SUPPLEMENTARY INFORMATION:

I. Background

FDA is responsible for protecting and promoting the public health by helping to ensure the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by helping to ensure the safety of the nation's food supply, cosmetics, and products that emit radiation. FDA also has responsibility for regulating the manufacturing, marketing, and distribution of tobacco products to protect the public health and to reduce tobacco use by minors.

Included in this is a mandate to advance the public health mission by helping to speed innovations that make medical products more effective, safer, and more affordable, and helping the public access accurate science-based information for FDA-regulated products. Just as the science and technology underlying new medical products is advancing, the science of development and evaluation of medical products and clinical care is also dramatically improving. To enable FDA to continue to effectively evaluate these innovative developments, a specialized workforce is required to support the Agency's regulatory science and operations initiatives.

Over the past 5 years, the Agency has struggled with challenges related to its hiring processes, including challenges in managing the hiring process and bringing the right skills to the Agency. FDA has demonstrated that diagnosing the current state and drastically reimagining the hiring process is a top priority and is committed to implementing new, bold, consistent, and high quality hiring processes to tackle these challenges. The criticality of these priorities is consistent with the PDUFA VI and BsUFA II user-fee commitments. These commitments include the use of a qualified, independent contractor with expertise in assessing human resources operations and transformation to perform an initial baseline assessment no later than December 31, 2017, and a public meeting no later than December 31, 2017, to present and discuss report findings.^{1 2}
