Agenda

The Groundfish Committee plans to discuss Framework Adjustment 57/ Specifications and Management Measures. They will receive a report from the Transboundary Management and Guidance Committee (TMGC) on US/CA stocks—Georges Bank yellowtail flounder, Eastern GB (EGB) cod, and EGB haddock. Receive a report from the Groundfish Plan Development Team (PDT) on adjusting: common pool trimester total allowable catches (TACs), Atlantic halibut accountability measures (AMs), and Windowpane flounder AMs for large mesh/non-groundfish fisheries (*e.g.*, scup and summer flounder trawl fisheries). They will also discuss draft alternatives and make recommendations to the Council. The committee will be discussing Groundfish Amendment 23 Groundfish Monitoring Amendment. They will review a draft outline prepared by the PDT of the likely range of alternatives and make recommendations to the Council. The committee will hold initial discussion of possible groundfish priorities for 2018 and develop recommendations to the Council. The committee will discuss regulatory streamlining in response to recent Executive Orders. Several recent Executive Orders have been issued about streamlining current regulations, and NOAA is seeking public input on the efficiency and effectiveness of current regulations and whether they can be improved. They plan to discuss whether there are any regulations in the Northeast Multispecies fishery management plan that could be eliminated, improved, or streamlined. Other business will be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Alaska Region Scale and Catch Weighing Requirements.

OMB Control Number: 0648-0330.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents:

Average Hours per Response:

Burden Hours:

Needs and Uses: Scale and catch weighing requirements address performance standards designed to ensure that all catch delivered to the processor is accurately weighed and accounted for. Scale and catch-weighing monitoring is required for Western Alaska Community Development Quota Program (CDQ) catcher/processors (C/Ps), American Fisheries Act (AFA) C/Ps, AFA motherships, AFA shoreside processors and stationary floating processors, Central Gulf of Alaska Rockfish Program trawl C/Ps, non-AFA trawl C/Ps participating in Bering Sea and Aleutian Islands (BSAI) trawl fisheries, and longline C/Ps participating in BSAI Pacific cod fisheries.

National Marine Fisheries Service (NMFS) has identified three primary objectives for monitoring catch. First, monitoring must ensure independent verification of catch weight, species composition, and location data for every delivery by a catcher vessel or every pot by a C/P. Second, all catch must be weighed accurately using NMFS-

approved scales to determine the weight of total catch. Third, the system must provide a verifiable record of the weight of each delivery. To effectively manage fisheries, NMFS must have data that will provide reliable independent estimates of the total catch.

Affected Public: Business or other for-profit organizations.

Frequency: Annually, and daily for fishing period.

Respondent's Obligation: Required to obtain or retain benefit.
