**SUPPLEMENTARY INFORMATION:**

*Title; Associated Form; and OMB  
Number:* Fast Track Generic Clearance  
for the Collection of Qualitative  
Feedback on Agency Service Delivery—  
the Interactive Customer Evaluation  
(ICE) System; 0704-0420.

*Needs and Uses:* The proposed  
information collection activity provides  
a means to garner qualitative customer  
and stakeholder feedback in an efficient,  
timely manner, in accordance with the  
Administration's commitment to  
improving service delivery. By  
qualitative feedback we mean  
information that provides useful  
insights on perceptions and opinions,  
but are not statistical surveys that yield  
quantitative results that can be  
generalized to the population of study.  
This feedback will provide insights into  
customer or stakeholder perceptions,  
experiences and expectations, provide  
an early warning of issues with service,  
or focus attention on areas where  
communication, training or changes in  
operations might improve delivery of  
products or services. These collections  
will allow for ongoing, collaborative and  
actionable communications between the  
Agency and its customers and  
stakeholders. It will also allow feedback  
to contribute directly to the  
improvement of program management.

The solicitation of feedback will target  
areas such as: Timeliness,  
appropriateness, accuracy of  
information, courtesy, efficiency of  
service delivery, and resolution of  
issues with service delivery. Responses  
will be assessed to plan and inform  
efforts to improve or maintain the  
quality of service offered to the public.  
If this information is not collected, vital  
feedback from customers and  
stakeholders on the Agency's services  
will be unavailable.

The Agency will only submit a  
collection for approval under this  
generic clearance if it meets the  
following conditions:

- The collections are voluntary;
- The collections are low-burden for  
respondents (based on considerations of  
total burden hours, total number of

respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;

- The collections are non-controversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency;
- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

*Current Actions:* Processing Revision as Generic.

*Type of Review:* Revision.

*Affected Public:* Individuals and Households.

*Estimated Number of Annual Respondents:* 152,622.

*Average Expected Annual Number of Activities:* 16,970.

Below we provide projected average estimates for the next three years:

*Average Number of Respondents per Activity:* 9.

*Responses per Respondent:* 1.

*Annual Responses:* 152,622.

*Average Burden per Response:* 3 minutes.

*Annual Burden Hours:* 7,631.

*Frequency:* On occasion.

This system was developed to improve the timeliness, quality, and quantity of feedback given by customers to DoD service providers. Customers are able to access an appropriate comment card in ICE by going directly to the ICE Web site and search for the service provider or through a link provided by a service provider. They are able to quickly fill out a short online questionnaire related to customer satisfaction. Customer responses are sent to the appropriate facility and/or service manager. The data resides in the ICE system. This timely feedback allows service providers to quickly improve the quality of their services, thereby enhancing the quality of life for all members of the defense community. It also gives community commanders, deputy commanders in chiefs, and others an opportunity to review, assess, and improve current service quality.

Dated: August 28, 2017.
