Section 90.176 requires each Private Land Mobile frequency coordinator to provide, within one business day, a listing of their frequency recommendations to all other frequency coordinators in their respective pool, and if requested, an engineering analysis.

Any method can be used to ensure this compliance with the "one business day requirement" and must provide, at a minimum, the name of the applicant; frequency or frequencies recommended; antenna locations and heights; and effective radiated power; the type(s) of emissions; the description of the service area; and the date and time of the recommendation. If a conflict in recommendations arises, the effected coordinators are jointly responsible for taking action to resolve the conflict, up to and including notifying the Commission that an application may have to be returned.

This requirement seeks to avoid situations where harmful interference is created because two or more coordinators recommend the same frequency in the same area at approximately the same time to different applicants.

Federal Communications Commission.
