SUPPLEMENTARY INFORMATION: The goal of this webinar is to understand the importance of Atlantic chub mackerel (*Scomber colias*) to the diets of highly migratory species (HMS) predators in U.S. waters, with a focus on recreationally-important predators such as large tunas and billfish. The objectives of the meeting are to: (1) Convene a panel of scientific experts on HMS diets, (2) clarify what is known about the importance of chub mackerel to HMS diets based on currently available data, and (3) develop recommendations for future studies to quantify the role of chub mackerel in HMS diets. Meeting these objectives will help the Council analyze the potential impacts of chub mackerel management alternatives on HMS predators as well as on recreational fisheries for those predators. The Council is developing a chub mackerel amendment to the Mackerel, Squid, and Butterfish Fishery Management Plan. More information on the amendment is available at: <http://www.mafmc.org/actions/chub-mackerel-amendment>. To facilitate productive discussions among the invited experts, public participation during this webinar will be limited to designated question and answer and comment periods.
