**Notice of Inventory Completion:
Wisconsin Historical Society, Madison,
WI**

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Wisconsin Historical Society has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Wisconsin Historical Society. If no additional requestors come forward, transfer of control of the human remains to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

DATES: Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Wisconsin Historical Society at the address in this notice by November 16, 2017.

ADDRESSES: Jennifer Kolb, Wisconsin Historical Society, 816 State St., Madison, WI 53706, telephone (608) 264-6434, email Jennifer.Kolb@wisconsinhistory.org.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Wisconsin Historical Society, Madison, WI. The human remains were removed from the Sikora Burial Site and an unknown location near Antigo in Langlade County, WI.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Wisconsin Historical Society professional staff in consultation with representatives of the Forest County Potawatomi Community, Wisconsin; Ho-Chunk Nation of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Menominee Indian Tribe of Wisconsin; and the Upper Sioux Community, Minnesota.

History and Description of the Remains

In August of 1991, human remains representing, at minimum, one individual were removed from the Sikora Burial Site (47-LG-0115) in Langlade County, WI. The human remains of one adult male were found during basement construction for a cottage on the southern shore of Rolling Stone Lake in the Township of Ainsworth. No associated funerary objects were recovered. The homeowners contacted the Antigo Police Department the same day as the discovery, and the police subsequently contacted the Wisconsin Burial Site Preservation Office. No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, five individuals were removed from an unknown location near Antigo in Langlade County, WI. It is not known who removed the human remains, who donated them to the Wisconsin Historical Society, or when they were donated. In 1996, the human remains were discovered in a box labeled "unaccessioned calvarium and representative parts of three mandibles, mound near Antigo, Langlade Co., Wisconsin." They were later determined to represent two adults, two children, and a young adult. No known individuals were identified. No associated funerary objects are present.

Determinations Made by the Wisconsin Historical Society

Officials of the Wisconsin Historical Society have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on Wisconsin Historical Society records, burial location, archeological context, oral histories, and skeletal analysis.

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of six individuals of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity

cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.

- Treaties, Acts of Congress, or Executive Orders indicate that the land from which the Native American human remains were removed is the aboriginal land of the Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, Wisconsin; Bay Mills Indian Community, Michigan; Bois Forte Band (Nett Lake) of the Minnesota Chippewa Tribe, Minnesota; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Fond du Lac Band of the Minnesota Chippewa Tribe, Minnesota; Grand Portage Band of the Minnesota Chippewa Tribe, Minnesota; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Lac Vieux Desert Band of Lake Superior Chippewa Indians of Michigan; Leech Lake Band of the Minnesota Chippewa Tribe, Minnesota; Mille Lacs Band of the Minnesota Chippewa Tribe, Minnesota; Minnesota Chippewa Tribe, Minnesota; Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin; Red Lake Band of Chippewa Indians, Minnesota; Saginaw Chippewa Indian Tribe of Michigan; Sault Ste. Marie Tribe of Chippewa Indians, Michigan; Sokaogon Chippewa Community, Wisconsin; St. Croix Chippewa Indians of Wisconsin; Turtle Mountain Band of Chippewa Indians of North Dakota; and the White Earth Band of Minnesota Chippewa Tribe, Minnesota (hereafter referred to as The Aboriginal Land Tribes).

- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to The Aboriginal Land Tribes.

Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Jennifer Kolb, Wisconsin Historical Society, 816 State St, Madison, WI 53706, telephone (608) 264-6434, email Jennifer.Kolb@wisconsinhistory.org, by November 16, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Aboriginal Land Tribes may proceed.

The Wisconsin Historical Society is responsible for notifying The Aboriginal Land Tribes and the Forest County Potawatomi Community, Wisconsin;

Ho-Chunk Nation of Wisconsin; and the Menominee Indian Tribe of Wisconsin that this notice has been published.

Dated: September 5, 2017.

INTERNATIONAL BOUNDARY AND WATER COMMISSION

United States and Mexico United States Section; Notice of Availability of a Draft Environmental Assessment and Finding of No Significant Impact for Channel Maintenance Alternatives at Thurman I and II Arroyos in Hatch, NM, Rio Grande Canalization Project

AGENCY: United States Section, International Boundary and Water Commission, United States and Mexico (USIBWC).

ACTION: Notice of Availability of the Draft Environmental Assessment (EA).

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Final Regulations; and the United States Section, Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981, (46 FR 44083); the United States Section hereby gives notice that the *Draft Environmental Assessment and Finding of No Significant Impact for Channel Maintenance Alternatives at Thurman I and II Arroyos in Hatch, NM, Rio Grande Canalization Project* is available. An environmental impact statement will not be prepared unless additional information which may affect this decision is brought to our attention within 30-days from the date of this Notice.

Public Comments: USIBWC will consider substantive comments from the public and stakeholders for 30 days after the date of publication of this Notice of Availability in the **Federal Register**.

Please note all written and email comments received during the comment period will become part of the public record, including any personal information you may provide. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment

to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Comments and requests for public hearings should be sent to: Elizabeth Verdecchia, Natural Resources Specialist, USIBWC, 4171 N. Mesa, C-100; El Paso, Texas 79902. Telephone: (915) 832-4701, Fax: (915) 493-2428, email: Elizabeth.Verdecchia@ibwc.gov.

Background: The USIBWC is considering constructing sediment control projects at Thurman I and II, two ephemeral tributaries of the Rio Grande, located within a portion of the Rio Grande Canalization Project protective levee system in Hatch, Doña Ana County, New Mexico. The USIBWC has the statutory authority to maintain the Rio Grande (Act of June 4, 1936, 49 Stat. 1463, Pub. L. 648 and 22 United States Code 277). USIBWC commissioned a study in 2015 that recommended sediment control structures be built on Thurman I and II arroyos, among others, to trap sediment and assist in the maintenance of the Rio Grande.

The purpose is to construct sediment control structures on Thurman I and II arroyos with the following objectives:

- (1) Control the inflow of sediment into the Rio Grande mainstem,
- (2) Conduct a pilot study for channel maintenance alternatives, and
- (3) Be accessible for maintenance and minimize operational costs.

This EA evaluates potential environmental impacts of the No Action Alternative and two alternatives. The Alternative A: No Action—Routine Sediment Excavation does not call for any construction but would require continued routine sediment excavation at the confluence of the arroyos and the Rio Grande. Alternative B: Mesh-Based Sediment Traps proposes to construct mesh and rebar sediment traps where each mesh would trap progressively smaller sediment particles. Alternative C: Sediment Basins is the Preferred Alternative, and calls for the construction of a sediment basin at each arroyo with a concrete end wall. Permits would be required from the U.S. Army Corps of Engineers for dredge and fill of Waters of the United States, per the Clean Water Act Sections 404 and 401.

Potential impacts on natural, cultural, and other resources were evaluated. Mitigation has been proposed for permits for construction. A Finding of

No Significant Impact has been prepared for the Preferred Alternative based on a review of the facts and analyses contained in the EA.

FOR FURTHER INFORMATION CONTACT: Elizabeth Verdecchia, Natural Resources Specialist, USIBWC, 4171 N. Mesa, C-100; El Paso, Texas 79902. Telephone: (915) 832-4701, Fax: (915) 493-2428, email: Elizabeth.Verdecchia@ibwc.gov.

Availability: The electronic version of the Draft EA is available from the USIBWC Web page: https://www.ibwc.gov/EMD/EIS_EA_Public_Comment.html.

Dated: October 5, 2017.
