

In the **Federal Register** of January 6, 2000 (65 FR 1000), we published a final rule (the 'structure/function final rule) on statements made for dietary supplements concerning the effect of the product on the structure or function of the body. In that final rule, we estimated that there were 29,000 dietary supplement products marketed in the United States (65 FR 1000 at 1045). Assuming that the flow of new products is 10 percent per year, then 2,900 new dietary supplement products will come on the market each year. The structure/function final rule estimated that about 69 percent of dietary supplements have a claim on their labels, most probably a structure/function claim (65 FR 1000 at 1046). Therefore, we assume that supplement manufacturers will need time to assemble the evidence to substantiate each of the 2,001 claims (2,900 × 69 percent) made each year. If we assume that the 2,001 claims are equally likely to be preexisting widely established claims, novel claims, or preexisting claims that are not widely established, then we can expect 667 of each of these types of claims to be substantiated per year. Table 1 of this document shows that the annual burden hours associated with assembling evidence for claims is 189,428 (the sum of 667 × 44 hours, 667 × 120 hours, and 667 × 120 hours).

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.
