

34°27' N. lat., blue and deacon rockfishes off Washington, and cabezon off Washington. Some of these data-limited OFLs may be reviewed and resolved by the SSC at the September 11–18, 2017 meeting in Boise, Idaho. If not, then the full suite of OFLs listed above will be reviewed by the SSC Groundfish Subcommittee at this September 28 webinar meeting. The SSC Groundfish Subcommittee will also review additional model runs from the 2017 assessment of Pacific ocean perch (POP) and may recommend a new assessment of POP as best scientific information available. Additionally, the SSC Groundfish Subcommittee will review a paper addressing conditions placed on the west coast bottom trawl groundfish fishery for shorttraker rockfish, silvergray rockfish, and California skate by the Marine Stewardship Council.

No management actions will be decided by the SSC's Groundfish Subcommittee. The SSC Groundfish Subcommittee members' role will be development of recommendations and reports for consideration by the SSC and Pacific Council at the November meeting in Costa Mesa, California.

Although nonemergency issues not contained in the meeting agendas may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent of the SSC Groundfish Subcommittee to take final action to address the emergency.
