II. Action Description

The United States has initiated a civil enforcement action alleging that NGL Crude Logistics, LLC (f/k/a Gavilon, LLC) and Western Dubuque Biodiesel, LLC violated Section 211(o) of the Clean Air Act and the Renewable Fuel Standard regulations issued thereunder in connection with the sale and repurchase of biodiesel and RINs in calendar year 2011. The United States settled its claims against Western Dubuque Biodiesel, LLC, and the United States District Court for the Northern District of Iowa granted the motion to enter the amended consent decree on April 11, 2017. The United States’ claims against NGL Crude Logistics, LLC (f/k/a Gavilon, LLC) are still pending. Notice is being provided, pursuant to 40 CFR 2.209(d), to inform affected businesses that EPA intends to transmit certain information, which has been submitted by renewable fuel producers, RIN generators, third party engineers, obligated parties, and RIN owners that is claimed to be, or has been determined to be, CBI, to NGL Crude

Logistics, LLC (f/k/a Gavilon, LLC) in this enforcement action. Interested third parties may find the Protective Order in the docket for the NGL Litigation, 2:16–cv–1038–LRR, ECF Document No. 68 (N.D. Iowa). The Protective Order governs the distribution of CBI, limits its use to the NGL Litigation, and provides for its return or destruction at the conclusion of the litigation. It also includes a provision that interested third parties

may seek additional protections for their CBI. In accordance with 40 CFR 2.209(c–(d)), DOJ must disclose such information to the extent required to comply with the discovery obligations of the United States in the NGL Litigation, including its obligations under the Protective Order.

At that time, the EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Gasoline combustion results in the formation of engine deposits. The accumulation of deposits, particularly in the orifices of fuel injectors and on intake valves, typically results in increased emissions and reduced engine performance. As fuel injectors replaced carburetors in the 1980's, a number of vehicle manufacturers experienced problems with deposit formation. Detergent additives, which had been available for years to control deposits in carbureted vehicles, were improved to accommodate the new technology. However, their use was voluntary and there were no regulatory standards by which to gauge their effectiveness. Congress recognized the importance of effective detergent additives in minimizing vehicle emissions, and added Section 211(1) in the Clean Air Act Amendments of 1990. It required gasoline to contain detergent additives, effective January 1, 1995, and provided the Environmental Protection Agency (EPA) with the authority to establish specifications for such additives. The regulations at 40 CFR 80—Subpart G implemented certification requirements for detergents and imposed a variety of recordkeeping and reporting requirements for certain parties involved with detergents, gasoline, or post-refinery component (any gasoline blending stock or any oxygenate that is blended with gasoline subsequent to the gasoline refining process (PRC)). All gasolines must contain certified detergents, with the exception of research, racing, and aviation gasolines.

The EPA maintains a list of certified gasoline detergents at <https://www3.epa.gov/otaq/fuels1/ffars/web-detrq.htm>. As of March 2014, there were 374 certified detergents and 17 detergent manufacturers. Most of the certification activity occurred during the early years of the program. In 2012, 12

detergents were certified. In 2013, only 3 new detergents were certified.

There are approximately 250 refiners and importers of gasoline, 1,350 blenders of detergent into gasoline or PRC, 8,000 carriers of gasoline or PRC, 200,000 gasoline retail outlets, and 100,000 fleet facilities which handle gasoline. The estimated total annual burden for respondents for this collection is 220,181 hours and \$20,180,587, including \$335,040 in annualized capital or O&M costs. The estimated total annual Agency burden is 200 hours and \$16,400 in labor costs.

Form Numbers: None.

Respondents/Affected Entities:

The respondents are related to the following major group Standard Industrialization Classification (SIC) codes:

5172—Petroleum Products

2911—Petroleum Refining

The respondents are related to the following major group NAICS codes:

324110—Petroleum Refineries

324199—All Other Petroleum and Coal Products Manufacturing

325110—Petrochemical Manufacturing

325199—All Other Basic Organic Chemical Manufacturing

424710—Petroleum Bulk Stations and Terminals

424720—Petroleum and Petroleum Products Merchant Wholesalers (except Bulk Stations and Terminals)

Respondent's Obligation to Respond: Mandatory per 40 CFR 80—Subpart G, Detergent Gasoline.

Estimated Number of Respondents: 69,504 (total).

Frequency of Response: On occasion.

Total Estimated Burden: 220,181 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total Estimated Cost: \$20,180,587.00 (per year), includes \$335,040.00 annualized capital or operation & maintenance costs.

Changes in Estimates: The previous clearance consisted of 220,181 hours (3.17 hours per response), labor costs of \$18,500,528, and O&M costs of \$335,040, for a total cost of \$18,835,568. There is no increase of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The respondent universe and responses also remained the same in this collection. There was an increase in cost to the industry of \$1,345,019 per year due to updated numbers used to calculate the industry burden and to account for inflation.

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.
