### Forest Service

*Title:* Disposal of Mineral Materials.

*OMB Control Number:* 0596-0081.

*Summary of Collection:* The Forest Service (FS) is responsible for overseeing the management of National Forest System land. The Multiple-Use Mining Act of 1955 (30 U.S.C. 601, 603, 611-615) gives the FS specific authority to manage the disposal of mineral materials mined from National Forest land. FS uses form FS-2800-9, "Contract for the Sale of Mineral Materials" to collect detailed information on the planned mining and disposal operations as well as a contract for the sale of mineral materials.

*Need and Use of the Information:* Interested parties are asked to provide information that includes the purchaser's name and address, the location and dimensions of the area to be mined, the kind and quantity of material to be mined, the sales price of the mined material, the payment schedule, amount of the bond, and the period of the contract. Collected information from the public will ensure that environmental impacts of mineral material disposal are minimized. A review of the operating plan provides the authorized officer the opportunity to determine if the proposed operation is appropriate and consistent with all applicable land management laws and regulations. The information also provides the means of documenting planned operations and the terms and conditions that the FS deems necessary to protect surface resources. A simple annual statement of production (amount of material removed) is also required of each purchaser or permittee. If FS did not collect this information, operations could cause undue damage to surface resources.

*Description of Respondents:* Business or other for-profit.

*Number of Respondents:* 2,617.

*Frequency of Responses:* Reporting: On occasion.

*Total Burden Hours:* 6,543.
