

comments received on the 2008 Draft EIS, FAA determined there were significant new circumstances or information relevant to environmental concerns and bearing on the Proposed Project or its impacts. Consistent with Title 40 CFR 1501.9, FAA decided to prepare a Revised Draft Environmental Impact Statement (RDEIS).

On September 27, 2011, the FAA received a letter from the City of Mesquite, asking the FAA to suspend any additional work on the EIS for the proposed Replacement GA Airport EIS. The City of Mesquite explained the postponement was based on local economic conditions and other local fiscal and budgetary constraints.

On November 14, 2011, FAA published a notice of Suspension of the EIS in the **Federal Register** (76 FR 70530). In 2014, the FAA provided a grant of funds to the City of Mesquite to install weather reporting equipment at the existing Mesquite Municipal Airport. In 2015, FAA provided a grant of funds to the City of Mesquite to update its Airport Master Plan. The City completed its Master Plan in the June 2017. The City did not include a replacement airport proposal in its 5-year Airport Capital Improvement Program provided to the FAA.

The Mesquite Lands Act of 1988, as amended (Pub. L. 99-549) provided the City with the opportunity to select a specified number of acres of federal land managed by the Bureau of Land Management to build a replacement airport on the Mormon Mesa. Since Public Law 99-549 expired, the federal land on the Mormon Mesa for the replacement airport is no longer available. The original purpose and need to change the land use of the existing airport to residential land use and replace the airport no longer exists. There is no demonstrated aeronautical need for the replacement airport and the information in the 2008 Draft EIS is also no longer valid. Thus, FAA is terminating this EIS.

Issued in Hawthorne, California, on September 19, 2017.

Mark A. McClardy,

Director, Office of Airports, Western-Pacific Region, AWP-600.
