contractors provide named Iron Mountain for the life of the loan (30 years, plus an additional 6 years, as is required in Schedule 20). With ONAP–LOS in production, the records management capabilities will retain/archive the documentation per this required period.

Data stored electronically is protected by the following electronic security: Password, encryption, user ID, authorization and authentication processes, firewall, and TLS.

**POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:**

HUD retrieves system information by the individual’s name, last four digits of his or her Social Security Number, and, if known, the system generated case identification number. Lender information would be retrieved by the Lender’s legal name and Taxpayer Identification Number (TIN) and then similar individual information.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

ONAP–LOS maintains records as needed under the NARA approved records schedule HUD Records Disposition Schedules Handbook (2225.6 Rev-1), Appendix 20. The loan case binder will be maintained in ONAP–LOS for the life of the loan (30 years, plus an additional 6 years, as is required in Schedule 20).

**ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:**

ONAP–LOS has implemented a set of security controls to minimize the risk, including:

- Passwords and Social Security Numbers are masked on the user input forms.
- Strong access controls that are implemented in accordance with the principles of separations of duties and least privilege. External users only have access to the information that they have entered. The exception is some privileged users at external organizations that have access to all information their organization has entered.
- The application logs the user out after 10 minutes of inactivity, hiding previously visible information.
- Encrypting sensitive information in the ONAP–LOS database.
- Data is stored internally, protected by a firewall and physical security controls provided by Azure.
