This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2017–0063]

Addition of Uganda to the List of Regions Affected by Highly Pathogenic Avian Influenza

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that we are adding Uganda to the list of regions that the Animal and Plant Health Inspection Service considers to be affected by highly pathogenic avian influenza (HPAI). This action follows our imposition of HPAI-related restrictions on avian commodities originating from or transiting Uganda as a result of the confirmation of HPAI in Uganda.

DATES: Uganda was added to the list of regions under temporary restrictions on January 14, 2017. Uganda is added to the list of regions considered to be affected by HPAI as of September 21, 2017.

FOR FURTHER INFORMATION CONTACT: Dr. Rebecca Gordon, Import Risk Analyst, National Import Export Services, 920 Main Campus Drive, Suite 200, Raleigh, North Carolina, 27606; phone (919) 855–7741; rebecca.k.gordon@aphis.usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of certain animals and animal products into the United States to prevent the introduction of various animal diseases, including Newcastle disease and highly pathogenic avian influenza (HPAI). The regulations prohibit or restrict the importation of live poultry, poultry meat, and other poultry products from regions where these diseases are considered to exist.

Section 94.6 contains requirements governing the importation into the United States of carcasses, meat, parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, or other birds from regions of the world where HPAI exists or is reasonably believed to exist. HPAI is an extremely infectious and potentially fatal form of avian influenza in birds and poultry that, once established, can spread rapidly from flock to flock. A list of regions that the Animal and Plant Health Inspection Service (APHIS) considers affected with HPAI of any subtype is maintained on the APHIS Web site at https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/ct_animal_disease_status.

APHIS receives notice of HPAI outbreaks from veterinary officials of the exporting country, from the World Organization for Animal Health (OIE), or from other sources the Administrator determines to be reliable. On January 15, 2017, the veterinary authorities of Uganda reported to the OIE the confirmation on January 14, 2017, of HPAI H5 in domestic ducks and chickens in Bukakata (Masaka District). The report indicated 30,000 domestic birds were susceptible. The OIE followup report dated January 27, 2017, confirmed the HPAI subtype H5N8.

In response to that outbreak, APHIS placed restrictions on the importation of poultry, commercial birds, other types of birds (research, performing), rafites, any avian hatching eggs, unprocessed avian products and byproducts, and certain fresh poultry products from Uganda to mitigate risk of HPAI introduction into the United States. Those restrictions went into effect on January 14, 2017. With the publication of this notice, we are adding Uganda to the list of regions APHIS considers affected with HPAI of any subtype.

Done in Washington, DC, this 15th day of September 2017.

Jere L. Dick,

Acting Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS–2017–0053]

Availability of an Environmental Assessment and Finding of No Significant Impact for a Biological Control Agent for Swallow-Worts

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that an environmental assessment and finding of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the release of a leaf-feeding moth, Hypena opulenta, for the biological control of swallow-worts (Vincetoxicum nigrum and Vincetoxicum rossicum). Based on its finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

FOR FURTHER INFORMATION CONTACT: Dr. Colin D. Stewart, Assistant Director, Pests, Pathogens, and Biocontrol Permits, Permitting and Compliance Coordination, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737–1231; (301) 851–2327, email: Colin.Stewart@aphis.usda.gov.

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) is proposing to issue permits for the release of a leaf-feeding moth, Hypena opulenta, into the continental United States for use as a biological control agent to reduce the severity of swallow-wort (Vincetoxicum nigrum and Vincetoxicum rossicum) infestations.

On July 13, 2017, we published in the Federal Register (82 FR 32318, Docket No. APHIS–2017–0053) a notice 1 in which we announced the availability, for public review and comment, of an environmental assessment (EA) that examined the potential environmental impacts associated with the proposed release of the biological control agent into the continental United States.

1 To view the notice, EA, FONSI, and the comments we received, go to http://www.regulations.gov/#/docketDetail;D=APHIS-2017–0053.
We solicited comments on the EA for 30 days ending August 14, 2017. We received 28 comments by that date. With one exception, the comments supported the proposed release.

In this document, we are advising the public of our finding of no significant impact (FONSI) regarding the release of Hypena opulenta into the continental United States for use as a biological control agent to reduce the severity of swallow-wort infestations. The finding, which is based on the EA, reflects our determination that release of this biological control agent will not have a significant impact on the quality of the human environment. Written responses to comments we received on the EA can be found in appendix 4 of the EA.

The EA and FONSI may be viewed on the Regulations.gov Web site (see footnote 1). Copies of the EA and FONSI are also available for public inspection in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming. In addition, copies may be obtained by calling or writing to the individual listed under FOR FURTHER INFORMATION CONTACT.

The EA and FONSI have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 et seq.), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS’ NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 15th day of September 2017.

Jere L. Dick,
Acting Administrator, Animal and Plant
Health Inspection Service.

International Sanitary and
Phytosanitary Standard-Setting
Activities

AGENCY: Animal and Plant Health
Inspection Service, USDA.

ACTION: Notice and request for
comments.

SUMMARY: In accordance with legislation
implementing the results of the Uruguay Round of negotiations under the General Agreement on Tariffs and Trade, we are informing the public of the international standard-setting activities of the World Organization for Animal Health, the Secretariat of the International Plant Protection Convention, and the North American Plant Protection Organization, and we are soliciting public comment on the standards to be considered.

ADDRESSES: You may submit comments
by either of the following methods:
• Federal eRulemaking Portal: Go to http://www.regulations.gov/
#docketDetail;D=APHIS-2017-0059.
• Postal Mail/Commercial Delivery:
Send your comment to Docket No.

SUPPLEMENTARY INFORMATION:

Background

The World Trade Organization (WTO) was established as the common international institutional framework for governing trade relations among its members in matters related to the Uruguay Round Agreements. The WTO is the successor organization to the General Agreement on Tariffs and Trade. U.S. membership in the WTO was approved by Congress when it enacted the Uruguay Round Agreements Act (Pub. L. 103–465), which was signed into law on December 8, 1994. The WTO Agreements, which established the WTO, entered into force with respect to the United States on January 1, 1995. The Uruguay Round Agreements Act amended Title IV of the Trade Agreements Act of 1979 (19 U.S.C. 2531 et seq.). Section 491 of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2578), requires the President to designate an agency to be responsible for informing the public of the sanitary and phytosanitary (SPS) standard-setting activities of each international standard-setting organization. The designated agency must inform the public by publishing an annual notice in the Federal Register that provides the following information: (1) The SPS standards under consideration or planned for consideration by the international standard-setting organization; and (2) for each SPS standard specified, a description of the consideration or planned consideration of that standard, a statement of whether the United States is participating or plans to participate in the consideration of that standard, the agenda for U.S. participation, if any, and the agency responsible for representing the United States with respect to that standard.

“International standard” is defined in 19 U.S.C. 2578b as any standard, guideline, or recommendation: (1) Adopted by the Codex Alimentarius Commission (Codex) regarding food
safety; (2) developed under the auspices of the World Organization for Animal Health (OIE, formerly known as the Office International des Epizooties) regarding animal health and welfare and zoonoses; (3) developed under the auspices of the Secretariat of the International Plant Protection Convention (IPPC) and the North American Plant Protection Organization (NAPPO) regarding plant health; or (4)
