Abstract: The NO_x Budget Trading Program was a market-based cap and trade program created to reduce emissions of nitrogen oxides (NO_x) from power plants and other large combustion sources in the eastern United States. The NO_x Budget Trading Program was established as an optional implementation mechanism for the NO_x SIP Call and was designed to reduce NO_x emissions during the warm summer months, referred to as the ozone season, when ground-level ozone concentrations are highest. In 2009, the program was replaced by an ozone-season NO_x trading program under the Clean Air Interstate Rule (CAIR), which has in turn been replaced by ozone-season NO_x trading programs under the Cross-State Air Pollution Rule (CSAPR). Although the NO_x Budget Trading Program was replaced after the 2008 compliance season, this information collection is being renewed because some sources in certain states are still required to monitor and report emissions data to EPA in accordance with the NO_x SIP Call and are not covered by the CSAPR trading programs, so we will account for their information collection burden. All data received by EPA will be treated as public information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are those which formerly participated in the NO_x Budget Trading Program to Reduce the Regional Transport of Ozone and which continue to have reporting obligations in accordance with the NO_x SIP Call that are not duplicated under other rules.

Respondent's obligation to respond: Mandatory (Sections 110(a) and 301(a) of the Clean Air Act).

Estimated number of respondents: EPA estimates that there are 460 former NO_x Budget Trading Program units that will continue to conduct monitoring in accordance with Part 75 solely under the NO_x SIP Call.

Frequency of response: Yearly, quarterly, occasionally.

Total estimated burden: 189,261 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$27,787,807 (per year), includes \$12,227,457 annualized capital or operation & maintenance costs.

Changes in the Estimates: The increase in total burden hours is due to the increased number of units whose information collection burden associated with reporting of ozone-season NO_x mass emissions is now reported under this program instead of other programs. The information collection burden for reporting ozone season NO_x mass emissions data for all sources that were formerly subject to the CAIR NO_x Ozone Season Trading Program and are not covered by CSAPR is now covered under this ICR. Previously, the burden for reporting ozone season NO_x mass emissions data for some of these sources was covered under the CAIR Program ICR (EPA ICR No. 2152.05, OMB Control No. 2060-0570).
