

and Order that, prior to the auction, it would establish a map of areas presumptively eligible for MF–II support based on the most recently available FCC Form 477 mobile wireless coverage data, and provide a limited timeframe for parties to challenge those initial determinations during the pre-auction process.

The Commission received several petitions for reconsideration of the *MF–II Report and Order*, including one asking it to reconsider the decision to use existing FCC Form 477 data as the basis for determining the map of areas presumptively eligible for MF–II support, and offering an industry consensus proposal asking the Commission to undertake a new, one-time data collection with specified data parameters tailored to MF–II to determine the areas in which there is deployment of qualified Long Term Evolution (LTE). On August 4, 2017, the Commission released an *Order on Reconsideration and Second Report and Order* (FCC 17–102) in which it, among other things, reconsidered its earlier decision to use FCC Form 477 data to compile the map of areas presumptively eligible for MF–II support. The Commission decided it would instead conduct a new, one-time data collection of 4G LTE coverage data that will be used for this purpose, concluding that for purposes of implementing MF–II expeditiously, this approach will provide the Commission and interested parties with the best available starting point for the challenge process and should result in fewer and more narrowly-focused challenges regarding representations of coverage.

Only those providers that have previously reported 4G LTE coverage in FCC Form 477 and have qualified 4G LTE coverage (defined by download speeds of 5 Mbps at the cell edge with 80 percent probability and a 30 percent loading factor) will be required to submit data under this new, one-time information collection. Such providers will be required to file propagation maps and model details with the Commission indicating their current 4G LTE coverage in accordance with a public notice that will be issued in advance of the start of period within which providers must make their filings that provides instructions for how to file the data submission, including a data specification, formatting information, and any other technical parameters that may be necessary for such filings. The Commission will use the new coverage data, in conjunction with subsidy data available from the Universal Service Administrative Company (USAC), to

create the map of areas presumptively eligible for MF–II support.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on March 2, 2017 to obtain comments from the public and affected agencies. CDC did not receive comments related to the notice. The purpose of this notice is to allow an additional 30 days for public comments.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570 or send an email to omb@cdc.gov. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503 or by fax to (202)

Proposed Project

Pulmonary Function Testing Course Approval Program (OMB Control Number 0920–0138, Expired 4/30/2017)—Reinstatement with Change—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

NIOSH has the responsibility under the Occupational Safety and Health Administration’s Cotton Dust Standard, 29 CFR 1920.1043, for approving courses to train technicians to perform pulmonary function testing in the cotton industry. Successful completion of a NIOSH-approved course is mandatory under this Standard. In addition, regulations at 42 CFR 37.95(a) specify that persons administering spirometry tests for the national Coal Workers’ Health Surveillance Program must successfully complete a NIOSH-approved spirometry training course and maintain a valid certificate by periodically completing NIOSH-approved spirometry refresher training courses. Also, 29 CFR 1910.1053(i)(2)(iv), 29 CFR 1910.1053(i)(3), 29 CFR 1926.1153(h)(2)(iv) and 29 CFR 1926.1153(h)(3) specify that pulmonary function tests for initial and periodic examinations in general industry and construction, performed under the respirable crystalline silica standard should be administered by a spirometry technician with a current certificate from a NIOSH-approved spirometry course. NIOSH is requesting a three-year approval.

To carry out its responsibility, NIOSH maintains a Pulmonary Function Training Course Approval Program. The program consists of an application submitted by potential sponsors (universities, hospitals, and private consulting firms) who seek NIOSH approval to conduct courses, and if approved, notification to NIOSH of any course or faculty changes during the approval period, which is limited to five years. The primary focus of this program is to verify that each course sponsor maintains faculty expertise and curriculum content that supports the training of technicians to perform spirometry testing under current professional clinical-practice guidelines.

NIOSH reviews the application form and added materials, including an agenda, curriculum vitae, and course materials to determine if the applicant has developed a program that adheres to the criteria required in the Standard.
