

environmental issues. The primary issues raised by the commentors are safety, public health, environmental justice, and climate change.

Existing groundwater contamination has also been identified as a potential issue at National Grid's LNG storage facility site. National Grid has submitted the necessary information to the Rhode Island Department of Environmental Management (RIDEM), and RIDEM has initiated its review of National Grid's Short Term Response Action Plan for the proposed Project in accordance with its Remediation Regulations. As a result, we are prepared to move forward with the environmental review of the proposed Project.

The U.S. Department of Transportation, the Rhode Island Coastal Resources Management Council, and RIDEM are cooperating agencies in the preparation of the EA.
