#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The President's Proclamation on Steel Safeguards mandated that the Departments of Commerce and Treasury institute an import licensing system to facilitate the monitoring of certain steel imports in 2002.

Regulations were established that implemented the Steel Import Monitoring and Analysis (SIMA) System and expanded on the licensing system in 2006 for steel that was part of those safeguards. The import license information is necessary to assess import trends of steel products.

In order to effectively monitor steel imports, Commerce must collect and

provide timely aggregated summaries about the imports. The Steel Import License is the tool used to collect the necessary information. The Census Bureau currently collects import data and disseminates aggregate information about steel imports. However, the time required to collect, process, and disseminate this information through Census can take up to 90 days after importation of the product, giving interested parties and the public far less time to respond to injurious sales.

##### II. Method of Collection

The license application can be submitted electronically via the Commerce Web site (<http://enforcement.trade.gov/steel/license/>) or completed electronically and emailed or faxed to the Department.
