**SUPPLEMENTARY INFORMATION:** The Wildlife Services (WS) program in the Animal and Plant Health Inspection Service (APHIS) cooperates with Federal agencies, State and local governments, and private individuals to research and implement the best methods of managing conflicts between wildlife and human health and safety, agriculture, property, and natural resources. Wildlife-borne diseases that can affect domestic animals and humans are among the types of conflicts that APHIS-WS addresses. Wildlife is the dominant reservoir of rabies in the United States.

On July 17, 2017, we published in the **Federal Register** (82 FR 32676-32677, Docket No. APHIS-2017-0046) a notice<sup>1</sup> in which we announced the availability, for public review and comment, of a supplement to an environmental assessment (EA) that examined the potential environmental impacts associated with the proposed field trial to test the safety and efficacy of an experimental oral rabies vaccine (ORV) for wildlife in New Hampshire, New York, Ohio, Vermont, and West Virginia. In addition, the supplement analyzed the geographic shift of the ORV zone in Ohio and the addition of 17 counties in West Virginia so that baits can be applied to the western edge of the ORV zone in West Virginia.

We solicited comments on the EA for 30 days ending August 16, 2017. We did not receive any comments.

In this document, we are advising the public of our finding of no significant impact (FONSI) relative to the ORV field trial in New Hampshire, New York, Ohio, Vermont, and West Virginia. The finding, which is based on the EA and the 2013, 2015, and 2017 supplements to the EA, reflects our determination that the distribution of this experimental wildlife rabies vaccine will not have a significant impact on the quality of the human environment.

The 2017 supplement to the EA and the FONSI may be viewed on the APHIS

Web site at <http://www.aphis.usda.gov/wildlifedamage/nepa> and on the [Regulations.gov](http://www.regulations.gov) Web site (see footnote 1). Copies of the 2017 supplement to the EA and the FONSI are also available for public inspection at USDA, Room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect copies are requested to call ahead on (202) 799-7039 to facilitate entry into the reading room. In addition, copies may be obtained as described under **FOR FURTHER INFORMATION CONTACT**.

The 2017 supplement to the EA and the FONSI have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 6th day of September 2017.

*Type of Request:* Revision to and extension of approval of an information collection.

*Abstract:* The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States.

Under the Honeybee Act (7 U.S.C. 281-286), the Secretary is authorized to prohibit or restrict the importation of honeybees and honeybee semen to prevent the introduction into the United States of diseases and parasites harmful to honeybees and of undesirable species such as the African honey bee. This authority has been delegated to the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture.

The establishment of certain bee diseases, parasites, or undesirable species and subspecies of honeybees in

the United States could cause substantial reductions in pollination by bees. These reductions could cause serious damage to crops and other plants and result in substantial financial losses to American agriculture.

Regulations for the importation of honeybees and honeybee semen and regulations to prevent the introduction of exotic bee diseases and parasites through the importation of bees other than honeybees, certain beekeeping products, and used beekeeping equipment are contained in 7 CFR part 322, "Bees, Beekeeping Byproducts, and Beekeeping Equipment." These regulations require the use of certain information collection activities, including an application for a permit, request for risk assessment, request for facility approval, written agreement to permit conditions, emergency action notification, appealing the denial of permit applications or revocation of permits, interstate transit documentation, packaging and labeling, recordkeeping for containment facilities, notices of arrival for shipments from approved regions, transit shipments, port of entry inspections, and notification of escaped organisms.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 0.24 hours per response.

*Respondents:* Importers, exporters, and shippers of bees and related articles; foreign governments; and containment facilities.

*Estimated annual number of respondents:* 18.

*Estimated annual number of responses per respondent:* 12.

*Estimated annual number of responses:* 210.

*Estimated total annual burden on respondents:* 50 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
