SUPPLEMENTARY INFORMATION:

Agenda

The Habitat Committee will be briefed on offshore wind projects in various

stages of planning and development. This agenda item will include presentations from various companies as well as BOEM staff, and time for questions and discussion. The committee plans to discuss 2018 Council priorities related to habitat and recommend specific priorities to the Council. They will also review recent Plan Development Team (PDT) activity related to the Deep-Sea Coral Amendment, with a focus on development and analysis of broad zone Option 7 as discussed at the June 2017 Council meeting. Provide guidance for additional work. The committee will review recent PDT activity related to the Clam Dredge Framework. Provide guidance for development of management alternatives using updated habitat and clam survey data. They also plan to discuss if there are any habitat-related fishery regulations that could be eliminated, improved, or streamlined. Several recent Executive Orders have been issued about streamlining current regulations, and NOAA is seeking public input on the efficiency and effectiveness of current regulations and whether they can be improved. Other business may be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

SUPPLEMENTARY INFORMATION:

I. Abstract

In February 2012, the Middle Class Tax Relief and Job Creation Act of 2012 (Act) was enacted.¹ The Act meets a long-standing national priority and infrastructure need to create a single, interoperable, nationwide public safety broadband network (NPSBN) that allows law enforcement officers, fire fighters, emergency medical service professionals, and other public safety officials to effectively communicate with each other across agencies and jurisdictions. Public safety responders have long been hindered in their ability to respond in a crisis situation because

of incompatible communications networks and often outdated communications equipment. Therefore, the design and deployment of this NPSBN established by the Act is critical to provide emergency responders the ability to communicate on a secure, reliable, and dedicated interoperable network during emergencies and to use technology to improve response time, keep communities safe, and save lives.

The Act established the First Responder Network Authority (FirstNet) as an independent authority within the National Telecommunications and Information Administration (NTIA) and authorized it to take all actions necessary to ensure the design, construction, and operation of a nationwide NPSBN, based on a single, national network architecture.² FirstNet's responsibilities are, at a minimum, to ensure nationwide standards for the use of and access to the network; issue open, transparent, and competitive requests for proposals (RFPs) to build, operate, and maintain the network; encourage these RFPs to leverage, to the maximum extent economically desirable, existing commercial wireless infrastructure to speed deployment of the network; and oversee contracts with non-federal entities to build, operate, and maintain the network.³

The Act also charged NTIA with establishing a grant program, the State and Local Implementation Grant Program (SLIGP), to assist state, regional, tribal, and local jurisdictions with identifying, planning, and implementing the most efficient and effective means to use and integrate the infrastructure, equipment, and other architecture associated with the NPSBN to satisfy the wireless broadband and data services needs of their jurisdictions.⁴ NTIA awarded an initial \$116.5 million in grant funds to 54 state and territorial recipients between July 2013 and June 2014.

The Act's framework contemplates that FirstNet closely coordinates its activities with state, regional, tribal, and local governments and imposed a statutory requirement that FirstNet consult with these entities as it takes all actions necessary to build, deploy, and operate the NPSBN.⁵ Specifically, the Act requires FirstNet to consult with state, regional, tribal, and local governments about the distribution and expenditure of any amounts required to carry out its responsibilities to plan,
