Vol. 82

Thursday,

No. 220

November 16, 2017

Book 1 of 3 Books

Pages 53397–53566

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see [www.ofr.gov](http://www.ofr.gov).

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at [www.fdsys.gov](http://www.fdsys.gov), a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, [gpocusthelp.com](mailto:gpocusthelp.com).

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see [bookstore.gpo.gov](http://bookstore.gpo.gov).

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 82 FR 12345.

**Postmaster:** Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

# Rules and Regulations

Federal Register

Vol. 82, No. 220

Thursday, November 16, 2017

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

#### 7 CFR Part 905

[Doc. No. AMS-SC-17-0064; SC17-905-2 IR]

#### Oranges, Grapefruit, Tangerines, and Pummelos Grown in Florida; Change in Size Requirements for Oranges

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Interim rule with request for comments.

**SUMMARY:** This rule implements a recommendation from the Citrus Administrative Committee (Committee) to relax the minimum size requirements currently prescribed under the marketing Order for oranges, grapefruit, tangerines, and pummelos grown in Florida (Order). The Committee locally administers the order and is comprised of growers and handlers operating within the production area and one public member. This rule relaxes the minimum size requirements for oranges from  $2\frac{3}{16}$  inches to  $2\frac{1}{16}$  inches in diameter. This rule will maximize shipments by allowing more oranges to be shipped to the fresh market and help reduce the losses sustained by the citrus industry during the September 2017 hurricane in Florida. This rule also contains a formatting change to subpart references to bring the Order language into conformance with Office of Federal Register's guidelines.

**DATES:** Effective November 17, 2017; comments received by January 16, 2018 will be considered prior to issuance of a final rule.

**ADDRESSES:** Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250-0237; Fax:

(202) 720-8938; or Internet: <http://www.regulations.gov>. All comments should reference the document number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: <http://www.regulations.gov>. All comments submitted in response to this rule will be included in the record and will be made available to the public. Please be advised that the identity of the individuals or entities submitting the comments will be made public on the Internet at the address provided above.

**FOR FURTHER INFORMATION CONTACT:** Abigail Campos, Marketing Specialist, or Christian D. Nissen, Regional Director, Southeast Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (863) 324-3375, Fax: (863) 291-8614, or Email: [Abigail.Campos@ams.usda.gov](mailto:Abigail.Campos@ams.usda.gov) or [Christian.Nissen@ams.usda.gov](mailto:Christian.Nissen@ams.usda.gov).

Small businesses may request information on complying with this regulation by contacting Richard Lower, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250-0237; Telephone: (202) 720-2491, Fax: (202) 720-8938, or Email: [Richard.Lower@ams.usda.gov](mailto:Richard.Lower@ams.usda.gov).

**SUPPLEMENTARY INFORMATION:** This rule is issued under Marketing Order No. 905, as amended (7 CFR part 905), regulating the handling of oranges, grapefruit, tangerines, and pummelos grown in Florida, hereinafter referred to as the "Order." The Order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Orders 13563 and 13175. This rule falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review. Additionally, because this rule does not meet the definition of a significant regulatory action it does not trigger the requirements contained in Executive Order 13771. See OMB's Memorandum titled "Interim Guidance Implementing Section 2 of the Executive Order of January 30, 2017, titled

'Reducing Regulation and Controlling Regulatory Costs'' (February 2, 2017).

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule relaxes the minimum size requirements for oranges prescribed under the Order. This rule relaxes the minimum size requirements for oranges from  $2\frac{3}{16}$  inches to  $2\frac{1}{16}$  inches in diameter. This rule will maximize shipments by allowing more oranges to be shipped to the fresh market and help reduce the losses sustained by the orange industry during the September 2017 hurricane in Florida. This change was unanimously recommended by the Committee at meetings held on June 29, 2017, and September 28, 2017.

Section 905.52 of the Order provides authority to establish minimum size requirements for Florida citrus. Section 905.306 of the rules and regulation issued under the Order specifies, in part, the minimum size requirements for oranges. Requirements for domestic shipments are specified in § 905.306 in Table I of paragraph (a) and export shipments in Table II of paragraph (b).

At its June 29, 2017, meeting, the Committee discussed the continuing decline in production as a result of losses from citrus greening, which is affecting the entire production area. The Committee also recognized that some consumers are now showing a preference for smaller-sized fruit. The Committee agreed the current minimum

size should be relaxed in order to make additional fruit available for shipment.

The Committee met again on September 28, 2017, to discuss the additional damage Hurricane Irma caused to the current crop and revisited the discussion regarding the need to reduce the minimum size requirements. The major orange-growing regions in Florida suffered significant damage and fruit loss from the hurricane. The strong winds from the storm blew substantial volumes of fruit off the trees. The impact of the storm is also expected to produce a much higher than normal fruit drop. The extent of the loss is evident in the official USDA crop estimate for this season, which reflects a 21 percent decrease from last year's estimate. Further, as the industry continues to assess the damage caused by the storm, fruit loss estimates may go even higher. Given the limited supply of fruit due to greening and the impact of Hurricane Irma, the Committee believes relaxing the size requirements for oranges is needed to make more fruit available for shipment.

Committee members recognized that with the special circumstances surrounding this season, and with the ongoing impacts of citrus greening, some allowances should be made to assist growers and handlers and provide additional volume to the market. The Committee believes relaxing the size requirements will make more fruit available to meet market demand, help maximize fresh shipments, increase returns to growers and handlers, and help address the losses stemming from the hurricane. Consequently, the Committee recommended changing the minimum size requirements for oranges from  $2\frac{8}{16}$  inches to  $2\frac{4}{16}$  inches in diameter.

The Committee also recommended a relaxation in the minimum size requirements for grapefruit covered under the Order. That change is being considered under a separate action.

#### Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about

through group action of essentially small entities acting on their own behalf.

There are approximately 20 handlers of Florida citrus who are subject to regulation under the Order and approximately 500 citrus producers in the regulated area. Small agricultural service firms are defined by the Small Business Administration (SBA) as those having annual receipts of less than \$7,500,000, and small agricultural producers are defined as those having annual receipts of less than \$750,000 (13 CFR 121.201).

According to data from the National Agricultural Statistics Service (NASS), the industry, and the Committee, the average f.o.b. price for Florida oranges during the 2016–17 season was \$31.90 per box, and total fresh orange shipments were approximately 2.1 million boxes. Using the average f.o.b. price and shipment data, the majority of Florida orange handlers could be considered small businesses under SBA's definition (\$31.90 times 2.1 million boxes equals \$66.99 million divided by 20 handlers equals \$3,349,500 per handler). In addition, based on the NASS data, the average grower price for the 2016–2017 season was \$17.51 per box. Based on grower price, shipment data, and the total number of Florida citrus growers, the average annual grower revenue is below \$750,000 (\$17.51 times 2.1 million boxes equals \$36,771,000 divided by 500 growers equals \$73,542 per grower). Thus, the majority of handlers and producers of oranges may be classified as small entities.

This rule relaxes the minimum size requirements for oranges covered under the Order from  $2\frac{8}{16}$  inches to  $2\frac{4}{16}$  inches in diameter. This change is expected to maximize shipments by allowing more oranges to be shipped to the fresh market and will help reduce the losses sustained by the grapefruit industry as a result of citrus greening and the September 2017 hurricane in Florida. Authority for this change is provided in § 905.52. This rule amends § 905.306. The Committee unanimously recommended this change at its June 29, 2017, and September 28, 2017, meetings.

This action is not expected to increase the costs associated with the Order's requirements. Rather, it is anticipated this action will have a beneficial impact. Reducing the size requirements will make additional fruit available for shipment to the fresh market, provide an outlet for fruit that may otherwise go unharvested, and afford more opportunity to meet consumer demand. This change will provide additional

fruit to fill the shortage caused by citrus greening and by Hurricane Irma. Further, by maximizing shipments, this action will help provide additional returns to growers and handlers as they work to recover from the losses stemming from the hurricane.

This action may also help reduce harvesting costs. By reducing the minimum size, more fruit will be able to be harvested immediately. This may eliminate the need to leave fruit on the tree to increase in size, which requires follow-up picking later in the season. Given the amount of fruit loss, this could help reduce picking costs substantially. The benefits of this rule are expected to be equally available to all fresh orange growers and handlers, regardless of their size.

An alternative to this action would be to maintain the current minimum requirements for domestic shipments of oranges. However, leaving the requirements unchanged would not make additional of fruit available for shipment. Following the significant damage experienced by the industry from the September 2017 hurricane, maximizing shipments will help provide additional returns to growers and handlers as they recover from the loss. Another alternative considered was to reduce the minimum maturity requirements. However, Committee members thought it was important to maintain the maturity requirements to ensure overall quality. Therefore, this alternative was rejected.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Order's information collection requirements have been previously approved by OMB and assigned OMB No. 0581–0189, Generic Fruit Crops. No changes in those requirements as a result of this action are necessary. Should any changes become necessary, they would be submitted to OMB for approval.

This rule will not impose any additional reporting or recordkeeping requirements on either small or large orange handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

In addition, USDA has not identified any relevant Federal rules that

duplicate, overlap or conflict with this rule.

Further, the Committee’s meetings were widely publicized throughout the Florida citrus industry and all interested persons were invited to attend the meetings and participate in Committee deliberations. Like all Committee meetings, the June 29, 2017, and September 28, 2017, meetings were public meetings and all entities, both large and small, were able to express their views on this issue. Finally, interested persons are invited to submit comments on this interim rule, including the regulatory and informational impacts of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <http://www.ams.usda.gov/rules-regulations/moa/small-businesses>. Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

This rule invites comments on the change to the size requirements for oranges currently prescribed under the Marketing Order for oranges, grapefruit, tangerines, and pummelos grown in Florida. Any comments received will be considered prior to finalization of this rule.

After consideration of all relevant material presented, including the Committee’s recommendation, and other information, it is found that this interim rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect and that good cause exists for not postponing the effective date of this rule until 30 days after

publication in the **Federal Register**. The Florida citrus industry has been dealing with the devastating effects of citrus greening for more than 10 years, resulting in ever smaller harvests, and escalating production costs. The September 2017 hurricane caused significant additional damage and crop loss to the industry, with losses running into the millions of dollars. This rule, in conjunction with a companion rule for grapefruit, will bring some much-needed relief by providing additional fruit for shipment to the fresh market and to increase returns to growers and handlers. Based on the size frequency measurements provided by NASS as part of grapefruit and orange crop estimates, the recommended relaxation in size for both grapefruit and oranges could make an additional 20 to 25 percent of the crop available for shipment to the fresh market. Based on estimates, this could mean an additional volume of about 700,000 boxes of citrus available for shipment. Using an average fresh price per box of around \$30, this could provide the industry with an additional \$20 million in returns for the 2017–18 season. This rule relieves a restriction on the size of oranges that can be shipped to the fresh market. Therefore, good cause exists for this rule becoming effective one day after publication in the **Federal Register**. In addition, the Committee unanimously recommended these changes at public meetings, and interested parties had an opportunity to provide input. Further, this rule provides a 60-day comment period and any comments received will be considered prior to finalization of this rule. This rule also contains a formatting change to subpart references to bring the Order language into conformance with Office of Federal Register’s guidelines.

**List of Subjects in 7 CFR Part 905**

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements, Tangelos, Tangerines.

For the reasons set forth in the preamble, 7 CFR part 905 is amended as follows:

**PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND PUMMELOS GROWN IN FLORIDA**

■ 1. The authority citation for 7 CFR part 905 continues to read as follows:

Authority: 7 U.S.C. 601–604.

**[Subpart Redesignated as Subpart A]**

■ 2. Redesignate “Subpart—Order Regulating Handling” as “Subpart A—Order Regulating Handling”.

**[Subpart Redesignated as Subpart B and Amended]**

■ 3. Redesignate “Subpart—Rules and Regulations” as subpart B and revise the heading to read as follows:

**Subpart B—Administrative Requirements**

**[Subpart Redesignated as Subpart C]**

■ 4. Redesignate “Subpart—Assessment Rates” as “Subpart C—Assessment Rate”.

**[Subpart Redesignated as Subpart D]**

■ 5. Redesignate “Subpart—Grade and Size Requirements” as “Subpart D—Grade and Size Requirements”.

■ 6. In § 905.306, Table I in paragraph (a) and Table II in paragraph (b) are amended by revising the entries for “Early and midseason,” “Navel,” “Temple,” and “Valencia and other late type” under “Oranges,” to read as follows:

**§ 905.306 Orange, Grapefruit, Tangerine and Tangelo Regulation.**

**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

**14 CFR Part 33**

[Docket No. FAA–2017–0537; Notice No. 33–17–02–SC]

**Special Conditions: General Electric Company, GE9X Engine Models; Endurance Test Special Conditions**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final special conditions.

**SUMMARY:** These special conditions are issued for the General Electric Company turbofan engine models GE9X–105B1A, –105B1A1, –105B1A2, –105B1A3,

–102B1A, –102B1A1, –102B1A2, –102B1A3, and –93B1A. In these special conditions, the engine models will be referred to as “GE9X.” The engines will have novel or unusual design features associated with the engine design. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for these design features. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

**DATES:** Effective December 18, 2017.

**FOR FURTHER INFORMATION CONTACT:** Diane Cook, AIR–6A1, Engine and Propeller Standards Branch, Aircraft Certification Service, 1200 District Avenue, Burlington, Massachusetts 01803–5213; telephone (781) 238–7111; facsimile (781) 238–7199; email [diane.cook@faa.gov](mailto:diane.cook@faa.gov).

**SUPPLEMENTARY INFORMATION:**

**Background**

On January 29, 2016, General Electric Company (GE) applied for a type certificate for their new GE9X turbofan engine models. The GE9X engine models are high-bypass-ratio engines that incorporate novel or unusual design features. The GE9X engine models incorporate new technologies such that the company cannot run the endurance test conditions prescribed in § 33.87

without significant modifications making the test vehicle non-representative of the type design.

**Discussion**

An alternative endurance test cycle has been developed that provides a level of safety equivalent with that intended by § 33.87. The alternate endurance test provides the test conditions that allow the engine to be run in type design configuration and demonstrate engine operability and durability as well as systems functionality to a level intended by the current § 33.87 rule.

These special conditions provide the necessary conditions for verification of engine-level and component-level effects as intended by the current § 33.87 Endurance test. The test is run in engine type design configuration, with only limited test enabling modifications as needed. The special conditions include a demonstration for the oil, fuel, air bleed, and accessory drive systems as required in the current § 33.87 Endurance test.

The equivalent level of severity intended by the § 33.87 Endurance test is provided by an engine test demonstration at the gas path limiting temperature and at shaft speed redlines and at the most extreme shaft speeds as determined through a critical point analysis (CPA). In addition, times on condition and cycle counts were developed to allow additional challenges to the novel or unusual

design features that would not have been as challenged by the current § 33.87 test schedule.

The level of durability is equivalent with that intended by the rule, which considers the damage accumulated during the test for the limiting damage mechanisms for components and engine systems, up to and including the applicable limitations declared in the Type Certificate Data Sheets (TCDS). The alternate test schedule provides conditions in the engine for a sufficient amount of time to demonstrate that no potential safety issue will develop from the limiting damage mechanisms while operating in service.

The special conditions for §§ 33.4 and 33.29 are added to support an equivalent compliance by means of mandatory inspections prescribed in paragraph (b)(3) of the § 33.87 special conditions. These special condition requirements maintain a level of safety equivalent to the level intended by the applicable airworthiness standards in effect on the date of application.

#### Type Certification Basis

Under the provisions of Title 14, Code of Federal Regulations (14 CFR) 21.17, GE must show that the GE9X engine models meet the applicable provisions of part 33, as amended by Amendments 33-1 through 33-34. The FAA has determined that the applicable airworthiness regulations in part 33 do not contain adequate or appropriate safety standards for the GE9X engine models because of their novel or unusual engine design features. Therefore, these special conditions are prescribed under the provisions of 14 CFR 11.19 and 21.16, and will become part of the type certification basis for GE9X engine models in accordance with § 21.17(a)(2).

#### Novel or Unusual Design Features

The GE9X engine models will incorporate the following novel or unusual design features: Technological advances that reduce noise and emissions while improving fuel efficiency and increasing thrust, when compared to previous similarly certificated GE engine models. The technological advances are incorporated into hardware design, materials, and engine operating characteristics. Introduction of complex cooling systems and film-cooled components cause metal temperatures to be significantly influenced by cooling air temperatures and air flows and are no longer in direct proportion to the gas path temperature which is a target of the current endurance test. Introduction of new materials, new design features, and

operating conditions also introduced new failure modes that are not targeted by the current endurance test cycle.

Some of the technological advancements were introduced in prior GE engine models and mitigated by modifications to the test engine.

For past certifications, GE has shown that the engine design, as modified, still represented the durability and operating characteristics of the intended type design but the modifications needed to the GE9X engine model to run the § 33.87 Endurance test cannot be reconciled and would affect the test outcome.

#### Discussion of Comments

Notice of proposed special conditions No. 33-17-02-SC for the GE9X engine models was published in the **Federal Register** on 82 FR 28790. We received one comment from an anonymous commenter that acknowledged the need for special conditions as it concerns the GE9X engines models. We understand and acknowledge the comment we received, which is supportive of a special condition for the GE9X engine model. No further response is required.

#### Applicability

As discussed above, the special conditions are applicable to the GE9X engine model(s). Should GE apply at a later date for a change to the type certificate to include another model on the same type certificate incorporating the same novel or unusual design feature, the special conditions would apply to that model as well.

#### Conclusion

This action affects only certain novel or unusual design features on the GE9X turbofan engine models. It is not a rule of general applicability and applies only to GE, who requested FAA approval of this engine feature.

#### List of Subjects in 14 CFR Part 33

Aircraft, Engines, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

#### The Special Conditions

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for the GE9X engine models: GE9X-105B1A, -105B1A1, -105B1A2, -105B1A3, -102B1A, -102B1A1, 102B1A2, -102B1A3, and -93B1A.

## PART 33—REQUIREMENTS

### § 33.4 Instructions for Continued Airworthiness

The Airworthiness Limitations section must prescribe the mandatory post-flight inspections and maintenance actions associated with any exceedance required by the endurance test, paragraph (b)(3), of these special conditions.

### § 33.29 Instrument Connection

The engine must have means, or provisions for means, to automatically record and alert maintenance personnel of each occurrence of any exceedance required by the endurance test paragraph (b)(3), of these special conditions.

### § 33.87 Endurance Test

(a) *General:* The applicant must show that the endurance test schedule in combination with any prescribed mandatory actions provide an equivalent level of severity and demonstration of durability and operability as that intended by § 33.87(a) and (b). When showing that the level of durability is equivalent with that intended by the rule, the applicant must consider the damage accumulated during the test for the limiting damage mechanisms for components and engine systems, up to and including the applicable limitations declared in the type certificate data sheets (TCDS). The test cycle content must create conditions in the engine for a sufficient amount of time to demonstrate no potential safety issue will develop from the limiting damage mechanisms while operating in service. The following minimum requirements apply:

(1) Conduct the tests in paragraphs (b), (c), and (d) of these special conditions, for total cumulative and dwell time duration between ground idle and the takeoff thrust prescribed in these special conditions. The test cycle durations must include all maximums allowed in the TCDS and expected service operation.

(2) Requirements of § 33.87(a)(1), (2), (4), and (6).

(3) Requirements of § 33.87(a)(3) applicable to the temperature of external surfaces of the engine.

(4) Testing for maximum air bleed must be at least equal with the prescribed test required in § 33.87(a)(5). However, for these cycles, the thrust or the rotor shaft rotational speed may be less than 100 percent of the value associated with the particular operation being tested if the FAA finds that the validity of the endurance test is not compromised.

(5) Testing for engine fuel, oil, and hydraulic fluid pressure and oil temperature must be at least equal with the prescribed test required in § 33.87(a)(7).

(6) If the number of occurrences of either transient rotor shaft overspeed or transient gas over temperature is not limited, at least 155 accelerations must be made at the limiting overspeed or over temperature. If the number of occurrences is limited, that number of accelerations must be made at the limiting overspeed or over temperature.

(7) One hundred starts must be made, of which:

(i) Twenty-five starts must be preceded by at least a two-hour engine shutdown.

(ii) Ten false engine starts must be accomplished, pausing for the applicant's specified minimum fuel drainage time, before attempting a normal start.

(iii) Ten normal restarts must be accomplished with not longer than 15 minutes since engine shutdown.

The remaining starts may be made after completing the endurance testing prescribed by these special conditions.

(8) Unless otherwise specified (*i.e.* (d)(2) of these special conditions), for accelerations from ground idle to takeoff, the throttle must be moved in not more than one second, except that, if different regimes of control operations are incorporated necessitating scheduling of the thrust-control lever motion in going from one extreme position to the other, a longer period of time is acceptable, but not more than two seconds.

(i) When operating with max oil temperatures the throttle movement may be 'stair-stepped' to allow for oil temperature stabilization for durations greater than two seconds.

(9) The applicant must validate any analytical methods used for compliance with these special conditions. Validation includes the ability to accurately predict an outcome applicable to the engine being tested.

(10) The applicant must perform the endurance test on an engine that substantially conforms to its type design. Modifications may be made as needed to achieve test conditions and/or engine operating conditions representative of the type design.

(b) Conduct the endurance test at or above the declared shaft speeds and gas temperatures limits, and at or above conditions representative of critical points (speeds, temperatures, rated thrust) in the operating envelope.

(1) Conduct the endurance test at or above the rated takeoff thrust and rated maximum continuous thrust and with

the associated limits for rotor speeds and gas temperature (redlines), as follows:

(i) Either rotor speed or gas temperature, or concurrent rotor speed and gas temperature, if analysis indicates a combination of redline operational conditions is possible to occur in service, must be at least 100 percent of the values associated with the engine rating being tested.

(ii) The cumulative test time duration and number of cycles must be representative of the rotor speed and gas temperature excursions to redlines that can be expected to occur in between overhauls.

(iii) The time durations for each takeoff or maximum continuous segment must include all maximums allowed in the TCDS and expected service operation and must include the following cycles:

(A) At least one (1) takeoff cycle of 5-minutes time duration at the low pressure rotor speed limit and gas temperature limit (redlines).

(B) At least one (1) takeoff cycle of 5-minutes time duration at the high pressure rotor speed limit and gas temperature limit (redlines).

(C) In lieu of the separate cycles specified in paragraphs (A) and (B) of this section, the applicant may run the low pressure and high pressure rotor speeds and gas temperature limits (redlines) in the same cycle. However, in this case, the applicant must run at least 2 cycles of 5 minutes' time duration each.

(2) Conduct the endurance test at or above the rated takeoff thrust and the rated maximum continuous thrust with rotor speeds at or above those determined by a critical point analysis (CPA) and with gas temperature redline conditions as follows:

(i) The applicant must determine through a CPA the highest rotor shaft rotational speeds (CPA speeds) expected to occur for each rotor shaft system within the declared operating envelope. The CPA must be conducted for the takeoff and maximum continuous rated thrust and must consider the declared operating envelope, engine deterioration, engine-to-engine variability, and any other applicable variables that can cause the engine to operate at the extremes of its performance ratings.

(ii) Except as provided in paragraph (b)(3)(ii) of these special conditions, conduct a cyclic test between ground idle and combined takeoff and maximum continuous thrust ratings, as follows:

(A) Eighteen hours and forty-five minutes (18.75 hours) cumulated time

duration at or above the rated takeoff thrust, the gas temperature limit for takeoff (redline), and the CPA rotor speeds for takeoff determined per paragraph (b)(2)(i) of these special conditions.

(B) Forty-five (45) hours cumulated time duration at or above the rated maximum continuous thrust, the gas temperature limit for maximum continuous (redline), and the CPA rotor speeds for maximum continuous determined per paragraph (b)(2)(i) of these special conditions.

(C) The time durations for each takeoff or maximum continuous segments must include all maximums allowed in the TCDS and expected service operation, and must include at least one maximum continuous cycle of 30 minutes run continuously.

(3) If the cyclic shaft speed excursions specified in paragraphs (b)(1) or (b)(2) of these special conditions cannot be demonstrated in the test, then an alternative equivalent with the rule intent must be provided. Alternatives may include alternate means of test demonstration, mandatory actions, or other means found acceptable to the FAA. The applicant must prescribe a mandatory action plan for engine operation between the shaft speeds demonstrated for a minimum of cumulated 18.75 hours at or above rated takeoff and 45 hours at or above rated maximum continuous, respectively, and the declared speed limits (redlines), as follows:

(i) Prescribe post-event actions or operating limitations acceptable to the FAA for operation below the declared speed limits (redlines) and above the CPA speeds.

(ii) If the test required by (b)(2)(ii) of these special conditions can only be accomplished at a rotor shaft speed lower than the CPA speed, prescribe post-event actions or operating limitations acceptable to the FAA for operation below that CPA speed and above the value demonstrated during the test.

(c) Conduct the endurance test at the incremental cruise thrust that must be at least equal with the prescribed test required in § 33.87(b)(4). The 25 incremental test cycles must be uniformly distributed throughout the entire endurance test.

(d) Conduct at least 300 cycles between ground idle and combined rated takeoff and rated maximum continuous thrust, as follows:

(1) Each cycle to include acceleration to or above rated takeoff thrust, deceleration from takeoff to ground idle, followed by 5 to 15 seconds at ground idle, acceleration to or above rated

maximum continuous thrust, and deceleration to ground idle.

(2) The throttle movement from ground idle to rated takeoff or maximum continuous thrust and from rated takeoff thrust to ground idle should be not more than one (1) second, except that, if different regimes of control operations are incorporated necessitating scheduling of the thrust-control lever motion in going from one extreme position to the other, a longer period of time is acceptable, but not more than two (2) seconds. The throttle movement from rated maximum continuous thrust to ground idle should not be more than five (5) seconds.

(3) The time durations for each cycle associated with either takeoff or maximum continuous thrust segments must include all maximums allowed in the TCDS and expected service operation, and must include the following cycles:

- (i) Three (3) cycles of 5 minutes each and one (1) cycle of 10 minutes at the takeoff thrust.
- (ii) Three (3) cycles of 30 minutes each at the maximum continuous thrust.

Issued in Burlington, Massachusetts, on November 8, 2017.

**I. Introduction**

1. On November 17, 2016, the Federal Energy Regulatory Commission (Commission) issued Order No. 831.<sup>1</sup> Order No. 831 addresses the incremental energy offer component of a resource's supply offer, which is a financial component consisting of costs that vary with a resource's output or level of demand reduction. Incremental energy offers are one of the components used to calculate locational marginal

prices (LMPs). California Independent System Operator Corporation (CAISO), ISO New England Inc. (ISO-NE), Midcontinent Independent System Operator, Inc. (MISO), New York Independent System Operator, Inc. (NYISO), and Southwest Power Pool, Inc. (SPP) currently have a \$1,000/MWh cap on incremental energy offers (offer cap), and PJM Interconnection, L.L.C. (PJM) currently has an offer cap of \$2,000/MWh on cost-based offers.<sup>2</sup>

2. In Order No. 831, the Commission amended its regulations to require that each regional transmission organization

and independent system operator (RTO/ISO): (1) Cap each resource's incremental energy offer at the higher of \$1,000/MWh or that resource's verified cost-based incremental energy offer; and (2) cap verified cost-based incremental energy offers at \$2,000/MWh when calculating LMPs (hard cap).<sup>3</sup> Resources with verified cost-based incremental energy offers above \$2,000/MWh will be eligible to receive uplift.<sup>4</sup> In response to comments on the Notice of Proposed

<sup>1</sup> *Offer Caps in Markets Operated by Regional Transmission Organizations and Independent System Operators*, 81 FR 87,770 (Dec. 5, 2016), FERC Stats. & Regs. ¶ 31,387 (2016) (Order No. 831).

<sup>2</sup> Order No. 831, FERC Stats. & Regs. ¶ 31,387 at PP 11-13.

<sup>3</sup> *Id.* P 1.

<sup>4</sup> *Id.* P 78.

Rulemaking,<sup>5</sup> the Commission clarified that each RTO/ISO or Market Monitoring Unit must verify that any incremental energy offer above \$1,000/MWh reasonably reflects the associated resource's actual or expected costs, as opposed to only the resource's actual costs, prior to using that offer to calculate LMP.<sup>6</sup>

3. With respect to treatment of cost-based incremental energy offers above \$2,000/MWh, the Commission stated that it expects RTOs/ISOs to use such offers to determine merit-order dispatch, and it cited PJM as an example of an RTO/ISO that uses cost-based incremental energy offers above \$2,000/MWh to determine merit-order dispatch, but limits cost-based incremental energy offers to \$2,000/MWh for purposes of calculating LMP.<sup>7</sup> The Commission found that imports should be permitted to offer above \$1,000/MWh, but will not be subject to verification.<sup>8</sup> Finally, while Order No. 831 did not require RTOs/ISOs to include an adder above cost in cost-based incremental energy offers above \$1,000/MWh, the Commission stated that if an RTO/ISO chooses to retain existing rules that allow for an adder above cost or proposes any new adders above cost, such adders may not exceed \$100/MWh.<sup>9</sup> However, in Order No. 831, the Commission did not require RTOs/ISOs to change the costs they currently include in cost-based incremental energy offers, and it did not address whether verifiable opportunity costs are subject to the \$100/MWh limit on adders.

4. On December 19, 2016, the Commission received four requests for rehearing and/or clarification of Order No. 831 which raise issues related to the structure of the offer cap, the verification requirement, and the costs included in cost-based incremental energy offers. TAPS filed a request for rehearing and clarification. NYISO filed a request for clarification and, alternatively, request for rehearing. AMP/APPA filed a request for rehearing. Exelon filed a motion for clarification and request for rehearing.<sup>10</sup>

<sup>5</sup> *Offer Caps in Markets Operated by Regional Transmission Organizations and Independent System Operators*, 81 FR 5951 (Feb. 4, 2016), FERC Stats. & Regs. ¶ 32,714, at PP 3 (2016) (NOPR).

<sup>10</sup> The Independent Market Monitor for PJM (PJM Market Monitor) filed an answer to Exelon's motion for clarification and request for rehearing. MISO filed comments in support of NYISO's request for clarification and, alternatively, request for rehearing. Rule 713(d)(1) of the Commission's Rules

For the reasons discussed below, we grant in part and deny in part the requests for rehearing and clarification.

## II. Discussion

### A. Offer Cap Structure

5. The requests for rehearing and clarification regarding the offer cap structure focus on the level of the hard cap and the implementation of the hard cap.

#### 1. Hard Cap Level

##### a. Request for Rehearing

6. TAPS seeks rehearing and argues both that the \$2,000/MWh hard cap level established by the Commission is not supported by substantial evidence, and that the \$1,724/MWh offer cited in Order No. 831 was not a legitimate cost-based incremental energy offer.<sup>11</sup> Rather, TAPS states, the \$1,724/MWh offer was the estimated cost of a resource calculated according to PJM's Cost Development Guidelines, but the actual cost of that resource was less than \$1,500/MWh. TAPS argues that, given the large discrepancy between estimated and actual costs, it was inappropriate for the Commission to rely on an estimated \$1,724/MWh offer as the basis for the \$2,000/MWh hard cap level. TAPS asserts that, even if it was appropriate for the Commission to rely upon estimated costs, the Commission should not have used the \$1,724/MWh level, since it was estimated using a methodology that is not compliant with Order No. 831. TAPS contends that the Commission should instead set the hard cap level at \$1,500/MWh or, alternatively, at \$1,800/MWh if the Commission determines that there was a legitimate cost-based incremental energy offer of \$1,724/MWh.<sup>12</sup> TAPS also argues that the Commission failed to meaningfully address the analytical evidence TAPS presented in its comments supporting a \$1,500/MWh hard cap.<sup>13</sup>

##### b. Determination

7. We deny TAPS' request for rehearing of the \$2,000/MWh level of the hard cap. In Order No. 831, the

of Practice and Procedure prohibits answers to requests for rehearing. 18 CFR 385.713(d)(2) (2017). We therefore reject the answer of the PJM Market Monitor. We will treat MISO's comments as an answer and as a result reject them.

<sup>11</sup> TAPS Request for Clarification/Rehearing at 2 (citing *Pac. Gas & Elec. Co. v. FERC*, 373 F.3d 1315 (D.C. Cir. 2004); *Canadian Ass'n of Petroleum Producers v. FERC*, 254 F.3d 289 (D.C. Cir. 2001) (*Canadian Ass'n of Petroleum Producers*)).

<sup>12</sup> *Id.* at 5–11.

<sup>13</sup> *Id.* at 10 (citing *Canadian Ass'n of Petroleum Producers*, 254 F.3d at 299 (an agency's "failure to respond meaningfully" to objections raised by a party renders its decision arbitrary and capricious)).

Commission determined that a hard cap was necessary to limit any adverse impact on LMPs due to imperfect information about a resource's short-run marginal costs that might arise during the verification process.<sup>14</sup> The Commission also recognized that a hard cap that is too low might suppress LMPs below the marginal cost of production.<sup>15</sup> In determining the \$2,000/MWh level of the hard cap, the Commission therefore struck a balance between competing goals: (1) Limiting any adverse impacts on LMPs due to imperfect information during the verification process and (2) reducing the likelihood of suppressing LMPs below the marginal cost of production.

8. The overall offer cap structure set forth in Order No. 831 and the overall market structure of RTOs/ISOs in which the offers arise affected the balance struck by the Commission in setting the level of the hard cap. The hard cap does not stand alone, meaning that it is not the only way of ensuring that an offer does not reflect the exercise of market power and that the price resulting from an incremental energy offer is just and reasonable. In balancing the competing goals, the Commission effectively recognized that the hard cap serves as a backstop to the mitigation established through both the cost-based requirement and the verification process—the other elements of the offer cap structure. The cost-based offer requirement serves a "mitigation function" <sup>16</sup> by requiring incremental energy offers above \$1,000/MWh be cost-based. The verification requirement also addresses market power concerns.<sup>17</sup> The hard cap "limit[s] the adverse impact that any imperfect information about resources' short-run marginal costs during the verification process could have on LMPs."<sup>18</sup> The Commission factored in these two other elements of the offer-cap structure in balancing the competing goals to set the level of the hard cap.

9. In setting that level, the Commission also considered the overall market structure of RTOs/ISOs—a structure designed to ensure that markets are competitive and not subject to the exercise of market power, through for instance, existing market power mitigation processes.<sup>19</sup> The hard cap

<sup>14</sup> Order No. 831, FERC Stats. & Regs. ¶ 31,387 at P 87.

<sup>15</sup> *Id.* P 91.

<sup>16</sup> *Id.* P 83.

<sup>17</sup> *Id.* P 139.

<sup>18</sup> *Id.* P 87.

<sup>19</sup> *Cf. id.* PP 85–90. Additionally, all six RTOs/ISOs have market power mitigation rules designed to prevent market participants from exercising market power. *See, e.g.*, California Independent System Operator Corporation, eTariff, 39; ISO New

also serves as backstop to those existing market mitigation processes.<sup>20</sup>

10. Based on the record, the Commission set the level of the hard cap to \$2,000/MWh. The Commission determined that \$2,000/MWh was the level that short-run marginal costs would rarely exceed.<sup>21</sup> The cost-based incremental energy offer of \$1,724/MWh referenced in Order No. 831, and which TAPS questions, regardless of the methodology by which it was derived, was only one point of reference for the Commission within the context of the broader record. Specifically, the Commission also examined the evidence in the record regarding high natural gas prices that occurred during the Polar Vortex when some resources experienced short-run marginal costs above \$1,000/MWh.<sup>22</sup>

11. The alternative \$1,500/MWh and \$1,800/MWh hard cap levels that TAPS proposed would result in a balance different than the one chosen by the Commission. Lower hard cap levels such as these would increase the likelihood of suppressing prices below the marginal cost of production and would thereby run contrary to the Commission's price formation efforts to ensure that LMPs reflect the short-run marginal cost of the marginal resource. We therefore reject TAPS' request for rehearing and the alternative hard cap levels proposed. As stated above, we continue to find that the \$2,000/MWh hard cap reasonably balances reducing the likelihood of suppressing LMPs while limiting any adverse impact on LMPs from imperfect information about resources' short-run marginal costs during the verification process.

12. Further, we reject TAPS' argument that the Commission failed to meaningfully address its \$1,500/MWh

alternative proposal. The Commission addressed this alternative in adopting the \$2,000/MWh hard cap.<sup>23</sup> In any event, in a rulemaking, the Commission need not respond to every comment or analyze every alternative. Rather, the Commission must respond to "comments which, if true, . . . would require a change in an agency's proposed rule."<sup>24</sup> The Commission's determination regarding the \$2,000/MWh hard cap is not invalidated merely because there may be a reasonable alternative.<sup>25</sup>

## 2. Implementation of the Hard Cap

### a. Requests for Rehearing/Clarification

13. NYISO seeks clarification that Order No. 831 does not require that incremental energy offers above \$2,000/MWh be used to determine merit-order dispatch in all RTOs/ISOs, and, in the alternative, seeks rehearing on this issue.<sup>26</sup> NYISO states that, to the extent the Commission intended to establish a requirement, the Commission did not seek comment on the requirement in the NOPR, did not demonstrate that the requirement must be imposed on all RTOs/ISOs in order to ensure just and reasonable rates, and did not consider the burdens the requirement would impose on NYISO.<sup>27</sup>

14. NYISO asserts that such a requirement would introduce foreign market design elements into NYISO that were developed by PJM to be compatible with its own pricing method, market rules, and software.<sup>28</sup> Specifically, NYISO explains that PJM's design accommodates discrepancies between schedules and price, using a secondary *ex post* process to determine

LMPs that is separate from the process for determining resource schedules. However, NYISO states that it uses a common *ex ante* process to determine both locational based marginal prices (LBMPs) and resource schedules. NYISO asserts that, because its process utilizes the same offers for scheduling and pricing, it would be challenging to allow resources to be committed and scheduled based on validated incremental energy offers above \$2,000/MWh, but then cap the offers for purposes of calculating LBMPs and ancillary services prices. According to NYISO, this would require resource-intensive and potentially costly software changes, make validation of prices and schedules more complex, and require NYISO to redirect resources from other efforts that are more certain to benefit consumers and markets. Additionally, NYISO contends that implementing an offer cap that only limits the offer prices used to determine LBMPs can lead to a divergence between resource schedules and prices that can harm market participants.<sup>29</sup>

15. In addition, NYISO requests clarification that RTOs/ISOs are permitted to apply the same offer cap to both incremental energy and minimum generation offers,<sup>30</sup> and in the alternative seeks rehearing on this issue. Currently, NYISO's tariff applies a \$1,000/MWh offer cap to all day-ahead and real-time energy offers, including minimum generation offers. NYISO argues that applying different offer caps to incremental energy offers and minimum generation offers could incentivize suppliers to artificially shape their offers to conform to the different offer caps rather than offer in a manner that accurately reflects a resource's costs, which would result in less optimal commitment, dispatch, and pricing. Furthermore, NYISO states that if minimum generation offer caps are lower than incremental energy offer caps, generators may not offer to supply energy if they do not expect to be able to recoup their costs.<sup>31</sup> NYISO also states that the Commission previously granted waiver of the \$1,000/MWh offer cap on both incremental energy offers and minimum generation offers in

<sup>23</sup> *Id.*

response to spikes in natural gas costs caused by the Polar Vortex.<sup>32</sup>

b. Determination

16. Regarding NYISO's concerns on economic merit-order dispatch, we clarify that Order No. 831 did not require cost-based incremental energy offers above \$2,000/MWh to be used to determine economic merit-order dispatch. We recognize that some RTO's/ISO's existing commitment, dispatch, and pricing algorithms are structured differently, and the Commission in Order No. 831 did not require RTOs/ISOs to change their current practices or software to use cost-based incremental energy offers above \$2,000/MWh for determining economic merit-order dispatch. However, in the event that RTOs/ISOs must select from several offers above \$2,000/MWh, we encourage RTOs/ISOs to make those selections on a least-cost basis when possible, in order to minimize the cost to serve load.

17. We also clarify that application of the offer cap and verification requirement adopted in Order No. 831 to minimum generation offers, as NYISO requests, is appropriate. Applying different offer caps to minimum generation and incremental energy offers could give resources the incentive to shape their offers in a manner that does not reflect their costs.<sup>33</sup> Furthermore, this application is consistent with prior Commission orders regarding NYISO's offer cap discussed above.<sup>34</sup>

*B. Verification Requirement*

18. The requests for rehearing regarding the verification requirement focus on the use of expected costs in the verification requirement and whether to subject imports to the verification requirement.

1. Expected Costs

19. The requests for rehearing regarding expected costs include the definition of expected costs and whether they should be included in the regulatory text as well as market power concerns related to the use of expected costs in the verification process.

a. Definition and Regulatory Text

i. Requests for Rehearing

20. AMP/APPA seek rehearing of Order No. 831, arguing that the Commission was arbitrary and capricious because it failed to provide a

reasonable justification for allowing sellers' expected costs to set LMP, and that the Commission also unjustifiably expanded the definition of cost-based offers to include "expected" costs. According to AMP/APPA, in order for LMPs to send accurate signals regarding the actual cost of producing energy, LMPs should be based on actual costs. AMP/APPA argue that, since some commenters stated that pre-verification of actual costs would not be possible, the Commission should have concluded that offers above \$1,000/MWh should not set LMP, and instead, required such costs to be recovered via uplift.<sup>35</sup>

21. Exelon requests rehearing of the fact that the regulatory text does not include the "actual or expected" phrase when it describes the costs to be verified. Exelon argues that the current regulatory text fails to adequately capture the Commission's intent described in the preamble, specifically that costs may be either actual or expected. Exelon asserts that, in order to avoid confusion and also satisfy due process and regulatory notice requirements, the Commission should amend the regulatory text to specify that the verified costs can be "actual or expected."<sup>36</sup>

ii. Determination

22. We disagree with AMP/APPA's argument that the use of expected costs in the verification process to set LMPs was arbitrary and capricious, and thus deny its request for rehearing. The record demonstrates that certain natural gas resources do not know their actual short-run marginal costs at the time they submit their incremental energy offers, and thus it is just and reasonable, and consistent with current practice, for such resources to offer based on their expected costs.<sup>37</sup> Given this record, the Commission appropriately responded to the many comments filed by clarifying in Order No. 831 that market participants could offer based on expected costs. In circumstances when actual costs are not known, a resource offer based on expected short-run marginal cost constitutes a competitive offer. Further, contrary to AMP/APPA's assertion, in Order No. 831 the Commission did not expand the definition of the specific types of short-

run marginal costs that a resource could include in its cost-based incremental energy offer above \$1,000/MWh, but rather, the Commission stated that it expected that the RTO/ISO would build on its existing mitigation processes for calculating or updating cost-based incremental energy offers. Further, in Order No. 831, the Commission required an RTO/ISO to explain in its compliance filing what factors it will consider in the verification process for cost-based incremental energy offers above \$1,000/MWh and whether such factors are currently considered in existing market power mitigation provisions. Thus, the Commission was not arbitrary and capricious because its decision to permit verified expected costs above \$1,000/MWh to set LMP is consistent with current RTO/ISO practices that allow cost-based incremental energy offers to be based on expected, rather than actual costs, as demonstrated in the record.<sup>38</sup>

23. We grant Exelon's request to amend the regulatory text by adding the words "actual or expected" as suggested by Exelon. We agree that these revisions will provide more certainty to market participants and more clearly state the Commission's intention that both actual and expected costs over \$1,000/MWh may be submitted for verification.

b. Market Power Concerns

i. Requests for Rehearing

24. AMP/APPA seek rehearing contending that Order No. 831 is arbitrary and capricious because it fails to address market power concerns that may arise if resources exaggerate expected costs included in cost-based incremental energy offers above \$1,000/MWh.<sup>39</sup> According to AMP/APPA, there are strong incentives for an owner of a fleet of resources, for example, to inflate expected costs of one resource during a constrained period in order to increase earnings for all of its resources. AMP/APPA further argue that there is an opportunity to inflate costs because natural gas prices are higher during constrained periods, and this is also when the price of natural gas is less transparent because the price paid by a market seller for gas on the bilateral market is farthest away from index prices.<sup>40</sup>

25. AMP/APPA further assert that Order No. 831 failed to address whether

<sup>32</sup> *Id.* at 13 (citing *N.Y. Indep. Sys. Operator, Inc.*, 146 FERC ¶ 61,061, at PP 2–4, 20 (2014)).

<sup>33</sup> *See id.* at 14.

<sup>34</sup> *See supra* P 15.

<sup>35</sup> AMP/APPA Request for Rehearing at 9–13 (citing *Motor Vehicle Mfrs. Ass'n v. State Farm Mut. Auto. Ins. Co.*, 463 U.S. 29, 43 (1983) (*Motor Vehicle Mfrs. Ass'n*); *United Distrib. Cos.*, 88 F.3d at 1169).

<sup>36</sup> Exelon Request for Clarification/Rehearing at 6–8 (citing *U.S. v. Chrysler Corp.*, 158 F.3d 1350 (D.C. Cir. 1998); *Upton v. SEC*, 75 F.3d 92 (2d Cir. 1996); *General Electric Co. v. EPA*, 53 F.3d 1324 (D.C. Cir. 1995)).

<sup>37</sup> *See* Order No. 831, FERC Stats. & Regs. ¶ 31,387 at PP 104–108.

<sup>38</sup> *See id.* PP 106–107.

<sup>39</sup> AMP/APPA Request for Rehearing at 13–16 (citing *Motor Vehicle Mfrs. Ass'n*, 463 U.S. at 43).

<sup>40</sup> *Id.* at 13–15 (citing Joint Comments of PJM and SPP, Docket No. RM16–5–000, at 10–11 (filed Apr. 4, 2016); Comments of ISO–NE Market Monitor, Docket No. RM16–5–000, at 7 (filed Apr. 4, 2016)).

allowing offers above \$1,000/MWh to set LMP could lead to market power concerns in the natural gas market.<sup>41</sup> In support of this position, AMP/APPA reference the PJM Market Monitor's comments in the Order No. 831 proceeding stating that removing the offer cap entirely could exacerbate market power in the natural gas markets and also impact electricity markets.<sup>42</sup> AMP/APPA further note that the Internal Market Monitor for ISO-NE (ISO-NE Market Monitor) stated that, in ISO-NE., raising the offer cap could expose the energy markets to uncompetitive conditions in the natural gas markets.<sup>43</sup> AMP/APPA therefore propose that offers above \$1,000/MWh should be based upon actual costs in order to be used to set LMP, since the use of expected costs can exacerbate market power concerns, but offers above \$1,000/MWh based on expected costs should be recovered via uplift.<sup>44</sup>

26. AMP/APPA seek rehearing of Order No. 831, arguing that the Commission's use of expected costs in setting LMP was arbitrary and capricious, and that the Commission did not explain its departure from relevant precedent.<sup>45</sup> Specifically, AMP/APPA argue that allowing expected costs to be used to verify cost-based incremental energy offers above \$1,000/MWh contravenes the Federal Power Act (FPA) and is inconsistent with precedent requiring certain safeguards when granting market-based rates. AMP/APPA maintain that the Commission's authority under the FPA to grant market-based rate authority has been upheld in court because the Commission periodically conducts *ex ante* examinations of a public utility's market power as well as enforceable *ex post* reporting.<sup>46</sup> According to AMP/APPA, however, Order No. 831 never requires RTOs/ISOs or Market Monitors to ensure that the market-clearing LMPs resulting from a seller's offer exceeding \$1,000/MWh are actually cost-based. AMP/APPA assert that permitting verification based on expected costs does not meet the *ex post* reporting requirement that would allow the Commission to determine whether these expected costs and resulting market-

clearing prices are just and reasonable. AMP/APPA therefore conclude that Order No. 831 is unlawful because the Commission cannot rely on market forces to regulate rates in lieu of imposing reporting requirements on generators.<sup>47</sup>

#### ii. Determination

27. We deny AMP/APPA's request for rehearing and alternative proposal regarding market power concerns and the use of expected costs. We disagree with AMP/APPA that incremental energy offers above \$1,000/MWh based on expected costs present market power concerns; the verification requirement in Order No. 831 was specifically designed to address market power concerns and ensure that all incremental energy offers above \$1,000/MWh are indeed cost-based. Pursuant to the verification requirement, resources may only submit incremental energy offers above \$1,000/MWh if they are cost-based, and the RTO/ISO or Market Monitoring Unit must verify that any such offer reasonably reflects that resource's actual or expected short-run marginal costs. Incremental energy offers above \$1,000/MWh may not be used to calculate LMPs if such offers cannot be verified by the RTO/ISO or Market Monitoring Unit prior to the market clearing process. In Order No. 831, the Commission specifically found that "the verification requirement reasonably addresses market power concerns associated with incremental energy offers above \$1,000/MWh because such offers will be required to be cost-based, which should deter attempts by resources to exercise market power."<sup>48</sup> The verification requirement in Order No. 831 is therefore designed to prevent the concerns AMP/APPA raise about resources including "inflated" or "exaggerated" expected costs in cost-based incremental energy offers above \$1,000/MWh.

28. We reject as unsupported AMP/APPA's claim that the Final Rule did not address concerns about market power in the natural gas market. The excerpts from the PJM Market Monitor's and ISO-NE Market Monitor's comments that AMP/APPA included in its request for rehearing expressed general concern about removing a hard cap in energy markets given potential concerns about market power in natural gas markets. However, Order No. 831 did not remove a hard cap in energy markets—it adopted a \$2,000/MWh

hard cap. As discussed above, we balanced several considerations in adopting a \$2,000/MWh but the fact that a hard cap continues to remain in place addresses the comments AMP/APPA cites, to the extent there is market power in the natural gas markets. Additionally, the excerpt from the ISO-NE Market Monitor's comments cited by AMP/APPA discusses the relationship between natural gas markets and energy markets and expresses general concerns about limited transparency into the competitive conditions in natural gas spot markets. Again, the \$2,000/MWh hard cap addresses this concern as it recognizes that the verification process required by Order No. 831 may be less effective during extreme conditions in the natural gas market.<sup>49</sup>

29. We deny AMP/APPA's request for rehearing regarding market-based rates because Order No. 831 does not depart from Commission precedent, and the Commission's action was not arbitrary and capricious. Contrary to AMP/APPA's claims, a market participant with market-based rate authority that submits a cost-based incremental offer above \$1,000/MWh for a resource would continue to be subject to the existing reporting and other requirements that are imposed on entities with market-based rate authority,<sup>50</sup> consistent with the precedent cited by AMP/APPA. Further, contrary to AMP/APPA's assertions, the verification process specifically requires that the RTO/ISO or Market Monitoring Unit ensure that incremental energy offers are in fact cost-based, meaning that the offer must reasonably reflect that resource's actual or expected short-run marginal costs.<sup>51</sup>

<sup>49</sup> See *id.* P 87.

<sup>50</sup> For example, entities with market-based rate authority must file Electric Quarterly Reports with the Commission, consistent with Order Nos. 2001 and 768. *Revised Public Utility Filing Requirements*, Order No. 2001, FERC Stats. & Regs. ¶ 31,127, *reh'g denied*, Order No. 2001-A, 100 FERC ¶ 61,074, *reh'g denied*, Order No. 2001-B, 100 FERC ¶ 61,342, *order directing filing*, Order No. 2001-C, 101 FERC ¶ 61,314 (2002), *order directing filing*, Order No. 2001-D, 102 FERC ¶ 61,334, *order refining filing requirements*, Order No. 2001-E, 105 FERC ¶ 61,352 (2003), *order on clarification*, Order No. 2001-F, 106 FERC ¶ 61,060 (2004), *order revising filing requirements*, Order No. 2001-G, 120 FERC ¶ 61,270, *order on reh'g and clarification*, Order No. 2001-H, 121 FERC ¶ 61,289 (2007), *order revising filing requirements*, Order No. 2001-I, FERC Stats. & Regs. ¶ 31,282 (2008); *Elec. Mkt. Transparency Provisions of Section 220 of the Fed. Power Act*, Order No. 768, FERC Stats. & Regs. ¶ 31,336 (2012), *order on reh'g*, Order No. 768-A, 143 FERC ¶ 61,054 (2013). They must also timely report to the Commission any change in status that would reflect a departure from the characteristics the Commission relied upon in granting their market-based rate authority. 18 CFR 35.42 (2017).

<sup>51</sup> See Order No. 831, FERC Stats. & Regs. ¶ 31,387 at P 140 ("[A]n RTO/ISO or a Market

<sup>47</sup> *Id.* at 6–8 (citing *Blumenthal v. FERC*, 552 F.3d 875, 882–83 (D.C. Cir. 2009); *FPC v. Texaco*, 417 U.S. 380, 399 (1974)).

<sup>48</sup> See Order No. 831, FERC Stats. & Regs. ¶ 31,387 at P 144.

As discussed above, the record demonstrates that it is appropriate to use expected costs in the verification of cost-based incremental energy offers because when actual costs are not known, a resource offer based on expected short-run marginal cost constitutes a competitive offer.<sup>52</sup> In Order No. 831, the Commission stated that “[a] cost-based incremental energy offer is based on the associated resource’s short-run marginal cost, which constitutes a competitive offer free from the exercise of market power.”<sup>53</sup> Therefore, the use of expected costs in the verification process does in fact allow the Commission to determine whether the resulting market clearing prices would be just and reasonable.

## 2. Verification of Imports

### a. Request for Rehearing

30. TAPS seeks rehearing of Order No. 831’s exemption of all imports from the verification requirement for incremental energy offers above \$1,000/MWh and asserts that it is unjust and unreasonable and arbitrary, and that it puts internal and external resources on unequal footing.<sup>54</sup> According to TAPS, the Commission’s finding that some imports are not resource-specific and therefore cannot have their costs verified does not support exempting all imports from the verification requirement. Therefore, TAPS proposes that only resource-specific imports whose costs are verified by the receiving RTO/ISO should be able to set LMP, while other imports with offers above \$1,000/MWh that are not verified should receive uplift payments if their costs are verified after-the-fact. TAPS further argues that failing to verify the costs of imports presents a greater opportunity and incentive for generators to exercise market power. TAPS presents a hypothetical example of a market participant that owns generators both inside and outside of an RTO/ISO and asserts that such a market participant could use its external generators to make import offers above \$1,000/MWh that its internal generators would not be permitted to make. TAPS states that, if the market participant’s external resource sets the LMP in the RTO/ISO (*i.e.*, as an import), all of that market participant’s internal resources would receive infra-marginal rents.

Monitoring Unit must verify that cost-based incremental energy offers above \$1,000/MWh reasonably reflect a resource’s actual or expected costs.”)

<sup>52</sup> See *supra* P 22.

<sup>53</sup> Order No. 831, FERC Stats. & Regs. ¶ 31,387 at P 83.

<sup>54</sup> TAPS Request for Clarification/Rehearing at 12–15.

According to TAPS, such behavior would be difficult to monitor because Order No. 831 does not require cost information from external resources. TAPS therefore argues that, on rehearing, the Commission should prevent import offers above \$1,000/MWh from setting LMP in the importing RTO/ISO unless the import offer costs are verified in advance, and that the Commission should only permit uplift payments to imports that have been cost-verified after-the-fact.<sup>55</sup>

### b. Determination

31. We deny TAPS’ request for rehearing regarding the treatment of imports. In Order No. 831, the Commission found that exempting incremental energy offers from imports above \$1,000/MWh from the verification requirement was justified because imports are not similarly situated to internal resources.<sup>56</sup> Because they are not similarly situated, it was not arbitrary or capricious to treat import offers from external resources differently than offers from internal resources. Specifically, the Commission found that internal resources and imports are not similarly situated because, based on the record,<sup>57</sup> it may be impossible to identify the costs underlying an import offer because they are not resource-specific. Further, Order No. 831 remains consistent with current market power mitigation measures in RTOs/ISOs that generally apply to internal resources but not to imports.

32. With respect to TAPS’ proposed alternative which would prevent import offers above \$1,000/MWh from setting LMP if the costs cannot be verified, we reject it because, as supported in the record,<sup>58</sup> we continue to find that such a prohibition could discourage imports at times when they are most needed to provide additional supply and increased competition.<sup>59</sup> Further, as the Commission explained in Order No. 831, such a prohibition could also result in uneconomic flows between RTOs/ISOs.<sup>60</sup>

33. In Order No. 831, the Commission also considered market power concerns similar to those raised by TAPS in its rehearing request, but did not find that they warranted requiring cost-verification for import offers above \$1,000/MWh. The Commission explained that because “market participants can import energy from

adjacent markets and sell that energy in the RTO/ISO energy market . . . it is difficult for external resources in an adjacent market to withhold.”<sup>61</sup> The hypothetical example TAPS presents in its request for rehearing does not persuade us otherwise. First, and as the Commission explained in Order No. 831, it is unlikely that a resource-specific import transaction can successfully withhold energy from the destination market because any resource-specific import transaction is also competing against an import transaction that simply buys from the export market at the prevailing export market price. Second, the import offer in that example would only benefit a market participant that owns a fleet of internal and external generation (which is online and being compensated at the LMP in TAPS’ hypothetical example) if the import offer actually cleared the importing RTO/ISO’s energy market. However, such an import offer would only clear this market at a price above \$1,000/MWh if it were below the verified cost-based incremental energy offers of other internal resources and below other import offers. Thus, such an import would be beneficial to the importing RTO/ISO market as it would lower the clearing price compared to a situation without it. Therefore, TAPS’ example demonstrates that imports can lower an importing RTO/ISO’s LMP, which supports the Commission’s rationale for allowing import offers above \$1,000/MWh to set LMP.<sup>62</sup> For these additional reasons, we find that the regulations regarding the treatment of imports in Order No. 831 are just and reasonable and not arbitrary and capricious and reject TAPS’ proposal to prevent import offers above \$1,000/MWh from setting LMP in the importing RTO/ISO unless the import offer’s costs have been verified. For similar reasons, we deny TAPS’ proposal regarding uplift payments to imports. Finally, we note that in Order No. 831, the Commission stated it would consider RTO/ISO proposals under FPA section 205 to verify or otherwise review the costs of imports or exports and/or develop additional mitigation provisions for import and export transactions with offers above \$1,000/MWh.<sup>63</sup>

### C. Costs Included in Cost-Based Incremental Energy Offers

#### 1. Requests for Rehearing/Clarification

34. Exelon requests clarification, and alternatively rehearing, that the Commission did not intend to exclude any particular categories of variable costs, particularly those not tied to the price of the commodity associated with the resource's fuel supply. Exelon asserts that a resource's cost-based incremental energy offer is comprised not only of those costs linked to the price of fuel, but also of other variable costs, including but not limited to balancing costs and transportation costs. Exelon states that if the Commission does not grant its requested clarification, then it seeks rehearing on the basis that exclusion of other variable costs from cost-based incremental energy offers would lead to an unjust and unreasonable result.<sup>64</sup>

35. TAPS requests clarification, and alternatively rehearing, regarding whether opportunity costs may be recovered in addition to the \$100/MWh adder.<sup>65</sup> TAPS asserts that in Order No. 831, the Commission did not respond to the arguments it raised in response to the NOPR, did not explicitly state whether the \$100/MWh adder includes opportunity costs, and did not state whether RTOs/ISOs can allow opportunity costs when developing their verification methodologies. TAPS asks the Commission to clarify that if an RTO/ISO allows adders, the maximum total amount of such adders, including both opportunity costs and any other difficult-to-quantify costs, cannot exceed \$100/MWh. TAPS asserts that, if the Commission intended to permit RTOs/ISOs to propose verification methodologies that allow for the recovery of opportunity costs in addition to the \$100/MWh adder, the Commission should grant rehearing because opportunity costs should not be allowed under the "extreme" price levels at issue in this proceeding.<sup>66</sup>

36. NYISO requests that the Commission clarify that, when calculating uplift payments for the

recovery of verified costs, only actual, documented out-of-pocket costs should be paid after-the-fact and that no risk-related adders or opportunity costs be allowed when cost information is not submitted in a sufficiently timely manner to permit review and verification. NYISO states that it is concerned that the submission of legitimate, verifiable costs that exceed the \$1,000/MWh offer cap close in time to the day-ahead or real-time market close could deny NYISO sufficient time to perform cost verification. NYISO states that this could cause the resource's offer to be mitigated to a level that does not include the unverified, additional costs and could cause the resource to be committed when it would not have otherwise been or receive a larger schedule than it otherwise would have. NYISO asserts that its requested clarification would ensure all resources have an incentive to submit timely information to the RTO/ISO.<sup>67</sup>

#### 2. Determination

37. We deny Exelon's request for clarification, and alternatively rehearing, regarding whether the verification requirement intended to exclude particular categories of actual or expected costs, particularly variable costs that are non-fuel related costs. In Order No. 831, the Commission neither required RTOs/ISOs to change the methodologies they currently use to develop cost-based offers in order to satisfy the verification requirement nor prescribed the specific types of short-run marginal costs that could be included in cost-based incremental energy offers above \$1,000/MWh. We do not prejudge what types of costs RTOs/ISOs may propose as part of their compliance filings.

38. We deny TAPS' request for clarification, and alternatively rehearing, regarding whether the \$100/MWh limit on adders applies to opportunity costs. Opportunity costs are legitimate short-run marginal costs and not adders above cost. Cost-based incremental energy offers based on opportunity costs may currently set LMP in many RTOs/ISOs. Given that, in Order No. 831, the Commission did not require RTOs/ISOs to change the specific costs that they permit resources to include in cost-based incremental energy offers, resources in RTOs/ISOs that permit the use of opportunity costs in this manner may continue to do so after implementing Order No. 831. Because opportunity costs should be considered part of a cost-based

incremental energy offer, whether or not the offer exceeds \$1,000/MWh, verifiable opportunity costs should not be subject to the \$100/MWh limit on adders above cost. We do not prejudge the validity of including verifiable opportunity costs in cost-based incremental offers above \$1,000/MWh or the verification methods of such costs that RTOs/ISOs may propose as part of their compliance filings. We also reject TAPS' argument that the Commission failed to meaningfully address its arguments stating that opportunity costs should not be permitted at the "extreme" prices contemplated in this rulemaking.<sup>68</sup> As stated above, in a rulemaking, the Commission need not respond to every comment or analyze every alternative.<sup>69</sup> As explained here, opportunity costs are legitimate short-run marginal costs that should be considered part of a cost-based incremental energy offer, regardless of whether that offer exceeds \$1,000/MWh. Some current RTO/ISO practices permit cost-based incremental energy offers based on opportunity costs to set LMP, and the Commission in Order No. 831 did not require RTOs/ISOs to change which costs they may include in cost-based incremental energy offers. Therefore, TAPS' comments would not have resulted in a change in the rule.

39. We grant NYISO's request for clarification regarding the calculation of uplift payments. Resources are only eligible to receive uplift payments to make them whole to, at most, their submitted cost-based incremental energy offers if the associated offer and cost information is submitted in a sufficiently timely manner and verified by the RTO/ISO, meaning offers and supporting information must be provided consistent with RTO/ISO offer submission guidelines and approved by the RTO/ISO or Market Monitoring Unit. Consistent with Order No. 831, the after-the-fact uplift payment that a resource would be eligible to receive if its cost-based incremental energy offer above \$1,000/MWh is not verified prior to market clearing shall include only actual verifiable costs. We agree with NYISO that opportunity costs, like other costs, must be submitted in a timely manner. However, we clarify that if a resource avails itself of an RTO's/ISO's current rules to allow a resource to include opportunity costs in its cost-based incremental energy offer, then that RTO/ISO must give that resource an

<sup>64</sup> Exelon Request for Clarification/Rehearing at 4–6, 7–8 (citing *Motor Vehicle Mfrs. Ass'n*, 463 U.S. at 43; *NorAm Gas Transmission Co. v. FERC*, 148 F.3d 1158, 1165 (D.C. Cir. 1998); *PPL Wallingford Energy LLC v. FERC*, 419 F.3d 1194, 1198 (D.C. Cir. 2005)).

<sup>65</sup> TAPS Request for Clarification/Rehearing at 2 (citing *Canadian Ass'n of Petroleum Producers*, 254 F.3d 289).

<sup>66</sup> *Id.* at 16–18 (citing *PJM Interconnection, L.L.C.*, 126 FERC ¶ 61,145, at P 28 n.34 (2009) ("The opportunity cost associated with providing 'must run' output is the value associated with the lost opportunity to produce energy during a higher valued time period within the year.")).

<sup>67</sup> NYISO Request for Clarification/Rehearing at 15–16.

<sup>68</sup> TAPS Request for Clarification/Rehearing at 17–18.

<sup>69</sup> See *supra* P 12 (citing *American Min. Congress*, 907 F.2d at 1187–88; (citing *Thompson*, 741 F.2d at 408; *ACLU*, 823 F.2d at 1581)).

opportunity to recover those opportunity costs through an uplift payment, subject to verification. We further clarify that a resource may not receive uplift payments for incremental energy costs in excess of the costs included in its verified incremental energy offer. That is, a resource may not submit a cost-based incremental energy offer based on expected costs prior to the market clearing process and subsequently receive uplift payments to make it whole to an offer above the \$/MWh level(s) of its offer(s).<sup>70</sup> In this instance, allowing a resource to receive uplift in excess of its verified cost-based incremental energy offer could give that resource the incentive to submit offers that do not reflect its actual short-run marginal costs and could thus result in inefficient resource selection.

40. Further, such after-the-fact uplift payments may not include any adders above cost, including risk related adders, because actual costs are known after-the-fact.<sup>71</sup> This finding is consistent with Commission precedent regarding PJM's requests for waivers of certain tariff provisions related to its offer cap.<sup>72</sup>

### III. Information Collection Statement

41. The Paperwork Reduction Act (PRA)<sup>73</sup> requires each federal agency to seek and obtain Office of Management and Budget (OMB) approval before undertaking a collection of information directed to ten or more persons or contained in a rule of general applicability. OMB's regulations,<sup>74</sup> in turn, require approval of certain information collection requirements imposed by agency rules.

42. The Commission is amending its regulations to clarify what the Commission already required in Order No. 831—that either actual or expected costs included in incremental energy offers above \$1,000/MWh may be submitted for verification. The Commission estimates that there will be no net change to burden.

<sup>70</sup> For example, a resource may not submit a \$2,300/MWh offer based on expected short-run marginal cost that is verified and clears the market and receive uplift associated with incremental energy costs above \$2,300/MWh, even if that resource's actual short-run marginal cost, based on an after-the-fact review, is \$2,500/MWh.

<sup>71</sup> Order No. 831, FERC Stats. & Regs. ¶ 31,387 at P 146.

<sup>72</sup> In the 2015 PJM offer cap order, the Commission found that “the 10 percent adder [above costs] is unjust and unreasonable as applied to ex post review of documented costs, because the cost [sic] are no longer uncertain.” See *PJM Interconnection L.L.C.*, 153 FERC ¶ 61,289, at P 31 (2015). See also *PJM Interconnection, L.L.C.*, 149 FERC ¶ 61,059, at P 13 (2014).

<sup>73</sup> 44 U.S.C. 3501–3520.

<sup>74</sup> 5 CFR 1320 (2017).

43. Interested persons may obtain information on the reporting requirements by contacting: Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426 [Attention: Ellen Brown, Office of the Executive Director, email: [DataClearance@ferc.gov](mailto:DataClearance@ferc.gov), phone: (202) 502–8663, fax: (202) 273–0873]. Comments concerning the requirements of this rule may also be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 [Attention: Desk Officer for the Federal Energy Regulatory Commission]. For security reasons, comments should be sent by email to OMB at [oir\\_submission@omb.eop.gov](mailto:oir_submission@omb.eop.gov). Comments submitted to OMB should refer to FERC–516C and OMB Control Number 1902–0287.

### IV. Regulatory Flexibility Act Certification

44. The Regulatory Flexibility Act of 1980 (RFA)<sup>75</sup> generally requires a description and analysis of rules that will have significant economic impact on a substantial number of small entities. The RFA does not mandate any particular outcome in a rulemaking. It only requires consideration of alternatives that are less burdensome to small entities and an agency explanation of why alternatives were rejected. The Commission has determined that there will not be a significant impact on a substantial number of small entities, therefore these requirements under the RFA do not apply.

### V. Document Availability

45. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page (<http://www.ferc.gov>) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE., Room 2A, Washington DC 20426.

46. From FERC's Home Page on the Internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

<sup>75</sup> 5 U.S.C. 601–12.

47. User assistance is available for eLibrary and the FERC's Web site during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at [ferconlinesupport@ferc.gov](mailto:ferconlinesupport@ferc.gov), or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at [public.referenceroom@ferc.gov](mailto:public.referenceroom@ferc.gov).

### VI. Effective Date

48. These regulations are effective January 16, 2018.

### List of Subjects in 18 CFR Part 35

Electric power rates, Electric utilities, Non-discriminatory open access transmission tariffs.

By the Commission.

Issued: November 9, 2017.

**Nathaniel J. Davis, Sr.**,

*Deputy Secretary.*

### Regulatory Text

In consideration of the foregoing, the Commission amends part 35, chapter I, title 18, *Code of Federal Regulations*, as follows:

### PART 35—FILING OF RATE SCHEDULES AND TARIFFS

- 1. The authority citation for part 35 continues to read as follows:

**Authority:** 16 U.S.C. 791a–825r, 2601–2645; 31 U.S.C. 9701; 42 U.S.C. 7101–7352.

- 2. Revise § 35.28(g)(9) to read as follows:

#### § 35.28 Non-discriminatory open access transmission tariff.

\* \* \* \* \*

(g) \* \* \*

(9) A resource's incremental energy offer must be capped at the higher of \$1,000/MWh or that resource's cost-based incremental energy offer. For the purpose of calculating Locational Marginal Prices, Regional Transmission Organizations and Independent System Operators must cap cost-based incremental energy offers at \$2,000/MWh. The actual or expected costs underlying a resource's cost-based incremental energy offer above \$1,000/MWh must be verified before that offer can be used for purposes of calculating Locational Marginal Prices. If a resource submits an incremental energy offer above \$1,000/MWh and the actual or expected costs underlying that offer cannot be verified before the market clearing process begins, that offer may not be used to calculate Locational Marginal Prices and the resource would be eligible for a make-whole payment if that resource is dispatched and the

resource's actual costs are verified after-the-fact. A resource would also be eligible for a make-whole payment if it is dispatched and its verified cost-based incremental energy offer exceeds \$2,000/MWh. All resources, regardless of type, are eligible to submit cost-based incremental energy offers in excess of \$1,000/MWh.

#### Kentucky Regulatory Program

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Final rule; approval of amendment.

**SUMMARY:** We are approving an amendment to the Kentucky regulatory program (hereinafter, the "Kentucky program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). Kentucky submitted a proposed amendment to OSMRE that includes revisions to the Kentucky Revised Statutes (KRS) as authorized by House Bill 385 (HB 385), regarding bonding of surface coal mining and reclamation operations. **DATES:** The effective date is December 18, 2017.

**FOR FURTHER INFORMATION CONTACT:** Robert Evans, Telephone: (859) 260-3900. Email: [bevans@osmre.gov](mailto:bevans@osmre.gov).

#### SUPPLEMENTARY INFORMATION:

- I. Background on the Kentucky Program
- II. Description of the Amendment
- III. OSMRE's Findings
- IV. Summary and Disposition of Comments
- V. OSMRE's Decision
- VI. Procedural Determinations

#### I. Background on the Kentucky Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its program includes, among other things, State laws and regulations that govern surface coal mining and reclamation operations in accordance with the Act and consistent

with the Federal regulations. See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Kentucky program on May 18, 1982. You can find background information on the Kentucky program, including the Secretary's findings, the disposition of comments, and conditions of approval of the Kentucky program in the May 18, 1982, **Federal Register** (47 FR 21404, 21434). You can also find later actions concerning Kentucky's program and program amendments at 30 CFR 917.11, 917.12, 917.13, 917.15, 917.16, and 917.17.

#### II. Description of the Proposed Amendment

On May 10, 2011, Kentucky submitted an amendment to OSMRE for approval that proposed bonding revisions to the KRS as authorized by HB 385, which passed during the State's regular 2011 legislative session. HB 385 was passed in response to OSMRE's findings in its January 5, 2011, National Priority Oversight Evaluation of the Adequacy of Kentucky Reclamation Performance Bond Amounts (National Oversight Study) report. In that report, OSMRE oversight and programmatic reviews identified that current reclamation performance bonds in Kentucky are not sufficient to complete the reclamation required in approved permits. On February 3, 2011, the Kentucky Department for Natural Resources (KYDNR) and OSMRE signed an Action Plan detailing the steps necessary for correcting identified bond calculation deficiencies. The Action Plan required KYDNR to complete revised bonding protocols by April 1, 2011, along with a timetable for implementation for new and existing permits. HB 385 amends Kentucky Revised Statutes 350.060 to provide that:

Within thirty (30) days of a cabinet determination of a need to change a bond protocol currently in use, the cabinet shall immediately promulgate administrative regulations setting forth bonding requirements including, but not limited to, requirements for the amount, duration, release, and forfeiture of bonds. Bond protocols shall not be exempt from KRS 13A.100 and shall be established by promulgating administrative regulations under KRS Chapter 13A. Failure to include the formula for establishing the amount of the bond in any administrative regulation on bonding requirements shall be deemed a failure to comply with the prescriptions of this section and the administrative regulation shall automatically be declared deficient in accordance with KRS Chapter 13A.

We announced receipt of the amendment and asked for comments in a **Federal Register** notice published on

August 15, 2011 (76 FR 50436). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting. We did not hold a public hearing or meeting because no one requested one. The public comment period ended on September 14, 2011. We received comments from two organizations.

#### III. OSMRE's Findings

The following are the findings we made concerning Kentucky's proposed amendment under SMCRA at Section 509, 30 U.S.C. 1259 and the Federal regulations at 30 CFR 800.14 and 800.15.

##### *KRS 350.060 (11) Processing Permit Applications*

The new language in KRS 350.060 (11) is intended to ensure that bond protocol regulations include the formula for establishing the amount of the bond. Failure to do so would result in any administrative regulations or bonding requirements to be declared deficient automatically, in accordance with KRS Chapter 13A.

While these proposed State revisions have no direct Federal counterparts there is no provision in SMCRA or its implementing regulations that prohibits a State from requiring its bond protocols to be implemented solely as regulations. On their face, the proposed revisions are not inconsistent with Section 509 of SMCRA and 30 CFR 800.14, and we are therefore approving them, as noted below.

While HB 385 could be construed to require the KYDNR to implement all bond adjustments as regulations before the adjustments can be made, to do so would be inconsistent with the literal construction of the language of the bill. Therefore, we do not construe HB 385 to apply to individual bonding adjustments, or other individual bonding decisions.

Rather, we are approving the proposed amendment, in accordance with its plain language, which will not impede implementation of the requirement in Section 509 of SMCRA that "[t]he amount of the bond shall be sufficient to assure the completion of the reclamation plan if the work had to be performed by the regulatory authority in the event of forfeiture." Nor will the proposed amendment impede the obligation of the regulatory authority to adjust the amount of bond in accordance with 30 CFR 800.15. Should we find, however, during oversight, that the amendment is being interpreted in a manner that would render it inconsistent with either Section 509 of

SMCRA or 30 CFR 800.15 we will initiate proceedings under 30 CFR 730.11(a), to publish a notice in the **Federal Register** setting forth the text or a summary of that provision and provide 30 days' notice for public comment. Following the public comment period, a final determination will be made and published in the **Federal Register**.

Further, we are approving the proposed amendment because, in accordance with its plain language, it will not impede the regulatory authority's ability to address the current bond deficiencies identified in the National Oversight Study and the February 3, 2011, Action Plan detailing the steps necessary for correcting bond calculation deficiencies that were identified in the study. Specifically, OSMRE expects the KYDNR to ensure the adequacy of bonds on all currently issued permits through the adjustment process, and all permits issued pending the formal revision to any existing bonding protocol. Should we find, however, during oversight, that the amendment is being implemented in a manner that would impede the regulatory authority's ability to address current bond deficiencies, we will initiate proceedings under 30 CFR 730.11(a), as appropriate, to have the provisions of the amendment set forth and set aside.

Finally, we are approving the amendment with the understanding that it would not apply to bond protocols or bonding regulations in existence as of the date that HB 385 became effective. Should we find, however, during oversight, that the amendment is being interpreted in a manner that would render it applicable to bond protocols or regulations in existence as of the date that the amendment became effective, we will initiate proceedings under 30 CFR 730.11(a) to publish a notice in the **Federal Register** setting forth the text or a summary of that provision and provide 30 days' notice for public comment. Following the public comment period, a final determination will be made and published in the **Federal Register**.

#### IV. Summary and Disposition of Comments

##### Public Comments

We asked for public comments on the amendment and received responses from Coal Operators & Associates, Inc. (COA) and Kentucky Resources Council (KRC).

1. COA stated that the language of our August 15, 2011, **Federal Register** Notice (76 FR 50436) was somewhat

misleading, insofar as it would lead one to believe that HB 385 addresses individual bond amounts. To the contrary, according to COA, HB 385 pertains to "bond protocols" and "bonding requirements," not "a bond amount." The plural nature of the phrases as well as common usage of the words "protocols" and "requirements" accurately reflect the fact that HB 385 addresses the overall scheme or template that will be used to establish bond amounts and the "formula" to be used.

*Response*—OSMRE has interpreted HB 385 to apply to bond protocols and bond formulas and not individual bond amounts. OSMRE's approval of the proposed amendment reflects its understanding that it addresses these protocols and bond formulas used to determine bond amounts and that Kentucky will require all surface coal mining and reclamation permit applications to post a bond amount sufficient to meet the requirement in Section 509 of SMCRA that "[t]he amount of the bond shall be sufficient to assure the completion of the reclamation plan if the work had to be performed by the regulatory authority in the event of forfeiture."

2. COA stated that the intent of HB 385 is to prevent Kentucky from arbitrarily changing bond protocols, requirements or formulae without adequate transparency and public comment.

*Response*—We believe that our approval of this amendment, with the limitations as set forth in the Findings above, will not diminish any requirements of the Kentucky program regarding the ability of the public to comment on regulations regarding bonding.

3. According to COA, the purpose of HB 385 is to insure that the Energy and Environment Cabinet (EEC) follows the statutory mandates that have existed since the inception of the Kentucky Permanent Regulatory Program. To accomplish that, HB 385 provides for statutory declarations of deficiency if the bonding formula is not promulgated as a KRS Ch. 13A regulation.

*Response*—While we agree that HB 385 provides for statutory declaration of deficiency in the event bonding formulas are not promulgated as regulation, the basis of our decision is based on the understanding that bond adjustments for specific surface coal mining operations are not required to be promulgated as regulations.

4. The COA stated that the KRS Ch. 13A Administrative Regulation process is one based upon public input, comment and review. Briefly, proposed

regulations are not only published in the Administrative Register of Kentucky, but, EEC provides electronic notification to any interested citizen or stakeholder. Oral testimonies at public hearings, written comments that are submitted, as well as testimonies before the Administrative Regulation Review Sub-committee and the appropriate House and Senate Committees provide interested parties adequate notice and input on proposed regulations.

*Response*—This is not an issue before OSMRE in its consideration or review of Kentucky's proposed amendment on bonding protocols.

5. COA explained that some concern has been expressed about the length of time it takes under KRS Ch. 13A to adopt new, ordinary regulations. The Governor of the Commonwealth can issue an emergency regulation which becomes effective upon his signature. (KRS 13A.170 and 190). The ordinary regulation is filed simultaneously and proceeds through the mandatory process. Concurrently, the emergency regulation is in effect.

*Response*—OSMRE agrees that the Kentucky Governor can, under appropriate circumstances, issue emergency regulations.

6. KRC stated its belief that HB 385 was sought by the Kentucky coal industry as a mechanism for delaying the adoption of changes in the bonding calculations and amounts.

*Response*—As stated previously, OSMRE's approval of the proposed amendment is based on its conclusion that it applies to bond protocols and formulas, and does not require bond adjustments for specific surface coal mining operations to be promulgated as regulations.

7. KRC asserted that HB 385 was enacted at a time when Kentucky was in default of its ongoing, enforceable obligation under 30 CFR 733.11 to "implement, administer, enforce and maintain it in accordance with the Act, this chapter and the provisions of the approved State program." More specifically, Kentucky was, and is, in continuing violation of mandatory obligations outlined in 30 CFR 800.4. KRC also believes that absent a commitment from Kentucky to resolve the bond amount issue, they are in default as required by 30 CFR 733.11. Therefore, KRC urged OSMRE to take steps to promptly remove State regulation approval with respect to bond calculation and adjustment for new and existing permits, and to substitute direct Federal enforcement of the requirements of 30 U.S.C. 1259, unless Kentucky revises the bond calculation protocols to assure adequate

bond amounts for new and existing permits, and commits to incorporate those revisions into emergency regulation.

*Response*—This comment, which requests that we take action pursuant to 30 CFR part 733 is beyond the scope of this rulemaking.

8. KRC does not oppose the amendments on their face, since SMCRA is silent as to whether bond calculation methodologies must be implemented in regulatory form, and since requiring these methodologies to be promulgated as regulations will require OSMRE approval and public opportunity to comment. However, KRC states that OSMRE should request that the State clarify that it interprets the amendment to apply to bond calculation formulae and not to individual bond calculation decisions, or revisions thereto.

*Response*—As noted in the Findings, above, OSMRE is approving this proposed amendment based on the plain language of the amendment and OSMRE's conclusion that the amendment does not apply to bond calculations for individual permits.

9. Next, KRC stated that OSMRE should require the State to clarify that the provision declaring deficient any bond calculation formula that is not promulgated as a regulation applies only to changes in such protocols, and not to existing protocols. KRC further stated that clarification should also be sought as to the State's interpretation of the last sentence of the amendment, since, read broadly; it could affect existing, approved bonding regulations that are a necessary component of the state regulatory program.

*Response*—As noted above, we are approving the amendment based on our understanding that the proposed amendment would not apply to bond protocols or bonding regulations in existence on the date that HB 385 became effective. Further, approval of this proposed amendment will not affect existing, approved bonding regulations that are a necessary component of the State regulatory program. If OSMRE finds that the promulgation of regulations impedes the implementation of the bond sufficiency requirement, OSMRE will notify Kentucky that the approval of the amendment will be revoked. If this occurs, the State will not be permitted to amend bond protocols via regulation.

#### *Federal Agency Comments*

Under 30 CFR 732.17(h)(11)(i) and Section 503(b) of SMCRA, on August 15, 2011, we requested comments on the amendments from various Federal

agencies with an actual or potential interest in the Kentucky program (Administrative Record No. KY-1665). No comments were received.

#### *Environmental Protection Agency (EPA) Concurrence and Comments*

Under 30 CFR 732.17(h)(11)(ii), we are required to get a written concurrence from EPA for those provisions of the program amendment that relate to air or water quality standards issued under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). None of the revisions that Kentucky proposed to make in this amendment pertains to air or water quality standards. Therefore, we did not ask EPA to concur on the amendment.

#### **V. OSMRE's Decision**

Based on our findings, OSMRE approves the amendment Kentucky sent to us on May 10, 2011, revising the Kentucky Revised Statutes (KRS) as authorized by HB 385 regarding bonding of surface coal mining and reclamation operations.

To implement this decision, we are amending the Federal regulations at 30 CFR part 917 which codify decisions concerning the Kentucky program. In accordance with the Administrative Procedure Act, this rule will take effect 30 days after date of publication. Section 503(a) of SMCRA requires that the State's program demonstrate that the State has the capability of carrying out the provisions of the Act and meeting its purposes. SMCRA requires consistency of State and Federal standards.

#### **VI. Procedural Determinations**

##### *Executive Order 12630—Takings*

This rule does not have takings implications. This determination is based on the analysis performed for the counterpart Federal regulation.

##### *Executive Order 12866—Regulatory Planning and Review*

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866.

##### *Executive Order 12988—Civil Justice Reform*

The Department of the Interior has conducted the reviews required by Section 3 of Executive Order 12988 and has determined that this rule meets the applicable standards of Subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments because each program is drafted and promulgated by a specific State, not by

OSMRE. Under Sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and the Federal regulations at 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR parts 730, 731, and 732 have been met.

##### *Executive Order 13132—Federalism*

This rule does not have Federalism implications. SMCRA delineates the roles of the Federal and State governments with regard to the regulation of surface coal mining and reclamation operations. One of the purposes of SMCRA is to “establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations.” Section 503(a)(1) of SMCRA requires that State laws regulating surface coal mining and reclamation operations be “in accordance with” the requirements of SMCRA, and Section 503(a)(7) requires that State programs contain rules and regulations “consistent with” regulations issued by the Secretary pursuant to SMCRA.

##### *Executive Order 13175—Consultation and Coordination With Indian Tribal Government*

In accordance with Executive Order 13175, we have evaluated the potential effects of this rule on Federally recognized Indian tribes and have determined that the rule does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. The basis for this determination is that our decision is on a State Regulatory program and does not involve a Federal Regulation involving Indian Lands.

##### *Executive Order 13211—Regulations That Significantly Affect the Supply, Distribution, or Use of Energy*

Executive Order 13211 of May 18, 2001, requires agencies to prepare a Statement of Energy Effects for a rule that is (1) considered significant under Executive Order 12866, and (2) likely to have a significant adverse effect on the supply, distribution, or use of energy. Because this rule is exempt from review under Executive Order 12866 and is not expected to have a significant adverse effect on the supply, distribution, or use

of energy, a Statement of Energy Effects is not required.

*National Environmental Policy Act*

This rule does not require an environmental impact statement because Section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of Section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

*Paperwork Reduction Act*

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

*Regulatory Flexibility Act*

The Department of the Interior certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. In

making the determination as to whether this rule would have a significant economic impact, the Department relied upon data and assumptions for the counterpart Federal regulations.

*Small Business Regulatory Enforcement Fairness Act*

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule: (a) Does not have an annual effect on the economy of \$100 million; (b) will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and (c) does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. This determination is based upon the fact that the Kentucky submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

*Unfunded Mandates*

This rule will not impose an unfunded mandate on State, local, or tribal governments or the private sector

of \$100 million or more in any given year. This determination is based upon the fact that the Kentucky submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation did not impose an unfunded mandate.

**List of Subjects in 30 CFR Part 917**

Intergovernmental relations, Surface mining, Underground mining.

Dated: September 19, 2017.

**Thomas D. Shope**

*Regional Director, Appalachian Region.*

For the reasons set out in the preamble, 30 CFR part 917 is amended as set forth below:

**PART 917—KENTUCKY**

■ 1. The authority citation for part 917 continues to read as follows:

**Authority:** 30 U.S.C. 1201 *et seq.*

■ 2. Section 917.15 is amended by adding a new entry to the table in paragraph (a) in chronological order by “Date of final publication” to read as follows:

**917.15 Approval of Kentucky regulatory program amendments.**

**33 CFR Part 100**

[Docket Number USCG-2015-0427]

RIN 1625-AA08

**Special Local Regulation; Mavericks Surf Competition, Half Moon Bay, CA**

**AGENCY:** Coast Guard, DHS.

**ACTION:** Final rule.

**SUMMARY:** The Coast Guard is revising a special local regulation in the navigable waters of Half Moon Bay, CA, near Pillar Point in support of the Mavericks Surf Competition, an annual invitational surf

competition held at the Mavericks Break. This revision is necessary to improve the regulation by making it clearer and to have it better reflect the natural conditions that must be met for this surf competition to take place. This regulation is necessary to provide for the safety of life on the navigable waters immediately prior to, during, and immediately after the surfing competition, which is held only one day between November 1 of each year and March 31 of the following year. This revision temporarily restricts vessel traffic in the vicinity of Pillar Point and prohibits vessels and persons not participating in or directly supporting the surfing event from entering the dedicated surfing area and a designated no-entry area.

**DATES:** This rule is effective December 18, 2017.

**ADDRESSES:** To view documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type the docket number USCG-2015-0427 in the “SEARCH” box and click “SEARCH.” Click on Open Docket Folder on the line associated with this rule.

## II. Background Information and Regulatory History

The Mavericks Surf Competition has grown in popularity within the past several years. Due to the inherent dangers of the competition and the disruption to the normal uses of the waterways in the vicinity of Pillar Point, the Coast Guard issues a Marine Event Permit to the event sponsor. Following the collapse of the Cliffside viewing area in 2011, the Coast Guard became concerned that the loss of shore-side viewing area would result in a larger than expected number of spectator vessels in the vicinity of the event.

This final rule formalizes the scheme employed during the 2013 and 2014 competitions, which proved to be an effective means of separating competitors from spectators. The two zones and associated regulations contained in this final rule are intended to ensure the safety of competitors from spectator vessels, and enhances the safety of spectator vessels by creating a designated area in which the Coast Guard may direct the movement of such vessels. Because of the dangers posed by the surf conditions during the Mavericks Surf Competition, the special local regulation is necessary to provide for the safety of event participants, spectators, and other vessels transiting the event area. For the safety concerns noted, it is in the public interest to have these regulations in effect during the event.

On October 15, 2014, the Coast Guard published an interim rule and request for comments in the **Federal Register** (79 FR 61762) establishing the special local regulation 33 CFR 100.1106. We received no comments during the comment period on the interim rule. Although the event was not held during the 2014–2015 season, the planning process proved to be vital in identifying updates to the rule as proposed here. This final rule finalizes the Interim Rule updates proposed in the Notice of Proposed Rule Making.

On November 3, 2015 and November 23, 2016, we promulgated temporary final rules for the Mavericks Surf Competition, which was most recently held on February 12, 2016, and subsequently not held in the 2016–2017 season after the sponsoring organization filed for bankruptcy. The temporary rules were needed to incorporate the updates noted in this Final Rule which include: Requiring buoy position maintenance by the event sponsors, expanding the definition of “spectator vessel” to include human powered craft and expanding the definition of “support vessel” to include jet skis. The

Coast Guard determined a NPRM was necessary to afford the public the opportunity to comment on the aforementioned updates to the Interim Rule and because the Mavericks Surf Competition would occur before NPRM process was complete. Therefore to meet the event season deadline, a temporary final rule was published in lieu of a final rule. Past competitions have demonstrated the importance of restricting access to the competition area to only vessels in direct support of the competitors. In the Coast Guard’s assessment, that temporary final rule provided an effective scheme to incorporate the Interim Rule updates and ensure the safety of life during the Mavericks Surf Competition.

On January 10, 2017, we published an NPRM titled Special Local Regulation; Mavericks Surf Competition, Half Moon Bay, CA (82 FR 2930). During the comment period which ended on February 9, 2017, three comments were received.

We are implementing the following changes to the Interim Rule based on comments received as well as lessons learned during the multi-agency planning process. The name of this event has changed over the years based on the sponsoring organization. The Coast Guard is promulgating this rule using the event name “Mavericks Surf Competition” to remove any affiliation with past or future sponsors and to keep the name of the event generic and applicable to any future sponsoring organizations. In addition to initially placing the buoys to outline Zones 1 and 2, this rule expands the event sponsor’s designation of responsibility, outlined in the Interim Rule, to include buoy position maintenance throughout the course of the event. The definition of “support vessels” has been updated to specifically include jet skis and to clarify that they must be pre-designated and approved to serve as such for this event by the Officer in Charge of Marine Inspections (OCMI) prior to the competition. Finally, the definition of “spectator vessel” was expanded to specifically include human-powered craft.

## III. Legal Authority and Need for Rule

Under 33 CFR 100.35, the Coast Guard District Commander has authority to promulgate certain special local regulations deemed necessary to ensure the safety of life on the navigable waters immediately before, during, and immediately after an approved regatta or marine parade. The Commander of Coast Guard District 11 has delegated to the Captain of the Port (COTP) San

Francisco the responsibility of issuing such regulations.

The Mavericks Surf Competition is a one-day “Big Wave” surfing competition between big wave surfers specifically invited to participate by the event sponsor. The competition only occurs when 15–20 foot waves are sustained for over 24 hours and are combined with mild easterly winds of no more than 5–10 knots. The rock and reef ridges that make up the sea floor of the Pillar Point area, combined with optimal weather conditions, create the large waves for which Mavericks is known. Due to the hazardous waters surrounding Pillar Point at the time of the surfing competition, the Coast Guard is modifying and finalizing the interim rule which establishes a special local regulation in the vicinity of Pillar Point that restricts navigation in the area of the surf competition and in neighboring hazardous areas. This final rule is intended to ensure the safety of competitors by delineating a specific competition area, and to provide for the safety of spectators by imposing operating restrictions on those vessels.

## IV. Discussion of Comments, Changes, and the Rule

As noted above, the Coast Guard received three respondent comments, noting several concerns, to the NPRM published on January 10, 2017. One comment recommends a more stringent specificity of swell conditions on the day of the event to promote the safe operation of vessels in the area. The environmental parameters outlined in this regulation are determining factors which are necessary precursors to optimal conditions for holding the big wave surfing event; conditions which typically are not optimal for vessel operations. In order to mitigate the risk to safe operation of vessels on the day of the surfing event, the Coast Guard promulgated the Interim Rule which defines an operating area for spectator vessels. The operating area provides an area for spectator vessels that is minimally influenced by the breaking surf. The Coast Guard determined that, the introduction of specific swell periodicity as a Coast Guard required condition to hold the competition would unnecessarily limit favorable days in which the surfing event could take place without further mitigating the risk to vessel operations on the day of the event.

One comment notes the economic determination in the NPRM to be erroneous, as the rule would have a significant economic impact on a substantial number of small entities. The Coast Guard disagrees with this

comment. The amendments within this rule do not unduly restrict spectator vessel traffic within Zone 2, the spectator viewing area. In contrast, the Coast Guard aims to facilitate the safe viewing of this surf competition by establishing and assigning maintenance responsibility of a clearly delineated region for spectators to safely maneuver while viewing the competition.

One comment recommends defining specific parameters that must be met by support vessels. The Coast Guard finds that mandating specific vessel parameters for “supporting vessels” unduly limits the event sponsor from considering all available assets capable of providing support to the event. Under the current proposal, all vessels proposed by the sponsor as “support vessels” must be vetted and approved for operation, in their capacity, as a “support vessel” prior to the day of the event. The vetting and approval of “support vessels” is conducted as a necessary precursor to the issuance of the annual Marine Event Permit. In this process, it is incumbent upon the event sponsor to propose only vessels necessary and capable of safely providing direct support to event competitors. Each proposed vessel is thoroughly evaluated by the OCM and assessed in regards to the Coast Guard’s ability to safely render assistance if needed on the day of the event. Proposed “support vessels” whose maneuverability, crew manning, or scope of support is found to be insufficient to safely operate within Zone 1, will be limited in the range of their operation in support of the event or denied approval to serve as a supporting vessel entirely, as stipulated in the documentation associated with the annual Marine Event Permit issued to the event sponsor.

One comment argued that the definition of “spectator vessel” was too vague. The Coast Guard finds that the definition of a “spectator vessel” as “any vessel or person, including human-powered craft, which is not designated by the sponsor as a support vessel” serves to differentiate between conspicuously marked “support vessels” which have previously been vetted and approved by the OCM as part of the Marine Event Permit approval to provide direct support to the competitors, and all other vessels in the area on the day of the event.

No changes were made to the rule based upon the received comments; however the Coast Guard recognizes the importance of imposing appropriate controls on vessels attempting to gain access to the area encompassed by Zone 1 on the day of the competition.

The Coast Guard is finalizing the regulations governing the Mavericks Surf Competition. The Mavericks Surf Competition will take place on a day that presents favorable surf conditions between November 1 of each year and March 31 of the following year, from 6 a.m. until 6 p.m. The Mavericks Surf Competition can only occur when 15–20 foot waves are sustained for over 24 hours and are combined with mild easterly winds of no more than 5–10 knots. Unpredictable weather patterns and the event’s narrow operating window limit the Coast Guard’s ability to notify the public of the event. The Coast Guard would issue notice of the event as soon as practicable, but no later than 24 hours before Competition day via the Broadcast Notice to Mariners and issue a written Boating Public Safety Notice at least 24 hours in advance of Competition day. Also, the zones that are established by this final rule will be prominently marked by at least 8 buoys throughout the course of the event.

The Mavericks Surf Competition will occur in the navigable waters of Half Moon Bay, CA, in the vicinity of Pillar Point as depicted in National Oceanic and Atmospheric Administration (NOAA) Chart 18682. The Coast Guard will enforce a regulated area defined by an arc extending 1,000 yards from Sail Rock (37°29’34” N., 122°30’02” W.) excluding the waters within Pillar Point Harbor. All restrictions apply only between 6 a.m. and 6 p.m. on the day of the actual competition.

The effect of this regulation is to restrict navigation in the vicinity of Pillar Point during the Mavericks Surf Competition. During the enforcement period, the Coast Guard will direct the movement and access of all vessels within the regulated area. The regulated area will be divided into two zones. Zone 1 is designated as the competition area, and the movement of vessels within Zone 2 is controlled by the Patrol Commander (PATCOM).

This regulation is needed to keep spectators and vessels a safe distance away from the event participants and the hazardous waters surrounding Pillar Point. Past competitions have demonstrated the importance of restricting access to the competition area to only vessels in direct support of the competitors. Failure to comply with the lawful directions of the Coast Guard could result in additional vessel movement restrictions, citation, or both.

## V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking.

Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

### A. Regulatory Planning and Review

Executive Orders 12866 (“Regulatory Planning and Review”) and 13563 (“Improving Regulation and Regulatory Review”) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, disruptive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 13771 (“Reducing Regulation and Controlling Regulatory Costs”), directs agencies to reduce regulation and control regulatory costs and provides that “for every one new regulation issued, at least two prior regulations be identified for elimination, and that the cost of planned regulations be prudently managed and controlled through a budgeting process.”

The Office of Management and Budget (OMB) has not designated this rule a significant regulatory action under section 3(f) of Executive Order 12866. Accordingly, OMB has not reviewed it. As this rule is not a significant regulatory action, this rule is exempt from the requirements of Executive Order 13771. See OMB’s memorandum “Guidance Implementing Executive Order 13771, titled ‘Reducing Regulation and Controlling Regulatory Costs’” (April 5, 2017).

### B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard did not receive any comments from the Small Business Administration on the Interim rule published on October 15, 2014. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in

understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1-888-REG-FAIR (1-888-734-3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

#### C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520).

#### D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

#### E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531-1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In

particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

#### F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a regulated area of limited size and duration. Normally such actions are categorically excluded from further review under paragraph 34(h) of Figure 2-1 of Commandant Instruction M16475.ID. A Record of Environmental Consideration is available in the docket for this rulemaking. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

#### G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

#### List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, and Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

#### PART 100—REGATTAS AND MARINE PARADES

- 1. The authority citation for part 100 is revised to read as follows:

**Authority:** 33 U.S.C. 1233; 33 CFR 1.05-1.

- 2. Revise § 100.1106 to read as follows:

#### § 100.1106 Special Local Regulation; Mavericks Surf Competition.

(a) *Location.* This special local regulation establishes a regulated area

on the waters of Half Moon Bay, located in the vicinity of Pillar Point, excluding the waters within Pillar Point Harbor. This regulated area is defined in paragraph (c) of this section.

(b) *Enforcement period.* This section will be enforced between 6 a.m. and 6 p.m. on Competition day, which if defined wave and wind conditions are met, will occur for one day between November 1 of each year and March 31 of the following year. Notice of the specific enforcement date of this section will be announced via Broadcast Notice to Mariners and issued in writing by the Coast Guard in a Boating Public Safety Notice at least 24 hours in advance of Competition day.

(c) *Definitions.* As used in this section—

*Competition day* means the one day between November 1 of each year and March 31 of the following year that Mavericks Surf Competition will be held. The Mavericks Surf Competition will only be held if 15 to 20 foot waves are sustained for over 24 hours and are combined with mild easterly winds of no more than 5 to 10 knots.

*Competitor* means a surfer enrolled in the Maverick's Surf Competition.

*Patrol Commander or PATCOM* means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer, or a Federal, State, or local officer designated by the Captain of the Port San Francisco (COTP), to assist in the enforcement of the special local regulation.

*Regulated area* means the area in which the Maverick's Surf Competition will take place. This area is bounded by an arc extending 1000 yards from Sail Rock (37°29'34" N., 122°30'02" W.) excluding the waters within Pillar Point Harbor. All coordinates are North American Datum 1983. Within the regulated area, at least two zones will be established and marked by buoys on the day of the competition. Due to the dynamic and changing nature of the surf, the exact size and location of the zones will not be made public until the competition day. The zones will be prominently marked by at least 8 buoys, placed and maintained in place throughout the course of the event by the event sponsor in a pattern approved by the PATCOM. In addition, the USCG will notify the public of the zone locations via Broadcast Notice to Mariners on the day of the event.

*Spectator vessel* means any vessel or person, including human-powered craft, which is not designated by the sponsor as a support vessel.

*Support vessel* means a vessel, including jet skis, which is designated

and conspicuously marked by the sponsor to provide direct support to the competitors. Support vessels must be pre-designated and approved to serve as such for this event by the OCMI prior to the competition.

*Zone 1* means the competition area within the regulated area. Zone 1 will generally be located to the northwest of a line drawn between Sail Rock (37°29'34" N., 122°30'02" W.) and Pillar Point Entrance Lighted Gong Buoy 1 (37°29'10.410" N., 122°30'21.904" W.).

*Zone 2* means the area within the regulated area where the Coast Guard may direct the movement of all vessels, including restricting vessels from this area. Zone 2 will generally be located to the southeast of a line drawn between Sail Rock (37°29'34" N., 122°30'02" W.) and Pillar Point Entrance Lighted Gong Buoy 1 (37°29'10.410" N., 122°30'21.904" W.).

(d) *Special Local Regulations.* The following regulations apply between 6 a.m. and 6 p.m. on the competition day.

(1) Only support vessels may be authorized by the Patrol Commander (PATCOM) to enter Zone 1 during the competition.

(2) Entering the water in Zone 1 by any person other than the competitors is prohibited. Competitors may enter the water in Zone 1 from authorized support vessels only.

(3) Spectator vessels and support vessels within Zone 2 must maneuver as directed by PATCOM. Given the changing nature of the surf in the vicinity of the competition, PATCOM may close Zone 2 to all vessels due to hazardous conditions. Due to weather and sea conditions, the Captain of the Port may deny access to Zone 2 and the remainder of the regulated area to all vessels other than competitors and support vessels on the day of the event.

(4) Entering the water in Zone 2 by any person is prohibited.

(5) Rafting and anchoring of vessels are prohibited within the regulated area.

(6) Only vessels authorized by the PATCOM will be permitted to tow other watercraft within the regulated area.

(7) Spectator and support vessels in Zones 1 and 2 must operate at speeds which will create minimum wake, in general, 7 miles per hour or less.

(8) When hailed or signaled by the PATCOM by a succession of sharp, short signals by whistle or horn, the hailed vessel must come to an immediate stop and comply with the lawful directions issued. Failure to comply with a lawful direction may result in additional operating restrictions, citation for failure to comply, or both.

(9) During the events, vessel operators may contact the PATCOM on VHF-FM channel 23A.

Dated: October 16, 2017.

**Patrick S. Nelson,**

*Captain, U.S. Coast Guard, Alternate Captain of the Port San Francisco.*

[FR Doc. 2017-24840 Filed 11-15-17; 8:45 am]

**BILLING CODE 9110-04-P**

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 165

[Docket No. USCG-2017-0042]

RIN 1625-AA00

#### Safety Zones; Humboldt Bay Bar, Eureka, CA, Noyo River Entrance, Ft. Bragg, CA, and Crescent City Harbor Entrance Channel, Crescent City, CA

**AGENCY:** Coast Guard, DHS.

**ACTION:** Temporary Interim rule and request for comments

**SUMMARY:** The Coast Guard is establishing temporary safety zones in the navigable waters of the Humboldt Bay Entrance Channel, of Eureka, CA, Noyo River Entrance Channel, of Fort Bragg, CA, and Crescent City Harbor Entrance Channel, of Crescent City, CA to safeguard navigation safety during extreme environmental conditions. These safety zones are established to protect the safety of vessels transiting the areas from the dangers associated with extreme breaking surf and high wind conditions occurring in the Humboldt Bay Bar Channel, Noyo River Entrance Channel, and Crescent City Harbor Entrance Channels. When enforced, entry of persons or vessels into this temporary safety zone is prohibited unless specifically authorized by the Captain of the Port (COTP), San Francisco or his designated representative.

**DATES:** This rule is effective without actual notice from November 16, 2017 until 11:59 p.m. on March 31, 2018. For the purposes of enforcement, actual notice will be used from October 27, 2017 until November 16, 2017. This rule will be enforced when the COTP determines that the on scene conditions are hazardous and unsafe for vessel transits, typically expected to be 20 foot breaking seas at each location. Enforcement will be announced via local Broadcast Notice to Mariners.

**ADDRESSES:** You may submit comments view documents mentioned in this preamble as being available in the

docket, go to <http://www.regulations.gov>, type [USCG-2017-0042] in the "SEARCH" box and click "SEARCH." Click on Open Docket Folder on the line associated with this rulemaking.

See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this interim rule, call or email Lieutenant Commander Rebecca Deakin, U.S. Coast Guard Sector San Francisco; telephone (415) 399-7401 or email at [D11-PF-MarineEvents@uscg.mil](mailto:D11-PF-MarineEvents@uscg.mil).

#### SUPPLEMENTARY INFORMATION:

##### I. Table of Abbreviations

APA Administrative Procedures Act  
COTP Captain of the Port  
DHS Department of Homeland Security  
E.O. Executive Order  
FR Federal Register  
NPRM Notice of Proposed Rulemaking

##### II. Background Information and Regulatory History

The Coast Guard is issuing this temporary interim rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are "impracticable, unnecessary, or contrary to the public interest."

Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule. Publishing an NPRM would be impracticable in this case due to having received initial notice of the extreme environmental and weather conditions substantiating this rule on October 19, 2017.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**, as delaying the effective date of this rule would be impracticable due to the timing of the forecast environmental and weather conditions.

##### III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1231. The Captain of the Port (COTP), San Francisco has determined that this rule is necessary to provide for the safety of Coast Guard members, mariners, and other vessels transiting the area where

notable hazards associated with the extreme environmental conditions have been observed in the Humboldt Bay Entrance Channel near Eureka, CA, the Noyo River Entrance Channel, near Fort Bragg, CA, and the Crescent City Harbor Entrance Channel, of Crescent City, CA.

#### IV. Discussion of the Rule

This rule establishes three safety zones, respectively in the navigable waters of the Humboldt Bay Entrance Channel near Eureka, CA, the Noyo River Entrance Channel, near Fort Bragg, CA, and the Crescent City Harbor Entrance Channel, of Crescent City, CA, when the COTP determines that the on scene conditions are hazardous and unsafe for vessel transits, typically expected to be 20 foot breaking seas at each location. Enforcement will be announced via Broadcast Notice to Mariners between 12:01 a.m. on October 27, 2017 until 11:59 p.m. on March 31, 2018.

The effect of the temporary safety zones is to restrict navigation in the vicinity of the Humboldt Bay Entrance Channel, Noyo River Entrance Channel, and Crescent City Harbor Entrance Channel while the hazardous conditions associated with extreme environmental conditions exist, and until the Coast Guard deems the safety zone is no longer needed. Except for persons or vessels authorized by the COTP, no person or vessel may enter or remain in the restricted areas during times of enforcement. These regulated areas are needed to keep vessels away from the immediate vicinity of the hazardous conditions associated to ensure the safety of transiting vessels in each respective area.

#### V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders (E.O.s) related to rulemaking. Below we summarize our analyses based on a number of these statutes and E.O.s, and we discuss First Amendment rights of protestors.

##### A. Regulatory Planning and Review

E.O.s 12866 (“Regulatory Planning and Review”) and 13563 (“Improving Regulation and Regulatory Review”) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, disruptive impacts,

and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 13771 (“Reducing Regulation and Controlling Regulatory Costs”), directs agencies to reduce regulation and control regulatory costs and provides that “for every one new regulation issued, at least two prior regulations be identified for elimination, and that the cost of planned regulations be prudently managed and controlled through a budgeting process.”

We expect the economic impact of this rule will not rise to the level of necessitating a full Regulatory Evaluation. This safety zone is limited in size, duration and location. In addition, although this rule restricts access to the waters encompassed by the safety zone, the effect of this rule will not be significant because the local waterway users will be notified via public Local Notice to Mariners to ensure the safety zone will result in minimum impact. The entities most likely to be affected are waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities.

##### B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule may affect the following entities, some of which may be small entities: Owners and operators of waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities and sightseeing, if these facilities or vessels are in the vicinity of the safety zone at times when this zone is being enforced. This rule will not have a significant economic impact on a substantial number of small entities for the following reasons: (i) This rule will encompass only a small portion of the waterway for a limited period of time while hazardous conditions exist, and (ii) the maritime public will be advised in advance of this safety zone via Broadcast Notice to Mariners.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

##### C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

##### D. Federalism and Indian Tribal Governments

A rule has implications for federalism under E.O. 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in E.O. 13132.

Also, this rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal

Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

#### E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

#### F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone of limited size and duration. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Record of Environmental Consideration (REC) are available in the docket for this rulemaking. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

#### G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

#### VI. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the

docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and the docket, visit <http://www.regulations.gov/privacyNotice>.

Documents mentioned in this Temporary Interim Rule as being available in this docket and all public comments, will be in our online docket at <http://www.regulations.gov> and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

#### List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, and Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

#### PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

**Authority:** 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Department of Homeland Security Delegation No. 0170.1

■ 2. Add § 165–900 to read as follows:

#### § 165–900 Safety zones; Humboldt Bay Bar, Noyo River Entrance, and Crescent City Harbor Entrance Channel Closures, Humboldt Bay, Eureka, CA.

(a) *Location.* Temporary safety zones are established in:

(1) The navigable waters of the Humboldt Bay Bar Channel and the Humboldt Bay Entrance Channel, of Humboldt Bay, CA;

(2) The navigable waters of the Noyo River Entrance Channel as defined by the Area contained seaward of the Line of Demarcation with northern boundary of the line originating in approx

position 39°25'41" N., 123°48'37" W. and extending 1200 yards at bearing 290° T & southern boundary of the line originating in approx position 39°25'38" N., 123°48'36" W. and extending 1200 yards at 281° T, in Fort Bragg, CA;

(3) The navigable waters of the Crescent City Harbor Entrance Channel, as defined by the area contained seaward of the line originating in approx position 41°44'36" N., 124°11'18" W. bearing 237°T and extending out to 1 NM of the Line of Demarcation in Crescent City, CA.

(b) *Definitions.* As used in this section, “designated representative” means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer on a Coast Guard vessel or at a Coast Guard unit or a Federal, State, or local officer designated by or assisting the COTP in the enforcement of the safety zones.

(c) *Regulations.* (1) Under the general regulations in 33 CFR part 165, subpart C, entry into, transiting or anchoring within these safety zones are prohibited unless authorized by the COTP or the COTP's designated representative.

(2) The safety zones are closed to all vessel traffic, except as may be permitted by the COTP or the COTP's designated representative. Vessel operators given permission to enter or operate in the safety zones must comply with all directions given to them by the COTP or the COTP's designated representative.

(3) Vessel operators desiring to enter or operate within the Humboldt Bay Entrance Channel or Crescent City Harbor Entrance Channel safety zones during times of enforcement shall contact Station Humboldt Bay on VHF–FM channel 16 or at (707) 443–2213 between 6:30 a.m. and 10 p.m., or to Sector Humboldt Bay on VHF–FM channel 16 or at (707) 839–6113 if between 10 p.m. and 6:30 a.m. Vessel operators desiring to enter or operate within the Noyo River Entrance Channel safety zone during times of enforcement shall contact Station Noyo River on VHF–FM channel 16 or at (707) 964–6611 between 6:30 a.m. and 10 p.m., or to Sector Humboldt Bay on VHF–FM channel 16 or at (707) 839–6113 if between 10 p.m. and 6:30 a.m.

(d) *Enforcement period.* The zones described in paragraph (a) of this section will be effective from October 27, 2017 through March 31, 2018. The zones described in paragraph (a) of this section will be enforced when the COTP determines that the on scene conditions are hazardous and unsafe for vessel transits, typically expected to be 20 foot breaking seas at each location.

Enforcement will be announced via Broadcast Notice to Mariners. The COTP will notify the maritime community of periods during which these zones will respectively be enforced via Broadcast Notice to Mariners in accordance with 33 CFR 165.7.

Dated: October 27, 2017.

**Patrick S. Nelson,**

*Captain, U.S. Coast Guard, Alternate Captain of the Port of San Francisco.*

[FR Doc. 2017-24842 Filed 11-15-17; 8:45 am]

**BILLING CODE 9110-04-P**

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 165

[Docket No. USCG-2017-0985]

#### **Safety Zone; Annual Fireworks Display on the Ohio River, Monongahela River, Allegheny River, Pittsburgh, PA**

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of enforcement of regulation.

**SUMMARY:** The Coast Guard will enforce the subject safety zone for the annual fireworks display that takes place every November on the Ohio River, Monongahela River and Allegheny River extending the entire width of the rivers. The zone is needed to protect vessels transiting the area and event spectators from the hazards associated with the fireworks display. During the enforcement period, entry into, transiting, or anchoring in the safety zone is prohibited to all vessels not registered with the sponsor as participants or official patrol vessels, unless specifically authorized by the Captain of the Port Marine Safety Unit Pittsburgh (COTP) or a designated representative.

**DATES:** The regulations in the Table 1 in 33 CFR 165.801, No. 64, will be enforced from 8 p.m. until 9:30 p.m., on November 17, 2017.

**FOR FURTHER INFORMATION CONTACT:** If you have questions about this notice of enforcement, call or email MST1 Jennifer Haggins, Marine Safety Unit Pittsburgh, U.S. Coast Guard; telephone 412-221-0807, email [Jennifer.L.Haggins@uscg.mil](mailto:Jennifer.L.Haggins@uscg.mil).

**SUPPLEMENTARY INFORMATION:** The Coast Guard will enforce the safety zone listed in the regulations in Table 1 in 33 CFR 165.801, No. 64. The safety zone is for the annual fireworks display on the Ohio River, from mile 0.0 to 0.3, Monongahela River mile 0.0 to 0.22 and

Allegheny River mile 0.0 to 0.25, extending the entire width of the rivers, from 8 p.m. to 9:30 p.m. on November 17, 2017. This action is being taken to protect vessels transiting the area and event spectators from the hazards associated with the fireworks display. Entry into the safety zone is prohibited unless authorized by the Captain of the Port Marine Safety Unit Pittsburgh (COTP) or a designated representative. Persons or vessels desiring to enter into or passage through the safety zone must request permission from the COTP or a designated representative. If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative.

This notice of enforcement is issued under authority of 33 CFR 165.801 and 5 U.S.C. 552(a). In addition to this notice of enforcement in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of these enforcement periods via Local Notice to Mariners and updates via Marine Information Broadcasts.

Dated: November 9, 2017.

**F. Smith,**

*Lieutenant Commander, U.S. Coast Guard, Acting Captain of the Port Marine Safety Unit Pittsburgh.*

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 165

[Docket Number USCG-2017-1028]

**RIN 1625-AA00**

#### **Safety Zone; Atlantic Ocean, Rehoboth Beach, DE**

**AGENCY:** Coast Guard, DHS.

**ACTION:** Correcting amendments.

**SUMMARY:** On November 9, 2017, the Coast Guard published a rule establishing temporary safety zones in the Atlantic Ocean, off the coast of Rehoboth Beach, DE and in Breakwater Harbor near Cape Henlopen. The rule was made enforceable from November 6, 2017, through February 28, 2018. However, in regulatory text the February date was mistakenly given as February 28, 2017. This document corrects that error.

**DATES:** Effective November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this rule, call or

email Petty Officer Edmund Ofalt, Waterways Management Branch, U.S. Coast Guard Sector Delaware Bay; telephone (215) 271-4814, email [Edmund.J.Ofalt@uscg.mil](mailto:Edmund.J.Ofalt@uscg.mil).

**SUPPLEMENTARY INFORMATION:** In its temporary final rule published on November 9, 2017, the Coast Guard established temporary safety zones near dredging and pipe laying operations, diving operations, and underwater construction operations (82 FR 52005). The **DATES** section of the rule and the preamble both gave the expiration date of the temporary rule as February 28, 2018. In the regulatory text provided for the Code of Federal Regulations, however, that date was mistakenly given as February 28, 2017. This document corrects the error. Because the temporary final rule uses the correct date in all other instances, and because February 2017 has already passed, the Coast Guard finds it unnecessary to offer prior notice and opportunity for public comment on this correction.

#### **List of Subjects in 33 CFR Part 165**

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

#### **PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS**

■ 1. The authority citation for part 165 continues to read as follows:

**Authority:** 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05-1, 6.04-1, 6.04-6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

#### **§ 165.T05-1028 [Amended]**

■ 2. In § 165.T05-1028(d), remove the date “February 28, 2017” and add in its place the date “February 28, 2018”.

**Katia G. Kroutil,**

*Chief, Office of Regulations and Administrative Law, U.S. Coast Guard.*

**BILLING CODE 9110-04-P**

**DEPARTMENT OF DEFENSE****Department of the Army, Corps of Engineers****33 CFR Part 334**

[COE-2016-0005]

**United States Navy Restricted Area, Menominee River, Marinette Marine Corporation Shipyard, Marinette, Wisconsin****AGENCY:** U.S. Army Corps of Engineers, DoD.**ACTION:** Final rule.

**SUMMARY:** The U.S. Army Corps of Engineers published a document in the **Federal Register** on May 24, 2011, amending its regulations to establish a restricted area in the Menominee River at the Marinette Marine Corporation Shipyard in Marinette, Wisconsin. The Corps published correcting amendments in the **Federal Register** on April 4, 2012, which corrected latitude and longitude coordinates and also revised administrative and enforcement responsibilities. The Corps is further amending these regulations to expand the existing restricted area to provide additional area of protection during the construction and launching of Littoral Combat Ships. The expansion would result in temporary encroachment within the Menominee River Federal Navigation Channel. The regulations are necessary to provide adequate protection of U.S. Navy (USN) combat vessels, their materials, equipment to be installed therein, and crew, while located at the Marinette Marine Corporation Shipyard.

**DATES:** Effective December 18, 2017.**ADDRESSES:** Headquarters, U.S. Army Corps of Engineers, Operations and Regulatory Community of Practice, 441 G Street NW., Washington, DC 20314-1000.**FOR FURTHER INFORMATION CONTACT:** Mr. David Olson, Headquarters, Operations and Regulatory Community of Practice, Washington, DC at 202-761-4922 or by email at [david.b.olson@usace.army.mil](mailto:david.b.olson@usace.army.mil) or Mr. Ryan J. Huber, U.S. Army Corps of Engineers, St. Paul District, Regulatory Branch, at 651-290-5859 or by email at [ryan.j.huber@usace.army.mil](mailto:ryan.j.huber@usace.army.mil).**SUPPLEMENTARY INFORMATION:** Pursuant to its authorities under Section 7 of the Rivers and Harbors Act of 1917 (40 State 266; 33 U.S.C. 1) and Chapter XIX of the Army Appropriations Act of 1919 (40 Stat. 892; 33 U.S.C. 3), the Corps is amending restricted area regulations at 33 CFR part 334 by revising § 334.815 to

expand the previously established restricted area in the Menominee River, at the Marinette Marine Corporation Shipyard, Marinette, Wisconsin. The amendment would also add a provision of disestablishment whereby the restricted area would be disestablished by no later than November 17, 2025. By correspondence dated October 29, 2015, the Department of the Navy, requested that the Corps of Engineers amend the regulations concerning this restricted area.

On August 11, 2016, the Corps' St. Paul District issued a local public notice soliciting comments on the proposed rule from all known interested parties and no comments were received. The proposed rule was published in the August 10, 2016 edition of the **Federal Register** (81 FR 52781) with the docket number COE-2016-0005 and one comment was received. One commenter requested that the first set of coordinates be recalculated to ensure correct position along the shoreline and asked that the final rule include an explicit statement in regards to the horizontal datum used. The Corps responded to the comment by recalculating and updating the first set of coordinates as well as adding a statement in the final rule in regards to the horizontal datum used.

**Procedural Requirements***a. Regulatory Planning and Review*

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This proposed rule has not been designated a "significant regulatory action," under Executive Order 12866. Accordingly, this proposed rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

The Corps has made a determination this proposed rule is not a significant regulatory action. This regulatory action determination is based on the size and location of the restricted area. The restricted area does not occupy the entire Federal navigation channel near the shipyard and vessels utilizing that channel can transit around the restricted area. An operator of a vessel may also transit the restricted area as long as he or she obtains permission from the Supervisor of Shipbuilding, Conversion and Repair, USN, Bath, ME or his/her authorized representative.

*b. Impact on Small Entities*

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601-612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Corps certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities. While some owners or operators of vessels that intend to transit the restricted area may be small entities, for the reasons stated in paragraph (a) above this rule would not have a significant economic impact on any vessel owner or operator. In addition, the restricted area is necessary to address a major anti-terrorism and safety concern due to the lack of perimeter fencing or physical denial system. Small entities can utilize navigable waters outside of the restricted area. Small entities may also transit the restricted area as long as they obtain permission from the Supervisor of Shipbuilding, Conversion and Repair, USN, Bath, ME or his/her authorized representative. The restricted area is necessary to provide adequate protection of U.S. Navy combat vessels, their materials, equipment to be installed therein, and crew, while located at the Marinette Marine Corporation Shipyard. The restricted area does not occupy the entire Federal navigation channel near the shipyard and vessels utilizing that channel can transit around the restricted area, or obtain permission to transit the restricted area. After considering the economic impacts of this restricted area regulation on small entities, I certify that this action will not have a significant impact on a substantial number of small entities.

*c. Review Under the National*

*Environmental Policy Act.* An environmental assessment (EA) has been prepared. We have concluded that the establishment of the restricted area will not have a significant impact to the quality of the human environment and, therefore, preparation of an environmental impact statement is not required. The final EA and Finding of No Significant Impact may be reviewed at the District Office listed at the end of the **FOR FURTHER INFORMATION CONTACT** section, above.

*d. Unfunded Mandates Reform Act.* This rule does not impose an enforceable duty among the private

sector and, therefore, is not a Federal private sector mandate and is not subject to the requirements of Section 202 or 205 of the Unfunded Mandates Reform Act (Pub. L. 104–4, 109 Stat. 48, 2 U.S.C. 1501 *et seq.*). We have also found, under Section 203 of the Act, that small governments will not be significantly or uniquely affected by this rule.

#### List of Subjects in 33 CFR Part 334

Danger zones, Marine safety, Navigation (water), Restricted areas, Waterways.

For the reasons stated in the preamble, the Corps is amending 33 CFR part 334 to read as follows:

#### PART 334—DANGER ZONE AND RESTRICTED AREA REGULATIONS

■ 1. The authority citation for part 334 continues to read as follows:

**Authority:** 40 Stat. 266 (33 U.S.C. 1) and 40 Stat. 892 (33 U.S.C. 3).

■ 2. Revise § 334.815 to read as follows:

##### § 334.815 Menominee River, at the Marinette Marine Corporation Shipyard, Marinette, Wisconsin; naval restricted area.

(a) *The area.* The waters adjacent to Marinette Marine Corporation's pier defined by a rectangular shape on the south side of the river beginning on shore at the eastern property line of Marinette Marine Corporation at latitude 45°05'58.70" N., longitude 87°36'55.90" W.; thence northerly to latitude 45°05'59.72" N., longitude 87°36'55.61" W.; thence westerly to latitude 45°06'03.22" N., longitude 87°37'09.75" W.; thence westerly to latitude 45°06'03.78" N., longitude 87°37'16.40" W.; thence southerly to latitude 45°06'2.80" N., longitude 87°37'16.56" W.; thence easterly along the Marinette Marine Corporation pier to the point of origin. The datum for these geographic coordinates is the World Geodetic System 1984 (WGS 84). The restricted area will be marked by a lighted and signed floating buoy line.

(b) *The regulation.* All persons, swimmers, vessels and other craft, except those vessels under the supervision or contract to local military or Naval authority, vessels of the United States Coast Guard, and local or state law enforcement vessels, are prohibited from entering the restricted area when marked by signed floating buoy line without permission from the Supervisor of Shipbuilding, Conversion and Repair, USN, Bath, ME or his/her authorized representative.

(c) *Enforcement.* The regulation in this section shall be enforced by the Supervisor of Shipbuilding, Conversion

and Repair, USN, Bath, ME and/or such agencies or persons as he/she may designate.

(d) *Disestablishment of restricted area.* The restricted area will be disestablished not later than November 17, 2025, unless written application for its continuance is made to and approved by the Secretary of the Army prior to that date.

Dated: November 9, 2017.

Approved:

**Thomas P. Smith,**

*Chief, Operations and Regulatory Division,  
Directorate of Civil Works.*

#### ENVIRONMENTAL PROTECTION AGENCY

##### 40 CFR Part 180

[EPA–HQ–OPP–2008–0824; FRL–9966–10]

RIN 2070–ZA16

##### Tebufenozide; Pesticide Tolerance Actions

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** EPA is establishing tolerances for residues of tebufenozide in or on multiple commodities, which are identified and discussed later in this document. In addition, EPA is correcting commodity definitions, updating crop group tolerances, and harmonizing U.S. tolerances with Codex. EPA is also removing tolerances for residues of tebufenozide that are no longer needed due to the changes listed. EPA is also amending the existing tolerance for almond, hulls under the Federal Food, Drug, and Cosmetic Act (FFDCA).

**DATES:** This regulation is effective November 16, 2017. However, certain regulatory actions will not occur until the date specified in the regulatory text. Objections and requests for hearings must be received on or before January 16, 2018, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

**ADDRESSES:** The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2008–0824, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William

Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

#### FOR FURTHER INFORMATION CONTACT:

Christina Scheltema, Pesticide Re-evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 308–2201; email address: [scheltema.christina@epa.gov](mailto:scheltema.christina@epa.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. General Information

###### A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

###### B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's e-CFR site at [http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab\\_02.tpl](http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl).

###### C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2008–0824 in the subject line on the first page of your submission. All objections and requests for a hearing

must be in writing, and must be received by the Hearing Clerk on or before January 16, 2018. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2008-0824, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

## II. Background

### A. What actions is the agency taking?

In the **Federal Register** of October 14, 2016 (81 FR 71029) (FRL-9952-75), EPA proposed, pursuant to its authority in section 408(e) of the FFDCA, 21 U.S.C. 346a(d)(3), to establish, amend, and remove certain tolerances for residues of tebufenozide. The Agency proposed that 40 CFR 180.482 be amended by establishing tolerances for residues of tebufenozide in or on the following commodities: Bushberry subgroup 13-07B at 3.0 part per million (ppm); caneberry subgroup 13-07A at 3.0 ppm; fruit, citrus, group 10-10 at 2.0 ppm; fruit, pome group 11-10 at 1.0 ppm; nut, tree, group 14-12 at 0.1 ppm; sugarcane, cane at 1.0 ppm; sugarcane, molasses at 3.0 ppm; vegetable, fruiting, group 8-10 at 1.0 ppm. EPA also proposed to increase the existing tolerances for almond, hulls from 25 to 30 parts per million (ppm). Finally, EPA proposed to remove as unnecessary the following tolerances upon establishment

of the new tolerances: Apple; berry, group 13; fruit, citrus, group 10; fruit, pome; nut, tree, group 14; pistachio; vegetable, fruiting, group 8; and walnut.

The proposed rule of October 14, 2016 (FRL-9952-75), provided for a 60-day comment period and invited public comments. EPA received anonymous public comments from three private citizens. The comments and EPA's response are presented in Unit IV. E.

In this final rule, the Agency is establishing, modifying, and revoking the tolerances as indicated in its proposal of October 14, 2016, under its authority in FFDCA section 408(e)(1)(A). EPA is also establishing an expiration date for the existing tolerances for fruit, pome.

### B. What is the Agency's authority for taking this action?

EPA may issue a regulation establishing, modifying, or revoking a tolerance under FFDCA section 408(e).

### C. When do these actions become effective?

As stated in the **DATES** section, this regulation is effective November 16, 2017. In addition, the tolerance for fruit, pome, at 1.5 ppm, expires on May 16, 2018.

## III. Determination of Safety

There have been no changes in the Agency's assessment of the safety of these tolerances since the issuance of the proposal, and no additional information or concerns were raised by the commenters warranting a reconsideration of the Agency's safety finding in the proposal. Therefore, the Agency is incorporating the Aggregate Risk Assessment and Determination of Safety as contained in Unit III. of its October 14, 2016 proposal and relying upon the findings therein to support its conclusion that there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to tebufenozide residues.

## IV. Other Considerations

### A. Analytical Enforcement Methodology

An adequate enforcement methodology is available to enforce the tolerance expression, as indicated in the proposal.

### B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits

(MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

As indicated in the proposed rule, EPA is harmonizing its U.S. tolerances for sugarcane; fruit, citrus, group 10-10; fruit, pome, group 11-10; and almond, hulls, with Codex MRLs.

### C. International Trade Considerations

In this final rule, EPA is converting the existing crop group tolerance on fruit, pome, to fruit, pome, group 11-10, and in the process, reducing the crop group tolerance from 1.5 ppm to 1.0 ppm to harmonize with Codex MRLs. For the commodities included in crop group 11-10 that are not covered by the fruit, pome tolerance, the new tolerances allow import of those additional commodities with residues of tebufenozide up to 1.0 ppm, which is not currently permitted under the existing tolerance. However, for the commodities currently in the crop group that continue to be included in crop group 11-10, the tolerance is reduced from 1.5 ppm to 1.0 ppm. With very few exceptions, all of the MRLs for tebufenozide on pome fruits are already at or below EPA's proposed tolerance level of 1.0 ppm. As a result, EPA believes that a reasonable interval between the publication of this rule and the effective date of these tolerances is not necessary; therefore, the Agency proposes to make the tolerance of 1.0 ppm for crop group 11-10, fruit, pome, effective upon publication of this final rule. Nonetheless, because this tolerance change represents a reduction in the allowable amount of tebufenozide residues allowed in or on fruit, pome, crop group 11, EPA is establishing an expiration date for the existing tolerances for fruit, pome, that is six months from the date of publication of this final rule. Before that date, residues of tebufenozide on those commodities will be permitted up to the 1.5 ppm level under the existing fruit, pome, tolerance; after that date, residues will need to comply with the new reduced 1 ppm tolerance level under crop group 11-10.

The Agency is reducing the tolerances on commodities in this crop group to harmonize with the Codex MRL. The reduction is appropriate based on available data and residues levels resulting from registered use patterns. This reduction in tolerance levels is not discriminatory; the same food safety standard contained in the FFDCA applies equally to domestically produced and imported foods. None of the other tolerance actions taken in this rulemaking restrict permissible pesticide residues below currently allowed levels in the United States. In accordance with the World Trade Organization's (WTO) Sanitary and Phytosanitary Measures (SPS) Agreement, EPA intends to promptly publish this action with the WTO.

#### D. Existing Stocks Considerations

Any commodities listed in the regulatory text of this document that are treated with the pesticides subject to this final rule, and that are in the channels of trade following the tolerance revocations, shall be subject to FFDCA section 408(1)(5), as established by FQPA. Under this unit, any residues of this pesticide in or on such food shall not render the food adulterated so long as it is shown to the satisfaction of the Food and Drug Administration that:

1. The residue is present as the result of an application or use of the pesticide at a time and in a manner that was lawful under FIFRA.

2. The residue does not exceed the level that was authorized at the time of the application or use to be present on the food under a tolerance or exemption from tolerance. Evidence to show that food was lawfully treated may include records that verify the dates that the pesticide was applied to such food.

#### E. Response to Comments

The Agency received three comments on its October 14, 2016 proposal. The comments and EPA's responses follow.

*Comment by private citizen.* An anonymous commenter expressed concerns about the toxicity of tebufenozide and pesticides in general.

*Agency response.* The commenter did not take issue with EPA's specific proposal to establish or amend tolerances for tebufenozide or with the underlying risk assessments supporting the proposal. The commenter did not refer to any specific studies pertaining to the toxicity of tebufenozide or the conclusions of the tebufenozide risk assessments. Therefore, EPA has not changed its previous determination that the tolerances in question are safe and is not making any changes in response to these comments.

*Comment by private citizen.* An anonymous commenter expressed support for implementing the tolerances in the proposed rule. However, the commenter also expressed some concern about the potential of tebufenozide to cause harm to humans, other mammals, and ecosystems.

*Agency response.* The commenter supported EPA's specific proposal to establish and amend tolerances with tebufenozide. Although the commenter expressed concern regarding the potential effects of tebufenozide, he or she did not refer to any specific studies pertaining to the conclusions of the risk assessments. Therefore, EPA has not changed its previous determination that the tolerances in question are safe.

*Comment by private citizen.* An anonymous commenter supported the crop group reassignments in the proposed rule. This commenter also expressed concern that the public might not support the proposed increase of the almond hull tolerance from 25 to 30 ppm.

*Agency Response:* This commenter did not provide any evidence to support his or her concern regarding public support for the proposed increase of the almond hull tolerance.

Therefore, the Agency has not changed its previous determination that the 30 ppm almond hull tolerance is safe.

#### V. Conclusion

EPA has determined that there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to tebufenozide residues. The details of the Agency's assessment of the safety of the tebufenozide tolerances may be found in the proposed rule; there have been no changes since its issuance. Therefore, EPA is incorporating the Aggregate Risk Assessment and Determination of Safety as contained in Unit III of its October 14, 2016 proposal to support the conclusion of a reasonable certainty of no harm.

The Agency hereby establishes tolerances for residues of tebufenozide in bushberry subgroup 13–07B at 3.0 ppm; caneberry subgroup 13–07A at 3.0 ppm; fruit, citrus, group 10–10 at 2.0 ppm; fruit, pome group 11–10 at 1.0 ppm; nut, tree, group 14–12, at 0.1 ppm; sugarcane, cane at 1.0 ppm; sugarcane, molasses at 3.0 ppm; and vegetable, fruiting, group 8–10 at 1.0 ppm. The Agency is also increasing the tolerance for almond, hulls from 25 ppm to 30 ppm. Further, upon the establishment of these tolerances, the Agency is removing the existing tolerances for

apple; berry, group 13; fruit, citrus, group 10; nut, tree, group 14; pistachio; vegetable, fruiting, group 8; and walnut because they will be superseded by the newly established tolerances. Finally, the Agency is establishing a six-month expiration date for the current fruit, pome, tolerance.

#### VI. Statutory and Executive Order Reviews

In this final rule, EPA is establishing, modifying, and revoking tolerances under FFDCA section 408(e). The Office of Management and Budget (OMB) has exempted these types of actions (e.g., establishment and modification of a tolerance and tolerance revocation for which extraordinary circumstances do not exist) from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, it is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*). Nor does it require any special considerations as required by Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994); or OMB review or any other Agency action under Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This final rule does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note). Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency previously assessed whether establishment of tolerances, exemptions from tolerances, raising of tolerance levels, expansion of exemptions, or revocations might significantly impact a substantial number of small entities and concluded that, as a general matter, these actions do not impose a significant economic impact on a substantial number of small entities. These analyses

for tolerance establishment and modifications, and for tolerance revocations were published in the **Federal Register** of May 4, 1981 (46 FR 24950) and December 17, 1997 (62 FR 66020) (FRL-5753-1), respectively, and were provided to the Chief Counsel for Advocacy of the Small Business Administration. In a memorandum dated May 25, 2001, EPA determined that eight conditions must all be satisfied for an import tolerance or tolerance exemption revocation to adversely affect a significant number of small entity importers, and that there is a negligible joint probability of all eight conditions holding simultaneously with respect to any particular revocation. (This Agency document is available in the docket for this rule). Furthermore, for tebufenozide, the Agency knows of no extraordinary circumstances that exist as to the present rule that would change EPA's previous analysis. Taking into account this analysis, and available information concerning the pesticides listed in this rule, EPA hereby certifies that this rule will not have a significant negative economic impact on a substantial number of small entities. The Agency has determined that this rule will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." This rule directly regulates growers, food processors, food handlers, and food retailers, not States. This rule does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). For these same reasons, the Agency has determined that this rule does not have any "tribal implications" as described in Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). Executive

Order 13175 requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes." This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

**VII. Congressional Review Act**

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

**List of Subjects in 40 CFR Part 180**

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

**BILLING CODE 6560-50-P**

**DEPARTMENT OF THE TREASURY**

**48 CFR Parts 1009 and 1052**

**Department of the Treasury Acquisition Regulations; Tax Check Requirements**

**AGENCY:** Department of the Treasury.

**ACTION:** Interim rule.

**SUMMARY:** Pursuant to Section 6103 of the Internal Revenue Code, taxpayer return information, with few exceptions, is confidential. Under this authority, officers and employees of the Department of the Treasury may have access to taxpayer return information as necessary for purposes of tax administration. The Department of the Treasury has determined that an Internal Revenue Service (IRS) contractor's compliance with the tax laws is a tax administration matter and that taxpayer return information is needed for determining an offeror's eligibility to receive an award, including but not limited to implementation of the statutory prohibition of making an award to corporations that have an unpaid Federal tax liability. This interim rule amends the Department of the Treasury Acquisition Regulation (DTAR) for the purposes of

supplementing the Federal Acquisition Regulation (FAR). This interim rule will amend the DTAR by adding a subpart titled “Responsible Prospective Contractor” and a paragraph concerning Representation and certifications regarding responsibility matters, for the purpose of directing IRS contracting officers to the newly added DTAR subpart titled “Tax Check Requirement,” which prescribes the policies and procedures for performing a tax check on the apparent successful offeror in order to determine eligibility to receive an award.

**DATES:**

*Effective date:* November 16, 2017.

*Comment due date:* Interested parties should submit written comments to the Department of the Treasury on or before January 16, 2018 to be considered in the formation of the final rule.

**ADDRESSES:** Treasury invites comments on the topics addressed in this interim rule. Comments may be submitted to Treasury by any of the following methods: by submitting electronic comments through the federal government e-rulemaking portal, [www.regulations.gov](http://www.regulations.gov) or by sending paper comments to Department of the Treasury, Office of the Procurement Executive, Attn: Thomas O’Linn, 1722 I Street NW., Mezzanine—M12C, Washington, DC 20006.

In general, Treasury will post all comments to [www.regulations.gov](http://www.regulations.gov) without change, including any business or personal information provided, such as names, addresses, e-mail addresses, or telephone numbers. All comments, including attachments and other supporting materials received are part of the public record and subject to public disclosure. You should submit only information that you wish to make publicly available.

**FOR FURTHER INFORMATION CONTACT:**

Thomas O’Linn, Procurement Analyst, Office of the Procurement Executive, at (202) 622-2092.

**SUPPLEMENTARY INFORMATION:**

**Background**

The DTAR, which supplements the Federal Acquisition Regulation (FAR), is codified at 48 CFR Chapter 10.

*A. General.* It is in the interest of the United States Government to only award contracts to entities that are responsible and law abiding. This is codified in FAR 9.104 by requiring contracting officers to perform a responsibility determination prior to each contract award by using the standards at FAR 9.104-1, as well as consider information submitted by the contractor and information they

research or acquire from other sources. The IRS administers the Internal Revenue Code as enacted by Congress. Since fiscal year 2012, language in the annual Consolidated Appropriations Act has prohibited the Federal Government under various conditions from using appropriated funds to enter into a contract with a prospective contractor unless the prospective contractor certifies in writing that it has not been notified of any unpaid Federal tax assessment. Most recently, Sections 744 and 745 of Division E of the Consolidated and Further Continuing Appropriations Act, 2015 (Pub. L. 113-235) prohibits the Federal Government from entering into a contract with any corporation where the awarding agency is aware of an unpaid Federal tax liability.

For purposes of tax administration, the IRS has access to taxpayer return information that is not otherwise available to other Federal Agencies pursuant to 26 U.S.C. 6103(h)(1). The Department of the Treasury has determined that an IRS contractor’s compliance with the tax laws is a tax administration matter. Additionally, 26 U.S.C. 6103(c) authorizes the IRS to disclose a taxpayer’s return information to such person(s) as the taxpayer may designate in a consent to such disclosure. In many cases, however, the official signing a contract proposal on behalf of an offeror will not be an official to whom the IRS is authorized to disclose the offeror’s tax information. Thus, in order to ensure that IRS is authorized is to discuss the offeror’s own tax information with an authorized official of the offeror, a consent to disclosure is required. This consent to disclosure must be in the form of a separate written document pertaining solely to the authorized disclosure and must be signed and dated by an authorized person as required and defined in 26 U.S.C. 6103(c) and 26 CFR 301.6103(c)-1(e)(4).

This interim rule amends the DTAR to establish policies and procedures that facilitate successful, timely, and economical execution of IRS contractual actions in compliance with the FAR and various appropriation restrictions. Specifically, this interim rule establishes an express requirement for IRS contracting officers to use taxpayer return information that is available only to IRS to perform a tax check on the apparent successful offeror for purposes of determining eligibility to enter into a contract with the IRS. The IRS has established an Internal Procedure, Guidance and Information (PGI) that further supplements the DTAR requirement for IRS contracting officers

to use when conducting a tax check. To ensure compliance with 26 U.S.C. 6103(h)(1) and to safeguard taxpayer return information, the PGI restricts the number of personnel within the IRS Office of Procurement who have access to tax compliance information. The PGI also limits the amount of information provided to the contracting officer regarding a delinquent Federal tax liability. Upon notification by the contracting officer that the offeror has a delinquent Federal tax liability, the offeror may provide the contracting officer with documentation that demonstrates the offeror’s tax status as paid-in-full or that an approved payment agreement has been reached, at which time the contracting officer will coordinate with the appropriate office within IRS to validate the offeror’s tax status (see FAR 9.104-5(a)(1), (b)(1) and (e)).

The offeror may want to take steps to confirm it does not have a delinquent Federal tax liability prior to submission of its response to the solicitation. If the offeror recently settled a delinquent Federal tax liability, the offeror may want to take steps to obtain information in order to demonstrate the offeror’s responsibility to the contracting officer, if such information is requested (see FAR 9.104-5(a)(1) and (b)(1)).

*B. FAR supplement.* This interim rule will supplement paragraph (b) of FAR 9.104-5, Representation and certifications regarding responsibility matters, for the purpose of directing IRS contracting officers to the newly added DTAR subpart 1009.70, which prescribes the policies and procedures for performing a tax check on the apparent successful offeror to determine eligibility to receive an award.

*C. Subpart.* This interim rule will add DTAR subparts 1009.1, Responsible Prospective Contractors, and 1009.70, Tax Check Requirements. This latter subpart prescribes the policies and procedures IRS contracting officers will use for performing a tax check on the apparent successful offeror to determine eligibility to receive an award. Definitions of terms “authorized representative(s) of the offeror,” “delinquent Federal tax liability” and “tax check” are included within this subpart. The definition of “authorized representative(s) of the offeror” is the person(s) identified to the IRS contracting officer by the offeror as authorized to represent the offeror in disclosure matters pertaining to the offer. The definition of “delinquent Federal tax liability” is derived from language within the FAR concerning Federal tax delinquency and unpaid Federal tax assessment (see FAR 9.104-

5). The definition of “tax check” is an IRS process that accesses and uses taxpayer return information, that is available only to IRS, to support the Government’s determination of an offeror’s eligibility to receive an award, including but not limited to implementation of the statutory prohibition of making an award to corporations that have an unpaid Federal tax liability (see FAR 9.104–5(b)).

*D. Provision.* This interim rule will add a provision to be inserted in all IRS solicitations regardless of dollar value, including those for commercial items. The provision will notify offerors that the IRS will conduct a tax check because the Department of the Treasury has determined that an IRS contractor’s compliance with the tax laws is a tax administration matter, and that taxpayer return information is needed for determining an offeror’s eligibility to receive an award, including but not limited to implementation of the statutory prohibition of making an award to corporations that have an unpaid Federal tax liability (see FAR 9.104–5(b)). The provision will also contain a consent to disclosure to be signed and dated by a person authorized to act on behalf of the offeror as defined in 26 CFR 301.6103(c)–1(e)(4). The consent to disclosure will authorize the officers and employees of the Department of the Treasury, including the IRS, to disclose the results of the tax check to the person(s) authorized by the offeror via the signed consent to disclosure.

#### **Applicability to Contracts at or Below the Simplified Acquisition Threshold and for Commercial Items, Including Commercially Available Off-the-Shelf Items**

This provision will apply to all IRS solicitations regardless of the dollar value, including commercial items (including Commercially Available Off-the-Shelf items). This determination is consistent with the FAR requirements regarding the inclusion of the provisions 52.209–5, 52.209–11 and 52.212–3 as well as various appropriation restrictions.

#### **Regulatory Planning and Review**

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the

importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

#### **Determination To Issue an Interim Rule**

Tax liability is a serious matter and there have been a number of congressional hearings and subsequent actions taken by Congress to ensure that appropriated funds are not spent with entities with a delinquent Federal tax liability. Most recently, Section 744 of Division E of the Consolidated and Further Continuing Appropriations Act, 2015 (Pub. L. 113–235) (and similar provisions in prior appropriations acts since 2012) prohibits the Federal Government from entering into a contract with any corporation where the awarding agency is aware of an unpaid Federal tax liability, unless the agency has considered suspension or debarment of the corporation and has made a determination that this further action is not necessary to protect the interests of the Government. This prohibition has been implemented in the FAR under FAR 9.104–5. Considering all these factors, it is in the interest of the United States Government to only award contracts to entities that are responsible and law abiding.

As such a determination has been made under the authority of the Secretary of Treasury that urgent and compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. Even absent this rule, IRS would have a duty under the appropriations act provision not to award contracts to entities with delinquent tax liability, and to review available tax information for this purpose. However, IRS would not have clear authority to discuss any adverse information with the offeror to which it pertained. The only effect of delaying the rule to consider public comment would be to increase the likelihood that offerors will be disqualified due to adverse tax information that could have been clarified or resolved if the rule were in place. For the same reason, the effective date is set as immediately upon publication. However, pursuant to 41 U.S.C. 1707 and FAR 1.501–3(b), Treasury will consider public comments received in response to this interim rule in the formation of the final rule.

#### **Regulatory Flexibility Act**

The Regulatory Flexibility Act (5 U.S.C. chapter 6) generally requires agencies to conduct an initial regulatory flexibility analysis and a final regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.

It is hereby certified that this interim rule will not have a significant economic impact on a substantial number of small entities. This interim rule will amend the DTAR to establish an internal process that strengthens IRS’ compliance with appropriation act restrictions and the FAR prohibition of entering into a contract with contractors having a delinquent Federal tax liability (see FAR subpart 9.1) and should not have significant economic impacts on small entities other than the potential for not receiving award if the small entity has a delinquent Federal tax liability. This rule does not impose any new reporting, recordkeeping or other compliance requirements. The rule does not duplicate, overlap, or conflict with any other Federal rules. No significant alternatives were identified during the development of this rule. Notwithstanding this certification, the Department welcomes comments on the potential impact on small entities.

#### **List of Subjects in 48 CFR Parts 1009 and 1052**

Government procurement.

Accordingly, the Department of the Treasury amends 48 CFR Chapter 10 as follows:

#### **PART 1009—CONTRACTOR QUALIFICATIONS**

■ 1. The authority citation for part 1009 continues to read as follows:

**Authority:** 41 U.S.C. 418(b).

■ 2. Add subpart 1009.1 to read as follows:

#### **Subpart 1009.1—Responsible Prospective Contractors**

##### **1009.104 Standards.**

##### **1009.104–5 Representation and certifications regarding responsibility matters.**

(b) Internal Revenue Service (IRS) contracting officers shall comply with the requirements of subpart 1009.70 once an offeror has been identified as the apparent successful offeror.

■ 3. Add subpart 1009.70 to read as follows:

**Subpart 1009.70—Tax Check Requirements**

Sec.	
1009.7000	Scope of subpart.
1009.7001	Definition.
1009.7003	Policy.
1009.7004	Procedure.
1009.7005	Solicitation provision.

**Subpart 1009.70—Tax Check Requirements****1009.7000 Scope of subpart.**

This subpart prescribes the IRS policies and procedures for performing a tax check on the apparent successful offeror to determine eligibility to receive an award.

**1009.7001 Definition.**

As used in this subpart—

*Authorized representative(s) of the offeror* means the person(s) identified to the Internal Revenue Service (IRS) within the consent to disclosure by the offeror as authorized to represent the offeror in disclosure matters pertaining to the offer.

*Delinquent Federal tax liability* means any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

*Tax check* means an IRS process that accesses and uses taxpayer return information to support the Government's determination of an offeror's eligibility to receive an award, including but not limited to implementation of the statutory prohibition of making an award to corporations that have a delinquent Federal tax liability (see FAR 9.104–5(b)).

**1009.7003 Policy.**

(a) There are various Federal laws and regulations that in aggregate prohibit the Federal Government from entering into a contract with an entity where the awarding agency is aware of an unpaid Federal tax liability (see FAR subpart 9.1) unless the agency has considered suspension or debarment and has made a determination that this further action is not necessary to protect the interests of the Government.

(b) IRS contracting officers shall include a provision in all solicitations regardless of dollar value, which contains a consent to disclosure to be signed and dated by a person authorized to act on behalf of the offeror as defined in 26 CFR 301.6103(c)–1(e)(4). The consent to disclosure will authorize officers and employees of the Department of the Treasury, including

the IRS, to disclose the results of the tax check to the authorized representative(s) of the offeror. In the absence of a signed and dated consent to disclosure in an offer, taxpayer return information of the offeror may not be disclosed, which subsequently may remove the offeror from eligibility to receive an award.

**1009.7004 Procedure.**

IRS contracting officers shall not proceed with award, at any dollar value, until a tax check has been performed on the apparent successful offeror. See IRS Procedures, Guidance, and Information (PGI) 9.1.

(a) The contracting officer, regardless of an offeror's response in paragraph (a)(1) of the provision 52.209–5, Certification Regarding Responsibility Matters, paragraph (b)(1) of the provision at FAR 52.209–11, or paragraphs (h) and (q)(2)(i) of the provision at FAR 52.212–3 (see FAR 9.104–5(b)), shall request a tax check through the IRS designated point of contact. The request shall include only the information required for purposes of conducting the tax check.

(b) If the result of the tax check demonstrates the offeror as having a delinquent Federal tax liability, the contracting officer shall—

(1) Confirm the offer includes a signed and dated consent to disclosure (see 1052.209–70, Notice and Consent to Disclose and Use of Taxpayer Return Information), the absence of which may remove the offeror from eligibility to receive an award under the solicitation because taxpayer return information of the offeror may not be disclosed.

(2) If the consent to disclosure is completed in the offer, notify the authorized representative(s) of the offeror that a delinquent Federal tax liability exists and therefore the offeror is ineligible for award.

(i) If upon notification the offeror provides the contracting officer with documentation, within the timeframe specified by the contracting officer, that demonstrates the offeror's tax status as being paid-in-full or that an approved payment agreement is in place, the contracting officer will coordinate with the appropriate office within IRS to validate the tax status. If the offeror is found to be tax compliant, the contracting officer will notify the offeror of such. Assuming the offeror meets all other standards of responsibility, the offeror is eligible for award.

(3) Notify, in accordance with IRS PGI 9.1, the Department of the Treasury official responsible for suspension and debarment for purposes of requesting a determination in accordance with FAR 9.104–5(a)(2) and FAR 9.104–5(b)(3)

respectively before an award to that contractor can be made.

(c) If the result of the tax check demonstrates the offeror as tax compliant then the offeror is eligible for award, assuming all other standards of responsibility have been met.

(d) The contracting officer shall include in the contract file documentation that verifies the tax check was conducted and if the results confirm a delinquent Federal tax liability existed at the time of award, confirmation that the offeror was notified of such.

**1009.7005 Solicitation provision.**

(a) The contracting officer shall insert the provision 1052.209–70, Notice and Consent to Disclose and Use of Taxpayer Return Information, in all IRS solicitations regardless of dollar value, including solicitations for acquisition of commercial items (including Commercially Available Off-The-Shelf items).

**PART 1052—SOLICITATION PROVISIONS AND CONTRACT CLAUSES**

■ 4. The authority citation for part 1052 continues to read as follows:

**Authority:** 41 U.S.C. 1707.

■ 5. Add 1052.209–70 to subpart 1052.2 as follows:

**1052.209–70 Notice and Consent to Disclose and Use of Taxpayer Return Information.**

As prescribed in 1009.7005, insert the following provision:

**NOTICE AND CONSENT TO DISCLOSE AND USE OF TAXPAYER RETURN INFORMATION—(NOV 2017)**

(a) *Definitions.* As used in this provision—

*Authorized representative(s) of the offeror* means the person(s) identified to the Internal Revenue Service (IRS) within the consent to disclose by the offeror as authorized to represent the offeror in disclosure matters pertaining to the offer.

*Delinquent Federal tax liability* means any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

*Tax check* means an IRS process that accesses and uses taxpayer return information to support the Government's determination of an offeror's eligibility to receive an award,

including but not limited to implementation of the statutory prohibition of making an award to corporations that have an unpaid Federal tax liability (see FAR 9.104–5(b)).

(b) *Notice.* Pursuant to 26 U.S.C. 6103(a) taxpayer return information, with few exceptions, is confidential. Under the authority of 26 U.S.C. 6103(h)(1), officers and employees of the Department of the Treasury, including the IRS, may have access to taxpayer return information as necessary for purposes of tax administration. The Department of the Treasury has determined that an IRS contractor's compliance with the tax laws is a tax administration matter and that the access to and use of taxpayer return information is needed for determining an offeror's eligibility to receive an award, including but not limited to implementation of the statutory prohibition of making an award to corporations that have an unpaid Federal tax liability (see FAR 9.104–5).

(1) The performance of a tax check is one means that will be used for determining an offeror's eligibility to receive an award in response to this solicitation (see FAR 9.104). As a result, the offeror may want to take steps to confirm it does not have a delinquent Federal tax liability prior to submission of its response to this solicitation. If the offeror recently settled a delinquent Federal tax liability, the offeror may want to take steps to obtain information in order to demonstrate the offeror's responsibility to the contracting officer (see FAR 9.104–5).

(c) The offeror shall execute the consent to disclosure provided in paragraph (d) of this provision and include it with the submission of its offer. The consent to disclosure shall be signed by an authorized person as required and defined in 26 U.S.C. 6103(c) and 26 CFR 301.6103(c)–1(e)(4).

(d) Consent to disclosure. I hereby consent to the disclosure of taxpayer return information (as defined in 26 U.S.C. 6103(b)(2)) as follows:

The Department of the Treasury, Internal Revenue Service, may disclose the results of the tax check conducted in connection with the offeror's response to this solicitation, including taxpayer return information as necessary to resolve any matters pertaining to the results of the tax check, to the authorized representatives of [insert OFFEROR NAME] on this offer.

I am aware that in the absence of this authorization, the taxpayer return information of [insert OFFEROR NAME]

is confidential and may not be disclosed, which subsequently may remove the offer from eligibility to receive an award under this solicitation.

I consent to disclosure of taxpayer return information to the following person(s):

[insert PERSON(S) NAME AND CONTACT INFORMATION]: \_\_\_\_\_

I certify that I have the authority to execute this consent on behalf of [insert OFFEROR NAME].

Offeror Name: \_\_\_\_\_

Offeror Taxpayer Identification Number: \_\_\_\_\_

Offeror Address: \_\_\_\_\_

Name of Individual Executing Consent: \_\_\_\_\_

Title of Individual Executing Consent: \_\_\_\_\_

Signature: \_\_\_\_\_

Date: \_\_\_\_\_

(End of provision)

Dated: November 6, 2017.

**Iris B. Cooper,**

*Senior Procurement Executive, Office of the Procurement Executive.*

**BILLING CODE 4810–25–P**

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### 50 CFR Part 648

[Docket No. 161017970–6999–02]

RIN 0648–XF814

#### Fisheries of the Northeastern United States; Summer Flounder Fishery; Commercial Quota Harvested for the State of Rhode Island

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; closure.

**SUMMARY:** NMFS announces that the 2017 summer flounder commercial quota allocated to the State of Rhode Island has been harvested. Vessels issued a commercial Federal fisheries permit for summer flounder may not land summer flounder in Rhode Island for the remainder of calendar year 2017, unless additional quota becomes available through a transfer from another state. Regulations governing the

summer flounder fishery require publication of this notification to advise vessel and dealer permit holders that Federal commercial quota is no longer available to land summer flounder in Rhode Island.

**DATES:** Effective 0001 hours, November 14, 2017, through December 31, 2017.

**FOR FURTHER INFORMATION CONTACT:** Cynthia Hanson, (978) 281–9180, or [Cynthia.Hanson@noaa.gov](mailto:Cynthia.Hanson@noaa.gov).

**SUPPLEMENTARY INFORMATION:**

Regulations governing the summer flounder fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is apportioned on a percentage basis among the coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.102.

The coastwide commercial quota for summer flounder for the 2017 calendar year is 5,658,260 lb (2,566,544 kg) (81 FR 93842, December 22, 2016). The percent allocated to vessels landing summer flounder in Rhode Island is 15.68298 percent, resulting in an initial commercial quota of 887,542 lb (402,582 kg). Rhode Island has received one quota transfer of 380 lb (172 kg) from New Jersey on October 4, 2017 (82 FR 46936), bringing its commercial quota to 887,922 lb (402,755 kg).

The NMFS Administrator for the Greater Atlantic Region (Regional Administrator) monitors the state commercial landings and determines when a state's commercial quota has been harvested. NMFS is required to publish a notice in the **Federal Register** advising and notifying commercial vessels and dealer permit holders that, effective upon a specific date, the state's commercial quota has been harvested and no commercial summer flounder quota is available to land in that state. The Regional Administrator has determined, based on dealer reports and other available information, that the 2017 Rhode Island commercial summer flounder quota will be harvested by November 14, 2017.

Section 648.4(b) provides that Federal permit holders agree, as a condition of the permit, not to land summer flounder in any state that the Regional Administrator has determined no longer has commercial quota available. Therefore, effective 0001 hours, November 14, 2017, landings of summer flounder in Rhode Island by vessels holding summer flounder commercial Federal fisheries permits are prohibited for the remainder of the 2017 calendar year, unless additional quota becomes available through a transfer and is

announced in the **Federal Register**. Effective 0001 hours, November 14, 2017, federally permitted dealers are also notified that they may not purchase summer flounder from federally permitted vessels that land in Rhode Island for the remainder of the calendar year, or until additional quota becomes available through a transfer from another state.

#### **Classification**

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA, finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be contrary to the public interest. This action closes the commercial summer flounder fishery for Rhode Island until January 1, 2018, under current regulations. The regulations at § 648.103(b) require such action to ensure that summer flounder vessels do not exceed quotas allocated to the states. If implementation of this closure was delayed to solicit prior public comment, the quota for this fishing year will be

exceeded, thereby undermining the conservation objectives of the Summer Flounder Fishery Management Plan. The Assistant Administrator further finds, pursuant to 5 U.S.C. 553(d)(3), good cause to waive the 30-day delayed effectiveness period for the reason stated above.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: November 13, 2017.

# Proposed Rules

Federal Register

Vol. 82, No. 220

Thursday, November 16, 2017

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 21

[Docket No. FAA-2017-1058]

#### Airworthiness Criteria: Special Class Airworthiness Criteria for the FlightScan Corporation Camcopter S-100

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed interim airworthiness criteria.

**SUMMARY:** The FAA announces the availability of and requests comments on proposed airworthiness criteria for the Unmanned Aircraft System, FlightScan Corporation, Camcopter S-100. This document provides proposed policy for airworthiness criteria to address the designation of applicable regulations and other criteria for special classes of aircraft. In addition to the proposed airworthiness criteria presented in this document, we are also referencing operational considerations that have been used to support the development of the airworthiness criteria. We consider these proposed criteria to be interim because we anticipate the evolution of new operational criteria will necessitate additional airworthiness criteria in order to allow for the operation of the Camcopter S-100 in the National Airspace System. When those additional operational criteria are further established, we will again provide public notice of proposed policy with additional airworthiness criteria along with changes incorporated to these criteria based on the public comments received.

**DATES:** Send comments on or before December 18, 2017.

**ADDRESSES:** Send comments identified by docket number FAA-2017-1058 using any of the following methods:

- *Federal eRegulations Portal:* Go to <http://www.regulations.gov> and follow

the online instructions for sending your comments electronically.

- *Mail:* Send comments to Docket Operations, M-30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12-140, West Building Ground Floor, Washington, DC 20590-0001.

- *Hand Delivery of Courier:* Take comments to Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m., and 5 p.m., Monday through Friday, except Federal holidays.

- *Fax:* Fax comments to Docket Operations at 202-493-2251.

*Privacy:* The FAA will post all comments it receives, without change, to <http://regulations.gov>, including any personal information the commenter provides. Using the search function of the docket Web site, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477-19478), as well as at <http://DocketsInfo.dot.gov>.

*Docket:* Background documents or comments received may be read at <http://www.regulations.gov> at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m., and 5 p.m., Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** Mr. Raymond Johnston, AIR-692, Federal Aviation Administration, Policy & Innovation Division, Small Airplane Standards Branch, Aircraft Certification Service, 901 Locust, Room 301, Kansas City, MO 64106, telephone (816) 329-4159, facsimile (816) 329-4090.

#### SUPPLEMENTARY INFORMATION:

#### Comments Invited

We invite interested people to take part in the development of this policy by sending written comments, data, or views. The most helpful comments reference a specific portion of the airworthiness criteria, explain the reason for any recommended change, and include supporting data. We ask

that you send us two copies of written comments.

We will consider all comments received on or before the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these airworthiness criteria based on received comments or based on evolving operational criteria.

#### Background

FlightScan Corporation (FlightScan) applied to the Federal Aviation Administration on June 1, 2015 for special class type certification under Title 14, Code of Federal Regulations (14 CFR) 21.17(b) for the Camcopter S-100 Unmanned Aircraft System (UAS).

The Camcopter S-100 UAS (S-100) consists of the unmanned aircraft (UA) and its associated elements (including communication links and the components that control the unmanned aircraft). The S-100 is a vertical take-off UAS that is of the traditional main/tail rotor helicopter design. The fuselage is made of carbon fiber and titanium. The S-100 is powered by a liquid cooled rotary engine and has a maximum take-off weight of 440 pounds which can include a maximum payload of up to 110 pounds. The main rotor diameter is approximately 134 inches. The UAS is intended to be used to conduct airborne surveying of power transmission infrastructure using aerial photogrammetry.

#### Risk Classes

To facilitate the establishment of an initial risk class for UAS, the FAA proposes a scale of risk based on kinetic energy.<sup>1</sup> These proposed risk classes are based on logical break points between data clusters that parallel the existing classes of aircraft defined in AC 23.1309-1E,<sup>2</sup> the size boundaries for Light-Sport Aircraft, and the size boundaries in 14 CFR part 107. These energy based classifications for UAS are given in the definitions section of the *Airworthiness Criteria for the FlightScan*

<sup>1</sup> Within these risk categories, the FAA recognizes the opportunity to further define risk classes based on UAS operational considerations in the National Airspace System.

<sup>2</sup> [http://rgl.faa.gov/Regulatory\\_and\\_Guidance\\_Library/rgAdvisoryCircular.nsf/0/719E41E1D26099108625795D005D5302?OpenDocument&Highlight=ac%2023.1309-1e](http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgAdvisoryCircular.nsf/0/719E41E1D26099108625795D005D5302?OpenDocument&Highlight=ac%2023.1309-1e).

Camcopter S-100, which has been placed in the docket. The S-100 would be considered Risk Class 3.

### Operational Considerations

The following operational considerations were evaluated during the development of this document:

1. The S-100 would be used for power transmission line survey operations. It operates in a designated corridor and area within the right-of-way of the power transmission lines and is operationally limited to 100 feet above and laterally within 100 feet of the power line it would be surveying.

2. While there is minimal population exposure within the power transmission line right-of-way, the mission path would cross several public highways and pass in close proximity to several neighborhoods with population densities of less than 950 people per square mile.

3. The S-100 would operate Beyond Visual Line of Sight (BVLOS). BVLOS for this UAS is defined as those operations that do not conform to the definition of Visual Line of Sight (VLOS) in 14 CFR part 107.31 at amendment 107-1.

4. The radio control uplink and downlink would operate within frequencies approved by the Federal Communications Commission (FCC).

5. This S-100 is designed to operate both autonomously and manually by the pilot-in-command (PIC).

6. Minimum crew includes one PIC, one mission specialist, and one mission flight director.

7. The minimum crew would operate only one S-100 at any time.

8. The aircraft would remain within Radio Line of Sight (RLOS) of the control station. RLOS refers to the straight and unobstructed path between the transmitting and receiving antennas.

9. The control station would be ground based.

10. All crew would be FAA certified airmen with current and applicable medical credentials.

11. All crew would successfully complete required crew training.

12. Maintenance personnel would hold appropriate FAA maintenance certificates.

13. Maintenance personnel would complete required maintenance training.

### Unresolved Criteria

The FAA's ongoing development of operational criteria will necessitate the incorporation of additional airworthiness criteria into the S-100 and may also necessitate future clarity of the airworthiness criteria published

in the *Airworthiness Criteria for the FlightScan Camcopter S-100*, available in the docket. These may include but are not necessarily limited to the following—

1. Command and Control (\*)<sup>3</sup>—UAS control and communications link security is a key safety and interoperability requirement in integrating civil UAS into the National Airspace System NAS;

2. Sense and Avoid (SAA) Equipage (\*)—SAA systems could serve as a means of compliance with 14 CFR 91.113 right-of-way rules and others. Issues associated with the use of SAA systems to comply with 14 CFR 91 requirements and others, if any, must be identified; and

3. Noise Act Finding (\*)—Noise standards have not been developed for UAS.

### Proposed Airworthiness Criteria

The FAA has not previously published airworthiness criteria for UAS. The FAA proposes new type certification airworthiness criteria for the FlightScan Camcopter S-100 as found in *Airworthiness Criteria for the FlightScan Camcopter S-100*, Revision 0, dated November 3, 2017. Locate the document at <http://www.regulations.gov> using docket number FAA-2017-1058.

Issued in Kansas City, Missouri, on November 8, 2017.

**Pat Mullen,**

*Manager, Small Airplane Standards Branch, Aircraft Certification Service.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

#### 21 CFR Parts 170 and 570

[Docket No. FDA-2017-D-0085]

#### Best Practices for Convening a Generally Recognized as Safe Panel: Draft Guidance for Industry; Availability

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notification of availability.

**SUMMARY:** The Food and Drug Administration (FDA, we, or Agency) is announcing the availability of a draft guidance for industry entitled “Best Practices for Convening a GRAS Panel.” This draft guidance document is

<sup>3</sup> Criteria that have not yet been developed are identified with an asterisk (\*).

intended for any person who is responsible for a conclusion that a substance may be used in food on the basis of the generally recognized as safe (GRAS) provision of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) when that person convenes a panel of experts (“GRAS panel”) to independently evaluate whether the available scientific data, information, and methods establish that the substance is safe under the conditions of its intended use in human food or animal food. This draft guidance provides our current thinking on best practices to identify GRAS panel members who have appropriate and balanced expertise; to take steps to reduce the risk that bias (or the appearance of bias) will affect the credibility of the GRAS panel’s output (often called a “GRAS panel report”), including the assessment of potential GRAS panel members for conflict of interest and the appearance of conflict of interest; and to limit the data and information provided to a GRAS panel to public information (e.g., by not providing the GRAS panel with information such as trade secret information).

**DATES:** Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that we consider your comment on this draft guidance before we issue the final version of the guidance, submit either electronic or written comments by May 15, 2018. For comments related to the collection of information provisions in this draft guidance, submit either electronic or written comments by January 16, 2018.

**ADDRESSES:** You may submit comments as follows:

#### Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your

comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

#### Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

*Instructions:* All submissions received must include the Docket No. FDA-2017-D-0085 for “Best Practices for Convening a GRAS Panel.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.”

Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80

FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

*Docket:* For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to Office of Food Additive Safety, Center for Food Safety and Applied Nutrition, Food and Drug Administration (HFS-200), 5001 Campus Dr., College Park, MD 20740 or to the Office of Surveillance and Compliance (HFV-200), 7519 Standish Pl., Rockville, MD 20855. Send two self-addressed adhesive labels to assist that office in processing your request. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance.

#### FOR FURTHER INFORMATION CONTACT:

*Regarding substances that would be used in human food:* Paulette M. Gaynor, Center for Food Safety and Applied Nutrition (HFS-255), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-1192. *Regarding substances that would be used in animal food:* Geoffrey K. Wong, Center for Veterinary Medicine (HFV-224), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 240-402-5838. *Regarding the information collection issues:* FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, [PRASStaff@fda.hhs.gov](mailto:PRASStaff@fda.hhs.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Background

Section 201(s) of the FD&C Act (21 U.S.C. 321(s)) defines a “food additive” as any substance the intended use of which results or may reasonably be expected to result, directly or indirectly, in its becoming a component or otherwise affecting the characteristics of any food if such substance is not generally recognized, among experts qualified by scientific training and experience to evaluate its safety, as having been adequately shown through scientific procedures (or, in the case of a substance used in food prior to January 1, 1958, through either scientific procedures or experience based on common use in food) to be safe

under the conditions of its intended use. Under this definition, a substance that is GRAS under the conditions of its intended use is not a “food additive” and is therefore not subject to mandatory premarket review by FDA under section 409 of the FD&C Act (21 U.S.C. 348). In this document, we refer to a person who is responsible for a conclusion that a substance may be used in human food or animal food on the basis of the GRAS provision of the FD&C Act, without premarket review by FDA under section 409 of the FD&C Act, as the “proponent” of that substance.

We have established regulations implementing the GRAS provision of section 201(s) of the FD&C Act in part 170 (21 CFR part 170) for human food and in part 570 (21 CFR part 570) for animal food. Those regulations include a voluntary procedure (“GRAS notification procedure”) through which a proponent may notify us of a conclusion that a substance is GRAS under the conditions of its intended use in human food (part 170, subpart E) or animal food (part 570, subpart E). Under the interim pilot program, we have filed and responded to more than 600 GRAS notices for substances intended for use in human food and 18 GRAS notices for substances intended for use in animal food (80 FR 54960 at 54964, August 17, 2016).

In some cases, the process whereby the proponent evaluates whether the available data and information support a conclusion that a substance is GRAS under the conditions of its intended use includes considering the opinion of a “GRAS panel” of qualified experts who independently evaluate whether the available scientific data, information, and methods establish that a substance is safe under the conditions of its intended use in human food or animal food. Depending on the outcome of the GRAS panel’s analysis, the proponent could either reach a conclusion regarding the safety of the substance under the conditions of its intended use, or be advised of one or more issues (such as gaps in the data and information, or alternative interpretations of the available data and information) that warrant investigation before a conclusion can be drawn about whether the substance is safe under the conditions of its intended use. When the outcome of the GRAS panel’s analysis supports the proponent’s conclusion that a substance is safe under the conditions of its intended use, in essence the proponent then relies on the members of the GRAS panel to act as a proxy for the larger scientific community knowledgeable about the safety of substances directly or

indirectly added to food and, in so doing, relies on the outcome of the GRAS panel's analysis to support the proponent's conclusion that the safety of the intended use is "generally recognized" by qualified experts. Whether a GRAS panel is a sufficient proxy for the larger scientific community depends on a number of factors, such as the subject matter expertise of the members of the GRAS panel and whether the members of the GRAS panel would be considered representative of experts qualified by scientific training and experience to evaluate the safety of the substance under the conditions of its intended use.

A GRAS panel is one mechanism that proponents have used to demonstrate that the safety of a substance under the conditions of its intended use is generally recognized by qualified experts. However, the use of a GRAS panel is not the only mechanism for doing so and the use of a GRAS panel does not necessarily mean that the GRAS criteria have been met (81 FR 54960 at 54974–54975, August 17, 2016).

We are announcing the availability of a draft guidance for industry entitled "Best Practices for Convening a GRAS Panel." We are issuing the draft guidance consistent with our good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on this topic. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternate approach if it satisfies the requirements of the applicable statutes and regulations. This is not a significant regulatory action subject to Executive Order 12866.

This draft guidance document is intended for any proponent who convenes a GRAS panel and provides our current thinking on best practices to identify GRAS panel members who have appropriate and balanced expertise; to take steps to reduce the risk that bias (or the appearance of bias) will affect the credibility of a GRAS panel report, including the assessment of potential GRAS panel members for conflict of interest and the appearance of conflict of interest; and to limit the data and information provided to a GRAS panel to public information (e.g., by not providing the GRAS panel with information such as trade secret information).

## II. Paperwork Reduction Act of 1995

This draft guidance contains proposed information collection provisions that are subject to review by the Office of Management and Budget (OMB) under

the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520). "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** for each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of the proposed collection of information set forth in this document.

With respect to the collection of information associated with this draft guidance, we invite comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the information collected on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

*Title:* Best Practices for Convening a GRAS Panel (OMB control number 0910—NEW).

*Description of respondents:* This new collection of information would be performed by those persons ("proponents") who are responsible for a conclusion that a substance may be used in food on the basis of the GRAS provision of the FD&C Act when such persons convene a GRAS panel to independently evaluate whether the available scientific data, information, and methods establish that the substance is safe under the conditions of its intended use in human food or animal food. The records recommended in this draft guidance would include a one-time information collection burden pertaining to a written GRAS panel policy to govern the assembly and conduct of a GRAS panel. The records recommended in this draft guidance also would include annual information collection burdens pertaining to documenting the application of the written GRAS panel policy to each member of a GRAS panel convened in a given year. Finally, the draft guidance recommends that a GRAS panel provide a written report of its findings; however,

we consider that a written GRAS panel report is customary business practice that is already being created by GRAS panels and, thus, we do not estimate an annual information collection burden for the creation of a GRAS panel report.

*Analysis of Burden Estimates Resulting from the Recommendation for a Written GRAS Panel Policy:* For the purpose of this analysis, we make the conservative assumption that all proponents who document a GRAS conclusion will create a written GRAS panel policy that would apply to GRAS panels convened in the first year that the draft guidance, if finalized, would be in effect as well as to GRAS panels convened in subsequent years. We also assume that these proponents will create a written GRAS panel policy regardless of whether they report the documented GRAS conclusion to FDA in the form of a GRAS notice. Therefore, for the purpose of this analysis we: (1) Calculated the number of proponents who have submitted at least one GRAS notice to FDA and (2) estimated the number of proponents who have documented at least one GRAS conclusion without reporting that documented GRAS conclusion to FDA in the form of a GRAS notice.

Using the data in our inventories of GRAS notices submitted for substances intended for use in human food (Ref. 1) and animal food (Ref. 2) during the time period of April 17, 1997, through September 5, 2017, we calculate that 396 proponents submitted at least one GRAS notice for a substance intended for use in human food, and 15 proponents submitted at least one GRAS notice for a substance intended for use in animal food. During that time period, there were three proponents who had submitted at least one GRAS notice for a substance intended for use in human food and at least one GRAS notice for a substance intended for use in animal food. However, for the purpose of this analysis, we make the conservative assumption that there will be no overlap between proponents who submit GRAS notices for substances intended for use in human food and proponents who submit GRAS notices for substances intended for use in animal food. Therefore, the total number of proponents who have submitted at least one GRAS notice to FDA is 411 (396 proponents + 15 proponents = 411 proponents).

We have very little information about the number of proponents who have documented a GRAS conclusion without reporting that GRAS conclusion to FDA in the form of a GRAS notice. To estimate the number of such proponents, we used a publicly

available database entitled “Independent GRAS (Generally Recognized As Safe) Conclusion Inventory Database” (Ref. 3), which is a compilation of the results of a consulting company’s search of publicly available information in industry trade journals about documented GRAS conclusions for substances intended for use in human food. The oldest entry is for the year 1995. FDA received the first GRAS notice for substances intended for use in human food in 1998 and, thus, the database covers the entire timeframe during which FDA has been receiving GRAS notices for substances intended for use in human food. As of September 5, 2017, that database recorded that there had been a total of 199 documented GRAS conclusions, with 41 of those documented GRAS conclusions reported to FDA as a GRAS notice and 158 of those documented GRAS conclusions not reported to FDA as a GRAS notice. In contrast, as of September 5, 2017, FDA’s inventory of GRAS notices shows that the number of GRAS conclusions reported to FDA during this timeframe was 720, not 41 (Ref. 1). We assume that the reduced number of documented GRAS conclusions that the database recorded as being reported to FDA is due to the mechanism by which the database searches for documented GRAS conclusions (*i.e.*, publications in industry trade journals). For example, there could be less incentive for a business that reports its documented GRAS conclusion to FDA to publicize that GRAS conclusion through industry trade journals, because the business can publicize FDA’s response to the GRAS notice in other ways.

The database attributes the 158 documented GRAS conclusions not reported to FDA to 142 different proponents. However, 62 of these proponents have also submitted a GRAS notice to FDA and, thus, we calculate that the database attributes documented GRAS conclusions to 80 proponents who have not submitted a GRAS notice to FDA (142 proponents listed in the database—62 proponents who we already counted because they submitted a GRAS notice to FDA). We also make the conservative assumption that the number of proponents who have documented GRAS conclusions without reporting them to FDA since FDA began receiving GRAS notices is twice as high as recorded in the database—*i.e.*, 160 proponents (80 proponents listed in the database  $\times 2 = 160$ ).

The publicly available database does not record documented GRAS conclusions for substances intended for use in animal food. However, based on

the number of annual GRAS notices submitted to FDA in recent years, we previously estimated that the number of annual GRAS notices submitted to FDA for substances intended for use in animal food would be 50 percent of the number of annual GRAS notices submitted to FDA for substances intended for use in human food (*i.e.*, we estimated 50 GRAS notices will be submitted to FDA annually for substances intended for use in human food and that 25 GRAS notices will be submitted to FDA annually for substances intended for use in animal food (OMB control number 0910–0342; 81 FR 54960)). Therefore, for the purpose of this analysis we assume that the number of proponents who have documented GRAS conclusions for substances intended for use in animal food without reporting those GRAS conclusions to FDA is 50 percent of the number of proponents who documented GRAS conclusions for substances intended for use in human food without reporting those GRAS conclusions to FDA—*i.e.*, 80 proponents (160 estimated proponents who have documented GRAS conclusions without reporting those GRAS conclusions to FDA  $\times 0.5 = 80$  proponents). We calculate that the total number of proponents who documented GRAS conclusions without reporting those GRAS conclusions to FDA is 240 proponents (160 estimated proponents who have documented GRAS conclusions for substances intended for use in human food + 80 estimated proponents who have documented GRAS conclusions for substances intended for use in animal food = 240 proponents).

To estimate the total number of proponents, we are adding 240 estimated proponents who have not reported their documented GRAS conclusions to FDA to the 411 proponents who have already submitted at least one GRAS notice to FDA for a total of 651 proponents who will document a GRAS conclusion (240 non-reporting proponents + 411 reporting proponents = 651 total proponents). As already stated, for the purpose of this analysis we make the conservative assumption that all of these proponents who document GRAS conclusions (*i.e.*, 651 proponents) will create a written GRAS panel policy. We estimate that it would take 40 hours to create a written GRAS panel policy, including 8 hours to review relevant, publicly available policies (*e.g.*, Refs. 4 and 5) that address conflict of interest and 32 hours to tailor a GRAS panel policy specific to the proponent, using relevant information from such existing policies as

appropriate to the needs of the proponent. As shown in table 1, the total one-time burden to create a written GRAS panel policy is 40 hours per proponent  $\times$  651 proponents = 26,040 hours. We request comment on our estimate of the total number of proponents and on the hourly burden to create a written GRAS panel policy. There are no estimated capital costs or operating and maintenance costs associated with the information collection for a written GRAS panel policy.

*Analysis of Burden Estimates Resulting From the Recommendation for Application of a Written GRAS Panel Policy to GRAS Panel Members:* Based on the number of annual GRAS notices submitted to FDA in recent years, we previously estimated that 50 GRAS notices will be submitted to FDA for substances intended for use in human food and that 25 GRAS notices will be submitted to FDA for substances intended for use in animal food (OMB control number 0910–0342; 81 FR 54960), for a total number of 75 GRAS notices submitted to FDA each year. We count each GRAS notice as a single GRAS conclusion, and, for the purpose of this analysis, we assume that a different proponent submits each of these GRAS notices. Therefore, we estimate that the total number of documented GRAS conclusions submitted to FDA on an annual basis is 75 GRAS conclusions and that these GRAS conclusions are submitted by 75 proponents.

We have not previously estimated the annual number of documented GRAS conclusions that are not reported to FDA as a GRAS notice. For the purpose of this analysis, to estimate such GRAS conclusions we used the same database (Ref. 3) that we used to estimate the total number of proponents who document GRAS conclusions without reporting the GRAS conclusions to FDA in the form of a GRAS notice. As already stated, the oldest recorded entry in the database is for the year 1995. However, with the exception of that single entry for 1995, the remaining entries are for the years 2001 and beyond. In addition, the current year (2017) has not reached its end. Therefore, we use 16 years (*i.e.*, from 2001 through 2016) as the number of years covering those documented GRAS conclusions that are not reported to FDA. For the purpose of calculating the annual number of documented GRAS conclusions that are for substances intended for use in human food but not reported to FDA, we estimate that there are 157 such GRAS conclusions (158 documented, unreported GRAS conclusions for

substances intended for use in human food minus 1 GRAS conclusion reported before 2001). We calculate that, on average, the annual number of documented, unreported GRAS conclusions for substances intended for use in human food and recorded in the database is 10 (157 documented, unreported GRAS conclusions/16 years = 9.8 documented, unreported GRAS conclusions per year recorded in the database, rounded up to 10). As with our analysis of the total number of proponents, we conservatively assume that the annual number of documented, unreported GRAS conclusions for substances intended for use in human food could be twice as high as the annual number of documented, unreported GRAS conclusions recorded in the database—*i.e.*, 20 documented, unreported GRAS conclusions for substances intended for use in human food each year (10 documented, unreported GRAS conclusions recorded in the database on an annual basis  $\times 2 = 20$  documented, unreported GRAS conclusions on an annual basis). As with documented GRAS conclusions that are reported to FDA, we assume that a different proponent is responsible for each documented GRAS conclusion not reported to FDA and, thus, on an annual basis there are 20 proponents who do not report their documented GRAS conclusions for substances intended for use in human food to FDA. As with our analysis of the total number of proponents, we conservatively assume that the annual number of documented, unreported GRAS conclusions for substances intended for use in animal food is 50 percent of the annual number of documented, unreported GRAS conclusions for substances intended for use in human food—*i.e.*, 10 documented, unreported GRAS conclusions for substances intended for use in animal food on an annual basis (20 documented, unreported GRAS conclusions for substances intended for use in human food  $\times 0.5$ ). We therefore calculate that there is a total of 30 documented, unreported GRAS conclusions each year (20 documented, unreported GRAS conclusions for substances intended for use in human food + 10 documented, unreported GRAS conclusions for substances intended for use in animal food). We also calculate that there are

105 proponents who document a GRAS conclusion on an annual basis (75 proponents who report their documented GRAS conclusions to FDA as a GRAS notice + 30 proponents who do not report their documented GRAS conclusions to FDA as a GRAS notice = 105 total proponents).

We have information about the percent of proponents who convene a GRAS panel for a documented GRAS conclusion and also submit a GRAS notice to FDA. During the time period April 17, 1997, through September 5, 2017, on average, 63 percent of proponents who submitted a GRAS notice for a substance intended for use in human food, and 60 percent of proponents who submitted a GRAS notice for a substance intended for use in animal food, convened a GRAS panel. We therefore estimate that, on an annual basis, 32 proponents will convene a GRAS panel and submit a GRAS notice to FDA for substances intended for use in human food (63 percent  $\times 50$  proponents = 31.5 proponents; rounded up to 32 proponents), and 15 proponents will convene a GRAS panel and submit a GRAS notice to FDA for substances intended for use in animal food (60 percent  $\times 25$  proponents = 15 proponents). We calculate that the total number of proponents who will convene a GRAS panel and submit a GRAS notice to FDA is 47 proponents (32 proponents who submit GRAS notices for substances intended for use in human food + 15 proponents who submit GRAS notices for substances intended for use in animal food = 47 proponents). We also assume that all proponents will document the application of a written GRAS panel policy to each member of the GRAS panel.

We have very little information about the percent of proponents who convene a GRAS panel for a documented GRAS conclusion but do not report their documented GRAS conclusions to FDA as a GRAS notice. For the purpose of this analysis, we make the conservative assumption that all 30 proponents who annually document GRAS conclusions without reporting them to FDA will convene a GRAS panel. Taking into account the estimated number of proponents who convene a GRAS panel and submit a GRAS notice to FDA, and the estimated number of proponents

who convene a GRAS panel but do not submit a GRAS notice to FDA, we calculate that the total number of proponents who will convene a GRAS panel and document the application of the written GRAS panel policy to each member of a GRAS panel on an annual basis is 77 proponents (47 proponents who submit GRAS notices to FDA + 30 proponents who do not submit GRAS notices = 77 proponents).

Based on the recommendations in the draft guidance, if finalized, we assume that all GRAS panels will include at least 3 panel members (with expertise in chemistry or biochemistry, toxicology, and exposure assessment) and that some GRAS panels will include as many as 6 panel members with expertise that reflects the physical, chemical, and biological properties of the substance and the scientific questions that arise in relation to the conditions of its intended use. We assume that a GRAS panel will include 5 panel members on average. We also assume that the proponent will reject at least one individual with applicable expertise due to a financial conflict of interest or the appearance of a financial or non-financial conflict of interest and, thus, that 77 proponents will document the application of the written GRAS panel policy to 6 individual GRAS panel members, for a total of 462 documentations by proponents of the application of the written GRAS panel policy (77 proponents  $\times 6$  individual panel members = 462 documentations). As shown in table 2, we estimate that it will take 16 hours to document the application of the written GRAS policy to each panel member, for a total of 7,392 hours (462 documentations  $\times 16$  hours per documentation = 7,392 hours). As shown in table 3, we assume that all 462 individuals who are being considered as members of a GRAS panel will each need 4 hours to provide applicable information to the proponent, for a total of 1,848 hours (462 individuals  $\times 4$  hours per individual = 1,848 hours).

There are no estimated capital costs or operating and maintenance costs associated with this information collection for the application of a written GRAS panel policy to individuals being considered as members of a GRAS panel.

TABLE 1—ESTIMATED ONE-TIME RECORDKEEPING BURDEN <sup>1</sup>

Recommendation	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping (in hours)	Total hours

**33 CFR Part 334**

[COE-2017-0003]

**Establishment of a Permanent Restricted Area for U.S. Coast Guard Yard, Baltimore, Maryland, in Curtis Creek and Arundel Cove**

**AGENCY:** U.S. Army Corps of Engineers, DoD.

**ACTION:** Notice of proposed rulemaking and request for comments.

**SUMMARY:** The Corps of Engineers is proposing to establish a permanent restricted area for the U. S. Coast Guard in waters of Curtis Creek and Arundel Cove located in Baltimore, Maryland. The establishment of the restricted area is necessary to reflect the current security needs at U. S. Coast Guard Yard (CG Yard), Baltimore, Maryland, including the protection of Coast Guard-wide military assets. The CG Yard is the Coast Guard’s only shipyard and its largest industrial facility. It performs major ship, electronics, and heavy weapons overhaul, repair, and manufacture. The CG Yard is also the host command for various Coast Guard commands supporting local and nationwide Coast Guard missions.

**DATES:** Written comments must be submitted on or before December 18, 2017.

**ADDRESSES:** You may submit comments, identified by docket number COE-2017-0003, by any of the following methods:

*Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

*Email:* [david.b.olson@usace.army.mil](mailto:david.b.olson@usace.army.mil). Include the docket number, COE-2017-0003, in the subject line of the message.

*Mail:* U.S. Army Corps of Engineers, Attn: CECW-CO-R (David B. Olson), 441 G Street NW., Washington, DC 20314-1000.

*Hand Delivery/Courier:* Due to security requirements, we cannot receive comments by hand delivery or courier.

*Instructions:* Direct your comments to docket number COE-2017-0003. All comments received will be included in the public docket without change and may be made available on-line at <http://www.regulations.gov>, including any personal information provided, unless the commenter indicates that the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI, or otherwise protected, through [regulations.gov](http://www.regulations.gov) or email. The [regulations.gov](http://www.regulations.gov) Web site is an anonymous access system, which means we will not know your identity or contact information unless you provide it in the body of your comment. If you send an email directly to the Corps without going through [regulations.gov](http://www.regulations.gov), your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, we recommend that you include your name and other contact information in the body of your comment and also include your contact information with any disk or CD-ROM you submit. If we cannot read your comment because of technical difficulties and cannot contact you for clarification, we may not be able to consider your comment. Electronic comments should avoid the use of any special characters, any form of encryption, and be free of any defects or viruses.

*Docket:* For access to the docket to read background documents or comments received, go to [www.regulations.gov](http://www.regulations.gov). All documents in the docket are listed. Although listed in the index, some information is not

publicly available, such as CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form.

**FOR FURTHER INFORMATION CONTACT:** Mr. David Olson, Headquarters, Operations and Regulatory Division, Washington, DC at 202-761-4922, or Steve Elinsky, Corps of Engineers, Baltimore District, Regulatory Branch, at 410-962-4503.

**SUPPLEMENTARY INFORMATION:** Pursuant to its authorities in Section 7 of the Rivers and Harbors Act of 1917 (40 Stat. 266; 33 U.S.C. 1) and Chapter XIX of the Army Appropriations Act of 1919 (40 Stat. 892; 33 U.S.C. 3), the Corps of Engineers is proposing amendments to regulations in 33 CFR part 334 for the establishment of a permanent restricted area in waters of Curtis Creek and Arundel Cove in Baltimore, Maryland. In a memorandum dated November 28, 2016, the U.S. Coast Guard requested that the Corps establish this permanent restricted area. The proposed permanent restricted area is necessary to fulfill the current security needs of the U.S. Coast Guard at this facility. The CG Yard is the U.S. Coast Guard's only shipyard and is its largest industrial facility. The CG Yard is used for major ship, electronics, and heavy weapons overhaul, repair, and manufacture.

#### Procedural Requirements

##### *a. Regulatory Planning and Review*

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This proposed rule has not been designated a "significant regulatory action," under Executive Order 12866. Accordingly, this proposed rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

The Corps has made a determination this proposed rule is not a significant regulatory action. This regulatory action determination is based on the size, duration, and location of the restricted area. The restricted area occupies only a portion of the waterway and a vessel that needs to transit the restricted area may do so if the operator of the vessel obtains permission from the Commanding Officer, U.S. Coast Guard Yard or his/her designated

representative. Fishing, crabbing, trawling, net-fishing, and other aquatic activities may also be conducted with prior approval from the Commanding Officer, U.S. Coast Guard Yard or his/her designated representative.

##### *b. Impact on Small Entities*

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601-612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Corps certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities. While some owners or operators of vessels that intend to transit the restricted area may be small entities, for the reasons stated in paragraph (a) above this rule would not have a significant economic impact on any vessel owner or operator. In addition, the restricted area is necessary to address the current security needs at CG Yard, Baltimore, Maryland, including the protection of Coast Guard-wide military assets. Small entities can utilize navigable waters outside of the restricted area. Small entities may also transit the restricted area as long as they obtain permission from the Commanding Officer, CG Yard or his/her designated representative. Unless information is obtained to the contrary during the comment period, the Corps expects that the economic impact of the proposed restricted area would have practically no impact on the public, any anticipated navigational hazard or interference with existing waterway traffic. After considering the economic impacts of this restricted area regulation on small entities, I certify that this action will not have a significant impact on a substantial number of small entities.

##### *c. Review Under the National Environmental Policy Act*

Due to the administrative nature of this action and because there is no intended change in the use of the area, the Corps expects that this regulation, if adopted, will not have a significant impact to the quality of the human environment and, therefore, preparation of an environmental impact statement will not be required. An environmental assessment will be prepared after the public notice period is closed and all comments have been received and considered.

#### d. *Unfunded Mandates Act*

This proposed rule does not impose an enforceable duty among the private sector and, therefore, it is not a Federal private sector mandate and it is not subject to the requirements of either Section 202 or Section 205 of the Unfunded Mandates Act. We have also found under Section 203 of the Act, that small governments will not be significantly and uniquely affected by this rulemaking.

#### List of Subjects in 33 CFR Part 334

Danger zones, Marine safety, Navigation (water), Restricted areas, Waterways.

For the reasons set out in the preamble, the Corps proposes to amend 33 CFR part 334 as follows:

#### PART 334—DANGER ZONE AND RESTRICTED AREA REGULATIONS

■ 1. The authority citation for 33 CFR Part 334 continues to read as follows:

**Authority:** 40 Stat. 266 (33 U.S.C. 1) and 40 Stat. 892 (33 U.S.C. 3).

■ 2. Add § 334.145 to read as follows:

#### § 334.145 Curtis Creek and Arundel Cove, U.S. Coast Guard Yard, Baltimore, Maryland; restricted area.

(a) *The area.* The restricted area shall encompass all navigable waters of the United States as defined at 33 CFR part 329, within the area bounded by a line connecting the following coordinates: Commencing from the shoreline at latitude 39°12'05.8" N., longitude 076°34'28.4" W.; thence to latitude 39°12'04.8" N., longitude 076°34'31" W.; thence to latitude 39°11'5.91" N., longitude 076°34'28" W.; thence to latitude 39°11'4.48" N., longitude 076°34'25" W.; thence to latitude 39°11'3.36" N., longitude 076°34'06.9" W. The datum for these coordinates is NAD-83.

(b) *The regulation.* (1) The restricted area as described in paragraph (a) of this section is only open to government vessels. Government vessels include, but are not limited to, U.S. Coast Guard, U.S. Coast Guard Auxiliary, Department of Defense, National Oceanic and Atmospheric Administration, state and local law enforcement, emergency services and vessels under contract with the U.S. Government. Vessels transiting the restricted area shall proceed across the area by the most direct route and without unnecessary delay. Fishing, crabbing, trawling, net-fishing and other aquatic activities are prohibited without prior approval from the Commanding Officer, U.S. Coast Guard Yard or his/her designated representative. The U.S.

Coast Guard will install marker buoys along some or all of the referenced coordinates to demarcate the limits of the restricted area. The Coast Guard will also install warning signs notifying individuals of the restricted area and prohibiting all unauthorized entry into the area will be posted along the property boundary.

(2) All persons, vessels and other craft are prohibited from entering, transiting, drifting, dredging or anchoring within the restricted area as described in paragraph (a) of this section without prior approval from the Commanding Officer, U.S. Coast Guard Yard or his/her designated representative.

(3) The restrictions described in paragraph (b)(1) of this section are in effect 24 hours a day, 7 days a week.

(c) *Enforcement.* The regulations in this section shall be enforced by the Commanding Officer, U.S. Coast Guard Yard or such agencies as he/she may designate.

Dated: November 9, 2017.

**Thomas P. Smith,**  
Chief, Operations and Regulatory Division,  
Directorate of Civil Works.

[FR Doc. 2017-24888 Filed 11-15-17; 8:45 am]

BILLING CODE 3720-58-P

#### 33 CFR Part 334

[COE-2017-0007]

#### United States Air Force 81st Security Forces Anti-Terrorism Office, Restricted Area, Keesler Air Force Base, Biloxi, Mississippi

**AGENCY:** U.S. Army Corps of Engineers, DoD.

**ACTION:** Notice of proposed rulemaking and request for comments.

**SUMMARY:** The U.S. Army Corps of Engineers (Corps) is proposing to establish a no anchorage restricted area within waters along the Back Bay of Biloxi shoreline of the Keesler Air Force Base (KAFB) located in Biloxi, Mississippi, on behalf of a request by the United States Air Force (USAF) 81st Security Forces Anti-Terrorism Office. The proposed no anchorage restricted area will be established by placing 12 buoys to demarcate the approximately 10,000 feet of shoreline east to west and extend approximately 150 feet from the shoreline of the base. The proposed restricted area is essential to address a major anti-terrorism and safety concern

due to the lack of perimeter fencing or physical denial system.

**DATES:** Written comments must be submitted on or before December 18, 2017.

**ADDRESSES:** You may submit comments, identified by docket number COE-2017-0007, by any of the following methods:

*Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

*Email:* [david.b.olson@usace.army.mil](mailto:david.b.olson@usace.army.mil). Include the docket number COE-2017-0007 in the subject line of the message.

*Mail:* U.S. Army Corps of Engineers, Attn: CECW-CO (David B. Olson), 441 G Street NW., Washington, DC 20314-1000.

*Hand Delivery/Courier:* Due to security requirements, we cannot receive comments by hand delivery or courier.

*Instructions:* Direct your comments to docket number COE-2017-0007. All comments received will be included in the public docket without change and may be made available on-line at <http://www.regulations.gov>, including any personal information provided, unless the commenter indicates that the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI, or otherwise protected, through [www.regulations.gov](http://www.regulations.gov) or email. The [www.regulations.gov](http://www.regulations.gov) Web site is an anonymous access system, which means we will not know your identity or contact information unless you provide it in the body of your comment. If you send an email directly to the Corps without going through [www.regulations.gov](http://www.regulations.gov), your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, we recommend that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If we cannot read your comment because of technical difficulties and cannot contact you for clarification, we may not be able to consider your comment. Electronic comments should avoid the use of any special characters, any form of encryption, and be free of any defects or viruses.

*Docket:* For access to the docket to read background documents or comments received, go to [www.regulations.gov](http://www.regulations.gov). All documents in the docket are listed. Although listed in

the index, some information is not publicly available, such as CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form.

**FOR FURTHER INFORMATION CONTACT:** Mr. David Olson, Headquarters, Operations and Regulatory Community of Practice, Washington, DC at 202-761-4922 or Mr. Don Mroczo, U.S. Army Corps of Engineers, Mobile District, at 251-690-3185.

**SUPPLEMENTARY INFORMATION:** The 81st Security Forces Anti-Terrorism Office, KAFB, located in Biloxi, Mississippi is responsible for USAF perimeter security at KAFB located in Biloxi, Mississippi. In accordance with Department of Defense and Department of the Air Force guidance, the 81st Security Forces Anti-Terrorism Office is responsible for the antiterrorism efforts and force protection of Department of the Air Force assets under his or her charge.

In response to a request by the USAF, and pursuant to its authorities in Section 7 of the Rivers and Harbors Act of 1917 (40 Stat 266; 33 U.S.C. 1) and Chapter XIX of the Army Appropriations Act of 1919 (40 Stat 892; 33 U.S.C. 3), the Corps is proposing to amend the regulations in 33 CFR part 334 by establishing a new restricted area.

### Procedural Requirements

#### *a. Regulatory Planning and Review*

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This proposed rule has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly, this proposed rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

The Corps has made a determination this proposed rule is not a significant regulatory action. This regulatory action determination is based on the size, duration, and location of the restricted area. The restricted area occupies a small portion of the waterway and a vessel that needs to transit the restricted area may do so if the operator of the vessel obtains permission from the USAF 81st Security Forces Anti-

Terrorism Office, KAFB or its authorized representative.

#### *b. Impact on Small Entities*

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Corps certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities. While some owners or operators of vessels that intend to transit the restricted area may be small entities, for the reasons stated in paragraph (a) above this rule would not have a significant economic impact on any vessel owner or operator. In addition, the restricted area is necessary to address a major anti-terrorism and safety concern due to the lack of perimeter fencing or physical denial system. Small entities can utilize navigable waters outside of the restricted area. Small entities may also transit the restricted area as long as they obtain permission from the USAF 81st Security Forces Anti-Terrorism Office, KAFB, Biloxi, Mississippi, or its authorized representative. The restricted area is necessary for security of KAFB. Unless information is obtained to the contrary during the comment period, the Corps expects that the economic impact of the proposed restricted area would have practically no impact on the public, any anticipated navigational hazard or interference with existing waterway traffic. After considering the economic impacts of this restricted area regulation on small entities, I certify that this action will not have a significant impact on a substantial number of small entities.

#### *c. Review Under the National Environmental Policy Act*

The Corps expects that the proposed rule will not have a significant impact to the quality of the human environment and, therefore, preparation of an environmental impact statement will not be required. An environmental assessment will be prepared after the public notice period is closed and all comments have been received and considered. After it is prepared, it may be reviewed at the District office listed at the end of the **FOR FURTHER INFORMATION CONTACT**, above.

#### *d. Unfunded Mandates Act*

The proposed rule does not impose an enforceable duty among the private sector and, therefore, is not a Federal private sector mandate and is not subject to the requirements of Section 202 or 205 of the Unfunded Mandates Reform Act (Pub. L. 104–4, 109 Stat. 48, 2 U.S.C. 1501 *et seq.*). We have also found, under Section 203 of the Act, that small governments will not be significantly or uniquely affected by this rulemaking.

#### List of Subjects in 33 CFR Part 334

Danger Zones, Navigation (water), Restricted areas, Waterways.

For the reasons set out in the preamble, the Corps proposes to amend 33 CFR part 334 as follows:

### **PART 334—DANGER ZONE AND RESTRICTED AREA REGULATIONS**

■ 1. The authority citation for 33 CFR part 334 continues to read as follows:

**Authority:** 40 Stat. 266 (33 U.S.C. 1) and 40 Stat. 892 (33 U.S.C. 3).

■ 2. Add § 334.787 to read as follows:

#### **§ 334.787 81st Security Forces Anti-Terrorism Office, Keesler Air Force Base, Biloxi, Mississippi; No Anchorage Restricted Area.**

(a) *The area.* The restricted area shall encompass all navigable waters of the United States, as defined at 33 CFR part 329, contiguous to the area identified as Keesler Air Force Base (KAFB) and the mean high water level within an area bounded by the shore and buoys from the east to the west of the area starting at: latitude 30°25'11.73" N. longitude 88°54'57.69" W., thence to latitude 30°25'11.85" N. longitude 88°55'3.46" W., thence to latitude 30°25'8.00" N. longitude 88°55'10.10" W., thence to latitude 30°25'4.15" N. longitude 88°55'16.74" W., thence to latitude 30°25'6.96" N. longitude 88°55'24.12" W., thence to latitude 30°25'1.83" N. longitude 88°55'30.01" W., thence to latitude 30°24'56.15" N. longitude 88°55'34.16" W., thence to latitude 30°24'51.14" N. longitude 88°55'39.56" W., thence to latitude 30°24'47.48" N. longitude 88°55'46.64" W., thence to latitude 30°24'51.08" N. longitude 88°55'53.46" W., thence to latitude 30°24'55.30" N. longitude 88°55'59.91" W., thence to latitude 30°24'56.87" N. longitude 88°56'7.40" W. The datum is NAD–83.

(b) *The regulations.* (1) All persons, swimmers, vessels and other craft, except those vessels under the supervision or contract to local military or USAF authority, vessels of the United

States Coast Guard, and local or state law enforcement vessels, are prohibited from entering the restricted area without permission from the USAF 81st Security Forces Anti-Terrorism Office, KAFB or its authorized representative.

(2) The restricted area is in effect twenty-four hours per day and seven days a week (24/7).

(3) Should warranted access into the restricted navigation area be needed, all entities are required to contact the USAF 81st Security Forces Anti-Terrorism Office, KAFB, Biloxi, Mississippi, or its authorized representative.

(c) *Enforcement.* The regulation in this section shall be enforced by the USAF 81st Security Forces Anti-Terrorism Office, KAFB and/or such agencies or persons as that office may designate.

Dated: November 9, 2017.

**Repeal of Emission Requirements for Glider Vehicles, Glider Engines, and Glider Kits**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is proposing to repeal the emission standards and other requirements for heavy-duty glider vehicles, glider engines, and glider kits based on a proposed interpretation of the Clean Air Act (CAA) under which

glider vehicles would be found not to constitute “new motor vehicles” within the meaning of CAA section 216(3), glider engines would be found not to constitute “new motor vehicle engines” within the meaning of CAA section 216(3), and glider kits would not be treated as “incomplete” new motor vehicles. Under this proposed interpretation, EPA would lack authority to regulate glider vehicles, glider engines, and glider kits under CAA section 202(a)(1).

**DATES:**

*Comments:* Comments on all aspects of this proposal must be received on or before January 5, 2018.

*Public Hearing:* EPA will hold a public hearing on Monday, December 4, 2017. The hearing will be held at EPA’s Washington, DC campus located at 1201 Constitution Avenue NW., Washington, DC. The hearing will start at 10:00 a.m. local time and continue until everyone has had a chance to speak. More details concerning the hearing can be found at <https://www.epa.gov/regulations-emissions-vehicles-and-engines/regulations-greenhouse-gas-emissions-commercial-trucks>.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2014-0827, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the Web, cloud, or

other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www.epa.gov/dockets/commenting-epa-dockets>.

*Docket:* All documents in the docket are listed on the [www.regulations.gov](http://www.regulations.gov) Web site. Although listed in the index, some information is not publicly available, *e.g.*, confidential business information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through [www.regulations.gov](http://www.regulations.gov) or in hard copy at the following location:

Air and Radiation Docket and Information Center, EPA Docket Center, EPA/DC, EPA WJC West Building, 1301 Constitution Ave. NW., Room 3334, Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Air Docket is (202) 566-1742.

**FOR FURTHER INFORMATION CONTACT:** Julia MacAllister, Office of Transportation and Air Quality, Assessment and Standards Division, Environmental Protection Agency, 2000 Traverwood Drive, Ann Arbor, MI 48105; telephone number: 734-214-4131; email address: [hearing\\_registration-asd@epa.gov](mailto:hearing_registration-asd@epa.gov).

**SUPPLEMENTARY INFORMATION:**

**Does this action apply to me?**

This action relates to a previously promulgated final rule that affects companies that manufacture, sell, or import into the United States glider vehicles. Proposed categories and entities that might be affected include the following:

Category	NAICS code <sup>a</sup>	Examples of potentially affected entities
Industry .....	336110, 336111, 336112, 333618, 336120, 441310.	Motor Vehicle Manufacturers, Engine Manufacturers, Engine Parts Manufacturers, Truck Manufacturers, Automotive Parts and Accessories Dealers.

**Note:** <sup>a</sup> North American Industry Classification System (NAICS).

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely covered by these rules. This table lists the types of entities that we are aware may be regulated by this action. Other

types of entities not listed in the table could also be regulated. To determine whether your activities are regulated by this action, you should carefully examine the applicability criteria in the referenced regulations. You may direct

questions regarding the applicability of this action to the persons listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

## I. Introduction

The basis for the proposed repeal of those provisions of the final rule entitled Greenhouse Gas Emissions and Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles—Phase 2 (the Phase 2 rule)<sup>1</sup> that apply to glider vehicles, glider engines, and glider kits is EPA's proposed interpretation of CAA section 202(a)(1) and sections 216(2) and 216(3), which is discussed below. Under this proposed interpretation: (1) Glider vehicles would not be treated as “new motor vehicles,” (2) glider engines would not be treated as “new motor vehicle engines,” and (3) glider kits would not be treated as “incomplete” new motor vehicles. Based on this proposed interpretation, EPA would lack authority to regulate glider vehicles, glider engines, and glider kits under CAA section 202(a)(1).

This proposed interpretation is a departure from the position taken by EPA in the Phase 2 rule. There, EPA interpreted the statutory definitions of “new motor vehicle” and “new motor vehicle engines” in CAA section 216(3) as including glider vehicles and glider engines, respectively. The proposed interpretation also departs from EPA's position in the Phase 2 rule that CAA section 202(a)(1) authorizes the Agency to treat glider kits as “incomplete” new motor vehicles.

It is settled law that EPA has inherent authority to reconsider, revise, or repeal past decisions to the extent permitted by law so long as the Agency provides a reasoned explanation. This authority exists in part because EPA's interpretations of the statutes it administers “are not carved in stone.” *Chevron U.S.A. Inc. v. NRDC, Inc.* 467 U.S. 837, 863 (1984). If an agency is to “engage in informed rulemaking,” it “must consider varying interpretations and the wisdom of its policy on a continuing basis.” *Id.* at 863–64. This is true when, as is the case here, review is undertaken “in response to . . . a change in administration.” *National Cable & Telecommunications Ass'n v. Brand X Internet Services*, 545 U.S. 967, 981 (2005). A “change in administration brought about by the people casting their votes is a perfectly reasonable basis for an executive agency's reappraisal of the costs and benefits of its programs and regulations,” and so long as an agency “remains within the bounds established by Congress,” the agency “is entitled to assess administrative records and evaluate priorities in light of the philosophy of the administration.” *Motor Vehicle*

*Manufacturers Ass'n v. State Farm Mutual Automobile Insurance Co.*, 463 U.S. 29, 59 (1983) (Rehnquist, J., concurring in part and dissenting in part).

After reconsidering the statutory language, EPA proposes to adopt a reading of the relevant provisions of the CAA under which the Agency would lack authority under CAA section 202(a)(1) to impose requirements on glider vehicles, glider engines, and glider kits and therefore proposes to remove the relevant rule provisions. At the same time, under CAA section 202(a)(3)(D), EPA is authorized to “prescribe requirements to control” the “practice of rebuilding heavy-duty engines,” including “standards applicable to emissions from any rebuilt heavy-duty engines.” 42 U.S.C. 7521(a)(3)(D).<sup>2</sup> If the interpretation being proposed here were to be finalized, EPA's authority to address heavy-duty engine rebuilding practices under CAA section 202(a)(3)(D) would not be affected.

## II. Background

### A. Factual Context

A glider vehicle (sometimes referred to simply as a “glider”) is a truck that utilizes a previously owned powertrain (including the engine, the transmission, and usually the rear axle) but which has new body parts. When these new body parts (which generally include the tractor chassis with frame, front axle, brakes, and cab) are put together to form the “shell” of a truck, the assemblage of parts is referred to collectively as a “glider kit.” The final manufacturer of the glider vehicle, *i.e.*, the entity that takes the assembled glider kit and combines it with the used powertrain salvaged from a “donor” truck, is typically a different manufacturer than the original manufacturer of the glider kit. *See* 81 FR 73512–13 (October 25, 2016).

### B. Statutory and Regulatory Context

Section 202(a)(1) of the CAA directs that EPA “shall by regulation prescribe,” in “accordance with the provisions” of section 202, “standards applicable to the emission of any air pollutant from any . . . new motor vehicles or new motor vehicle engines.” 42 U.S.C. 7521(a)(1). CAA section 216(2) defines “motor vehicle” to mean “any self-propelled vehicle designed for

transporting persons or property on a street or highway.” 42 U.S.C. 7550(2). A “new motor vehicle” is defined in CAA section 216(3) to mean, as is relevant here, a “motor vehicle the equitable or legal title to which has never been transferred to an ultimate purchaser.” 42 U.S.C. 7550(3) (emphasis added). A “new motor vehicle engine” is similarly defined as an “engine in a new motor vehicle” or a “motor vehicle engine the equitable or legal title to which has never been transferred to the ultimate purchaser.” *Id.*<sup>3</sup>

Comments submitted to EPA during the Phase 2 rulemaking stated that gliders are approximately 25% less expensive than new trucks,<sup>4</sup> which makes them popular with small businesses and owner-operators.<sup>5</sup> In contrast to an older vehicle, a glider requires less maintenance and yields less downtime.<sup>6</sup> A glider has the same braking, lane drift devices, dynamic cruise control, and blind spot detection devices that are found on current model year heavy-duty trucks, making it a safer vehicle to operate, compared to the older truck that it is replacing.<sup>7</sup>

Some commenters questioned EPA's authority to regulate glider vehicles as “new motor vehicles,” to treat glider engines as “new motor vehicle engines,” or to impose requirements on glider kits. Commenters also pointed out what they described as the overall environmental benefits of gliders. For instance, one commenter stated that “rebuilding an engine and transmission uses 85% less energy than manufacturing them new.”<sup>8</sup> Another commenter noted that the use of glider vehicles “improves utilization and reduces the number of trucks required to haul the same tonnage of freight.”<sup>9</sup> This same commenter further asserted that glider vehicles utilizing “newly rebuilt engines” produce less “particulate, NO<sub>x</sub>, and GHG emissions

<sup>3</sup> The definitions of both “new motor vehicle” and “new motor vehicle engine” are contained in the same paragraph (3), reflecting the fact that “[w]henver the statute refers to ‘new motor vehicle’ the phrase is followed by ‘or new motor vehicle engine.’” *See Motor and Equipment Manufacturers Ass'n v. EPA*, 627 F.2d 1095, 1102 n.5 (D.C. Cir. 1979). As Title II currently reads, the term “new motor vehicle” appears some 32 times, and in all but two instances, the term is accompanied by “new motor vehicle engine,” indicating that, at the inception of Title II, Congress understood that the regulation of *engines* was essential to control emissions from “motor vehicles.”

<sup>4</sup> Response to Comments for Joint Rulemaking, EPA-426-R-16-901 (August 2016) at 1846.

<sup>5</sup> EPA-HQ-OAR-2014-0827-1964.

<sup>6</sup> EPA-HQ-OAR-2014-0827-1005.

<sup>7</sup> *Id.*

<sup>8</sup> EPA-HQ-OAR-2014-0827-1964.

<sup>9</sup> EPA-HQ-OAR-2014-0827-1005.

<sup>1</sup> 81 FR 73478 (October 25, 2016).

<sup>2</sup> EPA has adopted regulations that address engine rebuilding practices. *See, e.g.*, 40 CFR 1068.120. EPA is not proposing in this action to adopt additional regulatory requirements pursuant to 42 U.S.C. 7521(a)(3)(D) that would apply to rebuilt engines installed in glider vehicles.

. . . compared to [a] worn oil burning engine which is beyond its useful life.”<sup>10</sup>

In the Phase 2 rule, EPA found that it was “reasonable” to consider glider vehicles to be “new motor vehicles” under the definition in CAA section 216(3). See 81 FR 73514 (October 25, 2016). Likewise, EPA found that the previously owned engines utilized by glider vehicles should be considered to be “new motor vehicle engines” within the statutory definition. Based on these interpretations, EPA determined that it had authority under CAA section 202(a) to subject glider vehicles and glider engines to the requirements of the Phase 2 rule. As for glider kits, EPA found that if glider vehicles are new motor vehicles, then the Agency was authorized to regulate glider kits as “incomplete” new motor vehicles. *Id.*

### C. Petition for Reconsideration

Following promulgation of the Phase 2 rule, EPA received from representatives of the glider industry a joint petition requesting that the Agency reconsider the application of the Phase 2 rule to glider vehicles, glider engines, and glider kits.<sup>11</sup> The petitioners made three principal arguments in support of their petition. First, they argued that EPA is not authorized by CAA section 202(a)(1) to regulate glider kits, glider vehicles, or glider engines. Petition at 3–4. Second, the petitioners contended that in the Phase 2 rule EPA “relied upon unsupported assumptions to arrive at the conclusion that immediate regulation of glider vehicles was warranted and necessary.” *Id.* at 4. Third, the petitioners asserted that reconsideration was warranted under Executive Order 13783. *Id.* at 6.

The petitioners took particular issue with what they characterized as EPA’s having “assumed that the nitrogen oxide (‘NO<sub>x</sub>’) and particulate matter (‘PM’) emissions of glider vehicles using pre-2007 engines” would be “at least ten times higher than emissions from equivalent vehicles being produced with brand new engines.” Petition at 5, citing 81 FR 73942. According to the petitioners, EPA had “relied on no actual data to support this conclusion,” but had “simply relied on the pre-2007

standards.” *Id.* In support, the petitioners included as an exhibit to their petition a letter from the President of the Tennessee Technological University (“Tennessee Tech”), which described a study recently conducted by Tennessee Tech. This study, according to the petitioners, had “analyz[ed] the NO<sub>x</sub>, PM, and carbon monoxide . . . emissions from both remanufactured and OEM engines,” and “reached a contrary conclusion” regarding glider vehicle emissions. Petition at 5.

The petitioners maintained that the results of the study “showed that remanufactured engines from model years between 2002 and 2007 performed roughly on par with OEM ‘certified’ engines,” and “in some instances even out-performed the OEM engines.” *Id.* The petitioners further claimed that the Tennessee Tech research “‘showed that remanufactured and OEM engines experience parallel decline in emissions efficiency with increased mileage.’” *Id.*, quoting Tennessee Tech letter at 2. Based on the Tennessee Tech study, the petitioners asserted that “glider vehicles would emit less than 12% of the total NO<sub>x</sub> and PM emissions for all Class 8 heavy duty vehicles . . . not 33% as the Phase 2 Rule suggests.” *Id.*, citing 81 FR 73943.

Further, the petitioners complained that the Phase 2 rule had “failed to consider the significant environmental benefits that glider vehicles create.” Petition at 6 (emphasis in original). “Glider vehicle GHG emissions are less than those of OEM vehicles,” the petitioners contended, “due to gliders’ greater fuel efficiency,” and the “carbon footprint of gliders is further reduced by the savings created by recycling materials.” *Id.* The petitioners represented that “[g]lider assemblers reuse approximately 4,000 pounds of cast steel in the remanufacturing process,” including “3,000 pounds for the engine assembly alone.” *Id.* The petitioners pointed out that “[r]eusing these components avoids the environmental impact of casting steel, including the significant associated NO<sub>x</sub> emissions.” *Id.* This “fact,” the petitioners argued, is something that EPA should have been considered but was “not considered in the development of the Phase 2 rule.” *Id.*

EPA responded to the glider industry representatives’ joint petition by separate letters on August 17, 2017, stating that the petition had “raise[d] significant questions regarding the EPA’s authority under the Clean Air Act to regulate gliders.”<sup>12</sup> EPA further

indicated that it had “decided to revisit the provisions in the *Phase 2 Rule* that relate to gliders,” and that the Agency “intends to develop and issue a **Federal Register** notice of proposed rulemaking on this matter, consistent with the requirements of the Clean Air Act.”<sup>13</sup>

## III. Basis for the Proposed Repeal

### A. Statutory Analysis

EPA is proposing that the statutory interpretations on which the Phase 2 rule predicated its regulation of glider vehicles, glider engines, and glider kits were incorrect. EPA proposes an interpretation of the relevant language of the CAA under which glider vehicles are excluded from the statutory term “new motor vehicles” and glider engines are excluded from the statutory term “new motor vehicle engines,” as both terms are defined in CAA section 216(3). Consistent with this interpretation of the scope of “new motor vehicle,” EPA is further proposing that it has no authority to treat glider kits as “incomplete” new motor vehicles under CAA section 202(a)(1).

As was noted, a “new motor vehicle” is defined by CAA section 216(3) to mean, in relevant part, a “motor vehicle the equitable or legal title to which has never been transferred to an ultimate purchaser.” 42 U.S.C. 7550(3). In basic terms, a glider vehicle consists of the new components that make up a glider kit, into which a previously owned powertrain has been installed. Prior to the time a completed glider vehicle is sold, it can be said that the vehicle’s “equitable or legal title” has yet to be “transferred to an ultimate purchaser.” It is on this basis that the Phase 2 rule found that a glider vehicle fits within the definition of “new motor vehicle.” 81 FR 73514 (October 25, 2016).

EPA’s rationale for applying this reading of the statutory language was that “[g]lider vehicles are typically marketed and sold as ‘brand new’ trucks.” 81 FR 73514 (October 25, 2016). EPA took note of one glider kit manufacturer’s own advertising materials that represented that the company had “‘mastered the process of taking the ‘Glider Kit’ and installing the components to work seamlessly with the new truck.’” *Id.* (emphasis added in original). EPA stated that the “purchaser of a ‘new truck’ necessarily takes initial title to that truck.” *Id.* (citing statements

Fitzgerald Glider Kits (Aug. 17, 2017). Available in the rulemaking docket, EPA–HQ–OAR–2014–0827, and at <https://www.epa.gov/sites/production/files/2017-08/documents/hd-ghg-phase2-ttma-ltr-2017-08-17.pdf>.

<sup>13</sup> *Id.*

<sup>10</sup> *Id.*

<sup>11</sup> See Petition for Reconsideration of Application of the Final Rule Entitled “Greenhouse Gas Emissions and Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles—Phase 2 Final Rule” to Gliders, from Fitzgerald Glider Kits, LLC; Harrison Truck Centers, Inc.; and Indiana Phoenix, Inc. (July 10, 2017) (Petition). Available in the rulemaking docket, EPA–HQ–OAR–2014–0827, and at <https://www.epa.gov/sites/production/files/2017-07/documents/hd-ghg-fr-fitzgerald-recons-petition-2017-07-10.pdf>.

<sup>12</sup> See, e.g., Letter from E. Scott Pruitt, EPA Administrator, to Tommy C. Fitzgerald, President,

on the glider kit manufacturer's Web site). EPA rejected arguments raised in comments that "this 'new truck' terminology is a mere marketing ploy." *Id.* Rather, EPA stated, "it obviously reflects reality." *Id.*

In proposing a new interpretation of the relevant statutory language, EPA now believes that its prior reading was not the best reading, and that the Agency failed to consider adequately the most important threshold consideration: *i.e.*, whether or not Congress, in defining "new motor vehicle" for purposes of Title II, had a specific intent to include within the statutory definition such a thing as a glider vehicle—a vehicle comprised both of new and previously owned components. See *Chevron*, 467 U.S. at 843 n.9 (Where the "traditional tools of statutory construction" allow one to "ascertain[] that Congress had an intention on the precise question at issue," that "intention is the law and must be given effect."). Where "Congress has not directly addressed the precise question at issue," and the "statute is silent or ambiguous with respect to the specific issue," it is left to the agency charged with implementing the statute to provide an "answer based on a permissible construction of the statute." *Id.* at 843.

Focusing solely on that portion of the statutory definition that provides that a motor vehicle is considered "new" prior to the time its "equitable or legal title" has been "transferred to an ultimate purchaser," a glider vehicle would appear to qualify as "new." As the Supreme Court has repeatedly counseled, however, that is just the beginning of a proper interpretive analysis. The "definition of words in isolation," the Court has noted, "is not necessarily controlling in statutory construction." See *Dolan v. United States Postal Service*, 546 U.S. 481, 486 (2006). Rather, the "interpretation of a word or phrase depends upon reading the whole statutory text, considering the purpose and context of the statute," and "consulting any precedents or authorities that inform the analysis." *Id.* Similarly, in seeking to "determine congressional intent, using traditional tools of statutory construction," the "starting point is the language of the statute." See *Dole v. United Steelworkers of America*, 494 U.S. 26, 35 (1990) (emphasis added) (internal citation omitted). At the same time, "in expounding a statute," one is not to be "guided by a single sentence or member of a sentence," but is to "look to the provisions of the whole law, and to its object and policy." *Id.* (internal citations omitted).

Assessed in light of these principles, it is clear that EPA's reading of the statutory definition of "new motor vehicle" in the Phase 2 rule fell short. First, that reading failed to account for the fact that, at the time this definition of "new motor vehicle" was enacted, it is likely that Congress did not have in mind that the definition would be construed as applying to a vehicle comprised of new body parts and a previously owned powertrain. The manufacture of glider vehicles to salvage the usable powertrains of trucks wrecked in accidents goes back a number of years.<sup>14</sup> But only more recently—after the enactment of Title II—have glider vehicles been produced in any great number.

Furthermore, the concept of deeming a motor vehicle to be "new" based on its "equitable or legal title" not having been transferred to an "ultimate purchaser" appears to have originated with an otherwise unrelated federal statute that predated Title II by a few years—*i.e.*, the Automobile Information Disclosure Act of 1958, Public Law 85–506 (Disclosure Act).<sup>15</sup> The history of Title II's initial enactment and subsequent development indicates that, in adopting a definition of "new motor vehicle" for purposes of the Clean Air Act, Congress drew on the approach it had taken originally with the Disclosure Act.

Among other things, the Disclosure Act requires that a label be affixed to the windshield or side window of new automobiles, with the label providing such information as the Manufacturer's Suggested Retail Price. See 15 U.S.C. 1232 ("Every manufacturer of *new automobiles* distributed in commerce shall, prior to the delivery of any *new automobile* to any dealer, or at or prior to the introduction date of new models delivered to a dealer prior to such introduction date, securely affix to the windshield, or side window of *such automobile* a label . . .") (emphases added). The Disclosure Act defines the term "automobile" to "include[] any passenger car or station wagon," and defines the term "new automobile" to mean "an automobile the equitable or legal title to which has never been transferred by a manufacturer, distributor, or dealer to an ultimate purchaser." See 15 U.S.C. 1231(c), (d).

In 1965, Congress amended the then-existing Clean Air Act, and for the first time enacted provisions directed at the control of air pollution from motor vehicles. See Clean Air Act

Amendments of 1965, Public Law 89–272 (1965 CAA). Included in the 1965 CAA was a brand new Title II, the "Motor Vehicle Air Pollution Control Act," the structure and language of which largely mirrored key provisions of Title II as it exists today. Section 202(a) of the 1965 CAA provided that the "Secretary [of what was then the Department of Health, Education and Welfare] shall by regulation, giving appropriate consideration to technological feasibility and economic costs, prescribe . . . standards applicable to the emission of any kind of substance, from any class or classes of *new motor vehicles or new motor vehicle engines*, which in his judgment cause or contribute to, or are likely to cause or to contribute to, air pollution which endangers the health or welfare of any persons . . ." Public Law 89–272, 79 Stat. 992 (emphasis added).

Section 208 of the 1965 CAA defined "motor vehicle" in terms identical to those in the CAA today: "any self-propelled vehicle designed for transporting persons or property on a street or highway." Public Law 89–272, 79 Stat. 995. The 1965 CAA defined "new motor vehicle" and "new motor vehicle engine" to mean, as relevant here, "a motor vehicle the equitable or legal title to which has never been transferred to an ultimate purchaser; and the term 'new motor vehicle engine'" to mean "an engine in a new motor vehicle or a motor vehicle engine the equitable or legal title to which has never been transferred to the ultimate purchaser." *Id.* Again, in relevant part, the 1965 CAA definitions of these terms were identical to those that currently appear in CAA section 216(3).

While the legislative history of the 1965 CAA does not expressly indicate that Congress based its definition of "new motor vehicle" on the definition of "new automobile" first adopted by the Automobile Information Disclosure Act of 1958, it seems clear that such was the case. The statutory language of the two provisions is identical in all pertinent respects,<sup>16</sup> and there appears to be no other federal statute, in existence prior to enactment of the 1965

<sup>16</sup> Further, the 1965 CAA's definition of "ultimate purchaser," as set forth in section 208(5), for the most part tracks the Disclosure Act's earlier-enacted definition: "The term 'ultimate purchaser' means, with respect to any new automobile, the first person, other than a dealer purchasing in his capacity as a dealer, who in good faith purchases such new automobile for purposes other than resale." Compare 1965 CAA section 208(5), Public Law 89–272, 79 Stat. 995 with 15 U.S.C. 1231(g). Such is the case, too, with respect to the 1965 CAA's definition of "manufacturer." Compare 1965 CAA section 208(1), Public Law 89–272, 79 Stat. 994–995 with 15 U.S.C. 1231(a).

<sup>14</sup> EPA–HQ–OAR–2014–0827–1964.

<sup>15</sup> The provisions of the Disclosure Act are set forth at 15 U.S.C. 1231–1233.

CAA, from which Congress could have derived that terminology.

Subsequently, the statutory language from the 1965 CAA, defining the terms “motor vehicle,” “new motor vehicle,” “new motor vehicle engine,” “ultimate purchaser,” and “manufacturer” was incorporated verbatim in the Air Quality Act of 1967 (1967 AQA). See Public Law 148, 81 Stat. 503. The Clean Air Act Amendments of 1970 (1970 CAAA) did not change those definitions, except to add the language regarding “vehicles or engines imported or offered for importation” that currently appears in CAA section 216(3). See Public Law 91–604, 84 Stat. 1694, 1703.<sup>17</sup>

The fact that Congress, in first devising the CAA’s definition of “new motor vehicle” for purposes of Title II, drew on the pre-existing definition of “new automobile” in the Automobile Information Disclosure Act of 1958 serves to illuminate congressional intent. As with the Disclosure Act, Congress in the 1965 CAA selected the point of first transfer of “equitable or legal title” to serve as a bright line—*i.e.*, to distinguish between those “new” vehicles (and engines) that would be subject to emission standards adopted pursuant to CAA section 202(a)(1) and those existing vehicles that would not be subject. Insofar as the 1965 CAA definition of “new motor vehicle” was based on the Disclosure Act definition of “new automobile,” it would seem clear that Congress intended, for purposes of Title II, that a “new motor vehicle” would be understood to mean something equivalent to a “new automobile”—*i.e.*, a true “showroom new” vehicle. It is implausible that Congress would have had in mind that a “new motor vehicle” might also include a vehicle comprised of new body parts and a previously owned powertrain.

Given this, EPA does not believe that congressional intent as to the meaning of the term “new motor vehicle” can be clearly ascertained on the basis of an isolated reading of a few words in the statutory definition, where that reading is divorced from the structure and history of the CAA as a whole. Based on that structure and history, it seems likely that Congress understood a “new motor vehicle,” as defined in CAA § 216(3), to be a vehicle comprised entirely of new parts and certainly not a vehicle with a used engine. At a

minimum, ambiguity exists. This leaves EPA with the task of providing an “answer based on a permissible construction of the statute.” *Chevron*, 467 U.S. at 843.

### 1. Glider Vehicles

EPA is proposing to interpret “new motor vehicle,” as defined in CAA § 216(3), as not including glider vehicles. This is a reasonable interpretation—and commonsense would agree—insofar as it takes account of the reality that significant elements of a glider vehicle (*i.e.*, the powertrain elements, including the engine and the transmission) are previously owned components. Under the Phase 2 rule’s interpretation, in contrast, the act of installing a previously owned powertrain into a glider kit—*i.e.*, something that, as is explained further below, is not a “motor vehicle” as defined by the CAA—results in the creation of a new “motor vehicle.” EPA believes that Congress, in adopting a definition of “new motor vehicle” for purposes of Title II, never had in mind that the statutory language would admit of such a counterintuitive result.

In other words, EPA now believes that, in defining “new motor vehicle,” Congress did not intend that a vehicle comprised of a new outer shell conjoined to a previously owned powertrain should be treated as a “new” vehicle, based solely on the fact that the vehicle may have been assigned a new title following assembly. In this regard, insofar as Title II’s regulatory regime was at its inception directed at the emissions produced by new vehicle engines,<sup>18</sup> it is not at all clear that Congress intended that Title II’s reach should extend to a vehicle whose outer parts may be “new” but whose engine was previously owned.

### 2. Glider Engines

EPA proposes to find that, since a glider vehicle does not meet the statutory definition of a “new motor vehicle,” it necessarily follows that a glider engine is not a “new motor vehicle engine” within the meaning of CAA section 216(3). Under that provision, a motor vehicle engine is deemed to be “new” in either of two circumstances: (1) The engine is “in a new motor vehicle,” or (2) the “equitable or legal title” to the engine has “never been transferred to the ultimate purchaser.” The second of these circumstances can never apply to a glider engine, which is invariably an engine that has been previously owned.

As to the first circumstance, a glider engine is installed in a glider kit, which in itself is not a “motor vehicle.” A glider kit becomes a “motor vehicle” only after an engine (and the balance of the powertrain) has been installed. But while adding a previously owned engine to a glider kit may result in the creation of a “motor vehicle,” the assertion that the previously owned engine thereby becomes a “new motor vehicle engine” within the meaning of CAA section 216(3), due to the engine’s now being in a “new motor vehicle,” reflects circular thinking. It presupposes that the installation of a (previously owned) engine in a glider kit creates not just a “motor vehicle” but a “new motor vehicle.” EPA is proposing to interpret the relevant statutory language in a manner that rejects the Agency’s prior reliance on the view that (1) installing a previously owned engine in a glider kit transforms the glider kit into a “new motor vehicle,” and (2) that, thereafter, the subsequent presence of that previously owned engine in the supposed “new motor vehicle” transforms that engine into a “new motor vehicle engine” within the meaning of CAA section 216(3).

### 3. Glider Kits

Under EPA’s proposed interpretation, EPA would have no authority to regulate glider kits under CAA section 202(a)(1). If glider vehicles are not “new motor vehicles,” which is the interpretation of CAA section 216(3) that EPA is proposing here, then the Agency lacks authority to regulate glider kits as “incomplete” new motor vehicles. Further, given that a glider kit lacks a powertrain, a glider kit does not explicitly meet the definition of “motor vehicle,” which, in relevant part, is defined to mean “any *self-propelled* vehicle.” 42 U.S.C. 7550(2) (emphasis added). It is not obvious that a vehicle without a motor could constitute a “motor vehicle.”

### 4. Issues for Which EPA Seeks Comment

EPA believes that its proposed interpretation is the most reasonable reading of the relevant statutory language, and that its proposed determination, based on this interpretation, that regulation of glider vehicles, glider engines, and glider kits is not authorized by CAA section 202(a)(1) is also reasonable. EPA seeks comment on this interpretation.

Comments submitted in the Phase 2 rulemaking docket lead EPA to believe that a glider vehicle is often a suitable option for those small businesses and independent operators who cannot afford to purchase a new vehicle, but

<sup>17</sup> The legislative history of both the 1967 AQA and 1977 CAAA is silent with respect to the origin of Title II’s definitions of “new motor vehicle,” “new motor vehicle engine,” “ultimate purchaser,” and “manufacturer,” which further underscores that Congress had originally derived those definitions from the Disclosure Act.

<sup>18</sup> See footnote 3, *supra*.

who wish to replace an older vehicle with a vehicle that is equipped with up-to-date safety features. EPA solicits comment and further information as to this issue. EPA also solicits comment and information on whether limiting the availability of glider vehicles could result in older, less safe, more-polluting trucks remaining on the road that much longer. EPA particularly seeks information and analysis addressing the question whether glider vehicles produce significantly fewer emissions overall compared to the older trucks they would replace.

EPA also seeks comment on the matter of the anticipated purchasing behavior on the part of the smaller trucking operations and independent drivers if the regulatory provisions at issue were to be repealed. Further, EPA seeks comment on the relative expected emissions impacts if the regulatory requirements at issue here were to be repealed or were to be left in place.

Finally, EPA seeks comment on whether, if the Agency were to determine not to adopt the interpretation of CAA sections 202(a)(1) and 216(3) being proposed here, EPA should nevertheless revise the “interim provisions” of Phase 2 rule, 40 CFR 1037.150(t)(1)(ii), to increase the exemption available for small manufacturers above the current limit of 300 glider vehicles per year. EPA seeks input on how large an increase would be reasonable, were the Agency to increase the limit in taking final action. Further, EPA seeks comment on whether, if the Agency were to determine not to adopt the statutory interpretation being proposed here, EPA should nevertheless extend by some period of time the date for compliance for glider vehicles, glider engines, and glider kits set forth in 40 CFR 1037.635. EPA seeks comment on what would be a reasonable extension of the compliance date.

#### B. Conclusion

EPA has a fundamental obligation to ensure that the regulatory actions it takes are authorized by Congress, and that the standards and requirements that it would impose on the regulatory community have a sound and reasonable basis in law. EPA is now proposing to find that the most reasonable reading of the relevant provisions of the CAA, including CAA sections 202(a)(1), 216(2), and 216(3) is that glider vehicles should not be regulated as “new motor vehicles,” that glider engines should not be regulated as “new motor vehicle engines,” and that glider kits should not be regulated as “incomplete” new motor vehicles.

Based on this proposed interpretation, EPA is proposing to repeal those provisions of the Phase 2 rule applicable to glider vehicles, glider engines, and glider kits.

#### IV. Public Participation

We request comment by January 5, 2018 on all aspects of this proposal. This section describes how you can participate in this process.

Materials related to the Heavy-Duty Phase 2 rulemaking are available in the public docket noted above and at: <https://www.epa.gov/regulations-emissions-vehicles-and-engines/regulations-greenhouse-gas-emissions-commercial-trucks>.

##### 1. How do I prepare and submit information?

Direct your submittals to Docket ID No. EPA-HQ-OAR-2014-0827. EPA’s policy is that all submittals received will be included in the public docket without change and may be made available online at [www.regulations.gov](http://www.regulations.gov), including any personal information provided, unless the submittal includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Do not submit information to the docket that you consider to be CBI or otherwise protected through [www.regulations.gov](http://www.regulations.gov). The [www.regulations.gov](http://www.regulations.gov) Web site is an “anonymous access” system, which means EPA will not know your identity or contact information unless you provide it in the body of your submittal. If you submit an electronic submittal, EPA recommends that you include your name and other contact information in the body of your submittal and with any disk or CD-ROM you submit. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA’s public docket visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

EPA will hold a public hearing on the date and at the location stated in the DATES Section. To attend the hearing, individuals will need to show appropriate ID to enter the building. The hearing will start at 10:00 a.m. local time and continue until everyone has had a chance to speak. More details concerning the hearing can be found at <https://www.epa.gov/regulations-emissions-vehicles-and-engines/regulations-greenhouse-gas-emissions-commercial-trucks>.

##### 2. Submitting CBI

Do not submit this information to EPA through [www.regulations.gov](http://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

##### 3. Tips for Preparing Your Comments

When submitting comments, remember to:

- Identify the action by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified in the DATES section above.

#### V. Statutory and Executive Order Reviews

(1) *Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review*

This action is a significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review. Any changes made in response to OMB recommendations have been documented in the docket.

(2) *Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs*

This action is expected to be an Executive Order 13771 deregulatory action. This proposed rule is expected

to provide meaningful burden reduction by eliminating regulatory requirements for glider manufacturers.

*(3) Paperwork Reduction Act (PRA)*

This action does not impose an information collection burden under the PRA because it does not contain any information collection activities. It would only eliminate regulatory requirements for glider manufacturers.

*(4) Regulatory Flexibility Act (RFA)*

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden, or otherwise has a positive economic effect on the small entities subject to the rule. Small glider manufacturers would be allowed to produce glider vehicles without meeting new motor vehicle emission standards. We have therefore concluded that this action will have no adverse regulatory impact for any directly regulated small entities.

*(5) Unfunded Mandates Reform Act (UMRA)*

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments.

*(6) Executive Order 13132: Federalism*

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

*(7) Executive Order 13175: Consultation and Coordination With Indian Tribal Governments*

This action does not have tribal implications as specified in Executive Order 13175. This proposed rule will be implemented at the Federal level and affects glider manufacturers. Thus, Executive Order 13175 does not apply to this action.

*(8) Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks*

This action is not subject to Executive Order 13045 because it is not an economically significant regulatory action as defined by Executive Order 12866. However, the Emission Requirements for Glider Vehicles, Glider Engines, and Glider Kits was anticipated to lower ambient concentrations of PM<sub>2.5</sub> and some of the benefits of reducing these pollutants may have accrued to children. Our evaluation of the environmental health or safety effects of these risks on children is presented in Section XIV.H. of the HD Phase 2 Rule.<sup>19</sup> Some of the benefits for children's health as described in that analysis would be lost as a result of this action.

In general, current expectations about future emissions of pollution from these trucks is difficult to forecast given uncertainties in future technologies, fuel prices, and the demand for trucking. Furthermore, the proposed action does not affect the level of public health and environmental protection already being provided by existing NAAQS and other mechanisms in the CAA. This proposed action does not affect applicable local, state, or federal permitting or air quality management programs that will continue to address areas with degraded air quality and maintain the air quality in areas meeting current standards. Areas that need to reduce criteria air pollution to meet the NAAQS will still need to rely on control strategies to reduce emissions. To the extent that states use other mechanisms in order to comply with the NAAQS, and still achieve the criteria pollution reductions that would have occurred under the CPP, this proposed rescission will not have a disproportionate adverse effect on children's health.

*(9) Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*

This action is not a "significant energy action" because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

*(10) National Technology Transfer and Advancement Act (NTTAA)*

This rulemaking does not involve technical standards.

*(11) Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations, and Low-Income Populations*

Pursuant to Executive Order 12898 (59 FR 7629, February 16, 1994), EPA considered environmental justice concerns of the final HD Phase 2 rule. EPA's evaluation of human health and environmental effects on minority, low-income or indigenous populations for the final HD Phase 2 rule is presented in the Preamble, Section VIII.A.8 and 9 (81 FR 73844–7, October 25, 2016). We have not evaluated the impacts on minority, low-income or indigenous populations that may occur as a result of the proposed action to rescind emissions requirements for heavy-duty glider vehicles and engines. EPA likewise has not considered the economic and employment impacts of this rule specifically as they relate to or might impact minority, low-income and indigenous populations.

**List of Subjects in 40 CFR Parts 1037 and 1068**

Environmental protection, Administrative practice and procedure, Air pollution control, Confidential business information, Labeling, Motor vehicle pollution, Reporting and recordkeeping requirements, Warranties.

Dated: November 9, 2017.

**E. Scott Pruitt,**  
*Administrator.*

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is proposed to be amended as set forth below.

**PART 1037—CONTROL OF EMISSIONS FROM NEW HEAVY-DUTY MOTOR VEHICLES**

■ 1. The authority for part 1037 continues to read as follows:

**Authority:** 42 U.S.C. 7401–7671q.

**Subpart B—[Amended]**

■ 2. Section 1037.150 is amended by removing and reserving paragraph (t) as follows:

**§ 1037.150 Interim provisions.**

\* \* \* \* \*

(t) [Reserved]

\* \* \* \* \*

**Subpart G—[Amended]**

**§ 1037.635 [Removed]**

■ 3. Section 1037.635 is removed.

<sup>19</sup> 81 FR 73478 (October 25, 2016).

**Subpart I—[Amended]**

■ 4. Section 1037.801 is amended by removing the definitions “glider kit” and “glider vehicle” and revising the definitions of “manufacturer” and “new motor vehicle” to read as follows:

**§ 1037.801 Definitions.**

\* \* \* \* \*

*Manufacturer* has the meaning given in section 216(1) of the Act. In general, this term includes any person who manufactures or assembles a vehicle (including a trailer or another incomplete vehicle) for sale in the United States or otherwise introduces a new motor vehicle into commerce in the United States. This includes importers who import vehicles for resale.

\* \* \* \* \*

*New motor vehicle* has the meaning given in the Act. It generally means a motor vehicle meeting the criteria of either paragraph (1) or (2) of this

definition. New motor vehicles may be complete or incomplete.

(1) A motor vehicle for which the ultimate purchaser has never received the equitable or legal title is a new motor vehicle. This kind of vehicle might commonly be thought of as “brand new” although a new motor vehicle may include previously used parts. Under this definition, the vehicle is new from the time it is produced until the ultimate purchaser receives the title or places it into service, whichever comes first.

(2) An imported heavy-duty motor vehicle originally produced after the 1969 model year is a new motor vehicle.

\* \* \* \* \*

**PART 1068—GENERAL COMPLIANCE PROVISIONS FOR HIGHWAY, STATIONARY, AND NONROAD PROGRAMS**

■ 5. The authority for part 1068 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

**Subpart B—[Amended]**

■ 6. Section 1068.120 is amended by revising paragraph (f)(5) to read as follows:

**§ 1068.120 Requirements for rebuilding engines.**

\* \* \* \* \*

(f) \* \* \*

(5) The standard-setting part may apply further restrictions to situations involving installation of used engines to repower equipment.

\* \* \* \* \*

BILLING CODE 6560–50–P

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Federal Crop Insurance Corporation

[Docket No. FCIC-17-0002]

#### Notice of Request for Renewal and Revision of the Currently Approved Information Collection

**AGENCY:** Federal Crop Insurance Corporation, USDA.

**ACTION:** Renewal and Revision of the Currently Approved Information Collection.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this notice announces a public comment period on the information collection requests (ICRs) associated with the Standard Reinsurance Agreement and Appendices I, II and IV administered by Federal Crop Insurance Corporation (FCIC). Appendix III is excluded because it contains the Data Acceptance System requirements.

**DATES:** Written comments on this notice will be accepted until close of business January 16, 2018.

**ADDRESSES:** FCIC prefers that comments be submitted electronically through the Federal eRulemaking Portal. You may submit comments, identified by Docket ID No. FCIC-17-0002, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *By Mail to:* David L. Miller, Director, Reinsurance Services Division, Federal Crop Insurance Corporation, United States Department of Agriculture (USDA), 1400 Independence Avenue SW., Stop 0801, Washington, DC 20250.

All comments received, including those received by mail, will be posted without change to <http://www.regulations.gov>, including any personal information provided, and can be accessed by the public. All comments must include the agency name and

docket number or Regulatory Information Number (RIN) for this rule. For detailed instructions on submitting comments and additional information, see <http://www.regulations.gov>. If you are submitting comments electronically through the Federal eRulemaking Portal and want to attach a document, we ask that it be in a text-based format. If you want to attach a document that is a scanned Adobe PDF file, it must be scanned as text and not as an image, thus allowing FCIC to search and copy certain portions of your submissions. For questions regarding attaching a document that is a scanned Adobe PDF file, please contact the RMA Web Content Team at (816) 823-4694 or by email at [rmaweb.content@rma.usda.gov](mailto:rmaweb.content@rma.usda.gov).

*Privacy Act:* Anyone is able to search the electronic form of all comments received for any dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the complete User Notice and Privacy Notice for [Regulations.gov](http://www.regulations.gov) at <http://www.regulations.gov/#/privacyNotice>.

**FOR FURTHER INFORMATION CONTACT:** David L. Miller, Director, Risk Management Agency, at the address listed above, telephone (202) 720-9830.

**SUPPLEMENTARY INFORMATION:**

*Title:* Standard Reinsurance Agreement; Appendices I, II and IV.

*OMB Number:* 0563-0069.

*Type of Request:* Renewal of current Information Collection.

*Abstract:* The Federal Crop Insurance Act (Act), Title 7 U.S.C. Chapter 36, Section 1508(k), authorizes the FCIC to provide reinsurance to insurers approved by FCIC that insure producers of any agricultural commodity under one or more plans acceptable to FCIC. The Act also states that the reinsurance shall be provided on such terms and conditions as the Board may determine to be consistent with subsections (b) and (c) of this section and sound reinsurance principles.

FCIC executes the same form of reinsurance agreement, called the Standard Reinsurance Agreement (SRA), with sixteen participating insurers approved for the 2018 reinsurance year. Appendix I of the SRA, Regulatory Duties and Responsibilities, sets forth the company's responsibilities as required by statute. Appendix I includes; a) Conflict of Interest data

collection, which in addition to the insurance companies reinsured by FCIC, encompasses the insurance companies' employees and their contracted agents and loss adjusters; and b) Controlled Business data collection from all employed or contracted agents. Appendix II of the SRA, the Plan of Operations (Plan), sets forth the information the insurer is required to file with RMA for each reinsurance year they wish to participate. The Plan's information enables RMA to evaluate the insurer's financial and operational capability to deliver the crop insurance program in accordance with the Act. Estimated premiums by fund by state, and retained percentages along with current policyholders surplus are used in calculations to determine whether to approve the insurer's requested maximum reinsurable premium volume for the reinsurance year per 7 CFR 400 Subpart L. This information has a direct effect upon the insurer's amount of retained premium and associated liability and is required to calculate the insurer's underwriting gain or loss.

Appendix IV of the SRA, Quality Control and Program Integrity, establishes the minimum annual agent and loss adjuster training requirements, and quality control review procedures and performance standards required of the insurance companies. FCIC requires each insurer to submit, for each reinsurance year, a Quality Control Report to FCIC containing details of the results of their completed reviews. The insurance companies must also provide an annual Training and Performance Evaluation Report which details the evaluation of each agent and loss adjuster and reports of any remedial actions taken by the Company to correct any error or omission or ensure compliance with the SRA. The submission of these reports is included in Appendix II.

FCIC is requesting the Office of Management and Budget (OMB) to extend the approval of this information collection for an additional 3 years.

The purpose of this notice is to solicit comments from the public concerning the continuation of the current information collection activity as associated with the SRA in effect for the 2018 and subsequent reinsurance years. These comments will help us:

(1) Evaluate whether the current collection of information is necessary

for the proper performance of the functions of the agency, including whether the information has practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the current collection of information;

(3) Enhance the quality, utility, and clarity of the information being collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

The estimate below shows the burden that will be placed upon the following affected entities.

### Appendix I—Regulatory Duties and Responsibilities

#### Conflict of Interest

*Estimate of Burden:* The public reporting burden of employees, agents and loss adjusters for the Appendix I collection of Conflict of Interest information is estimated to average 1 hour per response.

*Respondents/Affected Entities:* Insurance company employees and their contracted agents and loss adjusters.

*Estimated annual number of respondents:* 20,000.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 20,000.

*Estimated total annual burden on respondents (hours):* 20,000.

*Estimate of Burden:* The public reporting burden of the insurance companies of the Appendix I collection of Conflict of Interest information is estimated to average 24 hours per response.

*Respondents/Affected Entities:* Insurance companies reinsured by FCIC.

*Estimated annual number of respondents:* 16.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 16.

*Estimated total annual burden on respondents (hours):* 384.

#### Controlled Business

*Estimate of Burden:* The public reporting burden of agents for the Appendix I collection of Controlled Business information is estimated to average 1 hour per response.

*Respondents/Affected Entities:* Insurance company agents.

*Estimated annual number of respondents:* 12,500.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 12,500.

*Estimated total annual burden on respondents (hours):* 12,500.

*Estimate of Burden:* The public reporting burden of the insurance companies for the Appendix I collection of Controlled Business information is estimated to average 24 hours per response.

*Respondents/Affected Entities:* Insurance companies reinsured by FCIC.

*Estimated annual number of respondents:* 16.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 16.

*Estimated total annual burden on respondents (hours):* 384.

### Appendix II—Plan of Operations

*Estimate of Burden:* The public reporting burden of the insurance companies for the collection of Appendix II information is estimated to average 128 hours per response.

*Respondents/Affected Entities:* Insurance companies reinsured by FCIC.

*Estimated annual number of respondents:* 16.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 16.

*Estimated total annual burden on respondents (hours):* 2,048.

### Appendix IV—Quality Control and Program Integrity

#### Quality Control and Training Plan and Report

*Estimate of Burden:* The public reporting burden of the insurance companies for the collection of Appendix IV information is estimated to average 74 hours per response.

*Respondents/Affected Entities:* Insurance companies reinsured by FCIC.

*Estimated annual number of respondents:* 16.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 16.

*Estimated total annual burden on respondents (hours):* 1,184.

#### Agent Training Requirements

*Estimate of Burden:* The public reporting burden of agents the Appendix IV training requirements is estimated to average 4 hours per response.

*Respondents/Affected Entities:* Insurance company agents.

*Estimated annual number of respondents:* 12,500.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 12,500.

*Estimated total annual burden on respondents (hours):* 50,000.

#### Loss Adjuster Training Requirements

*Estimate of Burden:* The public reporting burden of loss adjusters for the Appendix IV training requirements is estimated to average 17 hours per response.

*Respondents/Affected Entities:* Insurance company loss adjusters.

*Estimated annual number of respondents:* 5,000.

*Estimated annual number of responses per respondent:* 1.

*Estimated annual number of responses:* 5,000.

*Estimated total annual burden on respondents (hours):* 85,000.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Signed in Washington, DC, on November 9, 2017.

**Heather Manzano,**

*Acting Director, Federal Crop Insurance Corporation.*

[FR Doc. 2017-24743 Filed 11-15-17; 8:45 am]

**BILLING CODE 3410-08-P**

## COMMISSION ON CIVIL RIGHTS

### Agenda and Notice of Public Meeting of the Delaware Advisory Committee

**AGENCY:** Commission on Civil Rights.

**ACTION:** Announcement of monthly planning meetings.

**SUMMARY:** Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a planning meeting of the Delaware State Advisory Committee to the Commission will convene by conference call, on Monday, November 20 at 10:00 a.m. (EST). The purpose of the meeting is to discuss what more needs to be done to complete the record of the briefing meeting conducted in Wilmington on November 1, 2017, titled, *Implicit Bias and Policing in Communities of Color in Delaware*. The Committee will also discuss tasks needed to prepare the report of its review to the Commission.

**DATES:** Monday, November 20, 2017, at 10:00 a.m. (EST).

**FOR FURTHER INFORMATION CONTACT:** Ivy L. Davis, at [ero@usccr.gov](mailto:ero@usccr.gov) or by phone at 202–376–7533.

**SUPPLEMENTARY INFORMATION:** Interested members of the public may listen to the discussion by calling the following toll-free conference call number: 1–800–210–9006 and conference call ID: 4124362. Please be advised that before placing them into the conference call, the conference call operator may ask callers to provide their names, their organizational affiliations (if any), and email addresses (so that callers may be notified of future meetings). Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number herein.

Persons with hearing impairments may also follow the discussion by first calling the Federal Relay Service at 1–888–364–3109 and providing the operator with the toll-free conference call number: 1–800–210–9006 and conference call ID: 4124362.

Members of the public are invited to submit written comments; the comments must be received in the regional office approximately 30 days after each scheduled meeting. Written comments may be mailed to the Eastern Regional Office, U.S. Commission on Civil Rights, 1331 Pennsylvania Avenue, Suite 1150, Washington, DC 20425, or emailed to Evelyn Bohor at [ero@usccr.gov](mailto:ero@usccr.gov). Persons who desire additional information may contact the Eastern Regional Office at (202) 376–7533.

Records and documents discussed during the meeting will be available for public viewing as they become available at <http://facadatabase.gov/committee/meetings.aspx?cid=240>; click the “Meeting Details” and “Documents” links. Records generated from this meeting may also be inspected and reproduced at the Eastern Regional Office, as they become available, both before and after the meetings. Persons interested in the work of this advisory committee are advised to go to the Commission’s Web site, [www.usccr.gov](http://www.usccr.gov), or to contact the Eastern Regional Office at the above phone number, email or street address.

## Agenda

- I. Welcome and Introductions Rollcall
- II. Planning Meeting
  - Discuss post-briefing record and tasks
- III. Other Business
- IV. Adjourn

*Exceptional Circumstance:* Pursuant to 41 CFR 102–3.150, the notice for this

meeting is given less than 15 calendar days prior to the meeting because of the exceptional circumstance of completing the record on the implicit bias project.

Dated: November 13, 2017.

**David Mussatt,**

*Supervisory Chief, Regional Programs Unit.*

## DEPARTMENT OF COMMERCE

### International Trade Administration

[A–552–821]

#### **Certain Tool Chests and Cabinets From the Socialist Republic of Vietnam: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination and Extension of Provisional Measures**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (the Department) preliminarily determines that certain tool chests and cabinets (tool chests) from the Socialist Republic of Vietnam (Vietnam) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2016, through March 31, 2017.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Dmitry Vladimirov, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0665.

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). The Department published the notice of initiation of this investigation on May 9, 2017.<sup>1</sup> On August 21, 2017, the Department postponed the preliminary determination of this investigation and the revised deadline is now November 7, 2017.<sup>2</sup> For a complete

<sup>1</sup> See *Certain Tool Chests and Cabinets from the People’s Republic of China and the Socialist Republic of Vietnam: Initiation of Less-Than-Fair-Value Investigations*, 82 FR 21523 (May 9, 2017) (*Initiation Notice*).

<sup>2</sup> See *Certain Tool Chests and Cabinets from the People’s Republic of China and the Socialist Republic of Vietnam: Postponements of Preliminary Determinations of Antidumping Duty Investigations*, 82 FR 39563 (August 21, 2017).

description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.<sup>3</sup> A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>, and to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>.

##### **Scope of the Investigation**

The products covered by this investigation are tool chests from Vietnam. For a complete description of the scope of this investigation, see Appendix I.

##### **Scope Comments**

In accordance with the preamble to the Department’s regulations,<sup>4</sup> the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (scope).<sup>5</sup> Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice*. For a summary of the product coverage comments and rebuttal responses submitted to the record for this investigation, and accompanying discussion and analysis of all comments timely received, see the Preliminary Scope Decision Memorandum.<sup>6</sup> The Department has preliminarily modified the scope language that appeared in the *Initiation Notice*. See the revised scope in Appendix I to this notice. The Department intends to address any scope comments received<sup>7</sup> and issue a

<sup>3</sup> See Memorandum, “Decision Memorandum for Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation of Certain Tool Chests and Cabinets from the Socialist Republic of Vietnam,” dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

<sup>4</sup> See *Antidumping Duties; Countervailing Duties, Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

<sup>5</sup> See *Initiation Notice*, 82 FR at 21523.

<sup>6</sup> See Memorandum, “Certain Tool Chests and Cabinets from the People’s Republic of China and the Socialist Republic of Vietnam: Scope Comments Decision Memorandum for the Preliminary Determinations” (Preliminary Scope Decision Memorandum), dated September 8, 2017.

<sup>7</sup> The scope case briefs were due 30 days after the publication of *Certain Tool Chests and Cabinets from the People’s Republic of China: Preliminary Affirmative Countervailing Duty Determination*, 82

final scope decision along with the final determination in the concurrent countervailing duty (CVD) investigation on tool chests from the People's Republic of China.

**Methodology**

The Department is conducting this investigation in accordance with section 731 of the Act. The Department has calculated export prices and constructed export prices in accordance with sections 772(a) and (b) of the Act, respectively. Because Vietnam is a non-market economy, within the meaning of section 771(18) of the Act, the

Department has calculated normal value (NV) in accordance with section 773(c) of the Act. In addition, pursuant to section 776(a) and (b) of the Act, the Department preliminarily has relied on facts otherwise available, with adverse inferences, for the Vietnam-wide entity. For a full description of the methodology underlying the Department's preliminary determination, see the Preliminary Decision Memorandum.

**Combination Rates**

In the *Initiation Notice*,<sup>8</sup> the Department stated that it would

calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.<sup>9</sup> In this investigation, we calculated producer/exporter combination rates for respondents eligible for separate rates.

**Preliminary Determination**

The Department preliminarily determines that the following estimated weighted-average dumping margins exist:<sup>10</sup>

Exporter	Producer	Estimated weighted-average dumping margin (%)
Clearwater Metal Single Entity	Clearwater Metal Single Entity	230.31
Vietnam-wide Entity		230.31

**Suspension of Liquidation**

In accordance with section 733(d)(2) of the Act, the Department will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of subject merchandise as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, as discussed below. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), the Department will instruct CBP to require a cash deposit equal to the weighted-average amount by which normal value exceeds U.S. price, as indicated in the chart above as follows: (1) For the producer/exporter combination listed in the table above, the cash deposit rate is equal to the estimated weighted-average dumping margin listed for that combination in the table; (2) for all combinations of Vietnam producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the Vietnam-wide entity; and (3) for all third-country

exporters of merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the Vietnam producer/exporter combination (or the Vietnam-wide entity) that supplied that third-country exporter.

**Disclosure**

The Department intends to disclose to interested parties the calculations performed in connection with this preliminary determination within five days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

**Verification**

As provided in section 782(i)(1) of the Act, the Department intends to verify information relied upon in making its final determination.

**Public Comment**

Case briefs or other written comments, with the exception of scope case briefs or scope comments,<sup>11</sup> may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which

the last final verification report is issued in this investigation, unless the Department alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.<sup>12</sup> Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce,

FR 43331 (September 15, 2017), which was Sunday, October 15, 2017. See the Preliminary Scope Decision Memorandum at 6. Therefore, the actual deadline for the scope case briefs was Monday, October 16, 2017. See 19 CFR 351.303(b)(1) ("For both electronically filed and manually filed documents, if the applicable due date falls on a non-business day, the Secretary will accept documents that are filed on the next business day."). The deadline for scope rebuttal briefs was Monday, October 23, 2017.

<sup>8</sup> See *Initiation Notice*, 82 FR at 21528.

<sup>9</sup> See Enforcement and Compliance's Policy Bulletin No. 05.1, regarding, "Separate-Rates Practice and Application of Combination Rates in Antidumping Investigations Involving Non-Market Economy Countries," dated April 5, 2005 (Policy Bulletin 05.1), available on the Department's Web site at <http://enforcement.trade.gov/policy/bull05-1.pdf>.

<sup>10</sup> The Department preliminarily determines that Clearwater Metal VN JSC, Rabat Corporation, and

CSPS Co., Ltd., are a single entity (hereinafter, Clearwater Metal Single Entity). See Preliminary Decision Memorandum; see also Memorandum, "Certain Tool Chests and Cabinets from the Socialist Republic of Vietnam: Collapsing and Single Entity Treatment," dated concurrently with this notice.

<sup>11</sup> As explained above, the actual deadline for the scope case briefs was Monday, October 16, 2017.

<sup>12</sup> See 19 CFR 351.309; see also 19 CFR 351.303 (for general filing requirements).

1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS no later than 5:00 p.m. Eastern Time on the established due date.

### Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioners. Pursuant to 19 CFR 351.210(e)(2), the Department requires that requests by respondents for postponement of a final antidumping determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On September 19, 2017, pursuant to 19 CFR 351.210(e), the Clearwater Metal Single Entity requested that the Department postpone the final determination and that provisional measures be extended to a period not to exceed six months.<sup>13</sup> In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, the Department is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, the Department's final determination will be published no later than 135 days after the date of publication of this preliminary determination.

<sup>13</sup> See Letter from the Clearwater Metal Single Entity, "Antidumping Duty Investigation of Certain Tool Chests and Cabinets from the Socialist Republic of Vietnam: Extension Request for Final Determination," dated September 19, 2017.

### International Trade Commission Notification

In accordance with section 733(f) of the Act, the Department will notify the International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of the subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

### Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 7, 2017.

### Gary Taverman,

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.*

### Appendix I

#### Scope of the Investigation

The scope of this investigation covers certain metal tool chests and tool cabinets, with drawers, (tool chests and cabinets), from the Socialist Republic of Vietnam (Vietnam). The scope covers all metal tool chests and cabinets, including top chests, intermediate chests, tool cabinets and side cabinets, storage units, mobile work benches, and work stations and that have the following physical characteristics:

- (1) A body made of carbon, alloy, or stainless steel and/or other metals;
- (2) two or more drawers for storage in each individual unit;
- (3) a width (side to side) exceeding 15 inches for side cabinets and exceeding 21 inches for all other individual units but not exceeding 60 inches;
- (4) a body depth (front to back) exceeding 10 inches but not exceeding 24 inches; and
- (5) prepackaged for retail sale.

For purposes of this scope, the width parameter applies to each individual unit, *i.e.*, each individual top chest, intermediate top chest, tool cabinet, side cabinet, storage unit, mobile work bench, and work station.

Prepackaged for retail sale means the units may, for example, be packaged in a cardboard box, other type of container or packaging, and may bear a Universal Product Code, along with photographs, pictures, images, features, artwork, and/or product specifications. Subject tool chests and cabinets are covered whether imported in assembled or unassembled form. Subject merchandise includes tool chests and cabinets produced in Vietnam but assembled, prepackaged for retail sale, or subject to other minor processing in a third country prior to importation into the United States. Similarly, it would include tool chests and cabinets

produced in Vietnam that are later found to be assembled, prepackaged for retail sale, or subject to other minor processing after importation into the United States.

Subject tool chests and cabinets may also have doors and shelves in addition to drawers, may have handles (typically mounted on the sides), and may have a work surface on the top. Subject tool chests and cabinets may be uncoated (*e.g.*, stainless steel), painted, powder coated, galvanized, or otherwise coated for corrosion protection or aesthetic appearance.

Subject tool chests and cabinets may be packaged as individual units or in sets. When packaged in sets, they typically include a cabinet with one or more chests that stack on top of the cabinet. Tool cabinets act as a base tool storage unit and typically have rollers, casters, or wheels to permit them to be moved more easily when loaded with tools. Work stations and mobile work benches are tool cabinets with a work surface on the top that may be made of rubber, plastic, metal, wood, or other materials.

Top chests are designed to be used with a tool cabinet to form a tool storage unit. The top chests may be mounted on top of the base tool cabinet or onto an intermediate chest. They are often packaged as a set with tool cabinets or intermediate chests, but may also be packaged separately. They may be packaged with mounting hardware (*e.g.*, bolts) and instructions for assembling them onto the base tool cabinet or onto an intermediate tool chest which rests on the base tool cabinet. Smaller top chests typically have handles on the sides, while the larger top chests typically lack handles. Intermediate tool chests are designed to fit on top of the floor standing tool cabinet and to be used underneath the top tool chest. Although they may be packaged or used separately from the tool cabinet, intermediate chests are designed to be used in conjunction with tool cabinets. The intermediate chests typically do not have handles. The intermediate and top chests may have the capability of being bolted together.

Side cabinets are designed to be bolted or otherwise attached to the side of the base storage cabinet to expand the storage capacity of the base tool cabinet.

Subject tool chests and cabinets also may be packaged with a tool set included. Packaging a subject tool chest and cabinet with a tool set does not remove an otherwise covered subject tool chest and cabinet from the scope. When this occurs, the tools are not part of the subject merchandise.

All tool chests and cabinets that meet the above definition are included in the scope unless otherwise specifically excluded.

Excluded from the scope of the investigation are tool boxes, chests, and cabinets with bodies made of plastic, carbon fiber, wood, or other non-metallic substances.

Also excluded from the scope of the investigation are industrial grade steel tool chests and cabinets. The excluded industrial grade steel tool chests and cabinets are those:

- (1) Having a body that is over 60 inches in width; or
- (2) having each of the following physical characteristics:
  - (a) A body made of steel that is 0.047 inches or more in thickness;

(b) a body depth (front to back) exceeding 21 inches; and

(c) a unit weight that exceeds the maximum unit weight shown below for each width range:

Weight to Width Ratio Tool Chests	
Inches	Maximum Pounds
21 > ≤ 25	90
25 > ≤ 28	115
28 > ≤ 30	120
30 > ≤ 32	130
32 > ≤ 34	140
34 > ≤ 36	150
36 > ≤ 38	160
38 > ≤ 40	170
40 > ≤ 42	180
42 > ≤ 44	190
44 > ≤ 46	200
46 > ≤ 48	210
48 > ≤ 50	220
50 > ≤ 52	230
52 > ≤ 54	240
54 > ≤ 56	250
56 > ≤ 58	260
58 > ≤ 60	270

Weight to Width Ratio Tool Cabinets	
Inches	Maximum Pounds
21 > ≤ 25	155
25 > ≤ 28	170
28 > ≤ 30	185
30 > ≤ 32	200
32 > ≤ 34	215
34 > ≤ 36	230
36 > ≤ 38	245
38 > ≤ 40	260
40 > ≤ 42	280
42 > ≤ 44	290
44 > ≤ 46	300
46 > ≤ 48	310
48 > ≤ 50	320
50 > ≤ 52	330
52 > ≤ 54	340
54 > ≤ 56	350
56 > ≤ 58	360
58 > ≤ 60	370

Also excluded from the scope of the investigation are service carts. The excluded service carts have all of the following characteristics:

(1) Casters, wheels, or other similar devices which allow the service cart to be rolled from place to place;

(2) a flat top or flat lid on top of the unit that opens;

(3) a space or gap between the casters, wheels, or other similar devices, and the bottom of the enclosed storage space (e.g., drawers) of at least 10 inches; and

(4) a total unit height, including casters, of less than 48 inches.

Also excluded from the scope of the investigation are non-mobile work benches. The excluded non-mobile work benches have all of the following characteristics:

(1) A solid top working surface;

(2) no drawers, one drawer, or two drawers in a side-by-side configuration; and

(3) the unit is supported by legs and has no solid front, side, or back panels enclosing the body of the unit.

Also excluded from the scope of this investigation are metal filing cabinets that are configured to hold hanging file folders and are classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheading 9403.10.0020.

Merchandise subject to this investigation is classified under HTSUS categories

9403.20.0021, 9403.20.0026, 9403.20.0030 and 7326.90.8688, but may also be classified under HTSUS category 7326.90.3500. While HTSUS subheadings are provided for convenience and Customs purposes, the written description of the scope of this investigation is dispositive.

BILLING CODE 3510-DS-P

**DEPARTMENT OF COMMERCE****International Trade Administration**

[A-201-830]

**Final Results of Changed Circumstances Review: Antidumping Duty Order on Carbon and Certain Alloy Steel Wire Rod From Mexico**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** On October 4, 2017, the Department published its notice of initiation and preliminary results of a changed circumstances review (CCR) of the antidumping duty order on carbon and certain alloy steel wire rod (wire rod) from Mexico to determine whether ArcelorMittal Mexico, S.A. de C.V. (AMM) is the successor-in-interest to ArcelorMittal Las Truchas, S.A. de C.V. (AMLT). No interested parties submitted case briefs or requested a hearing with respect to the Department's notice of initiation and preliminary results. Therefore, based on the information on the record, we continue to determine that AMM is the successor-in-interest to AMLT.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Keith Haynes, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-5139.

**SUPPLEMENTARY INFORMATION:****Background**

The Department published in the *Federal Register* the initiation and preliminary results of an expedited CCR on October 4, 2017, preliminarily finding that AMM is the successor-in-interest to AMLT.<sup>1</sup> In the *Preliminary Results*, we provided interested parties 30 days from the date of publication to submit case briefs or request a hearing. No interested parties submitted case briefs or requested a hearing.

**Scope of the Order**

The merchandise covered by the order is carbon and certain alloy steel wire rod. The product is currently classified under the Harmonized Tariff Schedule of the United States (HTSUS) item numbers 7213.91.3000, 7213.91.3010, 7213.91.3011, 7213.91.3015,

7213.91.3020, 7213.91.3090, 7213.91.3091, 7213.91.3092, 7213.91.3093, 7213.91.4500, 7213.91.4510, 7213.91.4590, 7213.91.6000, 7213.91.6010, 7213.91.6090, 7213.99.0030, 7213.99.0031, 7213.99.0038, 7213.99.0090, 7227.20.0000, 7227.20.0010, 7227.20.0020, 7227.20.0030, 7227.20.0080, 7227.20.0090, 7227.20.0095, 7227.90.6010, 7227.90.6020, 7227.90.6030, 7227.90.6035, 7227.90.6050, 7227.90.6051, 7227.90.6053, 7227.90.6058, 7227.90.6059, 7227.90.6080, and 7227.90.6085 of the HTSUS. Although the HTSUS numbers are provided for convenience and customs purposes, the written product description remains dispositive.<sup>2</sup>

**Final Results of Changed Circumstances Review**

Because no party submitted a case brief in response to the Department's *Preliminary Results*, and because the record contains no other information or evidence that calls into question the *Preliminary Results*, the Department continues to find that AMM is the successor-in-interest to AMLT, and is entitled to AMLT's cash deposit rate with respect to entries of merchandise subject to the antidumping duty order on wire rod from Mexico.<sup>3</sup>

**Instructions to U.S. Customs and Border Protection**

Based on these final results, we will instruct U.S. Customs and Border Protection to suspend liquidation and collect estimated antidumping duties for all shipments of subject merchandise exported by AMM and entered, or withdrawn from warehouse, for consumption on or after the publication of this notice in the *Federal Register* at the current antidumping duty cash-deposit rate for AMLT (*i.e.*, 2.59 percent). This cash deposit requirement shall remain in effect until further notice.

<sup>2</sup> For a complete description of the scope of the order, see Memorandum from James Maeder, Senior Director performing the duties of Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Carole Showers, Executive Director, Office of Policy, performing the duties of the Deputy Assistant Secretary for Enforcement and Compliance, "Carbon and Certain Alloy Steel Wire Rod from Mexico Preliminary Decision Memorandum of Changed Circumstances Review," dated September 28, 2017 (Preliminary Decision Memorandum).

<sup>3</sup> For a complete discussion of the Department's findings, which remain unchanged in these final results and which are herein incorporated by reference and adopted by this notice, see, generally, *Preliminary Results* and Preliminary Decision Memorandum.

**Notification to Interested Parties**

This notice serves as a final reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

We are issuing and publishing these final results in accordance with sections 751(b) and 777(i) of the Act, and 19 CFR 351.216.

Dated: November 13, 2017.

**Gary Taverman,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.*

**BILLING CODE 3510-DS-P**

**DEPARTMENT OF COMMERCE****International Trade Administration**

[A-570-056]

**Certain Tool Chests and Cabinets From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (the Department) preliminarily determines that certain tool chests and cabinets (tool chests) from the People's Republic of China (the PRC) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2016, through March 31, 2017.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Yang Jin Chun or Andre Gziryan, AD/CVD Operations Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-5760 and (202) 482-2201, respectively.

**SUPPLEMENTARY INFORMATION:****Background**

This preliminary determination is made in accordance with section 733(b)

<sup>1</sup> See *Initiation and Preliminary Results of Changed Circumstances Review: Antidumping Duty Order on Carbon and Certain Alloy Steel Wire Rod from Mexico*, 82 FR 46222 (October 4, 2017) (*Preliminary Results*).

of the Tariff Act of 1930, as amended (the Act). The Department published the notice of initiation of this investigation on May 9, 2017.<sup>1</sup> On August 21, 2017, the Department postponed the preliminary determination of this investigation and the revised deadline is now November 7, 2017.<sup>2</sup> For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.<sup>3</sup> A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>, and to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>.

### Scope of the Investigation

The products covered by this investigation are tool chests from the PRC. For a complete description of the

scope of this investigation, see Appendix I.

### Scope Comments

In accordance with the preamble to the Department's regulations,<sup>4</sup> the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (scope).<sup>5</sup> Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice*. For a summary of the product coverage comments and rebuttal responses submitted to the record for this investigation, and accompanying discussion and analysis of all comments timely received, see the Preliminary Scope Decision Memorandum.<sup>6</sup> The Department has preliminarily modified the scope language that appeared in the *Initiation Notice*. See the revised scope in Appendix I to this notice. The Department intends to address any scope comments received<sup>7</sup> and issue a final scope decision along with the final determination in the concurrent countervailing duty (CVD) investigation on tool chests from the PRC.

### Methodology

The Department is conducting this investigation in accordance with section 731 of the Act. The Department has calculated export prices and constructed

export prices in accordance with sections 772(a) and (b) of the Act, respectively. Because the PRC is a non-market economy, within the meaning of section 771(18) of the Act, the Department has calculated normal value (NV) in accordance with section 773(c) of the Act. In addition, pursuant to section 776(a) and (b) of the Act, the Department preliminarily has relied on facts otherwise available, with adverse inferences, for the PRC-wide entity. For a full description of the methodology underlying the Department's preliminary determination, see the Preliminary Decision Memorandum.

### Combination Rates

In the *Initiation Notice*,<sup>8</sup> the Department stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.<sup>9</sup> In this investigation, we calculated producer/exporter combination rates for respondents eligible for separate rates.

### Preliminary Determination

The Department preliminarily determines that the following estimated weighted-average dumping margins exist:<sup>10</sup>

Exporter	Producer	Estimated weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offsets) (percent)
Geelong Sales (Macao Commercial Offshore) Limited	Zhongshan Geelong Manufacturing Co., Ltd .....	168.93	158.30
The Tongrun Single Entity .....	Changshu City Jiangrun Metal Product Co., Ltd .....	90.40	74.56

### Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, the Department will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of subject merchandise as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, as discussed below. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), the Department will instruct CBP to require a cash deposit equal to the weighted-average amount by which normal value exceeds U.S. price, as indicated in the chart above as follows: (1) For the producer/exporter combinations listed in the table above, the cash deposit rate is equal to the estimated weighted-average dumping margin listed for that combination in the table; (2) for all combinations of PRC producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the PRC-wide entity; and (3) for all third-country exporters of merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the PRC producer/exporter combination (or the PRC-wide entity) that supplied that third-country exporter.

To determine the cash deposit rate, the Department normally adjusts the estimated weighted-average dumping margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion CVD proceeding when CVD provisional measures are in effect. Accordingly, where the Department has made a preliminary affirmative determination for domestic subsidy pass-through or export subsidies, the Department has offset the calculated estimated weighted-average dumping margin by the appropriate rate(s). Any such adjusted rates may be found in the Preliminary Determination Section's

chart of estimated weighted-average dumping margins above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, the Department will direct CBP to begin collecting cash deposits at a rate equal to the estimated weighted-average dumping margins calculated in this preliminary determination unadjusted for the passed-through domestic subsidies or for export subsidies at the time the CVD provisional measures expire.

These suspension of liquidation instructions will remain in effect until further notice.

### Disclosure

The Department intends to disclose to interested parties the calculations performed in connection with this preliminary determination within five days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

### Verification

As provided in section 782(i)(1) of the Act, the Department intends to verify information relied upon in making its final determination.

### Public Comment

Case briefs or other written comments, with the exception of scope case briefs or scope comments,<sup>11</sup> may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last final verification report is issued in this investigation, unless the Department alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.<sup>12</sup> Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in

this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS no later than 5:00 p.m. Eastern Time on the established due date.

### Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioners. Pursuant to 19 CFR 351.210(e)(2), the Department requires that requests by respondents for postponement of a final antidumping determination be accompanied by a request for extension of provisional

<sup>11</sup> As explained above, the actual deadline for the scope case briefs was Monday, October 16, 2017.

<sup>12</sup> See 19 CFR 351.309; see also 19 CFR 351.303 (for general filing requirements).

measures from a four-month period to a period not more than six months in duration.

On October 6, 2017, pursuant to 19 CFR 351.210(e)(2), Geelong and the Tongrun Single Entity requested that the Department postpone the final determination and that provisional measures be extended to a period not to exceed six months.<sup>13</sup> In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, the Department is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, the Department's final determination will be published no later than 135 days after the date of publication of this preliminary determination.

#### International Trade Commission Notification

In accordance with section 733(f) of the Act, the Department will notify the International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of the subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

#### Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

<sup>13</sup> See Letter from Geelong, "Antidumping Duty Investigation of Certain Tool Chests and Cabinets from the People's Republic of China: Request for Extension of the Final Determination," dated October 6, 2017, and Letter from the Tongrun Single Entity, "Tongrun's Request to Extend the Final Determination in the Antidumping Duty Investigation of Certain Tool Chests and Cabinets from the People's Republic of China, A-570-056," dated October 6, 2017.

Dated: November 7, 2017.

**Gary Taverman,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.*

#### Appendix I

##### Scope of the Investigation

The scope of this investigation covers certain metal tool chests and tool cabinets, with drawers, (tool chests and cabinets), from the People's Republic of China (the PRC). The scope covers all metal tool chests and cabinets, including top chests, intermediate chests, tool cabinets and side cabinets, storage units, mobile work benches, and work stations and that have the following physical characteristics:

- (1) A body made of carbon, alloy, or stainless steel and/or other metals;
- (2) two or more drawers for storage in each individual unit;
- (3) a width (side to side) exceeding 15 inches for side cabinets and exceeding 21 inches for all other individual units but not exceeding 60 inches;
- (4) a body depth (front to back) exceeding 10 inches but not exceeding 24 inches; and
- (5) prepackaged for retail sale.

For purposes of this scope, the width parameter applies to each individual unit, *i.e.*, each individual top chest, intermediate top chest, tool cabinet, side cabinet, storage unit, mobile work bench, and work station.

Prepackaged for retail sale means the units may, for example, be packaged in a cardboard box, other type of container or packaging, and may bear a Universal Product Code, along with photographs, pictures, images, features, artwork, and/or product specifications. Subject tool chests and cabinets are covered whether imported in assembled or unassembled form. Subject merchandise includes tool chests and cabinets produced in the PRC but assembled, prepackaged for retail sale, or subject to other minor processing in a third country prior to importation into the United States. Similarly, it would include tool chests and cabinets produced in the PRC that are later found to be assembled, prepackaged for retail sale, or subject to other minor processing after importation into the United States.

Subject tool chests and cabinets may also have doors and shelves in addition to drawers, may have handles (typically mounted on the sides), and may have a work surface on the top. Subject tool chests and cabinets may be uncoated (*e.g.*, stainless steel), painted, powder coated, galvanized, or otherwise coated for corrosion protection or aesthetic appearance.

Subject tool chests and cabinets may be packaged as individual units or in sets. When

packaged in sets, they typically include a cabinet with one or more chests that stack on top of the cabinet. Tool cabinets act as a base tool storage unit and typically have rollers, casters, or wheels to permit them to be moved more easily when loaded with tools. Work stations and mobile work benches are tool cabinets with a work surface on the top that may be made of rubber, plastic, metal, wood, or other materials.

Top chests are designed to be used with a tool cabinet to form a tool storage unit. The top chests may be mounted on top of the base tool cabinet or onto an intermediate chest. They are often packaged as a set with tool cabinets or intermediate chests, but may also be packaged separately. They may be packaged with mounting hardware (*e.g.*, bolts) and instructions for assembling them onto the base tool cabinet or onto an intermediate tool chest which rests on the base tool cabinet. Smaller top chests typically have handles on the sides, while the larger top chests typically lack handles. Intermediate tool chests are designed to fit on top of the floor standing tool cabinet and to be used underneath the top tool chest. Although they may be packaged or used separately from the tool cabinet, intermediate chests are designed to be used in conjunction with tool cabinets. The intermediate chests typically do not have handles. The intermediate and top chests may have the capability of being bolted together.

Side cabinets are designed to be bolted or otherwise attached to the side of the base storage cabinet to expand the storage capacity of the base tool cabinet.

Subject tool chests and cabinets also may be packaged with a tool set included. Packaging a subject tool chest and cabinet with a tool set does not remove an otherwise covered subject tool chest and cabinet from the scope. When this occurs, the tools are not part of the subject merchandise.

All tool chests and cabinets that meet the above definition are included in the scope unless otherwise specifically excluded.

Excluded from the scope of the investigation are tool boxes, chests, and cabinets with bodies made of plastic, carbon fiber, wood, or other non-metallic substances.

Also excluded from the scope of the investigation are industrial grade steel tool chests and cabinets. The excluded industrial grade steel tool chests and cabinets are those:

- (1) Having a body that is over 60 inches in width; or
- (2) having each of the following physical characteristics:
  - (a) A body made of steel that is 0.047 inches or more in thickness;
  - (b) a body depth (front to back) exceeding 21 inches; and
  - (c) a unit weight that exceeds the maximum unit weight shown below for each width range:

Weight to Width Ratio Tool Chests	
Inches	Maximum Pounds
21 > ≤ 25	90
25 > ≤ 28	115
28 > ≤ 30	120
30 > ≤ 32	130
32 > ≤ 34	140
34 > ≤ 36	150
36 > ≤ 38	160
38 > ≤ 40	170
40 > ≤ 42	180
42 > ≤ 44	190
44 > ≤ 46	200
46 > ≤ 48	210
48 > ≤ 50	220
50 > ≤ 52	230
52 > ≤ 54	240
54 > ≤ 56	250
56 > ≤ 58	260
58 > ≤ 60	270

Weight to Width Ratio Tool Cabinets	
Inches	Maximum Pounds
21 > ≤ 25	155
25 > ≤ 28	170
28 > ≤ 30	185
30 > ≤ 32	200
32 > ≤ 34	215
34 > ≤ 36	230
36 > ≤ 38	245
38 > ≤ 40	260
40 > ≤ 42	280
42 > ≤ 44	290
44 > ≤ 46	300
46 > ≤ 48	310
48 > ≤ 50	320
50 > ≤ 52	330
52 > ≤ 54	340
54 > ≤ 56	350
56 > ≤ 58	360
58 > ≤ 60	370

Also excluded from the scope of the investigation are service carts. The excluded service carts have all of the following characteristics:

(1) Casters, wheels, or other similar devices which allow the service cart to be rolled from place to place;

(2) a flat top or flat lid on top of the unit that opens;

(3) a space or gap between the casters, wheels, or other similar devices, and the bottom of the enclosed storage space (e.g., drawers) of at least 10 inches; and

(4) a total unit height, including casters, of less than 48 inches.

Also excluded from the scope of the investigation are non-mobile work benches. The excluded non-mobile work benches have all of the following characteristics:

(1) A solid top working surface;

(2) no drawers, one drawer, or two drawers in a side-by-side configuration; and

(3) the unit is supported by legs and has no solid front, side, or back panels enclosing the body of the unit.

Also excluded from the scope of this investigation are metal filing cabinets that are configured to hold hanging file folders and are classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheading 9403.10.0020.

Merchandise subject to this investigation is classified under HTSUS categories 9403.20.0021, 9403.20.0026, 9403.20.0030 and 7326.90.8688, but may also be classified under HTSUS category 7326.90.3500. While HTSUS subheadings are provided for convenience and Customs purposes, the

written description of the scope of this investigation is dispositive.

## DEPARTMENT OF COMMERCE

### International Trade Administration

[A-570-051]

#### Certain Hardwood Plywood Products From the People's Republic of China: Final Determination of Sales at Less Than Fair Value, and Final Affirmative Determination of Critical Circumstances, in Part

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (the Department) determines that certain hardwood plywood products (hardwood plywood) from the People's Republic of China (PRC) are being, or is likely to be, sold in the United States at less than fair value (LTFV). The final weighted-average dumping margins for the investigation on hardwood plywood from the PRC are listed in the "Final Determination Margins" section of this notice.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Amanda Brings or Ryan Mullen, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue

NW., Washington, DC 20230; telephone: (202) 482-3927 or (202) 482-5260, respectively.

#### SUPPLEMENTARY INFORMATION:

##### Background

On June 23, 2017, the Department published its *Preliminary Determination*.<sup>1</sup> On July 17, 2017, we published an *Amended Preliminary Determination*.<sup>2</sup> We invited interested parties to comment on our *Preliminary Determination* and *Amended Preliminary Determination* of sales at LTFV. For a list of the parties that filed case and rebuttal briefs, see the Issues and Decision Memorandum.<sup>3</sup>

##### Period of Investigation

The period of investigation (POI) is April 1, 2016 through September 30, 2016. This period corresponds to the two most recent fiscal quarters prior to the month of the filing of the petition, which was November 2016.<sup>4</sup>

##### Scope of the Investigation

The scope of the investigation covers hardwood plywood from the PRC. For a complete description of the scope of the investigation, see Appendix I to this notice. The Department issued a Preliminary Scope Decision Memorandum,<sup>5</sup> Additional Preliminary Scope Decision Memorandum,<sup>6</sup> and a Post-Preliminary Scope Decision Memorandum.<sup>7</sup> Several interested parties submitted case and rebuttal

briefs concerning scope, which we have summarized in the Department's Final Scope Decision Memorandum.<sup>8</sup> The scope in Appendix I reflects the final scope language.

##### Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in either the Issues and Decision Memorandum or the Final Scope Decision Memorandum accompanying this notice, both of which are hereby adopted by this notice.<sup>9</sup> A list of the issues raised in the Issues and Decision Memorandum is attached to this notice as Appendix II. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>. The Issues and Decision Memorandum is available to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum is available at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

##### Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), in September 2017, the Department conducted verification of the information submitted by Linyi Chengen Import and Export Co., Ltd. (Chengen) for use in the final determination. We issued our verification report on September 29, 2017.<sup>10</sup> The Department used standard verification procedures, including examination of relevant accounting and production records and original source documents provided by the respondent.<sup>11</sup>

##### Changes Since the Preliminary Determination

Based on our analysis of the comments received and our findings at verification, we have determined to apply the intermediate input methodology<sup>12</sup> in calculating Chengen's margin and made certain other changes to the margin calculations. For a discussion of these changes, see the "Changes Since the Preliminary Determination" section of the Issues and Decision Memorandum.

##### PRC-Wide Entity

For the reasons explained in the *Preliminary Determination*, we are continuing to find that the use of adverse facts available (AFA), pursuant to sections 776(a) and (b) of the Act, is appropriate and are applying a rate based entirely on AFA to the PRC-wide entity. The Department did not receive timely responses to its quantity and value (Q&V) questionnaire, separate rate applications, or separate rate supplemental questionnaires from certain PRC exporters and/or producers of subject merchandise that were named in the petition and to which the Department issued Q&V questionnaires.<sup>13</sup> As these non-responsive PRC companies did not demonstrate that they are eligible for separate rate status, the Department continues to consider them to be part of the PRC-wide entity. Consequently, we continue to find that the PRC-wide entity withheld requested information, significantly impeded the proceeding, and failed to cooperate to the best of their abilities, and thus we are continuing to base the PRC-wide entity rate on AFA. We also continue to find that mandatory respondent, Shandong Dongfang Bayley Wood Co., Ltd. (Bayley), should be treated as part of the PRC-wide entity based on AFA.<sup>14</sup>

##### PRC-Wide Rate

In selecting the AFA rate for the PRC-wide entity, the Department's practice is to select a rate that is sufficiently adverse to ensure that the uncooperative party does not obtain a more favorable result by failing to cooperate than if it had fully cooperated.<sup>15</sup> Specifically, it is

the Department's practice to select, as an AFA rate, the higher of: (a) The highest dumping margin alleged in the petition; or, (b) the highest calculated dumping margin of any respondent in the investigation.<sup>16</sup> As AFA, the Department has assigned to the PRC-wide entity the rate of 183.36 percent, which is the highest calculated dumping margin of any respondent in the investigation.<sup>17</sup>

#### Separate Rate

Under section 735(c)(5)(A) of the Act, the all-others rate is normally an amount equal to the weighted average of the estimated weighted average

dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely on the basis of facts available. Accordingly, when only one weighted-average dumping margin for an individually investigated respondent is above *de minimis* and not based entirely on facts available, the separate rate will be equal to that single, above *de minimis* rate.

In this final determination, the Department has calculated a rate for Chengen that is not zero, *de minimis*, or based entirely on facts available. With respect to the other mandatory

respondent, Bayley, we have determined that Bayley is part of the PRC-wide entity and subject to the PRC-wide rate, which is based entirely on adverse facts available. Therefore, the Department has assigned to the companies that have not been individually examined but have demonstrated their eligibility for a separate rate a margin of 183.36 percent, which is the rate calculated for Chengen.

#### Final Determination

The Department determines that the estimated final weighted-average dumping margins are as follows:

Exporter	Producer	Estimated weighted-average dumping margin (percent)	Cash deposit rate (percent)

## Disclosure

We intend to disclose to parties the calculations performed in this proceeding within five days of any public announcement of this notice in accordance with 19 CFR 351.224 (b).

## Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all entries of hardwood plywood from the PRC, as described in the "Scope of the Investigation" section, entered, or withdrawn from warehouse, for consumption on or after June 23, 2017, the date of publication of the *Preliminary Determination* notice in the **Federal Register**.

Pursuant to section 735(c)(1)(B)(ii) of the Act, the Department will instruct CBP to require a cash deposit<sup>19</sup> equal to the weighted-average amount by which NV exceeds U.S. price as follows: (1) The cash deposit rate for the exporter/producer combination listed in the table above will be the rate identified for that combination in the table; (2) for all combinations of PRC exporters/producers of merchandise under consideration that have not received their own separate rate above, the cash-deposit rate will be the cash deposit rate established for the PRC-wide entity; and (3) for all non-PRC exporters of the merchandise under consideration which have not received their own separate rate above, the cash-deposit rate will be

the cash deposit rate applicable to the PRC exporter/producer combination that supplied that non-PRC exporter. These suspension of liquidation instructions will remain in effect until further notice.

We normally adjust antidumping duty cash deposit rates by the amount of export subsidies, where appropriate. In the companion CVD investigation, with respect to Chengen, a mandatory respondent in this investigation not individually examined in the CVD investigation, and the separate-rate companies, we find that an export subsidy adjustment of 11.81 percent to the cash deposit rate is warranted because this is the export subsidy rate included in the countervailing duty "all others" rate to which the separate-rate companies are subject. As part of our determination in this final determination to apply adverse facts available the PRC-wide entity (which includes Bayley), the Department has not adjusted the PRC-wide entity's AD cash deposit rate by the lowest export subsidy rate determined for any party in the companion CVD proceeding, because the lowest export subsidy rate determined in the companion CVD proceeding is 0.00 percent.<sup>20 21</sup>

Pursuant to section 777A(f) of the Act, we normally adjust preliminary cash deposit rates for estimated domestic subsidy pass-through, where appropriate. However, in this case there is no basis to grant a domestic subsidy pass-through adjustment.<sup>22</sup>

<sup>18</sup> As detailed in the Preliminary Decision Memorandum and Issues and Decision Memorandum, Bayley, a mandatory respondent in this investigation, Jiangsu Hanbao Building Material Co., Ltd., Qingdao King Sports Products Technology Co., Ltd., and Shanghai Sunshine did not demonstrate that they were entitled to a separate rate. Accordingly, we consider these companies to be part of the PRC-wide entity. As discussed in the Preliminary Decision Memorandum and Issues and Decision Memorandum, we have made an affirmative critical circumstances determination with regard to the PRC-wide entity.

<sup>19</sup> See *Modification of Regulations Regarding the Practice of Accepting Bonds During the Provisional Measures Period in Antidumping and Countervailing Duty Investigations*, 76 FR 61042 (October 3, 2011).

<sup>20</sup> See, e.g., *Certain Passenger Vehicle and Light Truck Tires from the People's Republic of China: Preliminary Determination of Sales at Less Than Fair Value; Preliminary Affirmative Determination of Critical Circumstances; In Part and Postponement of Final Determination*, 80 FR 4250 (January 27, 2015), and accompanying Issues and Decision Memorandum at 35.

<sup>21</sup> See *Countervailing Duty Investigation of Certain Hardwood Plywood Products from the People's Republic of China: Final Affirmative Determination, and Final Affirmative Critical Circumstances Determination, in Part (CVD Final)* and accompanying Issues and Decision Memorandum. The final determination in this companion CVD proceeding is being issued on the same day as this final determination.

<sup>22</sup> See Preliminary Decision Memorandum at 42–43.

## International Trade Commission Notification

In accordance with section 735(d) of the Act, we notified the International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. As the Department's final determination is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will determine, within 45 days, whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of hardwood plywood for sale from the PRC, or sales (or the likelihood of sales) for importation, of hardwood plywood from the PRC. If the ITC determines that such injury does not exist, this proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

## Return or Destruction of Proprietary Information

This notice also serves as a reminder to the parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely written notification of return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act.

Dated: November 6, 2017.

**Gary Taverman,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.*

**Appendix I—Scope**

The merchandise subject to this investigation is hardwood and decorative plywood, and certain veneered panels as described below. For purposes of this proceeding, hardwood and decorative plywood is defined as a generally flat, multilayered plywood or other veneered panel, consisting of two or more layers or plies of wood veneers and a core, with the face and/or back veneer made of non-coniferous wood (hardwood) or bamboo. The veneers, along with the core may be glued or otherwise bonded together. Hardwood and decorative plywood may include products that meet the American National Standard for Hardwood and Decorative Plywood, ANSI/HPVA HP-1-2016 (including any revisions to that standard).

For purposes of this investigation a “veneer” is a slice of wood regardless of thickness which is cut, sliced or sawed from a log, bolt, or flitch. The face and back veneers are the outermost veneer of wood on either side of the core irrespective of additional surface coatings or covers as described below.

The core of hardwood and decorative plywood consists of the layer or layers of one or more material(s) that are situated between the face and back veneers. The core may be composed of a range of materials, including but not limited to hardwood, softwood, particleboard, or medium-density fiberboard (MDF).

All hardwood plywood is included within the scope of this investigation regardless of whether or not the face and/or back veneers are surface coated or covered and whether or not such surface coating(s) or covers obscures the grain, textures, or markings of the wood. Examples of surface coatings and covers include, but are not limited to: Ultra violet light cured polyurethanes; oil or oil-modified or water based polyurethanes; wax; epoxy-ester finishes; moisture-cured urethanes; paints; stains; paper; aluminum; high pressure laminate; MDF; medium density overlay (MDO); and phenolic film. Additionally, the face veneer of hardwood plywood may be sanded; smoothed or given a “distressed” appearance through such methods as hand-scraping or wire brushing. All hardwood plywood is included within the scope even if it is trimmed; cut-to-size; notched; punched; drilled; or has underwent other forms of minor processing.

All hardwood and decorative plywood is included within the scope of this investigation, without regard to dimension (overall thickness, thickness of face veneer, thickness of back veneer, thickness of core, thickness of inner veneers, width, or length). However, the most common panel sizes of hardwood and decorative plywood are 1219 x 1829 mm (48 x 72 inches), 1219 x 2438 mm (48 x 96 inches), and 1219 x 3048 mm (48 x 120 inches).

Subject merchandise also includes hardwood and decorative plywood that has been further processed in a third country, including but not limited to trimming, cutting, notching, punching, drilling, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope product.

The scope of the investigation excludes the following items: (1) Structural plywood (also known as “industrial plywood” or “industrial panels”) that is manufactured to meet U.S. Products Standard PS 1-09, PS 2-09, or PS 2-10 for Structural Plywood (including any revisions to that standard or any substantially equivalent international standard intended for structural plywood), and which has both a face and a back veneer of coniferous wood; (2) products which have a face and back veneer of cork; (3) multilayered wood flooring, as described in the antidumping duty and countervailing duty orders on Multilayered Wood Flooring from the People’s Republic of China, Import Administration, International Trade Administration. See Multilayered Wood Flooring from the People’s Republic of China, 76 FR 76690 (December 8, 2011) (amended final determination of sales at less than fair value and antidumping duty order), and Multilayered Wood Flooring from the People’s Republic of China, 76 FR 76693 (December 8, 2011) (countervailing duty order), as amended by Multilayered Wood Flooring from the People’s Republic of China: Amended Antidumping and Countervailing Duty Orders, 77 FR 5484 (February 3, 2012); (4) multilayered wood flooring with a face veneer of bamboo or composed entirely of bamboo; (5) plywood which has a shape or design other than a flat panel, with the exception of any minor processing described above; (6) products made entirely from bamboo and adhesives (also known as “solid bamboo”); and (7) Phenolic Film Faced Plyform (PFF), also known as Phenolic Surface Film Plywood (PSF), defined as a panel with an “Exterior” or “Exposure 1” bond classification as is defined by The Engineered Wood Association, having an opaque phenolic film layer with a weight equal to or greater than 90g/m<sup>3</sup> permanently bonded on both the face and back veneers and an opaque, moisture resistant coating applied to the edges.

Excluded from the scope of this investigation are wooden furniture goods that, at the time of importation, are fully assembled and are ready for their intended uses. Also excluded from the scope of this investigation is “ready to assemble” (RTA) furniture. RTA furniture is defined as (A) furniture packaged for sale for ultimate purchase by an end-user that, at the time of importation, includes (1) all wooden components (in finished form) required to assemble a finished unit of furniture, (2) all accessory parts (e.g., screws, washers, dowels, nails, handles, knobs, adhesive glues) required to assemble a finished unit of furniture, and (3) instructions providing guidance on the assembly of a finished unit of furniture; (B) unassembled bathroom vanity cabinets, having a space for one or more sinks, that are imported with all

unassembled hardwood and hardwood plywood components that have been cut-to-final dimensional component shape/size, painted or stained prior to importation, and stacked within a singled shipping package, except for furniture feet which may be packed and shipped separately; or (C) unassembled bathroom vanity linen closets that are imported with all unassembled hardwood and hardwood plywood components that have been cut-to-final dimensional shape/size, painted or stained prior to importation, and stacked within a single shipping package, except for furniture feet which may be packed and shipped separately.

Excluded from the scope of this investigation are kitchen cabinets that, at the time of importation, are fully assembled and are ready for their intended uses. Also excluded from the scope of this investigation are RTA kitchen cabinets. RTA kitchen cabinets are defined as kitchen cabinets packaged for sale for ultimate purchase by an end-user that, at the time of importation, includes (1) all wooden components (in finished form) required to assemble a finished unit of cabinetry, (2) all accessory parts (e.g., screws, washers, dowels, nails, handles, knobs, hooks, adhesive glues) required to assemble a finished unit of cabinetry, and (3) instructions providing guidance on the assembly of a finished unit of cabinetry.

Excluded from the scope of this investigation are finished table tops, which are table tops imported in finished form with pre-cut or drilled openings to attach the underframe or legs. The table tops are ready for use at the time of import and require no further finishing or processing.

Excluded from the scope of this investigation are finished countertops that are imported in finished form and require no further finishing or manufacturing.

Excluded from the scope of this investigation are laminated veneer lumber door and window components with (1) a maximum width of 44 millimeters, a thickness from 30 millimeters to 72 millimeters, and a length of less than 2413 millimeters (2) water boiling point exterior adhesive, (3) a modulus of elasticity of 1,500,000 pounds per square inch or higher, (4) finger-jointed or lap-jointed core veneer with all layers oriented so that the grain is running parallel or with no more than 3 dispersed layers of veneer oriented with the grain running perpendicular to the other layers; and (5) top layer machined with a curved edge and one or more profile channels throughout.

Imports of hardwood plywood are primarily entered under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4412.10.0500; 4412.31.0520; 4412.31.0540; 4412.31.0560; 4412.31.0620; 4412.31.0640; 4412.31.0660; 4412.31.2510; 4412.31.2520; 4412.31.2610; 4412.31.2620; 4412.31.4040; 4412.31.4050; 4412.31.4060; 4412.31.4075; 4412.31.4080; 4412.31.4140; 4412.31.4150; 4412.31.4160; 4412.31.4180; 4412.31.5125; 4412.31.5135; 4412.31.5155; 4412.31.5165; 4412.31.5175; 4412.31.5235; 4412.31.5255; 4412.31.5265; 4412.31.5275; 4412.31.6000; 4412.31.6100;

4412.31.9100; 4412.31.9200; 4412.32.0520; 4412.32.0540; 4412.32.0565; 4412.32.0570; 4412.32.0620; 4412.32.0640; 4412.32.0670; 4412.32.2510; 4412.32.2525; 4412.32.2530; 4412.32.2610; 4412.32.2630; 4412.32.3125; 4412.32.3135; 4412.32.3155; 4412.32.3165; 4412.32.3175; 4412.32.3185; 4412.32.3235; 4412.32.3255; 4412.32.3265; 4412.32.3275; 4412.32.3285; 4412.32.5600; 4412.32.3235; 4412.32.3255; 4412.32.3265; 4412.32.3275; 4412.32.3285; 4412.32.5700; 4412.94.1030; 4412.94.1050; 4412.94.3105; 4412.94.3111; 4412.94.3121; 4412.94.3141; 4412.94.3161; 4412.94.3175; 4412.94.4100; 4412.99.0600; 4412.99.1020; 4412.99.1030; 4412.99.1040; 4412.99.3110; 4412.99.3120; 4412.99.3130; 4412.99.3140; 4412.99.3150; 4412.99.3160; 4412.99.3170; 4412.99.4100; 4412.99.5115; and 4412.99.5710.

Imports of hardwood plywood may also enter under HTSUS subheadings 4412.99.6000; 4412.99.7000; 4412.99.8000; 4412.99.9000; 4412.10.9000; 4412.94.5100; 4412.94.9500; and 4412.99.9500. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

## DEPARTMENT OF COMMERCE

### International Trade Administration

[C-560-831]

#### Biodiesel From the Republic of Indonesia: Final Affirmative Countervailing Duty Determination

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (Department) determines that countervailable subsidies are being provided to producers and exporters of biodiesel from the Republic of Indonesia (Indonesia). The period of investigation is January 1, 2016, through December 31, 2016.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Joseph Traw or Gene Calvert, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-6079 or (202) 482-3586, respectively.

#### SUPPLEMENTARY INFORMATION:

##### Background

The Department published the *Preliminary Determination* on August 28, 2017.<sup>1</sup> A summary of the events that occurred since the Department published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Final Decision Memorandum.<sup>2</sup> The Final Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>, and is available to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Final Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed Final Decision

<sup>1</sup> See *Biodiesel From the Republic of Indonesia: Preliminary Affirmative Countervailing Duty Determination*, 82 FR 40746 (August 28, 2017) (*Preliminary Determination*).

<sup>2</sup> See Memorandum, "Issues and Decision Memorandum for the Final Determination in the Countervailing Duty Investigation of Biodiesel from Indonesia," (Final Decision Memorandum), dated concurrently with this determination and hereby adopted by this notice.

Memorandum and the electronic version are identical in content.

#### Period of Investigation

The period of investigation for which we are measuring subsidies is January 1, 2016, through December 31, 2016.

#### Scope of the Investigation

The product covered by this investigation is biodiesel from Indonesia. For a complete description of the scope of this investigation, see the "Scope of the Investigation," in Appendix II of this notice.

#### Analysis of Subsidy Programs and Comments Received

The subsidy programs under investigation, and the issues raised in the case and rebuttal briefs submitted by the interested parties in this proceeding, are discussed in the Final Decision Memorandum. A list of the issues raised by the parties and responded to by the Department in the Final Decision Memorandum, is attached at Appendix I to this notice.

#### Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), during September 2017, the Department verified the subsidy information reported by the Government of Indonesia, PT Musim Mas (Musim Mas), and Wilmar Trading Co., Ltd. (Wilmar Trading). We used standard verification procedures, including an examination of relevant accounting records and original source documents provided by the respondents.<sup>3</sup>

#### Changes Since the Preliminary Determination

Based on our analysis of the comments received from parties and the minor corrections presented, we made certain changes to the respondents' subsidy rate calculations set forth in the *Preliminary Determination*. For a discussion of these changes, see the Final Decision Memorandum and the Final Calculation Memoranda.<sup>4</sup>

<sup>3</sup> See Memorandum, "Verification of the CVD Responses of the Government of Indonesia in the Countervailing Duty Investigation of Biodiesel," dated October 3, 2017; Memorandum, "Verification of the CVD Responses of Wilmar Trading Ptd. Ltd. and its Cross Owned Affiliates in the Countervailing Duty Investigation of Biodiesel," dated October 2, 2017; and Memorandum, "Countervailing Duty Investigation of Biodiesel from the Republic of Indonesia: Verification of the Questionnaire Responses Submitted by PT Musim Mas," dated September 28, 2017.

<sup>4</sup> See Issues and Decision Memorandum dated concurrently with this determination; see also Wilmar Trading's Final Calculation Memorandum, dated concurrently with this determination, and

Continued

**All-Others Rate**

In accordance with section 705(c)(1)(B)(i)(I) of the Act, the Department calculated a countervailable subsidy rate for the individually investigated exporters/producers of the subject merchandise. Consistent with sections 705(c)(1)(B)(i)(I) and 705(c)(5)(A) of the Act, the Department also calculated an estimated “all-others” rate for exporters and producers not individually investigated. Section 705(c)(5)(A)(i) of the Act provides that the “all-others” rate shall be an amount equal to the weighted-average of the countervailable subsidy rates established for individually investigated exporters and producers, excluding any rates that are zero or *de minimis* or any rates determined entirely under section 776 of the Act. In this investigation, the Department calculated individual estimated countervailable subsidy rates for Wilmar Trading and Musim Mas that are not zero, *de minimis*, or based entirely on facts otherwise available. Therefore, the Department calculated the all-others’ rate using a weighted average of the individual estimated subsidy rates calculated for the examined respondents using each company’s publicly-ranged values for the merchandise under consideration.<sup>5</sup>

**Final Determination**

In accordance with section 705(c)(1)(B)(i)(I) of the Act, we established individual estimated countervailable subsidy rates for PT Musim Mas and Wilmar Trading Co., Ltd., and their cross-owned entities.

Company	Subsidy rate (%)
PT Musim Mas .....	64.73

Musim Mas’s Final Calculation Memorandum, dated concurrently with this determination.

<sup>5</sup> With two respondents under examination, the Department normally calculates: (A) A weighted-average of the estimated subsidy rates calculated for the examined respondents; (B) a simple average of the estimated subsidy rates calculated for the examined respondents; and (C) a weighted-average of the estimated subsidy rates calculated for the examined respondents using each company’s publicly-ranged U.S. sale quantities for the merchandise under consideration. The Department then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. See, e.g., *Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part*, 75 FR 53661, 53663 (September 1, 2010). As complete publicly ranged sales data were available, the Department based the all-others rate on the publicly ranged sales data of the mandatory respondents. For a complete analysis of the data, please see the All-Others’ Rate Calculation Memorandum dated concurrently with this determination.

Company	Subsidy rate (%)
Wilmar Trading Co., Ltd .....	34.45
All-Others .....	38.95

**Disclosure**

The Department will disclose the calculations performed within five days of the date of publication of this notice to parties in this proceeding in accordance with 19 CFR 351.224(b).

**Continuation of Suspension of Liquidation**

In accordance with sections 703(d) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all appropriate entries of biodiesel from Indonesia, which were entered, or withdrawn from warehouse, for consumption on or after August 28, 2017, the date of publication of the *Preliminary Determination*.

**International Trade Commission Notification**

In accordance with section 705(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of countervailable subsidies. Because the final determination in this proceeding is affirmative, in accordance with section 705(b) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of biodiesel from Indonesia no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue a CVD order directing CBP to assess, upon further instruction by the Department, countervailing duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, as discussed above in the “Continuation of Suspension of Liquidation” section.

**Notification Regarding Administrative Protective Orders**

In the event the ITC issues a final negative injury determination, this notice serves as the only reminder to parties subject to an APO of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or

destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

This determination is issued and published pursuant to sections 705(d) and 777(i) of the Act.

Dated: November 6, 2017.

**Gary Taverman,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.*

- VIII. Discussion of the Issues
  - Comment 1: Whether payments from the oil palm plantation fund are countervailable
  - Comment 2: Whether the Department should treat OPPF payments as more than adequate remuneration program instead of a grant program
  - Comment 3: Whether the Department was correct to tie OPPF payments to all biodiesel sales
  - Comment 4: Whether the Department should offset any benefit to mandatory respondents by the amount of export levy they pay into the OPPF
  - Comment 5: Whether there is a basis for finding that the GOI entrusted or directed the provision of crude palm oil (CPO) for LTAR
  - Comment 6: Whether the Department should use a tier-one benchmark for CPO
  - Comment 7: Whether the Department should change its freight calculation for the CPO benchmark values
- IX. Conclusion

**Appendix II**

**Scope of the Investigation**

The product covered by this investigation is biodiesel, which is a fuel comprised of mono-alkyl esters of long chain fatty acids derived from vegetable oils or animal fats, including biologically-based waste oils or greases, and other biologically-based oil or fat sources. The investigations cover biodiesel in pure form (B100) as well as fuel mixtures containing at least 99 percent biodiesel by volume (B99). For fuel mixtures containing less than 99 percent biodiesel by volume, only the biodiesel component of the mixture is covered by the scope of the investigation.

Biodiesel is generally produced to American Society for Testing and Materials International (ASTM) D6751 specifications, but it can also be made to other specifications. Biodiesel commonly has one of the following Chemical Abstracts Service

(CAS) numbers, generally depending upon the feedstock used: 67784–80–9 (soybean oil methyl esters); 91051–34–2 (palm oil methyl esters); 91051–32–0 (palm kernel oil methyl esters); 73891–99–3 (rapeseed oil methyl esters); 61788–61–2 (tallow methyl esters); 68990–52–3 (vegetable oil methyl esters); 129828–16–6 (canola oil methyl esters); 67762–26–9 (unsaturated alkylcarboxylic acid methyl ester); or 68937–84–8 (fatty acids, C12–C18, methyl ester).

The B100 product subject to the investigation is currently classifiable under subheading 3826.00.1000 of the Harmonized Tariff Schedule of the United States (HTSUS), while the B99 product is currently classifiable under HTSUS subheading 3826.00.3000. Although the HTSUS subheadings, ASTM specifications, and CAS numbers are provided for convenience and customs purposes, the written description of the scope is dispositive.

#### Countervailing Duty Investigation of Certain Hardwood Plywood Products From the People's Republic of China: Final Affirmative Determination, and Final Affirmative Critical Circumstances Determination, in Part

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (Department) determines that countervailable subsidies are being provided to producers and exporters of certain hardwood plywood products (hardwood plywood) from the People's Republic of China (PRC). The period of investigation is January 1, 2015, through December 31, 2015. For information on the estimated subsidy rates, see the "Suspension of Liquidation" section of this notice.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Matthew Renkey or Justin Neuman, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone 202.482.2312 or 202.482.0486, respectively.

#### SUPPLEMENTARY INFORMATION:

##### Background

The petitioner in this investigation is the Coalition for Fair Trade in Hardwood Plywood and its individual members, Columbia Forest Products,

Commonwealth Plywood Inc., Murphy Plywood, Roseburg Forest Products Co., States Industries, Inc., and Timber Products Company (the petitioners). In addition to the Government of China (GOC), the mandatory respondents in this investigation are Linyi Sanfortune Wood Co., Ltd. (Sanfortune) and Dongfang Bayley Wood Co., Ltd. (Bayley Wood). The Department has determined that Bayley Wood is cross-owned with Linyi Yinhe Panel Factory, a producer of subject merchandise, and will refer to them collectively as "Bayley Wood."

The Department published its *Preliminary Determination* on April 25, 2017.<sup>1</sup> On October 24, 2017, the Department issued a Post-Preliminary Analysis.<sup>2</sup> A complete summary of the events that occurred since the *Preliminary Determination*, as well as a full discussion of the issues raised by the parties for this final determination, may be found in the Issues and Decision Memorandum accompanying the Final Affirmative Determination,<sup>3</sup> which is dated concurrently with, and hereby adopted by, this notice. The Issues and Decision Memorandum is a public document and is available electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). Access to ACCESS is available to registered users at <https://access.trade.gov> and to all parties in the Central Records Unit, Room B8024 of the Department's main building. In addition, a complete version of the Issues and Decision Memorandum can be viewed at <http://enforcement.trade.gov/frn>. The signed Issues and Decision Memorandum and the electronic version are identical in content.

##### Methodology

The Department is conducting this countervailing duty (CVD) investigation in accordance with section 701 of the Tariff Act of 1930, as amended (Act). For each of the subsidy programs found

<sup>1</sup> See *Certain Hardwood Plywood Products from the People's Republic of China: Preliminary Affirmative Countervailing Duty Determination, Preliminary Affirmative Critical Circumstances Determination, in Part, and Alignment of Final Determination with Final Antidumping Duty Determination*, 82 FR 19022 (April 25, 2017) (*Preliminary Determination*).

<sup>2</sup> See Department Memorandum, "Certain Hardwood Plywood Products from the People's Republic of China: Post-Preliminary Analysis," dated October 24, 2017 (Post-Preliminary Analysis).

<sup>3</sup> See Department Memorandum, "Countervailing Duty Investigation of Certain Hardwood Plywood Products from the People's Republic of China: Issues and Decision Memorandum for the Final Affirmative Determination," dated concurrently with, and hereby adopted by, this notice (Issues and Decisions Memorandum).

to be countervailable, we determine that there is a subsidy (*i.e.*, a financial contribution by an "authority" that gives rise to a benefit to the recipient) and that the subsidy is specific. For a full description of the methodology underlying our final determination, see the Issues and Decisions Memorandum.

##### Scope of the Investigation

The product covered by this investigation is hardwood plywood from the PRC. For a complete description of the scope of this investigation, see Appendix II.

##### Analysis of Subsidy Programs and Comments Received

All issues raised in the comments filed by interested parties to this proceeding are discussed in the Issues and Decision Memorandum. A list of the issues raised by interested parties and responded to by the Department in the Issues and Decisions Memorandum are attached at Appendix I to this notice.

##### Use of Adverse Facts Available

For purposes of this final determination, we relied on facts available, and because certain respondents did not act to the best of their ability in responding to the Department's requests for information, we drew an adverse inference, where appropriate, in selecting from among the facts otherwise available.<sup>4</sup> A full discussion of our decision to rely on adverse facts available is presented in the "Use of Facts Otherwise Available and Adverse Inferences" section of the Issues and Decisions Memorandum.

##### Changes Since the Preliminary Determination

Based on our review and analysis of the comments received from parties, and minor corrections accepted at verification, we made certain changes to the respondents' subsidy rate calculations since the *Preliminary Determination*. For a discussion of these changes, see the Issues and Decision Memorandum.

##### Final Affirmative Determination of Critical Circumstances, in Part

In the *Preliminary Determination*, the Department found that critical circumstances exist with respect to imports of hardwood plywood from the PRC for Bayley Wood and all other exporters or producers not individually examined (including those that did not respond to our quantity and value

<sup>4</sup> See sections 776(a) and (b) of the Act.

(Q&V) questionnaire).<sup>5</sup> Upon further analysis of the data and comments submitted by interested parties following the *Preliminary Determination*, we are modifying our findings for this final determination. Specifically, in accordance with section 705(a)(2) of the Act, we find that critical circumstances exist with respect to imports from Bayley Wood and the companies that did not respond to the Q&V questionnaire, but do not exist for Sanfortune and “all other” producers or exporters.<sup>6</sup>

#### Final Determination

In accordance with section 705(c)(1)(B)(i)(I) of the Act, we calculated an estimated individual countervailable subsidy rate for each producer/exporter of the subject merchandise individually investigated.

In accordance with section 705(c)(5)(A) of the Act, for companies not individually investigated, we applied an “all-others” rate, which is normally calculated by weighting the subsidy rates of the individual companies selected as mandatory respondents by those companies’

exports of the subject merchandise to the United States. Under section 705(c)(5)(A)(i) of the Act, the all-others rate excludes zero and *de minimis* rates calculated for the exporters and producers individually investigated, as well as rates based entirely on facts otherwise available. In this investigation, the only non-*de minimis* rate, or rate not based entirely on facts otherwise available, is the rate calculated for Sanfortune. Consequently, the rate calculated for Sanfortune is assigned as the “all-others” rate.

## Disclosure

We intend to disclose to parties in this proceeding the calculations performed for this final determination within five days of the date of public announcement of our final determination, in accordance with 19 CFR 351.224(b).

## Suspension of Liquidation

As a result of our *Preliminary Determination* and pursuant to section 703(d) of the Act, we instructed U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of hardwood plywood from the PRC, that were entered, or withdrawn from warehouse, for consumption on or after April 25, 2017, the date of the publication of the *Preliminary Determination* in the **Federal Register** (except for those companies for which we made a preliminary affirmative determination of critical circumstances, as explained below). In accordance with section 703(d) of the Act, we instructed CBP to discontinue the suspension of liquidation for CVD purposes for subject merchandise entered, or withdrawn from warehouse, on or after August 23, 2017, but to continue the suspension of liquidation of all entries from April 25, 2017, through August 22, 2017.

The Department continues to find that critical circumstances exist for those companies receiving AFA (*i.e.*, Bayley Wood and those companies that did not respond to our quantity and value questionnaire),<sup>11</sup> and therefore we will

<sup>7</sup> As discussed in the *Preliminary Determination*, the Department has found that Bayley Wood is cross-owned with Linyi Yinhe Panel Factory (Yinhe Panel), a producer of subject merchandise. The Department also applied total adverse facts available (AFA) to Bayley Wood and Yinhe Panel.

<sup>8</sup> This company and those listed below are receiving the AFA rate because they did not respond to our quantity and value questionnaire.

<sup>9</sup> This company was listed as having the following two "aka" names: Shouguang Evergreen Co., Ltd. and Weifang Evergreen Wood Co., Ltd.

<sup>10</sup> This company was listed as having the following "aka" name: Suqian Sulu Import and Export Trading.

<sup>11</sup> See footnote 8 above.

instruct CBP to continue to suspend liquidation of all entries of subject merchandise from the PRC-wide entity entered, or withdrawn from warehouse, for consumption on or after January 25, 2017, which is 90 days prior to the date of publication of the *Preliminary Determination*. CBP shall continue to require a cash deposit equal to the rates shown above. These instructions suspending liquidation will remain in effect until further notice.

In accordance with the preliminary affirmative determination of critical circumstances, we instructed CBP to suspend liquidation of all entries of the subject merchandise from "all other" producers and exporters, which were entered or withdrawn from warehouse, on or after January 25, 2017, which is 90 days prior to April 25, 2017, the date of publication of the *Preliminary Determination*. Because we do not find critical circumstances for the "all-other" producers and exporters in this final determination, we will instruct CBP to terminate suspension of liquidation, and release any cash deposits or bonds, on imports during the 90-day period prior to the date of publication of the *Preliminary Determination*.

If the U.S. International Trade Commission (ITC) issues a final affirmative injury determination, we will issue a CVD order and reinstate the suspension of liquidation under section 706(a) of the Act, requiring a cash deposit of estimated CVDs for such entries of subject merchandise in the amounts indicated above. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or canceled.

## International Trade Commission Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-proprietary

information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order (APO), without the written consent of the Assistant Secretary for Enforcement and Compliance.

## Return or Destruction of Proprietary Information

In the event that the ITC issues a final negative injury determination, this notice will serve as the only reminder to parties subject to an APO of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or, alternatively, conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation that is subject to sanction.

This determination is published pursuant to sections 705(d) and 777(i) of the Act.

Dated: November 6, 2017.

## Gary Taverman,

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.*

## Appendix II

### Scope of the Investigation

The merchandise subject to this investigation is hardwood and decorative plywood, and certain veneered panels as described below. For purposes of this proceeding, hardwood and decorative plywood is defined as a generally flat, multilayered plywood or other veneered panel, consisting of two or more layers or plies of wood veneers and a core, with the face and/or back veneer made of non-coniferous wood (hardwood) or bamboo. The veneers, along with the core may be glued or otherwise bonded together. Hardwood and decorative plywood may include products that meet the American National Standard for

Hardwood and Decorative Plywood, ANSI/HPVA HP-1-2016 (including any revisions to that standard).

For purposes of this investigation a "veneer" is a slice of wood regardless of thickness which is cut, sliced or sawed from a log, bolt, or flitch. The face and back veneers are the outermost veneer of wood on either side of the core irrespective of additional surface coatings or covers as described below.

The core of hardwood and decorative plywood consists of the layer or layers of one or more material(s) that are situated between the face and back veneers. The core may be composed of a range of materials, including but not limited to hardwood, softwood, particleboard, or medium-density fiberboard (MDF).

All hardwood plywood is included within the scope of this investigation regardless of whether or not the face and/or back veneers are surface coated or covered and whether or not such surface coating(s) or covers obscures the grain, textures, or markings of the wood. Examples of surface coatings and covers include, but are not limited to: Ultra violet light cured polyurethanes; oil or oil-modified or water based polyurethanes; wax; epoxy-ester finishes; moisture-cured urethanes; paints; stains; paper; aluminum; high pressure laminate; MDF; medium density overlay (MDO); and phenolic film.

Additionally, the face veneer of hardwood plywood may be sanded; smoothed or given a "distressed" appearance through such methods as hand-scraping or wire brushing. All hardwood plywood is included within the scope even if it is trimmed; cut-to-size; notched; punched; drilled; or has underwent other forms of minor processing.

All hardwood and decorative plywood is included within the scope of this investigation, without regard to dimension (overall thickness, thickness of face veneer, thickness of back veneer, thickness of core, thickness of inner veneers, width, or length). However, the most common panel sizes of hardwood and decorative plywood are 1219 x 1829 mm (48 x 72 inches), 1219 x 2438 mm (48 x 96 inches), and 1219 x 3048 mm (48 x 120 inches).

Subject merchandise also includes hardwood and decorative plywood that has been further processed in a third country, including but not limited to trimming, cutting, notching, punching, drilling, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope product.

The scope of the investigation excludes the following items: (1) Structural plywood (also known as "industrial plywood" or "industrial panels") that is manufactured to meet U.S. Products Standard PS 1-09, PS 2-09, or PS 2-10 for Structural Plywood (including any revisions to that standard or any substantially equivalent international standard intended for structural plywood), and which has both a face and a back veneer of coniferous wood; (2) products which have a face and back veneer of cork; (3) multilayered wood flooring, as described in the antidumping duty and countervailing duty orders on Multilayered Wood Flooring

from the People's Republic of China, Import Administration, International Trade Administration. See Multilayered Wood Flooring from the People's Republic of China, 76 FR 76690 (December 8, 2011) (amended final determination of sales at less than fair value and antidumping duty order), and Multilayered Wood Flooring from the People's Republic of China, 76 FR 76693 (December 8, 2011) (countervailing duty order), as amended by Multilayered Wood Flooring from the People's Republic of China: Amended Antidumping and Countervailing Duty Orders, 77 FR 5484 (February 3, 2012); (4) multilayered wood flooring with a face veneer of bamboo or composed entirely of bamboo; (5) plywood which has a shape or design other than a flat panel, with the exception of any minor processing described above; (6) products made entirely from bamboo and adhesives (also known as "solid bamboo"); and (7) Phenolic Film Faced Plyform (PFF), also known as Phenolic Surface Film Plywood (PSF), defined as a panel with an "Exterior" or "Exposure 1" bond classification as is defined by The Engineered Wood Association, having an opaque phenolic film layer with a weight equal to or greater than 90g/m<sup>3</sup> permanently bonded on both the face and back veneers and an opaque, moisture resistant coating applied to the edges.

Excluded from the scope of this investigation are wooden furniture goods that, at the time of importation, are fully assembled and are ready for their intended uses. Also excluded from the scope of this investigation is "ready to assemble" (RTA) furniture. RTA furniture is defined as (A) furniture packaged for sale for ultimate purchase by an end-user that, at the time of importation, includes (1) all wooden components (in finished form) required to assemble a finished unit of furniture, (2) all accessory parts (e.g., screws, washers, dowels, nails, handles, knobs, adhesive glues) required to assemble a finished unit of furniture, and (3) instructions providing guidance on the assembly of a finished unit of furniture; (B) unassembled bathroom vanity cabinets, having a space for one or more sinks, that are imported with all unassembled hardwood and hardwood plywood components that have been cut-to-final dimensional component shape/size, painted or stained prior to importation, and stacked within a singled shipping package, except for furniture feet which may be packed and shipped separately; or (C) unassembled bathroom vanity linen closets that are imported with all unassembled hardwood and hardwood plywood components that have been cut-to-final dimensional shape/size, painted or stained prior to importation, and stacked within a single shipping package, except for furniture feet which may be packed and shipped separately.

Excluded from the scope of this investigation are kitchen cabinets that, at the time of importation, are fully assembled and are ready for their intended uses. Also excluded from the scope of this investigation are RTA kitchen cabinets. RTA kitchen cabinets are defined as kitchen cabinets packaged for sale for ultimate purchase by an

end-user that, at the time of importation, includes (1) all wooden components (in finished form) required to assemble a finished unit of cabinetry, (2) all accessory parts (e.g., screws, washers, dowels, nails, handles, knobs, hooks, adhesive glues) required to assemble a finished unit of cabinetry, and (3) instructions providing guidance on the assembly of a finished unit of cabinetry.

Excluded from the scope of this investigation are finished table tops, which are table tops imported in finished form with pre-cut or drilled openings to attach the underframe or legs. The table tops are ready for use at the time of import and require no further finishing or processing.

Excluded from the scope of this investigation are finished countertops that are imported in finished form and require no further finishing or manufacturing.

Excluded from the scope of this investigation are laminated veneer lumber door and window components with (1) a maximum width of 44 millimeters, a thickness from 30 millimeters to 72 millimeters, and a length of less than 2413 millimeters (2) water boiling point exterior adhesive, (3) a modulus of elasticity of 1,500,000 pounds per square inch or higher, (4) finger-jointed or lap-jointed core veneer with all layers oriented so that the grain is running parallel or with no more than 3 dispersed layers of veneer oriented with the grain running perpendicular to the other layers; and (5) top layer machined with a curved edge and one or more profile channels throughout.

Imports of hardwood plywood are primarily entered under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4412.10.0500; 4412.31.0520; 4412.31.0540; 4412.31.0560; 4412.31.0620; 4412.31.0640; 4412.31.0660; 4412.31.2510; 4412.31.2520; 4412.31.2610; 4412.31.2620; 4412.31.4040; 4412.31.4050; 4412.31.4060; 4412.31.4075; 4412.31.4080; 4412.31.4140; 4412.31.4150; 4412.31.4160; 4412.31.4180; 4412.31.5125; 4412.31.5135; 4412.31.5155; 4412.31.5165; 4412.31.5175; 4412.31.5235; 4412.31.5255; 4412.31.5265; 4412.31.5275; 4412.31.6000; 4412.31.6100; 4412.31.9100; 4412.31.9200; 4412.32.0520; 4412.32.0540; 4412.32.0565; 4412.32.0570; 4412.32.0620; 4412.32.0640; 4412.32.0670; 4412.32.2510; 4412.32.2525; 4412.32.2530; 4412.32.2610; 4412.32.2630; 4412.32.3125; 4412.32.3135; 4412.32.3155; 4412.32.3165; 4412.32.3175; 4412.32.3185; 4412.32.3235; 4412.32.3255; 4412.32.3265; 4412.32.3275; 4412.32.3285; 4412.32.5600; 4412.32.3235; 4412.32.3255; 4412.32.3265; 4412.32.3275; 4412.32.3285; 4412.32.5700; 4412.94.1030; 4412.94.1050; 4412.94.3105; 4412.94.3111; 4412.94.3121; 4412.94.3141; 4412.94.3161; 4412.94.3175; 4412.94.4100; 4412.99.0600; 4412.99.1020; 4412.99.1030; 4412.99.1040; 4412.99.3110; 4412.99.3120; 4412.99.3130; 4412.99.3140; 4412.99.3150; 4412.99.3160; 4412.99.3170; 4412.99.4100; 4412.99.5115; and 4412.99.5710.

Imports of hardwood plywood may also enter under HTSUS subheadings 4412.99.6000; 4412.99.7000; 4412.99.8000; 4412.99.9000; 4412.10.9000; 4412.94.5100; 4412.94.9500; and 4412.99.9500. While the

HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

## DEPARTMENT OF COMMERCE

### International Trade Administration

[C-357-821]

#### Biodiesel From the Republic of Argentina: Final Affirmative Countervailing Duty Determination

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (Department) determines that countervailable subsidies are being provided to producers and exporters of biodiesel from the Republic of Argentina. The period of investigation is January 1, 2016, through December 31, 2016.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Kathryn Wallace or Elfi Blum, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-6251, or (202) 482-0197, respectively.

#### SUPPLEMENTARY INFORMATION:

##### Background

The Department published the *Preliminary Determination* on August 28, 2017.<sup>1</sup> A summary of the events that occurred since the Department published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the accompanying Final Decision Memorandum.<sup>2</sup> The Final Decision Memorandum is a public document, and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to

<sup>1</sup> See *Biodiesel from Argentina: Preliminary Affirmative Countervailing Duty Determination and Preliminary Affirmative Critical Circumstances Determination*, in Part, 82 FR 40748 (*Preliminary Determination*) and accompanying Preliminary Decision Memorandum (PDM).

<sup>2</sup> See Memorandum, "Issues and Decision Memorandum for the final Determination in the Countervailing Duty Investigation of Biodiesel from the Republic of Argentina," dated concurrently with this determination and hereby adopted by this notice (Final Decision Memorandum).

registered users at <http://access.trade.gov>, and is available to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Final Decision Memorandum can be accessed directly at <http://enforcement.trade.gov>. The signed and electronic versions of the Final Decision Memorandum are identical in content.

#### Period of Investigation

The period of investigation for which we are measuring subsidies is January 1, 2016, through December 31, 2016.

#### Scope of the Investigation

The scope of the investigation covers biodiesel from the Republic of Argentina. The Department did not receive any scope comments and has not updated the scope of the investigation since the *Preliminary Determination*. For a complete description of the scope of this investigation, see Appendix II to this notice.

#### Final Negative Determination of Critical Circumstances

In the *Preliminary Determination*, the Department determined that critical circumstances exist with respect to LDC Argentina S.A. (LDC Argentina) and Vicentin S.A.I.C. (Vicentin), but do not exist with respect to imports from all other producers or exporters of biodiesel from Argentina.<sup>3</sup> As discussed in the Final Decision Memorandum, in accordance with section 705(a)(2) of the Tariff Act of 1930, as amended (the Act), the Department no longer finds critical circumstances with respect to imports from LDC Argentina and Vicentin. In addition, the Department continues to find that critical circumstances do not exist with respect to imports from all other producers or exporters of biodiesel from Argentina. Therefore, in accordance with section 705(a)(2) of the Act, the Department determines that critical circumstances do not exist with respect to LDC Argentina, Vicentin, and all other producers or exporters of subject merchandise.

#### Analysis of Subsidy Programs and Comments Received

The subsidy programs under investigation, and the issues raised in the case and rebuttal briefs submitted by the interested parties in this proceeding, are discussed in the Final Decision Memorandum. A list of the issues raised by the parties and addressed by the

<sup>3</sup> See *Preliminary Determination* at 82 FR 40749 and PDM at 5-8.

Department in the Final Decision Memorandum is attached at Appendix I to this notice.

### Verification

As provided in section 782(i) of the Act, during September 2017, the Department verified the subsidy information reported by the Government of Argentina (GOA), LDC Argentina, and Vicentin. We used standard verification procedures, including an examination of relevant accounting records and original source documents provided by the respondents.<sup>4</sup>

### Use of Adverse Facts Available

If necessary information is not available on the record, or an interested party withholds information, fails to provide requested information in a timely manner, significantly impedes a proceeding by not providing information, or information provided cannot be verified, the Department will apply facts available, pursuant to section 776(a)(1) & (2) of the Act.

For purposes of this final determination, the Department continued to rely, in part, on facts available. For the GOA and Vicentin,<sup>5</sup> the Department is basing certain countervailability determinations and calculating subsidy rates for certain examined programs on facts otherwise available, pursuant to sections 776(a)(2)(A) and 776(a)(2)(C) and (D) of the Act. Further, because the GOA and Vicentin did not act to the best of their ability in this investigation in failing to provide necessary information requested by the Department, we determine that an adverse inference in selecting from among the facts available is warranted with respect to certain countervailable subsidy programs, pursuant to section 776(b) of the Act. The Department has therefore relied, in part, on adverse facts available (AFA) in its countervailability determination with respect to two programs, and in calculating the subsidy rate for certain Banco de la Nacion Argentina loan programs.

<sup>4</sup> See Memorandum, "Countervailing Duty Investigation of Biodiesel from the Republic of Argentina: Verification of the Questionnaire Responses of the Government of the Republic of Argentina," dated September 29, 2017; Memorandum, "Countervailing Duty Investigation of Biodiesel from the Republic of Argentina: Verification of the Questionnaire Responses of LDC Argentina S.A.," dated September 29, 2017; and Memorandum, "Countervailing Duty Investigation of Biodiesel from Argentina: Verification of the Questionnaire Responses of Vicentin S.A.I.C.," dated September 29, 2017.

<sup>5</sup> Vicentin includes its cross-owned affiliates Oleaginosa San Lorenzo S.A. (San Lorenzo) and Los Amores S.A. (Los Amores).

For further information on the Department's application of AFA, as summarized above, see the section titled, "Use of Facts Otherwise Available and Adverse Inferences," in the Final Decision Memorandum.

### Changes Since the Preliminary Determination

Based on our analysis of the comments received from parties and the minor corrections presented, we made certain changes to the respondents' subsidy rate calculations set forth in the *Preliminary Determination*. For a discussion of these changes, see the Final Decision Memorandum and the Final Calculation Memoranda.<sup>6</sup>

### All-Others Rate

In accordance with section 705(c)(1)(B)(i)(I) of the Act, the Department calculated a countervailable subsidy rate for the individually investigated exporters/producers of the subject merchandise. Consistent with sections 705(c)(1)(B)(i)(I) and 705(c)(5)(A) of the Act, the Department also calculated an estimated "all-others" rate for exporters and producers not individually investigated. Section 705(c)(5)(A)(i) of the Act provides that the "all-others" rate shall be an amount equal to the weighted-average of the countervailable subsidy rates established for individually investigated exporters and producers, excluding any rates that are zero or *de minimis* or any rates determined entirely under section 776 of the Act. In this investigation, the Department calculated individual estimated countervailable subsidy rates for LDC Argentina and Vicentin that are not zero, *de minimis*, or based entirely on facts otherwise available. Therefore, the Department calculated the all-others rate using a simple average of the individual estimated subsidy rates calculated for the examined respondents.<sup>7</sup>

<sup>6</sup> See Final Decision Memorandum; see also See Memorandum, "Countervailing Duty Investigation of Biodiesel from Argentina: Final Calculations for LDC Argentina S.A.," dated November 6, 2017 (LDC Argentina Final Calculation Memorandum); see also Memorandum, "Countervailing Duty Investigation of Biodiesel from Argentina: Final Calculations for Vicentin S.A.I.C. et Alia," dated November 6, 2017 (Vicentin Final Calculation Memorandum).

<sup>7</sup> With two respondents under examination, the Department normally calculates (A) a weighted-average of the estimated subsidy rates calculated for the examined respondents; (B) a simple average of the estimated subsidy rates calculated for the examined respondents; and (C) a weighted-average of the estimated subsidy rates calculated for the examined respondents using each company's publicly-ranged U.S. sale quantities for the merchandise under consideration. The Department then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all

### Final Determination

The Department determines the total estimated countervailable subsidy rates to be:

Company	Subsidy rate (percent)
LDC Argentina S.A. <sup>8</sup> .....	72.28
Vicentin S.A.I.C. <sup>9</sup> .....	71.45
All-Others .....	71.87

### Disclosure

The Department will disclose the calculations performed within five days of the date of publication of this notice to parties in this proceeding in accordance with 19 CFR 351.224(b).

### Continuation of Suspension of Liquidation

In accordance with sections 703(d) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all appropriate entries of biodiesel from Argentina, which were entered, or withdrawn from warehouse, for consumption on or after August 28, 2017, the date of publication of the *Preliminary Determination*. Further, the Department will instruct CBP to require a cash deposit for such entries of merchandise. Because the Department finds critical circumstances no longer exist for LDC Argentina and Vicentin, the Department will terminate the retroactive suspension of liquidation ordered at the *Preliminary Determination* and release any cash deposits that were required during the period May 30, 2017 through August 27, 2017, consistent with section 705(c)(3) of the Act.

other producers and exporters. See, e.g., *Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part*, 75 FR 53661, 53663 (September 1, 2010). However, complete publicly ranged sales data are not available on the record of this investigation. Therefore, the Department has based the all-others rate on a simple average of the estimated subsidy rates calculated for the examined respondents. For a complete analysis of the data, please see the All-Others' Rate Calculation Memorandum.

<sup>8</sup> As discussed in the Preliminary Decision Memorandum, the Department has found the following companies to be cross-owned with LDC Argentina S.A.: LDC Semillas S.A., Semillas del Rosario S.A.

<sup>9</sup> As discussed in the Preliminary Decision Memorandum, the Department has found the following companies to be cross-owned with Vicentin S.A.I.C.: Oleaginosa San Lorenzo S.A., Los Amores S.A.

## International Trade Commission Notification

In accordance with section 705(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of countervailable subsidies. Because the final determination in this proceeding is affirmative, in accordance with section 705(b) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of biodiesel from Argentina no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue a CVD order directing CBP to assess, upon further instruction by the Department, countervailing duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, as discussed above in the "Continuation of Suspension of Liquidation" section.

## Notification Regarding Administrative Protective Orders

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

This determination is issued and published in accordance with sections 705(d) and 777(i) of the Act.

Dated: November 6, 2017.

Comment 9: Whether the Department Correctly Calculated LDC Argentina's Benefit From the General Lagos DRel Convenio

Comment 10: Whether "Pacto Fiscal" Confers Countervailable Benefits to LDC Argentina

### XI. Conclusion

## Appendix II

### Scope of the Investigation

The product covered by this investigation is biodiesel, which is a fuel comprised of mono-alkyl esters of long chain fatty acids derived from vegetable oils or animal fats, including biologically-based waste oils or greases, and other biologically-based oil or fat sources. The investigation covers biodiesel in pure form (B100) as well as fuel mixtures containing at least 99 percent biodiesel by volume (B99). For fuel mixtures containing less than 99 percent biodiesel by volume, only the biodiesel component of the mixture is covered by the scope of the investigation.

Biodiesel is generally produced to American Society for Testing and Materials International (ASTM) D6751 specifications, but it can also be made to other specifications. Biodiesel commonly has one of the following Chemical Abstracts Service (CAS) numbers, generally depending upon the feedstock used: 67784-80-9 (soybean oil methyl esters); 91051-34-2 (palm oil methyl esters); 91051-32-0 (palm kernel oil methyl esters); 73891-99-3 (rapeseed oil methyl esters); 61788-61-2 (tallow methyl esters); 68990-52-3 (vegetable oil methyl esters); 129828-16-6 (canola oil methyl esters); 67762-26-9 (unsaturated alkylcarboxylic acid methyl ester); or 68937-84-8 (fatty acids, C12-C18, methyl ester).

The B100 product subject to the investigation is currently classifiable under subheading 3826.00.1000 of the Harmonized Tariff Schedule of the United States (HTSUS), while the B99 product is currently classifiable under HTSUS subheading

3826.00.3000. Although the HTSUS subheadings, ASTM specifications, and CAS numbers are provided for convenience and customs purposes, the written description of the scope is dispositive.

BILLING CODE 3510-DS-P

## DEPARTMENT OF COMMERCE

### International Trade Administration

[A-469-817]

### Ripe Olives From Spain: Postponement of Preliminary Determination in the Less-Than-Fair-Value Investigation

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**DATES:** Applicable November 16, 2017.

**FOR FURTHER INFORMATION CONTACT:** Catherine Cartsos at (202) 482-1757, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

### SUPPLEMENTARY INFORMATION:

#### Background

On July 12, 2017, the Department of Commerce (the Department) initiated a less-than-fair-value (LTFV) investigation of imports of ripe olives from Spain.<sup>1</sup> Currently, the preliminary determination is due no later than November 29, 2017.

#### Postponement of Preliminary Determination

Section 733(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to issue the preliminary determination in a LTFV investigation within 140 days after the date on which the Department initiated the investigation. However, section 733(c)(1)(A)(b)(1) of the Act permits the Department to postpone the preliminary determination until no later than 190 days after the date on which the Department initiated the investigation if: (A) The petitioner<sup>2</sup> makes a timely request for a postponement; or (B) the Department concludes that the parties concerned are cooperating, that the investigation is extraordinarily complicated, and that additional time is necessary to make a preliminary determination. Under 19 CFR

<sup>1</sup> See *Ripe Olives from Spain: Initiation of Investigation*, 82 FR 33054 (July 19, 2017) (*Initiation Notice*).

<sup>2</sup> The petitioner is the Coalition for Fair Trade in Ripe Olives.

351.205(e), the petitioner must submit a request for postponement 25 days or more before the scheduled date of the preliminary determination and must state the reasons for the request. The Department will grant the request unless it finds compelling reasons to deny the request.

On October 11, 2017, the petitioner submitted a timely request that the Department postpone the preliminary determination in the LTFV investigation.<sup>3</sup> The petitioner stated that it requests postponement because the respondents selected for individual examination are still filing their response to the Department's questionnaire and the Department needs additional time to fully analyze the questionnaire responses, request any necessary clarifications, and determine antidumping margins.<sup>4</sup>

For the reasons stated above and because there are no compelling reasons to deny the request, the Department, in accordance with section 733(c)(1)(A) of the Act, is postponing the deadline for the preliminary determination by 50 days (*i.e.*, 190 days after the date on which this investigation was initiated). As a result, the Department will issue its preliminary determination no later than January 18, 2018. In accordance with section 735(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determination of this investigation will continue to be 75 days after the date of publication of the preliminary determination, unless postponed at a later date.

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: November 9, 2017.

**Gary Taverman,**

*Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.*

[FR Doc. 2017-24848 Filed 11-15-17; 8:45 am]

**BILLING CODE 3510-DS-P**

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**RIN 0648-XF785**

**Magnuson-Stevens Fishery Conservation and Management Act; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; request for comments.

**SUMMARY:** NMFS has determined that twelve exempted fishing permit (EFP) applications warrant further consideration and is requesting public comment on the applications. All EFP applicants request an exemption from a single prohibition (the use of unauthorized gear to harvest HMS) under the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species (HMS FMP) to test the effects and efficacy of using deep-set buoy gear (DSBG) and deep-set linked buoy gear (DSLBG) to harvest swordfish and other highly migratory species (HMS) off of the U.S. West Coast.

**DATES:** Comments must be submitted in writing by December 18, 2017.

**ADDRESSES:** You may submit comments on this document, identified by NOAA-NMFS-2017-0130, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to [www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2017-0130](http://www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2017-0130), click the "Comment Now!" icon, complete the required fields, and enter or attach your comments. EFP applications will be available under Relevant Documents through the same link.

- *Mail:* Attn: Chris Fanning, NMFS West Coast Region, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802. Include the identifier "NOAA-NMFS-2017-0130" in the comments.

*Instructions:* Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (*e.g.*, name, address, etc.), confidential business information, or otherwise sensitive information

submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

**FOR FURTHER INFORMATION CONTACT:**

Chris Fanning, NMFS, West Coast Region, 562-980-4198.

**SUPPLEMENTARY INFORMATION:** DSBG fishing trials have occurred for the past seven years (2011-2015, research years; 2015-2017, EFP years) in the U.S. West Coast Exclusive Economic Zone (EEZ) off California. The data collected from this fishing activity have demonstrated DSBG to achieve about a 95% marketable catch composition (75% swordfish, 3% opah, and 17% marketable sharks). Non-marketable catch rates have remained low and all non-marketable catch were released alive. Due to DSBG being actively tended, strikes are capable of being detected within minutes of a hook on the line; as a result, all catches can be tended quickly, with catch brought onboard the vessel in good condition. To date, DSBG has had two interactions with protected species, both elephant seals which were not seriously injured and were released alive due to the strike detection of the gear. These species are protected by the Marine Mammal Protection Act, but are not listed as threatened or endangered under the Endangered Species Act.

DSLBG trials produced similar data to DSBG activities with DSLBG fishing activity occurring over a 40-day period in 2015-2016. Swordfish and other marketable species have represented about 90% of the catch (68% swordfish, 2% opah, 5% escolar, and 16% marketable sharks). Non-marketable species are released alive due to quick DSLBG strike detection and active gear tending. Fishing is still occurring with DSLBG; however, no reports have been submitted from the 2016-2017 year. To date, there have been no interactions with protected species using DSLBG.

At its September 2017 meeting, the Pacific Fishery Management Council (Council) received twelve additional applications for EFPs in time for review and recommended that NMFS consider issuing these EFPs to authorize use of DSBG and/or DSLBG (see Table 1).

NMFS is requesting public comment on the twelve applications recommended for issuance by the Council. If all applications were approved, the EFPs would allow up to thirteen vessels to fish with DSBG and four vessels to fish with DSLBG, throughout the duration of each EFP, in the U.S. West Coast EEZ with permitted exemption from the prohibitions of the

<sup>3</sup> See Letter from the petitioner titled "Ripe Olives from Spain Request for Postponement of Preliminary Determination," dated October 11, 2017.

<sup>4</sup> *Id.*

HMS FMP pertaining to non-authorized gear types. Aside from the exemption described above, vessels fishing under an EFP would be subject to all other regulations implemented in the HMS

FMP, including measures to protect sea turtles, marine mammals, and seabirds. For up-to-date information on HMS EFPs, please visit NMFS West Coast Region’s “Status of Exempted Fishing

Permits” Web page ([http://www.westcoast.fisheries.noaa.gov/fisheries/migratory\\_species/status\\_exempted\\_permits.html](http://www.westcoast.fisheries.noaa.gov/fisheries/migratory_species/status_exempted_permits.html)).

NMFS will consider all public comments submitted in response to this **Federal Register** Notice prior to issuance of any EFP. Additionally, NMFS will analyze the effects of issuing EFPs in accordance with the National Environmental Policy Act and NOAA’s Administrative Order 216–6, as well as for compliance with other applicable laws, including Section 7(a)(2) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*), which requires the agency to consider whether the proposed action is likely to jeopardize the continued existence and recovery of any endangered or threatened species or result in the destruction or adverse modification of critical habitat.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: November 13, 2017.

**BILLING CODE 3510–22–P**

**BUREAU OF CONSUMER FINANCIAL PROTECTION**

**Fair Credit Reporting Act Disclosures**

**AGENCY:** Bureau of Consumer Financial Protection.

**ACTION:** Notice regarding charges for certain disclosures under the Fair Credit Reporting Act.

**SUMMARY:** The Bureau of Consumer Financial Protection (Bureau) announces that the ceiling on allowable charges under the Fair Credit Reporting Act (FCRA) will remain unchanged at \$12.00, effective for 2018. The Bureau is required to increase the \$8.00 amount referred to in the FCRA on January 1 of each year, based proportionally on changes in the Consumer Price Index for All Urban Consumers (CPI–U), with fractional changes rounded to the nearest fifty cents. The CPI–U increased 53.11 percent between September 1997, when the FCRA amendments took effect, and September 2017. This increase in the CPI–U, and the requirement that any increase be rounded to the nearest fifty cents, result in a maximum allowable charge of \$12.00.

**DATES:** Effective January 1, 2018.

**FOR FURTHER INFORMATION CONTACT:** Monique Chenault, Paralegal Specialist, Office of Regulations, Consumer Financial Protection Bureau, 1700 G Street NW., Washington, DC 20552, at (202) 435–7700.

**SUPPLEMENTARY INFORMATION:** Section 612(f)(1)(A) of the Fair Credit Reporting Act (FCRA) provides that a consumer reporting agency may charge a consumer a reasonable amount for making a disclosure to the consumer pursuant to section 609 of the FCRA. Section 612(f)(1)(A) of the FCRA

provides that, where a consumer reporting agency is permitted to impose a reasonable charge on a consumer for making a disclosure to the consumer pursuant to section 609 of the FCRA, the charge shall not exceed \$8.00 and shall be indicated to the consumer before making the disclosure. Section 612(f)(2) of the FCRA states that the Bureau shall increase the \$8.00 maximum amount on January 1 of each year, based proportionally on changes in the Consumer Price Index, with fractional changes rounded to the nearest fifty cents. The Bureau’s calculations are based on the CPI–U, which is the most general Consumer Price Index and covers all urban consumers and all items.

Section 612(a) of the FCRA gives consumers the right to a free disclosure upon request once every 12 months. The maximum allowable charge established by this notice does not apply to requests made under that provision. The charge does apply when a consumer who orders a file disclosure has already received a free annual disclosure and does not otherwise qualify for an additional free disclosure.

The Bureau is using the \$8.00 amount set forth in section 612(f)(1)(A)(i) of the FCRA as the baseline for its calculation of the increase in the ceiling on reasonable charges for certain disclosures made under section 609 of the FCRA. Since the effective date of section 612(a) was September 30, 1997, the Bureau calculated the proportional increase in the CPI–U from September

<sup>1</sup> Public Law 111–203, 124 Stat. 1376 (2010), <https://www.treasury.gov/about/organizational-structure/offices/Documents/Dodd%20Frank%20Act.pdf>.

1997 to September 2017. The Bureau then determined what modification, if any, from the original base of \$8.00 should be made effective for 2018, given the requirement that fractional changes be rounded to the nearest fifty cents.

Between September 1997 and September 2017, the CPI-U increased by 53.11 percent from an index value of 161.2 in September 1997 to a value of 246.8 in September 2017. An increase of 53.11 percent in the \$8.00 base figure would lead to a figure of \$12.25. However, because the statute directs that the resulting figure be rounded to the nearest \$0.50, the maximum allowable charge is \$12.00. The Bureau therefore determines that the maximum allowable charge for the year 2018 will remain at \$12.00, effective January 1, 2018.

Dated: November 7, 2017.

## **BUREAU OF CONSUMER FINANCIAL PROTECTION**

### **Final Language Access Plan for the Consumer Financial Protection Bureau**

**AGENCY:** Bureau of Consumer Financial Protection.

**ACTION:** Notice of final language access plan.

**SUMMARY:** Consistent with Executive Order 13166 (Aug. 11, 2000), the Consumer Financial Protection Bureau (Bureau or CFPB) is committed to providing persons with limited English proficiency (LEP) meaningful access to its programs and services. The Language Access Plan describes the Bureau's policy and how the Bureau's language access activities are implemented across the Bureau's operations, programs, and services.

**DATES:** This information is current as of November 13, 2017.

**FOR FURTHER INFORMATION CONTACT:** For general inquiries or any additional information, please contact Monica Jackson, Office of the Executive Secretary, at 202-435-7275. For information about the Final Language Access Plan, please contact Meina Banh, Office of Financial Education, at 202-435-7892.

**SUPPLEMENTARY INFORMATION:**

### **I. Background**

The Dodd-Frank Wall Street Reform and Consumer Protection Act<sup>1</sup> (Dodd-Frank Act) established the Bureau of Consumer Financial Protection. Section 1021 of the Dodd-Frank Act provides that the purpose of the Bureau is to “implement, and where applicable, enforce Federal consumer financial law consistently for the purpose of ensuring that all consumers have access to markets for consumer financial products and services and that markets for consumer financial products and services are fair, transparent, and competitive.”<sup>2</sup>

Listening and responding to consumers is central to the Bureau's purpose of ensuring that all consumers have access to consumer financial products and services. Since its inception, the Bureau has provided consumers with numerous ways to make their voices heard. Consumers nationwide have engaged with the Bureau through public field hearings, listening events, roundtables, town halls, online through the Web site ConsumerFinance.gov, and through the Bureau's Office of Consumer Response. The Bureau has also sought input from a range of stakeholders, including financial educators, community-based organizations, financial institutions, and others about challenges that consumers face, effective approaches to overcoming those challenges, and what the Bureau can do to improve the financial decision-making process of consumers to help them better navigate the marketplace of financial products and services to reach their own goals.<sup>3</sup> This engagement informs the work of the Bureau.

This engagement would be incomplete without efforts to include limited English proficiency (LEP) persons. More than 65 million people, or about 21 percent of the U.S. population over the age of five, speak a language other than English at home.<sup>4</sup> Of this, more than 26 million people in the U.S. have limited proficiency in English.<sup>5</sup> Individuals are generally considered to have limited English

proficiency if they speak a language other than English at home and speak English less than “very well.”<sup>6</sup> Spanish is the most commonly spoken non-English language at home with approximately 40 million speakers.<sup>7</sup> Spanish speakers also constitute the largest share of the LEP population, followed by Chinese, Vietnamese, Korean, and Tagalog speakers. These five languages are spoken by more than 78 percent of LEP individuals. Studies by federal agencies and other stakeholders have highlighted that the receipt of materials in consumers' native languages is essential to increasing these consumers' knowledge about financial products and services.

The Federal Deposit Insurance Corporation's (FDIC) biennial survey on unbanked and underbanked households consistently shows that households where Spanish is the only language spoken were unbanked at five times the rate of households where Spanish is not the only language spoken.<sup>8</sup> The most recent survey found that 31 percent of Spanish-speaking households were unbanked compared to 6.5 percent of other households.<sup>9</sup> Nearly a third of Spanish-speaking households in the survey were underbanked,<sup>10</sup> compared to a fifth of other households. Household members who speak English as a second language, or who cannot read English, are particularly disadvantaged in their ability to review and understand financial documents and other important notifications.<sup>11</sup> The CFPB conducted research on the financial education needs of immigrants, including those with limited English proficiency.<sup>12</sup> The CFPB identified one of the challenges to be that many technical terms common to the U.S. financial system either do not have equivalent terms in languages

<sup>5</sup> *Id.*

<sup>6</sup> See Paul Siegel et al., U.S. Census Bureau,

other than English or do have equivalent terms that, when translated, may confuse LEP consumers. Further, the Government Accountability Office (GAO) examined the extent to which LEP individuals are impeded in their financial literacy and conduct of financial affairs.<sup>13</sup> The GAO's report indicated that a lack of proficiency in English can create significant barriers to financial literacy and to conducting basic financial affairs.<sup>14</sup>

Consistent with Executive Order 13166 and the Bureau's mission, the Bureau adopts this Final Language Access Plan to provide LEP individuals meaningful access to the Bureau's services.

## II. Summary the Final Language Access Plan

On October 8, 2014, the CFPB released a Proposed Language Access Plan for public comment.<sup>15</sup> The comment period closed on January 6, 2015. The CFPB received 31 comments on the Proposed Language Access Plan. Commenters provided suggestions to the Bureau about improving outreach to LEP communities, including suggestions for improving the gathering of data about the linguistic needs and preferences of consumers accessing the CFPB's programs and resources; hiring multilingual staff; improving the Bureau's data collection on race and ethnicity; and suggestions for the Bureau to apply supervisory and enforcement authorities to language access-related activities.

The Bureau considered the comments it received. Since the release of the Proposed Language Access Plan, the Bureau has made a number of additional efforts to provide LEP consumers meaningful access to information produced by the Bureau. The final plan is also informed by those efforts. The Bureau considered the following factors in drafting this Final Language Access Plan: (1) The number or proportion of LEP persons who would not receive the Bureau's services without efforts to remove language barriers; (2) the frequency and number of contacts by LEP persons with the Bureau's services; (3) the nature and importance of the services provided by the Bureau to people's financial lives; and (4) the resources available to the Bureau to

provide services to LEP persons. Under the Language Access Plan, the Bureau provides LEP individuals access to information, services, activities, and programs by translating consumer-facing documents into select foreign languages and handling complaints from consumers about consumer financial products and services in more than 180 languages.

## III. Related Matters of Interest

### A. Language Access Task Force

The Bureau has created a Language Access Task Force, an internal cross-divisional working group aimed at developing and executing a Bureau-wide strategy to provide LEP consumers meaningful access to information produced by the Bureau. The Language Access Task Force coordinates internally, ensures consistency within the Bureau in its communications with LEP individuals, and informs the Bureau's work to engage with LEP consumers.

### B. Handling Complaints From Consumers About Consumer Financial Products and Services

The Bureau's Office of Consumer Response hears directly from consumers about the challenges they face in the marketplace and brings consumers' concerns to the attention of consumer financial product or service providers. The Office of Consumer Response currently accepts complaints about a wide variety of financial products and services and can assist consumers with complaints in more than 180 languages. Consumers have the choice to receive written communications in Spanish. The Bureau may also refer consumers to other regulators and resources, as needed.

### C. Incorporation of Translation and Interpretation in Bureau Supervision and Enforcement

The Bureau utilizes translation and interpretation services, as appropriate, during the course of supervisory examinations and enforcement investigations. The Bureau may utilize these services when conducting interviews and consulting with LEP consumer witnesses, whistleblowers, and employees of regulated entities; when reviewing non-English documents and telephone call recordings; and when providing information to the public on matters that may affect LEP consumers, as appropriate.

### D. Informing and Educating Consumers in the Financial Marketplace

One of the Bureau's goals is to give consumers practical, actionable

information that they can use in pursuing their own financial goals and in making financial decisions. The Bureau offers information and tools to help consumers build the financial knowledge and skills that they need to make well-informed financial decisions for themselves and their families to serve their own financial goals. For the LEP community, this includes access in consumers' native languages to consumer financial education materials. The Bureau offers this information directly through its Web site and its Spanish-translated Web site and has also made it available to LEP consumers through community service channels and at community roundtables throughout the country.

The Bureau offers free printed financial education materials translated into various languages for LEP consumers, which are distributed by both the Bureau and others who serve LEP consumers. To date, the CFPB has routinely translated its most frequently requested brochures into Spanish. Certain publications are also available in Chinese, French, Haitian Créole, Tagalog, Chinese, Korean, Vietnamese, Russian, and Arabic. For download or free bulk orders, interested persons can visit [pueblo.gpo.gov/CFPBPubs/CFPBPubs.php](http://pueblo.gpo.gov/CFPBPubs/CFPBPubs.php).

### Web-Based Tools and Resources for Consumers

- *Ask CFPB*: An interactive online tool that gives consumers answers to questions about financial products and services, including credit cards, mortgages, student loans, bank accounts, credit reports, payday loans, and debt collection. *Ask CFPB* is available in Spanish at [consumerfinance.gov/es/obtener-respuestas/](http://consumerfinance.gov/es/obtener-respuestas/).

- *CFPB en Español*: CFPB en Español provides Spanish-speaking consumers a central point of access to the CFPB's most-used consumer resources, translated into Spanish. This page offers *Ask CFPB en Español*; a consumer complaints page that highlights the complaint process and the phone number consumers can call to submit a complaint in Spanish; an "about us" page with Spanish-language videos and introductory content about how the CFPB works to protect consumers; and a home page that offers details on the CFPB's resources for consumers in search of a mortgage and those who already own a home. *CFPB en Español* can be found at [consumerfinance.gov/es/](http://consumerfinance.gov/es/).

- *Submit a complaint*: To submit a complaint about a consumer financial product or service, consumers can visit

<sup>13</sup> GAO, Consumer Finance: Factors Affecting the Financial Literacy of Individuals with Limited English Proficiency (2010), <http://www.gao.gov/products/GAO-10-518>.

<sup>14</sup> See *id.* at n. 8.

<sup>15</sup> 79 FR 60840 (Oct. 8, 2014), <https://www.federalregister.gov/documents/2014/10/08/2014-24122/proposed-language-access-plan-for-the-consumer-financial-protection-bureau>.

[consumerfinance.gov/complaint/](http://consumerfinance.gov/complaint/) or call toll-free at (855) 411-CFPB (2372). The CFPB accepts complaints in more than 180 languages. The CFPB forwards the complaint to the company and works to get a response from them—generally within 15 days. When the company responds, the consumer can review the response and give the CFPB feedback. If another government agency would be better able to assist, the CFPB forwards the complaint to that agency and lets the consumer know.

- *Planning for Retirement*: This is an interactive educational online tool designed to help consumers make an informed decision about when to claim their Social Security retirement benefits. The tool gives consumers a rough estimate of their monthly benefit, shows how their monthly benefit changes depending on the age at which they claim, estimates what they can expect to receive at different ages, and provides tips relevant to their situation.

*Planifique para su Jubilación* is the Spanish version of *Planning for Retirement*, which can be found at [consumerfinance.gov/retirement/before-you-claim/es/](http://consumerfinance.gov/retirement/before-you-claim/es/). The English version can be found at [consumerfinance.gov/retirement/before-you-claim/](http://consumerfinance.gov/retirement/before-you-claim/).

- *Your home loan toolkit: A step-by-step guide*: The Dodd-Frank Act amended the Real Estate Settlement Procedures Act (RESPA) to, among other things, provide that the Bureau's Director shall "prepare the booklet in various languages and cultural styles, as the Director determines to be appropriate, so that the booklet is understandable and accessible to homebuyers of different ethnic and cultural backgrounds."<sup>16</sup> To support this mandate, the toolkit guides consumers through the process of shopping for a mortgage and buying a home and is available from the Bureau in both English and Spanish.<sup>17</sup>

- *Debt collection action letters*: The Bureau published five different action letters in Spanish that provided consumers with instructions on how to send an English language version of the same letter to communicate with a debt collector which can be found here [consumerfinance.gov/consumer-tools/debt-collection/](http://consumerfinance.gov/consumer-tools/debt-collection/).

Web-Based Tools and Resources for Financial Educators and Others Who Work With Consumers

- *Your Money, Your Goals*: A financial empowerment toolkit that organizations can use to incorporate financial capability information and tools into their discussions with the people they serve to help them strengthen their financial capability and personal money management skills. The toolkit is available in English and Spanish at [consumerfinance.gov/practitioner-resources/your-money-your-goals/](http://consumerfinance.gov/practitioner-resources/your-money-your-goals/).

- *Money as You Grow*: This is a Web site for parents and caregivers who want to help their children develop money skills. The *Money as You Grow* Web site identifies key stages of childhood financial development, based on the CFPB's developmental model for youth financial capability. The Web site offers practical, age-appropriate activities and conversation starters designed to help parents and caregivers learn techniques for encouraging their kids to develop positive financial knowledge, skills, and attitudes. The Web site is available in English at [consumerfinance.gov/consumer-tools/money-as-you-grow/](http://consumerfinance.gov/consumer-tools/money-as-you-grow/) and in Spanish at [consumerfinance.gov/es/el-dinero-mientras-creces/](http://consumerfinance.gov/es/el-dinero-mientras-creces/).

CFPB Brochures

- The CFPB has created a range of publications for consumers that provide straightforward information about money management and other financial issues. These publications include brochures about checking a credit report, avoiding checking account fees, tax time savings, how to avoid foreclosure, what consumers can do when they are unable to pay credit card bills, and other topics. The CFPB makes many of these resources available in English, Spanish, and eight other languages and provides them for download or free bulk ordering at [pueblo.gpo.gov/CFPBPubs/CFPBPubs.php](http://pueblo.gpo.gov/CFPBPubs/CFPBPubs.php).

- *CFPB bookmarks*: Two bookmarks highlight the *Ask CFPB* tool and encourage consumers to share their experiences with financial products through the CFPB's *Tell Your Story* tool. The bookmarks are also available in Spanish.

- *Submit a complaint*: This brochure explains how to submit a complaint to the CFPB. It covers contact information, the consumer financial products and services about which the CFPB takes complaints, and what happens after a consumer submits a complaint. This brochure is also available in Spanish.

Accounts

- *Newcomer's Guides to Managing Money*: The guides provide information about ways to pay bills, receive money, open a bank account, and compare financial products. These guides are available in English, Spanish, Arabic, Chinese, Tagalog, Vietnamese, Korean, Russian, French and Haitian Créole.

- *Know your overdraft options*: This brochure explains debit card and ATM overdraft coverage and fees as well as tips and options to reduce or avoid fees. This brochure is also available in Spanish.

- *Keep a lid on checking account fees*: This brochure outlines six steps to help consumers reduce checking account fees and is also available in Spanish.

- *Moving your checking account checklist*: This brochure is a 10-step checklist to help consumers close their current checking account and open a new checking account. This brochure is also available in Spanish.

Credit

- *Act fast if you can't pay your credit cards*: This brochure provides three steps consumers can take when they do not have enough money to pay their credit card bill and information about how to avoid debt-relief scams. This brochure is also available in Spanish.

- *Credit discrimination is illegal*: This brochure describes warning signs of credit discrimination and what consumers can do if they believe they have been discriminated against. This brochure is also available in Spanish.

- *How to rebuild your credit*: This brochure outlines steps that can help you recover from a financial challenge that hurt your credit and is also available in Spanish.

- *Helping consumers understand credit discrimination*: This brochure helps consumers better understand their rights under the Equal Credit Opportunity Act (ECOA). This brochure is also available in Spanish for download only.

- *Find the best credit card for you*: This brochure highlights four steps to shopping for a credit card, provides definitions of credit card terms, and is also available in Spanish.

- *How to stop mystery credit card fees*: This consumer advisory educates consumers about credit card add-on services and is also available in Spanish.

- *Check your credit report at least once a year*: This brochure describes how consumers can check their credit reports from the three nationwide credit reporting companies for free to find and

<sup>16</sup> 12 U.S.C. 2604(a).

<sup>17</sup> The booklet is available in English at [http://files.consumerfinance.gov/f/201503\\_cfpb\\_your-home-loan-toolkit-web.pdf](http://files.consumerfinance.gov/f/201503_cfpb_your-home-loan-toolkit-web.pdf) and in Spanish at [http://files.consumerfinance.gov/f/201507\\_cfpb\\_your-home-loan-toolkit-web-spanish.pdf](http://files.consumerfinance.gov/f/201507_cfpb_your-home-loan-toolkit-web-spanish.pdf).

dispute mistakes, update personal information, and guard against identity theft. This brochure is also available in Spanish.

- *You have a right to see specialty credit reports:* Specialty credit reporting companies collect and report credit history information about consumers. This consumer advisory informs consumers about their right to get free reports from these companies every 12 months and is also available in Spanish.

- *How to fix mistakes in your credit card bill:* This brochure outlines five steps to dispute incorrect charges or fees on a credit card bill and is also available in Spanish.

- *Know your rights when a debt collector calls:* This brochure highlights steps consumers can take when a debt collector calls and explains what to ask and how consumers can protect themselves. This brochure is also available in Spanish.

- *Understand your credit score:* This brochure explains what factors determine a credit score, what consumers can do to raise their score, and how to check credit reports and fix mistakes. This brochure is also available in Spanish.

- *Watch accounts closely when card data is hacked:* This brochure describes how consumers can keep a close eye on account activity and report suspicious transactions quickly and is also available in Spanish.

#### Money Management

- *Save some & spend some:* This brochure explains free and easy ways consumers can split their tax refunds between checking and savings accounts and purchase U.S. savings bonds so they can spend some and save some of their refunds. This brochure is also available in Spanish.

- *How to spot frauds and scams:* This brochure identifies common tactics that scammers use and is also available in Spanish.

- *Your disaster checklist:* This checklist helps consumers gather the financial information they would need after an emergency. It contains spaces for account information and customer service numbers as well as checklists of important documents they should have in case of an emergency. This checklist is also available in Spanish.

- *Choosing your student loan:* This brochure provides three steps to help guide consumers toward the student loans that are best for them and is also available in Spanish.

- *Manage your college money:* This brochure explains how to choose and manage an account for college money, so consumers can avoid unexpected fees

and get financial aid disbursements quickly. This brochure is also available in Spanish.

- *SAVED: Five steps for making financial decisions:* This brochure provides five steps to help consumers find the best deal when buying a financial product or service. This brochure is also available in Spanish.

#### Remittances

The Bureau's first substantive rule provided important new consumer protections to users of international money transfers, or remittances. Many of these users are LEP consumers who send money to family and friends abroad. The Bureau developed a comprehensive outreach and education campaign to educate consumers about the protections for remittance transfers. These materials are available in English, Spanish, Haitian Créole, Chinese, and Tagalog.

- *Remittance transfer rule factsheet for stakeholders:* This fact sheet is designed to help stakeholders such as financial counselors, instructors, and others understand and explain the remittance transfer rule and its protections for consumers. It explains when the rule applies, who is subject to the rule, what information consumers should receive, and what consumers can do if errors occur.

- *Send money abroad with more confidence flyer:* This flyer tells senders of remittance transfers that protections are available to them and provides the CFPB's phone number and web address for more information.

- *Send money abroad with more confidence poster:* This poster tells senders of remittance transfers that consumer protections are available to them and provides the CFPB's phone number and Web site address for more information.

- *Send money abroad with more confidence brochure:* This brochure outlines the consumer protections available to senders of remittance transfers. It tells consumers that not all companies that transmit money abroad are covered by the Federal rule.

- *Send money abroad with more confidence fact sheet:* This fact sheet provides a more detailed explanation of the consumer protections that apply when consumers send remittance transfers covered by the CFPB's remittance transfer rule.

#### Mortgages

- *Shopping for a mortgage? What you can expect under Federal rules:* This 18-page booklet explains the Federal rules that protect consumers when they are shopping for a new mortgage. This

booklet is also available in Spanish, Chinese, French, Haitian Créole, Korean, and Tagalog.

- *How to avoid foreclosure:* This brochure explains steps to take when having trouble paying the mortgage and is also available in Spanish.

- *Have a mortgage? What you can expect under Federal rules:* This 11-page booklet explains the Federal rules that protect consumers as they manage their mortgage payments. This booklet is also available in Spanish, Chinese, French, Haitian Créole, Korean, and Tagalog.

- *Considering a reverse mortgage?:* This brochure explains how a reverse mortgage works and outlines important questions consumers can ask when talking to a housing counselor or other adviser about their reverse mortgage options and alternatives. The CFPB also offers a plain-language guide to reverse mortgages for consumers on the CFPB's Web site in Spanish.<sup>18</sup> The guide highlights key decision points to help potential reverse mortgage borrowers assess the financial ramifications of securing a reverse mortgage.

- *Don't get scammed:* How to spot and avoid mortgage assistance and foreclosure relief scams: This brochure explains mortgage relief scams, offers tips on how to spot and avoid them, explains how to get help, and is also available in Spanish.

- *Ready to buy a home?:* This checklist of questions helps consumers understand whether they are financially prepared for the responsibility of homeownership and is also available in Spanish.

- *Should I refinance?:* This brochure helps homeowners consider warning signs about their current mortgage situation, review financial goals and potential outcomes, and determine whether refinancing their mortgage makes sense. This brochure is also available in Spanish.

#### Older Consumers

- *Know your financial adviser:* This brochure provides questions older consumers can ask to determine if their financial adviser is really an expert in senior financial planning and is also available in Spanish.

- *Managing someone else's money:* Guides for financial caregivers, particularly those who handle the finances of older Americans, to help them carry out their duties and responsibilities in managing someone else's money. This includes agents

<sup>18</sup> The Spanish guide can be found at [http://www.consumerfinance.gov/f/201411\\_cfpb\\_guide\\_considering-reverse-mortgage-guide\\_spanish.pdf](http://www.consumerfinance.gov/f/201411_cfpb_guide_considering-reverse-mortgage-guide_spanish.pdf).

under power of attorney, court-appointed guardians and conservators, trustees, and government-benefit fiduciaries (Social Security representative payees and VA fiduciaries). The guides explain the duties and responsibilities of people acting in each of these fiduciary roles, how to watch out for scams and financial exploitation, what to do if a family member or friend is a victim, and where to go for help. *Cómo Administrar el Dinero de Otras Personas*, the Spanish version, is a set of four guides for financial caregivers. These guides can be offered by community organizations around the country that interact with older adults, family members, or caregivers.<sup>19</sup>

- *Money Smart for Older Adults*: The CFPB and the FDIC collaborated to publish *Money Smart for Older Adults*, an instructor-led training about preventing and responding to elder financial exploitation such as scams and identity theft. It also includes resources on preparing financially for unexpected life events. This resource is available in English and in Spanish (*Money Smart para Adultos Mayores*).<sup>20</sup>

- *You have the right to be free from scams*: This is a placemat with consumer protection tips. The placemat can be used in meal delivery services, congregate care facilities, or be shared with family and friends. This resource is also available in Spanish.

#### Other

- *Unwrapping gift cards: Know the terms and avoid surprises*: This brochure explains the types of gift cards and the protections consumers have. It explains what consumers can do when they give or get gift cards in order to understand the terms and conditions. This brochure is also available in Spanish.

#### E. Outreach and Stakeholder Engagement

The Bureau works with key stakeholders within LEP communities, such as community-based organizations, to help make the consumers they serve aware of the Bureau's resources and tools. The Bureau holds meetings with

consumer groups, community service organizations, and financial institutions to discuss the challenges LEP consumers face.

Additional Bureau resources that can be utilized by all stakeholders include:

- *Language glossaries*: The Bureau published glossaries of financial terms translated from English into Spanish and Chinese as a resource tool. Stakeholders that may be interested in using this tool include financial educators, government agencies, financial service providers, and other organizations serving LEP consumers. The glossary of terms is not a mandate, guide, or a requirement.<sup>21</sup>

- *Field scan of financial education programs serving immigrant populations*: The Office of Financial Education conducted a field scan of programs, practices, and initiatives that serve immigrant populations. The field scan helps inform the Bureau's financial-education initiatives and raises visibility about the financial education challenges that many immigrants face. The field scan also outlines promising financial education strategies that financial education providers can use to better serve immigrants who seek their services and are part of their communities. The ultimate goal is to help consumers achieve their own financial goals. The field scan was released in summer 2016 and can be found at [consumerfinance.gov/data-research/research-reports/financial-education-programs-serving-immigrant-populations/](http://consumerfinance.gov/data-research/research-reports/financial-education-programs-serving-immigrant-populations/).

#### F. Language Access and Regulations

A few of the Bureau's major rules address language access by, in accordance with pre-existing law, permitting required disclosures to be provided in a language other than English, as long as the disclosures are also made available in English.<sup>22</sup> A few other Bureau rules provide more specific guidance about facilitating access for LEP consumers to markets for consumer financial products and services and helping ensure that such markets are fair, transparent, and competitive. For example, the Bureau's

TILA-RESPA Integrated Disclosure (TRID) Rule explicitly permits creditors to translate certain mortgage disclosures into languages other than English and provides consumer-tested Spanish language translations of those mortgage disclosures.<sup>23</sup> Pursuant to the Dodd-Frank Act, the Bureau's Remittance Transfer Rule provides that certain advertising, soliciting, or marketing of remittance transfer services in a foreign language triggers the requirement to provide remittance disclosures in that language.<sup>24</sup> The Bureau's Prepaid Rule, issued in October 2016, similarly provides that principally using a foreign language to, among other things, advertise, solicit, or market a prepaid account may trigger a requirement to provide certain disclosures in that language.<sup>25</sup>

#### IV. Regulatory Requirements

This Language Access Plan articulates the Bureau's commitment to providing LEP persons with meaningful access to its programs and services. It is therefore exempt from the notice and comment rulemaking requirements under the Administrative Procedure Act. See 5 U.S.C. 553(b).

Because no notice of proposed rulemaking is required, the Regulatory Flexibility Act does not require an initial or final regulatory flexibility analysis. See 5 U.S.C. 603(a), 604(a).

The Bureau has determined that this Language Access Plan does not impose any new or revise any existing recordkeeping, reporting, or disclosure requirements on covered entities or members of the public that would be collections of information requiring OMB approval under the Paperwork Reduction Act, 44 U.S.C. 3501-3521.

#### Final Language Access Plan

The text of the Final Language Access Plan follows:

Consistent with Executive Order 13166 (Aug. 11, 2000), this document establishes the Language Access Plan of the Consumer Financial Protection Bureau (the Bureau or CFPB) for providing meaningful access to the CFPB's services to limited English proficiency (LEP) persons (individuals who do not speak English as their primary language and who have a limited ability to speak, write, or understand English).

<sup>23</sup> See 12 CFR 1026.37(o)(5)(ii), 1026.38(t)(5)(viii), and appendix H-28.

<sup>24</sup> See 12 CFR 1005.31(g).

<sup>25</sup> See 81 FR 83934, 84334 (Nov. 22, 2016). This requirement may be found in Regulation E, 12 CFR 1005.18(b)(9), when the Prepaid Rule goes into effect.

<sup>19</sup> The English guides can be found at <https://www.consumerfinance.gov/consumer-tools/managing-someone-elses-money/>, and the Spanish guides can be found at <https://www.consumerfinance.gov/about-us/blog/resources-in-spanish-that-could-help-thousands-of-older-hispanics-spot-financial-exploitation-and-scams/>.

<sup>20</sup> The English guides can be found at <https://www.fdic.gov/consumers/consumer/moneysmart/olderadult.html>, and the Spanish guides can be found at <https://www.fdic.gov/consumers/consumer/moneysmart/mayores.html>.

<sup>21</sup> The CFPB's Glossary of English-Spanish Financial Terms can be found at [https://www.consumerfinance.gov/documents/5542/cfpb\\_adult-fin-ed\\_spanish-style-guide-glossary.pdf](https://www.consumerfinance.gov/documents/5542/cfpb_adult-fin-ed_spanish-style-guide-glossary.pdf), and The CFPB's Glossary of English-Chinese Financial Terms can be found at [https://www.consumerfinance.gov/documents/5540/cfpb\\_adult-fin-ed\\_chinese-style-guide-glossary.pdf](https://www.consumerfinance.gov/documents/5540/cfpb_adult-fin-ed_chinese-style-guide-glossary.pdf).

<sup>22</sup> See, e.g., 12 CFR 1002.4(e) (Regulation B), 1005.4(a)(2) (Regulation E), 1024.32(a)(2) (Regulation X), and 1026.27 (Regulation Z). Most Bureau regulations may be found at <https://www.consumerfinance.gov/eregulations/>.

The CFPB is committed to the accessibility of its services to LEP persons. In developing this Language Access Plan, the CFPB engaged stakeholders in October 2014 by releasing a Proposed Language Access Plan for public comment to understand the opportunities to serve LEP persons and to ensure LEP individuals have access to the CFPB's programs and services.

To ensure meaningful access, the Bureau considers the following factors: (1) The number or proportion of LEP persons who would not receive the Bureau's services without efforts to remove language barriers; (2) the frequency and number of contacts by LEP persons with the Bureau's services; (3) the nature and importance of the services provided by the Bureau to people's financial lives; and (4) the resources available to the Bureau (including cost-benefit analysis) to provide services to LEP persons.

The CFPB provides LEP individuals with access to information, services, activities, and programs through the following activities:

#### Offering Translated Consumer-Facing Brochures

The Bureau translates selected consumer-facing brochures into the most frequently encountered languages, as established by U.S. Census Bureau data or based on specific issues affecting a particular group of LEP individuals. The Bureau publishes a wider range of consumer-facing brochures in Spanish, which accounts for the second-largest language group in the United States. Translating public-facing brochures into the languages most frequently encountered is important when reaching LEP individuals.<sup>26</sup> Spanish speakers constitute nearly 64 percent of the LEP population, so the Bureau translates many consumer-facing materials into Spanish.<sup>27</sup> The CFPB has also translated brochures, fact sheets, and other materials about certain topics into Chinese, French, French Créole, Korean, Tagalog, Vietnamese, Russian, and Arabic. The Bureau reviews translated materials to ensure quality and accuracy.

#### Handling Complaints From Consumers About Consumer Financial Products and Services in Multiple Languages

The Bureau's Office of Consumer Response hears directly from consumers about the challenges they face in the

marketplace and brings consumers' complaints to the attention of consumer financial product or service providers. The CFPB currently accepts complaints about a wide variety of financial products and services and can assist consumers with complaints in more than 180 languages. Consumers have the choice to receive written communications in Spanish. The Bureau may also refer consumers to other regulators and resources, as needed.

Dated: November 13, 2017.

**BILLING CODE 4810-AM-P**

## DEPARTMENT OF EDUCATION

### Submission of Data by State Educational Agencies; Submission Dates for State Revenue and Expenditure Reports for Fiscal Year 2017, Revisions to Those Reports, and Revisions to Prior Fiscal Year Reports

**AGENCY:** National Center for Education Statistics, Institute of Education Sciences, Department of Education.

**ACTION:** Notice.

**SUMMARY:** The Secretary announces dates for State educational agencies (SEAs) to submit expenditure and revenue data and average daily attendance statistics on ED Form 2447 (the National Public Education Financial Survey (NPEFS)) for fiscal year (FY) 2017, revisions to those reports, and revisions to reports for previous fiscal years. The Secretary sets these dates to ensure that data are available to serve as the basis for timely distribution of Federal funds. The U.S. Census Bureau is the data collection agent for this request of the Department of Education's National Center for Education Statistics (NCES). The data will be published by NCES and will be used by the Secretary in the calculation of allocations for FY 2019 appropriated funds.

**DATES:** SEAs can begin submitting data on Wednesday, January 31, 2018. SEAs are urged to submit accurate and complete data by Friday, March 30, 2018, to facilitate timely processing. The deadline for the final submission of all data, including any revisions to previously submitted data for FY 2016 and FY 2017, is Wednesday, August 15, 2018. Any resubmissions of FY 2016 or FY 2017 data by SEAs in response to requests for clarification or

reconciliation or other inquiries by NCES or the Census Bureau must be completed as soon as possible, but no later than Tuesday, September 4, 2018. All outstanding data issues must be reconciled or resolved by the SEAs, NCES, and the Census Bureau as soon as possible, but no later than September 4, 2018.

#### *Addresses and Submission*

**Information:** SEAs may mail ED Form 2447 to: U.S. Census Bureau, ATTENTION: Economic Reimbursable Surveys Division, 4600 Silver Hill Road, Suitland, MD 20746.

If an SEA's submission is received by the Census Bureau after August 15, 2018, the SEA must show one of the following as proof that the submission was mailed on or before that date:

1. A legibly dated U.S. Postal Service postmark.
2. A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
3. A dated shipping label, invoice, or receipt from a commercial carrier.
4. Any other proof of mailing acceptable to the Secretary.

If the SEA mails ED Form 2447 through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

1. A private metered postmark.
2. A mail receipt that is not dated by the U.S. Postal Service.

**Note:** The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an SEA should check with its local post office.

SEAs may submit data online using the interactive survey form on the NPEFS data collection Web site at: <http://surveys.nces.ed.gov/ccdnpefs>. The NPEFS interactive survey includes a digital confirmation page where a personal identification number (PIN) may be entered. A successful entry of the PIN serves as a signature by the authorizing official. Alternatively, a certification form also may be printed from the Web site, signed by the authorizing official, and mailed to the Economic Reimbursable Surveys Division of the Census Bureau at the Washington, DC address provided above, within five business days after submission of the NPEFS web interactive form.

Alternatively, SEAs may hand-deliver submissions by 4:00 p.m. Washington, DC time on August 15, 2018, to: U.S. Census Bureau, Economic Reimbursable Surveys Division, 4600 Silver Hill Road, Suitland, MD 20746.

**FOR FURTHER INFORMATION CONTACT:** Mr. Stephen Q. Cornman, NPEFS Project Director, National Center for Education

<sup>26</sup> Spanish, Chinese, Tagalog, Vietnamese, Arabic, French, Korean, and Russian are the most common languages other than English that are spoken in the United States. See 2016 ACS Home Language Data.

<sup>27</sup> *Id.*

Statistics, Institute of Education Sciences, U.S. Department of Education. Telephone: (202) 245-7753 or by email: [stephen.cornman@ed.gov](mailto:stephen.cornman@ed.gov). You may also contact an NPEFS team member at the Census Bureau. Telephone: 1-800-437-4196 or (301) 763-1571 or by email: [erd.npefs.list@census.gov](mailto:erd.npefs.list@census.gov).

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service, toll free, at 1-800-877-8339.

**SUPPLEMENTARY INFORMATION:** Under section 153(a)(1)(I) of the Education Sciences Reform Act of 2002, 20 U.S.C. 9543(a)(1)(I), which authorizes NCES to gather data on the financing and management of education, NCES collects data annually from SEAs through ED Form 2447. The report from SEAs includes attendance, revenue, and expenditure data from which NCES determines a State's "average per-pupil expenditure" (SPPE) for elementary and secondary education, as defined in section 8101(2) of the Elementary and Secondary Education Act of 1965, as amended (ESEA) (20 U.S.C. 7801(2)).

In addition to using the SPPE data as general information on the financing of elementary and secondary education, the Secretary uses these data directly in calculating allocations for certain formula grant programs, including, but not limited to, title I, part A of the ESEA, Impact Aid, and Indian Education programs. Other programs, such as the Education for Homeless Children and Youth program under title VII of the McKinney-Vento Homeless Assistance Act and the Teacher Quality State Grants program (title II, part A of the ESEA), make use of SPPE data indirectly because their formulas are based, in whole or in part, on State title I, part A allocations.

In January 2018, the Census Bureau, acting as the data collection agent for NCES, will email ED Form 2447 to SEAs, with instructions, and will request that SEAs commence submitting FY 2017 data to the Census Bureau on Wednesday, January 31, 2018. SEAs are urged to submit accurate and complete data by Friday, March 30, 2018, to facilitate timely processing.

Submissions by SEAs to the Census Bureau will be analyzed for accuracy and returned to each SEA for verification. SEAs must submit all data, including any revisions to FY 2016 and FY 2017 data, to the Census Bureau no later than Wednesday, August 15, 2018. Any resubmissions of FY 2016 or FY 2017 data by SEAs in response to requests for clarification or reconciliation or other inquiries by NCES or the Census Bureau must be

completed by Tuesday, September 4, 2018. Between August 15, 2018, and September 4, 2018, SEAs may also, on their own initiative, resubmit data to resolve issues not addressed in their final submission of NPEFS data by August 15, 2018. All outstanding data issues must be reconciled or resolved by the SEAs, NCES, and the Census Bureau as soon as possible, but no later than September 4, 2018.

In order to facilitate timely submission of data, the Census Bureau will send reminder notices to SEAs in June and July of 2018.

Having accurate, consistent, and timely information is critical to an efficient and fair Department of Education (Department) allocation process and to the NCES statistical process. To ensure timely distribution of Federal education funds based on the best, most accurate data available, the Department establishes, for program funding allocation purposes, Wednesday, August 15, 2018, as the final date by which the SEAs must submit data using either the interactive survey form on the NPEFS data collection Web site at: <http://surveys.nces.ed.gov/ccdnpefs> or ED Form 2447.

Any resubmissions of FY 2016 or FY 2017 data by SEAs in response to requests for clarification or reconciliation or other inquiries by NCES or the Census Bureau must be completed through the interactive survey form on the NPEFS data collection Web site or ED Form 2447 by Tuesday, September 4, 2018. If an SEA submits revised data after the final deadline that result in a lower SPPE figure, the SEA's allocations may be adjusted downward, or the Department may direct the SEA to return funds. SEAs should be aware that all of these data are subject to audit and that, if any inaccuracies are discovered in the audit process, the Department may seek recovery of overpayments for the applicable programs.

**Note:** The following are important dates in the data collection process for FY 2017 data and revisions to reports for previous fiscal years:

January 31, 2018—SEAs can begin to submit accurate and complete data for FY 2017 and revisions to previously submitted data for FY 2016.

March 30, 2018—Date by which SEAs are urged to submit accurate and complete data for FY 2016 and FY 2017.

August 15, 2018—Mandatory final submission date for FY 2016 and FY 2017 data to be used for program funding allocation purposes.

September 4, 2018—Mandatory final deadline for responses by SEAs to requests for clarification or reconciliation or other

inquiries by NCES or the Census Bureau. All data issues must be resolved.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket Nos. EL18-28-000; QF12-252-004]

#### Elk Hills Power, LLC; Notice of Request for Waiver

Take notice that on November 8, 2017, pursuant to section 292.205(c) of the Federal Energy Regulatory Commission's (Commission) implementing the Public Utility Regulatory Policies Act of 1978, as amended 18 CFR 292.205(c) (2017), Elk Hills Power, LLC (EHP) submitted a request for limited waiver of the operating standard set forth in section 292.205(a)(1) for the topping-cycle cogeneration facility owned and

operated by EHP, as more fully explained in its request.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the eFiling link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the eLibrary link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

*Comment Date:* 5:00 p.m. Eastern time on November 29, 2017.

Dated: November 9, 2017.

**Nathaniel J. Davis, Sr.,**  
*Deputy Secretary.*

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket Nos. RD17-8-000]

#### Commission Information Collection Activities (FERC-725HH); Comment Request; Revision and Extension

**AGENCY:** Federal Energy Regulatory Commission, Department of Energy.

**ACTION:** Notice of revised information collection and request for comments.

**SUMMARY:** In compliance with the requirements of the Paperwork

Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on revisions to the information collection, FERC-725HH (RF Reliability Standards) which will be submitted to the Office of Management and Budget (OMB) for review of the information collection requirements.

**DATES:** Comments on the collection of information are due January 16, 2018.

**ADDRESSES:** You may submit comments identified by Docket Nos. RD17-8-000 by either of the following methods:

- *eFiling at Commission's Web site:*

<http://www.ferc.gov/docs-filing/efiling.asp>.

- *Mail/Hand Delivery/Courier:*

Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

*Instructions:* All submissions must be formatted and filed in accordance with submission guidelines at: <http://www.ferc.gov/help/submission-guide.asp>. For user assistance, contact FERC Online Support by email at [ferconlinesupport@ferc.gov](mailto:ferconlinesupport@ferc.gov), or by phone at: (866) 208-3676 (toll-free), or (202) 502-8659 for TTY.

*Docket:* Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at <http://www.ferc.gov/docs-filing/docs-filing.asp>.

#### FOR FURTHER INFORMATION CONTACT:

Ellen Brown may be reached by email at [DataClearance@FERC.gov](mailto:DataClearance@FERC.gov), telephone at (202) 502-8663, and fax at (202) 273-0873.

#### SUPPLEMENTARY INFORMATION:

*Title:* FERC-725HH, RF Reliability Standards.

*OMB Control Number:* 1902-0256.

*Type of Request:* Three-year approval of the FERC-725HH information collection requirements, as modified by Docket No. RD17-8-000.

*Abstract:* The information collected by the FERC-725HH is required to implement the statutory provisions of section 215 of the Federal Power Act (FPA) (16 U.S.C. 824o). Section 215 of the FPA buttresses the Commission's efforts to strengthen the reliability of the interstate grid through the grant of new authority by providing for a system of mandatory Reliability Standards developed by the Electric Reliability Organization (ERO). In July 2006, the Commission certified the North American Electric Reliability Corporation (NERC) as the ERO.<sup>1</sup>

<sup>1</sup> *North American Electric Reliability Corp.*, 116 FERC 61,062 (ERO Certification Order), *order on reh'g & compliance*, 117 FERC 61,126 (2006), *aff'd*

Reliability Standards that the ERO proposes to the Commission may include Reliability Standards that are proposed to the ERO by a Regional Entity.<sup>2</sup> A Regional Entity is an entity that has been approved by the Commission to enforce Reliability Standards under delegated authority from the ERO.<sup>3</sup> On March 17, 2011, the Commission approved a regional Reliability Standard submitted by the ERO that was developed by the ReliabilityFirst Corporation (RF).<sup>4</sup>

RF promotes bulk electric system reliability in the Eastern Interconnection. RF is the Regional Entity responsible for compliance monitoring and enforcement in the RF region. In addition, RF provides an environment for the development of Reliability Standards and the coordination of the operating and planning activities of its members as set forth in the RF bylaws.

There is one regional Reliability Standard in the RF region. The regional Reliability Standard requires planning coordinators within the RF geographical footprint to analyze, assess and document resource adequacy for load in the RF footprint annually, to utilize a "one day in ten years" loss of load criterion, and to document and post load and resource capability in each area or transmission-constrained sub-area identified.

- BAL-502-RFC-02 (Planning Resource Adequacy Analysis, Assessment and Documentation)<sup>5</sup> establishes common criteria, based on "one day in ten year" loss of load expectation principles, for the analysis, assessment, and documentation of resource adequacy for load in the RF region.

The Commission's request to OMB reflects the following:

- Implementing the regional Reliability Standard BAL-502-RF-03 and the retirement of regional Reliability Standard BAL-502-RFC-02<sup>6</sup> which is discussed below.

*sub nom. Alcoa, Inc. v. FERC*, 564 F.3d 1342 (D.C. Cir. 2009).

<sup>2</sup> 16 U.S.C. 824o(e)(4).

<sup>3</sup> 16 U.S.C. 824o(a)(7) and (e)(4).

<sup>4</sup> *Planning Resource Adequacy Assessment Reliability Standard*, Order No. 747, 134 FERC 61,212 (2011).

<sup>5</sup> BAL-502-RFC-02 is included in the OMB-approved inventory for FERC-725H.

<sup>6</sup> Burden associated with BAL-502-RF-02 Reliability Standard was once contained in FERC-725H information collection (OMB Control No. 1902-0256). FERC-725H was discontinued on 3/6/2014. However, the requirements of BAL-502-RF-02 were still imposed on NERC entities. Those requirements are now being retired with no removal of burden (any associated burden was removed concurrent with the discontinuance).

On September 7, 2017, NERC and RF filed a joint petition in Docket No. RD17-8-000<sup>7</sup> requesting Commission approval of: (a) Regional Reliability Standard BAL-502-RF-03 (Planning Resource Adequacy Analysis, Assessment and Documentation), and (b) the retirement of regional Reliability Standard BAL-502-RFC-02.<sup>6</sup> The petition states: “Proposed regional Reliability Standard BAL-502-RF-03 establishes common criteria, based on “one day in ten year” loss of Load

expectation principles, for the analysis, assessment, and documentation of Resource Adequacy for Load in the ReliabilityFirst region.” NERC’s and RF’s joint filing was noticed on September 8, 2017, with interventions, comments and protests due on or before October 10, 2017. In this document, we provide estimates of the burden and cost related to those revisions to FERC-725HH.

*Type of Respondents:* Planning coordinators.

*Estimate of Annual Burden:*<sup>8</sup> Details follow on the changes related to Docket No. RD17-8-000.

*Estimate of Changes to Burden Due to Docket No. RD17-8:* The joint petition requested Commission approval of regional Reliability Standard BAL-502-RF-03 and retirement of regional Reliability Standard BAL-502-RFC-02. The estimated effects on burden and cost<sup>9</sup> are as follows:

**FERC-725HH, RF RELIABILITY STANDARDS, CHANGES IN DOCKET NO. RD17-8-000**

Entity	Number of respondents <sup>10</sup>	Annual number of responses per respondent	Annual number of responses	Average burden hours and cost per response (\$)	Total annual burden hours and total annual cost (\$)	Cost per respondent (\$)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1) = (6)
<b>Proposed Regional Reliability Standard BAL-502-RF-03</b>						
Planning Coordinators .....	2	1	2	16 hrs.; \$973 .....	32 hrs.; \$1,945 ..	\$973

*Comments:* Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: November 9, 2017.

<sup>7</sup> The joint petition and exhibits are posted in the Commission’s eLibrary system in Docket No. RD17-8-000.

<sup>8</sup> Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 Code of Federal Regulations 1320.3.

<sup>9</sup> For BAL-502-RF-03, the hourly cost (for salary plus benefits) uses the figures from the Bureau of Labor Statistics for three positions involved in the reporting and recordkeeping requirements. These figures include salary ([http://bls.gov/oes/current/naics2\\_22.htm](http://bls.gov/oes/current/naics2_22.htm)) and benefits (<http://www.bls.gov/news.release/eccc.nr0.htm>) and are:

- Manager (Occupation Code 11-0000): \$81.52/hour.
- Engineer (Occupation Code 17-2071): \$68.12/hour.

- File Clerk (Occupation Code 43-4071): \$32.74/hour.

The hourly cost for the reporting requirements (\$60.79) is an average of the cost of a manager, an engineer, and a file clerk.

<sup>10</sup> The number of respondents is derived from the NERC Compliance Registry as of October 2, 2017 for the burden associated with the proposed regional Reliability Standard BAL-502-RF-03.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern

time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 9, 2017.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 14856–000]

#### **America First Hydro, LLC; Notice of Intent To File License Application, Filing of Pre-Application Document (PAD), Denying Use of the Traditional Licensing Process, Commencement of Licensing Proceeding, Scoping, and Solicitation of Study Requests and Comments on the PAD and Scoping Document**

a. *Type of Filing:* Notice of Request To Use the Traditional Licensing Process.

b. *Project No.:* 14856.

c. *Dated Filed:* September 11, 2017.

d. *Submitted By:* America First Hydro, LLC (America First Hydro).

e. *Name of Project:* Lower Mousam Project.

f. *Location:* On the Mousam River in York County, Maine. The project does not occupy federal land.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's Regulations.

h. *Potential Applicant Contact:* Ian Clark, Managing Member, America First Hydro, LLC; 826 Scarsdale Ave, Scarsdale, New York 10583, (914) 297–7645, or email at [info@dichotomycapital.com](mailto:info@dichotomycapital.com).

i. *FERC Contact:* Michael Watts at (202) 502–6123, or email at [michael.watts@ferc.gov](mailto:michael.watts@ferc.gov).

j. The current license for the Lower Mousam Project was issued to Kennebunk Light and Power District (Kennebunk Light) under Project No. 5362. On March 29, 2017, Kennebunk Light filed a notice stating that it does not intend to file an application for a subsequent license. In response to a solicitation issued by the Commission on May 15, 2017, America First Hydro filed a notice of intent to file an

application for a license for the Lower Mousam Project and a Pre-Application Document (PAD), pursuant to 18 CFR 5.5 and 5.6 of the Commission's regulations. The licensing proceeding is commencing under Project No. 14856.

k. America First Hydro filed a request to use the Traditional Licensing Process (TLP) on September 11, 2017, which the Commission denied on October 31, 2017. America First Hydro must use the Integrated Licensing Process to prepare a license application for the Lower Mousam Project.

l. *Cooperating agencies:* Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item o below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. See 94 FERC ¶ 61,076 (2001).

m. *With this notice, we are initiating informal consultation with:* (a) The U.S. Fish and Wildlife Service and NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, part 402; (b) NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920; and (c) the Maine State Historic Preservation Officer, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

n. A copy of the PAD is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site (<http://www.ferc.gov>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), (866) 208–3676 (toll free), or (202) 502–8659 (TTY). A copy is also available for inspection and reproduction at the address in paragraph h.

Register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. With this notice, we are soliciting comments on the PAD and Commission

staff's Scoping Document 1 (SD1), as well as study requests. All comments on the PAD and SD1, and study requests should be sent to the address above in paragraph h. In addition, all comments on the PAD and SD1, study requests, requests for cooperating agency status, and all communications to and from Commission staff related to the merits of the potential application must be filed with the Commission.

The Commission strongly encourages electronic filing. Please file all documents using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P-14856-000.

All filings with the Commission must bear the appropriate heading: "Comments on Pre-Application Document," "Study Requests," "Comments on Scoping Document 1," "Request for Cooperating Agency Status," or "Communications to and from Commission Staff." Any individual or entity interested in submitting study requests, commenting on the PAD or SD1, and any agency requesting cooperating status must do so within 60 days of the issuance date of this notice.

p. At this time, the Commission intends to prepare an environmental assessment (EA).

### Scoping Meetings

Commission staff will hold two scoping meetings in the vicinity of the project at the time and place noted below. The daytime meeting will focus on resource agency, Indian tribes, and non-governmental organization concerns, while the evening meeting is primarily for receiving input from the public. We invite all interested individuals, organizations, and agencies to attend one or both of the meetings, and to assist staff in identifying particular study needs, as well as the scope of environmental issues to be addressed in the environmental document. The times and locations of these meetings are as follows:

#### Daytime Scoping Meeting

*Date:* Monday, December 11, 2017.

*Time:* 1:00 p.m.

*Location:* Kennebunk Town Hall Auditorium, 1 Summer Street, Kennebunk, ME 04043.

*Phone:* (207) 985-3311.

#### Evening Scoping Meeting

*Date:* Monday, December 11, 2017.

*Time:* 6:00 p.m.

*Location:* Kennebunk Town Hall Auditorium, 1 Summer Street, Kennebunk, ME 04043.

*Phone:* (207) 985-3311.

Scoping Document 1 (SD1), which outlines the subject areas to be addressed in the environmental document, was mailed to the individuals and entities on the Commission's mailing list. Copies of SD1 will be available at the scoping meetings, or may be viewed on the web at <http://www.ferc.gov>, using the "eLibrary" link. Follow the directions for accessing information in item n above. Based on all oral and written comments, a Scoping Document 2 (SD2) may be issued. SD2 may include a revised process plan and schedule, as well as a list of issues, identified through the scoping process.

#### Environmental Site Review

The potential applicant, the existing licensee, and Commission staff will conduct an Environmental Site Review of the project on Tuesday, December 12, 2017, starting at 9:00 a.m. All participants should meet in the parking lot, located next to the Kesslen Dam on Berry Court Road, Kennebunk, ME 04043. All participants are responsible for their own transportation. Anyone with questions about the site visit should contact Mr. Todd Shea of Kennebunk Light and Power District at (207) 985-3311 on or before December 12, 2017.

#### Meeting Objectives

At the scoping meetings, staff will: (1) Initiate scoping of the issues; (2) review and discuss existing conditions and resource management objectives; (3) review and discuss existing information and identify preliminary information and study needs; (4) review and discuss the process plan and schedule for pre-filing activity that incorporates the time frames provided for in Part 5 of the Commission's regulations and, to the extent possible, maximizes coordination of federal, state, and tribal permitting and certification processes; and (5) discuss the appropriateness of any federal or state agency or Indian tribe acting as a cooperating agency for

development of an environmental document.

Meeting participants should come prepared to discuss their issues and/or concerns. Please review the PAD in preparation for the scoping meetings. Directions on how to obtain a copy of the PAD and SD1 are included in item n of this document.

#### Meeting Procedures

The meetings will be recorded by a stenographer and will be placed in the public records of the project.

Dated: November 8, 2017.

**BILLING CODE 6717-01-P**

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. CP18-11-000]

#### East Cheyenne Gas Storage, LLC; Notice of Application

Take notice that on October 27, 2017, East Cheyenne Gas Storage, LLC (East Cheyenne), 10370 Richmond Avenue, Suite 510, Houston, Texas 77042, filed in the above referenced docket an application pursuant to section 7(c) of the Natural Gas Act (NGA), and Part 157 of the Commission's regulations requesting authorization to amend its certificate of public convenience and necessity issued by the Commission in Docket No. CP10-34-000, as amended in Docket Nos. CP11-40-000, CP12-35-000, CP12-124-000, CP14-486-000, and CP16-25-000, to: (i) Consolidate the working gas capacity and cushion gas capacity of the West Peetz and Lewis Creek portions of the East Cheyenne Gas Storage Project (Project) into one working gas capacity and one cushion gas capacity, (ii) allow a unified maximum bottom-hole pressure for the Project reservoir, (iii) reallocate the storage gas capacity in the Project by increasing the working gas capacity and decreasing the cushion gas capacity of the Project by 3.6 billion cubic feet (Bcf) each, (iv) reconfigure certain facilities in the Lewis Creek portion of the Project, and (v) expand the buffer zone of the Project. Also, East Cheyenne requests the Commission to issue an order reaffirming its market-based rate authorization in light of the increase in working gas capacity of the Project, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The

filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or call toll-free, (866) 208-3676 or TTY, (202) 502-8659.

Any questions concerning this application may be directed to James Hoff, Vice President, Reservoir Engineering, East Cheyenne Gas Storage, LLC, 10370 Richmond Avenue, Suite 510, Houston, Texas 77042, at (713) 403-6467.

Pursuant to section 157.9 of the Commission's rules (18 CFR 157.9), within 90 days of this Notice, the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit seven copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the

proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

*Comment Date:* 5:00 p.m. Eastern Time on November 29, 2017.

Dated: November 8, 2017.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. ER18-266-000]

#### Southern Partners, INC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding Southern Partners, INC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 28, 2017.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by

clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Dated: November 8, 2017.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. NJ18-1-000]

#### City of Vernon, California; Notice of Filing

Take notice that on October 30, 2017, City of Vernon, California submitted its tariff filing: 2018 Transmission Revenue Requirement and Transmission Revenue Balancing Account Adjustment, to be effective 1/1/2018.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all the parties in this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the eFiling link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the eLibrary link and is available for electronic review in the Commission's Public Reference Room in Washington, DC.

There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). [Docket No. CP18-12-000]

#### Natural Gas Pipeline Company of America LLC; Notice of Application

Take notice that on October 31, 2017, Natural Gas Pipeline Company of America LLC (Natural), 3250 Lacey Road, Downers Grove, Illinois 60515-7918, filed in Docket No. CP18-12-000 an application pursuant to section 7(b) of the Natural Gas Act (NGA), and Part 157 of the Commission's regulations requesting authority to abandon Natural's Herscher Northwest Storage Field (HNW Storage Field) located in Kankakee County, Illinois. Natural states that its HNW Storage Field is an aquifer type gas storage field that has been under-performing and is no longer needed by Natural to provide storage services for its customers or to operate its system.

Specifically, Natural proposes to: (i) Plug and permanently abandon 19 injection and withdrawal (I/W) wells (and to retain one I/W well as an observation (OBS) well); (ii) abandon in place 16.15 miles of 4-inch-diameter to 16-inch-diameter field laterals, (iii) abandon by removal Compressor Station 202, a 330 horsepower compressor station, located in the HNW Storage Field; and (iv) abandon in place approximately 15.3 Bcf of non-recoverable cushion gas. Additionally, Natural plans to plug and permanently abandon 13 OBS wells (one would be retained for continued observation purposes) and a salt water disposal well. Natural would also remove all auxiliary surface facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at <http://www.ferc.gov>

[www.ferc.gov](http://www.ferc.gov) using the “eLibrary” link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or call toll-free, (866) 208-3676 or TTY, (202) 502-8659.

Any questions regarding this application should be directed to Bruce H. Newsome, Vice President, Natural Gas Pipeline Company of America LLC, 3250 Lacey Road, Suite 700, Downers Grove, Illinois 60515-7918; by telephone (630) 725-3070; or by email at [bruce\\_newsome@kindermorgan.com](mailto:bruce_newsome@kindermorgan.com).

Pursuant to section 157.9 of the Commission’s rules (18 CFR 157.9), within 90 days of this Notice, the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission’s public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff’s issuance of the EA for this proposal. The filing of the EA in the Commission’s public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff’s EA.

There are two ways to become involved in the Commission’s review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit five copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to

participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission’s rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission’s environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission’s environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission’s final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the “eFiling” link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and five copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

*Comment Date:* November 29, 2017.

Dated: November 8, 2017.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket Nos. EL18-27-000, QF86-968-015]

#### EF Oxnard LLC, Notice of Request for Waiver

Take notice that on November 7, 2017, pursuant to section 292.205(c) of the Federal Energy Regulatory

Commission’s (Commission) implementing the Public Utility Regulatory Policies Act of 1978, as amended 18 CFR 292.205(c) (2017), EF Oxnard LLC (EF Oxnard) submitted a request for limited waiver of the efficiency standard set forth in section 292.205(a)(2) for the topping-cycle cogeneration facility owned and operated by EF Oxnard, as more fully explained in its request.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission’s Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the “eFiling” link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the “eLibrary” link and is available for review in the Commission’s Public Reference Room in Washington, DC. There is an “eSubscription” link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

**BILLING CODE 6717–01–P**

**DEPARTMENT OF ENERGY****Federal Energy Regulatory Commission**

[Docket No. EL18–29–000]

**Citizens Energy Corporation; Notice of Petition for Declaratory Order**

Take notice that on November 9, 2017, pursuant to Rule 207 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure,<sup>1</sup> section 219 of the Federal Power Act,<sup>2</sup> and Order No. 679,<sup>3</sup> Citizens Energy Corporation (Citizens or Petitioner) on behalf of itself and its wholly owned subsidiary Citizens Sycamore-Penasquitos Transmission, filed a petition for declaratory order requesting approval of two rate treatments, in connection with a new high voltage transmission project that Citizens is partnering with San Diego Gas & Electric Company to develop and finance, all as more fully explained in the petition.

Any person desiring to intervene or to protest in this proceeding must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission,

888 First Street NE., Washington, DC 20426.

The filings in the above proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

[Project No. 2114–293]

**Public Utility District No. 2 of Grant County; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests**

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Non-Project Use of Project Lands.

b. *Project No.:* 2114–293.

c. *Date Filed:* April 7, 2017.

d. *Applicant:* Public Utility District No. 2 of Grant County (Grant PUD).

e. *Name of Project:* Priest Rapids Hydroelectric Project.

f. *Location:* The proposed non-project use is located on the mid-Columbia River in Kittitas County, Washington.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Ross Hendrick, License Compliance Manager, Grant PUD, 30 C St. SW., Ephrata, WA 98823–0878, (509) 793–1468.

i. *FERC Contact:* Hillary Berlin, (202) 502–8915, [hillary.berlin@ferc.gov](mailto:hillary.berlin@ferc.gov).

j. *Deadline for filing comments, motions to intervene, and protests:*

December 9, 2017.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at

<http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P–2114–293. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The licensee filed a request to authorize a non-project use on the Wanapum Reservoir for the existing Vantage Riverstone Marina to expand from a ten-slip facility to a commercial marina with capacity for 17 watercraft. The location and footprint of the three existing docks will not change.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502–8371. This filing may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), for TTY, call (202) 502–8659. A copy may also be obtained by contacting the applicant as specified in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

<sup>1</sup> 18 CFR 385.207.

<sup>2</sup> 16 U.S.C. 791a–828c, 824s.

<sup>3</sup> *Promoting Transmission Investment Through Pricing Reform*, Order No. 679, 116 FERC ¶ 61,057, order on reh'g, 117 FERC 61,345 (2006), order on reh'g, 119 FERC ¶ 61,062 (2007) (Order No. 679).

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title COMMENTS, PROTEST, or MOTION TO INTERVENE as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

**BILLING CODE 6717–01–P**

**FEDERAL ELECTION COMMISSION**

**[NOTICE 2017–13]**

**Filing Dates for the Pennsylvania Special Election in the 18th Congressional District**

**AGENCY:** Federal Election Commission.  
**ACTION:** Notice of filing dates for special election.

**SUMMARY:** Pennsylvania has scheduled a special general election on March 13, 2018, to fill the U.S. House of Representatives seat in the 18th Congressional District vacated by Representative Tim Murphy.

Committees required to file reports in connection with the Special General Election on March 13, 2018, shall file a 12-day Pre-General Report, and a 30-day Post-General Report.

**FOR FURTHER INFORMATION CONTACT:** Ms. Elizabeth S. Kurland, Information Division, 999 E Street NW., Washington, DC 20463; Telephone: (202) 694–1100; Toll Free (800) 424–9530.

**SUPPLEMENTARY INFORMATION:**

**Principal Campaign Committees**

All principal campaign committees of candidates who participate in the Pennsylvania Special General Election shall file a 12-day Pre-General Report on March 1, 2018; and a Post-General Report on April 12, 2018. (See chart below for the closing date for each report.)

Note that these reports are in addition to the campaign committee’s regular quarterly filings. (See chart below for the closing date for each report).

**Unauthorized Committees (PACs and Party Committees)**

Political committees filing on a quarterly basis in 2018 are subject to special election reporting if they make

previously undisclosed contributions or expenditures in connection with the Pennsylvania Special General Election by the close of books for the applicable report(s). (See chart below for the closing date for each report.)

Committees filing monthly that make contributions or expenditures in connection with the Pennsylvania Special General Election will continue to file according to the monthly reporting schedule.

Additional disclosure information in connection with the Pennsylvania Special General Election may be found on the FEC Web site at <https://www.fec.gov/help-candidates-and-committees/dates-and-deadlines/>.

**Disclosure of Lobbyist Bundling Activity**

Principal campaign committees, party committees and Leadership PACs that are otherwise required to file reports in connection with the special elections must simultaneously file FEC Form 3L if they receive two or more bundled contributions from lobbyists/registrants or lobbyist/registrant PACs that aggregate in excess of the lobbyist bundling disclosure threshold during the special election reporting periods (See chart below for closing date of each period.) 11 CFR 104.22(a)(5)(v), (b).

The lobbyist bundling disclosure threshold for calendar year 2017 is \$17,900. This threshold amount may increase in 2018 based upon the annual cost of living adjustment (COLA). Once the adjusted threshold amount becomes available, the Commission will publish it in the **Federal Register** and post it on its Web site. 11 CFR 110.17(e)(2). For more information on these requirements, see **Federal Register** Notice 2009–03, 74 FR 7285 (February 17, 2009).

**CALENDAR OF REPORTING DATES FOR PENNSYLVANIA SPECIAL GENERAL ELECTION**

Report	Close of books <sup>1</sup>	Reg./cert. & overnight mailing deadline	Filing deadline
<b>Committees Involved in the Special General (03/13/18) Must File</b>			
Pre-General .....	02/21/18	02/26/18	03/01/18
Post-General .....	04/02/18	04/12/18	04/12/18
April Quarterly .....	.....	—WAIVED—	.....
July Quarterly .....	06/30/18	07/15/18	07/15/18 <sup>2</sup>

<sup>1</sup> The reporting period always begins the day after the closing date of the last report filed. If the committee is new and has not previously filed a report, the first report must cover all activity that occurred before the committee registered as a political committee up through the close of books for the first report due.

<sup>2</sup> Notice that this filing deadline falls on a weekend or federal holiday. Filing deadlines are not extended when they fall on nonworking days. Accordingly, reports filed by methods other than registered, certified or overnight mail must be received by close of business on the last business day before the deadline.

Dated: November 3, 2017.

On behalf of the Commission,

**Steven T. Walther,**

*Chairman, Federal Election Commission.*

## FEDERAL RESERVE SYSTEM

### Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 15, 2017.

*A. Federal Reserve Bank of St. Louis* (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166-2034. Comments can also be sent electronically to [Comments.applications@stls.frb.org](mailto:Comments.applications@stls.frb.org):

1. *M&P Community Bancshares, Inc., 401(k) Employee Stock Ownership Plan, Newport, Arkansas*; to acquire additional voting shares, for a total of up to 38 percent, of M&P Community Bancshares, Inc., and thereby indirectly acquire Merchants & Planters Bank all of Newport, Arkansas.

Board of Governors of the Federal Reserve System, November 13, 2017.

**Michele Taylor Fennell,**

*Assistant Secretary of the Board.*

## FEDERAL RESERVE SYSTEM

### Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than November 29, 2017.

*A. Federal Reserve Bank of Dallas* (Robert L. Triplett III, Senior Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. *Ginne Cook Davis Trust under the Cook 2017 Children's Trust Agreement, Byron C. Cook, Trustee, and the Katie L. Cook Trust under the Cook 2017 Children's Trust Agreement, Byron C. Cook, Trustee, to join the Cook Family Group*, to retain voting shares of Community Bank Holdings of Texas, Inc. and thereby indirectly retain shares of Community National Bank & Trust of Texas, all of Corsicana, Texas.

Board of Governors of the Federal Reserve System, November 9, 2017.

**Yao-Chin Chao,**

*Assistant Secretary of the Board.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

#### Board of Scientific Counselors, National Center for Health Statistics (BSC, NCHS)

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice of meeting.

**SUMMARY:** In accordance with the Federal Advisory Committee Act, the CDC, announces the following meeting for BSC, NCHS. This meeting is open to the public; however, visitors must be processed in accordance with established federal policies and procedures. For foreign nationals or non-U.S. citizens, pre-approval is required (please contact Gwen Mustaf, 301-458-4500, [glm4@cdc.gov](mailto:glm4@cdc.gov), or Charles Rothwell, [cjr4@cdc.gov](mailto:cjr4@cdc.gov) at least 10 days in advance for requirements). All visitors are required to present a valid form of picture identification issued by a state, federal or international government. As required by the Federal Property Management Regulations, all persons entering in or on Federal controlled property and their packages, briefcases, and other containers in their immediate possession are subject to being x-rayed and inspected. Federal law prohibits the knowing possession or the causing to be present of firearms, explosives and other dangerous weapons and illegal substances. The meeting room accommodates approximately 78 people.

**DATES:** The meeting will be held on January 11, 2018, 11:00 a.m.–5:30 p.m., EDT, and January 12, 2018, 8:30 a.m.–1:00 p.m., EDT.

**ADDRESSES:** NCHS Headquarters, 3311 Toledo Road, Hyattsville, Maryland 20782.

**FOR FURTHER INFORMATION CONTACT:** Charles J. Rothwell, Director, NCHS/CDC, 3311 Toledo Road, Room 2627, Hyattsville, Maryland 20782, telephone (301) 458-4500, email [cjr4@cdc.gov](mailto:cjr4@cdc.gov).

#### SUPPLEMENTARY INFORMATION:

*Purpose:* This committee is charged with providing advice and making recommendations to the Secretary, Department of Health and Human Services; the Director, CDC; and the Director, NCHS, regarding the scientific and technical program goals and objectives, strategies, and priorities of NCHS.

*Matters to be Considered:* The agenda includes welcome remarks by NCHS

leadership; update of Legislation Relating to the Evidence Based Policy Commission; update on National Health and Nutrition Examination Surveys Reports and Activities; update on Division of Health Care Statistics Reports and Activities; update on Vital Statistics activities; and update on International Activities of NCHS.

Requests to make oral presentations should be submitted in writing to the contact person listed below. All requests must contain the name, address, telephone number, and organizational affiliation of the presenter. Written comments should not exceed five single-spaced typed pages in length and must be received by December 26, 2017. Agenda items are subject to change as priorities dictate.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

**Elaine L. Baker,**

*Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.*

[FR Doc. 2017-24871 Filed 11-15-17; 8:45 am]

**BILLING CODE 4163-19-P**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[60Day-17-17BAN; Docket No. CDC-2017-0081]

#### Proposed Data Collection Submitted for Public Comment and Recommendations

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on “Strengthening United States Response to Resistant Gonorrhea (SURRG).” The goal of the study is to strengthen the U.S response to resistant

gonorrhea by enhancing state and local public health surveillance and program infrastructure, build capacity to support rapid detection and public health response to antibiotic-resistant gonorrhea, and advance the understanding of epidemiological factors contributing to antibiotic-resistant gonorrhea.

**DATES:** Written comments must be received on or before January 16, 2018.

**ADDRESSES:** You may submit comments, identified by Docket No. CDC-2017-0081 by any of the following methods:

- *Federal eRulemaking Portal:*

*Regulations.gov.* Follow the instructions for submitting comments.

- *Mail:* Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329.

*Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to Regulations.gov.*

*Please note:* Submit all comments through the Federal eRulemaking portal (*regulations.gov*) or by U.S. mail to the address listed above.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329; phone: 404-639-7570; Email: *omb@cdc.gov*.

**SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

5. Assess information collection costs.

#### Proposed Project

Strengthening U.S. Response to Resistant Gonorrhea (SURRG)—New—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

#### Background and Brief Description

The purposes of *Strengthening U.S. Response to Resistant Gonorrhea (SURRG)* are to: (1) Improve national capacity to detect, monitor, and respond to emerging antibiotic-resistant gonorrhea; (2) understand trends in and factors contributing to antibiotic-resistant gonorrhea; and (3) build a robust evidence base for public health action. This information collection is important because: (1) Effective treatment of gonorrhea is critical to gonorrhea control and prevention; (2) untreated or inadequately treated gonorrhea can cause serious reproductive health complications, such as infertility; (3) *Neisseria gonorrhoeae* (the bacterium that causes gonorrhea) has consistently demonstrated the ability to develop resistance to the antibiotics used for treatment and may be developing resistance to the last remaining treatment option recommended by the CDC; and (4) antibiotic-resistant gonorrhea is extremely difficult to detect without enhanced surveillance and public health activities, such as SURRG, because healthcare providers rarely perform or have access to resistance testing for individual patients.

SURRG will support rapid detection of resistant gonorrhea and get actionable information into the hands of healthcare providers (to support appropriate treatment of individual patients) and local health departments (to support rapid public health response to slow the spread of resistant infections).

Jurisdictions participating in SURRG applied as part of a competitive process and will participate voluntarily. As an overview of SURRG, healthcare providers at participating clinics (sexually transmitted disease [STD] clinics affiliated with a single public health department or other participating non-STD clinic sites) will collect specimens for *N. gonorrhoeae* culture testing from men and women seeking care for possible gonorrhea. Specimens that demonstrate *N. gonorrhoeae* (called “isolates”) will undergo antibiotic resistance testing within several days at the local public health laboratory. Laboratory results demonstrating resistance be rapidly communicated by the laboratory to the healthcare provider and designated health department staff member, who will initiate a field investigation.

Researchers will interview the patient (from whom the resistant specimen was collected) about risk factors and recent contacts, and will re-test to ensure cure. The health department will interview recent contacts and test them for gonorrhea. The participating health departments will collect and transmit to CDC, demographic and clinical data about persons tested for and diagnosed with gonorrhea in the participating clinics, results of local antibiotic resistance testing, and information about field investigations.

None of the data transmitted to CDC will contain any personally identifiable information. CDC will use the data to monitor resistance, understand risk factors for resistance, and identify new approaches to prevent the spread of resistance. CDC will receive transmitted data through its Secure Access Management Services (SAMS).

SAMS is an approved federal information technology system that provides authorized and validated users secure and encrypted access to CDC file transfer applications. The encrypted data will be stored in a secure CDC server with strictly controlled and restricted access rights.

Researchers will ship isolates each month to one of four Antibiotic Resistance Regional Laboratory Network (ARLN) laboratories for confirmatory antibiotic susceptibility testing and molecular characterization.

Under the SURRG protocol, the local SURRG data managers from each of the funded jurisdictions will abstract STD clinic data for patients tested for gonorrhea, receive data from non-STD clinic healthcare sites about persons tested for gonorrhea, receive resistance testing laboratory results from local public health laboratories, abstract data about field investigations, and will merge the data. Every two months, the local SURRG data manager will clean the data, remove personally identifiable information, and transmit the data to CDC. We estimate these data processes will take 16 hours every two months. Annually, the local SURRG data manager will send a final cumulative data file. Seven data transmissions/responses will occur.

Every two months, data managers at each of the participating non-STD clinic health centers will abstract and clean data and securely transmit the data to the local SURRG data manager. We estimate that it will take three hours each time data managers at each non-STD SURRG location abstract, clean, and transmit SURRG data.

Microbiologists at public health laboratories from each of the nine

SURRG funded jurisdictions will conduct antibiotic resistance testing on all *N. gonorrhoeae* isolates from all STD clinic sites and non-STD clinic sites participating in SURRG. Each test takes approximately 10 minutes of staff time, and testing of control strains will also be conducted approximately twice per week at each laboratory. On average, each jurisdiction will conduct approximately 600 resistance tests per year for patient care, plus 100 control strains per year for quality assurance. Thus, each grantee will perform approximately 700 tests per year. Every two months, a laboratory data manager will abstract test results and securely send the data file to the local SURRG data manager. We estimate that laboratory data managers will spend approximately one hour each time they abstract, clean, and transmit project data.

Health department staff will interview any person diagnosed with antibiotic-resistant gonorrhea or have a case of gonorrhea of public health significance index case, a diagnosed person’s social and sexual contacts, and the sexual contacts of the index case’s sexual contacts.

On average, each jurisdiction will identify four drug-resistant isolates each month. These isolates will spur field investigations, which will result in six additional interviews each month. We estimate 120 interviews will occur annually at each site (annual 1,080 interviews for the 9 sites). Each interview will take 30 minutes.

The total estimated annual burden hours are 2,976. Respondents receive federal funds to participate in this project. There are no additional costs to respondents other than their time.

ESTIMATE OF ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (hours)	Total burden hours
Local SURRG data manager .....	Facility, Laboratory and field Elements.	9	7	16	1,008
Data manager at non-STD clinic health centers.	Non-STD clinic Elements .....	18	6	3	324
Public Health Laboratory Microbiologist.	Laboratory Testing .....	9	700	10/60	1,050
Public Health Laboratory Data Manager.	Laboratory Elements .....	9	6	1	54
Gonorrhea Patients, Social and Sexual Contacts.	Field Investigation Elements .....	1,080	1	30/60	540

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

[Document Identifier: CMS-10237]

#### Agency Information Collection Activities: Submission for OMB Review; Comment Request

**AGENCY:** Centers for Medicare & Medicaid Services, HHS.

**ACTION:** Notice.

**SUMMARY:** The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

**DATES:** Comments on the collection(s) of information must be received by the OMB desk officer by December 18, 2017.

**ADDRESSES:** When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 OR, Email: [OIRA\\_submission@omb.eop.gov](mailto:OIRA_submission@omb.eop.gov).

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at Web site address at <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html>.
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to [Paperwork@cms.hhs.gov](mailto:Paperwork@cms.hhs.gov).
3. Call the Reports Clearance Office at (410) 786-1326.

#### FOR FURTHER INFORMATION CONTACT:

William Parham at (410) 786-4669.

**SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Applications for Part C Medicare Advantage, 1876 Cost Plans, and Employer Group Waiver Plans to Provide Part C Benefits; *Use:* This information collection includes the process for organizations wishing to provide healthcare services under MA and/or MA-PD plans must complete an application annually, file a bid, and receive final approval from CMS. The application process has two options for applicants that include: Request for new MA product or request for expanding the service area of an existing product. This collection process is the only mechanism for MA and/or MA-PD organizations to complete the required application process. CMS utilizes the application process as the means to review, assess and determine if applicants are compliant with the

current requirements for participation in the Medicare Advantage program and to make a decision related to contract award. *Form Number:* CMS-10237 (OMB control number: 0938-0935); *Frequency:* Yearly; *Affected Public:* Private sector (Business or other For-profits and Not-for-profit institutions); *Number of Respondents:* 380; *Total Annual Responses:* 380; *Total Annual Hours:* 6,246. (For policy questions regarding this collection contact Stacy Davis at 410-786-7813.)

Dated: November 13, 2017.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-10401]

#### Agency Information Collection Activities: Submission for OMB Review; Comment Request

**AGENCY:** Centers for Medicare & Medicaid Services, HHS.

**ACTION:** Notice.

**SUMMARY:** The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

**DATES:** Comments on the collection(s) of information must be received by the OMB desk officer by December 18, 2017.

**ADDRESSES:** When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 OR Email: [OIRA\\_omb.eop.gov](mailto:OIRA_omb.eop.gov).

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at Web site address at <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html>.
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to [Paperwork@cms.hhs.gov](mailto:Paperwork@cms.hhs.gov).
3. Call the Reports Clearance Office at (410) 786-1326.

**FOR FURTHER INFORMATION CONTACT:** William Parham at (410) 786-4669.

**SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide

information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Standards Related to Reinsurance, Risk Corridors, and Risk Adjustment; *Use:* Extension of data collection required to run Reinsurance, Risk Corridors, and Risk Adjustment programs pending complete revision in near future to update and remove obsolete programs.; *Form Number:* CMS-10401 (OMB control number: 0938-1155); *Frequency:* Annually; *Affected Public:* Health Insurance Issuers; *Number of Respondents:* 2,400; *Total Annual Responses:* 15,600,081,744; *Total Annual Hours:* 19,281,600. (For policy questions regarding this collection contact Ernest Ayukawa at 301-492-5213.)

Dated: November 13, 2017.  
**William N. Parham, III,**  
*Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.*

[FR Doc. 2017-24883 Filed 11-15-17; 8:45 am]  
**BILLING CODE 4120-01-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Administration for Children and Families**

**Proposed Information Collection Activity; Comment Request**

*Proposed Projects:* None.

*Title:* Interstate Administrative Subpoena and Notice of Interstate Lien.  
*OMB No.:* 0970-0152.

*Description:* Section 452(a)(11) of the Social Security Act requires the Secretary of the Department of Health and Human Services to promulgate a form for administrative subpoenas and imposition of liens used by State child support enforcement (Title IV-D) agencies. The Interstate Administrative Subpoena is used to collect information for the establishment, modification and enforcement of child support orders in interstate cases. Section 454(9)(E) of the Social Security Act requires each State to cooperate with any other State in using the federal form for issuance of administrative subpoenas and imposition of liens in interstate child support cases. Tribal IV-D agencies are not required to use this form but may choose to do so.

*Respondents:* State, local or Tribal agencies administering a child support enforcement program under title IV-D of the Social Security Act.

**ANNUAL BURDEN ESTIMATES**

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Administrative Subpoena .....	31,344	1	0.50	15,038
Notice of Lien .....	1,916,891	1	0.50	946,037

*Estimated Total Annual Burden Hours:* 961,709.

In compliance with the requirements of the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chap 35), the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW.,

Washington, DC 20201. Attn: ACF Reports Clearance Officer. Email address: [infocollection@acf.hhs.gov](mailto:infocollection@acf.hhs.gov). All requests should be identified by the title of the information collection.

*The Department specifically requests comments on:* (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the

information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

**Robert Sargis,**  
*Reports Clearance Officer.*

**BILLING CODE 4184-01-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES****Food and Drug Administration****[Docket No. FDA-2017-D-6209]****Assessing User Fees Under the Biosimilar User Fee Amendments of 2017; Draft Guidance for Industry; Availability****AGENCY:** Food and Drug Administration, HHS.**ACTION:** Notice of availability.

**SUMMARY:** The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “Assessing User Fees Under the Biosimilar User Fee Amendments of 2017.” This draft guidance concerns FDA’s implementation of the Biosimilar User Fee Amendments of 2017 (BsUFA II) and certain intended changes in policies and procedures surrounding its application.

**DATES:** Submit either electronic or written comments on the draft guidance by January 16, 2018 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

**ADDRESSES:** You may submit comments on any guidance at any time as follows:

*Electronic Submissions*

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

*Written/Paper Submissions*

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

*Instructions:* All submissions received must include the Docket No. FDA-2017-D-6209 for “Assessing User Fees Under the Biosimilar User Fee Amendments of 2017.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions—*To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

*Docket:* For access to the docket to read background documents and the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the

docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002; or to the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

**FOR FURTHER INFORMATION CONTACT:** Beena Alex, Division of User Fee Management and Budget Formulation, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Rm. 2185, Silver Spring, MD 20993, 301-796-7900, [CDERCollections@fda.hhs.gov](mailto:CDERCollections@fda.hhs.gov); or to Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

**SUPPLEMENTARY INFORMATION:****I. Background**

FDA is announcing the availability of a draft guidance for industry entitled “Assessing User Fees Under the Biosimilar User Fee Amendments of 2017.” This draft guidance concerns the implementation of BsUFA II, including an explanation about the new fee structure and types of fees for which entities are responsible. BsUFA II extends FDA’s authority to collect user fees from fiscal year 2018 to 2022 and introduces a number of technical revisions that affect what fees are collected and how fees are collected. Fees authorized by this legislation help fund the process for the review of biosimilar biological product applications and have played an important role in expediting the review and approval process.

BsUFA II authorizes biosimilar biological product development

program fees (BPD fees), biosimilar biological product application fees, and biosimilar biological product program fees. This draft guidance describes when these fees are incurred and the process by which applicants can submit payments. The draft guidance also provides information on consequences of failing to pay BsUFA II fees and the processes for submitting reconsideration and appeal requests.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on assessing user fees under BsUFA II. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

**II. Paperwork Reduction Act of 1995**

Under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party.

Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the collection of information associated with this document, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Assessing User Fees Under the Biosimilar User Fee Amendments of 2017: Draft Guidance for Industry**

*OMB Control Number 0910—NEW*

This information collection supports “Assessing User Fees Under the

Biosimilar User Fee Amendments of 2017: Draft Guidance for Industry.” The Federal Food, Drug, and Cosmetic Act as amended by the Biosimilar User Fee Act of 2012 and recently renewed in 2017 (BsUFA II) under the FDA Reauthorization Act of 2017, authorizes FDA to assess and collect user fees from companies that produce biosimilar biological products in conjunction with the review of biosimilar biological product applications. The draft guidance includes processing and policies for the initial and the annual BPD fees; the BPD discontinuation process requirements and BPD reactivation fees; process and policies for biosimilar biological product application fees including exceptions to the application fees and refund of fees; process and policies for the small business waiver of the biosimilar application fee; and implementation of the biosimilar biological product program fee.

The burdens associated with requesting a small business waiver of BsUFA fees and the associated burdens for new activities as noted in the draft guidance are listed in table 1.

FDA estimates the annual burden of these new collections of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN <sup>1</sup>

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response (hours)	Total hours
Request for discontinuation from BPD program .....	2	1	2	1	2
Request to move products to discontinued section of the biosimilar list .....	5	1	5	.5	2.5
Small business waiver of the BsUFA application fee .....	1	1	1	16	16
—Reconsiderations .....	1	1	1	24	24
—Appeals .....	1	1	1	12	12
Annual Fee Determination Survey .....	35	1	35	1	35
Annual BsUFA Fees Correspondence .....	35	1	35	2	70
<b>Total .....</b>					<b>161.5</b>

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

This draft guidance also refers to previously approved collections of information found in FDA forms developed to support its user fee program. Specifically, the draft guidance refers to Form FDA 3792, Form FDA 3913, and Form FDA 3971, which have been approved under OMB control numbers 0910–0718, 0910–0805, and 0910–0693, respectively. The draft guidance also refers to previously

approved collections of information found in FDA regulations. The collections of information in 21 CFR part 312 are currently approved under OMB control number 0910–0014; the collections of information regarding new drug applications and biologics license applications are approved under OMB control numbers 0910–0001 and 0910–0338, respectively.

**III. Electronic Access**

Persons with access to the Internet may obtain the draft guidance at either <https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <https://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/>

*default.htm*, or <https://www.regulations.gov>.

Dated: November 13, 2017.

**Anna K. Abram,**

*Deputy Commissioner for Policy, Planning, Legislation, and Analysis.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-1981-N-0245 (Formerly 81N-0080)]

#### **Mepergan Fortis Capsules; Final Decision on Proposal To Refuse Approval of Supplemental New Drug Application; Availability of Final Decision**

**AGENCY:** Food and Drug Administration; HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA or the Agency) is announcing that the Initial Decision of the Administrative Law Judge (ALJ), to refuse approval of the supplemental new drug application (sNDA) for Mepergan Fortis Capsules (MFC) (meperidine HCl, promethazine HCl), is the final decision of the Commissioner by operation of law. In the Initial Decision, the ALJ found that MFC had not been shown to be supported by substantial evidence consisting of adequate and well-controlled studies to be effective for sedation and analgesia in patients with concurrent moderate pain and apprehension, such as postoperative and post-trauma patients with those symptoms; that the drug did not satisfy the combination drug policy; and that it is a “new drug.” The sNDA applicant filed exceptions to the ALJ’s Initial Decision. FDA recently requested that the current owner of the sNDA application affirm its desire to pursue the appeal of the ALJ’s Initial Decision; however, the applicant did not affirm its desire to pursue the appeal within the specified timeframe. Accordingly, FDA now deems those exceptions as withdrawn. Consequently, the proceeding is in the same procedural position as if no exceptions to the ALJ’s Initial Decision had been filed; therefore, the ALJ’s Initial Decision has become the final decision of the Commissioner by operation of law.

**DATES:** This final decision is effective November 16, 2017.

**ADDRESSES:** For access to the docket, go to <https://www.regulations.gov> and

insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852 between 9 a.m. and 4 p.m., Monday through Friday. Publicly available submissions may be seen in the docket.

#### **FOR FURTHER INFORMATION CONTACT:**

Rachael Vieder Linowes, Office of Scientific Integrity, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4206, Silver Spring, MD 20993, 240-402-5931.

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

In 1962, the Federal Food, Drug, and Cosmetic Act (the FD&C Act) was amended by the Drug Amendments Act of 1962, and these amendments provided that new drugs could no longer be approved unless both safety and efficacy had been established for them. As amended, the FD&C Act also required FDA to evaluate drugs approved as safe between 1938 and 1962 to determine whether such drugs were effective and to withdraw approval for any new drug application (NDA) where there was not substantial evidence of the drug’s effectiveness. The person contesting the withdrawal of the approval had the burden of coming forward with evidence of effectiveness for the drug. FDA’s review of these pre-1962 drugs is known as the Drug Efficacy Study Implementation (DESI) program.

In a document published in the **Federal Register** of April 20, 1972 (37 FR 7827), after evaluating reports received from the National Academy of Sciences/National Research Council, Drug Efficacy Study Group, and other available evidence, FDA classified MFC as “possibly effective” for moderate to moderately severe pain. This document also stated that no NDA had been approved or deemed approved for MFC and that additional evidence needed to be submitted to FDA to establish MFC’s effectiveness. Thereafter, Wyeth, a division of American Home Products (Wyeth), submitted a supplement to its approved NDA 11-730 (Mepergan Injection) for MFC (NDA 11-730, S-003). In a document published in the **Federal Register** of September 18, 1981 (46 FR 46404), the Director of the Bureau of Drugs (now the Center for Drug Evaluation and Research) proposed to refuse approval of the sNDA and offered Wyeth the opportunity for a hearing.

Wyeth submitted its request for a hearing and, by a document published

in the **Federal Register** of December 31, 1984 (49 FR 50788), the Office of the Commissioner granted the hearing request. Following the submission of written testimony and documentary evidence, an ALJ, Daniel J. Davidson, conducted a hearing from January 14 to 17, 1986. He issued his Initial Decision on December 4, 1987. The ALJ found that: (1) The effectiveness of MFC had not been proven by substantial evidence of adequate and well-controlled clinical trials, (2) the requirements of the combination drug policy had not been met, and (3) MFC is a new drug under 21 U.S.C. 321(p). Wyeth timely appealed the ALJ’s Initial Decision by filing exceptions with the Commissioner under 21 CFR 12.125.

On August 23, 2017, FDA sent a letter to West-Ward Pharmaceuticals Corporation (West-Ward), successor to Wyeth, to determine whether West-Ward remained interested in pursuing its appeal of the ALJ’s Initial Decision. FDA informed the company that if it did not respond and affirm its desire to pursue its appeal by September 21, 2017, the Office of the Commissioner would conclude that West-Ward no longer wishes to pursue the appeal of the ALJ’s Initial Decision and will proceed as if the appeal has been withdrawn. The Office of the Commissioner did not receive a response from West-Ward by the given date; therefore, the Commissioner now deems the exceptions withdrawn.

##### **II. Conclusion and Order**

Given that the exceptions have been deemed withdrawn, this proceeding is now in the same procedural posture as if no exceptions had ever been filed. When parties do not file exceptions to the ALJ’s Initial Decision, and the Commissioner does not file a notice of review, the ALJ’s Initial Decision becomes the final decision of the Commissioner (see 21 CFR 12.120(e)). FDA will publish a notice in the **Federal Register** when an initial decision becomes the final decision of the Commissioner without appeal to or review by the Commissioner (see 21 CFR 12.120(f)).

Therefore, the ALJ’s Initial Decision is the final decision of the Commissioner effective November 16, 2017. Pursuant to the findings in the ALJ’s Initial Decision, under section 505(d) of the FD&C Act (21 U.S.C. 355(d)) and under the authority delegated by the Secretary of Health and Human Services, the Commissioner finds that there is a lack of substantial evidence that MFC will have the effect it purports or is represented to have under the conditions of use prescribed,

recommended, or suggested in its labeling for sedation and analgesia in patients with concurrent moderate pain and apprehension, such as postoperative and post-trauma patients with those symptoms. The Commissioner further finds that MFC does not meet the combination drug policy in 21 CFR 300.50 and that it is a “new drug” within the meaning of 21 U.S.C. 321(p). Therefore, approval of the sNDA for MFC is denied. Distribution of products subject to the ALJ’s Initial Decision in interstate commerce without an approved application is prohibited and subject to regulatory action (see, e.g., sections 505(a) and 301(d) (21 U.S.C. 331(d)) of the FD&C Act).

The full text of the ALJ’s Initial Decision may be seen in the Dockets Management Staff and in this docket (see **ADDRESSES**).

Dated: November 7, 2017.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2017-N-6292]

#### **Bone, Reproductive and Urologic Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice; establishment of a public docket; request for comments.

**SUMMARY:** The Food and Drug Administration (FDA or Agency) announces a forthcoming public advisory committee meeting of the Bone, Reproductive and Urologic Drugs Advisory Committee. The general function of the committee is to provide advice and recommendations to the Agency on FDA’s regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

**DATES:** The meeting will be held on January 10, 2018, from 8 a.m. to 5 p.m.

**ADDRESSES:** College Park Marriott Hotel and Conference Center, Chesapeake Ballroom, 3501 University Blvd. East, Hyattsville, MD 20783. The conference center’s telephone number is 301-985-7300. Answers to commonly asked questions about FDA Advisory Committee meetings may be accessed at: <https://www.fda.gov/Advisory>

*Committees/AboutAdvisoryCommittees/ucm408555.htm.*

FDA is establishing a docket for public comment on this meeting. The docket number is FDA-2017-N-6292. The docket will close on January 9, 2018. Submit either electronic or written comments on this public meeting by January 9, 2018. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 9, 2018. The <https://www.regulations.gov> electronic filing system will accept comments until midnight Eastern Time at the end of January 9, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Comments received on or before December 22, 2017, will be provided to the committee. Comments received after that date will be taken into consideration by the Agency.

You may submit comments as follows:

#### *Electronic Submissions*

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

#### *Written/Paper Submissions*

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA-305), Food and

Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

*Instructions:* All submissions received must include the Docket No. FDA-2017-N-6292 for “Bone, Reproductive and Urologic Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments.” Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions—*To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

*Docket:* For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the

Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

**FOR FURTHER INFORMATION CONTACT:**

Kalyani Bhatt, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-9001, Fax: 301-847-8533, email: [BRUDAC@fda.hhs.gov](mailto:BRUDAC@fda.hhs.gov), or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency O2BC;s Web site at <https://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

**SUPPLEMENTARY INFORMATION:**

*Agenda:* The committee will discuss new drug application (NDA) 208088, oral testosterone undecanoate capsules, submitted by Lipocine Inc. for the proposed indication of testosterone replacement in males for conditions associated with a deficiency or absence of endogenous testosterone: primary hypogonadism (congenital or acquired) and hypogonadotropic hypogonadism (congenital or acquired).

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA O2BC;s Web site after the meeting. Background material is available at <https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link.

*Procedure:* Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. All electronic and written submissions submitted to the Docket (see the **ADDRESSES** section) on or before December 22, 2017, will be provided to the committee. Oral presentations from the public will be scheduled between approximately 1 p.m. and 2 p.m. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of

the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before December 14, 2017. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by December 15, 2017.

Persons attending FDA's advisory committee meetings are advised that the Agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require special accommodations due to a disability, please contact Kalyani Bhatt at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our Web site at <https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: November 13, 2017.

**Anna K. Abram,**

*Deputy Commissioner for Policy, Planning, Legislation, and Analysis.*

**BILLING CODE 4164-01-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**National Institutes of Health**

**Government-Owned Inventions; Availability for Licensing**

**AGENCY:** National Institutes of Health, HHS.

**ACTION:** Notice.

**SUMMARY:** The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S.

**FOR FURTHER INFORMATION CONTACT:** Licensing information and copies of the patent applications listed below may be obtained by emailing the indicated licensing contact at the National Heart,

Lung, and Blood, Office of Technology Transfer and Development Office of Technology Transfer, 31 Center Drive Room 4A29, MSC2479, Bethesda, MD 20892-2479; telephone: 301-402-5579. A signed Confidential Disclosure Agreement may be required to receive copies of the patent applications.

**SUPPLEMENTARY INFORMATION:** This notice is in accordance with 35 U.S.C. 209 and 37 CFR part 404 to achieve commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing. A description of the technology follows.

**Chimeric Antibodies Against Hepatitis B e-Antigen**

*Description of Technology:* The invention relates to recombinant chimeric rabbit/human monoclonal antibody fragments (Fabs) against hepatitis B Virus e-antigen (HBeAg). Viral hepatitis is the seventh leading cause of death worldwide. Hepatitis B core antigen (HBcAg) forms an icosahedral structure containing the viral genome. Both the HBcAg and the HBeAg of interest here are expressed by two different start codons of the viral C gene. Unlike the related HBcAg which activates type 1 T helper (Th1) cells leading to immune attack, the HBeAg activates Th2 cells which promote immune tolerance. The long-term persistence of HBeAg is associated with the development of hepatocellular carcinoma. Conversely, HBeAg seroconversion (from HBeAg carrier to anti-HBeAg carrier) is a marker for successful therapy of chronically infected patients. The presently phage display engineered antibody has potential for anti-hepatitis B virus therapeutic interventions.

*Potential Commercial Applications:*

- Hepatitis B therapy.
- Hepatocellular carcinoma prophylaxis.

*Development Stage:*

- In vitro data available.

*Inventors:* Paul Winfield, Norman Watts, Alasdair Steven (all of NIAMS).

*Intellectual Property:* HHS Reference No. E-192-2017/0-US-01.

- U.S. Provisional Patent Application 62/534,603 filed July 19, 2017.

*Licensing Contact:* Michael Shmilovich, Esq. CLP; 301-435-5019; [shmilovm@nih.gov](mailto:shmilovm@nih.gov).

*Collaborative Research Opportunity:* The National Institute of Environmental Health Sciences seeks statements of capability or interest from parties interested in collaborative research to

further develop and evaluate, please contact Cecilia Pazman, Ph.D., Technology Development Specialist, Office of Technology Transfer, National Heart, Lung, and Blood Institute, Phone: (301) 594-4273; [pazmance@nhlbi.nih.gov](mailto:pazmance@nhlbi.nih.gov).

Dated: November 6, 2017.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**National Institutes of Health**

**National Institute of Allergy and Infectious Diseases; Notice of Closed Meetings**

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* National Institute of Allergy and Infectious Diseases Special Emphasis Panel, Dysregulation of Immune Cell Regulatory Pathways by MTB in the Context of HIV Infection (R61/R33).

*Date:* December 11–12, 2017.

*Time:* 8:00 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 5601 Fishers Lane, Rockville, MD 20892 (Telephone Conference Call).

*Contact Person:* J. Bruce Sundstrom, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, Room 3G11A, National Institutes of Health/NIAID, 5601 Fishers Lane, MSC 9823, Bethesda, MD 20892-9823, 240-669-5045, [sundstromj@niaid.nih.gov](mailto:sundstromj@niaid.nih.gov).

*Name of Committee:* National Institute of Allergy and Infectious Diseases Special Emphasis Panel, Global Infectious Disease Research Administration Development Award For Low-And Middle-Income Country Institutions (G11).

*Date:* December 13, 2017.

*Time:* 1:00 p.m. to 2:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 5601 Fishers Lane, Rockville, MD 20892 (Telephone Conference Call).

*Contact Person:* Dharmendar Rathore, Ph.D., Senior Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, Room 3G30, National Institutes of Health/NIAID, 5601 Fishers Lane, MSC 9823, Bethesda, MD 20892-9823, 240-669-5058, [rathored@mail.nih.gov](mailto:rathored@mail.nih.gov).

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**National Institutes of Health**

**Submission for OMB Review; 30-Day Comment Request; NCI Cancer Genetics Services Directory Web-Based Application and Update Mailer (National Cancer Institute)**

**AGENCY:** National Institutes of Health, HHS.

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

**DATES:** Comments regarding this information collection are best assured of having their full effect if received within 30-days of the date of this publication.

**ADDRESSES:** Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, [OIRA\\_submission@omb.eop.gov](mailto:OIRA_submission@omb.eop.gov) or by fax to 202-395-6974, Attention: Desk Officer for NIH.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Margaret Beckwith, Office of Cancer Content, Office of Communications and Public Liaison (OCPL), 9609 Medical Center Drive, Rockville, MD 20892 or call non-toll-free number 240-276-6600 or email

your request, including your address to: [nciocpl@mail.nih.gov](mailto:nciocpl@mail.nih.gov).

**SUPPLEMENTARY INFORMATION:** This proposed information collection was previously published in the **Federal Register** on September 5, 2017 page 41971 (82 FR 41971) and allowed 60 days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Cancer Institute (NCI), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

*Proposed Collection:* NCI Cancer Genetics Services Directory Web-Based Application and Update Mailer, 0925-0639, Exp., date 10/31/2017, Reinstatement without change, National Cancer Institute (NCI), National Institutes of Health (NIH).

*Need and Use of Information Collection:* The Office of Communications and Public Liaison has created the NCI Cancer Genetics Services Directory on NCI's Web site *Cancer.gov*. This directory is a searchable collection of information about professionals who provide services related to cancer genetics. These services include cancer risk assessment, genetic counseling, and genetic susceptibility testing. The professionals have applied to be in the directory using an online application form and have met basic criteria outlined on the form.

There are currently 552 genetics professionals listed in the directory. Approximately 30-60 new professionals are added to the directory each year. The applicants are nurses, physicians, genetic counselors, and other professionals who provide services related to cancer genetics. The information collected on the application form includes name, professional qualifications, practice locations, and the area of specialization. The information is updated annually using a Web-based update mailer that mirrors the application form.

The NCI Cancer Genetics Services Directory is a unique resource for cancer patients and their families who are

looking for information about their family risk of cancer and genetic counseling. Collecting applicant information and verifying it annually by using the NCI Cancer Genetics Services

Directory Web-based Application Form and Update Mailer is important for providing this information to the public and for keeping it current.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 180.

## ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden hours
Web-based Application Form .....	Genetics Professional .....	60	1	30/60	30
Web-based Update Mailer .....	Genetics Professional .....	600	1	15/60	150
Totals .....	.....	660	660	.....	180

Dated: November 7, 2017.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institutes of Health

#### Prospective Grant of Exclusive Patent Commercialization License: Direct Reading Detection Kits for Surface Contamination by Antineoplastic Drugs

**AGENCY:** Centers for Disease Control and Prevention, National Institutes of Health.

**ACTION:** Notice.

**SUMMARY:** The National Institute of Allergy and Infectious Diseases, an institute of the National Institutes of Health, Department of Health and Human Services, on behalf of the Centers for Disease Control and Prevention, Department of Health and Human Services, is contemplating the grant of an exclusive patent commercialization license to Becton, Dickinson and Company, located in Franklin Lakes, New Jersey, to practice the inventions embodied in the patent applications listed in the Supplementary Information section of this notice.

**DATES:** Only written comments and/or applications for a license which are received by the Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases on or before December 1, 2017 will be considered.

**ADDRESSES:** Requests for copies of the patent applications, inquiries, and comments relating to the contemplated exclusive patent commercialization license should be directed to: Karen Surabian, Licensing and Patenting Manager, Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases, 5601 Fishers Lane, Suite 2G, MSC9804, Rockville, MD 20852-9804, phone number 301-594-9719, or [karen.surabian@nih.gov](mailto:karen.surabian@nih.gov).

**SUPPLEMENTARY INFORMATION:** The following represents the intellectual property to be licensed under the prospective agreement: HHS Reference No. E-162-2013/0-US-01, United States Provisional Patent Application Serial Number 61/672,059, filed 07/16/2012; HHS Reference No. E-162-2013/0-PCT-02, PCT Patent Application

Serial Number PCT/US2013/050688, filed 07/16/2013; HHS Reference No. E-162-2013/0-US-03, United States Patent Application Serial Number 13/943,430, filed 07/16/2013; HHS Reference No. E-162-2013/0-EP-04, European Patent Application Serial Number 13819718.1, filed 02/05/2015; and HHS Reference No. E-162-2013/0-JP-05, Japanese Patent Application Serial Number 2015-523183, filed 01/08/2015. All rights in these inventions have been assigned to the Government of the United States of America.

The prospective exclusive patent commercialization license territory may be worldwide and the field of use may be limited to: "Use of the licensed patent rights for the development, manufacture, and sale of a lateral flow device for detection of antineoplastic drugs from surfaces".

Many types of cancers are treated with antineoplastic drugs, also known as anti-cancer drugs or chemotherapy. Exposure of healthcare workers to these hazardous drugs from contaminated surfaces may cause acute and long-term effects. Approximately eight (8) million United States healthcare workers are potentially exposed to these hazardous drugs. Although there are potential therapeutic benefits of hazardous drugs that outweigh the risks of side effects for ill patients, healthcare workers are exposed to the risk with the same side effects with no therapeutic benefit. Occupational exposures to hazardous drugs can lead to skin rashes and major reproductive effects, which include increased fetal loss, congenital malformations, low birth weight, congenital abnormalities, and infertility. The risk of cancer is also increased after exposure to these drugs.

This invention, developed within the National Institute for Occupational Safety and Health at the Centers for Disease Control and Prevention, describes a lateral flow assay-based antineoplastic drug detection method that utilizes antibodies specific for individual drugs. It uses detectors for the assessment of drug residues on surfaces, which can be incorporated into small, portable drug detection devices that allow healthcare workers to sample surfaces in near real time, avoiding the need to take samples back to the laboratory to be tested.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive patent commercialization license will be royalty bearing and may be granted unless within fifteen (15) days from the date of this published notice, the National Institute of Allergy and Infectious Diseases receives written

evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

Complete applications for a license in the prospective field of use that are timely filed in response to this notice will be treated as objections to the grant of the contemplated exclusive patent commercialization license. Comments and objections submitted in response to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the *Freedom of Information Act*, 5 U.S.C. 552.

Dated: November 9, 2017.

### National Institutes of Health

#### National Eye Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the Board of Scientific Counselors, National Eye Institute.

The meeting will be closed to the public as indicated below in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C., as amended for the review, discussion, and evaluation of individual grant applications conducted by the NATIONAL EYE INSTITUTE, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* Board of Scientific Counselors, National Eye Institute.

*Date:* December 3-5, 2017.

*Time:* 6:00 p.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Building 31, Conference Room 6C6, 31 Center Drive, Bethesda, MD 20892.

*Contact Person:* Sheldon S. Miller, Ph.D., Scientific Director, National Institutes of Health, National Eye Institute, Bethesda, MD 20892, (301) 451-6763.

Information is also available on the Institute's/Center's home page: [www.nei.nih.gov](http://www.nei.nih.gov), where an agenda and any additional information for the meeting will be posted when available.

(Catalogue of Federal Domestic Assistance Program Nos. 93.867, Vision Research, National Institutes of Health, HHS)

Dated: November 9, 2017.

## DEPARTMENT OF HOMELAND SECURITY

### Federal Emergency Management Agency

[Internal Agency Docket No. FEMA-4339-DR; Docket ID FEMA-2017-0001]

#### Puerto Rico; Amendment No. 5 to Notice of a Major Disaster Declaration

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Notice.

**SUMMARY:** This notice amends the notice of a major disaster for the Commonwealth of Puerto Rico (FEMA-4339-DR), dated September 20, 2017, and related determinations.

**DATES:** This amendment was issued November 2, 2017.

**FOR FURTHER INFORMATION CONTACT:** Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-2833.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that, in a letter dated November 2, 2017, the President amended the cost-sharing arrangements regarding Federal funds provided under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the "Stafford Act"), in a letter to Brock Long, Administrator, Federal Emergency Management Agency, Department of Homeland Security, under Executive Order 12148, as follows:

I have determined that the damage in certain areas of the Commonwealth of Puerto Rico resulting from Hurricane Maria beginning on September 17, 2017, and continuing, is of sufficient severity and magnitude that special cost-sharing arrangements are warranted regarding Federal funds provided under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the "Stafford Act").

Due to the extraordinary level of impact to the Commonwealth's infrastructure caused by Hurricane Maria as well as a debt burden of more than \$120 billion subject to court-supervised debt restructuring, and recognizing the Commonwealth's election on October 30, 2017, to participate in alternative procedures for all large project funding for Public Assistance Categories C-G pursuant to section 428 of the Stafford Act, I amend my declarations of September 20, 2017 and September 26, 2017, to authorize Federal funds for all categories of Public Assistance at 90 percent of total eligible costs, except for assistance previously approved at 100 percent, subject to the following grant conditions, which I direct you to reflect in the agreement between the Commonwealth and the Federal Emergency Management Agency (FEMA):

1. The Commonwealth establish a Commonwealth grant oversight authority, supported by third-party experts, to perform as the grant recipient for Public Assistance and Hazard Mitigation funding to ensure sound project management and enhanced, centralized control and oversight over the distribution of FEMA grant funds;

2. All large project funding for Public Assistance Categories C-G be obligated by FEMA only through alternative procedures as FEMA shall establish under section 428 of the Stafford Act, including third-party independent expert validation of estimates for projects exceeding a threshold FEMA shall establish consistent with law; and

3. Hazard Mitigation grant funding available under section 404 of the Stafford Act be prioritized toward protecting Federal investments in Puerto Rico's public infrastructure.

This adjustment to Commonwealth and local cost sharing applies only to Public Assistance costs and direct Federal assistance eligible for such adjustments under the law. The Stafford Act specifically prohibits a similar adjustment for funds provided for Other Needs Assistance (section 408) and the Hazard Mitigation Grant Program (section 404). These funds will continue to be reimbursed at 75 percent of total eligible costs.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

**Brock Long,**

**BILLING CODE 9111-23-P**

**DEPARTMENT OF HOMELAND SECURITY****U.S. Immigration and Customs Enforcement**

[OMB Control Number 1653-0049]

**Agency Information Collection Activities; Comment Request; Extension of an Information Collection**

**AGENCY:** U.S. Immigration and Customs Enforcement, Department of Homeland Security.

**ACTION:** 30-Day notice.

The Department of Homeland Security (DHS), U.S. Immigration and Customs Enforcement (USICE) is submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection notice was previously published in the **Federal Register** on August 22, 2017, Vol. 82 FR 39899, allowing for a 60-day public comment period. USICE did not receive any comment relating to the 60-day notice. The purpose of this notice is to allow an additional 30 days for public comments.

Written comments and/or suggestions regarding the items contained in this notice, especially regarding the estimated public burden and associated response time, must be directed to the OMB Desk Officer for U.S. Immigration and Customs Enforcement, Department of Homeland Security and sent via electronic mail to [dhsdeskofficer@omb.eop.gov](mailto:dhsdeskofficer@omb.eop.gov). All submissions received must include the agency name and the OMB Control Number 1653-0049.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or

other forms of information technology, e.g., permitting electronic submission of responses.

**Overview of This Information Collection**

(1) *Type of Information Collection:* Extension of a currently approved information collection.

(2) *Title of the Form/Collection:* Suspicious/Criminal Activity Tip Reporting.

(3) *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* U.S. Immigration and Customs Enforcement.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individual or Households. The Department of Homeland Security (DHS) tip reporting capability will facilitate the collection of information from the public and law enforcement partners regarding allegations of crimes enforced by DHS.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 122,723 responses at 10 minutes (.166) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 20,372 annual burden hours.

Dated: November 13, 2017.

**Scott Elmore,**

*PRA Clearance Officer, Office of the Chief Information Officer, U.S. Immigration and Customs Enforcement, Department of Homeland Security.*

**DEPARTMENT OF HOMELAND SECURITY****U.S. Citizenship and Immigration Services**

[OMB Control Number 1615-0034]

**Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection; Notice of Appeal of Decision Under Section 210 or 245A**

**AGENCY:** U.S. Citizenship and Immigration Services, Department of Homeland Security.

**ACTION:** 60-Day notice.

**SUMMARY:** The Department of Homeland Security (DHS), U.S. Citizenship and Immigration (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension. In accordance with the Paperwork Reduction Act (PRA) of 1995, the

information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

**DATES:** Comments are encouraged and will be accepted for 60 days until January 16, 2018.

**ADDRESSES:** All submissions received must include the OMB Control Number 1615-0034 in the body of the letter, the agency name and Docket ID USCIS-2007-0014. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Online.* Submit comments via the Federal eRulemaking Portal Web site at <http://www.regulations.gov> under e-Docket ID number USCIS-2007-0014;

(2) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW., Washington, DC 20529-2140.

**FOR FURTHER INFORMATION CONTACT:** USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommies, Chief, 20 Massachusetts Avenue NW., Washington, DC 20529-2140, telephone number 202-272-8377 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at <http://www.uscis.gov>, or call the USCIS National Customer Service Center at 800-375-5283 (TTY 800-767-1833).

**SUPPLEMENTARY INFORMATION:**

**Comments**

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at <http://www.regulations.gov> and enter USCIS-2007-0014 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal

information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of <http://www.regulations.gov>.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

**Overview of This Information Collection**

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Notice of Appeal of Decision Under Section 210 or 245A.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I-694; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* *Primary:* Individuals or households. USCIS uses the information provided on Form I-694 in considering the appeal from a finding that an applicant is ineligible for legalization under section 210 and 245A of the Act or is ineligible for a related waiver of inadmissibility.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I-694 is 15 and the estimated hour burden per response is 1.5 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual

hour burden associated with this collection is 22.5 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$1,893.75.

Dated: November 13, 2017.

**BILLING CODE 9111-97-P**

**DEPARTMENT OF THE INTERIOR**

**Bureau of Indian Affairs**

[189A2100DD/AAKC001030/AOA501010.999900 253G; OMB Control Number 1076-0169]

**Agency Information Collection Activities; Probate of Indian Estates, Except for Members of the Osage Nation and Five Civilized Tribes**

**AGENCY:** Bureau of Indian Affairs, Interior.

**ACTION:** Notice of Information Collection; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, the Bureau of Indian Affairs (BIA) is proposing to renew an information collection.

**DATES:** Interested persons are invited to submit comments on or before January 16, 2018.

**ADDRESSES:** Send your comments on the information collection request (ICR) by mail to Ms. Charlene Toledo, Bureau of Indian Affairs, Office of Trust Services, Division of Probate Services 2600 N Central Ave., STE MS 102, Phoenix, AZ 85004; or email to [Charlene.Toledo@bia.gov](mailto:Charlene.Toledo@bia.gov). Please reference OMB Control Number 1076-0169 in the subject line of your comments.

**FOR FURTHER INFORMATION CONTACT:** To request additional information about this ICR, contact Ms. Charlene Toledo by telephone at (505) 563-3371.

**SUPPLEMENTARY INFORMATION:** In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information

collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of the BIA (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the BIA enhance the quality, utility, and clarity of the information to be collected; and (5) how might the BIA minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that

your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

*Abstract:* The Secretary of the Interior probates the estates of individual Indians owning trust or restricted property in accordance with 25 U.S.C. 372–373. In order to compile the probate file, the BIA must obtain the family heirship data regarding the deceased from individuals and the tribe. This section contains the procedures that the Secretary of the Interior follows to initiate the probate of the trust estate for a deceased person who owns an interest in trust or restricted property. The Secretary must perform the necessary research of family heirship data collection requests in this part to obtain the information necessary to compile an accurate and complete

probate file. This file will be forwarded to the Office of Hearing and Appeals (OHA) for disposition. Responses to these information collection requests are required to create a probate file for the decedent’s estate so that OHA can determine the heirs of the decedent and order distribution of the trust assets in the decedent’s estate.

*Title of Collection:* Probate of Indian Estates, Except for Members of the Osage Nation and Five Civilized Tribes.

*OMB Control Number:* 1076–0169.

*Form Number:* N/A.

*Type of Review:* Extension without change of currently approved collection.

*Respondents/Affected Public:* Indians, businesses, and tribal authorities.

*Total Estimated Number of Annual Respondents:* 65,751.

*Total Estimated Number of Annual Responses:* 76,695.

*Estimated Completion Time per Response:* Ranges from 0.5 hours to 45.5 hours (see table below).

CFR Section	Description of info collection requirement	Hours per response
15.9 .....	File affidavit to self-prove will, codicil, or revocation .....	0.5
15.9 .....	File supporting affidavit to self-prove will, codicil, or revocation .....	0.5
15.104 .....	Reporting req.- death certificate .....	5
15.105 .....	Provide probate documents .....	45.5
15.203 .....	Provide tribal information for probate file .....	2
15.301 .....	Reporting funeral expenses .....	2
15.305 .....	Provide info on creditor claim (6 per probate) .....	0.5

*Total Estimated Number of Annual Burden Hours:* 1,037,513 hours.

*Respondent’s Obligation:* A response is required to obtain a benefit.

*Frequency of Collection:* One per respondent each year with the exception of tribes that may be required to provide enrollment information on an average of approximately 10 times/year.

*Total Estimated Annual Nonhour Burden Cost:* \$0.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

**Elizabeth K. Appel,**

*Director, Office of Regulatory Affairs and Collaborative Action—Indian Affairs.*

**DEPARTMENT OF THE INTERIOR**

**National Park Service**

**[NPS–WASO–D–COS–POL–24137; PPWODIREP0] [PPMPSPD1Y.YM0000]**

**National Park System Advisory Board; Request for Nominations**

**AGENCY:** National Park Service, Interior.  
**ACTION:** Notice.

**SUMMARY:** The National Park Service (NPS), U.S. Department of the Interior (Department), is seeking nominations for individuals to be considered for appointment to the National Park System Advisory Board (Board). The Board advises the Secretary of the Interior (Secretary) and the Director of the National Park Service (Director) on matters relating to the National Park Service (NPS), the National Park System, and programs administered by the NPS. The Board is a discretionary committee established by authority of the Secretary under 54 U.S.C. 100906 and regulated by the Federal Advisory Committee Act (FACA).

**DATES:** Nominations must be postmarked by December 18, 2017.

**ADDRESSES:** Nominations should be sent to Shirley Sears, Office of Policy, National Park Service, 1849 C Street NW., Mail Stop 2659, Washington, DC 20240.

**FOR FURTHER INFORMATION CONTACT:** Shirley Sears, Office of Policy, National Park Service, 1849 C Street NW., Mail Stop 2659, Washington, DC 20240; by telephone at 202–354–3955; or by email *shirley\_sears@nps.gov*.

**SUPPLEMENTARY INFORMATION:** The purpose of the Board is to provide advice to the Secretary and the Director on matters relating to the NPS, the National Park System, and programs administered by the NPS, including programs administered pursuant to 54 U.S.C. 320101; designation of National Historic Landmarks and National Natural Landmarks; and the national historic significance of proposed National Historic Trails pursuant to the National Trails System Act (16 U.S.C. 1244(b)(3)). The Board may also advise on matters submitted by the Director. The Board is comprised of no more than 12 members who are citizens of the United States and have a demonstrated commitment to the mission of the NPS.

Members are selected to represent various geographic regions, including each of the administrative regions of the NPS. At least 6 members must have outstanding expertise in one or more of the following fields: History, archeology, anthropology, historical or landscape architecture, biology, ecology, marine sciences, or social science. At least 4 members must have outstanding expertise in the management of national or state parks or protected areas, or natural or cultural resources management. The remaining members must have outstanding expertise in another professional or scientific discipline important to the mission of the NPS, such as financial management, recreation use management, land use planning, or business management. At least one of the members must be a locally elected official from an area adjacent to a park. Members are appointed by the Secretary for terms not to exceed 4 years. The Director designates one member to be Chair. All members serve at the discretion of the Secretary.

We currently are seeking to appoint 3 members to the Board and are requesting nominations in the fields of anthropology, archaeology, historical architecture, landscape architecture, biology, ecology, geology, history, and social science; and for a locally elected official adjacent to a park.

Nominations should be typed, and must include a resume providing an adequate description of the nominee's qualifications, including information that would enable the Department to make an informed decision regarding meeting the membership requirements of the Board and permit the Department to contact a potential member.

Members of the Board serve as special Government employees (SGEs), and are required to have ethics training annually and to file a Confidential Financial Disclosure Report. Members serve without compensation. However, while away from their homes or regular places of business in the performance of services for the Board as approved by the Designated Federal Officer, members are allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed such expenses under 5 U.S.C. 5703.

Individuals who are federally registered lobbyists are ineligible to serve on all FACA and non-FACA boards, committees, or councils in an individual capacity. The term "individual capacity" refers to individuals who are appointed to exercise their own individual best

judgment on behalf of the Government, such as when they are designated SGEs, rather than being appointed to represent a particular interest.

*Public availability of comments.*

Before including your address, phone number, email address, or other personal identifying information in your nomination/comment, you should be aware that your entire nomination/comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your nomination/comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Authority:** 54 U.S.C. 100906; 5 U.S.C. Appendix 2.

## DEPARTMENT OF THE INTERIOR

### Bureau of Safety and Environmental Enforcement

[Docket ID BSEE-2017-0005; 189E1700D2 ET1SF0000.PSB000 EEEE500000; OMB Control Number 1014-0016]

#### Agency Information Collection Activities; Pipelines and Pipeline Rights-of-Way

**AGENCY:** Bureau of Safety and Environmental Enforcement, Interior.

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, we, the Bureau of Safety and Environmental Enforcement (BSEE) are proposing to renew an information collection with revisions.

**DATES:** Interested persons are invited to submit comments on or before January 16, 2018.

**ADDRESSES:** Send your comments on this information collection request (ICR) by either of the following methods listed below:

- Electronically go to <http://www.regulations.gov>. In the Search box, enter BSEE-2017-0005 then click search. Follow the instructions to submit public comments and view all related materials. We will post all comments.

- Email [kye.mason@bsee.gov](mailto:kye.mason@bsee.gov), fax (703) 787-1546, or mail or hand-carry comments to the Department of the Interior; Bureau of Safety and Environmental Enforcement;

Regulations and Standards Branch; ATTN: Nicole Mason; 45600 Woodland Road, Sterling, VA 20166. Please reference OMB Control Number 1014-0016 in the subject line of your comments.

**FOR FURTHER INFORMATION CONTACT:** To request additional information about this ICR, contact Nicole Mason by email at [kye.mason@bsee.gov](mailto:kye.mason@bsee.gov) or by telephone at (703) 787-1607.

**SUPPLEMENTARY INFORMATION:** In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of BSEE; (2) Will this information be processed and used in a timely manner; (3) Is the estimate of burden accurate; (4) How might BSEE enhance the quality, utility, and clarity of the information to be collected; and (5) How might BSEE minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Abstract:** The regulations under 30 CFR 250, Subpart J, pertain to pipelines and pipeline rights-of-way (ROWs), forms, and related Notices to Lessees (NTLs) and Operators.

We use the information to ensure that lessees and pipeline ROW holders design the pipelines that they install, maintain, and operate in a safe manner. BSEE needs information concerning the proposed pipeline and safety

equipment, inspections and tests, and natural and manmade hazards near the proposed pipeline route. BSEE uses the information to review pipeline designs prior to approving an application for a ROW or lease term pipeline to ensure that the pipeline, as constructed, will provide for safe transportation of minerals through the submerged lands of the OCS. BSEE reviews proposed pipeline routes to ensure that the pipelines would not conflict with any State requirements or unduly interfere with other OCS activities. BSEE reviews proposals for taking pipeline safety equipment out of service to ensure alternate measures are used that will properly provide for the safety of the pipeline and associated facilities (platform, etc.). BSEE reviews notifications of relinquishment of ROW grants and requests to decommission pipelines for regulatory compliance and to ensure that all legal obligations are met. BSEE monitors the records concerning pipeline inspections and tests to ensure safety of operations and protection of the environment and to schedule witnessing trips and inspections. Information is also necessary to determine the point at which the DOI or Department of Transportation (DOT) has regulatory responsibility for a pipeline and to be informed of the identified operator if not the same as the pipeline ROW holder.

We use the information in Form BSEE-0149, Assignment of Federal OCS Pipeline Right-of-Way Grant, to track pipeline ROW holders; as well as use this information to update the corporate database that is used to determine what leases are available for a Lease Sale and the ownership of all OCS leases.

We are adding a new Form BSEE-0135, Designation of Right-of-Way Operator, to identify who has the authority to act on the ROW grant holder's behalf to fulfill obligations under the OCS Lands Act; as well as, BSEE may provide to the designated ROW operator written or oral instructions in securing compliance with the ROW grant in accordance with applicable laws and regulations.

*Title of Collection:* 30 CFR part 250, subpart J, *Pipelines and Pipeline Rights-of-Way (ROW)*.

*OMB Control Number:* 1014-0016.  
*Form Number:* BSEE-0149—Assignment of Federal OCS Pipeline Right-of-Way Grant, and Form BSEE-0135—Designation of Right-of-Way Operator.

*Type of Review:* Revision of a currently approved collection.

*Respondents/Affected Public:* Potential respondents comprise Federal

OCS oil, gas, and sulfur lessees/operators and holders of pipeline rights-of-way.

*Total Estimated Number of Annual Respondents:* Not all of the potential respondents will submit information in any given year, and some may submit multiple times.

*Total Estimated Number of Annual Responses:* 3,031.

*Estimated Completion Time per Response:* Varies from 30 minutes to 107 hours, depending on activity.

*Total Estimated Number of Annual Burden Hours:* 36,546.

*Respondent's Obligation:* Most responses are mandatory, while others are required to obtain or retain benefits.

*Frequency of Collection:* On occasion and varies by section.

*Total Estimated Annual Nonhour Burden Cost:* This IC request includes seven non-hour cost burdens, all of which are the cost recovery fees required under 30 CFR 250, subpart J. The total of the non-hour cost burden (cost recovery fees) in this IC request is an estimated \$1,508,968.

The non-hour cost burdens required in 30 CFR 250, subpart J (and respective cost-recovery fee amount per transaction) are required under:

- § 250.1000(b)—New Pipeline Application (lease term)—\$3,541
- § 250.1000(b)—Pipeline Application Modification (lease term)—\$2,056
- § 250.1000(b)—Pipeline Application Modification (ROW)—\$4,169
- § 250.1008(e)—Pipeline Repair Notification—\$388
- § 250.1015(a)—Pipeline ROW Grant Application—\$2,771
- § 250.1015(a)—Pipeline Conversion from Lease Term to ROW—\$236
- § 250.1018(b)—Pipeline ROW Assignment—\$201

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*)

Dated: September 27, 2017.

#### Agency Information Collection Activities; Operations in the Outer Continental Shelf for Minerals Other Than Oil, Gas, and Sulphur

**AGENCY:** Bureau of Safety and Environmental Enforcement, Interior.

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, we, the Bureau of Safety and Environmental Enforcement (BSEE) are proposing to renew an information collection with revisions.

**DATES:** Interested persons are invited to submit comments on or before January 16, 2018.

**ADDRESSES:** Send your comments on this information collection request (ICR) by either of the following methods listed below:

- Electronically go to <http://www.regulations.gov>. In the Search box, enter BSEE-2017-0006 then click search. Follow the instructions to submit public comments and view all related materials. We will post all comments.

- Email [kye.mason@bsee.gov](mailto:kye.mason@bsee.gov), fax (703) 787-1546, or mail or hand-carry comments to the Department of the Interior, Bureau of Safety and Environmental Enforcement, Regulations and Standards Branch, ATTN: Nicole Mason; 45600 Woodland Road, Sterling, VA 20166. Please reference OMB Control Number 1014-0021 in the subject line of your comments.

**FOR FURTHER INFORMATION CONTACT:** To request additional information about this ICR, contact Nicole Mason by email at [kye.mason@bsee.gov](mailto:kye.mason@bsee.gov) or by telephone at (703) 787-1607.

**SUPPLEMENTARY INFORMATION:** In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of BSEE; (2) Will this information be processed and used in a timely manner; (3) Is the estimate of burden accurate; (4) How might BSEE enhance the quality, utility, and clarity of the information to be collected; and (5) How might BSEE minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Abstract:** BSEE will use the information required by 30 CFR 282 to determine if lessees are complying with the regulations that implement the mining operations program for minerals other than oil, gas, and sulphur. Specifically, BSEE will use the information:

- To ensure that operations for the production of minerals other than oil, gas, and sulphur in the OCS are conducted in a manner that will result in orderly resource recovery, development, and the protection of the human, marine, and coastal environments.
- To ensure that adequate measures will be taken during operations to prevent waste, conserve the natural resources of the OCS, and to protect the environment, human life, and correlative rights.
- To determine if suspensions of activities are in the national interest, to facilitate proper development of a lease including reasonable time to develop a mine and construct its supporting facilities, and to allow for the construction or negotiation for use of transportation facilities.
- To identify and evaluate the cause(s) of a hazard(s) generating a suspension, the potential damage from a hazard(s) and the measures available to mitigate the potential for damage.
- For technical evaluations that provide a basis for BSEE to make

informed decisions to approve, disapprove, or require modification of the proposed activities.

**Title of Collection:** 30 CFR part 282—Operations in the Outer Continental Shelf for Minerals Other than Oil, Gas, and Sulphur.

**OMB Control Number:** 1014–0021.

**Form Number:** None.

**Type of Review:** Revision of a currently approved collection.

**Respondents/Affected Public:** Potential respondents comprise Federal OCS oil, gas, and sulphur lessees/operators.

**Total Estimated Number of Annual Respondents:** As there are no active respondents, we estimated the potential annual number of respondents to be one.

**Total Estimated Number of Annual Responses:** 16.

**Estimated Completion Time per Response:** Varies from 1 hour to 20 hours, depending on activity.

**Total Estimated Number of Annual Burden Hours:** 56.

**Respondent's Obligation:** Most responses are mandatory, while others are required to obtain or retain benefits, or are voluntary.

**Frequency of Collection:** On occasion and varies by section.

**Total Estimated Annual Nonhour Burden Cost:** We have identified one non-hour cost burden. Pursuant to § 282.13(e)(1), a site-specific study to determine and evaluate hazards that results in a suspension of operation would have a non-hour cost burden. Since this has not been done to date, we estimated that the cost of such a study for industry would be approximately \$100,000 to comply with the requirement. We have not identified any other non-hour cost burdens associated with this collection of information.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: October 11, 2017.

## INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1071]

### Certain Wireless Audio Systems and Components Thereof; Commission Determination Not To Review an Initial Determination Granting Complainant's Motion for Leave To Amend the Complaint

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Notice.

**SUMMARY:** Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (“ID”) (Order No. 9) of the presiding administrative law judge (“ALJ”), granting complainant’s motion for leave to amend the complaint in the above-captioned investigation

#### FOR FURTHER INFORMATION CONTACT:

Cathy Chen, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2392. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at <https://www.usitc.gov>. The public record for this investigation may be viewed on the Commission’s electronic docket (EDIS) at <https://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission’s TDD terminal on (202) 205–1810.

**SUPPLEMENTARY INFORMATION:** The Commission instituted this investigation on September 15, 2017, based on a complaint filed by Broadcom Limited of San Jose, California; and Avago Technologies General IP (Singapore) Pte. Ltd. of Singapore (collectively, “Broadcom”). 82 FR 43404 (Sep. 15, 2017). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain wireless audio systems and components thereof by reason of infringement of claim 20 of U.S. Patent No. 6,684,060. The complaint further alleges that an

industry in the United States exists as required by 19 U.S.C. 1337(a)(2). The notice of investigation named DTS, Inc. of Calabasas, California; Phorus, Inc. of Calabasas, California; MartinLogan, Ltd. of Lawrence, Kansas; Paradigm Electronics Inc. of Ontario, Canada; Anthem Electronics, Inc. of Ontario, Canada; Wren Sound Systems, LLC of Phoenixville, Pennsylvania; McIntosh Laboratory, Inc. of Binghamton, New York; Definitive Technology of Owings Mills, Maryland; and Polk Audio Inc. of Vista, California, as respondents. The Office of Unfair Import Investigations is also a party in this investigation.

On September 20, 2017, Broadcom filed a motion for leave to file a second amended complaint. Broadcom sought to amend the complaint to: (1) Incorporate additional information that was set forth in a pre-institution letter to the Commission on August 29, 2017; (2) correct the names for certain respondents; and (3) add an additional domestic industry claim related to another licensee of the asserted patent. On October 2, 2017, Respondents filed a response opposing only the addition of a new domestic industry claim. The ALJ issued the subject ID granting the motion on October 24, 2017. The ALJ found that Broadcom has shown good cause to amend the complaint under Commission Rule 210.14(b)(1). *See* Order No. 9 at 2–3 (Oct. 24, 2017).

No petitions for review were filed. The Commission has determined not to review the ID.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in Part 210 of the Commission's Rules of Practice and Procedure, 19 CFR part 210.

By order of the Commission.  
Issued: November 13, 2017.

**Lisa R. Barton,**

*Secretary to the Commission.*

## INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-588 and 731-TA-1392-1393 (Preliminary)]

### Polytetrafluoroethylene ("PTFE") Resin From China and India

#### Determinations

On the basis of the record<sup>1</sup> developed in the subject investigations, the United

States International Trade Commission ("Commission") determines, pursuant to the Tariff Act of 1930 ("the Act"), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of PTFE resin from China and India, provided for in statistical reporting numbers 3904.61.0010 and 3904.61.0090 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value ("LTFV") and by reason of imports of PTFE resin from India that are alleged to be subsidized by the government of India.

#### Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission's rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in section 207.21 of the Commission's rules, upon notice from the Department of Commerce ("Commerce") of affirmative preliminary determinations in the investigations under sections 703(b) or 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of affirmative final determinations in those investigations under sections 705(a) or 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

#### Background

On September 28, 2017, The Chemours Company FC LLC, Wilmington, Delaware, filed petitions with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV and subsidized imports of PTFE resin from India and LTFV imports of PTFE resin from China. Accordingly, effective September 28, 2017, the Commission, pursuant to sections 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)), instituted countervailing duty investigation No.

701-TA-588 and antidumping duty investigation Nos. 731-TA-1392 and 1393 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 4, 2017 (82 FR 46284). The conference was held in Washington, DC, on October 19, 2017, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)). It completed and filed its determinations in these investigations on November 13, 2017. The views of the Commission are contained in USITC Publication 4741 (November 2017), entitled *Polytetrafluoroethylene ("PTFE") Resin from China and India: Investigation Nos. 701-TA-588 and 731-TA-1392-1393 (Preliminary)*.

By order of the Commission.

Issued: November 13, 2017.

## INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 332-562 and 332-563]

### Global Digital Trade 2: The Business-to-Business Market, Key Foreign Trade Restrictions, and U.S.

### Competitiveness; and Global Digital Trade 3: The Business-to-Consumer Market, Key Foreign Trade Restrictions, and U.S.

### Competitiveness; Proposed Information Collection; Comment Request; Global Digital Trade Questionnaire

**AGENCY:** United States International Trade Commission.

**ACTION:** Notice.

**SUMMARY:** In accordance with the provisions of the Paperwork Reduction Act of 1995, the U.S. International Trade Commission (Commission) hereby gives notice that it plans to submit a request for approval of a questionnaire to the Office of Management and Budget (OMB) for review and requests public comment on its draft proposed collection.

<sup>1</sup> The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

**DATES:** To ensure consideration, written comments must be submitted on or before January 15, 2018.

**ADDRESSES:** The project leaders for these investigations are Dan Kim and Alissa Tafti (Inv. No. 332–562) and Ricky Ubee and Christopher Robinson (Inv. No. 332–563). Please direct all written comments to the project leaders via email at [globaldigitaltrade@usitc.gov](mailto:globaldigitaltrade@usitc.gov) or via U.S. mail at U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436.

**Additional Information:** Copies of the draft questionnaire and other supplementary documents may be downloaded from the USITC Web site at <https://www.usitc.gov/globaldigitaltrade>. For any questions about these investigations, email [globaldigitaltrade@usitc.gov](mailto:globaldigitaltrade@usitc.gov) or call 202–205–3225 or 202–205–3342. Hearing-impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal at 202–205–1810. General information concerning the Commission may also be obtained by accessing its Web site (<http://www.usitc.gov>).

**Purpose of Information Collection:** The information requested by the questionnaire is for use by the Commission in connection with Investigation No. 332–562, *Global Digital Trade 2: The Business-to-Business Market, Key Foreign Trade Restrictions, and U.S. Competitiveness*, and Investigation No. 332–563, *Global Digital Trade 3: The Business-to-Consumer Market, Key Foreign Trade Restrictions, and U.S. Competitiveness*, instituted under the authority of section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)). These investigations were requested by the U.S. Trade Representative (USTR) on January 13, 2017. These investigations were initiated on May 1, 2017 and notice was published on May 8, 2017 (82 FR 21404). USTR's request includes a component that requires a survey of U.S. firms to gather detailed information on the impact of foreign regulatory and policy measures on their ability to develop and/or supply business-to-business and business-to-consumer digital products and services abroad. This questionnaire is therefore necessary to analyze regulatory and policy measures in key foreign markets that impact (1) the ability of U.S. firms to develop and/or supply digital products and services abroad, and (2) the competitiveness of U.S. firms as well as international trade and investment flows associated with digital products and services. The Commission will deliver the results of its

investigation into the business-to-business market to the U.S. Trade Representative by October 29, 2018 and its investigation of the business-to-consumer market to the U.S. Trade Representative by March 29, 2019.

**Summary of Proposal:** The Commission intends to submit the following draft information collection plan to OMB and invites public comment.

- (1) Number of forms submitted: 1.
- (2) Title of form: Global Digital Trade Questionnaire.
- (3) Type of request: New.
- (4) Frequency of use: Industry questionnaire, single data gathering, scheduled for 2018.
- (5) Description of respondents: U.S. firms in industries involved in global digital trade.
- (6) Estimated number of respondents: 13,000.
- (7) Estimated total number of hours to complete the questionnaire per respondent: 15 hours.
- (8) Information obtained from the questionnaire that qualifies as confidential business information will be so treated by the Commission and not disclosed in a manner that would reveal the individual operations of a firm. Aggregate responses will be considered NSI as requested by USTR.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The U.S. Trade Representative (USTR) has directed the Commission to produce two reports that analyze the regulatory and policy measures in key foreign markets that impact (1) the ability of U.S. firms to develop and/or supply digital products and services abroad, and (2) the competitiveness of U.S. firms as well as international trade and investment flows associated with digital products and services. There will be a single questionnaire used for both investigation 332–562, which will focus on business-to-business digital products and services, and investigation 332–563, which will focus on business-to-consumer digital products and services.

##### II. Method of Collection

Respondents will be mailed a letter with a link and individual code for accessing the online form. Respondents may also request a fillable form. Once the online form is complete, respondents will be directed to submit the form by selecting a submit button. When respondents complete a fillable form, they may submit it by uploading it to a secure webserver, emailing it to the study team, faxing it, or mailing a hard copy to the Commission.

### III. Request for Comments

Comments are invited on (1) whether the proposed collection of information is necessary; (2) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

The draft questionnaire and other supplementary documents may be downloaded from the USITC Web site at <https://www.usitc.gov/globaldigitaltrade>.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they will also become a matter of public record.

Issued: November 9, 2017.

By order of the Commission.

## INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731-TA-1387-1391  
(Preliminary)]

### Polyethylene Terephthalate (PET) Resin From Brazil, Indonesia, Korea, Pakistan, and Taiwan; Determinations

On the basis of the record<sup>1</sup> developed in these subject investigations, the United States International Trade Commission (“Commission”) determines, pursuant to the Tariff Act of 1930 (“the Act”), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of polyethylene terephthalate (PET) resin from Brazil, Indonesia, Korea, Pakistan, and Taiwan, provided for in subheading 3907.61.00 and 3907.69.00 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (“LTFV”).

### Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission’s rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in section 207.21 of the Commission’s rules, upon notice from the Department of Commerce (“Commerce”) of an affirmative preliminary determination in the investigation under section 733(b) of the Act, or, if the preliminary determination is negative, upon notice of an affirmative final determination in that investigation under section 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of these investigations need not enter a separate appearance for the final phase of these investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The

Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations.

### Background

On September 26, 2017, DAK Americas LLC, Charlotte, North Carolina; Indorama Ventures USA, Inc., Decatur, Alabama; M&G Polymer USA, LLC, Houston, Texas; and Nan Ya Plastics Corporation, America, Lake City, South Carolina filed petitions with the Commission and Commerce, alleging that an industry in the United States is materially injured and threatened with material injury by reason of LTFV imports of polyethylene terephthalate (PET) resin from Brazil, Indonesia, Korea, Pakistan, and Taiwan. Accordingly, effective September 26, 2017, the Commission, pursuant to section 733(a) of the Act (19 U.S.C. 1673b(a)), instituted antidumping duty investigation Nos. 731-TA-1387-1391 (Preliminary).

Notice of the institution of the Commission’s investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 2, 2017 (82 FR 45890). The conference was held in Washington, DC, on October 17, 2017, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to section 733(a) of the Act (19 U.S.C. 1673b(a)). It completed and filed its determinations in these investigations on November 13, 2017. The views of the Commission are contained in USITC Publication 4740 (November 2017), entitled *Polyethylene Terephthalate (PET) Resin from Brazil, Indonesia, Korea, Pakistan, and Taiwan: Investigation Nos. 731-TA-1387-1391 (Preliminary)*.

By order of the Commission.

Issued: November 13, 2017.

**Lisa R. Barton,**

Secretary to the Commission.

## DEPARTMENT OF JUSTICE

### Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140-0100]

### Agency Information Collection Activities; Proposed eCollection eComments Requested; Report of Multiple Sale or Other Disposition of Certain Rifles—ATF Form 3310.12

**AGENCY:** Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

**ACTION:** 30-Day notice.

**SUMMARY:** The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register**, on September 12, 2017, allowing for a 60-day comment period. This Information Collection is being revised due to a reduction in the number of respondents, responses, and burden hours respectively.

**DATES:** Comments are encouraged and will be accepted for an additional 30 days until December 18, 2017.

**FOR FURTHER INFORMATION CONTACT:** If you have additional comments, particularly with respect to the estimated public burden or associated response time, have suggestions, need a copy of the proposed information collection instrument with instructions, or desire any other additional information, please contact Ed Stely, Branch Chief, Tracing Operations and Records Management Branch, National Tracing Center Division, either by mail at 244 Needy Road, Martinsburg, WV 25405, by telephone at 800-788-7133, or by email at [Edward.Stely@atf.gov](mailto:Edward.Stely@atf.gov). Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to [OIRA\\_submissions@omb.eop.gov](mailto:OIRA_submissions@omb.eop.gov).

**SUPPLEMENTARY INFORMATION:** Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the

<sup>1</sup> The record is defined in sec. 207.2(f) of the Commission’s Rules of Practice and Procedure (19 CFR 207.2(f)).

- functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
  - Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
  - Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

### Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a currently approved collection.

(2) *The Title of the Form/Collection:* Report of Multiple Sale or Other Disposition of Certain Rifles.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

*Form number:* ATF Form 3310.12.

*Component:* Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

*Primary:* Business or other for-profit.

*Other:* None.

*Abstract:* The purpose of this information collection is to continue a requirement that Federal firearms licensees report multiple sales or other dispositions whenever the licensee sells or otherwise disposes of two or more rifles to the same person at one time or within any five consecutive business days with the following characteristics: (a) Semi-automatic; (b) a caliber greater than .22; and (c) the ability to accept a detachable magazine. This requirement will apply to Federal Firearms Licensees (FFLs) who are dealers and/or pawnbrokers in Arizona, California, New Mexico and Texas.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 1,870 respondents will utilize the form, and it will take each respondent 12 minutes to complete the form.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is

1,892 hours which is equal to (1,870 (total # of respondents) \* 5.058 (total # of responses) \* .2 (12 minutes).

(7) *An Explanation of the Change in Estimates:* The adjustments associated with this collection are a decrease in the number of respondents and responses by 639, and 8,614 respectively, as well as a reduction in burden hours by 1,723.

*If additional information is required contact:* Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405A, Washington, DC 20530.

Dated: November 13, 2017.

**DATES:** Comments are encouraged and will be accepted for 60 days until January 16, 2018.

**FOR FURTHER INFORMATION CONTACT:** If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Shelley S. Hyland, Statistician, Law Enforcement Statistics Unit, Bureau of Justice Statistics, 810 Seventh Street NW., Washington, DC 20531 (email: [Shelley.Hyland@usdoj.gov](mailto:Shelley.Hyland@usdoj.gov); phone: 202-616-1706).

**SUPPLEMENTARY INFORMATION:** Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

#### Overview of This Information Collection

(1) *Type of Information Collection:* Reinstatement, with change, of a previously approved collection.

(2) *The Title of the Form/Collection:* 2018 Census of State and Local Law Enforcement Agencies (CSLLEA).

(3) *The agency form number, if any, and the applicable component of the*

*Department sponsoring the collection:* The form number is CJ-38. The applicable component within the Department of Justice is the Bureau of Justice Statistics, Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will include all publicly-funded state, county and local law enforcement agencies in the United States that employ the equivalent of at least one full-time sworn officer with general arrest powers. Both general purpose agencies (i.e., any public agency with sworn officers whose patrol and enforcement responsibilities are primarily delimited by the boundaries of a municipal, county, or state government) and special purpose agencies (e.g., campus law enforcement, transportation, natural resources, etc.) meeting the above description will be asked to respond.

*Abstract:* BJS has conducted the CSLLEA regularly since 1992. The 2018 CSLLEA will be the seventh administration. Historically, the CSLLEA generates an enumeration of all publically funded state, county and local law enforcement agencies operating in the United States. The CSLLEA provides complete personnel counts and an overview of the functions performed for approximately 20,000 law enforcement agencies operating nationally.

The 2018 CSLLEA collection involves two phases. In the first phase, BJS will cognitively test the revised instrument with 48 agencies based on agency type (i.e., local and county police, sheriff's office, or special purpose) and size (i.e., 100 or more full-time equivalent sworn officers or less than 100 full-time equivalent sworn officers). A maximum of 8 agencies of each type and size will be asked to participate in testing. BJS has reduced the number of items from the 2014 administration but has included additional items on limited sworn officers. Additionally, BJS will continue to refine the universe frame by verifying agency in-service status, contact information and de-duplicating agencies.

Pending positive results from the first phase, in the second phase, BJS will conduct the main data collection. The 2018 CSLLEA is designed to collect general information on state, county and local law enforcement agencies. The survey asks about the level of government that operates the agency; total operating budget; full-time and part-time personnel counts for fully sworn officers, limited sworn officers and non-sworn employees; gender and primary job responsibility of full-time

sworn officers; and the functions the agency performs on a regular or primary basis. Upon completion, the 2018 CSLLEA will serve as the sampling frame for future law enforcement surveys administered by BJS.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* For the cognitive testing, BJS is planning 48 agencies with an estimated total respondent burden of 90 minutes. For the full data collection, BJS estimates a maximum of 20,000 state, county and local law enforcement agencies with a respondent burden of about 45 minutes per agency, including the follow-up time.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated total respondent burden for the cognitive testing is 72 hours. The maximum respondent burden for the full data collection is approximately 15,000 burden hours. Therefore, total burden for both phases is approximately 15,072 burden hours.

*If additional information is required contact:* Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405A, Washington, DC 20530.

Dated: November 13, 2017.

**Melody Braswell,**

*Department Clearance Officer for PRA, U.S. Department of Justice.*

## DEPARTMENT OF JUSTICE

### Notice of Lodging of the Proposed Second Amended Consent Decree Under the Clean Water Act

On November 9, 2017, the Department of Justice lodged a proposed Second Amended Consent Decree with the United States District Court for the Western District of Missouri in the lawsuit entitled *United States v. The City of Kansas City, Missouri*, Civil Action No. 4:10-cv-0497-GAF, proposing to modify the implementation schedule for certain injunctive measures required under the original Consent Decree entered in this matter on September 27, 2010, resolving Kansas City's alleged violations of the Clean Water Act ("CWA" or "Act").

The Consent Decree ("CD") requires, among other measures intended to reduce or eliminate sewage overflows from Kansas City's sewer system, that

Kansas City ("KC") construct additional storage capacity to hold sewage for treatment during high flow periods, install thousands of feet of additional sewer piping, separate areas of combined storm and sanitary sewer, and install new pumps to convey flows in areas inadequately served by gravity flow. The City has requested this Amendment to allow for adjustments to the scope, nature, and/or timing of the implementation of specified aspects of the foregoing requirements, as detailed in the Proposed Second Amendment, in order to optimize the benefits and efficient implementation of these requirements. The State of Missouri, a non-aligned statutory party to this action, agrees with the proposed Amendment.

The publication of this notice opens a period for public comment on the proposed Second Amended Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Kansas City*, Civil Action No. 4:10-cv-0497-GAF. DJ Reference Number 90-5-1-1-06438/1.

All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email .....	<a href="mailto:pubcomment-ees.enrd@usdoj.gov">pubcomment-ees.enrd@usdoj.gov</a> .
By mail .....	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

During the public comment period, Consent Decree may be examined and downloaded at this Justice Department Web site: [https://www.usdoj.gov/enrd/Consent\\_Decrees.html](https://www.usdoj.gov/enrd/Consent_Decrees.html). We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

Please enclose a check or money order for \$9.00 (25 cents per page reproduction cost) payable to the United States Treasury.

## DEPARTMENT OF JUSTICE

[OLP Docket No. 166]

### Notice of Request for Certification of Arizona Capital Counsel Mechanism

**AGENCY:** Department of Justice.

**ACTION:** Notice.

**SUMMARY:** This notice advises the public that the State of Arizona has requested certification of its capital counsel mechanism by the Attorney General and that public comments may be submitted to the Department of Justice regarding Arizona's request.

**DATES:** Written and electronic comments must be submitted on or before January 16, 2018. Comments received by mail will be considered timely if they are postmarked on or before that date. The electronic Federal Docket Management System (FDMS) will accept comments until Midnight Eastern Time at the end of that day.

**ADDRESSES:** To ensure proper handling of comments, please reference "Docket No. OLP 166" on all electronic and written correspondence. The Department encourages that all comments be submitted electronically through <http://www.regulations.gov> using the electronic comment form provided on that site. Paper comments that duplicate the electronic submission should not be submitted. Individuals who wish to submit written comments may send those to the contact listed in the **FOR FURTHER INFORMATION** section immediately below.

**FOR FURTHER INFORMATION CONTACT:** Laurence Rothenberg, Deputy Assistant Attorney General, Office of Legal Policy, U.S. Department of Justice, 950 Pennsylvania Avenue NW., Washington, DC 20530; telephone (202) 532-4465.

**SUPPLEMENTARY INFORMATION:** Chapter 154 of title 28, United States Code, provides special procedures for federal habeas corpus review of cases brought by indigent prisoners in State custody who are subject to capital sentences. These special procedures may be available to a State only if the Attorney General of the United States has certified that the State has established a qualifying mechanism for the appointment, compensation, and payment of reasonable litigation expenses of competent counsel in State postconviction proceedings for indigent capital prisoners. 28 U.S.C. 2261, 2265; 28 CFR part 26.

This notice advises the public, pursuant to 28 CFR 26.23(b), that the State of Arizona has requested certification of its capital counsel mechanism by the Attorney General.

Public comment is solicited regarding Arizona's request. Arizona's request and supporting materials may be viewed at <https://www.justice.gov/olp/pending-requests-final-decisions>.

Dated: November 13, 2017.

## DEPARTMENT OF JUSTICE

### Notice of Lodging of Proposed Amendment to Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act

On November 9, 2017, the Department of Justice and the State of California on behalf of the California Department of Toxic Substances Control and Toxic Substances Control Account ("DTSC") lodged a proposed amendment ("Amendment 1") to a Consent Decree with the United States District Court for the Central District of California ("Court") in the matter of *United States of America and State of California on behalf of the Department of Toxic Substances Control and Toxic Substances Control Account vs. Abex Aerospace et al.*, Civil Action No. 2:16-cv-02696 (C.D. Cal.). This Amendment 1 amends Appendix D of the Consent Decree previously approved by the Court on March 31, 2017; that Consent Decree pertains to environmental contamination at Operable Unit 2 ("OU2") of the Omega Chemical Corporation Superfund Site (Site) in Los Angeles County, California. The Amendment is for the sole purposes of adding additional settling parties to the Consent Decree, and follows the mechanisms that the previously approved Consent Decree sets forth for adding additional settlers.

The Consent Decree resolves certain claims under Sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9606, 9607, and Section 7003 of the Resource Conservation and Recovery Act, 42 U.S.C. 6973, as well as related state law claims, in connection with environmental contamination at OU2. The Amendment adds the following additional settling parties as Settling Cash Defendants:

(a) Two parties, Mission Linen Supply Company and Pilot Chemical Corp., each of which has owned or operated a facility within the commingled OU2 groundwater plume area. These parties

are “Certain Noticed Parties” within the meaning of Paragraph 75 and Appendix G of the Consent Decree.

(b) Two parties, Hexion Inc. and MCP Foods, Inc., who are successors to the liability of a single “arranger” party who sent waste to the Omega Chemical Corporation facility in Whittier, California; and

(c) Twenty-six parties that had previously resolved their liability associated with the Omega Chemical Corporation facility: American International Industries; Atoll Holdings, Inc.; Brunton Enterprises, Inc.; Carvin Corp.; Central Plaza; Corchem Corporation; Couch and Philippi, Inc.; Ed-Lin Auto Body, Inc.; Gamboa’s Body and Frame Inc.; Good-West Rubber Corp; I & I Deburring, Inc.; J.D. Property Management, Inc.; Kwikset Corporation; Luppen Holdings, Inc.; M & M Printed Bag, Inc.; Newton Heat Treating Company, Inc; NMB, Inc. [name correction replacing New Hampshire Ball Bearing (NHBB)]; Northwestern, Inc.; Penske Corporation; Pneudraulics, Inc.; Pocino Foods Company; Quaker City Plating & Silversmith, LP; Rooke Corp. (dba Aviation Equipment); Santa Fe Braun, Inc; Tech-Graphic, Inc.; and Unidynamics/Phoenix, Inc.

This amended settlement requires the additional settling parties in categories (a) and (b) to pay \$12,625,000 into Qualified Settlement Funds, as provided for in Paragraph 27(a) of the Consent Decree. The parties in category (c) are parties that have previously resolved their liability within the group of generators at the Omega Chemical Corporation facility, and are not required to pay money to the United States and DTSC.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States of America and State of California on behalf of the Department of Toxic Substances Control and Toxic Substances Control Account vs. Abex Aerospace et al.*, D.J. Ref. No. 90–11–3–06529/10. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

<i>To submit comments:</i>	<i>Send them to:</i>
By email .....	pubcomment-ees.enrd@usdoj.gov.

<i>To submit comments:</i>	<i>Send them to:</i>
By mail .....	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

As provided by RCRA, a public meeting will be held on the proposed settlement if requested in writing by fifteen (15) days after the publication date of this notice. Requests for a public meeting may be made by contacting the EPA Remedial Project Manager for OU2, Wayne Praskins, by email at [praskins.wayne@epa.gov](mailto:praskins.wayne@epa.gov). If a public meeting is requested, information about the date and time of the meeting will be published in the local newspaper, *The Whittier Daily*, and will be sent to persons on the EPA Omega Superfund Site mailing list.

During the public comment period, the lodged proposed Amendment and the previously approved Consent Decree may be examined and downloaded at this Justice Department Web site: <https://www.usdoj.gov/enrd/consent-decrees>. We will provide a paper copy of the Consent Decree and the proposed Amendment upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for \$88.25 (25 cents per page reproduction cost) for the Consent Decree and the proposed Amendment, payable to the United States Treasury. For a paper copy of the Consent Decree and the proposed Amendment without the appendices and signature pages, the cost is \$23.25. For a paper copy of the Amendment only (without the original Consent Decree), together with its signature pages, the cost is \$1.75.

NSF has published regulations under the Antarctic Conservation Act in the Code of Federal Regulations. This is the required notice of permit applications received.**DATES:** Interested parties are invited to submit written data, comments, or views with respect to this permit application by December 18, 2017. This application may be inspected by interested parties at the Permit Office, address below.**ADDRESSES:** Comments should be addressed to Permit Office, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, Virginia 22314.**FOR FURTHER INFORMATION CONTACT:** Nature McGinn, ACA Permit Officer, at the above address, 703-292-8030, or [ACApermits@nsf.gov](mailto:ACApermits@nsf.gov).**SUPPLEMENTARY INFORMATION:** The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541, 45 CFR

671), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

### Application Details

*Permit Application: 2018-026*

1. *Applicant* Kasey Stewart, 1241 Johnson Ave. #246, San Luis Obispo, CA 93401.

### Activity for Which Permit Is Requested

**Waste Management.** The applicant proposes to operate a small, battery-operated remotely piloted aircraft system (RPAS) consisting, in part, of a quadcopter equipped with a camera to collect footage for commercial purposes. The quadcopter would not be flown over concentrations of birds or mammals, or over Antarctic Specially Protected Areas or Historic Sites and Monuments. The RPAS would only be operated by a pilot with adequate experience. Several measures would be taken to prevent against loss of the quadcopter including painting the them a highly visible color; only flying when the wind is calm; flying for only 15 minutes at a time to maintain adequate battery charge; having a flotation device for operations over water, and an "auto go home" feature in case of loss of control link or low battery; having an observer on the lookout for wildlife, people, and other hazards; and ensuring that the separation between the operator and quadcopter does not exceed a maximum distance of 300 meters.

*Location:* Antarctic Peninsula region.  
*Dates:* December 15–22, 2017.

### SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-82050; File No. SR-BatsBZX-2017-75]

#### Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify Its Fees for Physical Ports

November 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on November 2, 2017, Cboe BZX Exchange, Inc. ("BZX" or the "Exchange") (formerly known as Bats BZX Exchange, Inc.) filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act<sup>3</sup> and Rule 19b-4(f)(2) thereunder,<sup>4</sup> which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members<sup>5</sup> and non-Members of the Exchange pursuant to BZX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at [www.markets.cboe.com](http://www.markets.cboe.com), at the principal office of the Exchange, and at the Commission's Public Reference Room.

#### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> 15 U.S.C. 78s(b)(3)(A)(ii).

<sup>4</sup> 17 CFR 240.19b-4(f)(2).

<sup>5</sup> The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change*

1. Purpose

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,000 per physical port that connects to the System<sup>6</sup> via 1 gigabyte circuit; and \$6,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from \$6,000 per month to \$7,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services.<sup>7</sup> The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain \$2,000 per month. The Exchange proposes to implement this amendment to its fee schedule on January 2, 2018.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,<sup>8</sup> in general, and furthers the objectives of Section 6(b)(4),<sup>9</sup> in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and

other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange.

The Exchange believes that the proposed rate is equitable and non-discriminatory in that it applies uniformly to all Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fee will also enable the Exchange to continue to maintain and improve its market technology and services.

Lastly, the Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members. For instance, the proposed fees for a 10 gigabyte circuit of \$7,000 per month is less than analogous fees charged by the Nasdaq Stock Market LLC ("Nasdaq") and NYSE Arca, Inc. ("Arca"), which range from \$10,000–\$15,000 per month for 10 gigabyte circuits.<sup>10</sup>

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors.

Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>11</sup> and paragraph (f) of Rule 19b-4 thereunder.<sup>12</sup> At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of

<sup>6</sup> The term "System" is defined as "the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away." See Exchange Rule 1.5(aa).

<sup>7</sup> The Exchange also proposes two minor technical amendments to this section of its fee schedule. First is to change the word "Connection" to "Connectivity" in the section's title. The second is to change references to "G" for gigabyte to "Gb".

investors, or otherwise in furtherance of the purposes of the Act.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

##### *Electronic Comments*

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-BatsBZX-2017-75 on the subject line.

##### *Paper Comments*

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BatsBZX-2017-75. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BatsBZX-2017-75, and should be submitted on or before December 7, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>13</sup>

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-82048; File No. SR-BatsBYX-2017-29]

### Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Related to Fees for Use on Cboe BYX Exchange, Inc.

November 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on October 31, 2017, Cboe BYX Exchange, Inc. (the "Exchange" or "BYX") (formerly known as Bats BYX Exchange, Inc.) filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act<sup>3</sup> and Rule 19b-4(f)(2) thereunder,<sup>4</sup> which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members<sup>5</sup> and non-Members of the Exchange pursuant to BYX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at [www.markets.cboe.com](http://www.markets.cboe.com), at the principal office of the Exchange, and at the Commission's Public Reference Room.

<sup>13</sup> 17 CFR 200.30-3(a)(12).

<sup>14</sup> 5 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> 15 U.S.C. 78s(b)(3)(A)(ii).

<sup>4</sup> 17 CFR 240.19b-4(f)(2).

<sup>5</sup> The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

#### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

##### (A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

###### 1. Purpose

The Exchange proposes to amend its fee schedule to amend Tier 7 under footnote 1, Add/Remove Volume Tiers. The Exchange currently offers eight tiers under footnote 1 that offer reduced fees for displayed orders that yield fee codes B,<sup>6</sup> V<sup>7</sup> and Y,<sup>8</sup> and an enhanced rebate for orders that remove liquidity yielding fee codes BB,<sup>9</sup> N<sup>10</sup> and W.<sup>11</sup> The Exchange proposes to amend Tier 7 under footnote 1, under which a Member currently receives an enhanced rebate of \$0.0015 per share on orders that yield fee codes BB, N or W, where that Member has an ADV<sup>12</sup> equal to or greater than 0.05% of the TCV.<sup>13</sup> The Exchange proposes to increase the tier's criteria by also requiring that the Member have an ADAV<sup>14</sup> equal to or

<sup>6</sup> Fee code B is appended to displayed orders that add liquidity to BYX (Tape B) and is assessed a fee of \$0.0018 per share. See the Exchange's fee schedule available at [http://www.bats.com/us/equities/membership/fee\\_schedule/byx/](http://www.bats.com/us/equities/membership/fee_schedule/byx/).

<sup>7</sup> Fee code V is appended to displayed orders that add liquidity to BYX (Tape A) and is assessed a fee of \$0.0018 per share. *Id.*

<sup>8</sup> Fee code Y is appended to displayed orders that add liquidity to BYX (Tape C) and is assessed a fee of \$0.0018 per share. *Id.*

<sup>9</sup> Fee code BB is appended to orders that remove liquidity from BYX (Tape B) and is assessed a rebate of \$0.0010 [sic] per share. *Id.*

<sup>10</sup> Fee code N is appended to orders that remove liquidity from BYX (Tape C) and is assessed a rebate of \$0.0010 [sic] per share. *Id.*

<sup>11</sup> Fee code W is appended to orders that remove liquidity from BYX (Tape A) and is assessed a rebate of \$0.0010 [sic] per share. See the Exchange's fee schedule available at [http://www.bats.com/us/equities/membership/fee\\_schedule/byx/](http://www.bats.com/us/equities/membership/fee_schedule/byx/).

<sup>12</sup> ADV is defined as average daily volume calculated as the number of shares added or removed, combined, per day. *Id.*

<sup>13</sup> TCV is defined as the total consolidated volume calculated as the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply. *Id.*

<sup>14</sup> ADAV is defined as the average daily volume calculated as the number of shares added per day.

greater than 500,000 shares to receive the tier's enhanced rebate. The Exchange does not propose [sic] to amend the tier's rebate. The Exchange proposes to implement the above changes to its fee schedule on November 1, 2017.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,<sup>15</sup> in general, and furthers the objectives of Section 6(b)(4),<sup>16</sup> in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange believes that the proposed amendment to Tier 7 under footnote 1 is equitable and reasonable because such pricing programs reward a Member's growth pattern on the Exchange and such increased volume will allow the Exchange to continue to provide and potentially expand the [sic] its incentive programs. The Exchange believes that providing the enhanced rebate to Members under proposed Tiers 7 continues to be reasonable compared to the proposed more stringent requirements because the amended criteria reflects the difficulty to achieve the tier, especially as the amount of trading activity on the Exchange has increased over time. The increased criteria should incentive Members to provide additional liquidity on the Exchange in order to achieve the tier's enhanced rebate. The Exchange further believes that the proposal is reasonable, fair and equitable because the liquidity from the proposed changes would benefit all investors by deepening the Exchange's liquidity pool, offering additional flexibility for all investors to enjoy cost savings, supporting the quality of price discovery, promoting market transparency and improving investor protection. These pricing programs are also not unfairly discriminatory in that it is available to all Members.

In addition, volume-based fees such as that proposed herein have been widely adopted by exchanges and are equitable because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to: (i) The value to an exchange's market quality; (ii) associated higher levels of market activity, such as higher levels of

liquidity provision and/or growth patterns; and (iii) the introduction of higher volumes of orders into the price and volume discovery processes. The Exchange believes that the proposal is a reasonable, fair and equitable, and not an unfairly discriminatory allocation of fees and rebates, because it will provide Members with an additional incentive to add more liquidity on the Exchange to achieve the tier's increased criteria to receive the enhanced rebate.

### (B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that this change represents a significant departure from previous pricing offered by the Exchange or from pricing offered by the Exchange's competitors. The proposal would apply uniformly to all Members, and Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed change will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets. Further, excessive rates would serve to impair an exchange's ability to compete for order flow and members rather than burdening competition. The Exchange believes that its proposal would not burden intramarket competition because the proposal would apply uniformly to all Members.

### (C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>17</sup> and paragraph (f) of Rule 19b-4 thereunder.<sup>18</sup> At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such

action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

### Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-BatsBYX-2017-29 on the subject line.

### Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BatsBYX-2017-29. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BatsBYX-2017-29 and should be submitted on or before December 7, 2017.

BILLING CODE 8011-01-P

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-82043; File No. SR-LCH SA-2017-009]

### Self-Regulatory Organizations; LCH SA; Notice of Filing of Proposed Rule Change, Security-Based Swap Submission, or Advance Notice Relating to Wrong Way Risk Margin

November 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)<sup>1</sup> and Rule 19b-4 thereunder<sup>2</sup> notice is hereby given that on October 30, 2017, Banque Centrale de Compensation, which conducts business under the name LCH SA (“LCH SA”), filed with the Securities and Exchange Commission (“Commission”) the proposed rule change described in Items I, II, and III below, which Items have been prepared primarily by LCH SA. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Clearing Agency’s Statement of the Terms of Substance of the Proposed Rule Change

LCH SA is proposing to amend its Reference Guide: CDS Margin Framework (“CDS Clear Margin Framework” or “Framework”) to adjust the wrong way risk (“WWR”) margin component of the Framework to more appropriately address offsets between currencies when calculating WWR margin.

#### II. Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, LCH SA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. LCH SA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of these statements.

#### A. Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

##### 1. Purpose

The WWR component of the Framework is designed to cover the anticipated financial contagion effect that would arise in case of a clearing member being declared in default. The current WWR margin formula acknowledges offsets as between currencies by allowing offset between WWR and right way risk (“RWR”). Specifically, a WWR currency offset is applied as the greater of: (x) the WWR amount in Euros minus the RWR amount in Euros, where non-Euro amounts are converted to Euros using a foreign exchange (“FX”) rate plus or minus a haircut; and (y) the WWR amount in Euros multiplied by 1 minus a factor, which represents the correlation between European and U.S. financial institutions by calculating the average historical cross correlation of credit spreads on credit default swaps (“CDS”) in respect of all pairs of European and U.S. financial institutions that are clearing members. Under the current calculation, if one currency has WWR and the other has RWR, LCH SA would compare the WWR amount as offset by the RWR to the WWR amount as reduced by taking the correlation factor into account and take the greater of the two. As a result, either the full amount of RWR is considered as offsetting the WWR, or only a portion of the WWR is taken into account without any regard to the expected amount of RWR.

LCH SA believes that it is appropriate to consider the offset between the WWR amount and RWR amount but it would not be appropriate to apply the correlation factor to discount the WWR amount while also allowing the RWR to offset the WWR amount to its full extent. To be conservative, LCH SA believes that it is appropriate to apply the correlation factor to the RWR amount when using RWR to offset the WWR amount. Accordingly, LCH SA proposes to modify the WWR currency offset formula in the Framework to be the greater of: (i) the WWR amount in Euros, where such amounts are converted to Euros using an FX rate plus or minus a haircut, minus (ii) the RWR amount multiplied by the 10-year average historical correlation of credit spreads on CDS in respect of European and U.S. financial institutions; and zero. As of April 2016, the 10-year average historical correlation of credit spreads on CDS in respect of European and U.S. financial institutions was set to 48 percent.

Under this approach, RWR would never completely offset WWR and instead would be discounted based on the average of observed correlations of CDS credit spreads in respect of European and U.S. financial institutions. LCH SA believes that this change rationalizes the WWR currency offset and results in a more conservative WWR margin calculation.

##### 2. Statutory Basis

LCH SA believes that the proposed rule change is consistent with the requirements of Section 17A of the Securities Exchange Act of 1934<sup>3</sup> (the “Act”) and the regulations thereunder, including the standards under Rule 17Ad-22(b)(1) and (2).<sup>4</sup> Specifically, in accordance with Section 17(A)(b)(3)(F),<sup>5</sup> LCH SA believes that the proposed rule change will assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible, in that the proposed rule change is designed to rationalize the WWR currency offset and more conservatively calculate the WWR margin with respect to a clearing member. Therefore, LCH SA believes that the proposed rule change is consistent with the requirement of safeguarding securities and funds in Section 17(A)(b)(3)(F) of the Act and the requirements of maintaining margin and limiting a clearing agency’s exposures to potential losses from participants’ defaults under normal market conditions in Rule 17Ad-22(b)(1) and (2).<sup>6</sup>

Moreover, LCH SA believes that the proposed rule change is consistent with the requirements in Rule 17Ad-22(e)(6).<sup>7</sup> Rule 17Ad-22(e)(6)(i) and (v) require a covered clearing agency that provides central counterparty services to cover its credit exposures to its participants by establishing a risk-based margin system that, among other things, considers and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market, and uses an appropriate method for measuring credit exposure that accounts for relevant product risk factors and portfolio effects across products.<sup>8</sup> WWR is an important risk factor for clearing CDS products. As noted above, the proposed rule change rationalizes the WWR currency offset and more conservatively calculates WWR margin.

<sup>3</sup> 15 U.S.C. 78q-1.

<sup>4</sup> 17 CFR 240.17Ad-22(b)(1) and (2).

<sup>5</sup> 15 U.S.C. 78q-1(b)(3)(F).

<sup>6</sup> 17 CFR 240.17Ad-22(b)(1) and (2).

<sup>7</sup> 17 CFR 240.17Ad-22(e)(6).

<sup>8</sup> 17 CFR 240.17Ad-22(e)(6)(i) and (v).

<sup>19</sup> 17 CFR 200.30-3(a)(12).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

Therefore, LCH SA believes that the proposed rule change is consistent with Rule 17Ad-22(e)(6)(i) and (v).

#### *B. Clearing Agency's Statement on Burden on Competition*

Section 17A(b)(3)(I) of the Act requires that the rules of a clearing agency not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.<sup>9</sup> LCH SA does not believe that the proposed rule change would impose burdens on competition that are not necessary or appropriate in furtherance of the purposes of the Act. While the proposed rule change may result in higher WWR margin charges on participants, the revisions to the margin methodology will uniformly apply across all participants. In addition, as stated above, the proposed rule change is consistent with the applicable requirements of the Act and is appropriate in order to more conservatively calculate WWR margin. Therefore, LCH SA does not believe that the proposed rule change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

#### *C. Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others*

Written comments relating to the proposed rule change have not been solicited or received. LCH SA will notify the Commission of any written comments received by LCH SA.

### **III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

- (A) By order approve or disapprove such proposed rule change, or
- (B) institute proceedings to determine whether the proposed rule change should be disapproved.

### **IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

#### *Electronic Comments*

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-LCH SA-2017-009 on the subject line.

#### *Paper Comments*

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-LCH SA-2017-009. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of LCH SA and on LCH SA's Web site at <http://www.lch.com/asset-classes/cds/clear>.

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-LCH SA-2017-009 and should be submitted on or before December 7, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>10</sup>

#### **Proposed Collection; Comment Request**

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736

#### *Extension:*

Rule 31a-1

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520), the Securities and Exchange Commission ("Commission") is soliciting comments on the collections of information summarized below. The Commission plans to submit these existing collections of information to the Office of Management and Budget for extension.

Rule 31a-1 (17 CFR 270.31a-1) under the Investment Company Act of 1940 (the "Act") (15 U.S.C. 80a) is entitled "Records to be maintained by registered investment companies, certain majority-owned subsidiaries thereof, and other persons having transactions with registered investment companies." Rule 31a-1 requires registered investment companies ("funds"), and every underwriter, broker, dealer, or investment adviser that is a majority-owned subsidiary of a fund, to maintain and keep current accounts, books, and other documents which constitute the record forming the basis for financial statements required to be filed pursuant to section 31 of the Act (15 U.S.C. 80a-30) and of the auditor's certificates relating thereto. The rule lists specific records to be maintained by funds. The rule also requires certain underwriters, brokers, dealers, depositors, and investment advisers to maintain the records that they are required to maintain under federal securities laws.

There are approximately 4,029 investment companies registered with the Commission, all of which are required to comply with rule 31a-1. For purposes of determining the burden imposed by rule 31a-1, the Commission staff estimates that each fund is divided into approximately four series, on average, and that each series is required to comply with the recordkeeping requirements of rule 31a-1. Based on conversations with fund representatives, it is estimated that rule 31a-1 imposes an average burden of approximately 1,750 hours annually per series for a total of 7,000 annual hours per fund.

<sup>9</sup> 15 U.S.C. 78q-1(b)(3)(I).

<sup>10</sup> 17 CFR 200.30-3(a)(12).

The estimated total annual burden for all 4,029 funds subject to the rule therefore is approximately 28,203,000 hours. Based on conversations with fund representatives, however, the Commission staff estimates that even absent the requirements of rule 31a-1, 90 percent of the records created pursuant to the rule are the type that generally would be created as a matter of normal business practice and to prepare financial statements. Thus, the Commission staff estimates that the total annual burden associated with rule 31a-1 is 2,820,300 hours.

The estimate of average burden hours is made solely for the purposes of the Paperwork Reduction Act, and is not derived from a comprehensive or even a representative survey or study. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Written comments are requested on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information has practical utility; (b) the accuracy of the Commission's estimate of the burden(s) of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, C/O Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549; or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov).

Dated: November 9, 2017.

**Eduardo A. Aleman,**  
Assistant Secretary.

## SECURITIES AND EXCHANGE COMMISSION

### Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736

#### Extension:

Rule 0-1, SEC File No. 270-472, OMB Control No. 3235-0531

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et. seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget a request for extension of the previous approved collection of information discussed below.

The Investment Company Act of 1940 (the "Act")<sup>1</sup> establishes a comprehensive framework for regulating the organization and operation of investment companies ("funds"). A principal objective of the Act is to protect fund investors by addressing the conflicts of interest that exist between funds and their investment advisers and other affiliated persons. The Act places significant responsibility on the fund board of directors in overseeing the operations of the fund and policing the relevant conflicts of interest.<sup>2</sup>

In one of its first releases, the Commission exercised its rulemaking authority pursuant to sections 38(a) and 40(b) of the Act by adopting rule 0-1 (17 CFR 270.0-1).<sup>3</sup> Rule 0-1, as subsequently amended on numerous occasions, provides definitions for the terms used by the Commission in the rules and regulations it has adopted pursuant to the Act. The rule also contains a number of rules of construction for terms that are defined either in the Act itself or elsewhere in the Commission's rules and regulations. Finally, rule 0-1 defines terms that serve as conditions to the availability of certain of the Commission's exemptive rules. More specifically, the term "independent legal counsel," as defined in rule 0-1, sets out conditions that funds must meet in order to rely on any of ten exemptive rules ("exemptive rules") under the Act.<sup>4</sup>

The Commission amended rule 0-1 to include the definition of the term "independent legal counsel" in 2001.<sup>5</sup> This amendment was designed to

enhance the effectiveness of fund boards of directors and to better enable investors to assess the independence of those directors. The Commission also amended the exemptive rules to require that any person who serves as legal counsel to the independent directors of any fund that relies on any of the exemptive rules must be an "independent legal counsel." This requirement was added because independent directors can better perform the responsibilities assigned to them under the Act and the rules if they have the assistance of truly independent legal counsel.

If the board's counsel has represented the fund's investment adviser, principal underwriter, administrator (collectively, "management organizations") or their "control persons"<sup>6</sup> during the past two years, rule 0-1 requires that the board's independent directors make a determination about the adequacy of the counsel's independence. A majority of the board's independent directors are required to reasonably determine, in the exercise of their judgment, that the counsel's prior or current representation of the management organizations or their control persons was sufficiently limited to conclude that it is unlikely to adversely affect the counsel's professional judgment and legal representation. Rule 0-1 also requires that a record for the basis of this determination is made in the minutes of the directors' meeting. In addition, the independent directors must have obtained an undertaking from the counsel to provide them with the information necessary to make their determination and to update promptly that information when the person begins to represent a management organization or control person, or when he or she materially increases his or her representation. Generally, the independent directors must re-evaluate their determination no less frequently than annually.

Any fund that relies on one of the exemptive rules must comply with the requirements in the definition of "independent legal counsel" under rule 0-1. We assume that approximately 3,108 funds rely on at least one of the exemptive rules annually.<sup>7</sup> We further

<sup>6</sup> A "control person" is any person—other than a fund—directly or indirectly controlling, controlled by, or under common control, with any of the fund's management organizations. See 17 CFR 270.01(a)(6)(iv)(B).

<sup>7</sup> Based on statistics compiled by Commission staff, we estimate that there are approximately 3,453 funds that could rely on one or more of the exemptive rules (this figure reflects the three-year average of open-end and closed-end funds (3,349) and business development companies (104)). Of those funds, we assume that approximately 90

<sup>1</sup> 15 U.S.C. 80a.

<sup>2</sup> For example, fund directors must approve investment advisory and distribution contracts. See 15 U.S.C. 80a-15(a), (b), and (c).

<sup>3</sup> Investment Company Act Release No. 4 (Oct. 29, 1940) (5 FR 4316 (Oct. 31, 1940)). Note that rule 0-1 was originally adopted as rule N-1.

<sup>4</sup> The relevant exemptive rules are: Rule 10f-3 (17 CFR 270.10f-3), rule 12b-1 (17 CFR 270.12b-1), rule 15a-4(b)(2) (17 CFR 270.15a-4(b)(2)), rule 17a-7 (17 CFR 270.17a-7), rule 17a-8 (17 CFR 270.17a-8), rule 17d-1(d)(7) (17 CFR 270.17d-1(d)(7)), rule 17e-1(c) (17 CFR 270.17e-1(c)), rule 17g-1 (17 CFR 270.17g-1), rule 18f-3 (17 CFR 270.18f-3), and rule 23c-3 (17 CFR 270.23c-3).

<sup>5</sup> See Role of Independent Directors of Investment Companies, Investment Company Act Release No. 24816 (Jan. 2, 2001) (66 FR 3735 (Jan. 16, 2001)).

assume that the independent directors of approximately one-third (1,036) of those funds would need to make the required determination in order for their counsel to meet the definition of independent legal counsel.<sup>8</sup> We estimate that each of these 1,036 funds would be required to spend, on average, 0.75 hours annually to comply with the recordkeeping requirement associated with this determination, for a total annual burden of approximately 777 hours. Based on this estimate, the total annual cost for all funds' compliance with this rule is approximately \$168,350. To calculate this total annual cost, the Commission staff assumed that approximately two-thirds of the total annual hour burden (518 hours) would be incurred by a compliance manager with an average hourly wage rate of \$292 per hour,<sup>9</sup> and one-third of the annual hour burden (259 hours) would be incurred by compliance clerk with an average hourly wage rate of \$66 per hour.<sup>10</sup>

These burden hour estimates are based upon the Commission staff's experience and discussions with the fund industry. The estimates of average burden hours are made solely for the purposes of the Paperwork Reduction Act. These estimates are not derived from a comprehensive or even a representative survey or study of the costs of Commission rules.

Compliance with the collection of information requirements of the rule is mandatory and is necessary to comply with the requirements of the rule in general. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view the background documentation for this information

percent (3,108) actually rely on at least one exemptive rules annually.

<sup>8</sup> We assume that the independent directors of the remaining two-thirds of those funds will choose not to have counsel, or will rely on counsel who has not recently represented the fund's management organizations or control persons. In both circumstances, it would not be necessary for the fund's independent directors to make a determination about their counsel's independence.

<sup>9</sup> The estimated hourly wages used in this PRA analysis were derived from the Securities Industry and Financial Markets Association Reports on Management and Professional Earnings in the Securities Industry (2013) (modified to account for an 1800-hour work year and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead) (adjusted for inflation), and Office Salaries in the Securities Industry (2013) (modified to account for an 1800-hour work year and multiplied by 2.93 to account for bonuses, firm size, employee benefits and overhead) (adjusted for inflation).

<sup>10</sup>  $(518 \times \$292/\text{hour}) + (259 \times \$66/\text{hour}) = \$168,350.$

## SECURITIES AND EXCHANGE COMMISSION

### Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736

#### Extension:

Form N-6F; SEC File No. 270-185, OMB Control No. 3235-0238

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

The title for the collection of information is "Form N-6F (17 CFR 274.15), Notice of Intent to Elect to be Subject to Sections 55 through 65 of the Investment Company Act of 1940." The purpose of Form N-6F is to notify the Commission of a company's intent to file a notification of election to become subject to Sections 55 through 65 of the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*) ("1940 Act"). Certain companies may have to make a filing with the Commission before they are ready to elect to be regulated as a business development company.<sup>1</sup> A company that is excluded from the

<sup>1</sup> A company might not be prepared to elect to be subject to Sections 55 through 65 of the 1940 Act because its capital structure or management compensation plan is not yet in compliance with the requirements of those sections.

definition of "investment company" by Section 3(c)(1) because it has fewer than one hundred shareholders and is not making a public offering of its securities may lose such an exclusion solely because it proposes to make a public offering of securities as a business development company. Such company, under certain conditions, would not lose its exclusion if it notifies the Commission on Form N-6F of its intent to make an election to be regulated as a business development company. The company only has to file a Form N-6F once.

The Commission estimates that on average approximately 12 companies file these notifications each year. Each of those companies need only make a single filing of Form N-6F. The Commission further estimates that this information collection imposes burden of 0.5 hours, resulting in a total annual PRA burden of 6 hours. Based on the estimated wage rate, the total cost to the industry of the hour burden for complying with Form N-6F would be approximately \$2,070.

The collection of information under Form N-6F is mandatory. The information provided under the form is not kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The public may view the background documentation for this information collection at the following Web site, [www.reginfo.gov](http://www.reginfo.gov). Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: [Shagufta\\_Ahmed@omb.eop.gov](mailto:Shagufta_Ahmed@omb.eop.gov); and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov). Comments must be submitted to OMB within 30 days of this notice.

Dated: November 9, 2017.

**Eduardo A. Aleman,**  
Assistant Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82044; File No. SR–NYSEArca–2017–107]

### Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change To List and Trade Shares of the Breakwave Dry Bulk Shipping ETF Under NYSE Arca Rule 8.200–E, Commentary .02

November 9, 2017.

On September 8, 2017, NYSE Arca, Inc. (“Exchange”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) <sup>1</sup> and Rule 19b–4 thereunder,<sup>2</sup> a proposed rule change to list and trade shares of the Breakwave Dry Bulk Shipping ETF under NYSE Arca Rule 8.200–E, Commentary .02. The proposed rule change was published for comment in the **Federal Register** on September 28, 2017.<sup>3</sup> The Commission has received no comments on the proposal.

Section 19(b)(2) of the Act<sup>4</sup> provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is November 12, 2017. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,<sup>5</sup> designates December 27, 2017, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to

disapprove, the proposed rule change (File No. SR–NYSEArca–2017–107).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>6</sup>

Eduardo A. Aleman,  
Assistant Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82051; File No. SR–BatsBYX–2017–28]

### Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify Its Fees for Physical Ports

November 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) <sup>1</sup> and Rule 19b–4 thereunder,<sup>2</sup> notice is hereby given that on November 2, 2017, Cboe BYX Exchange, Inc. (“BYX” or the “Exchange”) (formerly known as Bats BYX Exchange, Inc.) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act<sup>3</sup> and Rule 19b–4(f)(2) thereunder,<sup>4</sup> which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members<sup>5</sup> and non-Members of the Exchange pursuant to BYX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange’s Web site at [www.markets.cboe.com](http://www.markets.cboe.com), at the principal office of the Exchange, and at

the Commission’s Public Reference Room.

#### II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

##### A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

###### 1. Purpose

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange’s servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange’s business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,000 per physical port that connects to the System<sup>6</sup> via 1 gigabyte circuit; and \$6,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from \$6,000 per month to \$7,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange’s Systems and enable it to continue to maintain and improve its market technology and services.<sup>7</sup> The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain \$2,000 per month. The Exchange

<sup>6</sup> The term “System” is defined as “the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.” See Exchange Rule 1.5(aa).

<sup>7</sup> The Exchange also proposes two minor technical amendments to this section of its fee schedule. First is to change the word “Connection” to “Connectivity” in the section’s title. The second is to change references to “G” for gigabyte to “Gb”.

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b–4.

<sup>3</sup> See Securities Exchange Act Release No. 81681 (September 22, 2017), 82 FR 45342.

<sup>4</sup> 15 U.S.C. 78s(b)(2).

<sup>5</sup> *Id.*

<sup>6</sup> 17 CFR 200.30–3(a)(31).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b–4.

<sup>3</sup> 15 U.S.C. 78s(b)(3)(A)(ii).

<sup>4</sup> 17 CFR 240.19b–4(f)(2).

<sup>5</sup> The term “Member” is defined as “any registered broker or dealer that has been admitted to membership in the Exchange.” See Exchange Rule 1.5(n).

proposes to implement this amendment to its fee schedule on January 2, 2018.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,<sup>8</sup> in general, and furthers the objectives of Section 6(b)(4),<sup>9</sup> in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange.

The Exchange believes that the proposed rate is equitable and non-discriminatory in that it applies uniformly to all Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fee will also enable the Exchange to continue to maintain and improve its market technology and services.

Lastly, the Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members. For instance, the proposed fees for a 10 gigabyte circuit of \$7,000 per month is less than analogous fees charged by the Nasdaq Stock Market LLC ("Nasdaq") and NYSE Arca, Inc. ("Arca"), which range from \$10,000—\$15,000 per month for 10 gigabyte circuits.<sup>10</sup>

### B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

### C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

<sup>10</sup> See Nasdaq Rule 7034(b) and the NYSE Arca fee schedule available at [https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE\\_Arca\\_Marketplace\\_Fees.pdf](https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf) (dated October 11, 2017).

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>11</sup> and paragraph (f) of Rule 19b-4 thereunder.<sup>12</sup> At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

### Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-BatsBYX-2017-28 on the subject line.

### Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-BatsBYX-2017-28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for

<sup>11</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>12</sup> 17 CFR 240.19b-4(f).

<sup>8</sup> 15 U.S.C. 78f.

<sup>9</sup> 15 U.S.C. 78f(b)(4).

inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BatsBYX-2017-28, and should be submitted on or before December 7, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>13</sup>

## SECURITIES AND EXCHANGE COMMISSION

### Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736

*Extension:*

Form N-PX; SEC File No. 270-524, OMB Control No. 3235-0582

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (“Paperwork Reduction Act”), the Securities and Exchange Commission (the “Commission”) has submitted to the Office of Management and Budget (“OMB”) a request for extension of the previously approved collection of information discussed below.

Rule 30b1-4 (17 CFR 270.30b1-4) under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*) requires every registered management investment company, other than a small business investment company registered on Form N-5 (“funds”), to file a report on Form N-PX not later than August 31 of each year. Funds use Form N-PX to file annual reports with the Commission containing their complete proxy voting record for the most recent twelve-month period ended June 30.

The Commission estimates that there are approximately 2,376 funds registered with the Commission, representing approximately 11,818 fund portfolios that are required to file Form N-PX reports. The 11,818 portfolios are comprised of approximately 7,111 portfolios holding equity securities,

3,249 portfolios holding no equity securities, and 1,458 portfolios holding fund securities (*i.e.*, fund of funds).<sup>1</sup> The currently approved burden of Form N-PX for portfolios holding equity securities is 7.2 hours per response, the current burden estimate for funds holding no equity securities is 0.17 hours (10 minutes) per response, and the current burden estimate for fund of funds is 1 hour per response. Therefore, the number of aggregate burden hours, when calculated using the current number of portfolios, is approximately 53,210 hours.<sup>2</sup> We continue to believe that these estimates for Form N-PX’s current burden are appropriate. Based on the Commission’s estimate of 53,210 burden hours and an estimated wage rate of approximately \$345 per hour,<sup>3</sup> the total cost to reporting persons of the hour burden for filing Form N-PX is approximately \$18.44 million.<sup>4</sup>

The estimated cost burden of Form N-PX is \$1,000 in external costs per portfolio holding equity securities that is paid to third-party service providers. External costs for portfolios holding no equity securities have previously been estimated to be zero because portfolios holding no equity securities generally have no proxy votes to report and therefore do not require third-party service providers to assist with proxy voting and preparing reports on Form N-PX. The estimated cost burden of Form N-PX for fund of funds is estimated to be \$100 per portfolio because fund of funds generally either have no proxy votes to report; or if proxy votes are reported, they are generally limited in the number of

<sup>1</sup> The estimate of 2,376 funds is based on the number of management investment companies currently registered with the Commission. The Commission staff estimates that there are approximately 6,385 portfolios that invest primarily in equity securities, 726 “hybrid” or bond portfolios that may hold some equity securities, 2,831 bond portfolios that hold no equity securities, and 418 money market fund portfolios, and 1,458 fund of funds, for a total of 11,818 portfolios required to file Form N-PX reports. The staff has based its portfolio estimates on a number of publications. See Investment Company Institute, Trends in Mutual Fund Investing (April 2017); Investment Company Institute, Closed-End Fund Assets and Net Issuance (First Quarter 2017); Investment Company Institute, ETF Assets and Net Issuance (April 2017).

<sup>2</sup> (7,111 portfolios that hold equity securities × 7.2 hours per year) + (3,249 portfolios holding no equity securities × 0.17 hours per year) + (1,458 portfolios holding fund securities × 1 hour per year) = 53,210 hours.

<sup>3</sup> The hourly wage figure for a compliance attorney is from the Securities Industry and Financial Markets Association’s Management & Professional Salaries in the Securities Industry 2013, modified by Commission staff to account for an 1800-hour work-year and inflation and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

<sup>4</sup> 53,210 hours × \$345 per hour = \$18,357,288.

securities and the number of voting matters relative to portfolios holding equity securities. Therefore, the aggregate cost burden, when calculated using the current number of portfolios, is approximately \$7.3 million in external costs.<sup>5</sup> We continue to believe that these estimates for Form N-PX’s current cost burden are appropriate.

Estimates of average burden hours and costs are made solely for the purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even representative survey or study of the costs of Commission rules and forms. Compliance with the collection of information requirements of Form N-PX is mandatory. Responses to the collection of information will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The public may view the background documentation for this information collection at the following Web site, [www.reginfo.gov](http://www.reginfo.gov). Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: [Shagufta.Ahmed@omb.eop.gov](mailto:Shagufta.Ahmed@omb.eop.gov); and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov). Comments must be submitted to OMB within 30 days of this notice.

Dated: November 9, 2017.

**Eduardo A. Aleman,**

*Assistant Secretary.*

[FR Doc. 2017-24753 Filed 11-15-17; 8:45 am]

**BILLING CODE 8011-01-P**

<sup>5</sup> (7,111 portfolios holding equity securities × \$1,000 per year) + (3,249 portfolios holding no equity securities × \$0 per year) + (1,458 fund of funds × \$100) = \$7,256,800.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-82045; File No. SR-Phlx-2017-87]

### Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 1059, Accommodation Transactions

November 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on October 26, 2017, Nasdaq PHLX LLC (“Phlx” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 1059, Accommodation Transactions.

The text of the proposed rule change is available on the Exchange’s Web site at <http://nasdaqphlx.cchwallstreet.com/>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

#### II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

##### A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

###### 1. Purpose

The Exchange proposes to amend Rule 1059, Accommodation Transactions, which provides for

cabinet trading<sup>3</sup> and is sometimes referred to as the “cabinet rule,” to delete outdated language in Rule 1059(a) relating to the role of specialists in cabinet trading, and to add to Rule 1059(a) a description of procedures that are currently followed in cabinet trading on the Exchange’s trading floor, to reflect actual practice.

Exchange Rule 1059, Accommodation Transactions, sets forth specific procedures for engaging in cabinet trades. Rule 1059(a) currently provides that the specialist registered in each class of option contracts shall supervise the operation of the cabinet for that class, and that all orders placed in the cabinet are assigned priority based upon the sequence in which such orders are received by the specialist. It states that all closing bids and offers are to be submitted to the specialist in writing, and that the specialist effects all closing cabinet transactions by matching such orders placed with him. The rule provides that bids or offers on orders to open for the accounts of customer, firm, specialists and Registered Options Traders (“ROTs”) can be made at \$1 per option contract, but that such orders cannot be placed in, and must yield to, all orders in the cabinet. Rule 1059(a) currently states that specialists shall effect all cabinet transactions by matching closing purchase or sale orders which are placed in the cabinet or, provided there is no matching closing purchase or sale order in the cabinet, by matching a closing purchase or sale order in the cabinet with an opening purchase or sale order. The rule states that all cabinet transactions are to be reported to the Exchange following the close of each business day.<sup>4</sup>

<sup>3</sup> An “accommodation” or “cabinet” trade refers to trades in listed options on the Exchange that are worthless or not actively traded, often times conducted to establish tax losses. Cabinet or accommodation trading of option contracts is intended to accommodate persons wishing to effect closing transactions in those series of options dealt in on the Exchange for which there is no auction market. A cabinet trade is a transaction in which the per-contract value of the cabinet trade is less than the per-contract value of a trade at the specified minimum increment for the option contract.

<sup>4</sup> Rule 1059(b) provides that any (i) member, (ii) member organization, or (iii) other person who is a non-member broker or dealer and who directly or indirectly controlled, is controlled by, or is under common control with, a member or member organization (any such other person being referred to as an affiliated person) may effect any transaction as principal in the over-the-counter market in any class of option contracts listed on the Exchange for a premium not in excess of \$1.00 per contract. The Exchange is proposing no changes to Rule 1059(b). The Commentary to Rule 1059 describes an existing pilot program to allow transactions to take place in open outcry at a price of at least \$0 but less than \$1 per option contract. These lower priced transactions are traded pursuant to the same

Rule 1059(a), which prescribes the roles described above for the specialist in executing cabinet trades, is inconsistent with procedures currently followed in the execution of these trades. Because remote trading has become common in recent years, such that specialists are no longer present on the trading floor in all options, the procedures used to execute cabinet trades have evolved. Additionally, with the migration of the Exchange to a new electronic trading system (“Phlx XL II”) in 2009, the role of the Exchange specialist changed.<sup>5</sup> Specialists no longer handle orders for other market participants in their capacity as specialists under the Exchange’s rules for electronic trading.

Accordingly, the Exchange proposes to delete a number of provisions of Rule 1059(a) which presume the participation of a specialist in every cabinet trade. First, the Exchange proposes to delete Rule 1059(a)(ii) which states that the specialist shall supervise the operation of the cabinet for that class, as well as the requirement in Rule 1059(a)(iii) that only closing limit orders at a price of \$1 per option contract for the accounts of customer, firm, specialists and ROTs may be placed in the cabinet and that such orders be submitted to the specialist in writing. Next, it proposes to delete Rule 1059(a)(iv) dealing with the priority of orders received by the specialist and Rule 1059(a)(v), which states that all closing bids and offers must be submitted to the specialist in writing, and that the specialist shall effect all closing cabinet transactions by matching such orders placed with him. The provision in Rule 1059(a)(v) stating that bids or offers on orders to open for the accounts of customer, firm, specialists and ROTs may be made at \$1 per option

procedures applicable to \$1 cabinet trades, except that pursuant to the pilot program (i) bids and offers for opening transactions are only permitted to accommodate closing transactions in order to limit use of the procedure to liquidations of existing positions, and (ii) the procedures are also made available for trading in options participating in the Penny Pilot Program. The pilot program is in effect until January 5, 2018, and the Exchange intends to file a proposed rule change to make the pilot program permanent before that date. The Exchange is proposing no changes to the Rule 1059 Commentary or the pilot program at this time.

<sup>5</sup> In May 2009, the Exchange enhanced the options trading system and adopted corresponding rules referring to it as “Phlx XL II.” See Securities Exchange Act Release No. 59995 (May 28, 2009), 74 FR 26750 (June 3, 2009) (SR-Phlx-2009-32). Thereafter, the Exchange submitted a number of filings updating various rules and deleting obsolete provisions. See Securities Exchange Act Release Nos. 61397 (January 22, 2010), 75 FR 4893 (January 29, 2010) (SR-Phlx-2010-07); 63036 (October 4, 2010), 75 FR 62621 (October 12, 2010) (SR-Phlx-2010-131); and 67469 (July 19, 2012), 77 FR 43633 (July 25, 2012) (SR-Phlx-2012-92).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

contract, but that such orders may not be placed in and must yield to all orders in the cabinet, is also proposed to be deleted. Finally, the Exchange proposes to delete Rule 1059(a)(vi) which states that specialists shall effect all cabinet transactions by matching closing purchase or sale orders which have been placed in the cabinet or, provided there is no matching closing purchase or sale order in the cabinet, by matching a closing purchase or sale order in the cabinet with an opening purchase or sale order.

The Exchange proposes to reorganize the rule for clarity and to add new language setting forth procedures that are currently followed on the trading floor to execute cabinet orders under Rule 1059. Rule 1059(a) would be revised to define the term “cabinet order” as a closing limit order at a price of \$1 per option contract for the account of a customer, firm, specialist or ROT. This new definition is consistent with current Rule 1059(a)(iii) which, while not a definition, provides that only closing limit orders at a price of \$1 per option contract for the accounts of customer, firm, specialists and ROTs may be placed in the cabinet. Rule 1059(a) would also specify that an opening order is not a “cabinet order” but may in certain cases be matched with a cabinet order pursuant to subsection (a)(iii) (as proposed to be amended). The rule would specify that only Floor Brokers may represent cabinet orders.

New Rule 1059(a)(ii) would be added, to provide that cabinet orders may be submitted to Floor Brokers and represented by them in the designated trading crowd of the option class and that Floor Brokers must use the designated cabinet transaction forms provided by the Exchange to document receipt of a cabinet order and the execution of a cabinet transaction. The new language would specify that Rule 1063(e)(i) shall not apply to orders placed in the cabinet or executed in the cabinet.<sup>6</sup>

The Exchange proposes to add new Rule 1059(a)(iii), which specifies the procedures to be followed by the Floor

Broker and other trading crowd participants to execute cabinet orders in three different scenarios. In each case, the Floor Broker would be required to act in the presence of at least one market-maker and NASDAQ Market Regulation Floor Surveillance.

Rule 1059(a)(iii)(A) governs cases where a Floor Broker holds a cabinet order but does not also hold contra-side interest. In that case, the Floor Broker shall announce the terms of the cabinet order to the trading crowd to solicit interest to participate on the closing position. All matching cabinet orders shall be assigned priority based upon the sequence in which such orders are received by the Floor Broker. If there is no matching cabinet order, the Floor Broker may match the cabinet order with a matching opening buy or sell limit order priced at \$1 per option contract. If there is no matching cabinet order or opening order, the Floor Broker may seek matching bids or offers for accounts of specialists and ROTs. Specialists and ROTs can only participate after all other orders have been matched.

Rule 1059(a)(iii)(B) governs cases where a Floor Broker holds a cabinet order and also a contra-side cabinet order. In that situation, the rule would require the Floor Broker to announce the terms of the cabinet orders to the trading crowd. The cabinet orders shall then be immediately crossed by the Floor Broker.

Finally, Rule 1059(a)(iii)(C) applies where a Floor Broker holds both a cabinet order and a contra-side opening order. In that situation, the Floor Broker is required to announce the terms of the cabinet order to the trading crowd. If there is a matching cabinet order, the Floor Broker shall match the two cabinet orders. If there is no matching cabinet order, the cabinet order shall then be immediately crossed by the Floor Broker with the opening order held by the Floor Broker.

The proposed amendments describing the updated cabinet trading procedures will change the current cabinet priority rules in some respects. Currently, specialists match all orders represented by all floor brokers on the floor, based first on time, then on opening vs. closing. The specialist is required to assign priority to all orders placed in the cabinet based upon the sequence in which such orders are received by the specialist. The specialist is then to match cabinet orders first against matching cabinet orders, and second, if there is no matching cabinet order, against a matching opening order.

The proposed priority rules focus on the cabinet order at the time it is

represented by a floor broker in the trading crowd. Thus, as proposed, each floor broker holding a cabinet order only would be required to assign priority to cabinet orders he holds based upon the sequence in which he receives such orders, consistent with the current rule’s requirement for specialists, but would not be required to cede priority to a cabinet order represented in the crowd at an earlier time by another Floor Broker.

The floor broker is then to assign matching cabinet orders from the crowd based upon the sequence in which the orders are received by that floor broker representing such order. For example, the “Floor Broker A” receives a cabinet order to buy 500 contracts and represents to the trading crowd. At the time of representation to the crowd, “Floor Broker B” has a matching cabinet order for 250 contracts and “Floor Broker C” enters the trading crowd after “Floor Broker B” with a matching cabinet order for 500 contracts. “Floor Broker A” then proceeds to match his 500 contracts to buy cabinet order with the matching cabinet order from “Floor Broker B” for 250 contracts and matching the balance of 250 contracts with “Floor Broker C”. The Floor Broker matched the cabinet orders based on the sequence in which the orders were received in the crowd at the time the cabinet order was represented. If there are no matching cabinet orders from the crowd, the floor broker may match the cabinet order with a matching opening order from the crowd. If however the floor broker holds both a cabinet order and a contra side cabinet order, the floor broker would be required to immediately cross those orders after announcing their terms in the crowd, regardless of cabinet orders held by other floor brokers. This represents a change to the priority scheme under the current cabinet rule.

The Exchange is proposing a number of additional, minor changes to Rule 1059. New Rule 1059(a)(iv) would require the Floor Broker, once the cabinet order has been either crossed or matched, to submit the designated cabinet form to the Nasdaq Market Operations staff for clearance and reporting at the close of the business day. Current Rule 1059(a)(viii), which provides that all cabinet transactions shall be reported to the Exchange following the close of each business day, would be deleted. Finally, Rule 1059(a)(vii) would be redesignated as Rule 1059(a)(v) and would be revised to delete an erroneous and outdated cross-

<sup>6</sup> Rule 1063(e)(i) provides for the use on the trading floor of the Options Floor Broker Management System. The proposed new language is consistent with Rule 1000(f)(iii)(B), which currently states that Floor Brokers can execute cabinet trades in the options trading crowd pursuant to Rule 1059, rather than by using the Floor Broker Management System. See Securities Exchange Act Release No. 69471 (April 29, 2013), 78 FR 26096 (May 3, 2013) (Order Approving Proposed Rule Change To Enhance the Functionality Offered on the Options Floor Broker Management System (“FBMS”) by, Among Other Things, Automating Functions Currently Performed by Floor Brokers), at footnote 9.

reference to Rule 1038, previously deleted from the rulebook.<sup>7</sup>

## 2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,<sup>8</sup> in general, and furthers the objectives of Section 6(b)(5) of the Act,<sup>9</sup> in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by providing detailed procedures for cabinet trades without the participation of specialists. As noted above, specialists are no longer common on the trading floor. By adopting the proposed amendments to the cabinet rules detailed above, the Exchange will maintain the ability for market participants to close out positions in which the value of the contract is less than the value of the contract at the minimum increment. The proposed rule change will conform the description of procedures in Rule 1059 to actual current practice. The proposed rule change permits market participants to continue to execute cabinet trades on the Exchange, even without the participation of specialists. The changes to the priority in which cabinet rules are executed are necessary in view of the new procedures for execution of cabinet trades without the participation of a specialist. The proposed amendments promote just and equitable principles of trade by setting forth priority rules for trade executions, and by requiring use of Exchange designated cabinet transaction forms to record information and the submission of the forms to Nasdaq Market Operations staff for the clearance and reporting of the cabinet trades.

The role of the specialist has changed on the Exchange, and specialists are no longer present in all options classes on the Exchange's trading floor. The proposed rule change would maintain market participants' ability to execute cabinet transactions on the Exchange's trading floor, in an open manner and in compliance with new procedures specified in the revised rule.

### *B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange does not believe that the proposed rule change will impose any burden on competition not

necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change permits market participants to continue to execute cabinet trades on the Exchange, even without the participation of specialists. The proposed amendments will apply to all Floor Brokers equally and in the same way. Phlx notes that market participants may also execute cabinet transactions on other exchanges.

### *C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were either solicited or received.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act<sup>10</sup> and subparagraph (f)(6) of Rule 19b-4 thereunder.<sup>11</sup>

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

### *Electronic Comments*

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or

<sup>10</sup> 15 U.S.C. 78s(b)(3)(A)(iii).

<sup>11</sup> 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-Phlx-2017-87 on the subject line.

### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-Phlx-2017-87. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-Phlx-2017-87 and should be submitted on or before December 7, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>12</sup>

## SECURITIES AND EXCHANGE COMMISSION

### Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From: Securities and Exchange*

<sup>12</sup> 17 CFR 200.30-3(a)(12).

<sup>7</sup> No changes are proposed to be made to Rule 1059(b) or to the Commentary.

<sup>8</sup> 15 U.S.C. 78f(b).

<sup>9</sup> 15 U.S.C. 78f(b)(5).

Commission, Office of FOIA Services,  
100 F Street NE., Washington, DC  
20549-2736

*Extension:*

Rule 17f-2(d); SEC File No. 270-36, OMB  
Control No. 3235-0028

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in Rule 17f-2(d) (17 CFR 240.17f-2(d)), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 17f-2(d) requires that records created pursuant to the fingerprinting requirements of Section 17(f)(2) of the Act be maintained and preserved by every member of a national securities exchange, broker, dealer, registered transfer agent and registered clearing agency ("covered entities" or "respondents"); permits, under certain circumstances, the records required to be maintained and preserved by a member of a national securities exchange, broker, or dealer to be maintained and preserved by a self-regulatory organization that is also the designated examining authority for that member, broker or dealer; and permits the required records to be preserved on microfilm. The general purpose of Rule 17f-2 is to: (i) Identify security risk personnel; (ii) provide criminal record information so that employers can make fully informed employment decisions; and (iii) deter persons with criminal records from seeking employment or association with covered entities. The rule enables the Commission or other examining authority to ascertain whether all covered persons are being fingerprinted and whether proper procedures regarding fingerprinting are being followed. Retention of these records for a period of not less than three years after termination of a covered person's employment or relationship with a covered entity ensures that law enforcement officials will have easy access to fingerprint cards on a timely basis. This in turn acts as an effective deterrent to employee misconduct.

Approximately 4,200 respondents are subject to the recordkeeping requirements of the rule. Each respondent maintains approximately 68 new records per year, each of which takes approximately 2 minutes per record to maintain, for an annual burden of approximately 2.2666667 hours (68 records times 2 minutes). The

total annual burden for all respondents is approximately 9,520 (4,200 respondents times 2.2666667 hours). As noted above, all records maintained subject to the rule must be retained for a period of not less than three years after termination of a covered person's employment or relationship with a covered entity. In addition, we estimate the total cost to respondents is approximately \$42,000 in third party storage costs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following Web site: [www.reginfo.gov](http://www.reginfo.gov). ## SECURITIES AND EXCHANGE COMMISSION

### Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736

*Extension:*

Rule 19a-1; SEC File No. 270-240, OMB  
Control No. 3235-0216

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520), the Securities and Exchange Commission (the "Commission") has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Section 19(a) (15 U.S.C. 80a-19(a)) of the Investment Company Act of 1940 (the "Act")<sup>1</sup> makes it unlawful for any registered investment company to pay any dividend or similar distribution from any source other than the company's net income, unless the payment is accompanied by a written statement to the company's shareholders which adequately discloses the sources of the payment. Section 19(a) authorizes the Commission to prescribe the form of such statement by rule.

Rule 19a-1 (17 CFR 270.19a-1) under the Act, entitled "Written Statement to Accompany Dividend Payments by Management Companies," sets forth specific requirements for the information that must be included in statements made pursuant to section 19(a) by or on behalf of management companies.<sup>2</sup> The rule requires that the statement indicate what portions of distribution payments are made from net income, net profits from the sale of a security or other property ("capital gains") and paid-in capital. When any part of the payment is made from capital gains, rule 19a-1 also requires that the statement disclose certain other information relating to the appreciation or depreciation of portfolio securities. If an estimated portion is subsequently determined to be significantly inaccurate, a correction must be made on a statement made pursuant to section 19(a) or in the first report to shareholders following the discovery of the inaccuracy.

The purpose of rule 19a-1 is to afford fund shareholders adequate disclosure of the sources from which distribution payments are made. The rule is intended to prevent shareholders from confusing income dividends with distributions made from capital sources. Absent rule 19a-1, shareholders might receive a false impression of fund gains.

Based on a review of filings made with the Commission, the staff estimates that approximately 11,818 series of registered investment companies that are management companies may be subject to rule 19a-1 each year,<sup>3</sup> and

<sup>1</sup> 15 U.S.C. 80a.

<sup>2</sup> Section 4(3) of the Act (15 U.S.C. 80a-4(3)) defines "management company" as "any investment company other than a face amount certificate company or a unit investment trust."

<sup>3</sup> This estimate is based on statistics compiled by Commission staff as of April 30, 2017. The number of management investment company portfolios that make distributions for which compliance with rule 19a-1 is required depends on a wide range of factors and can vary greatly across years. Therefore, the calculation of estimated burden hours is based on the total number of management investment company portfolios, each of which may be subject to rule 19a-1.

that each portfolio on average mails two statements per year to meet the requirements of the rule.<sup>4</sup> The staff further estimates that the time needed to make the determinations required by the rule and to prepare the statement required under the rule is approximately 1 hour per statement. The total annual burden for all portfolios therefore is estimated to be approximately 23,636 burden hours.<sup>5</sup>

The staff estimates that approximately one-third of the total annual burden (7,879 hours) would be incurred by a paralegal with an average hourly wage rate of approximately \$205 per hour,<sup>6</sup> and approximately two-thirds of the annual burden (15,757 hours) would be incurred by a compliance clerk with an average hourly wage rate of \$66 per hour.<sup>7</sup> The staff therefore estimates that the aggregate annual cost of complying with the paperwork requirements of the rule is approximately \$2,655,157 ((7,879 hours × \$205 = \$1,615,195) + (15,757 hours × \$66 = \$1,039,962)).

To comply with state law, many investment companies already must distinguish the different sources from which a shareholder distribution is paid and disclose that information to shareholders. Thus, many investment companies would be required to distinguish the sources of shareholder dividends whether or not the Commission required them to do so under rule 19a-1.

The estimate of average burden hours is made solely for the purposes of the Paperwork Reduction Act, and is not derived from a comprehensive or even a representative survey or study of the costs of Commission rules. Compliance with the collection of information required by rule 19a-1 is mandatory for management companies that make statements to shareholders pursuant to section 19(a) of the Act. An agency may not conduct or sponsor, and a person is not required to respond to, a collection

<sup>4</sup> A few portfolios make monthly distributions from sources other than net income, so the rule requires them to send out a statement 12 times a year. Other portfolios never make such distributions.

<sup>5</sup> This estimate is based on the following calculation: 11,818 management investment company portfolios × 2 statements per year × 1 hour per statement = 23,636 burden hours.

<sup>6</sup> Hourly rates are derived from the Securities Industry and Financial Markets Association ("SIFMA"), Management and Professional Earnings in the Securities Industry 2013, modified to account for an 1800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead.

<sup>7</sup> Hourly rates are derived from SIFMA's Office Salaries in the Securities Industry 2013, modified to account for an 1800-hour work-year and multiplied by 2.93 to account for bonuses, firm size, employee benefits and overhead.

of information unless it displays a currently valid control number.

The public may view the background documentation for this information collection at the following Web site, [www.reginfo.gov](http://www.reginfo.gov). Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: [Shagufta Ahmed@omb.eop.gov](mailto:Shagufta.Ahmed@omb.eop.gov); and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or send an email to: [PRA\\_Mailbox@sec.gov](mailto:PRA_Mailbox@sec.gov). Comments must be submitted to OMB within 30 days of this notice.

Dated: November 9, 2017.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-82052; File No. SR-BatsBZX-2017-76]

### Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify Its Fees for Physical Ports as They Apply to the Exchange's Equity Options Platform

November 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on November 2, 2017, Cboe BZX Exchange, Inc. ("BZX" or the "Exchange") (formerly known as Bats BZX Exchange, Inc.) filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act<sup>3</sup> and Rule 19b-4(f)(2) thereunder,<sup>4</sup> which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> 15 U.S.C. 78s(b)(3)(A)(ii).

<sup>4</sup> 17 CFR 240.19b-4(f)(2).

solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members<sup>5</sup> and non-Members of the Exchange pursuant to BZX Rules 15.1(a) and (c) to modify its fees for physical ports as they apply to the Exchange's equity options platform ("BZX Options").

The text of the proposed rule change is available at the Exchange's Web site at [www.markets.cboe.com](http://www.markets.cboe.com), at the principal office of the Exchange, and at the Commission's Public Reference Room.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

#### A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

##### 1. Purpose

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,000 per physical port that connects to the System<sup>6</sup> via 1 gigabyte circuit;

<sup>5</sup> The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

<sup>6</sup> The term "System" is defined as "the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when

and \$6,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from \$6,000 per month to \$7,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services.<sup>7</sup> The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain \$2,000 per month. The Exchange proposes to implement this amendment to its fee schedule on January 2, 2018.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,<sup>8</sup> in general, and furthers the objectives of Section 6(b)(4),<sup>9</sup> in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange.

The Exchange believes that the proposed rate is equitable and non-discriminatory in that it applies uniformly to all Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical

connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fee will also enable the Exchange to continue to maintain and improve its market technology and services.

Lastly, the Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members. For instance, the proposed fees for a 10 gigabyte circuit of \$7,000 per month is less than analogous fees charged by the Nasdaq Stock Market LLC ("Nasdaq") and NYSE Arca, Inc. ("Arca"), which range from \$10,000—\$15,000 per month for 10 gigabyte circuits.<sup>10</sup>

## B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors.

<sup>10</sup> See Nasdaq Rule 7034(b) and the NYSE Arca fee schedule available at [https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE\\_Arca\\_Marketplace\\_Fees.pdf](https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf) (dated October 11, 2017).

Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

## C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>11</sup> and paragraph (f) of Rule 19b-4 thereunder.<sup>12</sup> At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

### Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-BatsBZX-2017-76 on the subject line.

### Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-BatsBZX-2017-76. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/>

applicable, routing away." See Exchange Rule 1.5(aa).

<sup>7</sup> The Exchange also proposes two minor technical amendments to this section of its fee schedule. First is to change the word "Connection" to "Connectivity" in the section's title. The second is to change references to "G" for gigabyte to "Gb".

<sup>8</sup> 15 U.S.C. 78f.

<sup>9</sup> 15 U.S.C. 78f(b)(4).

<sup>11</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>12</sup> 17 CFR 240.19b-4(f).

*rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BatsBZX-2017-76, and should be submitted on or before December 7, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>13</sup>

**Eduardo A. Aleman,**  
Assistant Secretary.

<sup>24</sup> See Securities Exchange Act Release No. 80710 (May 17, 2017), 82 FR 23639 (May 23, 2017) (SR-FINRA-2017-011).

<sup>25</sup> See Securities Exchange Act Release Nos. 80721 (May 18, 2017), 82 FR 23864 (May 24, 2017) (SR-BOX-2017-16); 80713 (May 18, 2017), 82 FR 23956 (May 24, 2017) (SR-GEMX-2017-17); 80715 (May 18, 2017), 82 FR 23895 (May 24, 2017) (SR-

of the proposed rule change.<sup>35</sup> The Commission may, however, extend the period for issuing an order approving or disapproving the proposed rule change by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination.<sup>36</sup> The 180th day for the proposed rule changes published in the **Federal Register** on May 19, 2017,<sup>37</sup> is November 15, 2017. The 180th day for the proposed rule changes published in the **Federal Register** on May 22, 2017,<sup>38</sup> is November 18, 2017. The 180th day for the proposed rule change published in the **Federal Register** on May 23, 2017,<sup>39</sup> is November 19, 2017. The 180th day for the proposed rule changes published in the **Federal Register** on May 24, 2017,<sup>40</sup> is November 20, 2017. The 180th day for the proposed rule changes published in the **Federal Register** on June 1, 2017,<sup>41</sup> is November 28, 2017. The 180th day for the proposed rule change published in the **Federal Register** on June 5, 2017,<sup>42</sup> is December 2, 2017. The 180th day for the proposed rule changes published in the **Federal Register** on June 6, 2017,<sup>43</sup> is December 3, 2017.

The Commission is extending the 180-day time period for Commission action on each of the proposed rule changes. The Commission finds it appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule changes so that it has sufficient time to consider the proposed rule changes, the issues raised in the comment letters that have been submitted in connection therewith, the Participants' response to the comments, and the amendments to the proposed rule changes.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,<sup>44</sup> designates January 14, 2018 as the date by which the Commission shall either approve or disapprove the proposed rule changes (File Nos. SR-BatsBYX-2017-11; SR-BatsBZX-2017-38; SR-BatsEDGA-2017-13; SR-BatsEDGX-2017-22; SR-BOX-2017-16; SR-BX-2017-023; SR-C2-2017-017; SR-CBOE-2017-040; SR-CHX-2017-08; SR-FINRA-2017-011; SR-GEMX-2017-17; SR-IEX-2017-16; SR-ISE-2017-45; SR-MIAX-2017-18; SR-MRX-2017-04; SR-NASDAQ-2017-

046; SR-NYSE-2017-22; SR-NYSEArca-2017-52; SR-NYSEMKT-2017-26; SR-PEARL-2017-20; SR-PHLX-2017-37).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>45</sup>

**Eduardo A. Aleman,**

*Assistant Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-316, OMB Control No. 3235-0359]

### Proposed Collection; Comment Request

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736.

#### Extension:

Form N-17f-1

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the "Commission") is soliciting comments on the collections of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Form N-17f-1 (17 CFR 274.219) is entitled "Certificate of Accounting of Securities and Similar Investments of a Management Investment Company in the Custody of Members of National Securities Exchanges." The form serves as a cover sheet to the accountant's certificate that is required to be filed periodically with the Commission pursuant to rule 17f-1 (17 CFR 270.17f-1) under the Act, entitled "Custody of Securities with Members of National Securities Exchanges," which sets forth the conditions under which a fund may place its assets in the custody of a member of a national securities exchange. Rule 17f-1 requires, among other things, that an independent public accountant verify the fund's assets at the end of every annual and semi-annual fiscal period, and at least one other time during the fiscal year as chosen by the independent accountant. Requiring an independent accountant to examine the fund's assets in the custody of a member of a national securities exchange assists Commission staff in its inspection

program and helps to ensure that the fund assets are subject to proper auditing procedures. The accountant's certificate stating that it has made an examination, and describing the nature and the extent of the examination, must be attached to Form N-17f-1 and filed with the Commission promptly after each examination. The form facilitates the filing of the accountant's certificates, and increases the accessibility of the certificates to both Commission staff and interested investors.

*Commission staff estimates that it takes:* (i) 1 Hour of clerical time to prepare and file Form N-17f-1; and (ii) 0.5 hour for the fund's chief compliance officer to review Form N-17f-1 prior to filing with the Commission, for a total of 1.5 hours. Each fund is required to make 3 filings annually, for a total annual burden per fund of approximately 4.5 hours.<sup>1</sup> Commission staff estimates that an average of 6 funds currently file Form N-17f-1 with the Commission 3 times each year, for a total of 18 responses annually.<sup>2</sup> The total annual hour burden for Form N-17f-1 is therefore estimated to be approximately 27 hours.<sup>3</sup>

The estimate of average burden hours is made solely for the purposes of the Paperwork Reduction Act, and is not derived from a comprehensive or even a representative survey or study of the costs of Commission rules. Compliance with the collections of information required by Form N-17f-1 is mandatory for funds that place their assets in the custody of a national securities exchange member. Responses will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

The Commission requests written comments on: (a) Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information has practical utility; (b) the accuracy of the Commission's estimate of the burdens of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or

<sup>1</sup> This estimate is based on the following calculation: (1.5 hours × 3 responses annually = 4.5 hours).

<sup>2</sup> This estimate is based on a review of Form N-17f-1 filings made with the Commission over the last three years.

<sup>3</sup> This estimate is based on the following calculations: (4.5 hours × 6 funds = 27 total hours).

<sup>35</sup> 15 U.S.C. 78s(b)(2)(B)(ii)(I).

## SMALL BUSINESS ADMINISTRATION

### National Women's Business Council; Quarterly Public Meeting

**AGENCY:** National Women's Business Council, Small Business Administration.

**ACTION:** Notice of open public meeting.

**DATES:** The Public Meeting teleconference will be held on Thursday, December 7, 2017 from 2:00 p.m. to 4:00 p.m. EST.

**ADDRESSES:** The meeting will be held via teleconference.

**FOR FURTHER INFORMATION CONTACT:** The meeting is open to the public; however advance notice of attendance is requested. To RSVP and confirm attendance, the general public should email [info@nwbc.gov](mailto:info@nwbc.gov) with subject line—"RSVP for 12/7/17 Public Meeting". Anyone wishing to make a presentation to the NWBC at this meeting must contact Cristina Flores, Associate Director of Public Affairs at [info@nwbc.gov](mailto:info@nwbc.gov) or 202-205-6827.

For more information, please visit the National Women's Business Council Web site at [www.nwbc.gov](http://www.nwbc.gov).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix 2), the U.S. Small Business Administration (SBA) announces the meeting of the National Women's Business Council. The National Women's Business Council conducts research on issues of importance and impact to women entrepreneurs and makes policy recommendations to the SBA, Congress, and the White House on how to improve the business climate for women.

This meeting is the 1st Quarter meeting for Fiscal Year 2018. The online meeting will provide stakeholders with updates on the Council's research and

engagement activities. Time will be reserved at the end for audience participants to address Council Members, directly, with questions, comments, or feedback.

Dated: October 18, 2017.

**Richard Kingan,**

*SBA Committee Management Officer.*

**BILLING CODE 8025-01-P**

**DEPARTMENT OF STATE**

[Public Notice: 10192]

**Notice of Issuance of a Presidential Permit to Enbridge Energy, Limited Partnership**

**AGENCY:** Department of State.

**ACTION:** Notice.

**SUMMARY:** The Acting Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs, acting pursuant to delegated authorities, issued a Presidential permit to Enbridge Energy, Limited Partnership ("Enbridge") on October 13, 2017, authorizing Enbridge to operate and maintain pipeline facilities at the U.S.-Canada border in

Pembina County, North Dakota for the transportation of crude oil and other hydrocarbons. In accordance with Executive Order 13337 (April 30, 2004), the Acting Assistant Secretary determined that issuance of this permit would serve the national interest.

**FOR FURTHER INFORMATION CONTACT:** Richard W. Westerdale II, Bureau of Energy Resources, U.S. Department of State, 2201 C St. NW., Suite 4422, Washington, DC 20520, (202) 647-7947.

**SUPPLEMENTARY INFORMATION:** Additional information concerning the Enbridge pipeline facilities and documents related to the Department of State's review of the application for a Presidential permit can be found at <https://www.state.gov/e/enr/applicant/applicants/c55571.htm>. Following is the text of the permit, as issued:

**PRESIDENTIAL PERMIT**

**AUTHORIZING ENBRIDGE ENERGY, LIMITED PARTNERSHIP TO OPERATE AND MAINTAIN EXISTING PIPELINE FACILITIES AT THE INTERNATIONAL BOUNDARY BETWEEN THE UNITED STATES AND CANADA**

By virtue of the authority vested in me as Acting Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs, including those authorities under Executive Order 13337, 69 FR 25299 (2004), Department of State Delegation of Authority 118-2 of January 26, 2006, and Department of State Delegation of Authority 415 of January 18, 2017; having considered the environmental effects of the proposed action consistent with the National Environmental Policy Act of 1969 (83 Stat. 852; 42 U.S.C. 4321 *et seq.*), the Endangered Species Act of 1973 (16 U.S.C. 1536), and other statutes relating to environmental concerns; having considered the proposed action consistent with the National Historic Preservation Act of 1966 (80 Stat. 917, 16 U.S.C. 470f *et seq.*); and having requested and received the views of members of the public, various federal and state agencies, and various Indian tribes; I hereby grant permission, subject to the conditions herein set forth, to Enbridge Energy, Limited Partnership (hereinafter referred to as the "permittee"), a wholly owned subsidiary of Enbridge Energy Partners, L.P., a limited partnership organized under the laws of the state of Delaware, to operate and maintain pipeline facilities at the border of the United States and Canada at Neche, North Dakota, for the transport of crude oil and other hydrocarbons between the United States and Canada.

The term "facilities" as used in this permit means the relevant portion of the pipeline and any land, structures, installations or equipment appurtenant thereto.

The term "United States facilities" as used in this permit means those parts of the facilities located in the United States. The United States facilities consist of a 36-inch

diameter pipeline for the transport of up to 888,889 barrels per day of heavy crude oil and other hydrocarbons extending from the border between the United States and Canada at a point near Neche in Pembina County, North Dakota, up to and including the first mainline shut-off valve in the United States located approximately three miles from the international border.

The United States facilities also include certain appurtenant facilities, including such metering facilities as are required by the Commissioner of U.S. Customs and Border Protection.

This permit is subject to the following conditions:

*Article 1.* (1) The United States facilities herein described, and all aspects of their operation, shall be subject to all the conditions, provisions, and requirements of this permit and any amendment thereof. This permit may be terminated or amended at any time at the discretion of the Secretary of State or the Secretary's delegate or upon proper application therefor. The permittee shall make no substantial change in the United States facilities, the location of the United States facilities, or in the operation authorized by this permit until such changes have been approved by the Secretary of State or the Secretary's delegate.

(2) The operation and maintenance of the United States facilities shall be in all material respects as described in the permittee's application for a Presidential permit under Executive Order 13337, filed on November 20, 2012, as amended on June 16, 2014, the Final Supplemental Environmental Impact Statement (SEIS) dated August 11, 2017, including all Appendices as supplemented, and any measures to mitigate adverse impacts included in the permittee's policies, plans, and procedures for pipeline maintenance and operation, such as the permittee's Integrated Contingency Plan, Environmental Mitigation Plan (Pipeline Maintenance Projects), Operations and Maintenance Manuals, Unanticipated Discovery Plans, and other mitigation and control plans that are already approved or that are approved in the future by the Department of State or other relevant federal agencies. In the event of any discrepancy among these documents, operation and maintenance of the United States facilities shall be in all material respects as described in the most recent approved document unless otherwise determined by the Department of State.

*Article 2.* The standards for, and the manner of, the operation and maintenance of the United States facilities shall be subject to inspection and approval by the representatives of appropriate federal, state and local agencies. The permittee shall allow duly authorized officers and employees of such agencies free and unrestricted access to said facilities in the performance of their official duties.

*Article 3.* The permittee shall comply with all applicable federal, state, local, and tribal laws and regulations regarding the operation and maintenance of the United States facilities and with all applicable industrial codes. The permittee shall obtain requisite permits from relevant state and local

governmental entities, and relevant federal agencies.

*Article 4.* All operation and maintenance of the United States facilities under this permit shall be subject to the limitations, terms, and conditions issued by any competent agency of the U.S. government. The permittee shall continue the operations hereby authorized and conduct maintenance in accordance with such limitations, terms, and conditions. Such limitations, terms, and conditions could address, for example, environmental protection and mitigation measures, safety requirements, export or import and customs regulations, measurement capabilities and procedures, requirements pertaining to the pipeline's capacity, and other pipeline regulations. This permit shall continue in force and effect only so long as the permittee shall continue the operations hereby authorized in accordance with such limitations, terms, and conditions.

*Article 5.* Upon the termination, revocation, or surrender of this permit, and unless otherwise agreed by the Secretary of State or the Secretary's delegate, the United States facilities in the immediate vicinity of the international boundary shall be removed by and at the expense of the permittee within such time as the Secretary of State or the Secretary's delegate may specify, and upon failure of the permittee to remove, or to take such other appropriate action with respect to, this portion of the United States facilities as ordered, the Secretary of State or the Secretary's delegate may direct that possession of such facilities be taken and that they be removed or other action taken, at the expense of the permittee; and the permittee shall have no claim for damages by reason of such possession, removal, or other action.

*Article 6.* When, in the opinion of the President of the United States, the national security of the United States demands it, due notice being given by the Secretary of State or the Secretary's delegate, the United States shall have the right to enter upon and take possession of any of the United States facilities or parts thereof; to retain possession, management, or control thereof for such length of time as may appear to the President to be necessary; and thereafter to restore possession and control to the permittee. In the event that the United States shall exercise such right, it shall pay to the permittee just and fair compensation for the use of such United States facilities upon the basis of a reasonable profit in normal conditions, and the cost of restoring said facilities to as good condition as existed at the time of entering and taking over the same, less the reasonable value of any improvements that may have been made by the United States.

*Article 7.* Any transfer of ownership or control of the United States facilities or any part thereof shall be immediately notified in writing to the Department of State, including the submission of information identifying the transferee. This permit shall remain in force subject to all the conditions, permissions and requirements of this permit and any amendments thereto unless subsequently terminated or amended by the Secretary of State or the Secretary's delegate.

*Article 8.* (1) The permittee is responsible for acquiring any right-of-way grants or

easements, permits, and other authorizations as may become necessary and appropriate.

(2) The permittee shall hold harmless and indemnify the United States from any claimed or adjudged liability arising out of construction, connection, operation, or maintenance of the facilities, including but not limited to environmental contamination from the release or threatened release or discharge of hazardous substances and hazardous waste.

(3) The permittee shall maintain the United States facilities and every part thereof in a condition of good repair for their safe operation, and in compliance with prevailing environmental standards and regulations.

*Article 9.* The permittee shall take all necessary measures to prevent or mitigate adverse impacts on or disruption of the human environment in connection with the operation and maintenance of the United States facilities. Such measures will include the actions and obligations agreed to by permittee in its Operations and Maintenance Manuals, and other mitigation measures and control plans found in the SEIS, including all Appendices as supplemented, all of which are appended to and made part of this permit, or that are approved in the future by the Department of State or other relevant federal or state agencies, and any other measures deemed prudent by the permittee.

*Article 10.* The permittee shall file with the appropriate agencies of the U.S. government such statements or reports under oath with respect to the United States facilities, and/or permittee's activities and operations in connection therewith, as are now, or may hereafter, be required under any laws or regulations of the U.S. government or its agencies. The permittee shall file electronic Export Information where required.

*Article 11.* The permittee shall provide information upon request to the Department of State with regard to the United States facilities. Such requests could include, for example, information concerning current conditions or anticipated changes in ownership or control, operation, or maintenance of the United States facilities.

*In witness whereof*, I, Acting Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs, have hereunto set my hand this 13th day of October 2017 in the City of Washington, District of Columbia.  
Judith G. Garber,  
Acting Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs

End of permit text.

**BILLING CODE 4710-AE-P**

**DEPARTMENT OF STATE****[Public Notice: 10202]****Notice of Determinations: Culturally Significant Object Imported for Exhibition Determinations: "Rembrandt's Self-Portrait at the Age of 34" Exhibition**

**SUMMARY:** Notice is hereby given of the following determinations: I hereby determine that a certain object to be included in the exhibition "Rembrandt's Self-Portrait at the Age of 34," imported from abroad for temporary exhibition within the United States, is of cultural significance. The object is imported pursuant to a loan agreement with the foreign owner or custodian. I also determine that the exhibition or display of the exhibit object at the Norton Simon Museum of Art, Pasadena, California, from on or about December 7, 2017, until on or about March 5, 2018, and at possible additional exhibitions or venues yet to be determined, is in the national interest.

**FOR FURTHER INFORMATION CONTACT:** Elliot Chiu in the Office of the Legal Adviser, U.S. Department of State (telephone: 202-632-6471; email: [section2459@state.gov](mailto:section2459@state.gov)). The mailing address is U.S. Department of State, L/PD, SA-5, Suite 5H03, Washington, DC 20522-0505.

**SUPPLEMENTARY INFORMATION:** The foregoing determinations were made pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), E.O. 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.*; 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236-3 of August 28, 2000 (and, as appropriate, Delegation of Authority No. 257-1 of December 11, 2015). I have ordered that Public Notice of these determinations be published in the **Federal Register**.

**Alyson Grunder,**

*Deputy Assistant Secretary for Policy, Bureau of Educational and Cultural Affairs, Department of State.*

**BILLING CODE 4710-05-P**

**DEPARTMENT OF TRANSPORTATION****Federal Aviation Administration****Notice of Intent of Waiver With Respect to Land**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice.

**SUMMARY:** The FAA is considering a proposal to change a 29.429-acre portion of airport land from aeronautical use to non-aeronautical use and to authorize the sale of airport property located at Aurora Municipal Airport, Sugar Grove, IL.

The subject portion of airport property considered for release from obligation to be maintained for aeronautical use and sale includes a 26.67-acre portion of Parcel 33, a 0.69-acre portion of Parcel 10, and a 2.069-acre portion of Parcel 11 that are located in the northwest quadrant of the airport along Wheeler Road and currently not being used directly for aeronautical purposes. Currently, ownership of the property provides for protection of FAR Part 77 surfaces and compatible land use which would continue to be protected with deed restrictions required in the transfer of land ownership. The change from aeronautical to non-aeronautical use would allow for the more efficient use of existing airport property. The aforementioned land is not needed for aeronautical use.

**DATES:** Comments must be received on or before December 18, 2017.

**ADDRESSES:** Documents are available for review by prior appointment at the FAA Airports District Office, Mr. Richard Pur, Airports Engineer, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, IL 60018. Telephone: (847) 294-7527/Fax: (847) 294-7046, and Aurora Municipal Airport, 43 W 636 US 30, Sugar Grove, IL 60554. Telephone: (630) 466-7000/Fax: (630) 466-1166.

*Written comments on the Sponsor's request must be delivered or mailed to:* Mr. Richard Pur, Airports Engineer, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, IL 60018. Telephone: (847) 294-7527/Fax: (847) 294-7046.

**FOR FURTHER INFORMATION CONTACT:** Mr. Richard Pur, Airports Engineer, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, IL 60018. Telephone: (847) 294-7527/Fax: (847) 294-7046.

**SUPPLEMENTARY INFORMATION:** In accordance with section 47107(h) of Title 49, United States Code, this notice is required to be published in the **Federal Register** 30 days before modifying the land-use assurance that requires the property to be used for an aeronautical purpose.

The acquisition of Parcel 33 (102.77 acres) was originally funded under Federal AIP Grant 3-17-0003-B7 in 1992, with the original Parcel 10 (120.00 acres) acquisition funded under Federal AIP Grant 3-17-0003-B10 in 1999, and the original Parcel 11 (40.00 acres) acquisition funded under Federal AIP Grant 3-17-0006-B10 in 1999. The subject portions of those parcels are currently used for FAR Part 77 protection and to ensure compatible land use. The City of Aurora plans to sell the subject property to the Village of Sugar Grove. Fair Market Value will be obtained from the sale of the subject property.

This notice announces that the FAA is considering the release of the subject airport property at Aurora Municipal Airport, Sugar Grove, IL, from Federal land covenants, subject to a reservation for continuing right of flight as well as restrictions on the released property as required in FAA Order 5190.6B Section 22.16. Approval does not constitute a commitment by the FAA to financially assist in the disposal of the subject airport property nor a determination of eligibility for grant-in-aid funding from the FAA. The use of the revenue generated from the sale of the airport property will be in accordance with FAA's Policy and Procedures concerning the Use of Airport Revenue, published in the **Federal Register** on February 16, 1999 (64 FR 7696).

**Parcel 33-2—Subject Portion of Parcel 33 (Legal Description)**

That part of the Southwest Fractional Quarter of Section 7, Township 38 North, Range 7 East of the Third Principal Meridian, Kane County, IL, more particularly described as follows.

Commencing at the northwest corner of the Southwest Fractional Quarter of Section 7, Township 38 North, Range 7 East of the Third Principal Meridian; thence North 89 degrees 35 minutes 16 seconds East along the north line of said Southwest Fractional Quarter, 286.50 feet to the Point of Beginning; thence continuing North 89 degrees 35 minutes 16 seconds East, 1383.22 feet to the northeast corner of said Southwest Fractional Quarter; thence South 00 degrees 35 minutes 03 seconds East along the east line of said Southwest Fractional Quarter, 1070.00 feet; thence South 89 degrees 35 minutes 16 seconds West, 712.41 feet; thence North 32 degrees 37 minutes 11 seconds West, 61.09 feet; thence northwesterly on a curve to the left having a radius of 494.40 feet, an arc length of 638.91 feet, the chord of said curve bears North 32 degrees 37 minutes 11 seconds West a distance of 595.37 feet; thence North 32

degrees 37 minutes 11 seconds West, 608.13 feet to the Point of Beginning, containing 26.67 acres, more or less.

**Parcels 10–2 & 11–2—Subject Portion of Parcels 10 & 11 (Legal Description)**

Part of the Northeast Quarter of Section 18, Township 38 North, Range 7 East of the Fourth Principal Meridian, Kane County, IL.

Commencing at the Northwest Corner of said Northeast Quarter of Section 18; thence North 89 degrees 34 minutes 19 seconds East along the North Line of said Northeast Quarter, a distance of 133.53 feet to the Point of Beginning; thence North 89 degrees 34 minutes 19 seconds East along said North Line, a distance of 868.30 feet; thence 75.00 feet along a curve concave to the Southeast, having a radius of 508.72 feet, a central angle of 8 degrees 26 minutes 50 seconds and the long chord of said bears South 63 degrees 42 minutes 36 seconds West, a chord distance of 74.93 feet; thence South 59 degrees 29 minutes 12 seconds West, a distance of 204.31 feet; thence South 30 degrees 30 minutes 48 seconds East, a distance of 1.00 foot; thence South 59 degrees 29 minutes 12 seconds West, a distance of 16.00 feet; thence North 30 degrees 30 minutes 48 seconds West, a distance of 1.00 foot; thence South 59 degrees 29 minutes 12 seconds West, a distance of 28.95 feet; thence 650.32 feet along a curve concave to the North, having a radius of 426.72 feet, a central angle of 87 degrees 19 minutes 08 seconds and the long chord of said curve bears North 76 degrees 51 minutes 15 seconds West, a chord distance of 589.19 feet; thence North 33 degrees 11 minutes 41 seconds West, a distance of 23.02 feet to the Point of Beginning, containing 2.759 acres, more or less.

Issued in Des Plaines, IL, on November 1, 2017.

**Deb Bartell,**

Manager, Chicago Airports District Office, FAA, Great Lakes Region.

[FR Doc. 2017–24867 Filed 11–15–17; 8:45 am]

BILLING CODE 4910–13–P

**DEPARTMENT OF TRANSPORTATION**

**Federal Motor Carrier Safety Administration**

[Docket No. FMCSA–2015–0111]

**Parts and Accessories Necessary for Safe Operation; Exemption Renewal for Ford Motor Company**

**AGENCY:** Federal Motor Carrier Safety Administration (FMCSA), DOT.

**ACTION:** Notice of renewal of exemption, request for comments.

**SUMMARY:** FMCSA announces its decision to renew for a period of 5 years Ford Motor Company's (Ford) current exemption allowing motor carriers to operate Ford's Transit-based commercial motor vehicles (CMV) that do not meet the exhaust system location requirements in the Federal Motor Carrier Safety Regulations (FMCSR). The FMCSRs require (1) the exhaust system of a bus powered by a gasoline engine to discharge to the atmosphere at or within 6 inches forward of the rearmost part of the bus and (2) the exhaust system of every truck and truck tractor to discharge to the atmosphere at a location to the rear of the cab or, if the exhaust projects above the cab, at a location near the rear of the cab. Although the Ford Transit does not meet these requirements, it has undergone performance-based testing that demonstrates that the exhaust system achieves a level of safety equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation. Ford performed carbon monoxide (CO) concentration tests, which used CO monitors at various locations within the vehicle to measure the concentration of CO ingress into the occupant compartment (from the vehicles' own powertrain and exhaust system), under various driving conditions including idle and top speed. The tests showed that the resulting CO concentration is below every threshold used by Federal Agencies. The Agency has concluded that granting this exemption renewal will maintain a level of safety equivalent to, or greater than, the level of safety provided by the rule restricting the location of exhaust systems on CMVs to ensure that exhaust fumes will not affect the driver's alertness or health or the health of passengers.

**DATES:** The renewal outlined in this notice extends the exemption from August 15, 2017, through August 15, 2022. Comments on the decision must be received on or before December 18, 2017.

**ADDRESSES:** You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA–2015–0111 using any of the following methods:

- *Web site:* <http://www.regulations.gov>. Follow the instructions for submitting comments on the Federal electronic docket site.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, Room W12–140, 1200 New Jersey

Avenue SE., Washington, DC 20590–0001.

• *Hand Delivery:* Ground Floor, Room W12–140, DOT Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. e.t., Monday–Friday, except Federal holidays.

*Instructions:* All submissions must include the Agency name and docket number for this notice. For detailed instructions on submitting comments and additional information on the exemption process, see the “Public Participation” heading below. Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Please see the “Privacy Act” heading for further information.

*Docket:* For access to the docket to read background documents or comments received, go to <http://www.regulations.gov> or to Room W12–140, DOT Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

*Privacy Act:* In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to [www.regulations.gov](http://www.regulations.gov), as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at [www.dot.gov/privacy](http://www.dot.gov/privacy).

*Public participation:* The <http://www.regulations.gov> Web site is generally available 24 hours each day, 365 days each year. You may find electronic submission and retrieval help and guidelines under the “help” section of the <http://www.regulations.gov> Web site as well as the DOT's <http://docketsinfo.dot.gov> Web site. If you would like notification that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgment page that appears after submitting comments online.

**FOR FURTHER INFORMATION CONTACT:** Mr. Luke Loy, Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety, MC–PSV, (202) 366–0676, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590–0001.

**SUPPLEMENTARY INFORMATION:**

**Background**

Section 4007 of the Transportation Equity Act for the 21st Century (TEA–21) [Pub. L. 105–178, June 9, 1998, 112 Stat. 401] amended 49 U.S.C. 31315 and

31136(e) to provide authority to grant exemptions from certain portions of the Federal Motor Carrier Safety Regulations (FMCSRs). On August 20, 2004, FMCSA published a final rule (69 FR 51589) implementing section 4007. Under this rule, FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public with an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments and determines whether granting the exemption would likely achieve a level of safety equivalent to or greater than the level that would be achieved by the current regulation (49 CFR 381.305).

The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)). If the Agency denies the request, it must state the reason for doing so. If the decision is to grant the exemption, the notice must specify the person or class of persons receiving the exemption and the regulatory provision or provisions from which an exemption is granted. The notice must specify the effective period of the exemption (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.315(c) and 49 CFR 381.300(b)).

#### **Ford's Application for Exemption**

On December 1, 2014, Ford applied for an exemption from 49 CFR 393.83 to allow motor carriers to operate Ford-manufactured Transit-based CMVs that do not comply with the exhaust system location requirements. Section 393.83, "Exhaust systems," includes requirements regarding the location of exhaust systems on CMVs to ensure that exhaust fumes will not affect the driver's alertness or health or the health of passengers. Specifically, § 393.83(c) states that "[t]he exhaust system of a bus powered by a gasoline engine shall discharge to the atmosphere at or within 6 inches forward of the rearmost part of the bus"; and § 393.83(e) states that "[t]he exhaust system of every truck and truck tractor shall discharge to the atmosphere at a location to the rear of the cab or, if the exhaust projects above the cab, at a location near the rear of the cab." According to the 2014 exemption application:

Although Ford Transit vehicles may not satisfy the exhaust system location requirements of § 393.83, Ford has several internal requirements applicable to the design of the tailpipe system that ensure the

system will provide high levels of safety for its customers. Ford's requirements address passenger compartment exhaust gas intrusion and management of high temperature components. These requirements include testing of the system and basic design requirements for the location of the tailpipe in relation to underbody components like the brake lines and fuel lines. Most significantly Ford uses internal performance based tests that demonstrate the system achieves a level of safety equivalent to or greater than, the level of safety that would be obtained by complying with the regulation. The main test of interest is the Carbon Monoxide Concentration test. This performance based test uses CO monitors at various locations in the vehicle to measure the concentration of CO ingress into the occupant compartment (from vehicles' own powertrain and exhaust system) under various driving conditions including idle and top speed.

Ford tested the 2015 model year Transit in accordance with "Ford global common engineering test procedures," which limits CO levels to 27 parts-per-million (ppm) for a 30 minute Time Weighted Average (TWA) during continuous driving. Ford stated that the 27 ppm limit is based on the Environmental Protection Agency's (EPA) Acute Exposure Guideline Level limits for CO exposure for 8 hour TWA, which is more severe than both the Occupational Safety & Health Administration's (OSHA) permissible exposure limit of 50 ppm for an 8 hour TWA and the National Institute of Occupational Safety and Health's (NIOSH) permissible exposure limit of 35 ppm for a 10 hour TWA. Under "worst-case conditions," Ford measured the CO level to be 17 ppm for the model year 2015 Transit, well below the EPA, OSHA, and NIOSH limits.

Additionally, Ford stated that it has internal requirements to establish the appropriate clearance required between a vehicle and the ground to meet a minimum level of on-road functionality. Ford has specific departure angle requirements for the vehicle to reduce tailpipe contact with the ground, curbs, ramps, etc., during various driving modes, thus avoiding damage to the exhaust system that may adversely affect the exhaust function.

FMCSA published a notice of the application in the **Federal Register** on April 17, 2015, and asked for public comment (80 FR 21294). FMCSA granted the exemption on August 12, 2015 (80 FR 48408). The Agency concluded that granting the temporary exemption to allow the operation of model year 2015 Ford Transit-based gas bus models (of all gross vehicle weight ratings), vans over 10,000 pounds gross vehicle weight rating, and corresponding future Transit-based

models of the same design produced during the effective period of the exemption will provide a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption. Ford conducted performance-based testing that demonstrates that the design of the exhaust system for the model year 2015 and later Ford Transit CMVs (1) results in CO exposure limits that are well below EPA, OSHA, and NIOSH established thresholds, and (2) will maintain a level of safety that is equivalent to the level of safety achieved without the exemption. The exemption was granted for a 2-year period, beginning August 12, 2015 and ending August 14, 2017.

#### **Ford's Request To Renew the Exemption**

At the time the exemption was granted, the term of temporary exemptions was limited by statute to a maximum of 2 years. However, on December 4, 2015, President Obama signed the Fixing America's Surface Transportation (FAST) Act, which now allows an exemption to be granted for a period of 5 years (49 U.S.C. 31315(b)(2)) if FMCSA finds "such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption" (31315(b)(1)). Ford has requested a 5-year extension for the exemption from 49 CFR 393.83 to allow motor carriers to operate model year 2015 Ford-manufactured Transit-based CMVs, and later model year Transit-based models that do not comply with the exhaust system location requirements.

#### **Basis for Renewing Exemption**

FMCSA is not aware of any evidence showing that the operation of model year 2015, 2016, or 2017 Ford Transit-based gas bus models (all gross vehicle weight ratings), vans over 10,000 pounds gross vehicle weight rating, and Transit-based models of the same design produced during the current exemption has resulted in any degradation of safety. The Agency believes that extending the exemption for a period of 5 years will likely achieve a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption. Performance-based testing conducted by Ford has demonstrated that the design of the exhaust system for the model year 2015 and later Ford Transit CMVs (1) results in CO exposure limits that are well below EPA, OSHA, and NIOSH established thresholds, and (2) will maintain a level of safety that is

equivalent to the level of safety achieved without the exemption.

The renewal outlined in this notice extends the exemption from August 12, 2017 through August 12, 2022, and requests public comment. The exemption will be valid for 5 years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) Motor carriers and/or commercial motor vehicles fail to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315.

### Preemption

In accordance with 49 U.S.C. 381.600, as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation applicable to interstate commerce that conflicts with or is inconsistent with this exemption with respect to a firm or person operating under the exemption. States may, but are not required to, adopt the same exemption with respect to operations in intrastate commerce.

### Request for Comments

FMCSA requests comments from parties with data concerning the safety record of motor carriers operating Model Year 2015 Ford-manufactured Transit based CMVs, and corresponding future Transit-based models of the same design in accordance with the conditions of the exemption. The Agency will evaluate adverse evidence submitted during the comment period and at any time during the 5-year period of the exemption. If safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b)(1), FMCSA will take immediate steps to revoke the Ford exemption.

Issued on: November 8, 2017.

## DEPARTMENT OF TRANSPORTATION

### National Highway Traffic Safety Administration

[Docket No. NHTSA-2017-0092; Notice 1]

#### Mazda Motor Corporation, Receipt of Petition for Determination of Inconsequentiality of Takata's Defect Information Report Filing Under NHTSA Campaign Number 17E-034 for PSDI-5 Desiccated Driver Air Bag Inflators and Decision Denying Request for Deferral of Determination

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Notice of receipt of petition; notice of receipt of request for deferral and of decision denying request for deferral.

**SUMMARY:** On July 10, 2017, Takata Corporation ("Takata") filed a defect information report ("DIR") in which it determined that a safety-related defect exists in certain phase-stabilized ammonium nitrate ("PSAN") driver-side airbag inflators that it manufactured with a calcium sulfate desiccant, including inflators that it supplied to Ford Motor Company ("Ford"), Mazda North American Operations ("Mazda"), and Nissan North America Inc. ("Nissan") for use in certain vehicles. Mazda's vehicles identified by Takata's DIR were designed by Ford and were built on the same platform and using the same airbag inflators as the affected Ford vehicles. Mazda has petitioned the Agency—in part through a purported joint petition with Ford (see DOCKET NO. NHTSA-2017-0093)—for a decision that because analysis of inflators installed in certain Ford vehicles does not demonstrate propellant-tablet density degradation or increased inflation pressure, and because there are design differences between the inflators installed in Ford and Mazda vehicles and an inflator variant installed in Nissan vehicles, the equipment defect determined to exist by Takata is inconsequential as it relates to motor vehicle safety in the Mazda vehicles affected by Takata's DIR. Mazda requests relief from its notification and remedy obligations under the National Traffic and Motor Vehicle Safety Act of 1966 and its applicable regulations, and further requests that the Agency defer a decision on the petition until March 31, 2018 to allow Ford to complete certain analysis and testing.

**DATES:** The closing date for comments is December 18, 2017.

**ADDRESSES:** Interested persons are invited to submit written data, views, and arguments regarding this petition for inconsequentiality. Comments must refer to the docket and notice number cited in the title of this notice and be submitted by one of the following methods:

- *Internet:* Go to <http://www.regulations.gov> and follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, M-30, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12-140, Washington, DC 20590.
- *Hand Delivery or Courier:* U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12-140, Washington, DC 20590 between 9 a.m. and 5 p.m. Eastern Time, Monday through Friday, except Federal holidays.

- *Facsimile:* (202) 493-2251.

You may call the Docket at (202) 366-9324.

Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Thus, submitting such information makes it public. You may wish to read the Privacy Act notice, which can be viewed by clicking on the "Privacy and Security Notice" link in the footer of <http://www.regulations.gov>. DOT's complete Privacy Act Statement is available for review in the **Federal Register** published on April 11, 2000 (65 FR 19477-78).

The petition, supporting materials, and all comments received before the close of business on the closing date indicated above will be filed in the docket and will be considered. Comments and supporting materials received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

#### FOR FURTHER INFORMATION CONTACT:

*For legal issues:* Stephen Hench, Office of the Chief Counsel, NCC-100, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590 (telephone: (202) 366-5263).

For general information regarding NHTSA's investigation into Takata airbag inflator ruptures and the related recalls, visit <https://www.nhtsa.gov/recall-spotlight/takata-air-bags>.

#### SUPPLEMENTARY INFORMATION:

## I. Background

On November 3, 2015, NHTSA issued, and Takata agreed to, a Consent Order setting forth penalties, requirements, and performance obligations in connection with Takata's alleged failure to fully comply with the National Traffic and Motor Vehicle Safety Act of 1966 as amended and recodified (the "Safety Act"), 49 U.S.C. 30101, *et seq.*, and its applicable regulations. Under the Consent Order, Takata is required to test its phase-stabilized ammonium nitrate ("PSAN") inflators that contain a desiccant (a drying agent) in cooperation with vehicle manufacturers "to determine the service life and safety of such inflators and to determine whether, and to what extent, these inflator types suffer from a defect condition, regardless of whether it is the same or similar to the conditions at issue" in the Defect Information Reports ("DIRs") Takata had filed for its non-desiccated PSAN inflators. Consent Order ¶ 28.

In February 2016, NHTSA requested Ford's assistance in evaluating Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators, to which Ford agreed.<sup>1</sup> In June 2016, Ford and Takata began a field-recovery program to evaluate Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators that were original equipment in MY 2007–2008 Ford Ranger vehicles in Florida, Michigan, and Arizona. *See also* Recall No. 17E-034.<sup>2</sup> Nissan also initiated a similar field-recovery program for its Versa vehicles in March 2016. Recall No. 17V-449. By January 2017, a very limited number of samples from Ford were available and tested. Recall No. 17E-034. In March 2017, Takata and Ford met to review the field data collected from the inflators returned by Ford and Nissan. Recall No. 17E-034. Between March and June 2017, additional Ford inflators were subjected to live dissection, which included chemical and dimensional propellant analyses, and ballistic

testing. Recall No. 17E-034. Also in June, Takata reviewed with Ford and NHTSA field-return data from Ford inflators. Recall No. 17E-034. Ford then met with NHTSA on July 6, 2017 to discuss the data collected to date, as well as an expansion plan for evaluating Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators.

Takata has analyzed over 400 such inflators from the Ford program—as well as 895 such inflators from the Nissan program. *See* Recall No. 17V-449. After a review of field-return data, on July 10, 2017, Takata, determining a safety-related defect exists, filed a DIR for calcium-sulfate desiccated PSDI-5 driver-side airbag inflators that were produced from January 1, 2005 to December 31, 2012 and installed as original equipment on certain motor vehicles manufactured by Ford (the "covered Ford inflators"), as well as calcium-sulfate desiccated PSDI-5 driver-side airbag inflators for those same years of production installed as original equipment on motor vehicles manufactured by Nissan (the "covered Nissan inflators") and Mazda (the "covered Mazda inflators") (collectively, the "covered inflators"). Recall No. 17E-034.

Takata's DIR filing triggered Mazda's obligation to file a DIR for its affected vehicles. *See* 49 CFR part 573; November 3, 2015 Coordinated Remedy Order ¶¶ 45–46.<sup>3</sup> Mazda filed a corresponding DIR, informing NHTSA it intended to file a petition for inconsequentiality. *Mazda Motor Corporation Petition for Determination of Inconsequentiality of Takata's Defect Information Report filing under NHTSA Campaign Number 17E-034 for PSDI-5 Desiccated Driver Air Bag Inflators* (dated August 17, 2016)<sup>4</sup> ("Petition") (enclosing "Mazda submission copy of Part 573"). Mazda then petitioned the Agency, under 49 CFR part 556, via letter including an enclosed purported "joint petition" with Ford,<sup>5</sup> for a decision that the equipment defect determined to exist by Takata is inconsequential as it relates to motor vehicle safety in the Mazda vehicles affected by Takata's DIR, and also requested NHTSA allow Ford until March 31, 2018 to complete an "expanded inflator field study, aging

assessment, and testing on additional samples" before NHTSA makes a decision on the Petition. *Id.* at 1. Mazda sent its Petition via UPS on August 17, 2017, scheduled to arrive the following day via next-day air. However, because the Petition was incorrectly addressed, NHTSA did not receive this copy of the Petition until August 23, 2017. NHTSA did, however, receive a copy via email on August 22, 2017.

## II. Timeliness

Under 49 CFR 556.4(c), Mazda was required to submit its Petition to NHTSA no later than thirty days after Mazda determined a defect exists. Mazda made the defect determination on July 18, 2017, which allowed it until August 17, 2017 to submit a petition to the Agency. *See* Mazda's enclosed DIR; 49 CFR 556.4(c). However, Mazda sent its Petition via UPS on August 17, 2017, with the Petition scheduled to arrive *the following day*. NHTSA first received Mazda's Petition via email on August 22, 2017—five days after it was due.

Despite this procedural flaw, and with the public interest in mind, NHTSA acknowledges receipt of Mazda's Petition, is publishing the relevant documents for public comment, and addresses Mazda's request for the Agency to defer a decision on the Petition. NHTSA need not decide herein whether the timing of Mazda's filing is fatal to its Petition—that issue is preserved for decision at a later date.

## III. Classes of Motor Vehicles Involved

Mazda's Petition involves 5,848 vehicles in which the covered Mazda inflators were originally installed. Petition at 1. Those vehicles are MY 2007–2009 B-Series pickup trucks, which Mazda explains were built on the same platform and using the same airbag inflators as Ford MY 2007–2011 Rangers. *Id.* Accordingly, Mazda states that although "Takata has not tested PSDI-5 inflators with calcium sulfate from Mazda vehicles," data from those Ford Rangers is representative of Mazda's MY 2007–2009 B-Series vehicles. *Id.*

## IV. Summary of Mazda's Petition

In support of its Petition, Mazda largely refers NHTSA to the "joint petition" with Ford enclosed with Mazda's letter. *Id.* Mazda's Petition also provides a brief, bullet-point summary of certain arguments, including that data from Ford field-return parts does not show a propellant tablet-density degradation seen in field-return parts from Nissan; that pressure measurements in Ford inflator primary chambers during ballistic testing were

<sup>1</sup> Mazda has relied upon the Ford testing information because Mazda's vehicles identified by Takata's DIR were designed by Ford and were built on the same platform and using the same airbag inflators as the affected Ford vehicles.

<sup>2</sup> Later, under Paragraph 43 of the Third Amendment to the Coordinated Remedy Order ("ACRO"), NHTSA ordered each vehicle manufacturer "with any vehicle in its fleet equipped with a desiccated PSAN Takata inflator" (and not using or planning to use such an inflator as a final remedy) to develop a written plan describing "plans to confirm the safety and/or service life" of desiccated PSAN Takata inflators used in its fleet. ACRO ¶ 43. Such plans were to include coordination with Takata for parts recovery from fleet vehicles, testing, and anticipated/future plans "to develop or expand recovery and testing protocols of the desiccated PSAN inflators." *Id.*

<sup>3</sup> Under 49 CFR 573.5(a), a vehicle manufacturer is responsible for any safety-related defect determined to exist in any item of original equipment. *See also* 49 U.S.C. 30102(b)(1)(C).

<sup>4</sup> Mazda appears to have inadvertently dated its letter August 17, 2016, instead of August 17, 2017.

<sup>5</sup> Ford also submitted a petition to the Agency, with a cover letter dated August 16, 2017. This petition was not a "joint petition" with Mazda. Ford's petition is separately under consideration by the Agency.

within specification and there were no reports of pressure vessel ruptures in PSDI-5 inflators the field; and that desiccant saturation is not an indicator of propellant degradation. *Id.* at 2–3.

In the “joint petition” enclosed with Mazda’s letter, Ford argues that Takata’s DIR does not determine the covered Ford inflators “actually contain a defect at this time, or that they will develop one over time,” and that once Ford completes its engineering analysis (by the end of March 2018), it will be able to supplement or amend its Petition to “allow the Agency to make a determination” on its Petition. *See* Enclosure at 10, 19. In the interim, Ford states that it will continue to obtain permanent replacement driver-side airbag inflators so that its continuing analysis will not affect the availability of parts if a remedy is needed. *Id.*

Ford’s position in the “joint petition” is that the defect is inconsequential rests on two related arguments. First, in contrast to testing data pertaining to the covered Nissan inflators, Ford contends Takata’s analysis of the covered Ford inflators does not show propellant-tablet density degradation or increased inflation pressure. *Id.* at 11. Takata has analyzed over 1,300 of its calcium-sulfate desiccated PSDI-5 driver-side airbag inflators, which include approximately 423 inflators from Ford Ranger vehicles<sup>6</sup> and 895 inflators from Nissan Versa vehicles.<sup>7</sup> Such analysis involved both live inflator dissections and ballistic testing. *Id.* Ford asserts that about 360 live dissections of inflators obtained as part of Ford’s field-recovery program demonstrate “consistent inflator output performance”—specifically, measurements of ignition-tablet discoloration, generate density, and moisture content of certain inflator constituents did not indicate a reduction-in-density trend. *Id.* at 11–12. Ford further contends that these observations are supported by 47 ballistic deployment tests that showed no inflator exceeding the production primary-chamber pressure specifications. *Id.* at 12–13. Ford also emphasizes that Takata has not observed pressure vessel ruptures or pressure excursions on any desiccated PSDI-5 inflator, and that “[t]he maximum primary chamber pressure that Takata measured” in covered Ford inflators was about 15 MPa lower than that measured in a covered Nissan

inflator (which exhibited primary chamber pressure exceeding 60 MPa). *Id.* at 14.

Second, and relatedly, Ford contends “[t]here are design differences” in the covered Ford inflators when compared to the covered Nissan inflators, and that such differences may explain differences observed between the two inflator variants during testing. *Id.* In short, Ford cites its inflator variant as having “fewer potential moisture sources” because the inflators contain only two, foil-wrapped auto-ignition tablets (instead of three that are not foil-wrapped), contain divider disk foil tape, and utilize certain EPDM generate cushion material (instead of ceramic) that “reduces generate movement over time, maintains generate integrity, and leads to consistent and predictable burn rates.” *Id.* at 15–16 (providing table).

The remainder of the “joint petition” enclosed with Mazda’s letter explains Ford’s “commit[ment] to further investigation of PSDI-5 airbag inflators.” *See id.* at 16–18. Because of this stated concern, including about data pertaining to the covered Nissan inflators, “Ford is expanding the scope of the sampling and is involving leading industry experts to assess any potential risks from desiccated PSDI-5 inflators in Ford products.” *Id.* at 16. Ford outlines a two-pronged plan for this expansion. First, Ford describes a parts-acquisition program “to gather approximately 6,000 desiccated PSDI-5 driver airbag inflators” from certain model year vehicles in areas with high absolute humidity for what appears to be all vehicle lines in which the covered inflators were originally installed.<sup>8</sup> *Id.* at 17. And second, Ford describes a continuation of inflator testing and engineering analysis, which will engage third-party experts for independent assessments. *Id.* at 17–18. The testing will include various engineering analyses (comparisons of design within the PSDI-5 family, statistical assessments, and ballistic modeling), inflator testing (CT scanning and inflator disassembly), and propellant testing (moisture content, closed-bomb burn rate, X-ray micro-computer tomography, thermogravimetric/differential scanning calorimetry analysis). *Id.*

## V. Request for Deferral of Determination

Mazda requests in its letter that, “in conjunction with [its] joint petition filing with” Ford, NHTSA allow Mazda additional time before deciding on its Petition—specifically, until March 31, 2018—so Ford may “complete its expanded inflator field study, aging assessment, and testing on additional samples.” Petition at 1. Mazda also refers to “Ford’s commitment to further investigation of PSDI-5 inflators through additional parts acquisitions as well as continued testing and engineering analysis.” *Id.* at 3. Mazda does not make any additional reference to its deferral request in its letter, but does refer NHTSA to its enclosed “joint” petition” with Ford, in which Ford further discusses this deferral request (on its own behalf). *See id.* Assuming, *arguendo*, that the explanation therein applies equally to Mazda, NHTSA must deny Mazda’s request for deferral.

In the “joint petition,” Ford makes the same request for a deferral as Mazda, so that it (Ford) may “complete its intensified and expanded inflator field study, aging assessment, and testing on additional samples and vehicle types to evaluate the performance of the Takata desiccated PSDI-5 driver airbag inflators.” *See* Enclosure at 19. In making this request, Ford appears to acknowledge the available data may not yet be sufficient for the Agency to grant its petition. Indeed, Ford notes that while its results to date are “good news for the safety” of users of one of its six affected vehicle models—the Ranger—“the results on the Nissan design inflators are of concern.” *Id.*

The Agency recognizes Ford’s plans to expand its investigation and to secure a supply of remedy inflators for affected vehicles if it becomes needed. *See id.* at 3, 10. However, 49 CFR 556.4(b)(5) provides that an inconsequentiality petition must set forth all data, views, and arguments supporting that petition, and Mazda (through Ford, *arguendo*) does not adequately justify why this provision does not preclude deferral here.

Specifically, NHTSA does not find the request for deferral reasonable under the circumstances or supported by the testing and data collected to date. Indeed, Ford does not provide an explanation for why it has not already undertaken the expansive investigation it now proposes, and Ford’s past efforts to evaluate the safety of the covered inflators do not support granting a deferral. NHTSA requested Ford’s assistance in evaluating Takata calcium-

<sup>6</sup> Twenty of these inflators were from salvage yards, however, “where the conditions used to store the parts cannot be determined.” *Id.* at 11.

<sup>7</sup> In its DIR, Nissan provides this 895 figure; in its Petition, Ford attributes “approximately 1,000” covered inflators to Nissan’s program. *Compare* Recall 17V-449 with Petition at 11.

<sup>8</sup> Ford’s Petition explicitly lists six vehicle lines, comprising all affected Ford models except for the Fusion. *See* Petition at 17. However, one of the six vehicle lines is simply listed as “2006–2007 MY Ford.” Presumably, this refers to certain MY Ford Fusions.

sulfate desiccated PSDI-5 driver-side airbag inflators in February 2016, and over seventeen months later only about 400 covered Ford inflators have been tested. Moreover, the number of inflators tested under Ford's program was less than half the number tested under Nissan's program, and about *seven percent* of the approximately 6,000 inflators Ford now proposes to test in only about *seven months*.

It is difficult to reconcile Ford's ambitious plan with its prior approach toward evaluating the safety of the covered inflators. Ford has provided no compelling argument for the Agency to deviate from 49 CFR 556.4(b)(5).

For these reasons, NHTSA denies Mazda's request for a deferral of NHTSA's decision on Mazda's Petition. The Agency will decide on Mazda's Petition without consideration of Ford's planned additional efforts. Nevertheless, NHTSA recognizes Ford's plans to further evaluate the safety of Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators, and encourages Ford to move forward with those plans as described—particularly given the concern about these inflators that Ford has expressed.

Accordingly, NHTSA hereby gives notice of its receipt of Mazda Motor Corporation Petition for a Determination of Inconsequentiality of Takata's Defect Information Report filing under NHTSA Campaign Number 17E-034 for PSDI-5 Desiccated Driver Air Bag Inflators. And it is hereby *ordered* that:

1. The period for public comment on Mazda's Petition shall run from the publication of this decision through December 18, 2017; and

2. Mazda's request for a deferral of NHTSA's decision on its Petition, so that Ford may complete its intensified and expanded inflator field study, aging assessment, and testing on additional samples, is *denied*.

**Authority:** 49 U.S.C. 30101, *et seq.*, 30118, 30120(h), 30162, 30166(b)(1), 30166(g)(1); delegation of authority at 49 CFR 1.95(a); 49 CFR parts 556, 573, 577.

Issued: November 9, 2017.

## DEPARTMENT OF TRANSPORTATION

### National Highway Traffic Safety Administration

[Docket No. NHTSA-2017-0093; Notice 1]

#### Ford Motor Company, Receipt of Petition for Inconsequentiality and Decision Denying Request for Deferral of Determination

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Notice of receipt of petition; notice of receipt of request for deferral, and of decision denying request for deferral.

**SUMMARY:** On July 10, 2017, Takata Corporation ("Takata") filed a defect information report ("DIR") in which it determined that a safety-related defect exists in certain phase-stabilized ammonium nitrate ("PSAN") driver-side airbag inflators that it manufactured with a calcium sulfate desiccant, including inflators that it supplied to Ford Motor Company ("Ford"), Mazda North American Operations ("Mazda"), and Nissan North America Inc. ("Nissan") for use in certain vehicles. Ford has petitioned the Agency for a decision that, because analysis of inflators installed in certain Ford vehicles does not demonstrate propellant-tablet density degradation or increased inflation pressure, and because there are design differences between the inflators installed in Ford vehicles and an inflator variant installed in Nissan vehicles, the equipment defect determined to exist by Takata is inconsequential as it relates to motor vehicle safety in the Ford vehicles affected by Takata's DIR. Ford requests relief from its notification and remedy obligations under the National Traffic and Motor Vehicle Safety Act of 1966 and its applicable regulations, and further requests that the Agency allow Ford until March 31, 2018 to complete certain analysis and testing before the Agency decides on the petition.

**DATES:** The closing date for comments is December 18, 2017.

**ADDRESSES:** Interested persons are invited to submit written data, views, and arguments regarding this petition for inconsequentiality. Comments must refer to the docket and notice number cited in the title of this notice and be submitted by one of the following methods:

- **Internet:** Go to <http://www.regulations.gov> and follow the online instructions for submitting comments.

- **Mail:** Docket Management Facility, M-30, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12-140, Washington, DC 20590.

- **Hand Delivery or Courier:** U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12-140, Washington, DC 20590 between 9 a.m. and 5 p.m. Eastern Time, Monday through Friday, except Federal holidays.

- **Facsimile:** (202) 493-2251.

You may call the Docket at (202) 366-9324.

Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Thus, submitting such information makes it public. You may wish to read the Privacy Act notice, which can be viewed by clicking on the "Privacy and Security Notice" link in the footer of <http://www.regulations.gov>. DOT's complete Privacy Act Statement is available for review in the **Federal Register** published on April 11, 2000 (65 FR 19477-78).

The petition, supporting materials, and all comments received before the close of business on the closing date indicated above will be filed in the docket and will be considered. Comments and supporting materials received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

**FOR FURTHER INFORMATION CONTACT:** For legal issues: Stephen Hench, Office of the Chief Counsel, NCC-100, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590 (telephone: (202) 366-5263).

For general information regarding NHTSA's investigation into Takata airbag inflator ruptures and the related recalls, visit <https://www.nhtsa.gov/recall-spotlight/takata-air-bags>.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

On November 3, 2015, NHTSA issued, and Takata agreed to, a Consent Order setting forth penalties, requirements, and performance obligations in connection with Takata's alleged failure to fully comply with the National Traffic and Motor Vehicle Safety Act of 1966 as amended and recodified (the "Safety Act"), 49 U.S.C. 30101, *et seq.*, and its applicable regulations. Under the Consent Order, Takata is required to

test its phase-stabilized ammonium nitrate (“PSAN”) inflators that contain a desiccant (a drying agent) in cooperation with vehicle manufacturers “to determine the service life and safety of such inflators and to determine whether, and to what extent, these inflator types suffer from a defect condition, regardless of whether it is the same or similar to the conditions at issue” in the Defect Information Reports (“DIRs”) Takata had filed for its non-desiccated PSAN inflators. Consent Order ¶ 28.

In February 2016, NHTSA requested Ford’s assistance in evaluating Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators, to which Ford agreed. In June 2016, Ford and Takata began a field-recovery program to evaluate Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators that were original equipment in MY 2007–2008 Ford Ranger vehicles in Florida, Michigan, and Arizona. *See also* Recall No. 17E–034.<sup>1</sup> Nissan also initiated a similar field-recovery program for its Versa vehicles in March 2016. Recall No. 17V–449. By January 2017, a very limited number of samples from Ford were available and tested. Recall No. 17E–034. In March 2017, Takata and Ford met to review the field data collected from the inflators returned by Ford and Nissan. Recall No. 17E–034. Between March and June 2017, additional Ford inflators were subjected to live dissection, which included chemical and dimensional propellant analyses, and ballistic testing. Recall No. 17E–034. Also in June, Takata reviewed with Ford and NHTSA field-return data from Ford inflators. Recall No. 17E–034. Ford then met with NHTSA on July 6, 2017 to discuss the data collected to date, as well as an expansion plan for evaluating Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators.

Takata has analyzed over 400 such inflators from the Ford program—as well as 895 such inflators from the Nissan program. *See* Recall No. 17V–449. After a review of field-return data, on July 10, 2017, Takata, determining a safety-related defect exists, filed a DIR

for calcium-sulfate desiccated PSDI-5 driver-side airbag inflators that were produced from January 1, 2005 to December 31, 2012 and installed as original equipment on certain motor vehicles manufactured by Ford (the “covered Ford inflators”), as well as calcium-sulfate desiccated PSDI-5 driver-side airbag inflators for those same years of production installed as original equipment on motor vehicles manufactured by Nissan (the “covered Nissan inflators”) and Mazda (the “covered Mazda inflators”) (collectively, the “covered inflators”). Recall No. 17E–034.

Takata’s DIR filing triggered Ford’s obligation to file a DIR for its affected vehicles. *See* 49 CFR part 573; November 3, 2015 Coordinated Remedy Order ¶¶ 45–46.<sup>2</sup> Ford filed a corresponding DIR, informing NHTSA it intended to file a petition for inconsequentiality. *Ford Petition for a Determination of Inconsequentiality and Request for Deferral of Determination Regarding Certain Ford Vehicles Equipped with Takata PSDI-5 Desiccated Driver Airbag Inflators* (August 16, 2017) (“Petition”) (cover letter). Ford then petitioned the Agency, under 49 U.S.C. 30118(d), 30120(h), and 49 CFR part 556, for a decision that, because Takata’s analysis of the covered Ford inflators does not show propellant tablet-density degradation, or increased inflation pressure, and certain inflator design differences exist between the covered Ford inflators and the covered Nissan inflators, the equipment defect determined to exist by Takata is inconsequential as it relates to motor vehicle safety in the Ford vehicles affected by Takata’s DIR. *Id.* at 1, 11–16.<sup>3</sup> In addition, citing its commitment to further investigation, Ford stated it is expanding its acquisition, testing and analysis of the covered Ford inflators, and requested the Agency allow Ford until March 31, 2018 to complete certain testing and analysis before deciding on the Petition. *Id.* at 16–20.

## II. Classes of Motor Vehicles Involved

Ford’s Petition involves approximately 3.04 million light

vehicles that contain the covered Ford inflators. These vehicles are:

- Ford Ranger (MY 2007–2011)
- Ford Fusion (MY 2006–2012)
- Lincoln Zephyr/MKZ (MY 2006–2012)
- Mercury Milan (MY 2006–2011)
- Ford Edge (MY 2007–2010)
- Lincoln MKX (MY 2007–2010)

*Id.* (cover letter).

## III. Summary of Ford’s Petition

Ford argues that Takata’s DIR does not determine the covered Ford inflators “actually contain a defect at this time, or that they will develop one over time,” and that once Ford completes its engineering analysis (by the end of March 2018), it will be able to supplement or amend its Petition to “allow the Agency to make a determination” on its Petition. *See id.* at 10, 19. In the interim, Ford states that it will continue to obtain permanent replacement driver-side airbag inflators so that its continuing analysis will not affect the availability of parts if a remedy is needed. *Id.*

Ford’s position that the defect is inconsequential rests on two related arguments. First, in contrast to testing data pertaining to the covered Nissan inflators, Ford contends Takata’s analysis of the covered Ford inflators does not show propellant-tablet density degradation or increased inflation pressure. *Id.* at 11. Takata has analyzed over 1,300 of its calcium-sulfate desiccated PSDI-5 driver-side airbag inflators, which include approximately 423 inflators from Ford Ranger vehicles<sup>4</sup> and 895 inflators from Nissan Versa vehicles.<sup>5</sup> Such analysis involved both live inflator dissections and ballistic testing. *Id.* Ford asserts that about 360 live dissections of inflators obtained as part of Ford’s field-recovery program demonstrate “consistent inflator output performance”—specifically, measurements of ignition-tablet discoloration, generate density, and moisture content of certain inflator constituents did not indicate a reduction-in-density trend. *Id.* at 11–12. Ford further contends that these observations are supported by 47 ballistic deployment tests that showed no inflator exceeding the production primary-chamber pressure specifications. *Id.* at 12–13. Ford also emphasizes that Takata has not observed pressure vessel ruptures or

<sup>1</sup> Later, under Paragraph 43 of the Third Amendment to the Coordinated Remedy Order (“ACRO”), NHTSA ordered each vehicle manufacturer “with any vehicle in its fleet equipped with a desiccated PSAN Takata inflator” (and not using or planning to use such an inflator as a final remedy) to develop a written plan describing “plans to confirm the safety and/or service life” of desiccated PSAN Takata inflators used in its fleet. ACRO ¶ 43. Such plans were to include coordination with Takata for parts recovery from fleet vehicles, testing, and anticipated/future plans “to develop or expand recovery and testing protocols of the desiccated PSAN inflators.” *Id.*

<sup>2</sup> Under 49 CFR 573.5(a), a vehicle manufacturer is responsible for any safety-related defect determined to exist in any item of original equipment. *See also* 49 U.S.C. 30102(b)(1)(C).

<sup>3</sup> Ford also suggests differences in “vehicle environment,” between affected Ford and Nissan vehicles as a potential explanation for inflator degradation-risk differences between the covered Ford inflators and the covered Nissan inflators. *See* Petition at 2. However, Ford does not elaborate on this suggestion elsewhere in its Petition. *See id.* at 14–16 (focusing on design differences between the covered Ford inflators and covered Nissan inflators).

<sup>4</sup> Twenty of these inflators were from salvage yards, however, “where the conditions used to store the parts cannot be determined.” *Id.* at 11.

<sup>5</sup> In its DIR, Nissan provides this 895 figure; in its Petition, Ford attributes “approximately 1,000” covered inflators to Nissan’s program. *Compare* Recall No. 17V–449 with Petition at 11.

pressure excursions on any desiccated PSDI-5 inflator, and that “[t]he maximum primary chamber pressure that Takata measured” in covered Ford inflators was about 15 MPa lower than that measured in a covered Nissan inflator (which exhibited primary chamber pressure exceeding 60 MPa). *Id.* at 14.

Second, and relatedly, Ford contends “[t]here are design differences” in the covered Ford inflators when compared to the covered Nissan inflators, and that such differences may explain differences observed between the two inflator variants during testing. *Id.* In short, Ford cites its inflator variant as having “fewer potential moisture sources” because the inflators contain only two, foil-wrapped auto-ignition tablets (instead of three that are not foil-wrapped), contain divider disk foil tape, and utilize certain EPDM generate cushion material (instead of ceramic) that “reduces generate movement over time, maintains generate integrity, and leads to consistent and predictable burn rates.” *Id.* at 15–16 (providing table).

The remainder of Ford’s Petition explains its “commit[ment] to further investigation of PSDI-5 airbag inflators.” *See id.* at 16–18. Because of this stated concern, including about data pertaining to the covered Nissan inflators, “Ford is expanding the scope of the sampling and is involving leading industry experts to assess any potential risks from desiccated PSDI-5 inflators in Ford products.” *Id.* at 16. Ford outlines a two-pronged plan for this expansion. First, Ford describes a parts-acquisition program “to gather approximately 6,000 desiccated PSDI-5 driver airbag inflators” from certain model year vehicles in areas with high absolute humidity for what appears to be all vehicle lines in which the covered inflators were originally installed.<sup>6</sup> *Id.* at 17. And second, Ford describes a continuation of inflator testing and engineering analysis, which will engage third-party experts for independent assessments. *Id.* at 17–18. The testing will include various engineering analyses (comparisons of design within the PSDI-5 family, statistical assessments, and ballistic modeling), inflator testing (CT scanning and inflator disassembly), and propellant testing (moisture content, closed-bomb burn rate, X-ray micro-computer tomography, thermogravimetric/

differential scanning calorimetry analysis). *Id.*

#### IV. Request for Deferral of Determination

Ford has requested that NHTSA allow it additional time before deciding on its Petition—specifically, until March 31, 2018—so that it may “complete its intensified and expanded inflator field study, aging assessment, and testing on additional samples and vehicle types to evaluate the performance of the Takata desiccated PSDI-5 driver airbag inflators.” *Id.* at 19. In making this request, Ford appears to acknowledge the available data may not yet be sufficient for the Agency to grant its Petition. Indeed, Ford notes that while its results to date are “good news for the safety” of users of one of its six affected vehicle models—the Ranger—“the results on the Nissan design inflators are of concern.” *Id.*

The Agency recognizes Ford’s plans to expand its investigation and to secure a supply of remedy inflators for affected vehicles if it becomes needed. *See id.* at 3, 10. However, 49 CFR 556.4(b)(5) provides that an inconsequentiality petition must set forth all data, views, and arguments supporting that petition, and Ford does not adequately justify why this provision does not preclude deferral here.

Specifically, NHTSA does not find Ford’s request for deferral reasonable under the circumstances or supported by the testing and data it has collected to date. Indeed, Ford does not provide an explanation for why it has not already undertaken the expansive investigation it now proposes, and Ford’s past efforts to evaluate the safety of the covered inflators do not support granting a deferral. NHTSA requested Ford’s assistance in evaluating Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators in February 2016, and over seventeen months later only about 400 covered Ford inflators have been tested. Further, while the covered Ford inflators were original equipment in six vehicle models (Ranger, Fusion, MKZ, Milan, Edge, and MKX), all approximately 400 inflators harvested in Ford’s field-recovery program were from the same vehicle model (the Ranger). Moreover, the number of inflators tested under Ford’s program was less than half the number tested under Nissan’s program, and about *seven percent* of the approximately 6,000 inflators Ford now proposes to test in only about *seven months*.

It is difficult to reconcile Ford’s ambitious plan with its prior approach toward evaluating the safety of the

covered inflators. Ford has provided no compelling argument for the Agency to deviate from 49 CFR 556.4(b)(5).

For these reasons, NHTSA denies Ford’s request for a deferral of the NHTSA’s decision on Ford’s Petition. The Agency will decide on Ford’s Petition without consideration of Ford’s planned additional efforts as outlined in its Petition. Nevertheless, NHTSA recognizes Ford’s plans to further evaluate the safety of Takata calcium-sulfate desiccated PSDI-5 driver-side airbag inflators, and encourages Ford to move forward with those plans as described in its Petition—particularly given the concern about these inflators that Ford has expressed.

Accordingly, NHTSA hereby gives notice of its receipt of Ford’s Petition for a Determination of Inconsequentiality and Request for Deferral of Determination Regarding Certain Ford Vehicles Equipped with Takata PSDI-5 Desiccated Driver Airbag Inflators. And it is hereby *Ordered* that:

1. The period for public comment on Ford’s Petition shall run from the publication of this decision through December 18, 2017; and

2. Ford’s request for a deferral of NHTSA’s decision on Ford’s Petition, so that Ford may complete its intensified and expanded inflator field study, aging assessment, and testing on additional samples and vehicle types, is *Denied*.

**Authority:** 49 U.S.C. 30101, *et seq.*, 30118, 30120(h), 30162, 30166(b)(1), 30166(g)(1); delegation of authority at 49 CFR 1.95(a); 49 CFR parts 556, 573, 577.

Issued: November 9, 2017.

**Stephen P. Wood,**

**BILLING CODE 4910–59–P**

## DEPARTMENT OF TRANSPORTATION

### Office of the Secretary

[OST Docket No. DOT–OST–2010–0140]

### Notice of Submission of Proposed Information Collection to OMB

**AGENCY:** Office of the Secretary, Department of Transportation (DOT).

**ACTION:** Notice and request for comments.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, as amended, this notice announces the Department of Transportation’s (Department) intention to reinstate an Office of Management and Budget (OMB) control number for the collection and posting of certain aviation

<sup>6</sup>Ford’s Petition explicitly lists six vehicle lines, comprising all affected Ford models except for the Fusion. *See* Petition at 17. However, one of the six vehicle lines is simply listed as “2006–2007 MY Ford.” Presumably, this refers to certain MY Ford Fusions.

consumer protection-related information from U.S. carriers and foreign carriers. On April 25, 2011, the DOT issued a final rule that, among other things, extended existing consumer protection requirements that previously applied only to U.S. carriers to foreign carriers and required that certain U.S. and foreign air carriers report tarmac delay information to the DOT for passenger operations that experience a tarmac delay time of 3 hours or more at a U.S. airport (See, DOT-OST-2010-0140). This request seeks to reinstate the control number that is associated with the information collection requirements in that rule, OMB Control Number 2105-0561.

In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice also announces that the request for reinstatement of an OMB Control Number for the Information Collection Request (ICR) abstracted below is being forwarded to the Office of Management and Budget (OMB) for review and comments. A **Federal Register** Notice with a 60-day comment period soliciting comments on the following information collection was published on May 22, 2017 (82 FR 97 at 23486).

**DATES:** Comments on this notice must be received by December 18, 2017.

Interested persons are invited to submit comments regarding this proposal.

**ADDRESSES:** Send comments regarding the burden estimate, including suggestions for reducing the burden, to the Office of Management and Budget, Attention: Desk Officer for the Office of the Secretary of Transportation, 725 17th Street NW., Washington, DC 20503. Comments may also be sent via email to OMB at the following address: [oir\\_submissions@omb.eop.gov](mailto:oir_submissions@omb.eop.gov).

To ensure that you do not duplicate your docket submissions, please submit them by only one of the following means:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov> and follow the online instructions for submitting comments.

- **Mail:** Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE., West Building Ground Floor, Room W-12/140, Washington, DC 20590-0001;

- **Hand delivery:** West Building Ground Floor, Room W-12/140, 1200 New Jersey Ave. SE., between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202-366-9329.

**FOR FURTHER INFORMATION CONTACT:** Daeleen Chesley, Office of the Secretary, Office of the Assistant General Counsel

for Aviation Enforcement and Proceedings (C-70), Department of Transportation, 1200 New Jersey Ave. SE., Washington, DC 20590, 202-366-9342 (voice) 202-366-7152 (fax) or [Daeleen.Chesley@dot.gov](mailto:Daeleen.Chesley@dot.gov).

**SUPPLEMENTARY INFORMATION:**

**Title:** Submission of Miscellaneous Information Collection Systems as Required by the Department's Rules to Enhance Airline Passenger Protections.

**OMB Control Number:** 2105-0561.

On April 25, 2011, the Department issued a rule to enhance airline passenger protections that, among other things, extended to foreign carriers the requirement to post tarmac delay plans, customer service plans, and contracts of carriage on their Web sites. This requirement had previously only applied to U.S. carriers. Airlines are also required to adopt a Customer Service Plan, audit adherence to the plan annually, and retain the results for two years. In addition, a prior rule issued on December 30, 2009, required that each reporting air carrier (*i.e.*, currently U.S. carriers that account for at least 1 percent of domestic scheduled passenger revenues) display on its Web site information on each listed flights' on-time performance for the previous month for both the carrier's flights and those of its non-reporting code-share carriers. The rules also require that U.S. air carriers that operate passenger service and foreign air carriers that operate scheduled passenger service to or from the U.S. retain for two years certain information about any ground delay that lasts at least three hours.

The Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On May 22, 2017, OST published a 60-day notice in the **Federal Register** soliciting comment on ICRs for which the agency was seeking OMB approval (82 FR 97 at 23486). OST received one comment after issuing this notice. The commenter, Airport Council International (ACI) strongly supported the renewal of this control number. Accordingly, the Department announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5

CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507(b)-(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983 (Aug. 29, 1995). The 30-day notice informs the regulated community to file relevant comments to OMB and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983 (Aug. 29, 1995). Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure their full consideration. 5 CFR 1320.12(c); *see also* 60 FR 44983 (Aug. 29, 1995).

This notice addresses five information collection requirements concerning information collection requirements set forth in the Department's airline passenger protection rules. The reinstated OMB control number will be applicable to all information collection systems set forth in this notice. For each of these information collections, the title, a description of the respondents, and an estimate of the annual recordkeeping and periodic reporting burden (rounded to the nearest hour) are set forth below:

1. Requirement to post customer service plans and contracts of carriage on a carrier's Web site. (259.2 and 259.6).

**Title:** Posting of Customer Service Plan and Contract of Carriage on Web site.

**Respondents:** U.S. carriers that operate scheduled passenger or public charter service and foreign air carriers operating scheduled passenger or public charter service to or from the United States, using any aircraft with a designed seating capacity of 30 or more seats. Applicable to U.S. carriers that have a Web site and foreign carriers that have a Web site marketed toward U.S. consumers.

**Estimated Number of Respondents:** 45 U.S. airlines and 65 foreign carriers.

**Estimated Annual Burden on Respondents:** 15 minutes per year for each U.S. carrier and foreign carrier. The estimate was calculated by multiplying the estimated time (15 min) to post an updated copy of the carrier's customer service and/or contract of carriage on its Web site per year (if changes are made) by the number of updates per carrier in each year (1) for U.S. and foreign carriers.

**Estimated Total Burden on Respondents:** 28 hours (1,680 minutes, average of 15 minutes per U.S. carrier to post plans and contracts of carriage on Web site).

**Frequency:** One time per respondent.

2. Requirement to retain for two years information about any tarmac delay that lasts at least three hours. (259.2 and 259.4).

*Title:* Retaining Ground Delay Information.

*Respondents:* U.S. carriers that operate or market scheduled or public charter passenger service using any aircraft with a designed seating capacity of 30 or more seats, and foreign air carriers that operate or market scheduled or public charter passenger service to and from the United States using any aircraft with a designed seating capacity of 30 or more seats. To be covered, the tarmac delay must have occurred at a U.S. large hub, medium hub, small hub or non-hub airport.

*Estimated Number of Respondents:* 61 U.S. and 93 foreign carriers.

*Estimated Annual Burden on Respondents:* A maximum of 88 hours (5,280 minutes) for a U.S. respondent and a maximum of 32 hours (1,920 minutes) for a foreign respondent. The estimate was calculated multiplying the estimated time to retain information about one ground delay (2 hours) by the total number of ground delay incidents lasting at least three hours per U.S. respondent (a maximum of 44 incidents, derived from analysis of tarmac delays for CY2016). For foreign respondents, the estimate was similarly calculated by multiplying the estimated time to retain information about one ground delay (4 hours) by the total number of ground delay incidents lasting at least three hours for CY2016 (a maximum of 8 incidents).

*Estimated Total Annual Burden:* A maximum of 680 hours (40,800 minutes) for all respondents. For U.S. carriers, the subtotal was determined by multiplying the sum of the total per report time (2 hours) for U.S. carriers by the total number of CY2016 ground delay incidents lasting at least three hours for all U.S. carriers (84 total incidents). For foreign carriers the subtotal was determined by multiplying the per report time (4 hours) for foreign carriers multiplied by the total number of ground delay incidents lasting at least three hours for the foreign carriers (168 total incidents). The estimate was calculated by adding the sum of the two subtotals for all CY2016 tarmac delays lasting at least three hours (168 hours for U.S. carriers plus 512 hours for foreign carriers).

*Frequency:* A maximum of 44 ground delay information sets to retain per year for a single respondent. (*N.b.* Some air carriers may not experience any ground delay incidents of at least three hours in each year, while one air carrier experienced 44 three-hour plus delays

in CY2016 per data reported to the Bureau of Transportation Statistics).

3. Requirement that certain U.S. and foreign air carriers retain for two years the results of its annual self-audit of its compliance with its Customer Service Plan. (259.2 and 259.5)

*Title:* Retaining Self-audit of Customer Service Plan.

*Respondents:* U.S. carriers that operate scheduled passenger service using any aircraft with a designed seating capacity of 30 or more seats, and foreign air carriers that operate scheduled passenger service to and from the United States using any aircraft with a designed seating capacity of 30 or more seats. Applicable to U.S. carriers that have a Web site and foreign carriers that have a Web site marketed toward U.S. consumers.

*Number of Respondents:* 45 U.S. and 65 foreign carriers.

*Estimated Annual Burden on Respondents:* 15 minutes per year for each respondent. The estimate was calculated by multiplying the estimated time to retain a copy of the carrier's self-audit of its compliance with its Customer Service Plan by the number of audits per carrier in a given year (1).

*Estimated Total Annual Burden:* A maximum of 28 (1,680 minutes) for all respondents. The estimate was calculated by multiplying the time in a given year for each carrier to retain a copy of its self-audit of its compliance with its Customer Service Plan (15 minutes) by the total number of covered carriers (115 carriers).

*Frequency:* One information set to retain per year for each respondent.

4. Requires that each large U.S. carrier display on its Web site, at a point before the consumer selects a flight for purchase, the following information for each listed flight regarding its on-time performance during the last reported month: The percentage of arrivals that were on time (within 15 minutes of scheduled arrival time), the percentage of arrivals that were more than 30 minutes late (with special highlighting if the flight was more than 30 minutes late more than 50 percent of the time), and the percentage of flight cancellations if the flight is cancelled more than 5% of the time. In addition, a marketing/reporting carrier display delay data for its non-reporting code-share carrier(s). (234.11)

*Title:* Displaying On-time performance Information on Carrier Web site.

*Respondents:* Currently every U.S. carrier that accounts for at least one percent of scheduled passenger revenue and maintains a Web site. For travel on or after January 1, 2018, every U.S.

carrier that accounts for at least 0.5 percent and less than 1.0 percent of domestic scheduled passenger revenue and that market flights directly to consumers via a Web site.

*Number of Respondents:* 10 carriers presently; 11 carriers beginning January 1, 2018.

*Estimated Annual Burden on Respondents:* 2 hours per month (24 hours) to cover both updates of a carrier's own delay data and updates of code-share delay data.

*Estimated total annual burden:* No more than 264 hours (15,840 minutes) a year for all respondents. The estimate was calculated by multiplying the total number of hours per carrier per year for management of data links (24) by the number of currently covered carriers (11). For the first year, the annual burden will also include the 4,673 (280,380) hours for one newly reporting carrier.

*Frequency:* Updating information for each flight listed on Web site 12 times per year (1 time per month) for each respondent (for both own carrier delay data and code-share delay data).

5. Requirement that certain carriers report tarmac delay data for tarmac delays exceeding 3 hours to the Department monthly. (244.2)

*Title:* Reporting Tarmac Delay Data for Tarmac Delays Exceeding 3 Hours (to the extent such information is not reported by U.S. carriers under 14 CFR part 234).

*Respondents:* U.S. carriers that operate scheduled passenger service or public charter service using any aircraft with a designed seating capacity of 30 or more seats, and foreign air carriers that operate scheduled passenger service to and from the United States using any aircraft with a designed seating capacity of 30 or more seats. To be covered, the tarmac delay must have occurred at a U.S. large hub, medium hub, small hub or non-hub airport.

*Number of Respondents:* 61 U.S. and 70 foreign carriers.

*Estimated Annual Burden on Respondents:* 0.0 to 22.0 hours per U.S. respondent (the latter if 44 three-hour plus tarmac delays must be reported) and 0.0 to 4 hours per foreign respondent (the latter if 8 three-hour plus tarmac delays must be reported). This is estimating that each report takes 30 minutes to submit.

*Estimated Total Annual Burden:* 106 hours (6,360 minutes) for all respondents.

*Frequency:* One information set to submit per incident for each respondent that experiences a tarmac delay of 3 hours or more (212 three-hour plus tarmac delay reports total were

submitted in CY16 to the Bureau of Transportation Statistics).

We invite comments on (a) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. All comments will also become a matter of public record on the docket.

Issued this 8th day of November 2017, at Washington, DC.

**Claire W. Barrett,**

*DOT Chief Privacy & Information Governance Officer, Office of the Secretary.*

## DEPARTMENT OF VETERANS AFFAIRS

### Veterans and Community Oversight and Engagement Board, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act that the Veterans and Community Oversight and Engagement Board (Board) will meet on December 5-7, 2017, at 11301 Wilshire Boulevard, Building 500, Room 1281, Los Angeles, CA, from 9:00 a.m. until 4:00 p.m. (Pacific). Sessions are open to the public, except when the Committee is conducting tours of VA facilities, participating in off-site events, and participating in workgroup sessions. Tours of VA facilities are closed, to

protect Veterans' privacy and personal information.

The Board is a statutory board established by the West Los Angeles Leasing Act of 2016 on September 29, 2016. The purpose of the Board is to provide advice and make recommendations to the Secretary of Veterans Affairs on: Identifying the goals of the community and Veteran partnership; improving services and outcomes for Veterans, members of the Armed Forces, and the families of such Veterans and members; and on the implementation of the Draft Master Plan approved by the Secretary on January 28, 2016, and on the creation and implementation of any successor master plans.

On Tuesday, December 5, the Board will convene an open session from 9:00 a.m. to 4:00 p.m. The agenda will include briefings from officials at the VA and other VA entities to include: Training on Federal advisory committees and Ethics; guidance to the Board members on their roles and responsibilities. The Board will be broken into small groups to participate in a facilitated working-group activity for the balance of the day, and report out to the full committee to complete the day.

On Wednesday, December 6, the Board will convene an open session from 9:00 a.m. to 11:15 a.m. The agenda will include briefings on the West LA Leasing Act of 2016, and a detailed briefing on the Draft Master Plan (with updates). From 12:30 p.m. to 1:30 p.m., the Board will convene in a closed session as it tours the West LA Campus. The Board will reconvene an open session at 1:30 p.m. to 4:00 p.m. at which, the Board members will once again participate in Committee Facilitated discussions followed by additional facilitated subcommittee discussions. The day will conclude with

any closing remarks and guidance from the Board Chair.

On Thursday, December 7, the Board will convene an open session from 9:00 a.m. to 12:00 p.m. and will begin with reports or comments from the subcommittee facilitated discussion, and discussion of topics and schedule for upcoming meetings. Additionally, time will be allocated for receiving public comments on December 7, at 9:45 a.m. Public comments shall be limited to five minutes each. Individuals wishing to make oral statements before the Board will be accommodated on a first come first serve basis. Individuals who speak are invited to submit a 1-2 page summary of their comments at the time of the meeting for inclusion in the official record. The Board will accept written comments from interested parties on issues outlined in the meeting agenda, as well as other issues affecting identifying the goals of the community and Veteran partnership; improving services and outcomes for Veterans, members of the Armed Forces, and the families of such Veterans and members; and on the implementation of the Draft Master Plan. Such comments should be sent to Eugene W. Skinner, Jr., Designated Federal Officer, Veterans Experience Office via email to [Eugene.Skinner@va.gov](mailto:Eugene.Skinner@va.gov). *Note: Videotaping and/or digital recording is not permitted at the meeting unless allowed by the Designated Federal Officer.*

Any member of the public seeking additional information should contact Mr. Skinner, via email at [Eugene.Skinner@va.gov](mailto:Eugene.Skinner@va.gov) or by phone at (202) 631-7645.

Dated: November 13, 2017.

**Jelessa M. Burney,**

*Federal Advisory Committee Management Officer.*

42 CFR Part 414

Medicare Program; CY 2018 Updates to the Quality Payment Program;  
and Quality Payment Program: Extreme and Uncontrollable Circumstance  
Policy for the Transition Year; Rule

**DEPARTMENT OF HEALTH AND HUMAN SERVICES****Centers for Medicare & Medicaid Services****42 CFR Part 414**

[CMS–5522–FC and IFC]

RIN 0938–AT13

**Medicare Program; CY 2018 Updates to the Quality Payment Program; and Quality Payment Program: Extreme and Uncontrollable Circumstance Policy for the Transition Year****AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.**ACTION:** Final rule with comment period and interim final rule with comment period.

**SUMMARY:** The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) established the Quality Payment Program for eligible clinicians. Under the Quality Payment Program, eligible clinicians can participate via one of two tracks: Advanced Alternative Payment Models (APMs); or the Merit-based Incentive Payment System (MIPS). We began implementing the Quality Payment Program through rulemaking for calendar year (CY) 2017. This final rule with comment period provides updates for the second and future years of the Quality Payment Program.

In addition, we also are issuing an interim final rule with comment period (IFC) that addresses extreme and uncontrollable circumstances MIPS eligible clinicians may face as a result of widespread catastrophic events affecting a region or locale in CY 2017, such as Hurricanes Irma, Harvey and Maria.

**DATES:**

*Effective date:* These provisions of this final rule with comment period and interim final rule with comment period are effective on January 1, 2018.

*Comment date:* To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on January 1, 2018.

**ADDRESSES:** In commenting, please refer to file code CMS–5522–FC when commenting on issues in the final rule with comment period, and CMS–5522–IFC when commenting on issues in the interim final rule with comment period. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission. You may submit comments in one of four

ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to <http://www.regulations.gov>. Follow the “Submit a comment” instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–5522–FC or CMS–5522–IFC (as appropriate), P.O. Box 8016, Baltimore, MD 21244–8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–5522–FC or CMS–5522–IFC (as appropriate), Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* Alternatively, you may deliver (by hand or courier) your written comments ONLY to the following addresses prior to the close of the comment period:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, call telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members. Comments erroneously mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

**FOR FURTHER INFORMATION CONTACT:**

Molly MacHarris, (410) 786–4461, for inquiries related to MIPS.

Benjamin Chin, (410) 786–0679, for inquiries related to APMs.

**I. Executive Summary and Background**

*A. Overview*

This final rule with comment period makes payment and policy changes to the Quality Payment Program. The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. 114–10, enacted April 16, 2015) amended Title XVIII of the Social Security Act (the Act) to repeal the Medicare sustainable growth rate (SGR) formula, to reauthorize the Children's Health Insurance Program (CHIP), and to strengthen Medicare access by improving physician and other clinician payments and making other improvements. The MACRA advances a forward-looking, coordinated framework for clinicians to successfully take part in the Quality Payment Program that rewards value and outcomes in one of two ways:

- Advanced Alternative Payment Models (Advanced APMs).
- Merit-based Incentive Payment System (MIPS).

Our goal is to support patients and clinicians in making their own decisions about health care using data driven insights, increasingly aligned and meaningful quality measures, and innovative technology. To implement this vision, the Quality Payment Program emphasizes high-value care and patient outcomes while minimizing burden on eligible clinicians. The Quality Payment Program is also designed to be flexible, transparent, and structured to improve over time with input from clinicians, patients, and other stakeholders.

In today's health care system, we often pay doctors and other clinicians based on the number of services they perform rather than patient health outcomes. The good work that clinicians do is not limited to conducting tests or writing prescriptions, but also taking the time to have a conversation with a patient about test results, being available to a patient through telehealth or expanded hours, coordinating medicine and treatments to avoid confusion or errors, and developing care plans.

The Quality Payment Program takes a comprehensive approach to payment by basing consideration of quality on a set of evidenced-based measures that were primarily developed by clinicians, thus encouraging improvement in clinical practice and supporting by advances in technology that allow for the easy exchange of information. The Quality Payment Program also offers special incentives for those participating in certain innovative models of care that

provide an alternative to fee-for-service payment.

We have sought and will continue to seek feedback from the health care community through various public avenues such as rulemaking, listening sessions and stakeholder engagement. We understand that technology, infrastructure, physician support systems, and clinical practices will change over the next few years and are committed to refine our policies for the Quality Payment Program with those factors in mind.

We are aware of the diversity among clinician practices in their experience with quality-based payments and expect the Quality Payment Program to evolve over multiple years. The groundwork has been laid for expansion toward an innovative, patient-centered, health system that is both outcome focused and resource effective. A system that leverages health information technology to support clinicians and patients and builds collaboration across care settings. The Quality Payment Program: (1) Supports care improvement by focusing on better outcomes for patients, and preserving the independent clinical practice; (2) promotes the adoption of APMs that align incentives for high-quality, low-cost care across healthcare stakeholders; and (3) advances existing delivery system reform efforts, including ensuring a smooth transition to a healthcare system that promotes high-value, efficient care through unification of CMS legacy programs.

In the Merit-based Incentive Payment System (MIPS) and Alternative Payment Model (APM) Incentive under the Physician Fee Schedule, and Criteria for Physician-Focused Payment Models final rule with comment period (81 FR 77008, November 4, 2016), referred to as the “CY 2017 Quality Payment Program final rule,” we established incentives for participation in Advanced APMs, supporting the goals of transitioning from fee-for-service (FFS) payments to payments for quality and value. The CY 2017 Quality Payment Program final rule included definitions and processes to determine Qualifying APM Participants (QPs) in Advanced APMs. The CY 2017 Quality Payment Program final rule also established the criteria for use by the Physician-Focused Payment Model Technical Advisory Committee (PTAC) in making comments and recommendations to the Secretary on proposals for physician-focused payment models (PFPMs).

The CY 2017 Quality Payment Program final rule also established policies to implement MIPS, which consolidated certain aspects of the Physician Quality Reporting System

(PQRS), the Physician Value-based Payment Modifier (VM), and the Medicare Electronic Health Record (EHR) Incentive Program for Eligible Professionals (EPs) and made CY 2017 the transition year for clinicians under the Quality Payment Program. As prescribed by MACRA, MIPS focuses on the following: (1) Quality—including a set of evidence-based, specialty-specific standards; (2) cost; (3) practice-based improvement activities; and (4) use of certified electronic health record (EHR) technology (CEHRT) to support interoperability and advanced quality objectives in a single, cohesive program that avoids redundancies.

This CY 2018 final rule with comment period continues to build and improve upon our transition year policies, as well as, address elements of MACRA that were not included in the first year of the program, including virtual groups, beginning with the CY 2019 performance period facility-based measurement, and improvement scoring. This final rule with comment period implements policies for “Quality Payment Program Year 2,” some of which will continue into subsequent years of the Quality Payment Program.

We have also included an interim final rule with comment period to establish an automatic extreme and uncontrollable circumstance policy for the 2017 MIPS performance period that recognizes recent hurricanes (Harvey, Irma, and Maria) and other natural disasters can effectively impede a MIPS eligible clinician’s ability to participate in MIPS.

#### *B. Quality Payment Program Strategic Objectives*

After extensive outreach with clinicians, patients and other stakeholders, we created 7 strategic objectives to drive continued progress and improvement. These objectives help guide our final policies and future rulemaking in order to design, implement, and advance a Quality Payment Program that aims to improve health outcomes, promote efficiency, minimize burden of participation, and provide fairness and transparency in operations.

These strategic objectives are as follows: (1) To improve beneficiary outcomes and engage patients through patient-centered Advanced APM and MIPS policies; (2) to enhance clinician experience through flexible and transparent program design and interactions with easy-to-use program tools; (3) to increase the availability and adoption of robust Advanced APMs; (4) to promote program understanding and maximize participation through

customized communication, education, outreach and support that meet the needs of the diversity of physician practices and patients, especially the unique needs of small practices; (5) to improve data and information sharing on program performance to provide accurate, timely, and actionable feedback to clinicians and other stakeholders; (6) to deliver IT systems capabilities that meet the needs of users for data submission, reporting, and improvement and are seamless, efficient and valuable on the front and back-end; and (7) to ensure operation excellence in program implementation and ongoing development; and to design the program in a manner that allows smaller independent and rural practices to be successful. More information on these objectives and the Quality Payment Program can be found at [qpp.cms.gov](http://qpp.cms.gov).

Stakeholder feedback is the hallmark of the Quality Payment Program. We solicited and reviewed nearly 1,300 comments and had over 100,000 physicians and other stakeholders attend our outreach sessions to help inform our policies for Quality Payment Program Year 2. We have set ambitious yet achievable goals for those clinicians interested in APMs, as they are a vital part of bending the Medicare cost curve by encouraging the delivery of high-quality, low-cost care. To allow this program to work for all stakeholders, we further recognize that we must provide ongoing education, support, and technical assistance so that clinicians can understand program requirements, use available tools to enhance their practices, and improve quality and progress toward participation in APMs if that is the best choice for their practice. Finally, we understand that we must achieve excellence in program management, focusing on customer needs while also promoting problem-solving, teamwork, and leadership to provide continuous improvements in the Quality Payment Program.

#### *C. One Quality Payment Program*

Clinicians have told us that they do not separate their patient care into domains, and that the Quality Payment Program needs to reflect typical clinical workflows in order to achieve its goal of better patient care. Advanced APMs, the focus of one pathway of the Quality Payment Program, contribute to better care and smarter spending by allowing physicians and other clinicians to deliver coordinated, customized, high-value care to their patients in a streamlined and cost-effective manner. Within MIPS, the second pathway of the Quality Payment Program, we believe that integration into typical clinical

workflows can best be accomplished by making connections across the four statutory pillars of the MIPS incentive structure. Those four pillars are: (1) Quality; (2) clinical practice improvement activities (referred to as “improvement activities”); (3) meaningful use of CEHRT (referred to as “advancing care information”); and (4) resource use (referred to as “cost”).

Although there are two separate pathways within the Quality Payment Program, Advanced APMs and MIPS both contribute toward the goal of seamless integration of the Quality Payment Program into clinical practice workflows. Advanced APMs promote this seamless integration by way of payment methodology and design that incentivize care coordination. The MIPS builds the capacity of eligible clinicians across the four pillars of MIPS to prepare them for participation in APMs in later years of the Quality Payment Program. Indeed, the bedrock of the Quality Payment Program is high-value, patient-centered care, informed by useful feedback, in a continuous cycle of improvement. The principal way that MIPS measures quality of care is through a set of clinical quality measures (CQMs) from which MIPS eligible clinicians can select. The CQMs are evidence-based, and the vast majority are created or supported by clinicians. Over time, the portfolio of quality measures will grow and develop, driving towards outcomes that are of the greatest importance to patients and clinicians and away from process, or “check the box” type measures.

Through MIPS, we have the opportunity to measure clinical and patient outcomes, not only through evidence-based quality measures, but also by accounting for activities that clinicians and patients themselves identify: Namely, practice-driven quality improvement. MIPS also requires us to assess whether CEHRT is used in a meaningful way and based on significant feedback, this area was simplified to support the exchange of patient information, engagement of patients in their own care through technology, and the way technology specifically supports the quality goals selected by the practice. And lastly, MIPS requires us to measure the cost of services provided through the cost performance category, which will contribute to a MIPS eligible clinician’s final score beginning in the second year of the MIPS.

We realize the Quality Payment Program is a big change. In this final rule with comment period, we continue the slow ramp-up of the Quality Payment Program by establishing

special policies for MIPS Year 2 aimed at encouraging successful participation in the program while reducing burden, reducing the number of clinicians required to participate, and preparing clinicians for the CY 2019 performance period (CY 2021 payment year). Our hope is for the program to evolve to the point where all the clinical activities captured in MIPS across the four performance categories reflect the single, unified goal of quality improvement.

#### *D. Summary of the Major Provisions*

##### 1. Quality Payment Program Year 2

We believe the second year of the Quality Payment Program should build upon the foundation that has been established which provides a trajectory for clinicians to value-based care. A second year to ramp-up the program will continue to help build upon the iterative learning and development of year 1 in preparation for a robust program in year 3.

##### 2. Small Practices

The support of small, independent practices remains an important thematic objective for the implementation of the Quality Payment Program and is expected to be carried throughout future rulemaking. Many small practices did not have to participate in MIPS during the transition year due to the low-volume threshold, which was set for the CY 2017 performance period at less than or equal to \$30,000 in Medicare Part B allowed charges or less than or equal to 100 Medicare Part B patients. We have heard feedback that many small practices still face challenges in their ability to participate in the program. We are implementing additional flexibilities for Year 2 including: Implementing the virtual groups provisions; increasing the low-volume threshold to less than or equal to \$90,000 in Medicare Part B allowed charges or less than or equal to 200 Medicare Part B patients; adding a significant hardship exception from the advancing care information performance category for MIPS eligible clinicians in small practices; providing 3 points even if small practices submit quality measures below data completeness standards; and providing bonus points that are added to the final scores of MIPS eligible clinicians who are in small practices. We believe that these additional flexibilities and reduction in barriers will further enhance the ability of small practices to participate successfully in the Quality Payment Program.

In keeping with the objectives to provide education about the Quality

Payment Program and maximize participation, and as mandated by the statute, during a period of 5 years, \$100 million in funding was provided for technical assistance to be available to provide guidance and assistance to MIPS eligible clinicians in small practices through contracts with regional health collaboratives, and others. Guidance and assistance on the MIPS performance categories or the transition to APM participation will be available to MIPS eligible clinicians in practices of 15 or fewer clinicians with priority given to practices located in rural areas or medically underserved areas (MUAs), and practices with low MIPS final scores. More information on the technical assistance support available to small practices can be found at [https://qpp.cms.gov/docs/QPP\\_Support\\_for\\_Small\\_Practices.pdf](https://qpp.cms.gov/docs/QPP_Support_for_Small_Practices.pdf).

We have also performed an updated regulatory impact analysis, accounting for flexibilities, many of which are continuing into the Quality Payment Program Year 2, that have been created to ease the burden for small and solo practices.

##### 3. Summary of Major Provisions for Advanced Alternative Payment Models (Advanced APMs)

###### a. Overview

APMs represent an important step forward in our efforts to move our healthcare system from volume-based to value-based care. Our existing APM policies provide opportunities that support state flexibility, local leadership, regulatory relief, and innovative approaches to improve quality, accessibility, and affordability.

APMs that meet the criteria to be Advanced APMs provide the pathway through which eligible clinicians, many of whom who would otherwise fall under the MIPS, can become Qualifying APM Participants (QPs), thereby earning incentives for their Advanced APM participation. In the CY 2017 Quality Payment Program final rule, we estimated that 70,000 to 120,000 eligible clinicians would be QPs for payment year 2019 based on Advanced APM participation in performance year 2017 (81 FR 77516). With new Advanced APMs expected to be available for participation in 2018, including the Medicare ACO Track 1 Plus (1+) Model, and the addition of new participants for some current Advanced APMs, such as the Next Generation ACO Model and Comprehensive Primary Care Plus (CPC+) Model, we anticipate higher numbers of QPs in subsequent years of the program. We currently estimate that approximately 185,000 to 250,000

eligible clinicians may become QPs for payment year 2020 based on Advanced APM participation in performance year 2018.

b. Advanced APMs

In the CY 2017 Quality Payment Program final rule, to be considered an Advanced APM, we finalized that an APM must meet all three of the following criteria, as required under section 1833(z)(3)(D) of the Act: (1) The APM must require participants to use CEHRT; (2) The APM must provide for payment for covered professional services based on quality measures comparable to those in the quality performance category under MIPS; and (3) The APM must either require that participating APM Entities bear risk for monetary losses of a more than nominal amount under the APM, or be a Medical Home Model expanded under section 1115A(c) of the Act (81 FR 77408).

We are maintaining the generally applicable revenue-based nominal amount standard at 8 percent for QP Performance Periods 2019 and 2020. We are exempting participants in Round 1 of the CPC+ Model as of January 1, 2017 from the 50 eligible clinician limit as proposed. We are also finalizing a more gradual ramp-up in percentages of revenue for the Medical Home Model nominal amount standard over the next several years.

c. Qualifying APM Participant (QP) and Partial QP Determinations

QPs are eligible clinicians in an Advanced APM who have met a threshold percentage of their patients or payments through an Advanced APM or, beginning in performance year 2019, attain QP status through the All-Payer Combination Option. Eligible clinicians who are QPs for a year are excluded from the MIPS reporting requirements and payment adjustment for the year, and receive a 5 percent APM Incentive Payment for the year in years from 2019 through 2024. The statute sets thresholds for the level of participation in Advanced APMs required for an eligible clinician to become a QP for a year.

We are finalizing that for Advanced APMs that start or end during the QP Performance Period and operate continuously for a minimum of 60 days during the QP Performance Period for the year, we are making QP determinations using payment or patient data only for the dates that APM Entities were able to participate in the Advanced APM per the terms of the Advanced APM, not for the full QP Performance Period.

Eligible clinicians who participate in Advanced APMs but do not meet the QP or Partial QP thresholds are subject to MIPS reporting requirements and payment adjustments unless they are otherwise excluded from MIPS.

d. All-Payer Combination Option

The All-Payer Combination Option, which uses a calculation based on an eligible clinician's participation in both Advanced APMs and Other Payer Advanced APMs to make QP determinations, is applicable beginning in performance year 2019. To become a QP through the All-Payer Combination Option, an eligible clinician must participate in an Advanced APM with CMS as well as an Other Payer Advanced APM. We determine whether other payer arrangements are Other Payer Advanced APMs based on information submitted to us by eligible clinicians, APM Entities, and in some cases by payers, including states and Medicare Advantage Organizations. In addition, the eligible clinician or the APM Entity must submit information to CMS so that we can determine whether the eligible clinician meets the requisite QP threshold of participation.

To be an Other Payer Advanced APM, as set forth in section 1833(z)(2)(B)(ii) and (C)(ii) of the Act and implemented in the CY 2017 Quality Payment Program final rule, a payment arrangement with a payer (for example, payment arrangements authorized under Title XIX, Medicare Health Plan payment arrangements, and payment arrangements in CMS Multi-Payer Models) must meet all three of the following criteria: (1) CEHRT is used; (2) the payment arrangement must require the use of quality measures comparable to those in the quality performance category under MIPS; and (3) the payment arrangement must either require the APM Entities to bear more than nominal financial risk if actual aggregate expenditures exceed expected aggregate expenditures, or be a Medicaid Medical Home Model that meets criteria comparable to Medical Home Models expanded under section 1115A(c) of the Act.

In this final rule with comment period, we are finalizing policies that provide more detail about how the All-Payer Combination Option will operate. We are finalizing that an other payer arrangement would meet the generally applicable revenue-based nominal amount standard we proposed if, under the terms of the other payer arrangement, the total amount that an APM Entity potentially owes the payer or foregoes is equal to at least: For the 2019 and 2020 QP Performance Periods,

8 percent of the total combined revenues from the payer of providers and suppliers in participating APM Entities only for arrangements that are expressly defined in terms of revenue. We are also finalizing a more gradual ramp-up in percentages of revenue for the Medicaid Medical Home Model nominal amount standard over the next several years.

We are finalizing the Payer Initiated and Eligible Clinician Other Payer Advanced APM determination processes to allow payers, APM Entities, or eligible clinicians to request that we determine whether other payer arrangements meet the Other Payer Advanced APM criteria. We have also finalized requirements pertaining to the submission of information.

We are finalizing certain modifications to how we calculate Threshold Scores and make QP determinations under the All-Payer Combination Option. We are retaining the QP Performance Period for the All-Payer Combination Option from January 1 through August 31 of each year as finalized in the CY 2017 Quality Payment Program final rule.

e. Physician-Focused Payment Models (PFPs)

The PTAC is an 11-member federal advisory committee that is an important avenue for the creation of innovative payment models. The PTAC is charged with reviewing stakeholders' proposed PFPs, and making comments and recommendations to the Secretary regarding whether they meet the PFP criteria established by the Secretary through rulemaking in the CY 2017 Quality Payment Program final rule. The Secretary is required to review the comments and recommendations submitted by the PTAC and post a detailed response to these recommendations on the CMS Web site.

We sought comments on broadening the definition of PFP to include payment arrangements that involve Medicaid or the Children's Health Insurance Program (CHIP) as a payer even if Medicare is not included as a payer. We are maintaining the current definition of a PFP to include only payment arrangements with Medicare as a payer. We believe this definition retains focus on APMs and Advanced APMs, which would be proposals that the Secretary has more direct authority to implement, while maintaining consistency for PTAC's review while they are still refining their processes. In addition, we sought comment on the Secretary's criteria and stakeholders' needs in developing PFP proposals aimed at meeting the criteria.

#### 4. Summary of Major Provisions for the Merit-Based Incentive Payment System (MIPS)

For Quality Payment Program Year 2, which is the second year of the MIPS and includes the 2018 performance period and the 2020 MIPS payment year, as well as the following:

##### a. Quality

We previously finalized that the quality performance category would comprise 60 percent of the final score for the transition year and 50 percent of the final score for the 2020 MIPS payment year (81 FR 77100). While we proposed to maintain a 60 percent weight for the quality performance category for the 2020 MIPS payment year, we are not finalizing this proposal and will be keeping our previously finalized policy to weight the quality performance category at 50 percent for the 2020 MIPS payment year. We are also finalizing that for purposes of the 2021 MIPS payment year, the performance period for the quality and cost performance categories is CY 2019 (January 1, 2019 through December 31, 2019). We note that we had previously finalized that for the purposes of the 2020 MIPS payment year the performance period for the quality and cost performance categories is CY 2018 (January 1, 2018 through December 31, 2018). We did not make proposals to modify this time frame in the CY 2018 Quality Payment Program proposed rule and are therefore unable to modify this performance period.

Quality measures are selected annually through a call for quality measures under consideration, with a final list of quality measures being published in the **Federal Register** by November 1 of each year. We are finalizing for the CAHPS for MIPS survey for the Quality Payment Program Year 2 and future years that the survey administration period will, at a minimum, span over 8 weeks and, at a maximum, 17 weeks and will end no later than February 28th following the applicable performance period. In addition, we are finalizing for the Quality Payment Program Year 2 and future years to remove two Summary Survey Modules (SSMs), specifically, "Helping You to Take Medication as Directed" and "Between Visit Communication" from the CAHPS for MIPS survey.

For the 2018 MIPS performance period, we previously finalized that the data completeness threshold would increase to 60 percent for data submitted on quality measures using QCDRs, qualified registries, via EHR, or

Medicare Part B claims. While we proposed to maintain a 50 percent data completeness threshold for the 2018 MIPS performance period, we are not finalizing this proposal and will be keeping our previously finalized data completeness threshold of 60 percent for data submitted on quality measures using QCDRs, qualified registries, EHR, or Medicare Part B claims for the 2018 MIPS performance period. We also proposed to have the data completeness threshold for the 2021 MIPS payment year (2019 performance period) to 60 percent for data submitted on quality measures using QCDRs, qualified registries, EHR, or Medicare Part B claims. We are also finalizing this proposal. We anticipate that as MIPS eligible clinicians gain experience with the MIPS we will propose to further increase these thresholds over time.

##### b. Improvement Activities

Improvement activities are those that improve clinical practice or care delivery and that, when effectively executed, are likely to result in improved outcomes. We believe improvement activities support broad aims within healthcare delivery, including care coordination, beneficiary engagement, population management, and health equity. For the 2020 MIPS payment year, we previously finalized that the improvement activities performance category would comprise 15 percent of the final score (81 FR 77179). There are no changes in improvement activities scoring for Quality Payment Program Year 2 (2018 MIPS performance period) as discussed in section II.C.7.a.(5) of this final rule with comment period. However, in this final rule, we are finalizing our proposal to no longer require self-identifications for non-patient facing MIPS eligible clinicians, small practices, practices located in rural areas or geographic HPSAs, or any combination thereof, beginning with the 2018 MIPS performance period and for future years.

We are finalizing that for Quality Payment Program Year 2 and future years (2018 MIPS performance period and future years), MIPS eligible clinicians or groups must submit data on improvement activities in one of the following manners: Via qualified registries, EHR submission mechanisms, QCDR, CMS Web Interface, or attestation; and that for activities that are performed for at least a continuous 90 days during the performance period, MIPS eligible clinicians must submit a yes response for activities within the Improvement Activities Inventory.

In this final rule with comment period, we are finalizing updates to the

Improvement Activities Inventory. Specifically, as discussed in the appendices (Tables F and G) of this final rule with comment period, we are finalizing 21 new improvement activities (some with modification) and changes to 27 previously adopted improvement activities (some with modification and including 1 removal) for the Quality Payment Program Year 2 and future years (2018 MIPS performance period and future years) Improvement Activities Inventory. These activities were recommended by clinicians, patients and other stakeholders interested in advancing quality improvement and innovations in healthcare. We will continue to seek new improvement activities as the program evolves. Additionally, we are finalizing several policies related to submission of improvement activities. In particular, we are formalizing the annual call for activities process for Quality Payment Program Year 3 and future years. We are finalizing with modification, for the Quality Payment Program Year 3 and future years, that stakeholders should apply one or more of the criteria when submitting improvement activities in response to the Annual Call for Activities. In addition to the criteria listed in the proposed rule for nominating new improvement activities for the Annual Call for Activities policy, we are modifying and expanding the proposed criteria list to also include: (1) Improvement activities that focus on meaningful actions from the person and family's point of view, and (2) improvement activities that support the patient's family or personal caregiver. In addition, we are finalizing to: (1) Accept submissions for prospective improvement activities at any time during the performance period for the Annual Call for Activities and create an Improvement Activities Under Review (IAUR) list; (2) only consider prospective activities submitted by March 1 for inclusion in the Improvement Activities Inventory for the performance periods occurring in the following calendar year; and (3) add new improvement activities and subcategories through notice-and-comment rulemaking in future years of the Quality Payment Program.

Additionally, we are finalizing that for purposes of the 2021 MIPS payment year, the performance period for the improvement activities performance category is a minimum of a continuous 90-day period within CY 2019, up to and including the full CY 2019 (January 1, 2019 through December 31, 2019).

In this final rule with comment period, we are also expanding our

definition of how we will recognize an individual MIPS eligible clinician or group as being a certified patient-centered medical home or comparable specialty practice. We are finalizing our proposal, with clarification, that at least 50 percent of the practice sites within the TIN must be recognized as a patient-centered medical home or comparable specialty practice to receive full credit as a certified or recognized patient-centered medical home or comparable specialty practice for the 2020 MIPS payment year and future years. We are clarifying that a practice site as is the physical location where services are delivered. We proposed in section II.C.6.e.(3)(b) of the proposed rule (82 FR 30054) that eligible clinicians in practices that have been randomized to the control group in the CPC+ model would also receive full credit as a Medical Home Model. We are not finalizing this proposal, however, because CMMI has not randomized any practices into a control group in CPC+ Round 2.

We are also finalizing changes to the study, including modifying the name to the “CMS Study on Burdens Associated with Reporting Quality Measures,” increasing the sample size for 2018, and updating requirements.

Furthermore, in recognition of improvement activities as supporting the central mission of a unified Quality Payment Program, we are finalizing in section II.C.6.e.(3)(a) of this final rule with comment period to continue to designate activities in the Improvement Activities Inventory that will also qualify for the advancing care information bonus score. This is consistent with our desire to recognize that CEHRT is often deployed to improve care in ways that our programs should recognize.

#### c. Advancing Care Information

For the Quality Payment Program Year 2, the advancing care information performance category is 25 percent of the final score. However, if a MIPS eligible clinician is participating in a MIPS APM the advancing care information performance category may be 30 percent or 75 percent of the final score depending on the availability of APM quality data for reporting. We are finalizing that for purposes of the 2021 MIPS payment year, the performance period for advancing care information performance category is a minimum of a continuous 90-day period within CY 2019, up to and including the full CY 2019 (January 1, 2019 through December 31, 2019).

Objectives and measures in the advancing care information performance

category focus on the secure exchange of health information and the use of CEHRT to support patient engagement and improved healthcare quality. While we continue to recommend that physicians and clinicians migrate to the implementation and use of EHR technology certified to the 2015 Edition so they may take advantage of improved functionalities, including care coordination and technical advancements such as application programming interfaces, or APIs, we recognize that some practices may have challenges in adopting new certified health IT. Therefore, we are finalizing that MIPS eligible clinicians may continue to use EHR technology certified to the 2014 Edition for the performance period in CY 2018. Clinicians may also choose to use the 2015 Edition CEHRT or a combination of the two. Clinicians will earn a bonus for using only 2015 CEHRT in 2018.

For the 2018 performance period, MIPS eligible clinicians will have the option to report the Advancing Care Information Transition Objectives and Measures using 2014 Edition CEHRT, 2015 Edition CEHRT, or a combination of 2014 and 2015 Edition CEHRT, as long as the EHR technology they possess can support the objectives and measures to which they plan to attest. Similarly, MIPS eligible clinicians will have the option to attest to the Advancing Care Information Objectives and Measures using 2015 Edition CEHRT or a combination of 2014 and 2015 Edition CEHRT, as long as their EHR technology can support the objectives and measures to which they plan to attest.

We are finalizing exclusions for the e-Prescribing and Health Information Exchange Objectives beginning with the 2017 performance period. We are also finalizing that eligible clinicians can earn 10 percentage points in their performance score for reporting to any single public health agency or clinical data registry to meet any of the measures associated with the Public Health and Clinical Data Registry Reporting objective (or any of the measures associated with the Public Health Reporting Objective of the 2018 Advancing Care Information Transition Objectives and Measures, for clinicians who choose to report on those measures) and, and will award an additional 5 percentage point bonus for reporting to more than one. We are implementing several provisions of the 21st Century Cures Act (Pub. L. 114–255, enacted on December 13, 2016) pertaining to hospital-based MIPS eligible clinicians, ambulatory surgical center-based MIPS eligible clinicians, MIPS eligible clinicians using

decertified EHR technology, and significant hardship exceptions under the MIPS. We are also finalizing a significant hardship exception for MIPS eligible clinicians in small practices. For clinicians requesting a reweighting of the advancing care information performance category, we are changing the deadline for submission of this application to December 31 of the performance period. Lastly, we are finalizing additional improvement activities that are eligible for a 10 percent bonus under the advancing care information performance category if they are completed using CEHRT.

#### d. Cost

We previously finalized that the cost performance category would comprise zero percent of the final score for the transition year and 10 percent of the final score for the 2020 MIPS payment year (81 FR 77165). For the 2020 MIPS payment year, we proposed to change the weight of the cost performance category from 10 percent to zero percent (82 FR 30047). For the 2020 MIPS payment year, we are finalizing a 10 percent weight for the cost performance category in the final score in order to ease the transition to a 30 percent weight for the cost performance category in the 2021 MIPS payment year. For the 2018 MIPS performance period, we are adopting the total per capita costs for all attributed beneficiaries measure and the Medicare Spending per Beneficiary (MSPB) measure that were adopted for the 2017 MIPS performance period, and we will not use the 10 episode-based measures that were adopted for the 2017 MIPS performance period. Although data on the episode-based measures has been made available to clinicians in the past, we are in the process of developing new episode-based measures with significant clinician input and believe it would be more prudent to introduce these new measures over time. We will continue to offer performance feedback on episode-based measures prior to potential inclusion of these measures in MIPS to increase clinician familiarity with the concept as well as specific episode-based measures. Specifically, we are providing feedback on these new episode-based cost measures for informational purposes only. We intend to provide performance feedback on the MSPB and total per capita cost measures by July 1, 2018, consistent with section 1848(q)(12) of the Act. In addition, we intend to offer feedback on newly developed episode-based cost measures in 2018 as well.

#### e. Submission Mechanisms

We are finalizing additional flexibility for submitting data through multiple submission mechanisms. Due to operational reasons and to allow additional time to communicate how this policy intersects with our measure applicability policies, this policy will not be implemented for the 2018 performance period but will be implemented instead for the 2019 performance period of the Quality Payment Program. Individual MIPS eligible clinicians or groups will be able to submit measures and activities, as available and applicable, via as many mechanisms as necessary to meet the requirements of the quality, improvement activities, or advancing care information performance categories for the 2019 performance period. This option will provide clinicians the ability to select the measures most meaningful to them, regardless of the submission mechanism.

Also, given stakeholder concerns regarding CMS' multiple submissions mechanism policy, we want to clarify that under the validation process for Year 3, MIPS eligible clinicians who submit via claims or registry submission only or a combination of claims and registry submissions would not be required to submit measures through other mechanisms to meet the quality performance category criteria; rather, it is an option available to MIPS eligible clinicians which may increase their quality performance category score. We expect that MIPS eligible clinicians would choose the submission mechanism that would give them 6 measures to report. Our intention is to offer multiple submission mechanisms to increase flexibility for MIPS individual clinicians and groups. We are not requiring that MIPS individual clinicians and groups submit via additional submission mechanisms; however, through this policy the option would be available for those that have applicable measures and/or activities available to them.

#### f. Virtual Groups

Virtual groups are a new way to participate in MIPS starting with the 2018 MIPS performance period. For the 2018 performance period, clinicians can participate in MIPS as an individual, as a group, as an APM Entity in a MIPS APM, or as a virtual group.

For the implementation of virtual groups as a participation option under MIPS, we are establishing the following policies. We are defining a virtual group as a combination of two or more TINs assigned to one or more solo

practitioners or one or more groups consisting of 10 or fewer eligible clinicians that elect to form a virtual group for a performance period for a year. In order for solo practitioners or such groups to be eligible to join a virtual group, the solo practitioners and the groups would need to exceed the low-volume threshold. A solo practitioner or a group that does not exceed the low-volume threshold could not participate in a virtual group, and it is not permissible under the statute to apply the low-volume threshold at the virtual group level. Also, we are finalizing our virtual group policies to clearly delineate those group-related policies that apply to virtual groups versus policies that only apply to virtual groups.

Virtual groups are required to make an election to participate in MIPS as a virtual group prior to the start of an applicable performance period. We are also finalizing a two-stage virtual group election process for the applicable 2018 and 2019 performance periods. The first stage is the optional eligibility stage, but for practices that do not choose to participate in stage 1 of the election process, we will make an eligibility determination during stage 2 of the election process. The second stage is the virtual group formation stage. We are also finalizing that virtual groups must have a formal written agreement among each party of a virtual group. The election deadline will be December 31.

To provide support and reduce burden, we intend to make technical assistance (TA) available, to the extent feasible and appropriate, to support clinicians who choose to come together as a virtual group for the first 2 years of virtual group implementation applicable to the 2018 and 2019 performance years. Clinicians already receiving technical assistance may continue to do so for virtual groups support; otherwise, the Quality Payment Service Center is available to assist and connect virtual groups with a technical assistance representative. For year 2, we believe that we have created an election process that is simple and straightforward. For Quality Payment Program Year 3, we intend to provide an electronic election process, if technically feasible.

Virtual groups are required to meet the requirements for each performance category and responsible for aggregating data for their measures and activities across the virtual group, for example, across their TINs. In future years, we intend to examine how we define "group" under MIPS with respect to flexibility in composition and reporting.

#### g. MIPS APMs

MIPS eligible clinicians who participate in MIPS APMs are scored using the APM scoring standard instead of the generally applicable MIPS scoring standard. For the 2018 performance period, we are finalizing modifications to the quality performance category reporting requirements and scoring for MIPS eligible clinicians in MIPS APMs, and other modifications to the APM scoring standard. For purposes of the APM scoring standard, we are adding a fourth snapshot date that would be used only to identify eligible clinicians in APM Entity groups participating in those MIPS APMs that require full TIN participation. This snapshot date will not be used to make QP determinations. Along with the other APM Entity groups, these APM Entity groups would be used for the purposes of reporting and scoring under the APM scoring standard described in the CY 2017 Quality Payment Program final rule (81 FR 77246).

#### h. Facility-Based Measurement

We solicited comments on implementing facility-based measurement for the 2018 MIPS performance period and future performance periods to add more flexibility for clinicians to be assessed in the context of the facilities at which they work. We described facility-based measures policies related to applicable measures, applicability to facility-based measurement, group participation, and facility attribution. For clinicians whose primary professional responsibilities are in a healthcare facility we presented a method to assess performance in the quality and cost performance categories of MIPS based on the performance of that facility in another value-based purchasing program.

After much consideration, we are finalizing our proposal to allow clinicians to use facility-based measurement in year 3 (2019) of the Quality Payment Program. We will use the 2018 year to ensure that clinicians better understand the opportunity and ensure operational readiness to offer facility-based measurement.

#### i. Scoring

In the transition year of the Quality Payment Program, we finalized a unified scoring system to determine a final score across the 4 performance categories (81 FR 77273 through 77276). For the 2018 MIPS performance period, we will build on the scoring methodology we finalized for the transition year, focusing on encouraging

MIPS eligible clinicians to meet data completeness requirements.

For quality performance category scoring, we are finalizing to extend some of the transition year policies to the 2018 MIPS performance period and also finalizing several modifications to existing policy. Quality measures that can be scored against a benchmark that meet data completeness standards, and meet the minimum case size requirements will continue to receive between 3 and 10 points as measure achievement points. Measures that do not have a benchmark or meet the case minimum requirement will continue to receive 3 points.

For quality data submitted via EHR, QCDR, or qualified registry, we are lowering the number of points available for measures that do not meet the data completeness criteria to 1 point, except for a measure submitted by a small practice, which we will continue to assign 3 points.

We are finalizing a timeline to identify and propose to remove topped out quality measures through future rulemaking. We are evaluating additional considerations needed to maintain measures for important aspects of care, such as patient safety and high reliability, and will address this in future rulemaking. We are finalizing a policy of applying a scoring cap to identified topped out measures with measure benchmarks that have been topped out for at least 2 consecutive years; however, based on feedback, we will award up to 7 points for topped out measures rather than the 6 points originally proposed. We are finalizing the special scoring policy for the 6 measures identified for the 2018 performance period with a 7-point scoring cap.

We are also excluding CMS Web Interface measures from topped out scoring, but we will continue to monitor differences between CMS Web Interface and other submission options. We intend to address CAHPS through future rulemaking.

Beginning with the 2018 MIPS performance period, we are finalizing measuring improvement scoring at the performance category level for the quality performance category, but we will monitor this approach and revisit as needed through future rule making. We are finalizing measuring improvement scoring at the measure level for the cost performance category.

For the 2018 MIPS performance period, the quality, improvement activities, cost and advancing care information performance category scores will be given weight in the final

score, or be reweighted if a performance category score is not available.

We are also finalizing small practice and complex patient bonuses only for the 2020 MIPS payment year. The small practice bonus of 5 points will be applied to the final score for MIPS eligible clinicians in groups, virtual groups, or APM Entities that have 15 or fewer clinicians and that submit data on at least one performance category in the 2018 performance period. We will also apply a complex patient bonus capped at 5 points using the dual eligibility ratio and average HCC risk score. We increased the complex patients bonus from 3 points as proposed in part to align with the small practice bonus. The final score will be compared against the MIPS performance threshold of 15 points for the 2020 MIPS payment year, a modest increase from 3 points in the transition year. A 15-point final score equal to the performance threshold can be achieved via multiple pathways and continues the gradual transition into MIPS. The additional performance threshold for exceptional performance will remain at 70 points, the same as for the transition year.

We are finalizing a policy of applying the MIPS payment adjustment to the Medicare paid amount.

#### j. Performance Feedback

We proposed and are finalizing the policy to provide Quality Payment Program performance feedback to eligible clinicians and groups. Initially, we will provide performance feedback on an annual basis. In future years, we aim to provide performance feedback on a more frequent basis, which is in line with clinician requests for timely, actionable feedback that they can use to improve care.

#### k. Third Party Intermediaries

In the CY 2017 Quality Payment Program final rule (81 FR 77362), we finalized that qualified registries, QCDRs, health IT vendors, and CMS-approved survey vendors will have the ability to act as intermediaries on behalf of individual MIPS eligible clinicians and groups for submission of data to CMS across the quality, improvement activities, and advancing care information performance categories.

Regarding QCDRs and qualified registries, we are finalizing our proposal to eliminate the self-nomination submission method of email and require that QCDRs and qualified registries submit their self-nomination applications via a web-based tool for future program years beginning with the 2018 performance period. Beginning with the 2019 performance period, we

are finalizing the use of a simplified self-nomination process for previously approved QCDRs and qualified registries in good standing.

In addition, regarding information a QCDR specifically must provide to us at the time of self-nomination, we are making a number of clarifications, finalized that the term “QCDR measures” will replace the existing term of “non-MIPS measures”, and sought public input on requiring full development and testing of QCDR measures by submission. We have also made a few clarifications to existing criteria as they pertain to qualified registries.

We are not making any changes to the health IT vendors that obtain data from CEHRT requirements. Regarding CMS-approved survey vendors, we are finalizing that for the Quality Payment Program year 2 and for future years, that the vendor application deadline be January 31st of the applicable performance year or a later date specified by CMS. Lastly, based on comments we received on the 10-year record retention period and our interest in reducing financial and time burdens under this program and having consistent policies across this program, we are aligning our record retention period across the program by modifying our proposal for third parties from 10 years to finalize a 6-year retention period. Therefore, we are finalizing that entities must retain all data submitted to us for purposes of MIPS for a 6 years from the end of the MIPS performance period.

#### l. Public Reporting

As discussed in section II.C.11. of this final rule with comment period, we proposed and are finalizing public reporting of certain eligible clinician and group Quality Payment Program information, including MIPS and APM data in an easily understandable format as required under the MACRA.

#### m. Eligibility and Exclusion Provisions of the MIPS Program

We are modifying the definition of a non-patient facing MIPS eligible clinician to apply to virtual groups. In addition, we are finalizing our proposal to specify that groups considered to be non-patient facing (more than 75 percent of the NPIs billing under the group's TIN meet the definition of a non-patient facing individual MIPS eligible clinician) during the non-patient facing determination period would automatically have their advancing care information performance category reweighted to zero.

Additionally, we are finalizing our proposal to increase the low-volume threshold to less than or equal to \$90,000 in Medicare Part B allowed charges or 200 or fewer Part-B enrolled Medicare beneficiaries to further decrease burden on MIPS eligible clinicians that practice in rural areas or are part of a small practice or are solo practitioners. We are not finalizing our proposal to provide clinicians the ability to opt-in to MIPS if they meet or exceed one, but not all, of the low-volume threshold determinations, including as defined by dollar amount, beneficiary count or, if established, items and services. We intend to revisit this policy in future rulemaking and are seeking comment on methods to implement this policy in a low burden manner.

#### *E. Payment Adjustments*

For the 2020 payment year based on Advanced APM participation in 2018 performance period, we estimated that approximately 185,000 to 250,000 clinicians will become QPs, and therefore, be excluded from the MIPS reporting requirements and payment adjustment, and qualify for a lump sum APM incentive payment equal to 5 percent of their estimated aggregate payment amounts for covered professional services in the preceding year. We estimate that the total lump sum APM incentive payments will be between approximately \$675 million and \$900 million for the 2020 Quality Payment Program payment year. This expected growth in QPs between the first and second year of the program is due in part to reopening of CPC+ and Next Generation ACO for 2018, and the Medicare ACO Track 1+ Model which is projected to have a large number of participants, with a large majority reaching QP status.

Under the policies in this final rule with comment period, and for purposes of the Regulatory Impact Analysis, we estimate that approximately 622,000 eligible clinicians will be subject to MIPS reporting requirements and payment adjustments in the 2018 MIPS performance period. However, this number may vary depending on the number of eligible clinicians excluded from MIPS based on their status as QPs or Partial QPs. After restricting the population to eligible clinician types who are not newly enrolled, we believe the increase in the low-volume threshold is expected to exclude 540,000 clinicians who do not exceed the low-volume threshold. In the 2020 MIPS payment year, MIPS payment adjustments will be applied based on MIPS eligible clinicians' performance

on specified measures and activities within four integrated performance categories.

Assuming that 90 percent of MIPS eligible clinicians of all practice sizes participate in MIPS, we estimate that MIPS payment adjustments will be approximately equally distributed between negative MIPS payment adjustments of \$118 million and positive MIPS payment adjustments of \$118 million to MIPS eligible clinicians, as required by the statute to ensure budget neutrality. Positive MIPS payment adjustments will also include up to an additional \$500 million for exceptional performance to MIPS eligible clinicians whose final score meets or exceeds the additional performance threshold of 70 points. These MIPS payment adjustments are expected to drive quality improvement in the provision of MIPS eligible clinicians' care to Medicare beneficiaries and to all patients in the health care system. However, the distribution will change based on the final population of MIPS eligible clinicians for CY 2020 and the distribution of scores under the program. We believe that starting with these modest initial MIPS payment adjustments is in the long-term best interest of maximizing participation and starting the Quality Payment Program off on the right foot, even if it limits the magnitude of MIPS positive adjustments during the 2018 MIPS performance period. The increased availability of Advanced APM opportunities, including through Medical Home models, also provides earlier avenues to earn APM incentive payments for those eligible clinicians who choose to participate.

#### *F. Benefits and Costs of the Final Rule With Comment Period*

We quantify several costs associated with this rule. We estimate that this final rule with comment period will result in approximately \$694 million in collection of information-related burden. We estimate that the incremental collection of information-related burden associated with this final rule with comment period is a reduction of approximately \$13.9 million relative to the estimated burden of continuing the policies the CY 2017 Quality Payment Program final rule, which is \$708 million. We also estimate regulatory review costs of \$2.2 million for this final rule with comment period. We estimate that federal expenditures will include \$118 million in revenue neutral payment adjustments and \$500 million for exceptional performance payments. Additional federal

expenditures include approximately \$675–\$900 million in APM incentive payments to QPs.

#### *G. Automatic Extreme and Uncontrollable Circumstance Policy Interim Final Rule With Comment Period*

In order to account for Hurricanes Harvey, Irma, and Maria and other disasters that have occurred or might occur during the 2017 MIPS performance period, we are establishing in an interim final rule with comment period an automatic extreme and uncontrollable circumstance policy for the quality, improvement activities, and advancing care information performance categories for the 2017 MIPS performance period. We believe the automatic extreme and uncontrollable circumstance policy will reduce clinician burden during a catastrophic time and will also align with Medicare policies in other programs such as the Hospital IQR Program. Under this policy, we will apply the extreme and uncontrollable circumstance policies for the MIPS performance categories to individual MIPS eligible clinicians for the 2017 MIPS performance period without requiring a MIPS eligible clinician to submit an application when we determine a triggering event, such as a hurricane, has occurred and the clinician is in an affected area. We will automatically weight the quality, improvement activities, and advancing care information performance categories at zero percent of the final score, resulting in a final score equal to the performance threshold, unless the MIPS eligible clinician submits MIPS data which we would then score on a performance-category-by-performance-category-basis, like all other MIPS eligible clinicians. We are not making any changes to the APM scoring standard policies that apply in 2017 for participants in MIPS APMs. We are waiving notice and comment and adopting this policy on an interim final basis due to the urgency of providing relief for MIPS eligible clinicians impacted by recent natural disasters during the 2017 MIPS performance period.

#### *H. Stakeholder Input*

In developing this final rule with comment period, we sought feedback from stakeholders and the public throughout the process, including in the CY 2018 Quality Payment Program proposed rule, CY 2017 Quality Payment Program final rule with comment period, listening sessions, webinars, and other listening venues. We received a high degree of interest

from a broad spectrum of stakeholders. We thank our many commenters and acknowledge their valued input throughout the rulemaking process. We summarize and respond to comments on our proposals in the appropriate sections of this final rule with comment period, though we are not able to address all comments or all issues that all commenters raised due to the volume of comments and feedback. Specifically, due to the volume of comments we have not summarized feedback from commenters on items we solicited feedback on for future rulemaking purposes. However, in general, commenters continue to be supportive as we continue implementation of the Quality Payment Program and maintain optimism as we move from FFS Medicare payment towards a payment structure focused on the quality and value of care. Public support for our proposed approach and policies in the proposed rule, which many were finalized, focused on the potential for improving the quality of care delivered to beneficiaries and increasing value to the public—while rewarding eligible clinicians for their efforts. Additionally we note that we received a number of comments from stakeholders in regards to the application of MIPS to certain Part B drugs. Additional guidance on the applicability of MIPS to Part B drugs can be found on our Web site at [qpp.cms.gov](http://qpp.cms.gov).

We thank stakeholders again for their responses throughout our process, in various venues, including comments on the Request for Information Regarding Implementation of the Merit-based Incentive Payment System, Promotion of Alternative Payment Models, and Incentive Payments for Participation in Eligible Alternative Payment Models (herein referred to as the MIPS and APMs RFI) (80 FR 59102 through 59113) and the CY 2017 Quality Payment Program final rule (81 FR 77008 through 77831). We intend to continue open communication with stakeholders, including consultation with tribes and tribal officials, on an ongoing basis as we develop the Quality Payment Program in future years.

We will continue to offer help so clinicians can be successful in the program and make informed decisions about how to participate. You can find out more about the help that's available at [qpp.cms.gov](http://qpp.cms.gov), which has many free and customized resources, or by calling 1-866-288-8292. As with the policy decisions, stakeholder feedback is essential to the development of educational resources as well. We look

forward to your feedback on existing or the need for new resources.

## II. Provisions of the Proposed Regulations, and Analysis of and Responses to Comments

The following is a summary of the proposed provisions in the “Medicare Program; CY 2018 Updates to the Quality Payment Program” proposed rule (82 FR 30010–30500) (hereinafter referred to as the “CY 2018 Quality Payment Program proposed rule.”) In this section, we also provide summaries of the public comments and our responses.

### A. Introduction

The Quality Payment Program, authorized by the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) is a new approach for reforming care across the health care delivery system for eligible clinicians. Under the Quality Payment Program, eligible clinicians can participate via one of two pathways: Advanced Alternative Payment Models (APMs); or the Merit-based Incentive Payment System (MIPS). We began implementing the Quality Payment Program through rulemaking for calendar year (CY) 2017. This rule provides updates for the second and future years of the Quality Payment Program.

### B. Definitions

At § 414.1305, subpart O, we define the following terms:

- Ambulatory Surgical Center (ASC)-based MIPS eligible clinician.
- CMS Multi-Payer Model.
- Facility-based MIPS eligible clinician.
- Full TIN APM.
- Improvement Scoring.
- Other MIPS APM.
- Solo practitioner.
- Virtual group.

We revise the definitions of the following terms:

- Affiliated practitioner.
- APM Entity.
- Attributed beneficiary.
- Certified Electronic Health Record Technology (CEHRT).
- Final Score.
- Hospital-based MIPS eligible clinician.
- Low-volume threshold.
- Medicaid APM.
- Non-patient facing MIPS eligible clinician.
- Other Payer Advanced APM.
- Rural areas.
- Small practice.

We remove the following terms:

- Advanced APM Entity.

These terms and definitions are discussed in detail in relevant sections of this final rule with comment period.

### C. MIPS Program Details

#### 1. MIPS Eligible Clinicians

##### a. Definition of a MIPS Eligible Clinician

In the CY 2017 Quality Payment Program final rule (81 FR 77040 through 77041), we defined at § 414.1305 a MIPS eligible clinician, as identified by a unique billing TIN and NPI combination used to assess performance, as any of the following (excluding those identified at § 414.1310(b)): A physician (as defined in section 1861(r) of the Act), a physician assistant, nurse practitioner, and clinical nurse specialist (as such terms are defined in section 1861(aa)(5) of the Act), a certified registered nurse anesthetist (as defined in section 1861(bb)(2) of the Act), and a group that includes such clinicians. We established at § 414.1310(b) and (c) that the following are excluded from this definition per the statutory exclusions defined in section 1848(q)(1)(C)(ii) and (v) of the Act: (1) QPs; (2) Partial QPs who choose not to report on applicable measures and activities that are required to be reported under MIPS for any given performance period in a year; (3) low-volume threshold eligible clinicians; and (4) new Medicare-enrolled eligible clinicians. In accordance with sections 1848(q)(1)(A) and (q)(1)(C)(vi) of the Act, we established at § 414.1310(b)(2) that eligible clinicians (as defined at § 414.1305) who are not MIPS eligible clinicians have the option to voluntarily report measures and activities for MIPS. Additionally, we established at § 414.1310(d) that in no case will a MIPS payment adjustment apply to the items and services furnished during a year by eligible clinicians who are not MIPS eligible clinicians, as described in § 414.1310(b) and (c), including those who voluntarily report on applicable measures and activities specified under MIPS.

In the CY 2017 Quality Payment Program final rule (81 FR 77340), we noted that the MIPS payment adjustment applies only to the amount otherwise paid under Part B with respect to items and services furnished by a MIPS eligible clinician during a year, in which we will apply the MIPS payment adjustment at the TIN/NPI level. We have received requests for additional clarifications on which specific Part B services are subject to the MIPS payment adjustment, as well as which Part B services are included for eligibility determinations. We note that

when Part B items or services are furnished by suppliers that are also MIPS eligible clinicians, there may be circumstances in which it is not operationally feasible for us to attribute those items or services to a MIPS eligible clinician at an NPI level in order to include them for purposes of applying the MIPS payment adjustment or making eligibility determinations.

To further clarify, there are circumstances that involve Part B prescription drugs and durable medical equipment (DME) where the supplier may also be a MIPS eligible clinician. In the case of a MIPS eligible clinician who furnishes a Part B covered item or service, such as prescribing Part B drugs that are dispensed, administered, and billed by a supplier that is a MIPS eligible clinician, or ordering DME that is administered and billed by a supplier that is a MIPS eligible clinician, it is not operationally feasible for us at this time to associate those billed allowed charges with a MIPS eligible clinician at an NPI level in order to include them for purposes of applying the MIPS payment adjustment or making eligibility determinations. To the extent that it is not operationally feasible for us to do so, such items or services would not be included for purposes of applying the MIPS payment adjustment or making eligibility determinations. However, for those billed Medicare Part B allowed charges that we are able to associate with a MIPS eligible clinician at an NPI level, such items and services would be included for purposes of applying the MIPS payment adjustment or making eligibility determinations.

#### b. Groups

As discussed in the CY 2017 Quality Payment Program final rule (81 FR 77088 through 77831), we indicated that we will assess performance either for individual MIPS eligible clinicians or for groups. We defined a group at § 414.1305 as a single Taxpayer Identification Number (TIN) with two or more eligible clinicians (including at least one MIPS eligible clinician), as identified by their individual NPI, who have reassigned their Medicare billing rights to the TIN. We recognize that MIPS eligible clinicians participating in MIPS may be part of a TIN that has one portion of its NPIs participating in MIPS according to the generally applicable scoring criteria while the remaining portion of its NPIs is participating in a MIPS APM or an Advanced APM according to the MIPS APM scoring standard. In the CY 2017 Quality Payment Program final rule (81 FR 77058), we noted that except for groups containing APM participants, we are not

permitting groups to “split” TINs if they choose to participate in MIPS as a group. Thus, we would like to clarify that we consider a group to be either an entire single TIN or portion of a TIN that: (1) Is participating in MIPS according to the generally applicable scoring criteria while the remaining portion of the TIN is participating in a MIPS APM or an Advanced APM according to the MIPS APM scoring standard; and (2) chooses to participate in MIPS at the group level. We also defined an APM Entity group at § 414.1305 as a group of eligible clinicians participating in an APM Entity, as identified by a combination of the APM identifier, APM Entity identifier, TIN, and NPI for each participating eligible clinician.

#### c. Small Practices

In the CY 2017 Quality Payment Program final rule (81 FR 77188), we defined the term small practices at § 414.1305 as practices consisting of 15 or fewer clinicians and solo practitioners. However, it has come to our attention that there is inconsistency between the proposed definition of a solo practitioner discussed in section I.C.4.b. of this final rule with comment period and the established definition of a small practice. Therefore, to resolve this inconsistency and ensure greater consistency with established MIPS terminology, we are modifying the definition of a small practice at § 414.1305 to mean a practice consisting of 15 or fewer eligible clinicians. This modification is not intended to substantively change the definition of a small practice. In section I.C.4.d. of this final rule with comment period, we discuss how small practice status would apply to virtual groups. Also, in the final rule with comment period, we noted that we would not make an eligibility determination regarding the size of small practices, but indicated that small practices would attest to the size of their group practice (81 FR 77057). However, we have since realized that our system needs to account for small practice size in advance of a performance period for operational purposes relating to assessing and scoring the improvement activities performance category, determining hardship exceptions for small practices, calculating the small practice bonus for the final score, and identifying small practices eligible for technical assistance. As a result, we believe it is critical to modify the way in which small practice size would be determined. To make eligibility determinations regarding the size of small practices for performance periods

occurring in 2018 and future years, we proposed that we would determine the size of small practices as described in this section of the final rule with comment period (82 FR 30020). As noted in the CY 2017 Quality Payment Program final rule, the size of a group (including a small practice) would be determined before exclusions are applied (81 FR 77057). We note that group size determinations are based on the number of NPIs associated with a TIN, which would include eligible clinicians (NPIs) who may be excluded from MIPS participation and do not meet the definition of a MIPS eligible clinician.

To make eligibility determinations regarding the size of small practices for performance periods occurring in 2018 and future years, we proposed that we would determine the size of small practices by utilizing claims data (82 FR 30020). For purposes of this section, we are coining the term “small practice size determination period” to mean a 12-month assessment period, which consists of an analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 30-day claims run out. This would allow us to inform small practices of their status near the beginning of the performance period as it pertains to eligibility relating to technical assistance, applicable improvement activities criteria, the proposed hardship exception for small practices under the advancing care information performance category, and the proposed small practice bonus for the final score.

Thus, for purposes of performance periods occurring in 2018 and the 2020 MIPS payment year, we would identify small practices based on 12 months of data starting from September 1, 2016 to August 31, 2017. We would not change an eligibility determination regarding the size of a small practice once the determination is made for a given performance period and MIPS payment year. We recognize that there may be circumstances in which the small practice size determinations made do not reflect the real-time size of such practices. We considered two options that could address such potential discrepancies. One option would include an expansion of the proposed small practice size determination period to 24 months with two 12-month segments of data analysis (before and during the performance period), in which we would conduct a second analysis of claims data during the performance period. Such an expanded

determination period may better capture the real-time size of small practices, but determinations made during the performance period prevent our system from being able to account for the assessment and scoring of the improvement activities performance category and identification of small practices eligible for technical assistance prior to the performance period. Specifically, our system needs to capture small practice determinations in advance of the performance period in order for the system to reflect the applicable requirements for the improvement activities performance category and when a small practice bonus would be applied. A second option would include an attestation component, in which a small practice that was not identified as a small practice during the small practice size determination period would be able to attest to the size of their group practice prior to the performance period. However, this second option would require us to develop several operational improvements, such as a manual process or system that would provide an attestation mechanism for small practices, and a verification process to ensure that only small practices are identified as eligible for technical assistance. Since individual MIPS eligible clinicians and groups are not required to register to participate in MIPS (except for groups utilizing the CMS Web Interface for the Quality Payment Program or administering the CAHPS for MIPS survey), requiring small practices to attest to the size of their group practice prior to the performance period could increase burden on individual MIPS eligible clinicians and groups that are not already utilizing the CMS Web Interface for the Quality Payment Program or administering the CAHPS for MIPS survey. We solicited public comment on the proposal regarding how we would determine small practice size.

The following is a summary of the public comments received on the "Small Practices" proposal and our responses:

*Comment:* Several commenters supported using historical claims data to make a small practice size determination. One commenter also noted support for the definition of a small practice using the number of NPIs associated with a TIN.

*Response:* We are finalizing that we will utilize a 12-month assessment period, which consists of an analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar

year and includes a 30-day claims run out for the small practice size determination.

*Comment:* Several commenters supported the proposal to notify small practices of their status near the beginning of the performance period so that practices can plan accordingly.

*Response:* We are finalizing that we will utilize a 12-month assessment period, which consists of an analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 30-day claims run out for the small practice size determination. We anticipate providing MIPS eligible clinicians with their small practice size determination by Spring 2018, for the applicable 2018 performance period.

*Comment:* Several commenters recommended that practices be allowed to attest the size of their practice if they are not identified during the small practice size determination period. Specifically, a few commenters expressed concern that utilizing claims data will result in practices learning of their small practice status too close to the start of the performance period. A few commenters recommended that we should rely on attestation alone, and expressed concern that claims data will not provide a reliable, real-time determination of practice size. Another commenter specifically recommended that practices be required to attest 180 days before the close of the performance period so that practices can accurately predict their status. One commenter recommended that we validate practice size for groups attesting as small using recent claims data. One commenter recommended utilizing a claims determination process as well as attestation, and using whichever method yields a smaller practice size.

*Response:* Regarding the various commenters that provided different methods for validating practice size, including: Attesting as small using recent claims data; utilizing an 180 days attestation period; or utilizing a claims determination process as well as attestation, we have considered various approaches and have determined that the most straightforward approach which provides the lowest burden to MIPS eligible clinicians is the utilization of claims data. By utilizing claims data, we can apply the status of a small practice accurately without requiring clinicians to take a separate action and attest to being a small practice. Therefore, we are finalizing that we will utilize a 12-month assessment period, which consists of an

analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 30-day claims run out for the small practice size determination. We anticipate providing MIPS eligible clinicians with their small practice size determination by Spring 2018, for the applicable 2018 performance period.

As discussed in the CY 2018 Quality Payment Program proposed rule (82 FR 30020), there are operational barriers with allowing groups to attest to their size. Specifically, since individual MIPS eligible clinicians and groups are not required to register to participate in MIPS (except for groups utilizing the CMS Web Interface for the Quality Payment Program or administering the CAHPS for MIPS survey), requiring small practices to attest to the size of their group practice prior to the performance period could increase burden on individual MIPS eligible clinicians and groups. In addition, attestation would require us to develop several operational improvements, such as a manual process or system that would provide an attestation mechanism for small practices, and a verification process to ensure that only small practices are identified as eligible for technical assistance. We believe utilizing claims data will support most eligibility determinations because we consider it a reliable source of how a MIPS eligible clinician or group interacts with Medicare.

*Comment:* One commenter expressed concern that using performance period data or an attestation portal as a second step in the small practice identification process does not provide practices with adequate advanced notice of their practice size determination and could limit their ability to access small practice support services.

*Response:* We are finalizing that we will utilize a 12-month assessment period, which consists of an analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 30-day claims run out for the small practice size determination. This proposed modification of the claims run out period from 60 days to 30 days increases the speed of delivery for communication and creation of the file using claims data. In addition, using the 30-day claims run out allows us to inform small practices of their determination as soon as technically possible, as it pertains to eligibility relating to technical assistance, applicable improvement

activities criteria, the proposed hardship exception for small practices under the advancing care information performance category, and the proposed small practice bonus for the final score. As a result, we do not believe clinicians' ability to access small practice support services will be limited.

*Comment:* A few commenters recommended that we should not allow practices to attest that they are small practices. Specifically, one commenter expressed concern that practices may mistakenly expect to be identified as small based on their number of MIPS eligible clinicians and attest incorrectly.

*Response:* We acknowledge and agree with the commenters' concern. We have considered various approaches and have determined that the most straightforward and best representation of small practice size determination is the utilization of claims data. Therefore, we are finalizing that we will utilize a 12-month assessment period, which consists of an analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 30-day claims run out for the small practice size determination.

*Comment:* Several commenters did not support the previously finalized definition of small practices as practices consisting of 15 or fewer clinicians and solo practitioners. One commenter recommended that we modify the definition of small practices to include those that are similar in challenges and structure, but that may include more than 15 clinicians. The commenter noted that several small practices may be loosely tied together under the same TIN but may function as small practices without the benefit of shared organizational and administrative resources. The commenter recommended that we assess the number of clinicians at a physical practice site to determine small practice status and ability to join a virtual group. Several commenters believed that we should define small practices based on the number of MIPS eligible clinicians, not eligible clinicians. A few commenters supported defining small practices based on the number of full-time equivalent employees, arguing that rural and HPSAs use different staffing arrangements to fully staff their practices.

*Response:* Section 1848(q)(2)(B)(iii) of the Act defines small practices as consisting of 15 or fewer professionals. We previously defined small practices at § 414.1305 as practices consisting of 15 or fewer clinicians and solo practitioners in order to include both

MIPS eligible clinicians and eligible clinicians, such as those in APMs. As discussed above, we are modifying the definition of a small practice at § 414.1305 to mean a practice consisting of 15 or fewer eligible clinicians. This modification is not intended to substantively change the definition of a small practice. In response to the suggestions that we assess the number of clinicians at a physical practice site to determine small practice status, or make the small practice assessment based on the number of full-time equivalent employees, we acknowledge that some practices may be structured in this manner; however, we do not currently have a reliable method of making a determination that does not require a separate action from such practices, such as attestation or submission of supporting documentation to verify these statuses. Rather, we believe the approach of simply counting the NPIs (clinicians) that are associated with a TIN provides a simple method for all stakeholders to understand.

*Final Action:* After consideration of the public comments, we are finalizing that we will utilize a 12-month assessment period, which consists of an analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 30-day claims run out for the small practice size determination. In addition, as discussed above, we are modifying the definition of a small practice at § 414.1305 to mean a practice consisting of 15 or fewer eligible clinicians. This modification is not intended to substantively change the definition of a small practice. Finally, we refer readers to section II.C.4.b. of this final rule with comment period for a discussion of the definition of a solo practitioner.

#### d. Rural Area and Health Professional Shortage Area Practices

In the CY 2017 Quality Payment Program final rule, we defined rural areas at § 414.1305 as clinicians in ZIP codes designated as rural, using the most recent Health Resources and Services Administration (HRSA) Area Health Resource File data set available; and Health Professional Shortage Areas (HPSAs) at § 414.1305 as areas designated under section 332(a)(1)(A) of the Public Health Service Act. For technical accuracy purposes, we proposed to remove the language "clinicians in" as clinicians are not technically part of a ZIP code and modify the definition of a rural areas at § 414.1305 as ZIP codes designated as

rural, using the most recent Health Resources and Services Administration (HRSA) Area Health Resource File data set available.

We recognize that there are cases in which an individual MIPS eligible clinician (including a solo practitioner) or a group may have multiple practice sites associated with its TIN and as a result, it is critical for us to outline the application of rural area and HPSA practice designations to such practices. For performance periods occurring in 2017, we consider an individual MIPS eligible clinician or a group with at least one practice site under its TIN in a ZIP code designated as a rural area or HPSA to be a rural area or HPSA practice. For performance periods occurring in 2018 and future years, we believe that a higher threshold than one practice within a TIN is necessary to designate an individual MIPS eligible clinician, a group, or a virtual group as a rural or HPSA practice. We recognize that the establishment of a higher threshold starting in 2018 would more appropriately identify groups and virtual groups with multiple practices under a group's TIN or TINs that are part of a virtual group as rural or HPSA practice and ensure that groups and virtual groups are assessed and scored according to requirements that are applicable and appropriate. We note that in the CY 2017 Quality Payment Program final rule (81 FR 77048 through 77049), we defined a non-patient facing MIPS eligible clinician at § 414.1305 as including a group provided that more than 75 percent of the NPIs billing under the group's TIN meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period. We refer readers to section II.C.1.e. of this final rule with comment period for our policy to modify the definition of a non-patient facing MIPS eligible clinician. We believe that using a similar threshold for applying the rural and HPSA designation to an individual MIPS eligible clinician, a group, or virtual group with multiple practices under its TIN or TINs within a virtual group will add consistency for such practices across the MIPS as it pertains to groups and virtual groups obtaining such statuses. We also believe that establishing a 75 percent threshold renders an adequate representation of a group or virtual group where a significant portion of a group or a virtual group is identified as having such status. Therefore, for performance periods occurring in 2018 and future years, we proposed that an individual

MIPS eligible clinician, a group, or a virtual group with multiple practices under its TIN or TINs within a virtual group would be designated as a rural or HPSA practice if more than 75 percent of NPIs billing under the individual MIPS eligible clinician or group's TIN or within a virtual group, as applicable, are designated in a ZIP code as a rural area or HPSA (82 FR 30020 through 30021).

The following is a summary of the public comments received on the "Rural Area and Health Professional Shortage Area Practices" proposals and our responses:

*Comment:* Several commenters supported the proposals to modify the definition of rural areas as ZIP codes designated as rural and a rural group when more than 75 percent of NPIs billing under the individual MIPS eligible clinician or group's TIN or within a virtual group, as applicable, are designated in a ZIP code as a rural area or HPSA. Another commenter recommended that we conduct further analysis on those clinicians who thought they qualified as a rural area or HPSA practice but did not meet the 75 percent threshold.

*Response:* We are finalizing the definition of a rural areas at § 414.1305 as ZIP codes designated as rural, using the most recent Health Resources and Services Administration (HRSA) Area Health Resource File data set available. In addition, we are finalizing that for performance periods occurring in 2018 and future years, that an individual MIPS eligible clinician, a group, or a virtual group with multiple practices under its TIN or TINs within a virtual group would be designated as a rural or HPSA practice if more than 75 percent of NPIs billing under the individual MIPS eligible clinician or group's TIN or within a virtual group, as applicable, are designated in a ZIP code as a rural area or HPSA. In regard to the suggestion that we conduct further analysis on those clinicians who thought they qualified as a rural area or HPSA practice but did not meet the 75 percent threshold, we would encourage those stakeholders to contact our Quality Payment Program Service Center which may be reached at 1-866-288-8292 (TTY 1-877-715-6222), available Monday through Friday, 8:00 a.m.–8:00 p.m. Eastern Time or via email at [QPP@cms.hhs.gov](mailto:QPP@cms.hhs.gov).

*Comment:* One commenter recommended we further analyze the characteristics of practices currently defined as rural or HPSA to identify practices that may be inappropriately classified.

*Response:* We believe that establishing a 75 percent threshold more

appropriately identifies groups and virtual groups with multiple practices under a group's TIN or TINs that are part of a virtual group as rural or HPSA practices and ensure that groups and virtual groups are assessed and scored according to requirements that are applicable and appropriate. We will take the suggestions for further analysis on the characteristics of practices currently defined as rural or HPSA to identify practices that may be inappropriately classified into consideration in future rulemaking as necessary.

*Comment:* Several commenters did not support the proposed definition of rural areas and did not support the proposed group definition of rural and HPSA practice. One commenter did not support the use of ZIP codes as a reliable indicator of rural status as some clinicians have multiple sites inside and outside of rural areas. A few commenters recommended that we not adopt the policy that a group be considered rural if more than 75 percent of NPIs billing under the TIN are designated in a ZIP code as rural or HPSA because it would overly limit the number of rural group practices. Of these commenters, two recommended using 50 percent as a threshold, and one commenter recommended a gradual transition using the 2017 threshold for the 2018 MIPS performance period and thresholds of 25 percent, 50 percent, and 75 percent in performance periods occurring in 2019, 2020, and 2021, respectively. A few commenters believed that expanding the number of clinicians in rural or HPSA groups would hamper the ability of those practices to participate fully in the transition to value-based care and increase disparities between urban and rural care. One commenter stated that the status of rural or HPSA should be assigned to an individual but not be assigned to a group.

*Response:* We are finalizing that an individual MIPS eligible clinician, a group, or a virtual group with multiple practices under its TIN or TINs within a virtual group would be designated as a rural or HPSA practice if more than 75 percent of NPIs billing under the individual MIPS eligible clinician or group's TIN or within a virtual group, as applicable, are designated in a ZIP code as a rural area or HPSA. We do not believe establishing a 75 percent threshold would overly limit the number of rural group practices, nor hamper their ability to participate fully in the transition to value-based care, or increase disparities between urban and rural care. In response to the various threshold recommendations, we believe

that the 75 percent threshold provides adequate representation of the group, and it also aligns with our definition of a non-patient facing group, which provides consistency across the program. We believe rural and HPSA status should be assigned to groups because we believe those clinicians that are in a rural or HPSA area and choose to participate in MIPS as part of a group, should receive the benefit of those statuses, regardless of their chosen participation mechanism. In regards to the commenter who did not support the use of ZIP codes as a reliable indicator of rural status due to clinicians practicing at multiple sites, we disagree. We believe that utilizing ZIP codes designated as rural is an appropriate indicator of rural status. We further note that if a clinician practices at multiple sites that have different TINs, each TIN would have a separate rural analysis applied for that particular site (TIN).

*Final Action:* After consideration of the public comments, we are finalizing the definition of rural areas at § 414.1305 as ZIP codes designated as rural, using the most recent Health Resources and Services Administration (HRSA) Area Health Resource File data set available. In addition, we are finalizing that for performance periods occurring in 2018 and future years, that an individual MIPS eligible clinician, a group, or a virtual group with multiple practices under its TIN or TINs within a virtual group would be designated as a rural or HPSA practice if more than 75 percent of NPIs billing under the individual MIPS eligible clinician or group's TIN or within a virtual group, as applicable, are designated in a ZIP code as a rural area or HPSA.

#### e. Non-Patient Facing MIPS Eligible Clinicians

Section 1848(q)(2)(C)(iv) of the Act requires the Secretary, in specifying measures and activities for a performance category, to give consideration to the circumstances of professional types (or subcategories of those types determined by practice characteristics) who typically furnish services that do not involve face-to-face interaction with a patient. To the extent feasible and appropriate, the Secretary may take those circumstances into account and apply alternative measures or activities that fulfill the goals of the applicable performance category to such non-patient facing MIPS eligible clinicians. In carrying out these provisions, we are required to consult with non-patient facing MIPS eligible clinicians.

In addition, section 1848(q)(5)(F) of the Act allows the Secretary to re-weight

MIPS performance categories if there are not sufficient measures and activities applicable and available to each type of MIPS eligible clinician. We assume many non-patient facing MIPS eligible clinicians will not have sufficient measures and activities applicable and available to report under the performance categories under MIPS. We refer readers to section II.C.6.f. of this final rule with comment period for the discussion regarding how we address performance category weighting for MIPS eligible clinicians for whom no measures or activities are applicable and available in a given performance category.

In the CY 2017 Quality Payment Program final rule (81 FR 77048 through 77049), we defined a non-patient facing MIPS eligible clinician for MIPS at § 414.1305 as an individual MIPS eligible clinician that bills 100 or fewer patient-facing encounters (including Medicare telehealth services defined in section 1834(m) of the Act) during the non-patient facing determination period, and a group provided that more than 75 percent of the NPIs billing under the group's TIN meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period. In order to account for the formation of virtual groups starting in the 2018 performance year and how non-patient facing determinations would apply to virtual groups, we need to modify the definition of a non-patient facing MIPS eligible clinician. Therefore, for performance periods occurring in 2018 and future years, we proposed to modify the definition of a non-patient facing MIPS eligible clinician at § 414.1305 to mean an individual MIPS eligible clinician that bills 100 or fewer patient-facing encounters (including Medicare telehealth services defined in section 1834(m) of the Act) during the non-patient facing determination period, and a group or virtual group provided that more than 75 percent of the NPIs billing under the group's TIN or within a virtual group, as applicable, meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period (82 FR 30021).

We considered a patient-facing encounter to be an instance in which the individual MIPS eligible clinician or group billed for items and services furnished such as general office visits, outpatient visits, and procedure codes under the PFS. We published the list of patient-facing encounter codes for performance periods occurring in 2017 at [qpp.cms.gov/resources/education](http://qpp.cms.gov/resources/education). We

intend to publish the list of patient-facing encounter codes for performance periods occurring in 2018 at [qpp.cms.gov](http://qpp.cms.gov) by the end of 2017. The list of patient-facing encounter codes is used to determine the non-patient facing status of MIPS eligible clinicians.

The list of patient-facing encounter codes includes two general categories of codes: Evaluation and Management (E&M) codes; and Surgical and Procedural codes. E&M codes capture clinician-patient encounters that occur in a variety of care settings, including office or other outpatient settings, hospital inpatient settings, emergency departments, and nursing facilities, in which clinicians utilize information provided by patients regarding history, present illness, and symptoms to determine the type of assessments to conduct. Assessments are conducted on the affected body area(s) or organ system(s) for clinicians to make medical decisions that establish a diagnosis or select a management option(s).

Surgical and Procedural codes capture clinician-patient encounters that involve procedures, surgeries, and other medical services conducted by clinicians to treat medical conditions. In the case of many of these services, evaluation and management work is included in the payment for the single code instead of separately reported. Patient-facing encounter codes from both of these categories describe direct services furnished by eligible clinicians with impact on patient safety, quality of care, and health outcomes.

For purposes of the non-patient facing policies under MIPS, the utilization of E&M codes and Surgical and Procedural codes allows for accurate identification of patient-facing encounters, and thus, accurate eligibility determinations regarding non-patient facing status. As a result, MIPS eligible clinicians considered non-patient facing are able to prepare to meet requirements applicable to non-patient facing MIPS eligible clinicians. We proposed to continue applying these policies for purposes of the 2020 MIPS payment year and future years (82 FR 30021).

As described in the CY 2017 Quality Payment Program final rule, we established the non-patient facing determination period for purposes of identifying non-patient facing MIPS eligible clinicians in advance of the performance period and during the performance period using historical and performance period claims data. This eligibility determination process allows us to begin identifying non-patient facing MIPS eligible clinicians prior to or shortly after the start of the performance period. The non-patient

facing determination period is a 24-month assessment period, which includes a two-segment analysis of claims data regarding patient-facing encounters during an initial 12-month period prior to the performance period followed by another 12-month period during the performance period. The initial 12-month segment of the non-patient facing determination period spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 60-day claims run out, which allows us to inform individual MIPS eligible clinicians and groups of their non-patient facing status during the month (December) prior to the start of the performance period. The second 12-month segment of the non-patient facing determination period spans from the last 4 months of a calendar year 1 year prior to the performance period followed by the first 8 months of the performance period in the next calendar year and includes a 60-day claims run out, which will allow us to inform additional individual MIPS eligible clinicians and groups of their non-patient status during the performance period.

However, based on our analysis of data from the initial segment of the non-patient facing determination period for performance periods occurring in 2017 (that is, data spanning from September 1, 2015 to August 31, 2016), we found that it may not be necessary to include a 60-day claims run out since we could achieve a similar outcome for such eligibility determinations by utilizing a 30-day claims run out. In our comparison of data analysis results utilizing a 60-day claims run out versus a 30-day claims run out, there was a 1 percent decrease in data completeness (see Table 1 for data completeness regarding comparative analysis of a 60-day and 30-day claims run out). The small decrease in data completeness would not negatively impact individual MIPS eligible clinicians or groups regarding non-patient facing determinations. We believe that a 30-day claims run out would allow us to complete the analysis and provide such determinations in a more timely manner.

TABLE 1—PERCENTAGES OF DATA COMPLETENESS FOR 60-DAY AND 30-DAY CLAIMS RUN OUT

Incurred year	30-Day claims run out*	60-Day claims run out*
2015 .....	97.1%	98.4%

\* **Note:** Completion rates are estimated and averaged at aggregated service categories and may not be applicable to subsets of these totals. For example, completion rates can vary by clinician due to claim processing practices, service mix, and post payment review activity. Completion rates vary from subsections of a calendar year; later portions of a given calendar year will be less complete than earlier ones. Completion rates vary due to variance in loading patterns due to technical, seasonal, policy, and legislative factors. Completion rates are a function of the incurred date used to process claims, and these factors will need to be updated if claims are processed on a claim from date or other methodology.

For performance periods occurring in 2018 and future years, we proposed a modification to the non-patient facing determination period, in which the initial 12-month segment of the non-patient facing determination period would span from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and include a 30-day claims run out; and the second 12-month segment of the non-patient facing determination period would span from the last 4 months of a calendar year 1 year prior to the performance period followed by the first 8 months of the performance period in the next calendar year and include a 30-day claims run out (82 FR 30022). The proposal would only change the duration of the claims run out, not the 12-month timeframes used for the first and second segments of data analysis.

For purposes of the 2020 MIPS payment year, we would initially identify individual MIPS eligible clinicians and groups who are considered non-patient facing MIPS eligible clinicians based on 12 months of data starting from September 1, 2016, to August 31, 2017. To account for the identification of additional individual MIPS eligible clinicians and groups that may qualify as non-patient facing during performance periods occurring in 2018, we would conduct another eligibility determination analysis based on 12 months of data starting from September 1, 2017, to August 31, 2018.

Similarly, for future years, we would conduct an initial eligibility determination analysis based on 12 months of data (consisting of the last 4 months of the calendar year 2 years prior to the performance period and the first 8 months of the calendar year prior

to the performance period) to determine the non-patient facing status of individual MIPS eligible clinicians and groups, and conduct another eligibility determination analysis based on 12 months of data (consisting of the last 4 months of the calendar year prior to the performance period and the first 8 months of the performance period) to determine the non-patient facing status of additional individual MIPS eligible clinicians and groups. We would not change the non-patient facing status of any individual MIPS eligible clinician or group identified as non-patient facing during the first eligibility determination analysis based on the second eligibility determination analysis. Thus, an individual MIPS eligible clinician or group that is identified as non-patient facing during the first eligibility determination analysis would continue to be considered non-patient facing for the duration of the performance period and MIPS payment year regardless of the results of the second eligibility determination analysis. We would conduct the second eligibility determination analysis to account for the identification of additional, previously unidentified individual MIPS eligible clinicians and groups that are considered non-patient facing.

Additionally, in the CY 2017 Quality Payment Program final rule (81 FR 77241), we established a policy regarding the re-weighting of the advancing care information performance category for non-patient facing MIPS eligible clinicians. Specifically, MIPS eligible clinicians who are considered to be non-patient facing will have their advancing care information performance category automatically reweighted to zero (81 FR 77241). For groups that are considered to be non-patient facing (that is, more than 75 percent of the NPIs billing under the group's TIN meet the definition of a non-patient facing individual MIPS eligible clinician) during the non-patient facing determination period, we are finalizing in section II.C.7.b.(3) of this final rule with comment period to automatically reweight their advancing care information performance category to zero. We proposed to continue applying these policies for purposes of the 2020 MIPS payment year and future years.

The following is a summary of the public comments received on the "Non-Patient Facing MIPS Eligible Clinicians" proposals and our responses:

*Comment:* Several commenters supported the policy to define non-patient facing clinicians as individual eligible clinicians billing 100 or fewer encounters, and group or virtual groups to be defined as non-patient facing if

more than 75 percent of eligible clinicians billing under the group meets the individual clinician definition. One commenter appreciated the flexibility we are demonstrating in considering the use of telehealth. Another commenter recommended we implement the same thresholds for rural and HPSA practices.

*Response:* We are finalizing for performance periods occurring in 2018 and future years that at § 414.1305 non-patient facing MIPS eligible clinician means an individual MIPS eligible clinician that bills 100 or fewer patient-facing encounters (including Medicare telehealth services defined in section 1834(m) of the Act) during the non-patient facing determination period, and a group or virtual group provided that more than 75 percent of the NPIs billing under the group's TIN or within a virtual group, as applicable, meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period.

*Comment:* Several commenters did not support the proposed definition of non-patient facing as an individual MIPS eligible clinician that bills 100 or fewer patient-facing encounters during the non-patient facing determination period, and a group provided that more than 75 percent of the NPIs billing under the group's TIN meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period. One commenter recommended that the definition of a non-patient facing clinician be defined at the individual clinician level and not be applied at a group level. Another commenter did not support applying the non-patient facing definition to pathologists using PECOS, but rather believed all pathologists should be automatically identified as non-patient facing.

*Response:* We do not agree with the commenters who did not support the proposed definition of a non-patient facing MIPS eligible clinician at the individual or group level. We weighed several options when considering the appropriate definition of non-patient facing MIPS eligible clinicians and believe we have established an appropriate threshold that provides the most appropriate representation of a non-patient facing MIPS eligible clinician. The definition of a non-patient facing MIPS eligible clinician is based on a methodology that would allow us to more accurately identify MIPS eligible clinicians who are non-patient facing by applying a threshold to recognize that a MIPS eligible clinician who furnishes almost exclusively non-

patient facing services should be treated as a non-patient facing MIPS eligible clinician despite furnishing a small number of patient-facing services. This approach also allows us to determine if an individual clinician or a group of clinicians is non-patient facing. We believe that having the determination of non-patient facing available at the individual and group level provides further flexibilities for MIPS eligible clinicians on the options available to them for participation within the program. Our methodology used to identify non-patient facing MIPS eligible clinicians included a quantitative, comparative analysis of claims and HCPCS code data. We refer commenters to CY 2017 Quality Payment Program Final Rule (81 FR 77041 through 77049) for a full discussion on the logic for which clinicians are eligible to be non-patient facing MIPS eligible clinicians. We agree and intend to provide the non-patient facing determination prior to the performance period following the non-patient facing determination period as discussed in section II.C.1.e. of this final rule with comment period. Regarding the comment disagreeing with applying the non-patient facing definition to pathologists using PECOS, we note that we are not utilizing PECOS for the non-patient facing determination, rather we utilize Part B claims data.

*Comment:* Two commenters recommended that we release all patient-facing codes through formal notice-and-comment rulemaking rather than subregulatory guidance.

*Response:* In the CY 2018 Quality Payment Program proposed rule (82 FR 30021), we noted that we consider a patient-facing encounter to be an instance in which the individual MIPS eligible clinician or group billed for items and services furnished such as general office visits, outpatient visits, and procedure codes under the PFS, and we described in detail two general categories of codes included in this list of codes, specifically, E&M codes and Surgical and Procedural codes, and our rationale for including these codes, which we proposed to continue applying for purposes of the 2020 MIPS payment year and future years. Therefore, we do not believe it is necessary to specify each individual code in notice-and-comment rulemaking. Moreover, we are unable to provide the patient-facing codes through the notice-and-comment rulemaking as the final list of Current Procedural Terminology (CPT) codes used to determine patient facing encounters are often not available in conjunction with the proposed and final rulemaking

timelines. However, we intend to publish the patient-facing codes as close to when the final rule with comment period is issued as possible and prior to the start of the performance period. We will adopt any changes to this policy through future rulemaking as necessary.

*Comment:* Several commenters supported the proposed policy on determination periods. The commenters agreed with the proposed policy to use 2 determination periods. A few commenters recommended that we notify MIPS eligible clinicians and groups prior to the start of the performance period by either including such information in the MIPS eligibility notifications sent to eligible clinicians or responding to MIPS eligible clinician or group requests for information. Two commenters recommended that we allow an appeal process or attestation by MIPS eligible clinicians for the non-patient facing designation.

*Response:* We agree with the commenters regarding the non-patient facing determination period and that MIPS eligible clinicians should be notified prior to the performance period regarding their eligibility status. In the CY 2017 Quality Payment Program final rule (81 FR 77043 through 77048), we established the non-patient facing determination period for purposes of identifying non-patient facing MIPS eligible clinicians in advance of the performance period and during the performance period using historical and performance period claims data. In addition, we would like to note that MIPS eligible clinicians may access the Quality Payment Program Web site at [www.qpp.cms.gov](http://www.qpp.cms.gov) and check if they are required to submit data to MIPS by entering their NPI into the online tool. In response to the comment regarding appeals for non-patient facing status, if a MIPS eligible clinician disagrees with the non-patient facing determination, we note that clinicians can contact the Quality Payment Program Service Center which may be reached at 1-866-288-8292 (TTY 1-877-715-6222), available Monday through Friday, 8:00 a.m.-8:00 p.m. Eastern Time or via email at [QPP@cms.hhs.gov](mailto:QPP@cms.hhs.gov). If an error in the non-patient facing determination is discovered, we will update the MIPS eligible clinicians' status accordingly.

*Final Action:* After consideration of the public comments, we are finalizing for performance periods occurring in 2018 and future years that at § 414.1305 non-patient facing MIPS eligible clinician means an individual MIPS eligible clinician that bills 100 or fewer patient-facing encounters (including Medicare telehealth services defined in section 1834(m) of the Act) during the

non-patient facing determination period, and a group or virtual group provided that more than 75 percent of the NPIs billing under the group's TIN or within a virtual group, as applicable, meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period. In addition, we are finalizing that for performance periods occurring in 2018 and future years that for purposes of non-patient facing MIPS eligible clinicians, we will utilize E&M codes and Surgical and Procedural codes for accurate identification of patient-facing encounters, and thus, accurate eligibility determinations regarding non-patient facing status. Further, we are finalizing that a patient-facing encounter is considered to be an instance in which the individual MIPS eligible clinician or group billed for items and services furnished such as general office visits, outpatient visits, and procedure codes under the PFS. Finally, we are finalizing that for performance periods occurring in 2018 and future years, that for the non-patient facing determination period, in which the initial 12-month segment of the non-patient facing determination period would span from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and include a 30-day claims run out; and the second 12-month segment of the non-patient facing determination period would span from the last 4 months of a calendar year 1 year prior to the performance period followed by the first 8 months of the performance period in the next calendar year and include a 30-day claims run out.

f. MIPS Eligible Clinicians Who Practice in Critical Access Hospitals Billing Under Method II (Method II CAHs)

In the CY 2017 Quality Payment Program final rule (81 FR 77049), we noted that MIPS eligible clinicians who practice in CAHs that bill under Method I (Method I CAHs), the MIPS payment adjustment would apply to payments made for items and services billed by MIPS eligible clinicians, but it would not apply to the facility payment to the CAH itself. For MIPS eligible clinicians who practice in Method II CAHs and have not assigned their billing rights to the CAH, the MIPS payment adjustment would apply in the same manner as for MIPS eligible clinicians who bill for items and services in Method I CAHs. As established in the CY 2017 Quality Payment Program final rule (81 FR 77051), the MIPS payment adjustment will apply to Method II CAH payments

under section 1834(g)(2)(B) of the Act when MIPS eligible clinicians who practice in Method II CAHs have assigned their billing rights to the CAH.

We refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77049 through 77051) for our discussion of MIPS eligible clinicians who practice in Method II CAHs.

g. MIPS Eligible Clinicians Who Practice in Rural Health Clinics (RHCs) or Federally Qualified Health Centers (FQHCs)

As established in the CY 2017 Quality Payment Program final rule (81 FR 77051 through 77053), services furnished by an eligible clinician under the RHC or FQHC methodology, will not be subject to the MIPS payments adjustments. As noted, these eligible clinicians have the option to voluntarily report on applicable measures and activities for MIPS, in which the data received will not be used to assess their performance for the purpose of the MIPS payment adjustment.

We refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77051 through 77053) for our discussion of MIPS eligible clinicians who practice in RHCs or FQHCs.

h. MIPS Eligible Clinicians Who Practice in Ambulatory Surgical Centers (ASCs), Home Health Agencies (HHAs), Hospice, and Hospital Outpatient Departments (HOPDs)

Section 1848(q)(6)(E) of the Act provides that the MIPS payment adjustment is applied to the amount otherwise paid under Part B with respect to the items and services furnished by a MIPS eligible clinician during a year. Some eligible clinicians may not receive MIPS payment adjustments due to their billing methodologies. If a MIPS eligible clinician furnishes items and services in an ASC, HHA, Hospice, and/or HOPD and the facility bills for those items and services (including prescription drugs) under the facility's all-inclusive payment methodology or prospective payment system methodology, the MIPS adjustment would not apply to the facility payment itself. However, if a MIPS eligible clinician furnishes other items and services in an ASC, HHA, Hospice, and/or HOPD and bills for those items and services separately, such as under the PFS, the MIPS adjustment would apply to payments made for such items and services. Such items and services would also be considered for purposes of applying the low-volume threshold. Therefore, we proposed that services furnished by an eligible clinician that are payable under

the ASC, HHA, Hospice, or HOPD methodology would not be subject to the MIPS payments adjustments (82 FR 30023). However, these eligible clinicians have the option to voluntarily report on applicable measures and activities for MIPS, in which case the data received would not be used to assess their performance for the purpose of the MIPS payment adjustment. We note that eligible clinicians who bill under both the PFS and one of these other billing methodologies (ASC, HHA, Hospice, and/or HOPD) may be required to participate in MIPS if they exceed the low-volume threshold and are otherwise eligible clinicians; in such case, the data reported would be used to determine their MIPS payment adjustment.

The following is a summary of the public comments received on the "MIPS Eligible Clinicians Who Practice in ASCs, HHAs, HOPDs" proposal and our responses:

*Comment:* A few commenters agreed with the proposal that services furnished by an eligible clinician that are payable under the ASC, HHA, Hospice, or Outpatient payment methodology would not be subject to the MIPS payment adjustments.

*Response:* We appreciate the commenters' support. We are finalizing that services furnished by an eligible clinician that are payable under the ASC, HHA, Hospice, or HOPD methodology will not be subject to the MIPS payments adjustments and that such data will not be utilized for MIPS eligibility purposes.

*Final Action:* After consideration of the public comments, we are finalizing that services furnished by an eligible clinician that are payable under the ASC, HHA, Hospice, or HOPD methodology will not be subject to the MIPS payments adjustments and that such data will not be utilized for MIPS eligibility purposes, as proposed.

i. MIPS Eligible Clinician Identifiers

As described in the CY 2017 Quality Payment Program final rule (81 FR 77057), we established the use of multiple identifiers that allow MIPS eligible clinicians to be measured as an individual or collectively through a group's performance and that the same identifier be used for all four performance categories. While we have multiple identifiers for participation and performance, we established the use of a single identifier, TIN/NPI, for applying the MIPS payment adjustment, regardless of how the MIPS eligible clinician is assessed.

(1) Individual Identifiers

As established in the CY 2017 Quality Payment Program final rule (81 FR 77058), we define a MIPS eligible clinician at § 414.1305 to mean the use of a combination of unique billing TIN and NPI combination as the identifier to assess performance of an individual MIPS eligible clinician. Each unique TIN/NPI combination is considered a different MIPS eligible clinician, and MIPS performance is assessed separately for each TIN under which an individual bills.

(2) Group Identifiers for Performance

As established in the CY 2017 Quality Payment Program final rule (81 FR 77059), we codified the definition of a group at § 414.1305 to mean a group that consists of a single TIN with two or more eligible clinicians (including at least one MIPS eligible clinician), as identified by their individual NPI, who have reassigned their billing rights to the TIN.

(3) APM Entity Group Identifiers for Performance

As described in the CY 2017 Quality Payment Program final rule (81 FR 77060), we established that each eligible clinician who is a participant of an APM Entity is identified by a unique APM participant identifier. The unique APM participant identifier is a combination of four identifiers: (1) APM Identifier (established by CMS; for example, XXXXXX); (2) APM Entity identifier (established under the APM by CMS; for example, AA00001111); (3) TIN(s) (9 numeric characters; for example, XXXXXXXXXXX); (4) EP NPI (10 numeric characters; for example, 1111111111). We codified the definition of an APM Entity group at § 414.1305 to mean a group of eligible clinicians participating in an APM Entity, as identified by a combination of the APM identifier, APM Entity identifier, TIN, and NPI for each participating eligible clinician.

2. Exclusions

a. New Medicare-Enrolled Eligible Clinician

As established in the CY 2017 Quality Payment Program final rule (81 FR 77061 through 77062), we defined a new Medicare-enrolled eligible clinician at § 414.1305 as a professional who first becomes a Medicare-enrolled eligible clinician within the PECOS during the performance period for a year and had not previously submitted claims under Medicare such as an individual, an entity, or a part of a clinician group or under a different billing number or tax identifier. Additionally, we established

at § 414.1310(c) that these eligible clinicians will not be treated as a MIPS eligible clinician until the subsequent year and the performance period for such subsequent year. We established at § 414.1310(d) that in no case would a MIPS payment adjustment apply to the items and services furnished during a year by new Medicare-enrolled eligible clinicians for the applicable performance period.

We used the term “new Medicare-enrolled eligible clinician determination period” to refer to the 12 months of a calendar year applicable to the performance period. During the new Medicare-enrolled eligible clinician determination period, we conduct eligibility determinations on a quarterly basis to the extent that is technically feasible to identify new Medicare-enrolled eligible clinicians that would be excluded from the requirement to participate in MIPS for the applicable performance period.

**b. Qualifying APM Participant (QP) and Partial Qualifying APM Participant (Partial QP)**

In the CY 2017 Quality Payment Program final rule (81 FR 77062), we established at § 414.1305 that a QP (as defined at § 414.1305) is not a MIPS eligible clinician, and therefore, is excluded from MIPS. Also, we established that a Partial QP (as defined at § 414.1305) who does not report on applicable measures and activities that are required to be reported under MIPS for any given performance period in a year is not a MIPS eligible clinician, and therefore, is excluded from MIPS.

**c. Low-Volume Threshold**

Section 1848(q)(1)(C)(ii)(III) of the Act provides that the definition of a MIPS eligible clinician does not include eligible clinicians who are below the low-volume threshold selected by the Secretary under section 1848(q)(1)(C)(iv) of the Act for a given year. Section 1848(q)(1)(C)(iv) of the Act requires the Secretary to select a low-volume threshold to apply for the purposes of this exclusion which may include one or more of the following: (1) The minimum number, as determined by the Secretary, of Part B-enrolled individuals who are treated by the eligible clinician for a particular performance period; (2) the minimum number, as determined by the Secretary, of items and services furnished to Part B-enrolled individuals by the eligible clinician for a particular performance period; and (3) the minimum amount, as determined by the Secretary, of allowed charges billed by the eligible clinician for a particular performance period.

In the CY 2017 Quality Payment Program final rule (81 FR 77069 through 77070), we defined MIPS eligible clinicians or groups who do not exceed the low-volume threshold at § 414.1305 as an individual MIPS eligible clinician or group who, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$30,000 or provides care for 100 or fewer Part B-enrolled Medicare beneficiaries. We established at § 414.1310(b) that for a year, eligible clinicians who do not exceed the low-volume threshold (as defined at § 414.1305) are excluded from MIPS for the performance period for a given calendar year.

In the CY 2017 Quality Payment Program final rule (81 FR 77069 through 77070), we defined the low-volume threshold determination period to mean a 24-month assessment period, which includes a two-segment analysis of claims data during an initial 12-month period prior to the performance period followed by another 12-month period during the performance period. The initial 12-month segment of the low-volume threshold determination period spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 60-day claims run out, which allows us to inform eligible clinicians and groups of their low-volume status during the month (December) prior to the start of the performance period. The second 12-month segment of the low-volume threshold determination period spans from the last 4 months of a calendar year 1 year prior to the performance period followed by the first 8 months of the performance period in the next calendar year and includes a 60-day claims run out, which allows us to inform additional eligible clinicians and groups of their low-volume status during the performance period.

We recognize that individual MIPS eligible clinicians and groups that are small practices or practicing in designated rural areas face unique dynamics and challenges such as fiscal limitations and workforce shortages, but serve as a critical access point for care and provide a safety net for vulnerable populations. Claims data shows that approximately 15 percent of individual MIPS eligible clinicians (TIN/NPIs) are considered to be practicing in rural areas after applying all exclusions. Also, we have heard from stakeholders that MIPS eligible clinicians practicing in small practices and designated rural areas tend to have a patient population with a higher proportion of older adults, as well as higher rates of poor health

outcomes, co-morbidities, chronic conditions, and other social risk factors, which can result in the costs of providing care and services being significantly higher compared to non-rural areas. We also have heard from many solo practitioners and small practices that still face challenges and additional resource burden in participating in the MIPS.

In the CY 2017 Quality Payment Program final rule, we did not establish an adjustment for social risk factors in assessing and scoring performance. In response to the CY 2017 Quality Payment Program final rule, we received public comments indicating that individual MIPS eligible clinicians and groups practicing in designated rural areas would be negatively impacted and at a disadvantage if assessment and scoring methodology did not adjust for social risk factors. Additionally, commenters expressed concern that such individual MIPS eligible clinicians and groups may be disproportionately more susceptible to lower performance scores across all performance categories and negative MIPS payments adjustments, and as a result, such outcomes may further strain already limited fiscal resources and workforce shortages, and negatively impact access to care (reduction and/or elimination of available services).

After the consideration of stakeholder feedback, we proposed to modify the low-volume threshold policy established in the CY 2017 Quality Payment Program final rule (82 FR 30024). We stated that we believe that increasing the dollar amount and beneficiary count of the low-volume threshold would further reduce the number of eligible clinicians that are required to participate in the MIPS, which would reduce the burden on individual MIPS eligible clinicians and groups practicing in small practices and designated rural areas. Based on our analysis of claims data, we found that increasing the low-volume threshold to exclude individual eligible clinicians or groups that have Medicare Part B allowed charges less than or equal to \$90,000 or that provide care for 200 or fewer Part B-enrolled Medicare beneficiaries will exclude approximately 134,000 additional clinicians from MIPS from the approximately 700,000 clinicians that would have been eligible based on the low-volume threshold that was finalized in the CY 2017 Quality Payment Program final rule. Almost half of the additionally excluded clinicians are in small practices, and approximately 17 percent are clinicians from practices in designated rural areas. Applying this

criterion decreases the percentage of the MIPS eligible clinicians that come from small practices. For example, prior to any exclusions, clinicians in small practices represent 35 percent of all clinicians billing Part B services. After applying the eligibility criteria for the CY 2017 Quality Payment Program final rule, MIPS eligible clinicians in small practices represent approximately 27 percent of the clinicians eligible for MIPS; however, with the increased low-volume threshold, approximately 22 percent of the clinicians eligible for MIPS are from small practices. In our analysis, the proposed changes to the low-volume threshold showed little impact on MIPS eligible clinicians from practices in designated rural areas. MIPS eligible clinicians from practices in designated rural areas account for 15 to 16 percent of the total MIPS eligible clinician population. We note that, due to data limitations, we assessed rural status based on the status of individual TIN/NPI and did not model any group definition for practices in designated rural areas.

We believe that increasing the number of such individual eligible clinicians and groups excluded from MIPS participation would reduce burden and mitigate, to the extent feasible, the issue surrounding confounding variables impacting performance under the MIPS. Therefore, beginning with the 2018 MIPS performance period, we proposed to increase the low-volume threshold. Specifically, at § 414.1305, we proposed to define an individual MIPS eligible clinician or group who does not exceed the low-volume threshold as an individual MIPS eligible clinician or group who, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$90,000 or provides care for 200 or fewer Part B-enrolled Medicare beneficiaries. This would mean that approximately 37 percent of individual eligible clinicians and groups would be eligible for MIPS based on the low-volume threshold exclusion (and the other exclusions). However, approximately 65 percent of Medicare payments would still be captured under MIPS as compared to 72.2 percent of Medicare payments under the CY 2017 Quality Payment Program final rule.

We recognize that increasing the dollar amount and beneficiary count of the low-volume threshold would increase the number of individual eligible clinicians and groups excluded from MIPS. We assessed various levels of increases and found that \$90,000 as the dollar amount and 200 as the beneficiary count balances the need to account for individual eligible

clinicians and groups who face additional participation burden while not excluding a significant portion of the clinician population.

Eligible clinicians who do not exceed the low-volume threshold (as defined at § 414.1305) are excluded from MIPS for the performance period with respect to a year. The low-volume threshold also applies to eligible clinicians who practice in APMs under the APM scoring standard at the APM Entity level, in which APM Entities do not exceed the low-volume threshold. In such cases, the eligible clinicians participating in the MIPS APM Entity would be excluded from the MIPS requirements for the applicable performance period and not subject to a MIPS payment adjustment for the applicable year. Such an exclusion would not affect an APM Entity's QP determination if the APM Entity is an Advanced APM.

In the CY 2017 Quality Payment Program final rule, we established the low-volume threshold determination period to refer to the timeframe used to assess claims data for making eligibility determinations for the low-volume threshold exclusion (81 FR 77069 through 77070). We defined the low-volume threshold determination period to mean a 24-month assessment period, which includes a two-segment analysis of claims data during an initial 12-month period prior to the performance period followed by another 12-month period during the performance period. Based on our analysis of data from the initial segment of the low-volume threshold determination period for performance periods occurring in 2017 (that is, data spanning from September 1, 2015 to August 31, 2016), we found that it may not be necessary to include a 60-day claims run out since we could achieve a similar outcome for such eligibility determinations by utilizing a 30-day claims run out.

In our comparison of data analysis results utilizing a 60-day claims run out versus a 30-day claims run out, there was a 1 percent decrease in data completeness. The small decrease in data completeness would not substantially impact individual MIPS eligible clinicians or groups regarding low-volume threshold determinations. We believe that a 30-day claims run out would allow us to complete the analysis and provide such determinations in a more timely manner. For performance periods occurring in 2018 and future years, we proposed a modification to the low-volume threshold determination period, in which the initial 12-month segment of the low-volume threshold determination period would span from

the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and include a 30-day claims run out; and the second 12-month segment of the low-volume threshold determination period would span from the last 4 months of a calendar year 1 year prior to the performance period followed by the first 8 months of the performance period in the next calendar year and include a 30-day claims run out (82 FR 30025). We stated that the proposal would only change the duration of the claims run out, not the 12-month timeframes used for the first and second segments of data analysis.

For purposes of the 2020 MIPS payment year, we would initially identify individual eligible clinicians and groups that do not exceed the low-volume threshold based on 12 months of data starting from September 1, 2016 to August 31, 2017. To account for the identification of additional individual eligible clinicians and groups that do not exceed the low-volume threshold during performance periods occurring in 2018, we would conduct another eligibility determination analysis based on 12 months of data starting from September 1, 2017 to August 31, 2018. We would not change the low-volume status of any individual eligible clinician or group identified as not exceeding the low-volume threshold during the first eligibility determination analysis based on the second eligibility determination analysis. Thus, an individual eligible clinician or group that is identified as not exceeding the low-volume threshold during the first eligibility determination analysis would continue to be excluded from MIPS for the duration of the performance period regardless of the results of the second eligibility determination analysis. We established our policy to include two eligibility determination analyses in order to prevent any potential confusion for an individual eligible clinician or group to know whether or not participate in MIPS; also, such policy makes it clear from the onset as to which individual eligible clinicians and groups would be required to participate in MIPS. We would conduct the second eligibility determination analysis to account for the identification of additional, previously unidentified individual eligible clinicians and groups who do not exceed the low-volume threshold. We note that low-volume threshold determinations are made at the individual and group level, and not at the virtual group level.

As noted above, section 1848(q)(1)(C)(iv) of the Act requires the

Secretary to select a low-volume threshold to apply for the purposes of this exclusion which may include one or more of the following: (1) The minimum number, as determined by the Secretary, of Part B-enrolled individuals who are treated by the eligible clinician for a particular performance period; (2) the minimum number, as determined by the Secretary, of items and services furnished to Part B-enrolled individuals by the eligible clinician for a particular performance period; and (3) the minimum amount, as determined by the Secretary, of allowed charges billed by the eligible clinician for a particular performance period. We have established a low-volume threshold that accounts for the minimum number of Part-B enrolled individuals who are treated by an eligible clinician and that accounts for the minimum amount of allowed charges billed by an eligible clinician. We did not make proposals specific to a minimum number of items and service furnished to Part-B enrolled individuals by an eligible clinician.

In order to expand the ways in which claims data could be analyzed for purposes of determining a more comprehensive assessment of the low-volume threshold, we have assessed the option of establishing a low-volume threshold for items and services furnished to Part-B enrolled individuals by an eligible clinician. We have considered defining items and services by using the number of patient encounters or procedures associated with a clinician. Defining items and services by patient encounters would assess each patient per visit or encounter with the eligible clinician. We believe that defining items and services by using the number of patient encounters or procedures is a simple and straightforward approach for stakeholders to understand. However, we are concerned that using this unit of analysis could incentivize clinicians to focus on volume of services rather than the value of services provided to patients. Defining items and services by procedure would tie a specific clinical procedure furnished to a patient to a clinician. We solicited public comment on the methods of defining items and services furnished by clinicians described in this paragraph above and alternate methods of defining items and services (82 FR 30025 through 30026).

For the individual eligible clinicians and groups that would be excluded from MIPS participation as a result of an increased low-volume threshold, we believe that in future years it would be beneficial to provide, to the extent feasible, such individual eligible clinicians and groups with the option to

opt-in to MIPS participation if they might otherwise be excluded under the low-volume threshold, such as where they only meet one of the threshold determinations (including a third determination based on Part B items and services, if established). For example, if a clinician meets the low-volume threshold of \$90,000 in allowed charges, but does not meet the threshold of 200 patients or, if established, the threshold pertaining to Part B items and services, we believe the clinician should, to the extent feasible, have the opportunity to choose whether or not to participate in the MIPS and be subject to MIPS payment adjustments. We recognize that this choice would present additional complexity to clinicians in understanding all of their available options and may impose additional burden on clinicians by requiring them to notify us of their decision. Because of these concerns and our desire to establish options in a way that is a low-burden and user-focused experience for all MIPS eligible clinicians, we would not be able to offer this additional flexibility until performance periods occurring in 2019. Therefore, as a means of expanding options for clinicians and offering them the ability to participate in MIPS if they otherwise would not be included, for the purposes of the 2021 MIPS payment year, we proposed to provide clinicians the ability to opt-in to the MIPS if they meet or exceed one, but not all, of the low-volume threshold determinations, including as defined by dollar amount, beneficiary count or, if established, items and services (82 FR 30026).

We note that there may be additional considerations we should address for scenarios in which an individual eligible clinician or a group does not exceed the low-volume threshold and opts-in to participate in MIPS. We therefore sought comment on any additional considerations we should address when establishing this opt-in policy. Additionally, we note that there is the potential with this opt-in policy for there to be an impact on our ability to create quality benchmarks that meet our sample size requirements. For example, if particularly small practices or solo practitioners with low Part B beneficiary volumes opt-in, such clinicians may lack sufficient sample size to be scored on many quality measures, especially measures that do not apply to all of a MIPS eligible clinician's patients. We therefore sought comment on how to address any potential impact on our ability to create quality benchmarks that meet our sample size requirements (82 FR 30026).

The following is a summary of the public comments received on the "Low-Volume Threshold" proposals and our responses:

*Comment:* Many commenters supported raising the low-volume threshold to exclude an individual MIPS eligible clinician or group who, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$90,000 or provides care for 200 or fewer Part B-enrolled Medicare beneficiaries. Several commenters further suggested that we retroactively apply the threshold to the 2017 MIPS performance period because changing the low-volume threshold for the 2018 MIPS performance period would create confusion, complicate operational and strategic planning for eligible clinicians, and create inefficiencies for clinicians. One commenter noted that we has not yet issued the required second round of reports notifying MIPS eligible clinicians whether they are below the low-volume threshold, so it would be technically feasible to implement the lower threshold before the end of the CY 2017 reporting period. A few commenters supported the proposal but recommended that we maintain the current, lower low-volume threshold for at least 2, 3, or more years to allow for planning and investment by clinicians in the program.

*Response:* We appreciate the support from commenters who supported raising the low-volume threshold. We are finalizing our proposal to define at § 414.1305 an individual eligible clinician or group that does not exceed the low-volume threshold as an individual eligible clinician or group that, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$90,000 or provides care for 200 or fewer Part B-enrolled Medicare beneficiaries. We do not believe that we have the flexibility to retroactively apply the revised low-volume threshold to the 2017 MIPS performance period threshold. We are aware that by finalizing this policy, some MIPS eligible clinicians who were eligible to participate in MIPS for Year 1 will be excluded for Year 2. However, we would like to note that those MIPS eligible clinicians may still participate in Year 1. Finally, we agree with the commenter that there are benefits of maintaining the same low-volume threshold for several years and will take this into consideration in future years.

*Comment:* Several commenters did not support the proposed low-volume threshold because the commenters believed the low-volume threshold

should be raised further to exclude more clinicians. Several of those commenters specifically recommended that we set the threshold no lower than \$100,000 in Medicare Part B charges and to only apply to practices with 10 or fewer eligible clinicians.

*Response:* We disagree with the commenters regarding raising the low-volume threshold further. Based on our data analysis, applying the proposed criterion decreases the percentage of MIPS eligible clinicians that come from small practices. We note that from our updated data models we found that the revised low-volume threshold will exclude approximately 123,000 additional clinicians from MIPS from the approximately 744,000 clinicians that would have been eligible based on the low-volume threshold that was finalized in the CY 2017 Quality Payment Program final rule. We believe that if we were to raise the low-volume threshold further, we may prevent medium size practices that wish to participate from the opportunity to receive an upward adjustment and would have fewer clinicians engaged in value-based care. We believe the finalized low-volume threshold strikes the appropriate balance with the need to account for individual MIPS eligible clinicians and groups who face additional participation burden while not excluding a significant portion of the clinician population. We are finalizing the low-volume threshold to exclude an individual eligible clinician or group that, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$90,000 or provides care for 200 or fewer Part B-enrolled Medicare beneficiaries.

*Comment:* Many commenters did not support raising the low-volume threshold for the 2018 MIPS performance period because they believed it would be unfair to clinicians who were already participating or planned to participate in MIPS in future years. The commenters noted that clinicians may have already invested in MIPS participation. Many commenters did not support the proposed low-volume threshold because they believed that raising the low-volume threshold would reduce payment and incentives for excluded clinicians to participate in value-based care, which would create additional quality and reimbursement disparities for the beneficiaries seen by the excluded clinicians, creating a 2-tiered system of clinicians and related beneficiaries that are participating in value-based care. The commenters noted that raising the low-volume threshold would signal to the industry

that we are not focused on transitioning to value-based payment and care. A few commenters expressed concern that raising the low-volume threshold would create further disparities in quality between urban and rural clinicians based on the reduced incentives for rural clinicians to participate in value-based purchasing programs. One of these commenters strongly recommended that we study the impact on the rural health industry prior to implementing the increased low-volume threshold. Many commenters noted that excluding more clinicians would risk dismantling the EHR infrastructure that has developed over recent years as additional practices opt-out of participation in programs designed to increase adoption and use of EHRs, wasting the billions of dollars we have invested to date in EHRs. The commenters believed that reduction in use of EHRs will affect participating clinicians as well by hampering connectivity and information sharing between excluded clinicians and participating clinicians. Some commenters also stated that decreased investment in EHRs by excluded clinicians will drive greater disparities in care quality between clinicians who are engaged in value-based purchasing and those who are not. One commenter strongly recommended that we delay implementation of the proposed low-volume threshold. Another commenter recommended that, rather than exclude clinicians from MIPS, we should allow clinicians to continue the pick-your-pace approach and continue participating in MIPS.

*Response:* We acknowledge there will be MIPS eligible clinicians who were eligible for Year 1 of MIPS that are no longer eligible for Year 2 of MIPS. However, from our analyses, the MIPS eligible clinicians affected are mainly smaller practices and practices in rural areas, many of which have raised concerns regarding their ability to participate in MIPS. We want to encourage all clinicians to participate in value-based care within the MIPS; however, we have continued to hear from practices that challenges to participation in the Quality Payment Program still exist. Therefore, we believe it is appropriate to raise the low-volume threshold to not require these practices to participate in the program. However, we will review the impacts of this policy to determine if it should remain. We do not believe that raising the low-volume threshold will cause quality disparities between urban and rural practices. With the increased low-volume threshold, additional practices

will not be required to participate in the Quality Payment Program; however, we still encourage all clinicians to provide high-value care to their patients. The goal of raising the low-volume threshold is to reduce burden on small practices, and we do not believe it will create a 2-tiered system. We appreciate the suggestion to study the impact on the rural health industry before finalizing this policy. We do not believe a study is necessary prior to finalizing this policy; rather, we believe that there is sufficient evidence from stakeholder feedback to reflect the value of increasing the low-volume threshold at this time. We do not agree that this policy would risk dismantling the EHR infrastructure. We believe that the low-volume threshold in Year 2 provides MIPS eligible clinicians and groups, particularly those in smaller practices and rural areas, that do not exceed the low-volume threshold with additional time to further invest in their EHR infrastructure to gain experience in implementing and utilizing an EHR infrastructure to meet their needs and prepare for their potential participation in MIPS in future years while not being subject to the possibility of a negative payment adjustment. We believe that clinicians and patients benefit from the utilization and capabilities of an EHR infrastructure and would continue to utilize this technology. In addition, we do not believe we should delay implementation of this policy as it reduces the burden on individual MIPS eligible clinicians and those in small practices and in some rural areas. The intention of the Year 1 pick-your-pace policies were to set the foundation for MIPS to support long-term, high quality patient care through feedback by lowering the barriers to participation. Year 2 continues this transition as we are providing a gradual ramp-up of the program and of the performance thresholds. For the low-volume threshold, we are finalizing our proposal to increase the threshold, which excludes more eligible clinicians from MIPS. Specifically, we are finalizing our proposal to exclude an individual eligible clinician or group that, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$90,000 or provides care for 200 or fewer Part B-enrolled Medicare beneficiaries.

*Comment:* Many commenters did not support the proposed low-volume threshold because it is based on the amount of Medicare billings from clinicians or number of beneficiaries. Instead, the commenters offered

recommendations for alternative ways of applying the low-volume threshold. Many commenters recommended that we exclude all practices with 15 or fewer clinicians. Several commenters recommended redefining the low-volume threshold so that it would mirror the policy for non-patient facing eligible clinicians by excluding a group from MIPS if 75 percent or more of its eligible clinicians individually fall below the low-volume threshold or if the group's average Medicare allowed charges or Medicare patient population falls below the threshold. The commenters noted that this would align status determinations across the Quality Payment Program and reduce complexity and burden. One commenter recommended excluding: Practices with less than \$100,000 per clinician in Medicare charges not including Part B drug costs; practices with 10 or fewer clinicians; and rural clinicians practicing in an area with fewer than 100 clinicians per 100,000 population. The commenter further encouraged us to consider excluding specialists who practice in ZIP codes or other geographic areas with low per capita numbers of clinicians in their specialty per population. One commenter recommended that we establish 2 different low-volume thresholds for primary care and specialty care clinicians. Another commenter recommended using a percentage of Medicare charges to total charges and a percentage of Medicare patients to total patients as opposed to the use of claims and patients. One commenter noted that the low-volume threshold's inclusion of beneficiaries creates an incentive for clinicians to turn away Medicare beneficiaries in order to fall below the low-volume threshold. Another commenter recommended that we exclude all clinicians who have elected to have non-participation status for Medicare. As an alternative to raising the low-volume threshold, one commenter recommended that we reduce the reporting requirement for small practices or for those practices between the previous threshold of \$30,000 and 100 beneficiaries to \$90,000 and 200 beneficiaries. Several commenters specifically did not support that a group could meet the low-volume threshold based on services provided by a small percentage of the clinicians in the group. A few commenters recommended that we exclude individuals who do not meet the low-volume threshold, even if the group practice otherwise met the low-volume threshold.

*Response:* We note that some of the suggestions provided are not compliant with the statute, specifically, the suggestions on basing the low-volume threshold exclusion on practice size, practice location and specialty characteristics. We note that section 1848(q)(1)(C)(iv) of the Act requires the Secretary to select a low-volume threshold to apply for the purposes of this exclusion which may include one or more of the following: (1) The minimum number, as determined by the Secretary, of Part B-enrolled individuals who are treated by the eligible clinician for a particular performance period; (2) the minimum number, as determined by the Secretary, of items and services furnished to Part B-enrolled individuals by the eligible clinician for a particular performance period; and (3) the minimum amount, as determined by the Secretary, of allowed charges billed by the eligible clinician for a particular performance period. We do not believe the statute provides discretion in establishing exclusions other than the three exclusions specified above. Additionally, for the commenters suggestion to use a percentage of Medicare charges to total charges and a percentage of Medicare patients to total patients as opposed to the use of a minimum number of claims and patients, we will take this suggestion under consideration for future rulemaking. In regards to the commenters suggestion to exclude all clinicians from MIPS that have non-participation status within Medicare, we note that these clinicians may still fall within the definition of a MIPS eligible clinician at § 414.1305. However, as provided in § 414.1310(d), in no case will a MIPS payment adjustment apply to the items and services furnished during a year by clinicians who are not MIPS eligible clinicians.

We note that the low-volume threshold is different from the other exclusions in that it is not determined solely based on the individual NPI status, it is based on both the TIN/NPI (to determine an exclusion at the individual level) and TIN (to determine an exclusion at the group level) status. In regard to group-level reporting, the group, as a whole, is assessed to determine if the group (TIN) exceeds the low-volume threshold. Thus, eligible clinicians (TIN/NPI) who do not exceed the low-volume threshold at the individual reporting level and would otherwise be excluded from MIPS participation at the individual level, would be required to participate in MIPS at the group level if such eligible clinicians are part of a group reporting

at the group level that exceeds the low-volume threshold. In the CY 2017 Quality Payment Program final rule (82 FR 77071) we considered aligning how MIPS exclusions would be applied at the group level. We recognized that alignment would provide a uniform application across exclusions and offer simplicity, but we also believed that it is critical to ensure that there are opportunities encouraging coordination, teamwork, and shared responsibility within groups. In order to encourage coordination, teamwork, and shared responsibility at the group level, we finalized that we would assess the low-volume threshold so that all clinicians within the group have the same status: all clinicians collectively exceed the low-volume threshold or they do not exceed the low-volume threshold. We appreciate the other concerns and recommendations provided by the commenters. We received a range of suggestions and considered the various options. We are finalizing our proposal to exclude an individual MIPS eligible clinician or group that, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$90,000 or provides care for 200 or fewer Part B-enrolled Medicare beneficiaries. In this final rule with comment period, we are requesting additional comments regarding the application of low-volume threshold at the group level.

*Comment:* Many commenters supported the proposed policy to provide clinicians the ability to opt-in to the MIPS if they meet or exceed one, but not all, of the low-volume threshold determinations, including as defined by dollar amount, beneficiary count, or, if established, items and services beginning with the 2019 MIPS performance period. Other commenters supported applying the opt-in based on the Medicare Part B charges criterion, but not the Medicare beneficiary criterion. Several commenters supported the proposal to allow opt-in but requested that the policy be retroactively applied to the 2017 MIPS performance period. A few commenters supported the proposed opt-in option but recommended that we establish separate performance benchmarks for excluded individuals or groups that opt-in. Other commenters recommended that we shield opt-in clinicians so that they can avoid a negative payment adjustment or other disadvantages of participation.

*Response:* We appreciate the support of the proposed policy to provide clinicians the ability to opt-in to the MIPS if they meet or exceed one, but not all, of the low-volume threshold

determinations, including as defined by dollar amount, beneficiary count, or, if established, items and services beginning with the 2019 MIPS performance period. However, we are not finalizing this proposal for the 2019 MIPS performance period. We are concerned that we will not be able to operationalize this policy in a low-burden manner to MIPS eligible clinicians as currently proposed. Specifically, our goal is to implement a process whereby a clinician can be made aware of their low-volume threshold status and make an informed decision on whether they will participate in MIPS or not. We believe it is critical to implement a process that provides the least burden to clinicians in communicating this decision to us. Therefore, in this final rule with comment period, we are seeking additional comments on the best approach of implementing a low-volume threshold opt-in policy. As we plan to revisit this policy in the 2018 notice-and-comment rulemaking cycle. This additional time and additional public comments will give us the opportunity to explore how best to implement this policy and to perform additional analyses. We do not agree that we should allow any MIPS eligible clinicians that meet the low-volume threshold exclusion from any criterion to opt-in to MIPS, as it may impact our ability to create quality performance benchmarks that meet our sample size requirements. For example, if particularly small practices or solo practitioners with low Part B beneficiary volumes opt-in, such clinician's may lack sufficient sample size to be scored on many quality measures, especially measures that do not apply to all of a MIPS eligible clinician's patients. In addition, we do not believe MIPS eligible clinicians who opt-in should have different performance benchmarks nor avoid a negative payment adjustment. If the MIPS eligible clinician decides to opt-in, then they are committing to participating in the entire program, which would include being assessed on the same criteria as other MIPS eligible clinicians.

*Comment:* A few commenters opposed the proposed policy to provide clinicians the ability to opt-in to the MIPS if they meet or exceed one, but not all, of the low-volume threshold determinations, including as defined by dollar amount, beneficiary count, or, if established, items and services beginning with the 2019 MIPS performance period. One commenter believed that an opt-in policy would complicate the program's ability to

accurately evaluate clinician performance, which may result in unequal outcomes based on clinician participation at the individual- or group-level and specialty types. The commenter recommended that we fully evaluate the effect of the opt-in policy prior to implementing any changes.

*Response:* We agree with the commenters' concerns and acknowledge that allowing an opt-in option may present additional complexity and could inadvertently create a model where only high-performers opt-in. Therefore, we are not finalizing this proposal for the 2019 MIPS performance period. Rather, we are seeking further comment on the best approach to implementing the low-volume opt-in policy. This additional time will give us the opportunity to perform additional analyses. We intend to revisit this policy in the 2018 notice-and-comment rulemaking cycle.

*Comment:* Several commenters supported the current low-volume threshold assessment period and proposal to use a 30-day claims run out. One commenter agreed with retaining the low-volume threshold status if triggered during the first 12-month determination period regardless of the status resulting from the second 12-month determination period. Another commenter did not support the use of a determination period for low-volume threshold that is outside of the performance period and believed that only data overlapping the performance period should be used to determine low-volume threshold status.

*Response:* We appreciate the commenters' support of the low-volume threshold determination period and the proposed use of a 30-day claims run out. We believe that it is beneficial for MIPS eligible clinicians to know whether they are excluded under the low-volume threshold prior to the start of the performance period. In order to identify these MIPS eligible clinicians prior to the start of the performance period, we must use historical data that is outside of the performance period. We refer commenters to the CY 2017 Quality Payment Program final rule (82 FR 77069 through 77070) for a full discussion of this policy.

*Final Action:* After consideration of the public comments, we are finalizing our proposal to define at § 414.1305 an individual eligible clinician or group that does not exceed the low-volume threshold as an individual eligible clinician or group that, during the low-volume threshold determination period, has Medicare Part B allowed charges less than or equal to \$90,000 or provides care for 200 or fewer Part B-enrolled

Medicare beneficiaries. In addition, for performance periods occurring in 2018 and future years, we are finalizing a modification to the low-volume threshold determination period, in which the initial 12-month segment of the low-volume threshold determination period would span from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and include a 30-day claims run out; and the second 12-month segment of the low-volume threshold determination period would span from the last 4 months of a calendar year, 1 year prior to the performance period followed by the first 8 months of the performance period in the next calendar year and include a 30-day claims run out. In addition, in this final rule with comment period, we are seeking further comment on the best approach to implementing a low-volume threshold opt-in policy. We welcome suggestions on ways to implement the low-volume threshold opt-in that does not add additional burden to clinicians. We also are interested in receiving feedback on ways to mitigate our concern that only high-performers will choose to opt-in. We also are soliciting comment on whether our current application of the low-volume threshold to groups is still appropriate. We refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77062 through 77070) for a discussion on how the low-volume threshold is currently applied to groups.

### 3. Group Reporting

#### a. Background

As discussed in the CY 2017 Quality Payment Program final rule, we established the following requirements for groups (81 FR 77072):

- Individual eligible clinicians and individual MIPS eligible clinicians will have their performance assessed as a group as part of a single TIN associated with two or more eligible clinicians (including at least one MIPS eligible clinician), as identified by an NPI, who have reassigned their Medicare billing rights to the TIN (at § 414.1310(e)(1)).
- A group must meet the definition of a group at all times during the performance period for the MIPS payment year in order to have its performance assessed as a group (at § 414.1310(e)(2)).
- Individual eligible clinicians and individual MIPS eligible clinicians within a group must aggregate their performance data across the TIN to have their performance assessed as a group (at § 414.1310(e)(3)).

- A group that elects to have its performance assessed as a group will be assessed as a group across all four MIPS performance categories (at § 414.1310(e)(4)).

We stated in the CY 2017 Quality Payment Program final rule that groups attest to their group size for purpose of using the CMS Web Interface or identifying as a small practice (81 FR 77057). In section II.C.1.c. of this final rule with comment period, we are finalizing our proposal to modify the way in which we determine small practice size by establishing a process under which CMS would utilize claims data to make small practice size determinations. In addition, in section II.C.4.e. of this final rule comment period, we are finalizing our proposal to establish a policy under which CMS would utilize claims data to determine group size for groups of 10 or fewer eligible clinicians seeking to form or join a virtual group.

As noted in the CY 2017 Quality Payment Program final rule, group size would be determined before exclusions are applied (81 FR 77057). We note that group size determinations are based on the number of NPIs associated with a TIN, which would include individual eligible clinicians (NPIs) who may be excluded from MIPS participation and do not meet the definition of a MIPS eligible clinician.

#### b. Registration

As discussed in the CY 2017 Quality Payment Program final rule (81 FR 77072 through 77073), we established the following policies:

- A group must adhere to an election process established and required by CMS (§ 414.1310(e)(5)), which includes:

- ++ Groups will not be required to register to have their performance assessed as a group except for groups submitting data on performance measures via participation in the CMS Web Interface or groups electing to report the CAHPS for MIPS survey for the quality performance category. For all other data submission mechanisms, groups must work with appropriate third party intermediaries as necessary to ensure the data submitted clearly indicates that the data represent a group submission rather than an individual submission.

- ++ In order for groups to elect participation via the CMS Web Interface or administration of the CAHPS for MIPS survey, such groups must register by June 30 of the applicable performance period (that is, June 30, 2018, for performance periods occurring in 2018). We note that groups participating in APMs that require APM

Entities to report using the CMS Web Interface are not required to register for the CMS Web Interface or administer the CAHPS for MIPS survey separately from the APM.

When groups submit data utilizing third party intermediaries, such as a qualified registry, QCDR, or EHR, we are able to obtain group information from the third party intermediary and discern whether the data submitted represents group submission or individual submission once the data are submitted.

In the CY 2017 Quality Payment Program final rule (81 FR 77072 through 77073), we discussed the implementation of a voluntary registration process if technically feasible. Since the publication of the CY 2017 Quality Payment Program final rule, we have determined that it is not technically feasible to develop and build a voluntary registration process. Until further notice, we are not implementing a voluntary registration process.

Also, in the CY 2017 Quality Payment Program final rule (81 FR 77075), we expressed our commitment to pursue the active engagement of stakeholders throughout the process of establishing and implementing virtual groups. Please refer to the CY 2018 Quality Payment Program proposed rule (82 FR 30027) for a full discussion of the public comments and additional stakeholder feedback we received in response to the CY 2017 Quality Payment Program final rule and additional stakeholder feedback gathered through hosting several virtual group listening sessions and convening user groups.

As discussed in the CY 2018 Quality Payment Program proposed rule (82 FR 30027), one of the overarching themes we have heard is that we make an option available to groups that would allow a portion of a group to report as a separate subgroup on measures and activities that are more applicable to the subgroup and be assessed and scored accordingly based on the performance of the subgroup. In future rulemaking, we intend to explore the feasibility of establishing group-related policies that would permit participation in MIPS at a subgroup level and create such functionality through a new identifier. Therefore, we solicited public comment on the ways in which participation in MIPS at the subgroup level could be established. In addition, in this final rule with comment period, we are seeking comment on additional ways to define a group, not solely based on a TIN. For example, redefining a group to allow for practice sites to be reflected and/or for specialties within a TIN to create groups.

We received several comments on subgroup level policies and will take them into consideration for future rulemaking.

#### 4. Virtual Groups

##### a. Background

There are generally three ways to participate in MIPS: (1) Individual-level reporting; (2) group-level reporting; and (3) virtual group-level reporting. In the CY 2018 Quality Payment Program proposed rule (82 FR 30027 through 30034), we proposed to establish requirements for MIPS participation at the virtual group level.

Section 1848(q)(5)(I) of the Act provides for the use of voluntary virtual groups for certain assessment purposes, including the election of certain practices to be a virtual group and the requirements for the election process. Section 1848(q)(5)(I)(i) of the Act provides that MIPS eligible clinicians electing to be a virtual group must: (1) Have their performance assessed for the quality and cost performance categories in a manner that applies the combined performance of all the MIPS eligible clinicians in the virtual group to each MIPS eligible clinician in the virtual group for the applicable performance period; and (2) be scored for the quality and cost performance categories based on such assessment for the applicable performance period. Section 1848(q)(5)(I)(ii) of the Act requires the Secretary to establish and implement, in accordance with section 1848(q)(5)(I)(iii) of the Act, a process that allows an individual MIPS eligible clinician or a group consisting of not more than 10 MIPS eligible clinicians to elect, for a performance period, to be a virtual group with at least one other such individual MIPS eligible clinician or group. Virtual groups may be based on appropriate classifications of providers, such as by geographic areas or by provider specialties defined by nationally recognized specialty boards of certification or equivalent certification boards.

Section 1848(q)(5)(I)(iii) of the Act provides that the virtual group election process must include the following requirements: (1) An individual MIPS eligible clinician or group electing to be in a virtual group must make their election prior to the start of the applicable performance period and cannot change their election during the performance period; (2) an individual MIPS eligible clinician or group may elect to be in no more than one virtual group for a performance period, and, in the case of a group, the election applies to all MIPS eligible clinicians in the

group; (3) a virtual group is a combination of TINs; (4) requirements providing for formal written agreements among individual MIPS eligible clinicians and groups electing to be a virtual group; and (5) such other requirements as the Secretary determines appropriate.

#### b. Definition of a Virtual Group

##### (1) Generally

As noted above, section 1848(q)(5)(I)(ii) of the Act requires the Secretary to establish and implement, in accordance with section 1848(q)(5)(I)(iii) of the Act, a process that allows an individual MIPS eligible clinician or group consisting of not more than 10 MIPS eligible clinicians to elect, for a performance period, to be a virtual group with at least one other such individual MIPS eligible clinician or group. Given that section 1848(q)(5)(I)(iii)(III) of the Act provides that a virtual group is a combination of TINs, we interpreted the references to an “individual” MIPS eligible clinician in section 1848(q)(5)(I)(ii) of the Act to mean a solo practitioner, which, for purposes of section 1848(q)(5)(I) of the Act, we proposed to define as a MIPS eligible clinician (as defined at § 414.1305) who bills under a TIN with no other NPIs billing under such TIN (82 FR 30027).

Also, we recognized that a group (TIN) may include not only NPIs who meet the definition of a MIPS eligible clinician, but also NPIs who do not meet the definition of a MIPS eligible clinician at § 414.1305 or who are excluded from the definition of a MIPS eligible clinician under § 414.1310(b) or (c). Thus, we interpreted the references to a group “consisting of not more than 10” MIPS eligible clinicians in section 1848(q)(5)(I)(ii) of the Act to mean a group with 10 or fewer eligible clinicians (as such terms are defined at § 414.1305) (82 FR 30027). Under § 414.1310(d), the MIPS payment adjustment would apply only to NPIs in the virtual group who meet the definition of a MIPS eligible clinician at § 414.1305 and who are not excluded from the definition of a MIPS eligible clinician under § 414.1310(b) or (c). We noted that groups must include at least one MIPS eligible clinician in order to meet the definition of a group at § 414.1305 and thus be eligible to form or join a virtual group.

We proposed to define a virtual group at § 414.1305 as a combination of two or more TINs composed of a solo practitioner (that is, a MIPS eligible clinician (as defined at § 414.1305) who bills under a TIN with no other NPIs

billing under such TIN) or a group with 10 or fewer eligible clinicians (as such terms are defined at § 414.1305) under the TIN that elects to form a virtual group with at least one other such solo practitioner or group for a performance period for a year (82 FR 30027 through 30028).

With regard to the low-volume threshold, we recognized that such determinations are made at the individual and group level, but not at the virtual group level (82 FR 30031). For example, if an individual MIPS eligible clinician is part of a practice that is participating in MIPS (that is, reporting) at the individual level, then the low-volume threshold determination is made at the individual level. Whereas, if an individual MIPS eligible clinician is part of a practice that is participating in MIPS (that is, reporting) at the group level, then the low-volume threshold determination is made at the group level and would be applicable to such MIPS eligible clinician regardless of the low-volume threshold determination made at the individual level. Similarly, if a solo practitioner or a group with 10 or fewer eligible clinicians seeks to participate in MIPS (that is, report) at the virtual group level, then the low-volume threshold determination made at the individual or group level, respectively, would be applicable to such solo practitioner or group. Thus, solo practitioners or groups with 10 or fewer eligible clinicians that are determined not to exceed the low-volume threshold at the individual or group level, respectively, would not be eligible to participate in MIPS as an individual, group, or virtual group, as applicable.

Given that a virtual group must be a combination of TINs, we recognized that the composition of a virtual group could include, for example, one solo practitioner (NPI) who is practicing under multiple TINs (TIN A and TIN B), in which the solo practitioner would be able to form a virtual group with his or her own self based on each TIN assigned to the solo practitioner (TIN A/NPI and TIN B/NPI) (82 FR 30032). As discussed in section II.C.4.b.(3) of this final rule with comment period, we did not propose to establish a limit on the number of TINs that may form a virtual group at this time.

Lastly, we noted that qualification as a virtual group for purposes of MIPS does not change the application of the physician self-referral law to a financial relationship between a physician and an entity furnishing designated health services, nor does it change the need for such a financial relationship to comply

with the physician self-referral law (82 FR 30028).

We refer readers to section II.C.4.b.(3) of this final rule with comment period for a summary of the public comments we received on these proposals and our responses.

##### (2) Application to Groups Containing Participants in a MIPS APM or an Advanced APM

Additionally, we recognized that there are circumstances in which a TIN may have one portion of its NPIs participating under the generally applicable MIPS scoring criteria while the remaining portion of NPIs under the TIN is participating in a MIPS APM or an Advanced APM under the MIPS APM scoring standard (82 FR 30028). To clarify, for all groups, including those containing participants in a MIPS APM or an Advanced APM, the group's performance assessment will be based on the performance of the entire TIN. Generally, for groups other than those containing participants in a MIPS APM or an Advanced APM, each MIPS eligible clinician under the TIN (TIN/NPI) receives a MIPS adjustment based on the entire group's performance assessment (entire TIN). For groups containing participants in a MIPS APM or an Advanced APM, only the portion of the TIN that is being scored for MIPS according to the generally applicable scoring criteria (TIN/NPI) receives a MIPS adjustment based on the entire group's performance assessment (entire TIN). The remaining portion of the TIN that is being scored according to the APM scoring standard (TIN/NPI) receives a MIPS adjustment based on that standard. We noted that such participants may be excluded from MIPS if they achieve QP or Partial QP status. For more information, we refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77058, 77330 through 77331).

We proposed to apply a similar policy to groups, including those containing participants in a MIPS APM or an Advanced APM, that are participating in MIPS as part of a virtual group (82 FR 30028). Specifically, for groups other than those containing participants in a MIPS APM or an Advanced APM, each MIPS eligible clinician under the TIN (TIN/NPI) would receive a MIPS adjustment based on the virtual group's combined performance assessment (combination of TINs). For groups containing participants in a MIPS APM or an Advanced APM, only the portion of the TIN that is being scored for MIPS according to the generally applicable scoring criteria (TIN/NPI) would receive a MIPS adjustment based on the virtual

group's combined performance assessment (combination of TINs). As discussed in section II.C.6.g. of this final rule with comment period, we proposed to use waiver authority to ensure that the remaining portion of the TIN that is being scored according to the APM scoring standard (TIN/NPI) would receive a MIPS adjustment based on that standard. We noted that such participants may be excluded from MIPS if they achieve QP or Partial QP status.

We refer readers to section II.C.4.b.(3) of this final rule with comment period for a summary of the public comments we received on these proposals and our responses.

### (3) Appropriate Classifications

As noted above, the statute provides the Secretary with discretion to establish appropriate classifications regarding the composition of virtual groups, such as by geographic area or by specialty. We recognized that virtual groups would each have unique characteristics and varying patient populations. However, we believe it is important for virtual groups to have the flexibility to determine their own composition at this time, and, as a result, we did not propose to establish any such classifications regarding virtual group composition (82 FR 30028).

We further noted that the statute does not limit the number of TINs that may form a virtual group, and we did not propose to establish such a limit at this time (82 FR 30028). We did consider proposing to establish such a limit, such as 50 or 100 participants. In particular, we were concerned that virtual groups of too substantial a size (for example, 10 percent of all MIPS eligible clinicians in a given specialty or sub-specialty) may make it difficult to compare performance between and among clinicians. We believe that limiting the number of virtual group participants could eventually assist virtual groups as they aggregate their performance data across the virtual group. However, we believe that as we initially implement virtual groups, it is important for virtual groups to have the flexibility to determine their own size, and thus, the better approach is not to place such a limit on virtual group size. We will monitor the ways in which solo practitioners and groups with 10 or fewer eligible clinicians form virtual groups and may propose to establish appropriate classifications regarding virtual group composition or a limit on the number of TINs that may form a virtual group in future rulemaking as necessary.

We solicited public comment on these proposals, as well as our approach of not establishing appropriate classifications (such as by geographic area or by specialty) regarding virtual group composition or a limit on the number of TINs that may form a virtual group at this time.

We noted that we received public comments in response to the CY 2017 Quality Payment Program final rule and additional stakeholder feedback by hosting several virtual group listening sessions and convening user groups (82 FR 30028). We refer readers to the CY 2018 Quality Payment Program proposed rule (82 FR 30027) for a summary of these comments and our response.

The following is a summary of the public comments received regarding our proposals, as well as our approach of not establishing appropriate classifications (such as by geographic area or by specialty) regarding virtual group composition or a limit on the number of TINs that may form a virtual group at this time.

*Comment:* A majority of commenters supported the concept of virtual groups, as defined, as a participation option available under MIPS.

*Response:* We appreciate the support from the commenters.

*Comment:* Several commenters did not support virtual groups being limited to groups consisting of not more than 10 eligible clinicians and requested that CMS expand virtual group participation to groups with more than 10 eligible clinicians.

*Response:* As noted above, we interpreted the references to a group "consisting of not more than 10" MIPS eligible clinicians in section 1848(q)(5)(I)(ii) of the Act to mean a group with 10 or fewer eligible clinicians (as such terms are defined at § 414.1305) (82 FR 30027). We do not have discretion to expand virtual group participation to groups with more than 10 MIPS eligible clinicians.

*Comment:* One commenter recommended that CMS seek a technical amendment to section 1848(q)(5)(I) of the Act to replace the group eligibility threshold of 10 or fewer MIPS eligible clinicians with a patient population requirement of at least 5,000 to improve the validity of the reporting of virtual groups.

*Response:* We appreciate the feedback from the commenter and will take the commenter's recommendation into consideration.

*Comment:* A few commenters recommended that CMS allow a large, multispecialty group under one TIN to split into clinically relevant reporting

groups, or allow multiple TINs within a health care delivery system to report as a virtual group.

*Response:* In the CY 2017 Quality Payment Program final rule (81 FR 77058), we noted that except for groups containing APM participants, we do not permit groups to "split" TINs if they choose to participate in MIPS as a group. As we considered the option of permitting groups to split TINs, we identified several issues that would make it challenging and cumbersome to implement a split TIN option such as the administrative burden of groups having to monitor and track which NPIs are reporting under which portion of a split TIN and the identification of appropriate criteria to be used for determining the ways in which groups would be able to split TINs (for example, based on specialty, practice site, location, health IT systems, or other factors). However, we recognize that there are certain advantages for allowing TINs to split, such as those the identified by the commenter. We intend to explore the option of permitting groups to split TINs, and any changes would be proposed in future rulemaking. Thus, we consider a group to mean an entire single TIN that elects to participate in MIPS at the group or virtual group level. However, for multiple TINs that are within a health care delivery system, such TINs would be able to form a virtual group provided that each TIN has 10 or fewer eligible clinicians.

*Comment:* A significant portion of commenters expressed concern regarding the ineligibility of virtual group participation for solo practitioners and groups that do not exceed the low-volume threshold. The commenters noted that such solo practitioners and groups would not be able to benefit from participating as part of a virtual group and noted that the purpose of virtual group formation was to provide such solo practitioners and groups, which are otherwise unable to participate on their own, with an opportunity to join with other such entities and collectively become eligible to participate in MIPS as part of a virtual group. A few commenters recommended that the low-volume threshold be conducted at the virtual group level.

*Response:* In regard to stakeholder concerns pertaining to the low-volume threshold eligibility determinations made at the individual and group level that would prevent certain solo practitioners and groups from being eligible to form a virtual group, we believe there are statutory constraints that do not allow us to establish a low-

volume threshold at the virtual group level. The statute includes specific references to “MIPS eligible clinicians” throughout the virtual group provisions, and we believe that such references were intended to limit virtual group participation to “MIPS eligible clinicians”, that is, eligible clinicians who meet the definition of a MIPS eligible clinician and are not excluded under the low-volume threshold or any other statutory exclusion. As a result, we do not believe we are able to establish a low-volume threshold at the virtual group level because a solo practitioner or group would need to be considered eligible to participate in MIPS to form or join a virtual group.

*Comment:* Many commenters supported the flexibility provided for virtual group composition, such as to not have parameters pertaining to geographic area, specialty, size, or other factors, while other commenters had concerns that such flexibility could circumvent bona fide clinical reasons for collaboration, incentivize practice consolidation, and cause an increase in costs without improving quality and health outcomes.

*Response:* We appreciate the support from the commenters regarding the flexibility we are providing to virtual groups pertaining to composition. In regard to concerns from other commenters regarding such flexibility, we note that TINs vary in size, clinician composition, patient population, resources, technological capabilities, geographic area, and other characteristics, and may join or form virtual groups for various reasons, and we do not want to inhibit virtual group formation due to parameters. At this juncture of virtual group implementation, we believe that virtual groups should have the flexibility to determine their composition and size, and thus we do not want to limit the ways in which virtual groups are composed. However, we encourage TINs within virtual groups to assess means for promoting and enhancing the coordination of care and improving the quality of care and health outcomes. We will monitor the ways in which solo practitioners and groups with 10 or fewer eligible clinicians form virtual groups and may propose to establish appropriate classifications regarding virtual group composition or a limit on the number of TINs that may form a virtual group in future rulemaking as necessary.

*Comment:* One commenter requested that CMS continue to examine the formation and implementation of virtual groups, ensuring equity and taking into

account variability in patient case-mix and practice needs.

*Response:* We appreciate the feedback from the commenter and will take the commenter’s recommendation into consideration.

*Comment:* One commenter indicated that the Quality Payment Program encourages eligible clinicians to aggregate data, share financial risk, and work together as virtual groups, which promotes joint accountability and creates delivery systems that are better able to improve the cost, quality, and experience of care. As a result, the commenter recommended that CMS issue detailed guidance and develop tools, resources, technical assistance, and other materials for guidance as to how clinicians can form virtual groups.

*Response:* We appreciate the feedback from the commenter and note that we intend to publish a virtual group toolkit that provides information pertaining to requirements and outlines the steps a virtual group would pursue during the election process, which can be accessed on the CMS Web site at <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Value-Based-Programs/MACRA-MIPS-and-APMs/MACRA-MIPS-and-APMs.html>.

*Comment:* A few commenters recommended that only MIPS eligible clinicians be considered as part of a virtual group as written in the statute. The commenters indicated that CMS continues to include all eligible clinicians versus only MIPS eligible clinicians in the count to determine TIN size and requested that CMS instead rely on the “not more than 10 MIPS eligible clinicians” language in the statute, which would allow more groups to take advantage of the virtual group reporting option and focus more directly on the number of clinicians who are participating in and contributing to MIPS rather than clinicians who are excluded.

*Response:* We note that our proposed definition of a virtual group reflects the statutory premise of virtual group participation pertaining to MIPS eligible clinicians. In the CY 2017 final rule (81 FR 77539), we define a MIPS eligible clinician (identified by a unique billing TIN and NPI combination used to assess performance) at § 414.1305 to mean any of the following (excluding those identified at § 414.1310(b)): (1) A physician as defined in section 1861(r) of the Act; (2) a physician assistant, a nurse practitioner, and clinical nurse specialist as such terms are defined in section 1861(aa)(5) of the Act; (3) a certified registered nurse anesthetist as defined in section 1861(bb)(2) of the

Act; and (4) a group that includes such clinicians. The definition of a MIPS eligible clinician includes a group and we define a group at § 414.1305 to mean a single TIN with two or more eligible clinicians (including at least one MIPS eligible clinician), as identified by their individual NPI, who have reassigned their billing rights to the TIN. Since a group is included under the definition of a MIPS eligible clinician, which would include two or more eligible clinicians (including at least one MIPS eligible clinician), our definition of a virtual group is consistent with statute.

In regard to determining TIN size for purposes of virtual group eligibility, we count each NPI associated with a TIN in order to determine whether or not a TIN exceeds the threshold of 10 NPIs, which is an approach that we believe provides continuity over time if the definition of a MIPS eligible clinician is expanded in future years under section 1848(q)(1)(C)(i)(II) of the Act to include other eligible clinicians. We considered an alternative approach for determining TIN size, which would determine TIN size for virtual group eligibility based on NPIs who are MIPS eligible clinicians. However, as we conducted a comparative assessment of the application of such alternative approach with the current definition of a MIPS eligible clinician (as defined at § 414.1305) and a potential expanded definition of a MIPS eligible clinician, we found that such an approach could create confusion as to which factors determine virtual group eligibility and cause the pool of virtual group eligible TINs to significantly be reduced once the definition of a MIPS eligible clinician would be expanded, which may impact a larger portion of virtual groups that intend to participate in MIPS as a virtual group for consecutive performance periods. Such impact would be the result of the current definition of a MIPS eligible clinician being narrower than the potential expanded definition of a MIPS eligible clinician. For example, under the recommended approach, a TIN with a total of 15 NPIs (10 MIPS eligible clinicians and 5 eligible clinicians) would not exceed the threshold of 10 MIPS eligible clinicians and would be eligible to participate in MIPS as a virtual group for the 2018 performance period; however, if the definition of a MIPS eligible clinician were expanded through rulemaking for the 2019 performance period, such TIN, with no change in TIN size (15 NPIs), would exceed the threshold of 10 MIPS eligible clinicians if 1 or more of the 5 eligible clinicians met the expanded definition

of a MIPS eligible clinician and no longer eligible to participate in MIPS as part of a virtual group. We did not pursue such an approach given that it did not align with our objective of establishing virtual group eligibility policies that are simplistic in understanding and provide continuity.

*Final Action:* After consideration of the public comments received, we are finalizing with modification our proposal to define a solo practitioner at § 414.1305 as a practice consisting of one eligible clinician (who is also a MIPS eligible clinician). We are also finalizing with modification our proposal to define a virtual group at § 414.1305 as a combination of two or more TINs assigned to one or more solo practitioners or one or more groups consisting of 10 or fewer eligible clinicians, or both, that elect to form a virtual group for a performance period for a year. We are modifying the definition (i) to remove the redundant phrases “with at least one other such solo practitioner or group” and unnecessary parenthetical cross references; (ii) to accurately characterize TINs as being “assigned to” (rather than “composed of”) a solo practitioner or group; and (iii) to clearly indicate that a virtual group can be composed of “one or more” solo practitioners or groups of 10 or fewer eligible clinicians. We note that we are modifying our proposed definitions for greater clarity and consistency with established MIPS terminology.

We are also finalizing our proposal that for groups (TINs) that participate in MIPS as part of a virtual group and do not contain participants in a MIPS APM or an Advanced APM, each MIPS eligible clinician under the TIN (each TIN/NPI) will receive a MIPS payment adjustment based on the virtual group’s combined performance assessment (combination of TINs). For groups (TINs) that participate in MIPS as part of a virtual group and contain participants in a MIPS APM or an Advanced APM, only the portion of the TIN that is being scored for MIPS according to the generally applicable scoring criteria will receive a MIPS adjustment based on the virtual group’s combined performance assessment (combination of TINs). As discussed in section II.C.6.g. of this final rule with comment period, the remaining portion of the TIN that is being scored according to the APM scoring standard will receive a MIPS payment adjustment based on that standard. We note that such participants may be excluded from MIPS if they achieve QP or Partial QP status.

At this juncture, we are not establishing additional classifications (such as by geographic area or by specialty) regarding virtual group composition or a limit on the number of TINs that may form a virtual group.

#### c. Virtual Group Identifier for Performance

To ensure that we have accurately captured all of the MIPS eligible clinicians participating in a virtual group, we proposed that each MIPS eligible clinician who is part of a virtual group would be identified by a unique virtual group participant identifier (82 FR 30028 through 30029). The unique virtual group participant identifier would be a combination of three identifiers: (1) Virtual group identifier (established by CMS; for example, XXXXXX); (2) TIN (9 numeric characters; for example, XXXXXXXXX); and (3) NPI (10 numeric characters; for example, 1111111111). For example, a virtual participant identifier could be VG-XXXXXX, TIN-XXXXXXXXXX, NPI-1111111111. We solicited public comment on this proposal.

The following is a summary of the public comments received regarding our proposal.

*Comment:* A majority of commenters expressed support for our proposal.

*Response:* We appreciate the support from the commenters.

*Comment:* One commenter indicated that a virtual group identifier would lead to administrative simplification and more accurate identification of MIPS eligible clinicians caring for Medicare beneficiaries, which could be used in recognizing and eliminating redundancies in the payer system.

*Response:* We appreciate the support from the commenter. We believe that our proposed virtual group identifier will accurately identify each MIPS eligible clinician participating in a virtual group and be easily implemented by virtual groups.

*Comment:* One commenter thanked CMS for not requiring virtual groups to form new TINs, which would add to the administrative burden for entities electing to become virtual groups, while another commenter requested clarification regarding whether or not members of a virtual group would need to submit a Reassignment of Benefits Form (CMS-855R) to the MAC and reassign their billing rights to the elected virtual group.

*Response:* We note that a virtual group is recognized as an official collective entity for reporting purposes, but is not a distinct legal entity for billing purposes. As a result, a virtual group does not need to establish a new

TIN for purposes of participation in MIPS, nor does any eligible clinician in the virtual group need to reassign their billing rights to a new or different TIN.

*Comment:* A few commenters indicated that EHR developers need to know the specifications for the virtual group identifier as soon as technically feasible in order for such specifications to be included in their development efforts and implemented early in 2018. One commenter indicated that qualified registries submit data at the TIN level for group reporting and that individual NPI data is effectively obscured, and requested clarification regarding the type of information qualified registries would report for virtual groups, such as the virtual group identifier alone (VG-XXXXXX) or the combination of all three identifiers (VG-XXXXXX, TIN-XXXXXXXXXX, NPI-1111111111).

*Response:* For a virtual groups that are determined to have met the virtual group formation criteria and approved to participate in MIPS as an identified official virtual group, we will notify official designated virtual group representatives of their official virtual group status and issue a virtual group identifier. We intend to notify virtual groups of their official status as close to the start of the performance period as technically feasible. Virtual groups will need to provide their virtual group identifiers to the third party intermediaries that will be submitting their performance data, such as qualified registries, QCDRs, and/or EHRs. Qualified registries, QCDRs, and EHRs will include the virtual group identifier alone (VG-XXXXXX) in the file submissions. For virtual groups that elect to participate in MIPS via the CMS Web Interface or administer the CAHPS for MIPS survey, they will register via the CMS Web Interface and include the virtual group identifier alone (VG-XXXXXX) during registration. We intend to update submission specifications prior to the start of the applicable submission period.

*Comment:* One commenter expressed concerns regarding the burden of using a virtual group identifier and the added administrative complexity to the claims process of using layered identifiers and modifiers. The commenter requested that CMS simplify the reporting process for MIPS eligible clinicians, groups, and virtual groups rather than increase the administrative burden.

*Response:* We appreciate the feedback from the commenter. We do not believe that the virtual group identifier would be burdensome for virtual groups to implement. We believe that our proposed virtual group identifier is the most appropriate and simple approach,

which will allow for the accurate identification of each MIPS eligible clinician participating in a virtual group and be easily implemented by virtual groups.

*Final Action:* After consideration of the public comments received, we are finalizing our proposal that each MIPS eligible clinician who is part of a virtual group will be identified by a unique virtual group participant identifier, which will be a combination of three identifiers: (1) Virtual group identifier (established by CMS; for example, XXXXXX); (2) TIN (9 numeric characters; for example, XXXXXXXXX); and (3) NPI (10 numeric characters; for example, 1111111111). For example, a virtual group participant identifier could be VG-XXXXXX, TIN-XXXXXXXXXX, NPI-1111111111.

#### d. Application of Group-Related Policies to Virtual Groups

##### (1) Generally

In the CY 2017 Quality Payment Program final rule (81 FR 77070 through 77072), we finalized various requirements for groups under MIPS at § 414.1310(e), under which groups electing to report at the group level are assessed and scored across the TIN for all four performance categories. In the CY 2018 Quality Payment Program proposed rule (82 FR 30029), we proposed to apply our previously finalized and proposed group-related policies to virtual groups, unless otherwise specified. We recognized that there are instances in which we may need to clarify or modify the application of certain previously finalized or proposed group-related policies to virtual groups, such as the definition of a non-patient facing MIPS eligible clinician; small practice, rural area and HPSA designations; and groups that contain participants in a MIPS APM or an Advanced APM (see section II.C.4.b. of this final rule with comment period). More generally, such policies may include, but are not limited to, those that require a calculation of the number of NPIs across a TIN (given that a virtual group is a combination of TINs), the application of any virtual group participant's status or designation to the entire virtual group, and the applicability and availability of certain measures and activities to any virtual group participant and to the entire virtual group.

We refer readers to section II.C.4.d.(5) of this final rule with comment period for a summary of the public comments we received on these proposals and our responses.

##### (2) Application of Non-Patient Facing Status to Virtual Groups

With regard to the applicability of the non-patient facing MIPS eligible clinician-related policies to virtual groups, in the CY 2017 Quality Payment Program final rule (81 FR 77048 through 77049), we defined the term non-patient facing MIPS eligible clinician at § 414.1305 as an individual MIPS eligible clinician that bills 100 or fewer patient facing encounters (including Medicare telehealth services defined in section 1834(m) of the Act) during the non-patient facing determination period, and a group provided that more than 75 percent of the NPIs billing under the group's TIN meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period. In the CY 2018 Quality Payment Program proposed rule (82 FR 30021, 30029), we proposed to modify the definition of a non-patient facing MIPS eligible clinician to include clinicians in a virtual group, provided that more than 75 percent of the NPIs billing under the virtual group's TINs meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period. We noted that other policies previously established and proposed in the proposed rule for non-patient facing groups would apply to virtual groups (82 FR 30029). For example, as discussed in section II.C.1.e. of this final rule with comment period, virtual groups determined to be non-patient facing would have their advancing care information performance category automatically reweighted to zero.

We refer readers to section II.C.4.d.(5) of this final rule with comment period for a summary of the public comments we received on these proposals and our responses.

##### (3) Application of Small Practice Status to Virtual Groups

With regard to the application of small practice status to virtual groups, in the CY 2017 Quality Payment Program final rule (81 FR 77188), we defined the term small practices at § 414.1305 as practices consisting of 15 or fewer clinicians and solo practitioners. In the CY 2018 Quality Payment Program proposed rule (82 FR 30019, 30029), we proposed that a virtual group would be identified as a small practice if the virtual group does not have 16 or more eligible clinicians. In addition, we proposed for performance periods occurring in 2018 and future years to identify small

practices by utilizing claims data; for performance periods occurring in 2018, we would identify small practices based on 12 months of data starting from September 1, 2016 to August 31, 2017 (82 FR 30019 through 30020). We refer readers to section II.C.1.c. of this final rule with comment period for the discussion of our proposal to identify small practices by utilizing claims data. We refer readers to section II.C.4.d.(3) of this final rule with comment period for the discussion regarding how small practice status would apply to virtual groups for scoring under MIPS.

We refer readers to section II.C.4.d.(5) of this final rule with comment period for a summary of the public comments we received on our proposal to apply small practice status to virtual groups and our responses.

##### (4) Application of Rural Area and HPSA Practice Status to Virtual Groups

In the CY 2018 Quality Payment Program proposed rule (82 FR 30020 through 30021), we proposed to determine rural area and HPSA practice designations at the individual, group, and virtual group level. Specifically, for performance periods occurring in 2018 and future years, we proposed that an individual MIPS eligible clinician, a group, or a virtual group with multiple practices under its TIN or TINs within a virtual group would be designated as a rural area or HPSA practice if more than 75 percent of NPIs billing under the individual MIPS eligible clinician or group's TIN or within a virtual group, as applicable, are designated in a ZIP code as a rural area or HPSA. We noted that other policies previously established and proposed in the proposed rule for rural area and HPSA groups would apply to virtual groups (82 FR 30029). We note that in section II.C.7.b.(1)(b) of this final rule with comment period, we describe our scoring proposals for practices that are in a rural area.

We refer readers to section II.C.4.d.(5) of this final rule with comment period for a summary of the public comments we received on these proposals and our responses.

##### (5) Applicability and Availability of Measures and Activities to Virtual Groups

As noted above, we proposed to apply our previously finalized and proposed group-related policies to virtual groups, unless otherwise specified (82 FR 30029). In particular, we recognized that the measures and activities applicable and available to groups would also be applicable and available to virtual groups. Virtual groups would be required to meet the reporting

requirements for each measure and activity, and the virtual group would be responsible for ensuring that their measure and activity data are aggregated across the virtual group (for example, across their TINs). We noted that other previously finalized and proposed group-related policies pertaining to the four performance categories would apply to virtual groups.

The following is a summary of the public comments received regarding our proposals.

*Comment:* Many commenters supported our proposal to generally apply MIPS group-related policies to virtual groups, unless otherwise specified. The commenters indicated that such alignment would ease undue administrative and reporting burden.

*Response:* We appreciate the support from the commenters.

*Comment:* Several commenters supported our proposal to modify the definition of a non-patient facing MIPS eligible clinician to include clinicians in a virtual group provided that more than 75 percent of the NPIs billing under the virtual group's TINs meet the definition of a non-patient facing individual MIPS eligible clinician.

*Response:* We appreciate the support from the commenters.

*Comment:* One commenter expressed support for our proposal that a virtual group would be identified as a small practice if the virtual group does not have 16 or more eligible clinicians, while another commenter expressed support for our proposal that a virtual group with more than 75 percent of the NPIs billing under the virtual group's TINs are in a ZIP code designated as a rural area or HPSA would be designated as a rural area or HPSA practice at the virtual group level.

*Response:* We appreciate the support from the commenters regarding our proposals.

*Comment:* Several commenters did not support our proposal that a virtual group would be identified as a small practice if the virtual group does not have 16 or more eligible clinicians. The commenters expressed concerns that the benefits of forming a virtual group could be outweighed by the loss of the proposed small practice bonus points for virtual groups with more than 15 eligible clinicians, and that the elimination of small practice bonus points for such virtual groups would undermine the establishment of small practice policies afforded to such entities in statute. The commenters indicated that the formation of virtual groups would involve substantial administrative burdens for small practices, and that each TIN within a

virtual group would otherwise qualify as a small practice and should not lose the accommodations to which they would otherwise be entitled. The commenters suggested that any virtual group, regardless of size, be considered a small practice. The commenters further stated that small practices that just slightly exceed the low-volume threshold may have the most challenges and difficulty succeeding in the Quality Payment Program.

*Response:* We note that virtual groups with 15 or fewer eligible clinicians will continue to be considered a small practice as a collective entity. The small practice status is applied based on the collective entity as a whole and not based on the small practice status of each TIN within a virtual group. If a virtual group has 16 or more eligible clinicians, it would not be considered to have a small practice status as a collective whole. We believe that our approach is consistent with statute and not unfair to small practices that are a part of virtual groups with 16 or more eligible clinicians. Section 1848(q)(2)(B)(iii) of the Act specifically refers to small practices of 15 or fewer clinicians, and we do not believe it is appropriate to apply such designation to a virtual group as a collective single entity when a virtual group has 16 or more eligible clinicians. We encourage small practices to weigh the benefit of the special provisions specific to small practices against the benefits of virtual group participation when considering whether to form a virtual group that has 16 or more eligible clinicians. We refer readers to section II.C.7.b.(1)(c) of this final rule with comment for the discussion regarding the scoring of small practices. We want to ensure that small practices have the ability to determine the most appropriate means for participating in MIPS, whether it be as individuals, as a group or part of a virtual group. The formation of virtual groups provides for a comprehensive measurement of performance, shared responsibility, and an opportunity to effectively and efficiently coordinate resources to achieve requirements under each performance category. A small practice may elect to join a virtual group in order to potentially increase their performance under MIPS or elect to participate in MIPS as a group and take advantage of other flexibilities and benefits afforded to small practices. We note that if a virtual group has 16 or more eligible clinicians, it will not be considered a small practice.

*Comment:* A few commenters did not support our proposal that a virtual group with more than 75 percent of the NPIs billing under the virtual group's

TINs are in a ZIP code designated as a rural area or HPSA would be designated as a rural area or HPSA practice at the virtual group level. The commenters requested that CMS reduce the threshold pertaining to rural area and HPSA practice status for virtual groups and recommended that a virtual group with more than 50 percent of the NPIs billing under a virtual group's TINs are in a ZIP code designated as a rural area or HPSA would be designated as a rural area or HPSA practice at the virtual group level.

*Response:* We disagree with the recommendation from the commenters. In order for a virtual group to be designated as a rural area or HPSA practice, we believe that a significant portion of a virtual group's NPIs would need to be in a ZIP code designated as a rural area or HPSA. Our proposal provides a balance between requiring more than half of a virtual group's NPIs to have such designations and requiring all NPIs within a virtual group to have such designations. Also, our proposed threshold pertaining to rural area and HPSA practice status for virtual groups aligns with other group-related and virtual group policies, which creates continuity among policies and makes virtual group implementation easier for TINs forming virtual groups.

*Comment:* One commenter urged CMS to eliminate the all-cause hospital readmission measure from the quality performance category score for virtual groups with 16 or more eligible clinicians. The commenter noted that virtual groups would be newly formed and unlikely to have the same infrastructure and care coordination functionality that established groups under a single TIN may have in place, and that factoring the all-cause hospital readmission measure into their score would be inappropriate.

*Response:* We recognize that small practices, including solo practitioners, would not be assessed on the all-cause hospital readmission measure as individual TINs. However, we believe that the all-cause hospital readmission measure is an appropriate measure, when applicable, to assess performance under the quality performance category of virtual groups with 16 or more eligible clinicians that meet the case volume of 200 cases. For virtual groups that do not meet the minimum case volume of 200, the all-cause hospital readmission measure would not be scored. Also, we believe that our approach for assessing performance based on the all-cause hospital readmission measure for virtual groups with 16 or more eligible clinicians is appropriate because it reflects the same

policy for groups, which was developed as a requirement to reduce burden (such measure is based on administrative claims data and does not require a separate submission of data) and ensure that we do not unfairly penalize MIPS eligible clinicians or groups that did not have adequate time to prepare adequately to succeed in the program while still rewarding high performers.

*Comment:* One commenter supported our proposal to generally apply our group-related policies to virtual groups, specifically with regard to the improvement activities performance category requirements, under which groups and virtual groups would receive credit for an improvement activity as long as one NPI under the group's TIN or virtual group's TINs performs an improvement activity for a continuous 90-day period.

*Response:* We appreciate the support from the commenter.

*Comment:* One commenter requested clarification regarding how the proposed group-related policy that at least 50 percent of the practice sites within a TIN must be certified or recognized as a patient-centered medical home or comparable specialty practice in order to receive full credit in the improvement activities performance category applies to virtual groups. Another commenter recommended that a virtual group receive full credit for the improvement activities performance category if at least 50 percent of its eligible clinicians are certified or recognized as a patient-centered medical home or comparable specialty practice.

*Response:* As discussed in section II.C.7.a.(5)(c) of this final rule with comment period, in order for a group to receive full credit as a certified or recognized patient-centered medical home or comparable specialty practice under the improvement activities performance category, at least 50 percent of the practice sites within the TIN must be recognized as a patient-centered medical home or comparable specialty practice. In order for a virtual group to receive full credit as a certified or recognized patient-centered medical home or comparable specialty practice under the improvement activities performance category, at least 50 percent of the practice sites within the TINs that are part of a virtual group must be certified or recognized as a patient-centered medical home or comparable specialty practice.

*Comment:* One commenter requested that CMS clarify how a virtual group would be expected to meet the advancing care information performance category requirements and whether all

TINs within a virtual group would be required to have certified EHR technology.

*Response:* In general and unless stated otherwise, for purposes of the advancing care information performance category, the policies pertaining to groups will apply to virtual groups. We refer readers to section II.C.6.f. of this final rule with comment period for more information on the generally applicable policies for the advancing care information performance category.

We note that as with virtual group reporting for the other MIPS performance categories, to report as a virtual group, the virtual group will need to aggregate data for all of the individual MIPS eligible clinicians within the virtual group for which its TINs have data in CEHRT. For solo practitioners and groups that choose to report as a virtual group, performance on the advancing care information performance category objectives and measures will be reported and evaluated at the virtual group level. The virtual group will submit the data that its TINs have utilizing CEHRT and exclude data not collected from a non-certified EHR system. While we do not expect that every MIPS eligible clinician in a virtual group will have access to CEHRT, or that every measure will apply to every clinician in the virtual group, only those data contained in CEHRT should be reported for the advancing care information performance category.

For example, the virtual group calculation of the numerators and denominators for each measure must reflect all of the data from the individual MIPS eligible clinicians (unless a clinician can be excluded) that have been captured in CEHRT for the given advancing care information performance category measure. If the groups (not including solo practitioners) that are part of a virtual group have CEHRT that is capable of supporting group level reporting, the virtual group would submit the aggregated data across the TINs produced by the CEHRT. If a group (TIN) that is part of a virtual group does not have CEHRT that is capable of supporting group level reporting, such group would aggregate the data by adding together the numerators and denominators for each MIPS eligible clinician within the group for whom the group has data captured in CEHRT. If an individual MIPS eligible clinician meets the criteria to exclude a measure, their data can be excluded from the calculation of that particular measure only.

We recognize that it can be difficult to identify unique patients across a virtual group for the purposes of

aggregating data on the advancing care information performance category measures, particularly when TINs within a virtual group may be using multiple CEHRT systems. For the 2018 performance period, TINs within virtual groups may be using systems which are certified to different CEHRT Editions. We consider "unique patients" to be individual patients treated by a TIN within a virtual group who would typically be counted as one patient in the denominator of an advancing care information performance category measure. This patient may see multiple MIPS eligible clinicians within a TIN that is part of a virtual group, or may see MIPS eligible clinicians at multiple practice sites of a TIN that is part of a virtual group. When aggregating performance on advancing care information measures for virtual group level reporting, we do not require that a virtual group determines that a patient seen by one MIPS eligible clinician (or at one location in the case of TINs working with multiple CEHRT systems) is not also seen by another MIPS eligible clinician in the TIN that is part of the virtual group or captured in a different CEHRT system. Virtual groups are provided with some flexibility as to the method for counting unique patients in the denominators to accommodate such scenarios where aggregation may be hindered by systems capabilities across multiple CEHRT platforms. We refer readers to section II.C.6.f.(4) of this final rule with comment for the discussion regarding certification requirements.

*Comment:* One commenter requested that CMS require that a majority of eligible clinicians within a virtual group participate in activities to which the virtual group attests in the improvement activities and advancing care information performance categories in order for the virtual group to receive credit for those activities.

*Response:* We note that a virtual group would need to meet the group-related requirements under each performance category. For the improvement activities performance category, a virtual group would meet the reporting requirements if at least one NPI within the virtual group completed an improvement activity for a minimum of a continuous 90-day period within CY 2018. In regard to the advancing care information performance category, a virtual group would need to fulfill the required base score measures for a minimum of 90 days in order to earn points for the advancing care information performance category. Additionally, virtual groups are able to submit performance score measures and bonus score measures in order to

increase the number of points earned under the advancing care information performance category.

*Comment:* A few commenters requested that virtual groups have the same flexibility afforded to groups regarding the ability to report on different measures and utilize multiple submission mechanisms under each performance category.

*Response:* We note that virtual groups will have the same flexibility as groups to report on measures and activities that are applicable and available to them. As discussed in section II.C.6.a.(1) of this final rule with comment period, the submission mechanisms available to groups under each performance category will also be available to virtual groups. Similarly, virtual groups will also have the same option as groups to utilize multiple submission mechanisms, but only one submission mechanism per performance category for the 2018 performance period. However, starting with the 2019 performance period, groups and virtual groups will be able to utilize multiple submission mechanisms for each performance category.

*Comment:* A few commenters recommended that CMS establish performance feedback for virtual groups and each TIN within a virtual group that includes complete performance data for each performance category. One commenter requested that CMS provide instructions regarding the appeal and audit process for virtual groups and TINs within a virtual group.

*Response:* We note that performance feedback for virtual groups will be similar to feedback reports for groups, which is based on the performance of the entire group for each performance category. We note that virtual groups are required to aggregate their data across the virtual group, and will be assessed and scored at the virtual group level. Each TIN within the virtual group will receive feedback on their performance based on participation in MIPS as a virtual group, in which each TIN under the virtual group will have the same performance feedback applicable to the four performance categories. At this juncture, it is not technically feasible nor do we believe it is appropriate for us to de-aggregate data at the virtual group level and reassess performance data at the TIN or TIN/NPI level without requiring TINs and/or TIN/NPIs to submit data separately. We refer readers to section II.C.9.a. of this final rule with comment period for the discussion pertaining to performance feedback.

Moreover, we note that virtual groups will have an opportunity to request a targeted review of their MIPS payment

adjustment factor(s) for a performance period. In regard to an audit process, virtual groups would be subject to the MIPS data validation and auditing requirements as described in section II.C.9.c. of this final rule with comment period.

*Final Action:* After consideration of public comments received, we are finalizing our proposal to apply our previously finalized and proposed group-related policies to virtual groups, unless otherwise specified.

We are also finalizing our proposal to modify the definition of a non-patient facing MIPS eligible clinician at § 414.1305 to include a virtual group, provided that more than 75 percent of the NPIs billing under the virtual group's TINs meet the definition of a non-patient facing individual MIPS eligible clinician during the non-patient facing determination period. Other previously finalized and proposed policies related to non-patient facing MIPS eligible clinicians would apply to such virtual groups.

We are also finalizing our proposal that a virtual group will be considered a small practice if a virtual group consists of 15 or fewer eligible clinicians. Other previously finalized and proposed policies related to small practices would apply to such virtual groups.

We are also finalizing our proposal that a virtual group will be designated as a rural area or HPSA practice if more than 75 percent of NPIs billing under the virtual group's TINs are designated in a ZIP code as a rural area or HPSA, the virtual group's TINs are designated as rural areas or HPSA practices. Other previously finalized and proposed policies related to rural area or HPSA practices would apply to such virtual groups.

In response to public comments, we are also finalizing that a virtual group will be considered a certified or recognized patient-centered medical home or comparable specialty practice under § 414.1380(b)(3)(iv) if at least 50 percent of the practices sites within the TINs are certified or recognized as a patient-centered medical home or comparable specialty practice.

#### e. Virtual Group Election Process

##### (1) Generally

As noted in section II.C.4.a. of this final rule with comment period, section 1848(q)(5)(I)(iii)(I) and (II) of the Act provides that the virtual group election process must include certain requirements, including that: (1) An individual MIPS eligible clinician or group electing to be in a virtual group

must make their election prior to the start of the applicable performance period and cannot change their election during the performance period; and (2) an individual MIPS eligible clinician or group may elect to be in no more than one virtual group for a performance period, and, in the case of a group, the election applies to all MIPS eligible clinicians in the group. Accordingly, we proposed to codify at § 414.1315(a) that a solo practitioner (as defined at § 414.1305) or group consisting of 10 or fewer eligible clinicians (as such terms are defined at § 414.1305) electing to be in a virtual group must make their election prior to the start of the applicable performance period and cannot change their election during the performance period (82 FR 30029 through 30030). Virtual group participants may elect to be in no more than one virtual group for a performance period, and, in the case of a group, the election applies to all MIPS eligible clinicians in the group.

We noted that in the case of a TIN within a virtual group being acquired or merged with another TIN, or no longer operating as a TIN (for example, a group practice closes), during a performance period, such solo practitioner's or group's performance data would continue to be attributed to the virtual group (82 FR 30032). The remaining parties to the virtual group would continue to be part of the virtual group even if only one solo practitioner or group remains. We consider a TIN that is acquired or merged with another TIN, or no longer operating as a TIN (for example, a group practice closes), to mean a TIN that no longer exists or operates under the auspices of such TIN during a performance period.

In order to provide support and reduce burden, we intend to make technical assistance (TA) available, to the extent feasible and appropriate, to support clinicians who choose to come together as a virtual group. Clinicians can access the TA infrastructure and resources that they may already be utilizing. For Quality Payment Program year 3, we intend to provide an electronic election process if technically feasible. We proposed that clinicians who do not elect to contact their designated TA representative would still have the option of contacting the Quality Payment Program Service Center to obtain information pertaining to virtual groups (82 FR 30030).

We refer readers to section II.C.4.e.(3) of this final rule with comment period for a summary of the public comments we received on these proposals and our responses.

**(2) Virtual Group Election Deadline**

For performance periods occurring in 2018 future years, we proposed to establish a virtual group election period (82 FR 30030). Specifically, we proposed to codify at § 414.1315(a) that a solo practitioner (as defined at § 414.1305) or group consisting of 10 or fewer eligible clinicians (as such terms are defined at § 414.1305) electing to be in a virtual group must make their election by December 1 of the calendar year preceding the applicable performance period. A virtual group representative would be required to make the election, on behalf of the members of a virtual group, regarding the formation of a virtual group for the applicable performance period, by the election deadline. For example, a virtual group representative would need to make an election, on behalf of the members of a virtual group, by December 1, 2017 for the members of the virtual group to participate in MIPS as a virtual group during the CY 2018 performance period. We intend to publish the beginning date of the virtual group election period applicable to performance periods occurring in 2018 and future years in subregulatory guidance.

We refer readers to section II.C.4.e.(3) of this final rule with comment period for a summary of the public comments we received on these proposals and our responses.

**(3) Virtual Group Eligibility Determinations and Formation**

We proposed to codify at § 414.1315(c) a two-stage virtual group election process, stage 1 of which is optional, for performance periods occurring in 2018 and 2019 (82 FR 30030 through 30032). Stage 1 pertains to virtual group eligibility determinations, and stage 2 pertains to virtual group formation. We noted that activity involved in stage 1 is not required, but a resource available to solo practitioners and groups with 10 or fewer eligible clinicians. Solo practitioners and groups that engage in stage 1 and are determined eligible for virtual group participation would proceed to stage 2; otherwise, solo practitioners and groups that do not engage in any activity during stage 1 would begin the election process at stage 2. Engaging in stage 1 would provide solo practitioners and groups with the option to confirm whether or not they are eligible to join or form a virtual group before going to the lengths of executing formal written agreements, submitting a formal election registration, allocating resources for

virtual group implementation, and other related activities; whereas, by engaging directly in stage 2 as an initial step, solo practitioners and groups might conduct all such efforts to only have their election registration be rejected with no recourse or remaining time to amend and resubmit.

In stage 1, solo practitioners and groups with 10 or fewer eligible clinicians interested in forming or joining a virtual group would have the option to contact their designated TA representative in order to obtain information pertaining to virtual groups and/or determine whether or not they are eligible, as it relates to the practice size requirement of a solo practitioner or a group of 10 or fewer eligible clinicians, to participate in MIPS as a virtual group (§ 414.1315(c)(1)(i)). During stage 1 of the virtual group election process, we would determine whether or not a TIN is eligible to form or join a virtual group. In order for a solo practitioner to be eligible to form or join a virtual group, the solo practitioner would need to meet the definition of a solo practitioner at § 414.1305 and not be excluded from MIPS under § 414.1310(b) or (c). In order for a group to be eligible to form or join a virtual group, a group would need to meet the definition of a group at § 414.1305, have a TIN size that does not exceed 10 eligible clinicians, and not be excluded from MIPS under § 414.1310(b) or (c). For purposes of determining TIN size for virtual group participation eligibility, we coined the term “virtual group eligibility determination period” and defined it to mean an analysis of claims data during an assessment period of up to 5 months that would begin on July 1 and end as late as November 30 of the calendar year prior to the applicable performance period and includes a 30-day claims run out.

To capture a real-time representation of TIN size, we proposed to analyze up to 5 months of claims data on a rolling basis, in which virtual group eligibility determinations for each TIN would be updated and made available monthly (82 FR 30030). We noted that an eligibility determination regarding TIN size is based on a relative point in time within the 5-month virtual group eligibility determination period, and not made at the end of such 5-month determination period.

If at any time a TIN is determined to be eligible to participate in MIPS as part of a virtual group, the TIN would retain that status for the duration of the election period and the applicable performance period. TINs could determine their status by contacting their designated TA representative;

otherwise, the TIN's status would be determined at the time that the TIN's virtual group election is submitted. For example, if a group contacted their designated TA representative on October 20, 2017, the claims data analysis would include the months of July through September of 2017, and, if determined not to exceed 10 eligible clinicians, the TIN's size would be determined at such time, and the TIN's eligibility status would be retained for the duration of the election period and the CY 2018 performance period. If another group contacted their designated TA representative on November 20, 2017, the claims data analysis would include the months of July through October of 2017, and, if determined not to exceed 10 eligible clinicians, the TIN's size would be determined at such time, and the TIN's eligibility status would be retained for the duration of the election period and the CY 2018 performance period.

We believe such a virtual group determination period process provides a relative representation of real-time TIN size for purposes of virtual group eligibility and allows solo practitioners and groups to know their real-time eligibility status immediately and plan accordingly for virtual group implementation. It is anticipated that starting in September of each calendar year prior to the applicable performance period, solo practitioners and groups would be able to contact their designated TA representative and inquire about virtual group participation eligibility. We noted that TIN size determinations are based on the number of NPIs associated with a TIN, which would include clinicians (NPIs) who do not meet the definition of a MIPS eligible clinician at § 414.1305 or who are excluded from MIPS under § 414.1310(b) or (c).

For groups that do not choose to participate in stage 1 of the election process (that is, the group does not request an eligibility determination), we will make an eligibility determination during stage 2 of the election process. If a group began the election process at stage 2 and if its TIN size is determined not to exceed 10 eligible clinicians and not excluded based on the low-volume threshold exclusion at the group level, the group is determined eligible to participate in MIPS as part of a virtual group, and such virtual group eligibility determination status would be retained for the duration of the election period and applicable performance period. Stage 2 pertains to virtual group formation. For stage two, we proposed the following (82 FR 30031):

- TINs comprising a virtual group must establish a written formal agreement between each member of a virtual group prior to an election (§ 414.1315(c)(2)(i)).

- On behalf of a virtual group, the official designated virtual group representative must submit an election by December 1 of the calendar year prior to the start of the applicable performance period (§ 414.1315(c)(2)(ii)). Such election will occur via email to the Quality Payment Program Service Center using the following email address for the 2018 and 2019 performance periods: *MIPS\_VirtualGroups@cms.hhs.gov*.

- The submission of a virtual group election must include, at a minimum, information pertaining to each TIN and NPI associated with the virtual group and contact information for the virtual group representative (§ 414.1315(c)(2)(iii)). A virtual group representative would submit the following type of information: Each TIN associated with the virtual group; each NPI associated with a TIN that is part of the virtual group; name of the virtual group representative; affiliation of the virtual group representative to the virtual group; contact information for the virtual group representative; and confirmation through acknowledgment that a formal written agreement has been established between each member of the virtual group (solo practitioner or group) prior to election and each eligible clinician in the virtual group is aware of participating in MIPS as a virtual group for an applicable performance period. Each party to the virtual group agreement must retain a copy of the virtual group's written agreement. We noted that the virtual group agreement is subject to the MIPS data validation and auditing requirements as described in section II.C.9.c. of this final rule with comment period.

- Once an election is made, the virtual group representative must contact their designated CMS contact to update any election information that changed during an applicable performance period at least one time prior to the start of an applicable submission period (§ 414.1315(c)(2)(iv)). Virtual groups will use the Quality Payment Program Service Center as their designated CMS contact; however, we will define this further in subregulatory guidance.

For stage 2 of the election process, we would review all submitted election information; confirm whether or not each TIN within a virtual group is eligible to participate in MIPS as part of a virtual group; identify the NPIs within

each TIN participating in a virtual group that are excluded from MIPS in order to ensure that such NPIs would not receive a MIPS payment adjustment or, when applicable and when information is available, would receive a payment adjustment based on a MIPS APM scoring standard; calculate the low-volume threshold at the individual and group levels in order to determine whether or not a solo practitioner or group is eligible to participate in MIPS as part of a virtual group; and notify virtual groups as to whether or not they are considered official virtual groups for the applicable performance period. For virtual groups that are determined to have met the virtual group formation criteria and identified as an official virtual group participating in MIPS for an applicable performance period, we would contact the official designated virtual group representative via email notifying the virtual group of its official virtual group status and issuing a virtual group identifier for performance (as described in section II.C.4.c. of this final rule with comment period) that would accompany the virtual group's submission of performance data during the submission period.

As we engaged in various discussions with stakeholders during the rulemaking process through listening sessions and user groups, stakeholders indicated that many solo practitioners and small groups have limited resources and technical capacities, which may make it difficult for the entities to form virtual groups without sufficient time and technical assistance. Depending on the resources and technical capacities of the entities, stakeholders conveyed that it may take entities 3 to 18 months to prepare to participate in MIPS as a virtual group. The majority of stakeholders indicated that virtual groups would need at least 6 to 12 months prior to the start of the CY 2018 performance period to form virtual groups, prepare health IT systems, and train staff to be ready for the implementation of virtual group related activities by January 1, 2018.

We recognized that for the first year of virtual group formation and implementation prior to the start of the CY 2018 performance period, the timeframe for virtual groups to make an election by registering would be relatively short, particularly from the date we issue the publication of a final rule toward the end of the 2017 calendar year. To provide solo practitioners and groups with 10 or fewer eligible clinicians with additional time to assemble and coordinate resources, and form a virtual group prior to the start of the CY 2018 performance period, we

provided virtual groups with an opportunity to make an election prior to the publication of our final rule. On October 11, 2017, the election period began and we issued information pertaining to the start date of the election process via subregulatory guidance, which can be accessed on the CMS Web site at <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Value-Based-Programs/MACRA-MIPS-and-APMs/MACRA-MIPS-and-APMs.html>. As discussed in section II.C.4.e. of this final rule with comment period, we are extending the virtual group election. Virtual groups would have from October 11, 2017 to December 31, 2017 to make an election for the 2018 performance year. However, any MIPS eligible clinicians applying to be a virtual group that does not meet all finalized virtual group requirements would not be permitted to participate in MIPS as a virtual group.

As previously noted, solo practitioners and groups participating in a virtual group would have the size of their TIN determined for eligibility purposes. We recognized that the size of a TIN may fluctuate during a performance period with eligible clinicians and/or MIPS eligible clinicians joining or leaving a group. For solo practitioners and groups that are determined eligible to form or join a virtual group based on the one-time determination per applicable performance period, any new eligible clinicians or MIPS eligible clinicians that join the TIN during the performance period would participate in MIPS as part of the virtual group. In such cases, we recognized that a solo practitioner or group may exceed 1 eligible clinician or 10 eligible clinicians, as applicable, associated with its TIN during an applicable performance period, but such solo practitioner or group would have been determined eligible to form or join a virtual group given that the TIN did not have more than 1 eligible clinician or 10 eligible clinicians, as applicable, associated with its TIN at the time of election. As previously noted, the virtual group representative would need to contact the Quality Payment Program Service Center to update the virtual group's information that was provided during the election period if any information changed during an applicable performance period at least one time prior to the start of an applicable submission period (for example, include new NPIs who joined a TIN that is part of a virtual group).

Virtual groups must re-register before each performance period.

The following is a summary of the public comments received regarding our proposed election process for virtual groups.

*Comment:* Generally, all commenters expressed support for the technical assistance infrastructure and two-stage election process.

*Response:* We appreciate the support from commenters.

*Comment:* A majority of commenters expressed concern regarding the election deadline of December 1, while several commenters recommended that an election deadline be established during the performance period in order for virtual groups to have the adequate and necessary time to prepare for the implementation of virtual groups, including the establishment and execution of formal written agreements and coordination within virtual groups to address issues pertaining to interoperability, measure selection, data collection and aggregation, measure specifications, workflows, resources, and other related items. A few commenters recommended an election deadline of June 30 to align with the election deadline for groups and virtual groups to register to use the CMS Web Interface and/or administer the CAHPS for MIPS survey.

*Response:* We appreciate the feedback from commenters regarding the election deadline of December 1 and note that section 1848(q)(5)(I)(iii)(I) of the Act provides that the virtual group election process must require an individual MIPS eligible clinician or group electing to be in a virtual group to make their election prior to the start of the applicable performance period. Given that the CY performance period for the quality and cost performance categories begins on January 1, a solo practitioner or group electing to be in a virtual group would need to make their election prior to January 1. As a result, we are modifying our proposed election deadline by extending it to December 31 of the calendar year preceding the applicable performance period. We note that our proposed election deadline of December 1 was intended to allow us to notify virtual groups of their official status prior to the start of the performance period. With the modification we are finalizing for the election deadline of December 31, it is not operationally feasible for us to notify virtual groups of their official virtual group status prior to the start of the performance period. However, we intend to notify virtual groups of their official status as close to the start of the

performance period as technically feasible.

*Comment:* A few commenters indicated that solo practitioners and groups should have the option of leaving a virtual group during the performance period or allow a virtual group to remove a solo practitioner or group for non-compliance or low performance.

*Response:* We note that the statute specifies that a virtual group election cannot be changed during the performance period, and such election would remain for the duration of the performance period.

*Comment:* A few commenters requested that CMS allow virtual group agreements to be executed during the performance period in order to provide the virtual group parties with time to establish goals and objectives, build relationships with each other, and identify additional agreement provisions that may be necessary to include in order to meet program requirements.

*Response:* We note that section 1848(q)(5)(I)(iii)(I) and (IV) of the Act provides that the virtual group election process must require an individual MIPS eligible clinician or group electing to be in a virtual group to make their election prior to the start of the applicable performance period, and include requirements providing for formal written agreements among individual MIPS eligible clinicians and groups electing to be a virtual group. Thus, we are not authorized to establish an agreement deadline during the performance period. However, we note that the parties to a virtual group agreement would not be precluded from amending their agreement during the performance period, which enables them to incorporate any additional agreement provisions that they later identify as necessary. A virtual group representative would notify CMS of the implementation and execution of an amended virtual group agreement.

*Final Action:* After consideration of the public comments received, we are finalizing the following policies. We are codifying at § 414.1315(a) that a solo practitioner or a group of 10 or fewer eligible clinicians must make their election to participate in MIPS as a virtual group prior to the start of the applicable performance period and cannot change their election during the performance period; and codifying at § 414.1315(c) a two-stage virtual group election process, stage 1 of which is optional, for the applicable 2018 and 2019 performance periods. We are finalizing a modification to our proposed election period deadline by

codifying at § 414.1315(b) that, beginning with performance periods occurring in 2018, a solo practitioner, or group of 10 or fewer eligible clinicians electing to be in a virtual group must make their election by December 31 of the calendar year preceding the applicable performance period.

#### f. Virtual Group Agreements

As noted in section II.C.4.a. of this final rule with comment period, section 1848(q)(5)(I)(iii)(IV) of the Act provides that the virtual group election process must provide for formal written agreements among individual MIPS eligible clinicians (solo practitioners) and groups electing to be a virtual group. We proposed that each virtual group member (that is, each solo practitioner or group) would be required to execute formal written agreements with each other virtual group member to ensure that requirements and expectations of participation in MIPS are clearly articulated, understood, and agreed upon (82 FR 30032 through 30033). We noted that a virtual group may not include a solo practitioner or group as part of the virtual group unless an authorized person of the TIN has executed a formal written agreement. During the election process and submission of a virtual group election, a designated virtual group representative would be required to confirm through acknowledgement that an agreement is in place between each member of the virtual group. An agreement would be executed for at least one performance period. If an NPI joins or leaves a TIN, or a change is made to a TIN that impacts the agreement itself, such as a legal business name change, during the applicable performance period, a virtual group would be required to update the agreement to reflect such changes and submit changes to CMS via the Quality Payment Program Service Center.

We proposed, at § 414.1315(c)(3), that a formal written agreement between each member of a virtual group must include the following elements:

- Expressly state the only parties to the agreement are the TINs and NPIs of the virtual group (at § 414.1315(c)(3)(i)). For example, the agreement may not be between a virtual group and another entity, such as an independent practice association (IPA) or management company that in turn has an agreement with one or more TINs within the virtual group. Similarly, virtual groups should not use existing contracts between TINs that include third parties.
- Be executed on behalf of the TINs and the NPIs by individuals who are authorized to bind the TINs and the

NPIs, respectively at § 414.1315(c)(3)(ii)).

- Expressly require each member of the virtual group (including each NPI under each TIN) to agree to participate in MIPS as a virtual group and comply with the requirements of the MIPS and all other applicable laws and regulations (including, but not limited to, federal criminal law, False Claims Act, anti-kickback statute, civil monetary penalties law, the Health Insurance Portability and Accountability Act of 1996, and physician self-referral law) (at § 414.1315(c)(3)(iii)).

- Require each TIN within a virtual group to notify all NPIs associated with the TIN of their participation in the MIPS as a virtual group (at § 414.1315(c)(3)(iv)).

- Set forth the NPI's rights and obligations in, and representation by, the virtual group, including without limitation, the reporting requirements and how participation in MIPS as a virtual group affects the ability of the NPI to participate in the MIPS outside of the virtual group (at § 414.1315(c)(3)(v)).

- Describe how the opportunity to receive payment adjustments will encourage each member of the virtual group (including each NPI under each TIN) to adhere to quality assurance and improvement (at § 414.1315(c)(3)(vi)).

- Require each member of the virtual group to update its Medicare enrollment information, including the addition and deletion of NPIs billing through a TIN that is part of a virtual group, on a timely basis in accordance with Medicare program requirements and to notify the virtual group of any such changes within 30 days after the change (at § 414.1315(c)(3)(vii)).

- Be for a term of at least one performance period as specified in the formal written agreement (at § 414.1315(c)(3)(viii)).

- Require completion of a close-out process upon termination or expiration of the agreement that requires the TIN (group part of the virtual group) or NPI (solo practitioner part of the virtual group) to furnish, in accordance with applicable privacy and security laws, all data necessary in order for the virtual group to aggregate its data across the virtual group (at § 414.1315(c)(3)(ix)).

On August 18, 2017, we published a 30-day **Federal Register** notice (82 FR 39440) announcing our formal submission of the information collection request (ICR) for the virtual group election process to OMB, which included a model formal written agreement, and informing the public on its additional opportunity to review the ICR and submit comments by September

18, 2017. OMB approved the ICR on September 27, 2017 (OMB control number 0938–1343). The model formal written agreement is not required, but serves as a template that virtual groups could utilize in establishing an agreement with each member of a virtual group. Such agreement template will be made available via subregulatory guidance. Each prospective virtual group member should consult their own legal and other appropriate counsel as necessary in establishing the agreement.

We want to ensure that all eligible clinicians who bill through the TINs that are components of a virtual group are aware of their participation in a virtual group. We want to implement an approach that considers a balance between the need to ensure that all eligible clinicians in a group are aware of their participation in a virtual group and the minimization of administration burden.

We solicited public comment on these proposals and on approaches for virtual groups to ensure that all eligible clinicians in a group are aware of their participation in a virtual group.

The following is a summary of the public comments received regarding our proposal to require formal written agreement between each member of a virtual group.

*Comment:* Several commenters expressed support for the proposed provisions that virtual groups would need to include as part of the formal written agreement establishing a virtual group.

*Response:* We appreciate the support from commenters.

*Comment:* A few commenters expressed concern regarding the burden associated with the agreements required for virtual group implementation and execution. One commenter indicated that the formal written agreement process, while essential to allow for data capture, poses administrative burden and other complexities when utilizing multiple submission mechanisms.

*Response:* We note that section 1848(q)(5)(I)(iii)(IV) of the Act provides that the virtual group election process must provide for “formal written agreements among MIPS eligible professionals” (that is, individual MIPS eligible clinicians and groups) that elect to be a virtual group. As such, we do not believe that our proposal to require a written agreement governing the virtual group is excessively burdensome. However, although we believe the agreements should identify each eligible clinician billing under the TIN of a practice within the virtual group, we have concluded that it would be unnecessarily burdensome to require

each such eligible clinician to be a party to the virtual group agreement. In addition, we agree that it is unnecessarily burdensome to require each solo practitioner or group that wishes to be part of a virtual group to have a separate agreement with every other solo practitioner or group that wishes to be part of the same virtual group. We do not believe the statute compels such a requirement; a single agreement among all solo practitioners and groups forming a virtual group is sufficient to implement the statutory requirement. Accordingly, we have revised the regulation text at § 414.1315(c)(3) to clarify that the parties to a formal written virtual group agreement must be only the groups and solo practitioners (as identified by name of party, TIN, and NPI) that compose the virtual group. We note that we are modifying our proposals for greater clarity.

We recognize that our proposals regarding virtual group agreements as well as other virtual group matters used the term “member of a virtual group” inconsistently. In some places, we used the term to refer only to the components of the virtual group (that is, the solo practitioners and groups that can form a virtual group), while in other places we used the term to mean both the components of the virtual group and the eligible clinicians billing through a TIN that is a component of the virtual group. We believe that some of the perceived burden of the requirement for a virtual group agreement was due to the ambiguous use of this terminology. Wherever possible, we modified our proposals to ensure that they appropriately distinguishes between the components of a virtual group and the eligible clinicians billing through a TIN that is a component of a virtual group.

*Comment:* One commenter expressed support for the proposed agreement provision that would require the parties to a virtual group agreement to be only solo practitioners and groups (not third parties), while another commenter did not support such provision and indicated that many small practices have joined IPAs to provide centralized support for quality improvement training, health technology support, reporting, and analytics needed for success under payment reform programs such as the Quality Payment Program. The commenter also indicated that IPAs could serve as the administrator of a virtual group by collecting and submitting data on behalf of the virtual group and requested that CMS eliminate the requirement for all members of a virtual group to execute a single joint agreement and expand the allowable

scope of the agreements by permitting IPAs to sign a virtual group agreement with each member of a virtual group.

*Response:* For purposes of participation in MIPS as a virtual group, we note that eligible clinicians within a virtual group are collectively assessed and scored across each performance category based on applicable measures and activities that pertain to the performance of all TINs and NPIs within a virtual group. Each TIN and NPI within a virtual group has an integral role in improving quality of care and health outcomes, and increasing care coordination. As such, we believe it is appropriate to prohibit third parties from becoming parties to a virtual group agreement. However, we note that virtual groups are not precluded from utilizing, or executing separate agreements with, third parties to provide support for virtual group implementation.

*Comment:* To minimize the administrative burden, one commenter suggested that CMS not require all agreement requirements to be met in freestanding agreements. The commenter noted that the agreement could be an addendum to existing contracts to eliminate the need to draft an independent agreement, unless necessary.

*Response:* We consider an “existing” contract to mean a contract that was established and executed prior to the formation of a virtual group. Depending on the parties to an existing contract, freestanding virtual group agreements may not be necessary. For example, if an existing contract was established between two or more TINs prior to the formation of a virtual group and such TINs formed a virtual group among themselves, the required provisions of a virtual group agreement could be included in the existing contract as an addendum as long as the parties to the existing contract include each TIN within the virtual group and all other requirements are satisfied prior to the applicable performance period. However, if the existing contract is with a third party intermediary or does not include each TIN within the virtual group, the virtual group agreement could not be effectuated as an addendum to the existing contract.

We recognize that including virtual group agreement provisions as an addendum to an existing contract may reduce administrative burden and in certain circumstances such an addendum can be incorporated to an existing contract. However, we do believe it is critical that the inclusion of such provisions as an addendum does not limit or restrict the responsibility of

each party to collectively meet the program requirements under MIPS. We reiterate that the statute requires formal written agreements to between each solo practitioner and group forming the virtual group. Individuals billing under the TIN of a party to a virtual group are collectively assessed and scored across each performance category based on applicable measures and activities that pertain to the performance of all TINs and NPIs within a virtual group. Each TIN and NPI within a virtual group has an integral role in improving quality of care and health outcomes, and increasing care coordination. As such, we believe it is appropriate to require agreements to only be between solo practitioners and groups and not include third parties. However, we note that virtual groups are not precluded from utilizing, or executing separate agreements with, third parties to provide support for virtual group implementation.

*Comment:* One commenter requested that CMS clarify the parameters surrounding the proposed agreement provision that requires agreements to be executed on behalf of the TINs and the NPIs by individuals who are authorized to bind the TINs and the NPIs, and how CMS would evaluate the criterion in such provision when reviewing written agreements.

*Response:* If a solo practitioner (or his or her professional corporation) is a party to a virtual group agreement, the solo practitioner could execute the agreement individually or on behalf of his or her professional corporation. We recognize that groups (TINs) have varying administrative and operational infrastructures. In general, one or more officers, agents, or other authorized individuals of a group would have the authority to legally bind the group. The parties to a virtual group agreement should ensure that the agreement is executed only by appropriately authorized individuals.

*Comment:* One commenter expressed support for the proposed agreement provision that would require NPIs billing under a TIN in a virtual group to agree to participate in MIPS as a virtual group, and urged CMS to notify, by a means of direct communication, each NPI regarding his or her participation in MIPS as part of a virtual group prior to the performance period.

*Response:* We appreciate the support from the commenter. We believe that it is critical for each eligible clinician in a virtual group to be aware of his or her participation in MIPS as part of a virtual group. Based on our experience under the Medicare Shared Savings Program, we found that NPIs continued to be

unaware of their participation in a Medicare Shared Savings Program ACO regardless of the ACO’s obligation to notify each NPI via direct communication. We considered directly notifying all NPIs regarding their participation in MIPS as part of a virtual group, but based on our experience under the Medicare Shared Savings Program, we do not believe that such action would be an effective way of ensuring that each NPI is aware of his or her TIN being part of a virtual group. We believe that communication within a TIN is imperative and the crux of ensuring that each NPI is aware of his or her participation in MIPS as part of a virtual group. As part of the virtual group election process, we will notify each virtual group representative regarding the official status of the virtual group. We will also require each TIN within a virtual group to notify all NPIs associated with the TIN of their participation in the MIPS as a virtual group.

*Comment:* One commenter expressed support for one of the proposed agreement provisions that would set forth the NPI’s rights and obligations in, and representation by, the virtual group. As part of the process for establishing an agreement, the commenter, as well as other commenters, requested that CMS allow virtual groups to discuss with all participants in the virtual group the ways in which the virtual group would meet the requirements for each performance category, the type of submission mechanism(s) the virtual group intends to utilize, the timelines for aggregating data across the TINs within the virtual group and for data submission, and the assessment and scoring of performance and application of the MIPS payment adjustment. Another commenter requested that the agreements include other elements such as requiring participation in improvement activities, use of EHR, and data sharing workflows, and suggested that CMS provide guidance on specific efficiencies and improvement goals that a virtual group could support and encourage virtual groups to create a plan for achieving those goals as a virtual group. A commenter suggested that the model agreement include provisions related to a mutual interest in quality performance, shared responsibility in decision making, a meaningful way to effectively use data to drive performance, and a mechanism to share best practices within the virtual group. Another commenter requested for CMS to develop a checklist for interested TINs to assist them in understanding the

requirements pertaining a virtual group agreement.

*Response:* For the successful implementation of virtual groups, we believe that it is critical for everyone participating in a virtual group (including the individuals billing under the TIN of a group) to understand their rights and obligations in a virtual group. We believe that virtual groups should have the flexibility to identify additional requirements that would facilitate and guide a virtual group as it works to achieve its goals and meet program requirements. We note that the model agreement serves as a template that virtual groups could utilize in establishing a virtual group agreement, and could include other elements that would meet the needs of the virtual group to ensure that each TIN and NPI within a virtual group are collectively and collaboratively working together. We encourage the parties to a virtual group agreement to actively engage in discussions with eligible clinicians to develop a strategic plan, identify resources and needs, and establish processes, workflows, and other tools as they prepare for virtual group reporting. To support the efforts of solo practitioners and groups with 10 or fewer eligible clinicians in virtual group implementation, we intend to publish a virtual group toolkit that provides information pertaining to requirements and outlines the steps a virtual group would pursue during an the election process.

*Comment:* One commenter requested that the agreement be a 1-year term and renewable thereafter.

*Response:* We note that an agreement will need to be executed for at least one performance period. However, with virtual groups being required to be assessed and scored across all four performance categories, and the quality and cost performance categories having a calendar year performance period (at § 414.1320), we clarify that a virtual group agreement would need to be executed for least a 1-year term. Virtual groups have the flexibility to establish a new agreement or renew the execution of an existing agreement for the preceding applicable performance period.

*Comment:* One commenter requested that the virtual group agreements clearly specify the repercussions of an eligible clinician or group within a virtual group who fails to report as part of the virtual group.

*Response:* We believe that the proposed provisions of a virtual group agreement provide a foundation that sets forth the responsibilities and obligations of each party for a

performance period. Virtual groups have the flexibility to include other elements in an agreement. Each virtual group will be unique, and as a result, we encourage virtual groups to establish and execute an agreement that guides how a virtual group would meet its goals and objectives, and program requirements. Some virtual groups may elect to include a provision that outlines the implications of a solo practitioner or group failing to meet the elements of an agreement. We will also require such agreements to describe how the opportunity to receive payment adjustments will encourage each member of the virtual group (and each NPI under each TIN in the virtual group) to adhere to quality assurance and improvement.

*Comment:* One commenter recommended that virtual group agreements contain similar elements used in agreements by the private sector, which would address factors pertaining to health IT and administrative and operationalization components such as: Requiring the establishment of a plan for integrating each virtual group component's health IT (for example, EHRs, patient registries, and practice management systems), including a timeline to work with health IT vendors on such integration, if applicable; requiring component of a virtual group to serve a common patient population and provide a list of hospitals and/or facilities with which they have an affiliation and a list of counties in which they would be active; and determining how a virtual group would be staffed and governed by identifying staff allocations to organizational leadership, clinical leadership, practice consultants, and IT resources.

*Response:* We recognize that different sectors may have established agreements with various elements to facilitate and assure attainment of program goals and objectives, which may serve as a useful tool to virtual groups. We encourage virtual groups to assess whether or not their agreement should include other elements in addition to our proposed agreement provisions. Virtual groups have the flexibility to identify other elements that would be critical to include in an agreement specific to their particular virtual group. We believe it is essential to continue to provide virtual groups with the flexibility to establish agreements that will most appropriately reflect the unique characteristics of a virtual group.

Also, we note that different TINs, particularly small practices, may have access to different resources, which

makes it difficult to identify specific requirements pertaining to the inclusion of administration and operationalization of health IT components in a virtual group agreement that would be universally applicable to any virtual group composition, while maintaining the flexibility and discretion afforded to virtual groups in establishing additional elements for their agreements that meet the needs of virtual groups. We recognize that each TIN within a virtual group will need to coordinate within the virtual group to address issues pertaining to interoperability, data collection, measure specifications, workflows, resources, and other related items, and believe that a virtual group is the most appropriate entity to determine how it will prepare, implement, and execute the functions of the virtual group to meet the requirements for each performance category. We believe that our proposed agreement elements provide a critical foundation for virtual group implementation, which establishes a clear responsibility and obligation of each NPI to the virtual group for the duration of an applicable performance period.

*Comment:* Many commenters expressed concern regarding the timeframe virtual groups would have to make an election and establish agreements. The commenters indicated that the election period is very restrictive and does not provide interested solo practitioners and groups with sufficient time to meet and execute the required elements of an agreement and work through all of the necessary details in forming and implementing a virtual group. The commenters also noted that contractual agreements between NPIs and TINs often take several months, at least, to negotiate and finalize. A few commenters indicated that interested solo practitioners and groups would not have adequate time to make informed decisions regarding virtual group participation. The commenters noted that it would be helpful to have the virtual group agreement template available for review and comment in advance. One commenter indicated that the lack of virtual group requirements at this early stage of the Quality Payment Program causes a lack of clarity and stability for eligible clinicians and/or groups interested in forming virtual groups.

*Response:* In order to provide support and reduce burden, we intend to make TA available, to the extent feasible and appropriate, to support clinicians who choose to come together as a virtual group. Clinicians can access the TA infrastructure and resources that they

may already be utilizing. In section II.C.4.e. of this final rule with comment period, we establish a two-stage virtual group election process, stage 1 of which is optional, for performance periods occurring in 2018 and 2019 (82 FR 30030 through 30032). Stage 1 pertains to virtual group eligibility determinations, and stage 2 pertains to virtual group formation. During stage 1, solo practitioners and groups have the option to contact their designated TA representative in order to obtain information pertaining to virtual groups and/or determine whether or not they are eligible, as it relates to the practice size requirement. Clinicians who do not elect to contact their designated TA representative would still have the option of contacting the Quality Payment Program Service Center to obtain information pertaining to virtual groups.

We recognize that the election period, including the timeframe virtual groups would have to establish and implement the virtual group agreement, and the timeline for establishing virtual group policies in this final rule with comment period is short and imposes certain potential barriers for virtual group formation and limitations for the first year of virtual group implementation that we are not able to eliminate due to statutory constraints, such as the requirement for virtual groups to make an election made prior to an applicable performance period. In order to mitigate some of the challenges, we developed a model agreement to serve as a template that could be utilized by virtual groups as they prepare for the implementation of virtual groups and are finalizing a modification to the election period deadline by extending it to December 31, which can be accessed on the CMS Web site at <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Value-Based-Programs/MACRA-MIPS-and-APMs/MACRA-MIPS-and-APMs.html>. In this final rule with comment period, we are establishing virtual group policies for the 2018 and 2019 performance periods. Solo practitioners and groups with 10 or fewer eligible clinicians that are not able to form virtual groups for the 2018 performance period should have sufficient time to prepare and implement requirements applicable to virtual groups for the 2019 performance period.

*Comment:* A majority of commenters indicated that virtual group formation involves preparing health IT systems, training staff to be ready for implementation, sharing and aggregating data, and coordinating workflows. The commenters expressed

concern that while such steps are necessary to ensure the success of virtual groups, such steps could raise issues regarding compliance with certain fraud and abuse laws, particularly the physician self-referral law (section 1877 of the Act) and the anti-kickback statute (section 1128B(b) of the Act). The commenters requested that CMS assess the potential risks virtual groups may have under the physician self-referral law and whether or not a regulatory exception would be necessary to successfully implement and maximize the advantages of the virtual group option. One commenter noted that parties to a virtual group agreement may want to enter into financial arrangements with each other to maximize the benefit of the virtual group (for example, pay for one party to organize and submit all measures on behalf of all the virtual group parties) and that such an arrangement may result in some eligible clinicians being unable to refer patients to other participants in the virtual group without running afoul of the physician self-referral law, unless CMS established an exception for virtual groups. A few commenters requested that the Secretary exercise prosecutorial discretion by not enforcing the anti-kickback statute and the physician self-referral law for activities involving the development and operation of a virtual group.

Many commenters expressed concerns regarding the lack of information and clarity pertaining to the interaction between virtual groups and the physician self-referral law, anti-kickback statute, and antitrust law. The commenters requested that CMS clarify the program integrity obligations of virtual groups, issue safe harbors, and publish guidance outlining how the physician self-referral law, anti-kickback statute, and antitrust law apply to virtual groups. The commenters asserted that this was needed in order for solo practitioners and groups to maintain safeguards against fraud and abuse while soliciting partners to form a virtual group and working toward common MIPS goals.

*Response:* Nothing in this final rule with comment period changes the application of the physician self-referral law, anti-kickback statute, or anti-trust laws. We note that a “group practice” as defined for purposes of the physician self-referral law is separate and distinct from a “virtual group” as defined in this final rule. A virtual group may, but is not required, to include a “group practice” as defined for purposes of the physician self-referral law. Whether an entity that is assigned a TIN and is included in a virtual group should be a

“group practice” (as defined for purposes of the physician self-referral law) is a separate legal issue that is not governed by this final rule with comment period. We recognize that a virtual group may include multiple clinician practices and that the clinicians in one practice may refer patients for services that will be furnished by other practices in the virtual group. However, we believe that the virtual group arrangement can be structured in a manner that both complies with an existing physician self-referral law exception and does not violate the anti-kickback statute. We note that the issuance of guidance, exceptions, or safe harbors regarding the physician self-referral law or the anti-kickback statute is beyond the scope of this rulemaking, and MACRA does not authorize the Secretary to waive any fraud and abuse laws for MIPS. Finally, HHS is not authorized to interpret or provide guidance regarding the anti-trust laws.

*Comment:* Several commenters supported the development of a model agreement. One commenter indicated that the model agreement lacked the details necessary to enable virtual groups to cover all required criteria and urged CMS to supply a template that is inclusive of needed detail and instructions.

*Response:* We appreciate the support from commenters. In regard to the model agreement, we established such a template in order to reduce the burden of virtual groups having to develop an agreement. On August 18, 2017, we published a 30-day **Federal Register** notice (82 FR 39440) announcing our formal submission of the ICR for the virtual group election process to OMB, which included a model formal written agreement, and informing the public on its additional opportunity to review the information collection request and submit comments by September 18, 2017. OMB approved the ICR on September 27, 2017 (OMB control number 0938–1343). The utilization of our model agreement is not required, but serves as a tool that can be utilized by virtual groups. Each prospective party to a virtual group agreement should consult their own legal and other appropriate counsel as necessary in establishing the agreement. We note that the received comments pertaining to the content of the model agreement are out of scope for this final rule with comment period.

*Final Action:* After consideration of public comments received, we are finalizing with modification our proposal at § 414.1315(c)(3) regarding virtual group agreements. This final rule

with comment period requires a formal written agreement between each solo practitioner and group that composes a virtual group; the revised regulation text makes it clear the formal written virtual group agreement must identify, but need not include as parties to the agreement, all eligible clinicians who bill under the TINs that are components of the virtual group. The requirement to execute a formal written virtual group agreement ensures that requirements and expectations of participation in MIPS are clearly articulated, understood, and agreed upon. We are finalizing our proposal that a virtual group agreement must be executed on behalf of a party to the agreement by an individual who is authorized to bind the party. For greater clarity, we are finalizing with modification our proposals at § 414.1315(c)(3) that a formal written agreement between each member of a virtual group must include the following elements:

- Identifies the parties to the agreement by name of party, TIN, and NPI, and includes as parties to the agreement only the groups and solo practitioners that compose the virtual group (at § 414.1315(c)(3)(i)).
- Is executed on behalf of each party by an individual who is authorized to bind the party (at § 414.1315(c)(3)(ii)).
- Expressly requires each member of the virtual group (and each NPI under each TIN in the virtual group) to participate in MIPS as a virtual group and comply with the requirements of the MIPS and all other applicable laws and regulations (including, but not limited to, federal criminal law, False Claims Act, anti-kickback statute, civil monetary penalties law, the Health Insurance Portability and Accountability Act of 1996, and physician self-referral law) (at § 414.1315(c)(3)(iii)).
- Identifies each NPI under each TIN in the virtual group and requires each TIN within a virtual group to notify all NPIs associated with the TIN of their participation in the MIPS as a virtual group (at § 414.1315(c)(3)(iv)).
- Sets forth the NPI's rights and obligations in, and representation by, the virtual group, including without limitation, the reporting requirements and how participation in MIPS as a virtual group affects the ability of the NPI to participate in the MIPS outside of the virtual group (at § 414.1315(c)(3)(v)).
- Describes how the opportunity to receive payment adjustments will encourage each member of the virtual group (and each NPI under each TIN in the virtual group) to adhere to quality

assurance and improvement (at § 414.1315(c)(3)(vi)).

- Requires each party to the agreement to update its Medicare enrollment information, including the addition and deletion of NPIs billing through its TIN, on a timely basis in accordance with Medicare program requirements and to notify the virtual group of any such changes within 30 days after the change (at § 414.1315(c)(3)(vii)).

- Is for a term of at least one performance period as specified in the formal written agreement (at § 414.1315(c)(3)(viii)).

- Requires completion of a close-out process upon termination or expiration of the agreement that requires each party to the virtual group agreement to furnish, in accordance with applicable privacy and security laws, all data necessary in order for the virtual group to aggregate its data across the virtual group (at § 414.1315(c)(3)(ix)).

During the election process and submission of a virtual group election, a designated virtual group representative will be required to confirm through acknowledgement that an agreement is in place between all solo practitioners and groups that compose the virtual group. An agreement will be executed for at least one performance period. If a NPI joins or leaves a TIN, or a change is made to a TIN that impacts the agreement itself, such as a legal business name change, during the applicable performance period, a virtual group will be required to update the agreement to reflect such changes and submit changes to CMS via the Quality Payment Program Service Center.

#### g. Virtual Group Reporting Requirements

As discussed in section II.C.4.d. of this final rule with comment period, we believe virtual groups should generally be treated under the MIPS as groups. Therefore, for MIPS eligible clinicians participating at the virtual group level, we proposed at § 414.1315(d) the following requirements (82 FR 30033):

- Individual eligible clinicians and individual MIPS eligible clinicians who are part of a TIN participating in MIPS at the virtual group level would have their performance assessed as a virtual group (at § 414.1315(d)(1)).

- Individual eligible clinicians and individual MIPS eligible clinicians who are part of a TIN participating in MIPS at the virtual group level would need to meet the definition of a virtual group at all times during the performance period for the MIPS payment year (at § 414.1315(d)(2)).

- Individual eligible clinicians and individual MIPS eligible clinicians who are part of a TIN participating in MIPS at the virtual group level must aggregate their performance data across multiple TINs in order for their performance to be assessed as a virtual group (at § 414.1315(d)(3)).

- MIPS eligible clinicians that elect to participate in MIPS at the virtual group level would have their performance assessed at the virtual group level across all four MIPS performance categories (at § 414.1315(d)(4)).

- Virtual groups would need to adhere to an election process established and required by CMS (at § 414.1315(d)(5)).

The following is a summary of the public comments received regarding our proposed virtual group reporting requirements.

*Comment:* Many commenters generally supported our proposed reporting requirements for virtual groups.

*Response:* We appreciate the support from the commenters.

*Comment:* One commenter expressed support of our proposed virtual group reporting requirements and indicated that a majority of practicing vascular surgeons are part of private practices, including groups of 10 or fewer eligible clinicians, and would benefit from participating in MIPS as part of a virtual group. The commenter noted that the implementation of virtual groups would ease burdens on small practices and eligible clinicians by allowing them to report data together for each performance category, and be assessed and scored as a virtual group. Another commenter supported our proposal that allows small practices to aggregate their data at the virtual group level, which would allow them to have a larger denominator to spread risk and mitigate the impact of adverse outlier situations.

*Response:* We appreciate the support from the comment regarding our proposed virtual group reporting requirements.

*Comment:* One commenter indicated that the reporting of performance data for all NPIs under a TIN participating in a virtual group, particularly non-MIPS eligible clinicians who are excluded from MIPS participation, would be a regulatory burden to virtual groups.

*Response:* We do not believe that requiring virtual groups to report on data for all NPIs under a TIN participating in a virtual group would be burdensome to virtual groups. Based on previous feedback from stakeholders regarding group reporting under PQRS, we believe that it would be more burdensome for virtual groups to

determine which clinicians are MIPS eligible versus not MIPS eligible and remove performance data for non-MIPS eligible clinicians when reporting as a virtual group. While entire TINs participate in a virtual group, including each NPI under a TIN, and are assessed and scored collectively as a virtual group, we note that only NPIs that meet the definition of a MIPS eligible clinician would be subject to a MIPS payment adjustment.

*Comment:* A majority of commenters did not support our proposal to require all eligible clinicians who are part of a TIN participating in MIPS at the virtual group level to aggregate their performance data across multiple TINs in order for their performance to be assessed and scored as a virtual group. The commenters expressed concerns that it would be burdensome for rural and small practices and prohibitive for virtual groups to perform data aggregation and requested that CMS aggregate data for virtual groups. The commenters indicated that the requirement for virtual groups to aggregate data across the virtual group could be a potential barrier for virtual group participation and would be unlikely to occur without error. One commenter requested that CMS further define data aggregation and clarify whether or not individual reports from each NPI within a virtual group could simply be added together for all NPIs in the virtual group or if each NPI's data could be pulled from each TIN's QRDA file.

*Response:* We appreciate the feedback from the commenters and recognize that data aggregation across multiple TINs within a virtual group may pose varying challenges. At this juncture, it is not technically feasible for us to aggregate the data for virtual groups, but will consider such option in future years. In order to support the implementation of virtual groups as a participation option under MIPS, we intend to issue subregulatory guidance pertaining to data aggregation for virtual groups.

*Comment:* A few commenters recommended that for the first year of virtual group implementation, CMS hold virtual groups and registries that support virtual groups harmless from penalties if they encounter technical challenges related to data aggregation. The commenters noted that the potential penalty for technical challenges in data aggregation is a severe 5 percent for TINs that are already operating on small margins and expressed concerns that registries supporting virtual group reporting would be opening themselves to potential disqualification for the

aforementioned challenges in data aggregation.

*Response:* We appreciate the feedback from commenters and note that statute requires virtual groups to be assessed and scored, and subject to a MIPS payment adjustment as a result of TINs participating in a virtual group under MIPS. The statute does not authorize us to establish additional exclusions that are not otherwise identified in statute. If a virtual group encounters technical challenges regarding data aggregation and are not able to report on measures and activities via QCDRs, qualified registries, or EHRs, virtual groups would have the option of reporting via the CMS Web Interface (for virtual groups of 25 or more eligible clinicians), a CMS-approved survey vendor for the CAHPS for MIPS survey, and administrative claims (if applicable) for the quality and cost performance categories, and via attestation for the improvement activities and advancing care information performance categories. The administrative claims submission mechanism does not require virtual groups to submit data for purposes of the quality and cost performance categories but the calculation of performance data is conducted by CMS.

We note that the measure reporting requirements applicable to groups are also generally applicable to virtual groups. However, we note that the requirements for calculating measures and activities when reporting via QCDRs, qualified registries, EHRs, and attestation differ in their application to virtual groups. Specifically, these requirements apply cumulatively across all TINs in a virtual group. Thus, virtual groups will aggregate data for each NPI under each TIN within the virtual group by adding together the numerators and denominators and then cumulatively collate to report one measure ratio at the virtual group level. Moreover, if each MIPS eligible clinician within a virtual group faces a significant hardship or has EHR technology that has been decertified, the virtual group can apply for an exception to have its advancing care information performance category reweighted. If such exception application is approved, the virtual group's advancing care information performance category is reweighted to zero percent and applied to the quality performance category increasing the quality performance weight from 50 percent to 75 percent.

Additionally, the data submission criteria applicable to groups are also generally applicable to virtual groups. However, we note that data completeness and sampling requirements for the CMS Web Interface

and CAHPS for MIPS survey differ in their application to virtual groups. Specifically, data completeness for virtual groups applies cumulatively across all TINs in a virtual group. Thus, we note that there may be a case when a virtual group has one TIN that falls below the 60 percent data completeness threshold, which is an acceptable case as long as the virtual group cumulatively exceeds such threshold. In regard to the CMS Web Interface and CAHPS for MIPS survey, sampling requirements pertain to Medicare Part B patients with respect to all TINs in a virtual group, where the sampling methodology would be conducted for each TIN within the virtual group and then cumulatively aggregated across the virtual group. A virtual group would need to meet the beneficiary sampling threshold cumulatively as a virtual group.

*Comment:* A few commenters urged CMS to set clear expectations as to how virtual groups should submit data across performance categories and from multiple systems while ensuring their information is aggregated and reported correctly to maximize the virtual group's final score and requested that CMS provide clarity regarding virtual group reporting. One commenter indicated that virtual group reporting can be completed through QCDRs, in which multiple eligible clinicians in a virtual group could report to one place on the quality of care furnished to their respective patients. The commenter noted that the commitments from CMS and ONC regarding interoperability and electronic data sharing would continue to further the feasibility of virtual group reporting through EHRs in the future. However, a few commenters requested clarification regarding how data can and should be submitted for virtual groups, and whether or not QCDRs and other clinical outcomes data registries would be able to assist virtual groups by sharing in the responsibility for aggregating data. The commenters noted that the aggregation of data across various TINs and health IT systems may be logistically difficult and complex, as groups and health IT systems have different ways of collecting and storing data and stated that data aggregation across various systems for measures and activities under each performance category may not be possible if qualified registries do not have the option to assist virtual groups.

*Response:* We appreciate the feedback from commenters and recognize that commenters seek clarification regarding submission requirements for third party intermediaries such as QCDRs, qualified registries, and EHRs. We note that third

party intermediaries would need to meet the same requirements established at § 414.1400 and form and manner per submission mechanism when submitting data on behalf of virtual groups. We intend to issue subregulatory guidance for virtual groups and third party intermediaries pertaining to data aggregation and the collection and submission of data.

*Comment:* One commenter requested clarification regarding the submission of data for virtual groups via EHRs. The commenter indicated that while groups may already be familiar with the reporting of quality measures via EHRs, the addition of the improvement activities and advancing care information performance categories adds a new level of complexity. Also, the commenter requested clarification regarding whether or not CMS has an established mechanism that would accept multiple QRDA III submissions for a single virtual group pertaining to the improvement activities and advancing care information performance categories. The commenter indicated that standards do not exist to combine files pertaining to the improvement activities and advancing care information performance categories from disparate vendors and requested clarification regarding whether or not combined files would be needed for virtual groups and for CMS to issue guidance to vendors at least 18 months in advance regarding development and implementation.

*Response:* We appreciate the feedback from the commenter and note that we intend to issue additional subregulatory guidance for third party intermediaries pertaining to the collection and submission of data for all performance categories. In regard to the submission of multiple QRDA III files, our system is not built to allow for the submission of multiple QRDA III files. Groups and virtual groups are required to submit one QRDA III file for each performance category. Given that virtual groups are required to aggregate their data at the virtual level and submit one file of data per performance category, there may be circumstances that would require a virtual group to combine their files in order to meet the submission requirements. However, it should be noted that all other measures and activities requirements would also need to be met in order for virtual groups to meeting reporting and submission requirements.

*Comment:* One commenter requested that CMS allow QCDRs and other clinical outcomes data registries to support virtual groups in aggregating measures and activities for reporting,

*Response:* We note that virtual groups are not precluded from utilizing third party intermediaries such as QCDRs and qualified registries to support virtual groups in meeting virtual group reporting requirements. We intend to issue subregulatory guidance for virtual groups and third party intermediaries pertaining to data aggregation and the collection and submission of data.

*Comment:* A few commenters expressed concern that the submission mechanisms available to virtual groups involve multiple layers of legal and operational complexity. The commenters indicated that certain registries have internal data governance standards, including patient safety organization requirements, that they must follow when contracting with single TIN participants, such that legal agreements made between solo practitioners and small groups within a virtual group may complicate the registries' ability to comply with those requirements. The commenters recommended that CMS provide guidance to registries on how to handle data sharing among virtual groups with respect to patient safety organization requirements. One commenter expressed concern regarding how registries would be able to meet virtual group requirements to report a sufficient number of measures given that some registries may have made a variety of measures available for individual eligible clinicians to report, but may need to increase the available measures to report in order to support virtual group reporting. The commenter requested that CMS provide guidance regarding the expectations for registries supporting virtual group reporting, particularly when considering the role of specialty registries and the quality performance category.

*Response:* We recognize that certain registries may have internal governance standards complicating how they would support virtual groups, but note that by definition, a virtual group is a combination of TINs. We appreciate the feedback from commenters and note that we intend to issue additional subregulatory guidance for third party intermediaries such as qualified registries.

*Comment:* One commenter expressed concern regarding how quality data would be collected, aggregated and displayed for solo practitioners and groups composing the virtual group. The commenter requested clarification regarding whether or not solo practitioners and groups composing the virtual group would be allowed to view the quality data of other solo practitioners and groups in the virtual

group. Also, the commenter indicated that it is not clear what responsibility a qualified registry would have, if any, to verify if a virtual group reporting through a registry has all the appropriate legal agreements in place prior to their participation in the registry.

*Response:* We appreciate the commenter expressing such concern and note that we intend to issue subregulatory guidance for virtual groups and third party intermediaries pertaining to data aggregation and the collection and submission of data. We note that the measure reporting requirements applicable to groups are also generally applicable to virtual groups. However, we note that the requirements for calculating measures and activities when reporting via QCDRs, qualified registries, EHRs, and attestation differ in their application to virtual groups. Specifically, these requirements apply cumulatively across all TINs in a virtual group. Thus, virtual groups will aggregate data for each NPI under each TIN within the virtual group by adding together the numerators and denominators and then cumulatively collate to report one measure ratio at the virtual group level. Moreover, if each MIPS eligible clinician within a virtual group faces a significant hardship or has EHR technology that has been decertified, the virtual group can apply for an exception to have its advancing care information performance category reweighted. If such exception application is approved, the virtual group's advancing care information performance category is reweighted to zero percent and applied to the quality performance category increasing the quality performance weight from 50 percent to 75 percent.

Additionally, the data submission criteria applicable to groups are also generally applicable to virtual groups. However, we note that data completeness and sampling requirements for the CMS Web Interface and CAHPS for MIPS survey differ in their application to virtual groups. Specifically, data completeness for virtual groups applies cumulatively across all TINs in a virtual group. Thus, we note that there may be a case when a virtual group has one TIN that falls below the 60 percent data completeness threshold, which is an acceptable case as long as the virtual group cumulatively exceeds such threshold. In regard to the CMS Web Interface and CAHPS for MIPS survey, sampling requirements pertain to Medicare Part B patients with respect to all TINs in a virtual group, where the sampling methodology would be conducted for

each TIN within the virtual group and then cumulatively aggregated across the virtual group. A virtual group would need to meet the beneficiary sampling threshold cumulatively as a virtual group. In regard to the comment requesting clarification on whether or not solo practitioners and groups composing a virtual group would be allowed to view quality data of other solo practitioners and groups in the virtual group, we note that virtual groups have the flexibility to determine if, how, and when solo practitioners and groups in the virtual group would be able to view quality data and/or data pertaining to the other three performance categories, in which such permissibility could be established as a provision under the virtual group agreement. Moreover, the establishment and execution of a virtual group agreement is the responsibility of the parties electing to participate in MIPS as part of a virtual group. Health IT vendors or third party intermediaries are not required to verify that each virtual group has established and executed a prior virtual group agreement.

*Comment:* One commenter indicated that there would be added technical challenges for a virtual group representative when submitting on behalf of their virtual group given that he or she may face errors or warnings during submission and, due to the possibility that individual files could come from various EHR vendors, that representative would not have authority or the ability to work directly with another TIN's vendor.

*Response:* We note that virtual groups have the flexibility to determine how they would complete reporting under MIPS. We believe that virtual groups would need to address operational elements to ensure that it would meet the reporting requirements for each performance category. Virtual groups are able to utilize the same multiple submission mechanisms that are available to groups. For the 2018 performance period, groups and virtual groups can utilize multiple submission mechanism, but only use one submission mechanism per performance category. Starting with the 2019 performance period, groups and virtual groups will be able to utilize multiple submission mechanisms for each performance category.

*Comment:* One commenter recommended that the virtual group infrastructure be defined and tested prior to implementation and noted that virtual group implementation does not appear to be ready for CY 2018. Another commenter suggested that the virtual

group reporting option have a transition year for the CY 2018 and CY 2019 performance periods in order for solo practitioners and groups to become familiar with implementing the virtual group reporting option as well as the election process and executing agreements. The commenter requested that virtual groups have the "pick your pace" options that were established for the CY 2017 performance period for the CY 2018 performance period in order to test the virtual group option, whereby the virtual group would only need to report one quality measure or one improvement activity to avoid a negative MIPS payment adjustment.

*Response:* We note that it is not permissible for virtual groups to meet the requirements established for the 2017 performance period given that such requirements are not applicable to the 2018 performance period. Moreover, the "pick your pace" options were based on the lower performance threshold established for the CY 2017 performance period. As discussed in section II.C.8.c. of this final rule with comment period, we are finalizing a higher performance threshold for the CY 2018 performance period, and the statute requires the establishment of one performance threshold for a performance period, which is the same for all MIPS eligible clinicians regardless of how or when they participate in MIPS. Year 2 requirements for virtual groups are defined throughout this final rule with comment period.

*Comment:* One commenter requested that CMS require virtual groups to report a plan prior to the start of the performance period regarding how members of the virtual group (solo practitioners and groups) would share data internally, including how they would identify the measures that the virtual group would report, and share NPI-level performance data on those measures with each other during the performance period to facilitate performance improvement.

*Response:* We appreciate the commenter recommending requirements for virtual groups, but disagree with the recommendation that would require virtual groups to submit a report to us prior to the start of the performance period outlining how the virtual group would share data internally, how the virtual group would identify the measures and activities to report, and share NPI-level performance data on those measures with each other during the performance period to facilitate performance improvement. We believe that the submission of such report prior to the start of the performance period

would increase administrative burden for virtual groups. However, we encourage virtual groups to actively engage in discussions with its members to develop a strategic plan, select measures and activities to report, identify resources and needs, and establish processes, workflows, and other tools as they prepare for virtual group reporting. Virtual groups have the flexibility to identify other elements, in addition to our proposed agreement provisions, that would be critical to include in an agreement specific to their particular virtual group. We believe that virtual groups should have the flexibility to identify additional requirements that would facilitate and guide a virtual group as it works to achieve its goals and meet program requirements.

*Comment:* One commenter recommended that CMS require all eligible clinicians within a virtual group to report on the same measure set. The commenter indicated that unifying measures would allow CMS to aggregate numerators and denominators more easily when calculating performance against measures.

*Response:* For virtual groups that report via the CMS Web Interface, they would report on all measures within the CMS Web Interface. For virtual groups that report via other submission mechanisms, they would report on the same 6 measures for the quality performance category. We encourage virtual groups to assess the types of measures and measure sets to report to ensure that they would meet the reporting requirements for the applicable performance categories.

*Comment:* One commenter recommended that CMS develop a web-based portal that would streamline reporting requirements for virtual groups. For example, CMS could model, to the extent possible and appropriate, a virtual group web-based portal on the CMS Web Interface. The availability of a web-based portal would relieve a substantial burden for solo practitioners and small groups who do not have the same level of resources as larger groups to purchase and maintain the infrastructure necessary for MIPS reporting. Moreover, the commenter indicated that a single reporting portal would ease data collection burden on CMS, enabling the Agency to collect and pull data from a single source under a single submission mechanism rather than engaging in a more cumbersome process that could require multiple data collection and submission mechanisms.

*Response:* We have developed a web-based portal submission system that streamlines and simplifies the

submission of data at the individual, group, and virtual group level, including the utilization of multiple submission mechanisms (one submission mechanism per performance category), for each performance category. We will be issuing guidance at [qpp.cms.gov](http://qpp.cms.gov) pertaining to the utilization and functionality of such portal.

*Comment:* Several commenters requested that CMS clarify whether or not data should be de-duplicated for virtual group reporting. The commenters indicated that TINs already have an issue of not being able to de-duplicate patient data across different health IT systems/multiple EHRs. The commenters indicated that virtual groups need clear guidelines regarding how to achieve accurate reporting and suggested that CMS may want to consider delaying implementation of the virtual group reporting option until all related logistics issues and solutions are identified.

*Response:* We interpret the commenter's reference to "de-duplicate" to mean the identification of unique patients across a virtual group. We recognize that it may be difficult to identify unique patients across a virtual group for the purposes of aggregating performance on the advancing care information measures, particularly when a virtual group is using multiple CEHRT systems. For 2018, virtual groups may be using systems which are certified to different CEHRT editions further adding to this challenge. We consider "unique patients" to be individual patients treated by a TIN within a virtual group who would typically be counted as one patient in the denominator of an advancing care information measure. This patient may see multiple MIPS eligible clinicians within a TIN that is part of a virtual group, or may see MIPS eligible clinicians at multiple practice sites of a TIN that is part of a virtual group. When aggregating performance on advancing care information measures for virtual group level reporting, we do not require that a virtual group determine that a patient seen by one MIPS eligible clinician (or at one location in the case of TINs working with multiple CEHRT systems) is not also seen by another MIPS eligible clinician in the TIN that is part of the virtual group or captured in a different CEHRT system.

In regard to the suggestion provided by the commenter regarding the delay of the implementation of virtual groups, we are not able to further postpone the implementation of virtual groups. We recognize that there are various elements and factors that virtual groups would need to address prior to the

execution of virtual groups. Also, we recognize that certain solo practitioners and groups may not be ready to form virtual groups for the 2018 performance period.

*Comment:* One commenter expressed concern regarding how a health IT vendor would support a virtual group regardless of submission mechanism, CEHRT, registry, and/or billing claims. The commenter indicated that having multiple health IT vendors and products to support within a single virtual group would complicate the ability to aggregate data for a final score, affect the productivity of the health IT vendor in its effort to support the virtual groups, and increase coding and billing errors.

*Response:* We note that virtual groups may elect to utilize health IT vendors and/or third party intermediaries for the collection and submission of data on behalf of virtual groups. As discussed in section II.C.6.a.(1) of this final rule with comment period, the submission mechanisms available to groups under each performance category will also be available to virtual groups. Similarly, virtual groups will also have the same option as groups to utilize multiple submission mechanisms, but only one submission mechanism per performance category for the 2018 performance period. However, starting with the 2019 performance period, groups and virtual groups will be able to utilize multiple submission mechanisms for each performance category. We believe that our policies pertaining to the availability and utilization of multiple submission mechanisms increases flexibility and reduces burden. However, we recognize that data aggregation across at the virtual group level may pose varying challenges.

We note that the measure reporting requirements applicable to groups are also generally applicable to virtual groups. However, we note that the requirements for calculating measures and activities when reporting via QCDRs, qualified registries, EHRs, and attestation differ in their application to virtual groups. Specifically, these requirements apply cumulatively across all TINs in a virtual group. Thus, virtual groups will aggregate data for each NPI under each TIN within the virtual group by adding together the numerators and denominators and then cumulatively collate to report one measure ratio at the virtual group level. Moreover, if each MIPS eligible clinician within a virtual group faces a significant hardship or has EHR technology that has been decertified, the virtual group can apply for an exception to have its advancing care information performance category reweighted. If such exception

application is approved, the virtual group's advancing care information performance category is reweighted to zero percent and applied to the quality performance category increasing the quality performance weight from 50 percent to 75 percent.

Additionally, the data submission criteria applicable to groups are also generally applicable to virtual groups. However, we note that data completeness and sampling requirements for the CMS Web Interface and CAHPS for MIPS survey differ in their application to virtual groups. Specifically, data completeness for virtual groups applies cumulatively across all TINs in a virtual group. Thus, we note that there may be a case when a virtual group has one TIN that falls below the 60 percent data completeness threshold, which is an acceptable case as long as the virtual group cumulatively exceeds such threshold. In regard to the CMS Web Interface and CAHPS for MIPS survey, sampling requirements pertain to Medicare Part B patients with respect to all TINs in a virtual group, where the sampling methodology would be conducted for each TIN within the virtual group and then cumulatively aggregated across the virtual group. A virtual group would need to meet the beneficiary sampling threshold cumulatively as a virtual group.

*Final Action:* After consideration of the public comments received, we are finalizing the following virtual group reporting requirements:

- Individual eligible clinicians and individual MIPS eligible clinicians who are part of a TIN participating in MIPS at the virtual group level will have their performance assessed as a virtual group at § 414.1315(d)(1).
- Individual eligible clinicians and individual MIPS eligible clinicians who are part of a TIN participating in MIPS at the virtual group level will need to meet the definition of a virtual group at all times during the performance period for the MIPS payment year (at § 414.1315(d)(2)).
- Individual eligible clinicians and individual MIPS eligible clinicians who are part of a TIN participating in MIPS at the virtual group level must aggregate their performance data across multiple TINs in order for their performance to be assessed as a virtual group (at § 414.1315(d)(3)).
- MIPS eligible clinicians that elect to participate in MIPS at the virtual group level will have their performance assessed at the virtual group level across all four MIPS performance categories (at § 414.1315(d)(4)).

- Virtual groups will need to adhere to an election process established and required by CMS (at § 414.1315(d)(5)).

#### h. Virtual Group Assessment and Scoring

As noted in section II.C.4.a. of this final rule with comment period, section 1848(q)(5)(I)(i) of the Act provides that MIPS eligible clinicians electing to be a virtual group must: (1) Have their performance assessed for the quality and cost performance categories in a manner that applies the combined performance of all the MIPS eligible clinicians in the virtual group to each MIPS eligible clinician in the virtual group for the applicable performance period; and (2) be scored for the quality and cost performance categories based on such assessment for the applicable performance period. We believe it is critical for virtual groups to be assessed and scored at the virtual group level for all performance categories, as it eliminates the burden of virtual group components having to report as a virtual group and separately outside of a virtual group. Additionally, we believe that the assessment and scoring at the virtual group level provides for a comprehensive measurement of performance, shared responsibility, and an opportunity to effectively and efficiently coordinate resources to also achieve performance under the improvement activities and the advancing care information performance categories. Therefore, we proposed at § 414.1315(d)(4) that virtual groups would be assessed and scored across all four MIPS performance categories at the virtual group level for a performance period for a year (82 FR 30033 through 30034).

In the CY 2017 Quality Payment Program final rule (81 FR 77319 through 77329), we established the MIPS final score methodology at § 414.1380, which would apply to virtual groups. We refer readers to sections II.C.4.h. and II.C.6.g. of this final rule with comment period for scoring policies that would apply to virtual groups.

As noted in section II.C.4.g. of this final rule with comment period, we proposed to allow solo practitioners and groups with 10 or fewer eligible clinicians that have elected to be part of a virtual group to have their performance measured and aggregated at the virtual group level across all four performance categories; however, we would apply payment adjustments at the individual TIN/NPI level. Each TIN/NPI would receive a final score based on the virtual group performance, but the payment adjustment would still be applied at the TIN/NPI level. We would

assign the virtual group score to all TIN/NPIs billing under a TIN in the virtual group during the performance period.

During the performance period, we recognized that NPIs in a TIN that has joined a virtual group may also be participants in an APM. The TIN, as part of the virtual group, would be required to submit performance data for all eligible clinicians associated with the TIN, including those participating in APMs, to ensure that all eligible clinicians associated with the TIN are being measured under MIPS.

APMs seek to deliver better care at lower cost and to test new ways of paying for care and measuring and assessing performance. In the CY 2017 Quality Payment Program final rule, we established policies to the address concerns we have expressed in regard to the application of certain MIPS policies to MIPS eligible clinicians in MIPS APMs (81 FR 77246 through 77269). In the CY 2018 Quality Payment Program proposed rule, we reiterated those concerns and proposed additional policies for the APM scoring standard (82 FR 30080 through 30091). We believe it is important to consistently apply the APM scoring standard under MIPS for eligible clinicians participating in MIPS APMs in order to avoid potential misalignments between the evaluation of performance under the terms of the MIPS APM and evaluation of performance on measures and activities under MIPS, and to preserve the integrity of the initiatives we are testing. Therefore, we believe it is necessary to waive the requirement to only use the virtual group scores under section 1848(q)(5)(I)(i)(II) of the Act, and instead to apply the score under the APM scoring standard for eligible clinicians in virtual groups who are also in an APM Entity participating in an APM.

Specifically, for participants in MIPS APMs, we proposed to use our authority under section 1115A(d)(1) of the Act for MIPS APMs authorized under section 1115A of the Act, and under section 1899(f) of the Act for the Shared Savings Program, to waive the requirement under section 1848(q)(2)(5)(I)(i)(II) of the Act that requires performance category scores from virtual group reporting to be used to generate the final score upon which the MIPS payment adjustment is based for all TIN/NPIs in the virtual group. Instead, we would use the score assigned to the MIPS eligible clinician based on the applicable APM Entity score to determine MIPS payment adjustments for all MIPS eligible clinicians that are part of an APM Entity participating in a MIPS APM, in accordance with § 414.1370, instead of

determining MIPS payment adjustments for these MIPS eligible clinicians using the final score of their virtual group.

We noted that MIPS eligible clinicians who are participants in both a virtual group and a MIPS APM would be assessed under MIPS as part of the virtual group and under the APM scoring standard as part of an APM Entity group, but would receive their payment adjustment based only on the APM Entity score. In the case of an eligible clinician participating in both a virtual group and an Advanced APM who has achieved QP status, the clinician would be assessed under MIPS as part of the virtual group, but would still be excluded from the MIPS payment adjustment as a result of his or her QP status. We refer readers to section II.C.6.g. of this final rule with comment period for further discussion regarding the waiver.

The following is a summary of the public comments received regarding our proposals.

*Comment:* Many commenters supported our proposals regarding the assessment and scoring of virtual group performance and the application of the MIPS payment adjustment to MIPS eligible clinicians based on the virtual group's final score.

*Response:* We appreciate the support from the commenters.

*Comment:* One commenter supported our proposal to assess and score virtual groups at the virtual group level and indicated that such an approach would provide comprehensive measurement, shared responsibility and coordination of resources, and reduce burden. Another commenter expressed support for requiring the aggregation of data across the TINs within a virtual group, including the performance data of APM participants, to assess the performance of a virtual group given that it would be difficult for TINs to separate and exclude data for some NPIs. One commenter supported our proposal to utilize waiver authority, which allows MIPS eligible clinicians within a virtual group to receive their MIPS payment adjustment based on the virtual group score while allowing APM participants who are also a part of a virtual group to receive their MIPS payment adjustment based on their APM Entity score under the APM scoring standard.

*Response:* We appreciate the support from the commenters regarding our proposals.

*Comment:* One commenter requested clarification regarding whether or not the MIPS payment adjustment would only apply to MIPS eligible clinicians within a virtual group.

*Response:* We note that each eligible clinician in a virtual group will receive a virtual group score that is reflective of the combined performance of a virtual group; however, only MIPS eligible clinicians will receive a MIPS payment adjustment based on the virtual group final score. In the case of an eligible clinician participating in both a virtual group and an Advanced APM who has achieved QP status, such eligible clinician will be assessed under MIPS as part of the virtual group, but will still be excluded from the MIPS payment adjustment as a result of his or her QP status. Conversely, in the case of an eligible clinician participating in both a virtual group and an Advanced APM who has achieved Partial QP status, it is recognized that such eligible clinician would be excluded from the MIPS payment adjustment unless such eligible clinician elects to report under MIPS. We note that affirmatively agreeing to participate in MIPS as part of a virtual group prior to the start of the applicable performance period would constitute an explicit election to report under MIPS. Thus, eligible clinicians who participate in a virtual group and achieve Partial QP status would remain subject to the MIPS payment adjustment due to their election to report under MIPS. New Medicare-enrolled eligible clinicians and clinician types not included in the definition of a MIPS eligible clinician who are associated with a TIN that is part of a virtual group would receive a virtual group score, but would not receive a MIPS payment adjustment. MIPS eligible clinicians who are participants in both a virtual group and a MIPS APM will be assessed under MIPS as part of the virtual group and under the APM scoring standard as part of an APM Entity group, but will receive their payment adjustment based only on the APM Entity score.

*Comment:* In order to increase virtual group participation and incentivize solo practitioners and groups (including rural and small practices) to form virtual groups and move toward joint accountability, many commenters recommended that CMS provide bonus points to TINs that elect to form virtual groups given that virtual groups would face administrative and operational challenges, such as identifying reliable partners, aggregating and sharing data, and coordinating workflow across multiple TINs and NPIs. One commenter recommended that CMS consider granting virtual groups (of any size) special reporting and/or scoring accommodations similar to the previously finalized and proposed policies for small practices (for example,

attesting to only one to two improvement activities) in order to account for the short timeframe (a few months) TINs have to form and implement virtual groups in preparation for the CY 2018 performance period.

*Response:* We appreciate the recommendations from commenters. We believe that the ability for solo practitioners and groups to form and/or join virtual groups is an advantage and provides flexibility. We note that virtual groups are generally able to take advantage and benefit from all scoring incentives and bonuses that are currently provided under MIPS. We will take into consideration the development of additional incentives, and any changes would be proposed in future rulemaking.

*Comment:* One commenter requested that CMS consider scoring virtual groups by weighting each individual group category score by the number of clinicians. The commenter indicated that the requirement to consolidate scoring for each performance category would limit the ability of TINs to take advantage of the virtual group option, particularly with regard to the advancing care information performance category, where the use of different EHR vendors may make finding viable partners difficult and preclude easy reporting. Another commenter indicated that our proposal to require virtual groups to be scored across all performance categories may cause unintended consequences, such as virtual groups being dissuaded from admitting TINs that do have EHR technology certified to the 2014 Edition in order for virtual groups' advancing care information performance category scores not to be impacted.

*Response:* We believe it is important for TINs participating in MIPS as part of a virtual group to be assessed and scored at the virtual group level across each performance category. We believe it provides continuity in assessment and allows virtual groups to share and coordinate resources pertaining to each performance category. We recognize that there may be challenges pertaining to aligning EHR technology and the ways in which EHR technology captures data, but believe that virtual groups have the opportunity to coordinate and identify means to align elements of EHR technology that would benefit the virtual group. In order for virtual groups to accurately have their performance assessed and scored as a collective entity and identify areas to improve care coordination, quality of care, and health outcomes, we believe that each eligible clinician in a virtual group should be assessed and scored across all four

performance categories at the virtual group level.

*Comment:* One commenter suggested that CMS explore the development of a test to determine, in advance, if a virtual group would have sufficient numbers for valid measurement.

*Response:* We interpret the commenter's reference to "sufficient numbers for valid measurement" to mean sufficient numerator and denominator data to enable the data to accurately reflect the virtual group's performance on specific measures and activities. As virtual groups are implemented, we will take this recommendation into consideration.

*Comment:* One commenter expressed concern that virtual groups would have the ability to skew benchmark scoring standards to the disadvantage of MIPS eligible clinicians who choose not to participate in MIPS as part of a virtual group.

*Response:* We disagree with the commenter and do not believe that virtual groups would skew benchmark scoring standards to the disadvantage of MIPS eligible clinicians participating in MIPS at the individual or group level as a result of how benchmarks are calculated, which is based on the composite of available data for all MIPS eligible clinicians. MIPS eligible clinicians that are participating in MIPS as part of a virtual group would already be eligible and able to participate in MIPS at the individual or group level; therefore, the benchmark scoring standards would not be skewed regardless of such MIPS eligible clinicians participating in MIPS at the individual, group, or virtual group level. Also, we believe that solo practitioners and groups with 10 or fewer eligible clinicians that form virtual groups would increase their performance by joining together.

*Comment:* One commenter urged CMS to address risk adjustment mechanisms for virtual groups and develop methodologies to account for the unique nature of virtual groups and noted that appropriate risk adjustment is critical for virtual groups because of the heterogeneous make-up of virtual groups (for example, geographic and specialty diversity).

*Response:* We appreciate the recommendation from the commenter. Under the Improving Medicare Post-Acute Transformation (IMPACT) Act of 2014, the Office of the Assistant Secretary for Planning and Evaluation (ASPE) has been conducting studies on the issue of risk adjustment for sociodemographic factors on quality measures and cost, as well as other strategies for including social

determinants of health status evaluation in CMS programs. We will closely examine the ASPE studies when they are available and incorporate findings as feasible and appropriate through future rulemaking. Also, we will monitor outcomes of beneficiaries with social risk factors, as well as the performance of the MIPS eligible clinicians who care for them to assess for potential unintended consequences such as penalties for factors outside the control of clinicians.

*Comment:* One commenter requested clarification regarding how compliance would be implemented for the quality and improvement activities performance categories at the virtual group level and whether or not a virtual group would be able to achieve the highest possible score for the improvement activities performance category if only one NPI within the virtual group meets the requirements regardless of the total number of NPIs participating in the virtual group. Also, the commenter requested clarification regarding whether or not a virtual group would meet the requirements under the quality performance category if the virtual group included a TIN that reported a specialty measures set that is not applicable to other eligible clinicians in the virtual group.

*Response:* As discussed in section II.C.4.d. of this final rule with comment period, we are generally applying our previously finalized and proposed group policies to virtual groups, unless specified. Thus, in order for virtual groups to meet the requirements for the quality and improvement activities performance categories, they would need to meet the same requirements established for groups and meet virtual group reporting requirements. Virtual groups will have their performance assessed and scored for the quality and improvement activities performance categories based on submitting the minimum number of measures and activities. Generally, virtual groups reporting quality measures are required to select at least 6 measures, one of which must be an outcome measure, or if an outcome measure is not available a high priority measure to collectively report for the performance period of CY 2018. Virtual groups are encouraged to select the quality measures that are most appropriate to the TINs and NPIs within their virtual group and patient population.

For the 2018 performance period, virtual groups submitting data on quality measures using QCDRs, qualified registries, or via EHR must report on at least 60 percent of the virtual group's patients that meet the

measure's denominator criteria, regardless of payer for the performance period. We expect to receive quality data for both Medicare and non-Medicare patients under these submission mechanisms. Virtual groups submitting quality measures data using the CMS Web Interface or a CMS-approved survey vendor to report the CAHPS for MIPS survey must meet the data submission requirements on the sample of the Medicare Part B patients CMS provides. We note that the measure reporting requirements applicable to groups are also generally applicable to virtual groups. However, we note that the requirements for calculating measures and activities when reporting via QCDRs, qualified registries, EHRs, and attestation differ in their application to virtual groups. Specifically, these requirements apply cumulatively across all TINs in a virtual group. Thus, virtual groups will aggregate data for each NPI under each TIN within the virtual group by adding together the numerators and denominators and then cumulatively collate to report one measure ratio at the virtual group level. Moreover, if each MIPS eligible clinician within a virtual group faces a significant hardship or has EHR technology that has been decertified, the virtual group can apply for an exception to have its advancing care information performance category reweighted. If such exception application is approved, the virtual group's advancing care information performance category is reweighted to zero percent and applied to the quality performance category increasing the quality performance weight from 50 percent to 75 percent.

Additionally, the data submission criteria applicable to groups are also generally applicable to virtual groups. However, we note that data completeness and sampling requirements for the CMS Web Interface and CAHPS for MIPS survey differ in their application to virtual groups. Specifically, data completeness for virtual groups applies cumulatively across all TINs in a virtual group. Thus, we note that there may be a case when a virtual group has one TIN that falls below the 60 percent data completeness threshold, which is an acceptable case as long as the virtual group cumulatively exceeds such threshold. In regard to the CMS Web Interface and CAHPS for MIPS survey, sampling requirements pertain to Medicare Part B patients with respect to all TINs in a virtual group, where the sampling methodology would be conducted for each TIN within the virtual group and

then cumulatively aggregated across the virtual group. A virtual group would need to meet the beneficiary sampling threshold cumulatively as a virtual group.

In regard to performance under the improvement activities performance category, we clarified in the CY 2017 Quality Payment Program final rule (81 FR 77181) that if one MIPS eligible clinician (NPI) in a group completed an improvement activity, the entire group (TIN) would receive credit for that activity. In addition, we specified that all MIPS eligible clinicians reporting as a group would receive the same score for the improvement activities performance category if at least one clinician within the group is performing the activity for a continuous 90 days in the performance period. As discussed in section II.C.4.d. of this final rule with comment period, we are finalizing our proposal to generally apply our previously finalized and proposed group policies to virtual groups, unless otherwise specified. Thus, if one MIPS eligible clinician (NPI) in a virtual group completed an improvement activity, the entire virtual group would receive credit for that activity and receive the same score for the improvement activities performance category if at least one clinician within the virtual group is performing the activity for a minimum of a continuous 90-day period in CY 2018. In order for virtual groups to achieve full credit under the improvement activities performance category for the 2018 performance period, they would need to submit four medium-weighted or two high-weighted activities that were for a minimum of a continuous 90-day period in CY 2018. Virtual groups that are considered to be non-patient facing or small practices, or designated as rural or HPSA practices will receive full credit by submitting one high-weighted improvement activity or two medium-weighted improvement activities that were conducted for a minimum of a continuous 90-day period in CY 2018.

In regard to compliance with quality and improvement activities performance category requirements, virtual groups would meet the same performance category requirements applicable to groups. In section II.C.4.g. of this final rule with comment period, we outline virtual group reporting requirements. Virtual groups are required to adhere to the requirements established for each performance category. Performance data submitted to CMS on behalf of virtual groups must be met form and manner requirements for each submission mechanism.

*Final Action:* After consideration of the public comments received, we are finalizing the following proposals. Solo practitioners and groups with 10 or fewer eligible clinicians that have elected to be part of a virtual group will have their performance measured and aggregated at the virtual group level across all four performance categories. We will apply payment adjustments at the individual TIN/NPI level. Each TIN/NPI will receive a final score based on the virtual group performance, but the payment adjustment would still be applied at the TIN/NPI level. We will assign the virtual group score to all TIN/NPIs billing under a TIN in the virtual group during the performance period.

For participants in MIPS APMs, we will use our authority under section 1115A(d)(1) for MIPS APM authorized under section 1115A of the Act, and under section 1899(f) for the Shared Savings Program, to waive the requirement under section 1848(q)(2)(5)(I)(ii) of the Act that requires performance category scores from virtual group reporting to be used to generate the final score upon which the MIPS payment adjustment is based for all TIN/NPIs in the virtual group. We will use the score assigned to the MIPS eligible clinician based on the applicable APM Entity score to determine MIPS payment adjustments for all MIPS eligible clinicians that are part of an APM Entity participating in a MIPS APM, in accordance with § 414.1370, instead of determining MIPS payment adjustments for these MIPS eligible clinicians using the final score of their virtual group.

##### 5. MIPS Performance Period

In the CY 2017 Quality Payment Program final rule (81 FR 77085), we finalized at § 414.1320(b)(1) that for purposes of the 2020 MIPS payment year, the performance period for the quality and cost performance categories is CY 2018 (January 1, 2018 through December 31, 2018). We finalized at § 414.1320(b)(2) that for purposes of the 2020 MIPS payment year, the performance period for the improvement activities and advancing care information performance categories is a minimum of a continuous 90-day period within CY 2018, up to and including the full CY 2018 (January 1, 2018, through December 31, 2018). We did not propose any changes to these policies.

We also finalized at § 414.1325(f)(2) that for Medicare Part B claims, data must be submitted on claims with dates of service during the performance period that must be processed no later than 60 days following the close of the

performance period. In this final rule with comment period, we are finalizing three policies (small practice size determination, non-patient facing determination, and low-volume threshold determination) that utilize a 30-day claims run out. We refer readers to sections II.C.1.c., II.C.1.e., and II.C.2.c. of this final rule with comment period for details on these three policies. Lastly, we finalized that individual MIPS eligible clinicians or groups who report less than 12 months of data (due to family leave, etc.) are required to report all performance data available from the applicable performance period (for example, CY 2018 or a minimum of a continuous 90-day period within CY 2018).

We proposed at § 414.1320(c)(1) that for purposes of the 2021 MIPS payment year and future years, the performance period for the quality and cost performance categories would be the full calendar year (January 1 through December 31) that occurs 2 years prior to the applicable payment year. For example, for the 2021 MIPS payment year, the performance period would be CY 2019 (January 1, 2019 through December 31, 2019), and for the 2022 MIPS payment year, the performance period would be CY 2020 (January 1, 2020 through December 31, 2020).

We proposed at § 414.1320(d)(1) that for purposes of the 2021 MIPS payment year, the performance period for the improvement activities and advancing care information performance categories would be a minimum of a continuous 90-day period within CY 2019, up to and including the full CY 2019 (January 1, 2019 through December 31, 2019).

The following is a summary of the public comments received on the “MIPS Performance Period” proposals and our responses:

*Comment:* Many commenters did not support our proposal that beginning with the 2021 MIPS payment year, the performance period for the quality and cost performance categories would be the full calendar year that occurs 2 years prior to the applicable payment year. The commenters believed that MIPS eligible clinicians are not prepared to move from “pick your pace” flexibility to a full calendar year performance period and that the proposal would create significant administrative burden and confusion for MIPS eligible clinicians. A few commenters noted that a full calendar year of data does not necessarily improve the validity of the data. Many commenters recommended that CMS continue “pick your pace” flexibility with respect to the performance period, while several commenters expressed an interest in

CMS allowing clinicians to choose the length of their performance period. One commenter recommended that CMS provide bonus points to clinicians who report for a performance period that is longer than 90 days. A few commenters recommended that CMS analyze the quality and cost performance data to determine the appropriate length of the performance period, taking into consideration whether there are any unintended consequences for practices of a particular size or specialty. One commenter suggested that CMS work with physicians to develop options and a specific plan to provide accommodations where possible, such as providing clinicians multiple different performance periods to choose from. A few commenters noted that a 90-day performance period may eliminate issues for clinicians that either switch or update their EHR system during the performance period. Furthermore, a few commenters noted that since the QCDR self-nominations are not due until November 1, 2017, CMS would need to review and approve QCDR measures within less than 2 months, for clinicians to have QCDR measures to report at the start of the CY 2018 performance period. One commenter noted that a 90-day performance period is preferable as clinicians will need time to update their systems and train staff after QCDR measures have been approved.

*Response:* We understand the commenters’ concerns. However, we believe that it would not be in the best interest of MIPS eligible clinicians to have less than a full calendar year performance period for the quality and cost performance categories beginning with the 2021 MIPS payment year, as we previously finalized at § 414.1320(b)(1) a full calendar year performance period for the quality and cost performance categories for the 2020 MIPS payment year, which will occur during CY 2018. By finalizing a full calendar year performance period for the quality and cost performance categories for the 2021 MIPS payment year, we are maintaining consistency with the performance period for the 2020 MIPS payment year. We believe this will be less burdensome and confusing for MIPS eligible clinicians. We also would like to note that a longer performance period for the quality and cost performance categories will likely include more patient encounters, which will increase the denominator of the quality and cost measures. Statistically, larger sample sizes provide more accurate and actionable information. Additionally, the longer performance

period (a year) is consistent with how many of the measures used in our program were designed to be reported and performed, such as Quality #303 (Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery) and Quality #304 (Cataracts: Patient Satisfaction within 90 Days Following Cataract Surgery). Finally, some of the measures do not allow for a 90-day performance period (such as those looking at complications after certain surgeries or improvement in certain conditions after treatment). In regards to the recommendation of providing bonus points to MIPS eligible clinicians that report for a performance period longer than 90 days, we believe a more appropriate incentive is for MIPS eligible clinicians to perform on a full year so that they have the ability to improve their performance due to having a larger sample size, etc. We also understand the commenters' preference of a 90-day performance period, so that there is adequate time to update systems and train staff. We agree that adequate time is needed to update systems, workflows and train staff. However, we note that the quality measures are finalized as part of this final rule, and the specifications are published on our Web site by no later than December 31 prior to the performance period. While we strongly encourage all clinicians to review the current performance period's measure specifications, we note that the overwhelming majority of MIPS quality measures are maintained year over year with only minor code set updates. Further, for quality, we have a 60 percent data completeness threshold, which provides a buffer for clinicians if they are not able to implement their selected measures immediately at the start of the performance period. Finally, we would like to clarify that many registries, QCDRs, and EHRs have the ability to accept historical data so that once the EHR system is switched or updated, the MIPS eligible clinician can report their information. With regard to the suggestion that we work with physicians to develop options and a specific plan to provide accommodations where possible, such as providing clinicians multiple different performance periods to choose from, we will consider this suggestion for future rulemaking as necessary.

*Comment:* While we did not propose any changes to the previously finalized performance periods for the 2020 MIPS payment year, many commenters did not support a full calendar year performance period for the quality performance category for the 2020 MIPS

payment year. The commenters noted that MIPS eligible clinicians are not prepared to move from "pick your pace" flexibility to a full calendar year performance period and that this policy will create significant administrative burden and confusion for MIPS eligible clinicians.

*Response:* We understand the commenters' concerns in regards to the full calendar year MIPS performance period for the quality performance category for the 2020 MIPS payment year. We would like to note that the MIPS performance period for the 2020 MIPS payment year was finalized in the CY 2017 Quality Payment Program final rule, and we made no new proposals for the MIPS performance period for the 2020 MIPS payment year. Therefore, we are unable to modify the MIPS performance period for the quality performance category for the 2020 MIPS payment year.

*Comment:* Several commenters supported the proposal to increase the performance period for the 2021 MIPS payment year and future payment years to 12 months occurring 2 years prior because the longer performance period provides a more accurate picture of eligible clinicians' performance. A few commenters noted that their support was contingent on CMS approving 2018 QCDR measure specifications by December 1, 2017. One commenter noted that a 90-day performance period is insufficient to thoroughly assess performance. One commenter noted that the full year will ensure continuity in the quality of care delivered to beneficiaries. One commenter noted that a TIN participating in Track 1 of the Shared Savings Program is automatically required to report for the full year, so requiring all MIPS eligible clinicians to participate for a full year would be fairer now that scores are reflected on Physician Compare.

*Response:* We thank the commenters for their support. We would also like to note that in the CY 2017 Quality Payment Program final rule (81 FR 77158), we stated that we would post the approved QCDR measures through the qualified posting by no later than January 1, 2018.

*Comment:* A few commenters did not support the proposed performance periods because the quality and cost performance categories would not be aligned with the improvement activities and advancing care information performance categories. The commenters believed it would be confusing to clinicians. One commenter recommended that all performance categories have a 12-month performance period.

*Response:* We understand the commenters' concerns that the proposed performance periods for quality and cost would not be consistent with the improvement activities and advancing care information performance categories. For the improvement activities performance category, a minimum of a continuous 90-day performance period provides MIPS eligible clinicians more flexibility as some improvement activities may be ongoing, while others may be episodic. For the advancing care information performance category, a minimum of a continuous 90-day performance period provides MIPS eligible clinicians more flexibility and time to adopt and implement 2015 Edition CEHRT. As for the quality and cost performance categories, we believe that a full calendar year performance period is most appropriate. Additionally, submitting only 90 days of performance data may create challenges for specific measures. Finally, with respect to the cost performance category, we would like to note that no data submission is required, as this performance category is calculated utilizing Part B claim data.

*Comment:* Many commenters supported the proposed 90-day performance period for the improvement activities and advancing care information performance categories. A few commenters requested that CMS adopt a 90-day performance period for the improvement activities and advancing care information performance categories for the 2022 MIPS payment year and future years.

*Response:* We thank the commenters for their support and will consider the commenters' recommendation for future rulemaking.

*Comment:* A few commenters did not support the length of time between the proposed performance period and the applicable payment year because the commenters believed it would not allow practices time to make necessary adjustments before the next performance period begins. One commenter recommended that, as the program matures, one consideration for shortening this timeframe could be a quarterly rolling annual performance period with a three- to 6-month validation period prior to any payment adjustment. Another commenter recommended that we consider staggered performance periods; for example payment adjustments for 2021, would ideally be based on a performance period running from July 1, 2019 through June 30, 2020.

*Response:* We understand the commenters' concerns regarding the length of time between the proposed

performance period and the applicable payment year and appreciate the commenters' suggestions for shortening this timeframe. While a shortened timeframe between performance period and payment year may be desirable, there are operational challenges with this approach that we do not anticipate can be resolved in the near future. Specifically, we need to allow time for the post submission processes of calculating MIPS eligible clinicians' final scores, establishing budget neutrality, issuing the payment adjustment factors, and allowing for a targeted review period to occur prior to the application of the MIPS payment adjustment to MIPS eligible clinicians' claims. However, we are continuing to look for opportunities to shorten the timeframe between the end of the performance period and when payment adjustments are applied.

*Comment:* One commenter recommended a 2-year performance period for clinicians who have patient volume insufficient for statistical analysis so that the clinician has a sufficient sample size to analyze.

*Response:* We thank the commenter for their suggestion and will consider it for future rulemaking. We would like to note that in this final rule with comment period, we are only finalizing the performance period for the 2021 MIPS payment year, not future years, so that we can continue to monitor and assess whether changes to the performance period through future rulemaking would be beneficial.

*Comment:* One commenter encouraged CMS to implement the MIPS program as soon as possible. This commenter noted that a transition period could discourage eligible clinicians from participating in the program.

*Response:* We appreciate the commenter's recommendation to implement the MIPS program as soon as possible; however, we disagree that a transition period will discourage participation. We believe that a transition period will reduce barriers from participation that existed in the legacy programs.

*Final Action:* After consideration of the public comments, we are finalizing at § 414.1320(c)(1) that for purposes of the 2021 MIPS payment year, the performance period for the quality and cost performance categories is CY 2019 (January 1, 2019 through December 31, 2019). We are not finalizing the proposed performance period for the quality and cost performance categories for purposes of the 2022 MIPS payment year and future years. We are also redesignating proposed § 414.1320(d)(1) and finalizing at § 414.1320(c)(2) that for purposes of the 2021 MIPS payment year, the performance period for the advancing care information and improvement activities performance categories is a minimum of a continuous 90-day period within CY 2019, up to and including the full CY 2019 (January 1, 2019 through December 31, 2019).

6. MIPS Performance Category Measures and Activities

a. Performance Category Measures and Reporting

(1) Submission Mechanisms

We finalized in the CY 2017 Quality Payment Program final rule (81 FR 77094) at § 414.1325(a) that individual MIPS eligible clinicians and groups must submit measures and activities, as applicable, for the quality, improvement activities, and advancing care information performance categories. For the cost performance category, we finalized that each individual MIPS eligible clinician's and group's cost performance would be calculated using administrative claims data. As a result, individual MIPS eligible clinicians and groups are not required to submit any additional information for the cost performance category. We finalized in the CY 2017 Quality Payment Program final rule (81 FR 77094 through 77095) multiple data submission mechanisms for MIPS, which provide individual MIPS eligible clinicians and groups with the flexibility to submit their MIPS measures and activities in a manner that best accommodates the characteristics of their practice, as indicated in Tables 2 and 3. Table 2 summarizes the data submission mechanisms for individual MIPS eligible clinicians that we finalized at § 414.1325(b) and (e). Table 3 summarizes the data submission mechanisms for groups that are not reporting through an APM that we finalized at § 414.1325(c) and (e).

TABLE 2—DATA SUBMISSION MECHANISMS FOR MIPS ELIGIBLE CLINICIANS REPORTING INDIVIDUALLY [TIN/NPI]

Performance category/submission combinations accepted	Individual reporting data submission mechanisms
Quality .....	Claims. QCDR. Qualified registry. EHR.
Cost .....	Administrative claims. <sup>1</sup>
Advancing Care Information .....	Attestation. QCDR. Qualified registry. EHR.
Improvement Activities .....	Attestation. QCDR. Qualified registry. EHR.

TABLE 3—DATA SUBMISSION MECHANISMS FOR MIPS ELIGIBLE CLINICIANS REPORTING AS GROUPS [TIN]

Performance category/submission combinations accepted	Group reporting data submission mechanisms
Quality .....	QCDR. Qualified registry. EHR.

TABLE 3—DATA SUBMISSION MECHANISMS FOR MIPS ELIGIBLE CLINICIANS REPORTING AS GROUPS—Continued  
[TIN]

Performance category/submission combinations accepted	Group reporting data submission mechanisms
Cost ..... Advancing Care Information .....	CMS Web Interface (groups of 25 or more). CMS-approved survey vendor for CAHPS for MIPS (must be reported in conjunction with another data submission mechanism). and Administrative claims (for all-cause hospital readmission measure; no submission required). Administrative claims. <sup>1</sup>
Improvement Activities .....	Attestation. QCDR. Qualified registry. EHR. CMS Web Interface (groups of 25 or more). Attestation. QCDR. Qualified registry. EHR. CMS Web Interface (groups of 25 or more).

We finalized at § 414.1325(d) that individual MIPS eligible clinicians and groups may elect to submit information via multiple mechanisms; however, they must use the same identifier for all performance categories, and they may only use one submission mechanism per performance category.

We proposed to revise § 414.1325(d) for purposes of the 2020 MIPS payment year and future years, beginning with performance periods occurring in 2018, to allow individual MIPS eligible clinicians and groups to submit data on measures and activities, as applicable and available, via multiple data submission mechanisms for a single performance category (specifically, the quality, improvement activities, or advancing care information performance category) (82 FR 30035). Under this proposal, individual MIPS eligible clinicians and groups that have fewer than the required number of measures and activities applicable and available under one submission mechanism could submit data on additional measures and activities via one or more additional submission mechanisms, as necessary, to receive a potential maximum number of points under a performance category.

If an individual MIPS eligible clinician or group submits the same measure through two different mechanisms, each submission would be calculated and scored separately. We do not have the ability to aggregate data on the same measure across submission

mechanisms. We would only count the submission that gives the clinician the higher score, thereby avoiding the double count. We refer readers to section II.C.7.a.(2) of this final rule with comment period, which further outlines how we proposed to score measures and activities regardless of submission mechanism.

We believe that this flexible approach would help individual MIPS eligible clinicians and groups with reporting, as it provides more options for the submission of data for the applicable performance categories. We believe that by providing this flexibility, we would be allowing MIPS eligible clinicians to choose the measures and activities that are most meaningful to them, regardless of the submission mechanism. We are aware that this proposal for increased flexibility in data submission mechanisms may increase complexity and in some instances necessitate additional costs for clinicians, as they may need to establish relationships with additional data submission mechanism vendors in order to report additional measures and/or activities for any given performance category. We clarified that the requirements for the performance categories remain the same, regardless of the number of submission mechanisms used. It is also important to note that for the improvement activities and advancing care information performance categories, that using multiple data submission mechanisms may limit our ability to provide real-time feedback. While we strive to provide flexibility to individual MIPS eligible clinicians and groups, we noted that our goal within the MIPS program is to minimize complexity and administrative burden to individual MIPS eligible clinicians and groups.

As discussed in section II.C.4 of this final rule with comment period, we proposed to generally apply our previously finalized and proposed group policies to virtual groups. With respect to data submission mechanisms, we proposed that virtual groups would be able to use a different submission mechanism for each performance category, and would be able to utilize multiple submission mechanisms for the quality performance category, beginning with performance periods occurring in 2018 (82 FR 30036). However, virtual groups would be required to utilize the same submission mechanism for the improvement activities and the advancing care information performance categories.

For those MIPS eligible clinicians participating in a MIPS APM, who are on an APM Participant List on at least one of the three snapshot dates as finalized in the CY 2017 Quality Payment Program Final Rule (81 FR 77444 through 77445), or for MIPS eligible clinicians participating in a full TIN MIPS APM, who are on an APM Participant List on at least one of the four snapshot dates as discussed in section II.C.6.g.(2) of this final rule with comment period, the APM scoring standard applies. We refer readers to § 414.1370 and the CY 2017 Quality Payment Program final rule (81 FR 77246), which describes how MIPS eligible clinicians participating in APM entities submit data to MIPS in the form and manner required, including separate approaches to the quality and cost performance categories applicable to MIPS APMs. We did not propose any changes to how APM entities in MIPS APMs and their participating MIPS eligible clinicians submit data to MIPS.

<sup>1</sup> Requires no separate data submission to CMS: Measures are calculated based on data available from MIPS eligible clinicians' billings on Medicare Part B claims. **Note:** Claims differ from administrative claims as they require MIPS eligible clinicians to append certain billing codes to denominator eligible claims to indicate the required quality action or exclusion occurred.

The following is a summary of the public comments received on the "Performance Category Measures and Reporting: Submission Mechanisms" proposal and our responses:

*Comment:* Many commenters supported the proposal to allow MIPS eligible clinicians and groups to submit measures and activities via multiple submission mechanisms. Several commenters noted it will help ease reporting and administrative burden. Several commenters also noted it will provide greater flexibility, including increasing the number of measures available. Several commenters stated it will allow clinicians to report the measures that are most meaningful and applicable to them. Several commenters also stated it will help MIPS eligible clinicians and groups successfully report required measures and meet MIPS reporting requirements. A few commenters specifically supported the policy to allow reporting of quality measures across multiple data submission mechanisms because 6 clinically-applicable quality measures may not always be available using one submission mechanism; it will provide clinicians who belong to multi-specialty groups more ease in reporting quality measures they may be already reporting to qualified vendors, versus forcing different specialties to find a common reporting platform that causes much more administrative, and often financial burden; it will allow greater flexibility in measure selection and will particularly benefit specialists who may want to report one or 2 eCQMs but will need to use a registry to report the rest of their measure set; and it is especially helpful for those who want to report via EHR to the extent possible even though not all measures can be submitted via that mechanism. One commenter asked if specialists who would have used a specialty measure set would be required to use multiple submission methods to meet the 6-measure requirement.

*Response:* We appreciate the commenters support for our proposal. Due to operational feasibility concerns, we are not finalizing this proposal beginning with the CY 2018 performance period as proposed, but instead beginning with the CY 2019 performance period. Moreover, we are not requiring that MIPS individual clinicians and groups submit via additional submission mechanisms; however, through this proposal the option would be available for those that have applicable measures and/or activities available to them. As discussed in section II.C.7.a.(2)(e) of this final rule with comment period, beginning with the CY 2019

performance period, we will apply our validation process to determine if other measures are available and applicable only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period. With regard to a specialty measure set, specialists who report on a specialty measure set are only required to report on the measures within that set, even if it is less than the required 6 measures. If the specialty set includes measures that are available through multiple submission mechanisms, then through this policy, beginning with the 2019 performance period, the option to report additional measures would be available for those that have applicable measures and/or activities available to them, which may potentially increase their score, but they are not required to utilize multiple submission methods to meet the 6 measure requirement. In addition, for MIPS eligible clinicians reporting on a specialty measure set via claims or registry, we will apply our validation process to determine if other measures are available and applicable within the specialty measure set only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period.

*Comment:* A few commenters stated this proposal will allow MIPS eligible clinicians to determine which method is most appropriate for the different MIPS categories. Several commenters noted it will encourage MIPS participation. Many commenters stated it will encourage the reporting of measures through new submission methods such as QCDRs and EHRs. A few commenters stated it will reduce burden on clinicians and EHR vendors by allowing large groups that report under different EHRs to report using multiple EHRs.

*Response:* In the CY 2017 Quality Payment Program final rule, we finalized that for the quality performance category, an individual MIPS eligible clinician or group that submits data on quality measures via EHR, QCDR, qualified registry, claims, or a CMS-approved survey vendor for the CAHPS for MIPS survey will be assigned measure achievement points for 6 measures (1 outcome, or if an outcome measure is not available, another high priority measure and the next 5 highest scoring measures) as available and applicable, and we will receive applicable measure bonus points for all measures submitted that meet the bonus criteria (81 FR 77282 through 77301). Consistent with this policy, we would like to clarify that for

performance periods beginning in 2019, if a MIPS eligible clinician or group reports for the quality performance category by using multiple instances of the same data submission mechanism (for example, multiple EHRs) then all the submissions would be scored, and the 6 quality measures with the highest performance (that is, the greatest number of measure achievement points) would be utilized for the quality performance category score. As noted above, if an individual MIPS eligible clinician or group submits the same measure through two different mechanisms, each submission would be calculated and scored separately. We do not have the ability to aggregate data on the same measure across multiple submission mechanisms. We would only count the submission that gives the clinician the higher score, thereby avoiding the double count. For example, if a MIPS eligible clinician submits performance data for Quality Measure 236, Controlling High Blood Pressure, using a registry and also through an EHR, these two submissions would be scored separately, and we would apply the submission with the higher score towards the quality performance score. We would not aggregate the score of the registry and EHR submission of the same measure. This approach decreases the likelihood of cumulative overcounting in the event that the submissions may have time or patient overlaps that may not be readily identifiable.

*Comment:* One commenter supported that virtual groups would be able to use multiple submission mechanisms for quality reporting but would have to use the same submission mechanism for the improvement activities and advancing care information performance categories. A few commenters suggested that both groups and virtual groups have the same submission requirements. Another commenter suggested that we reconsider multiple submission mechanisms due to the complexity it will place on clinicians.

*Response:* We are not finalizing our proposal that virtual groups would be required to utilize the same submission mechanism for the improvement activities and the advancing care information performance categories because we believe that virtual groups should have the same reporting capabilities as groups. Thus, groups and virtual groups have the same submission requirements, which for the CY 2018 performance period, includes the utilization of multiple submission mechanisms with the caveat that only one submission mechanism must be used per performance category. Starting

with the CY 2019 performance period, groups and virtual groups will be able to utilize multiple submission mechanisms for each performance category. As noted above, due to operational feasibility concerns, we are not finalizing this proposal beginning with the CY 2018 performance period as proposed, but instead beginning with the CY 2019 performance period.

*Comment:* A few commenters stated this proposal would help clinicians and groups receive the maximum number of points available. One commenter noted it will ease the path for small and rural practice clinicians to participate in MIPS. One commenter stated it will support reporting the highest quality data available. One commenter noted it may allow clinicians to complete more activities. One commenter noted it will provide EHR and registry vendors flexibility in submitting data on behalf of their customers. One commenter stated that while it may add some burdens to reporting quality measures because MIPS eligible clinicians will be required to report on 6 quality measures instead of only the number available via a given submission mechanism, they stated that they believe it will ultimately drive adoption of more robust measures based on clinical data and outcomes.

*Response:* We note that under this policy, individual MIPS eligible clinicians and groups are not required to, but may use multiple data submission mechanisms to report on six quality measures in order to potentially achieve the maximum score for the quality performance category beginning with the 2019 performance period. Individual MIPS eligible clinicians and groups could report on additional measures and/or activities using multiple data submission mechanisms for the Quality, Advancing Care Information, and Improvement Activities performance categories should applicable measures and/or activities be available to them. We agree that this policy provides small and rural practice clinicians with additional flexibility to participate in MIPS by not limiting them to the use of one submission mechanism per performance category. We believe that MIPS eligible clinicians and groups should select and report on measures that provide meaningful measurement within the scope of their practice that should include a focus on more outcomes-based measurement.

*Comment:* One commenter who supported the proposal expressed concern that the flexibility may create more complexity and confusion, as well as burden on CMS. Another commenter stated that while there could be some

burdens with requiring clinicians to use multiple submission mechanisms, if they have fewer than the required number of measures and activities applicable and available under one submission mechanism, as the requirements for the performance categories remain the same regardless of the number of submission mechanisms used. A commenter expressed concern with making multiple submissions part of the measure validation process for the review of whether 6 measures are available for reporting.

*Response:* We appreciate the commenters support for our proposal. Due to operational feasibility concerns, we are not finalizing this proposal beginning with the CY 2018 performance period as proposed, but instead beginning with the CY 2019 performance period. Moreover, we are not requiring that MIPS individual clinicians and groups submit via additional submission mechanisms; however, through this proposal the option would be available for those that have applicable measures and/or activities available to them. As discussed in section II.C.7.a.(2)(e) of this final rule with comment period, beginning with the CY 2019 performance period, we will apply our validation process to determine if other measures are available and applicable only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period. With regard to a specialty measure set, specialists who report on a specialty measure set are only required to report on the measures within that set, even if it is less than the required 6 measures. If the specialty set includes measures that are available through multiple submission mechanisms, then through this policy, beginning with the 2019 performance period, the option to report additional measures would be available for those that have applicable measures and/or activities available to them, which may potentially increase their score, but they are not required to utilize multiple submission methods to meet the 6 measure requirement. In addition, for MIPS eligible clinicians reporting on a specialty measure set via claims or registry, we will apply our validation process to determine if other measures are available and applicable within the specialty measure set only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period.

*Comment:* A few commenters offered additional recommendations including:

That CMS eventually require a MIPS eligible clinician or group to submit all data on measures and activities across a single data submission mechanism of their choosing to ensure that reliable, trustworthy, comparative data can be extracted from the MIPS eligible clinician and/or group's MIPS performance information and to alleviate the resource intensity associated with retaining all data across the multiple submission mechanisms for auditing purposes; and that claims-only reporting for the quality performance category be phased-out due to difficulty with clinically abstracting meaningful quality data.

*Response:* We thank the commenter for their recommendations regarding using a single data submission mechanism and phasing out claims-only reporting for the quality performance category, and will take their recommendations into consideration for future rulemaking. We refer readers to section II.C.9.c of this final rule with comment period for a discussion of our data validation and auditing policies.

*Comment:* Commenters requested that CMS continue to look for ways to increase flexibility in the Quality Payment Program and believed the best way to ensure participating clinicians can meet the requirements of each performance category is to increase the number of meaningful measures available. For clinicians who do not want to manage multiple submission mechanisms an alternative solution would be for each specialty within a group to create their own TINs and report as subgroups, because the commenter stated that allowing all MIPS eligible groups to report unique sets of measures via a single mechanism or multiple mechanisms promotes the ability for all clinicians to have a meaningful impact on overall MIPS performance, although the commenter recognized that this subgroup approach could create challenges with the current MIPS group scoring methodology.

*Response:* We agree that reporting on quality measures should be meaningful for clinicians, and note that measures are taken into consideration on an annual basis prior to rule-making and we encourage stakeholders to communicate their concerns regarding gaps in measure development to measure stewards. We thank commenters for their suggestions regarding an alternative approach to submission mechanisms. We would like to clarify that each newly created TIN would be considered a new group, and as discussed in the CY 2018 Quality Payment Program proposed rule (82 FR 30027), we intend to explore the

feasibility of establishing group-related policies that would permit participation in MIPS at a subgroup level through future rulemaking. We refer readers section II.C.3. of this final rule with comment period for additional information regarding group reporting.

*Comment:* Commenters suggested that CMS ensure that entire specialty specific measure sets can be reported through a single submission mechanism of their choice, specifically expressing concern for the measures within the radiation oncology subspecialty measure set.

*Response:* We would like to note that a majority of the measures in the specialty measure sets are available through registry reporting, and that specifically to the commenters concern, that all the measures within the radiation oncology subspecialty measure set are available through registry reporting. A majority of the quality measures in the MIPS program are not owned by CMS, but rather are developed and maintained by third party measure stewards. As a part of measure development and maintenance, measure stewards conduct feasibility testing of adding a new submission mechanism as a reporting option for their measure. We will share this recommendation with the measure stewards for future consideration.

*Comment:* One commenter suggested that CMS retroactively provide similar flexibility for the CY 2017 MIPS performance period.

*Response:* For operational and feasibility reasons, we believe that it would not be possible to retroactively allow MIPS individual eligible clinicians and groups to submit data through multiple submission mechanisms for the CY 2017 MIPS performance period.

*Comment:* Some commenters suggested that CMS not overly rely on claims-based measures to drive quality improvement and scoring in future program years, that CMS develop a transition plan toward only accepting data from electronic systems that have demonstrated abilities to produce valid measurement, such as those EHRs that have achieved NCQA eMeasure Certification; and that CMS create educational programs to help clinicians and groups understand the multiple submission option. A few commenters recommended making more quality measures available under each of the submission mechanisms so MIPS eligible clinicians have sufficient measures within a single submission mechanism. One commenter stated it would inadvertently advantage large practices that may be better equipped to

track measures. One commenter asked for clarification to distinguish between the scenarios where a clinician is required to submit under both EHR and registry because their EHR is not certified for enough measures and when a clinician is required to submit under both EHR and registry because CMS has not created enough electronic measures for the clinician's specialty.

*Response:* We appreciate the suggestions, and will take them into consideration for future rulemaking. As indicated in the CY 2017 Quality Payment Program final rule (81 FR 77090), we intend to reduce the number of claims-based measures in the future as more measures are available through health IT mechanisms that produce valid measurement such as registries, QCDRs, and health IT vendors. We plan to continuously work with MIPS eligible clinicians and other stakeholders to continue to improve the submission mechanisms available for MIPS. We agree that there is value to EHR based reporting; however, we recognize that there are relatively fewer measures available via EHR reporting and we generally want to retain solutions that are low burden unless and until we identify viable alternatives. As indicated in the quality measures appendices in this final rule with comment period, we are finalizing 54 out of the 275 quality measures available through EHR reporting for the CY 2018 performance period. MIPS eligible clinicians should evaluate the options available to them and choose which available submission mechanism and measures they believe will provide meaningful measurement for their scope of practice. We intend to provide stakeholders with additional education with regards to the use of multiple submission mechanisms by the implementation of this policy for the CY 2019 performance period. We plan to continuously work with MIPS eligible clinicians and other stakeholders to continue to improve the submission mechanisms available for MIPS. It is not our intent to provide larger practices an advantage over smaller practices, rather our intention is to provide all MIPS eligible clinicians and groups the opportunity to submit data on measures that are available and applicable to their scope of practice. We are not requiring that MIPS individual clinicians and groups submit via additional submission mechanisms; however, through this proposal the option would be available for those that have applicable measures and/or activities available to them. As discussed in section II.C.7.a.(2)(e) of this final rule with comment period, beginning with

the CY 2019 performance period, we will apply our validation process to determine if other measures are available and applicable only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period. With regard to a specialty measure set, specialists who report on a specialty measure set are only required to report on the measures within that set, even if it is less than the required 6 measures. If the specialty set includes measures that are available through multiple submission mechanisms, then through this policy, beginning with the 2019 performance period, the option to report additional measures would be available for those that have applicable measures and/or activities available to them, which may potentially increase their score, but they are not required to utilize multiple submission methods to meet the 6 measure requirement. In addition, for MIPS eligible clinicians reporting on a specialty measure set via claims or registry, we will apply our validation process to determine if other measures are available and applicable within the specialty measure set only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period.

*Comment:* Several commenters recommended that CMS make multiple submission mechanisms optional only. A few commenters expressed concern that a requirement to report via multiple mechanisms to meet the required 6 measures in the quality performance category would increase burden on MIPS eligible clinicians and groups that are unable to meet the minimum requirement using one submission mechanism. A few commenters stated that MIPS eligible clinicians and groups should not be required to contract with vendors and pay to report data on additional quality measures that are not reportable through their preferred method or be penalized for failing to report additional measures via a second submission mechanism and that CMS should only review the measures available to a clinician or group given their chosen submission mechanism—claims, registry, EHR or QCDR—to determine if they could have reported on additional measures. A few commenters recommended that CMS only offer multiple submission mechanisms as an option that could earn a clinician bonus points to recognize investment in an additional submission mechanism. One commenter

recommended that reporting using more than one submission mechanism be required for a given performance period only if the MIPS eligible clinician or group already has an additional submission mechanism in place that could be utilized to submit additional measures.

*Response:* We are not requiring that MIPS individual clinicians and groups submit via additional submission mechanisms; however, through this proposal the option would be available for those that have applicable measures and/or activities available to them. As discussed in section II.C.7.a.(2)(e) of this final rule with comment period, beginning with the CY 2019 performance period, we will apply our validation process to determine if other measures are available and applicable only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period. With regard to a specialty measure set, specialists who report on a specialty measure set are only required to report on the measures within that set, even if it is less than the required 6 measures. If the specialty set includes measures that are available through multiple submission mechanisms, then through this policy, beginning with the 2019 performance period, the option to report additional measures would be available for those that have applicable measures and/or activities available to them, which may potentially increase their score, but they are not required to utilize multiple submission methods to meet the 6 measure requirement. In addition, for MIPS eligible clinicians reporting on a specialty measure set via claims or registry, we will apply our validation process to determine if other measures are available and applicable within the specialty measure set only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period.

*Comment:* Many commenters did not support our proposal to allow submission of measures via multiple submission mechanisms or expressed concerns with the proposal. Several commenters expressed concern that it would add burden, confusion, and complexity for MIPS eligible clinicians and groups, as well as vendors, possibly requiring them to track measures across mechanisms based on varying benchmarks and to review measures and tools to determine if there are additional applicable measures.

*Response:* We understand the commenters concerns with regards to

burden and complexity around the use of multiple submission mechanisms. We are not requiring that MIPS individual clinicians and groups submit via additional submission mechanisms; however, through this proposal the option would be available for those that have applicable measures and/or activities available to them. As discussed in section II.C.7.a.(2)(e) of this final rule with comment period, beginning with the CY 2019 performance period, we will apply our validation process to determine if other measures are available and applicable only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period. With regard to a specialty measure set, specialists who report on a specialty measure set are only required to report on the measures within that set, even if it is less than the required 6 measures. If the specialty set includes measures that are available through multiple submission mechanisms, then through this policy, beginning with the 2019 performance period, the option to report additional measures would be available for those that have applicable measures and/or activities available to them, which may potentially increase their score, but they are not required to utilize multiple submission methods to meet the 6 measure requirement. In addition, for MIPS eligible clinicians reporting on a specialty measure set via claims or registry, we will apply our validation process to determine if other measures are available and applicable within the specialty measure set only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period.

*Comment:* A few commenters expressed concern that this policy could substantially increase costs and burden for MIPS eligible clinicians, as it may require a MIPS eligible clinician or group practice to purchase an additional data submission mechanism in order to report 6 measures, and another commenter expressed concern for financial impact on small and solo practices. A few commenters stated that it would increase costs to vendors, which would be passed on to customers and patients. One commenter expressed concern regarding decreased productivity, and increased opportunity for coding errors. A few commenters expressed concern that they may be required to report on measures that are potentially not clinically relevant. One commenter noted that requiring the

clinician to use multiple submission mechanisms would penalize them for something out of their control, specifically development of specialty-specific eCQMs, noting that even with software certified to all 64 eCQMs, fewer than 6 have a positive denominator. A few commenters expressed concern with how this proposal would interact with the measure validation process to determine whether a clinician could have reported additional measures, specifically expressing concern that it would require eligible clinicians to look across multiple mechanisms to fulfill the 6-measure requirement and that MIPS eligible clinicians should not be held accountable to meet more measures or look across submission mechanisms, and potentially invest in multiple mechanisms, because CMS is making additional submission mechanisms available.

*Response:* We are not requiring that MIPS individual clinicians and groups submit via additional submission mechanisms; however, through this proposal the option would be available for those that have applicable measures and/or activities available to them. As discussed in section II.C.7.a.(2)(e) of this final rule with comment period, beginning with the CY 2019 performance period, we will apply our validation process to determine if other measures are available and applicable only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality performance category for a performance period. With regard to a specialty measure set, specialists who report on a specialty measure set are only required to report on the measures within that set, even if it is less than the required 6 measures. If the specialty set includes measures that are available through multiple submission mechanisms, then through this policy, beginning with the 2019 performance period, the option to report additional measures would be available for those that have applicable measures and/or activities available to them, which may potentially increase their score, but they are not required to utilize multiple submission methods to meet the 6 measure requirement. In addition, for MIPS eligible clinicians reporting on a specialty measure set via claims or registry, we will apply our validation process to determine if other measures are available and applicable within the specialty measure set only with respect to the data submission mechanism(s) that a MIPS eligible clinician utilizes for the quality

performance category for a performance period.

*Comment:* One commenter recommended that CMS withhold the option for submission through multiple mechanisms in the quality category for future implementation, or until CMS has become comfortable with the data received in year 1 of the program.

*Response:* We agree with the commenter and due to operational feasibility concerns, we have determined that this proposal will be implemented beginning with the CY 2019 performance period. By the time this proposal is implemented for the CY 2019 performance period, we will have greater familiarity with which the way data is submitted to CMS based off submissions from the CY 2017 performance period.

*Comment:* One commenter asked that CMS confirm that a MIPS eligible clinician would be allowed to submit data using multiple QCDRs under the same TIN/NPI or TIN because allowing submission via multiple QCDRs in single TIN could serve as a pathway forward for greater specialist participation within multispecialty groups.

*Response:* A MIPS individual eligible clinician or group would be able to submit data using multiple QCDRs if they are able to find measures supported by other QCDRs that would provide meaningful measurement for the clinicians, and those measures are applicable. Consistent with the policy finalized in the CY 2017 Quality Payment Program final rule (81 FR 77282 through 77301), we would like to clarify that beginning with the CY 2019 performance period, if a MIPS eligible clinician or group reports for the quality performance category by using multiple instances of the same submission mechanism (for example, multiple QCDRs), then all the submissions would be scored, and the 6 quality measures with the highest performance (that is, the greatest number of measure achievement points) would be utilized for the quality performance category score. As noted above, if an individual MIPS eligible clinician or group submits the same measure through two different submission mechanisms, each submission would be calculated and scored separately. We do not have the ability to aggregate data on the same measure across submission mechanisms. Similarly, data completeness cannot be combined for the same measure that is reported through multiple submission mechanisms, but data completeness would need to be achieved for each

measure and associated submission mechanism.

*Comment:* One commenter requested clarification on how the data completeness will be determined if reporting the same quality measures via multiple submission mechanisms, for example, if a clinician utilized two submission mechanisms to report the same measure, would 50 percent data completeness need to be achieved for each submission mechanism or for the combined data submitted. Another commenter asked how CMS will take into consideration data that is submitted using the same submission mechanism, but using two different products or services, specifically data submitted from two different certified EHRs in a single performance period when clinicians switch EHRs mid-performance year.

*Response:* In the CY 2017 Quality Payment Program final rule, we finalized that for the quality performance category, an individual MIPS eligible clinician or group that submits data on quality measures via EHR, QCDR, qualified registry, claims, or a CMS-approved survey vendor for the CAHPS for MIPS survey will be assigned measure achievement points for 6 measures (1 outcome, or if an outcome measure is not available, another high priority measure and the next 5 highest scoring measures) as available and applicable, and we will receive applicable measure bonus points for all measures submitted that meet the bonus criteria (81 FR 77282 through 77301). Consistent with this policy, we would like to clarify that for performance periods beginning in 2019, if a MIPS eligible clinician or group reports for the quality performance category by using multiple instances of the same data submission mechanism (for example, multiple EHRs) then all the submissions would be scored, and the 6 quality measures with the highest performance (that is, the greatest number of measure achievement points) would be utilized for the quality performance category score. As noted above, if an individual MIPS eligible clinician or group submits the same measure through two different mechanisms, each submission would be calculated and scored separately. We do not have the ability to aggregate data on the same measure across multiple submission mechanisms. We would only count the submission that gives the clinician the higher score, thereby avoiding the double count. For example, if a MIPS eligible clinician submits performance data for Quality Measure 236, Controlling High Blood Pressure, using a registry and also through an

EHR, these two submissions would be scored separately, and we would apply the submission with the higher score towards the quality performance score; we would not aggregated the score of the registry and EHR submission of the same measure. This approach decreases the likelihood of cumulative overcounting in the event that the submissions may have time or patient overlaps that may not be readily identifiable.

*Final Action:* After consideration of the public comments received, we are finalizing our proposal at § 414.1325(d) with modification. Specifically, due to operational reasons, and to allow for additional time to communicate how this policy intersects with our measure applicability policies, we are not finalizing this policy for the CY 2019 performance period. For the CY 2018 performance period, we intend to continue implementing the submission mechanisms policies as finalized in the CY 2017 Quality Payment Program final rule (81 FR 77094) that individual MIPS eligible clinicians and groups may elect to submit information via multiple submission mechanisms; however, they must use one submission mechanism per performance category. We are, however, finalizing our proposal beginning with the CY 2019 performance period. Thus, for purposes of the 2021 MIPS payment year and future years, beginning with performance periods occurring in 2019, individual MIPS eligible clinicians, groups, and virtual groups may submit data on measures and activities, as applicable, via multiple data submission mechanisms for a single performance category (specifically, the quality, improvement activities, or advancing care information performance category). Individual MIPS eligible clinicians and groups that have fewer than the required number of measures and activities applicable and available under one submission mechanism may submit data on additional measures and activities via one or more additional submission mechanisms, as necessary, provided that such measures and activities are applicable and available to them.

We are finalizing our proposal with modification. Specifically, we are not finalizing our proposal for the CY 2018 performance period, and our previously finalized policies continue to apply for the CY 2018 performance period. Thus, for the CY 2018 performance period, virtual groups may elect to submit information via multiple submission mechanisms; however, they must use the same identifier for all practice categories, and they may only use one submission mechanism per performance

category. We are, however, finalizing our proposal beginning with the CY 2019 performance period. Thus, beginning with the CY 2019 performance period, virtual groups will be able to use multiple submission mechanisms for each performance category.

## (2) Submission Deadlines

In the CY 2017 Quality Payment Program final rule (81 FR 77097), we finalized submission deadlines by which all associated data for all performance categories must be submitted for the submission mechanisms described in this rule.

As specified at § 414.1325(f)(1), the data submission deadline for the qualified registry, QCDR, EHR, and attestation submission mechanisms is March 31 following the close of the performance period. The submission period will begin prior to January 2 following the close of the performance period, if technically feasible. For example, for performance periods occurring in 2018, the data submission period will occur prior to January 2, 2019, if technically feasible, through March 31, 2019. If it is not technically feasible to allow the submission period to begin prior to January 2 following the close of the performance period, the submission period will occur from January 2 through March 31 following the close of the performance period. In any case, the final deadline will remain March 31, 2019.

At § 414.1325(f)(2), we specified that for the Medicare Part B claims submission mechanism, data must be submitted on claims with dates of service during the performance period that must be processed no later than 60 days following the close of the performance period. Lastly, for the CMS Web Interface submission mechanism, at § 414.1325(f)(3), we specified that the data must be submitted during an 8-week period following the close of the performance period that will begin no earlier than January 2, and end no later than March 31. For example, the CMS Web Interface submission period could span an 8-week timeframe beginning January 16 and ending March 13. The specific deadline during this timeframe will be published on the CMS Web site. We did not propose any changes to the submission deadlines in the CY 2018 Quality Payment Program proposed rule.

## b. Quality Performance Criteria

### (1) Background

Sections 1848(q)(1)(A)(i) and (ii) of the Act require the Secretary to develop

a methodology for assessing the total performance of each MIPS eligible clinician according to performance standards and, using that methodology, to provide for a final score for each MIPS eligible clinician. Section 1848(q)(2)(A)(i) of the Act requires us to use the quality performance category in determining each MIPS eligible clinician's final score, and section 1848(q)(2)(B)(i) of the Act describes the measures and activities that must be specified under the quality performance category.

The statute does not specify the number of quality measures on which a MIPS eligible clinician must report, nor does it specify the amount or type of information that a MIPS eligible clinician must report on each quality measure. However, section 1848(q)(2)(C)(i) of the Act requires the Secretary, as feasible, to emphasize the application of outcomes-based measures.

Sections 1848(q)(1)(E) of the Act requires the Secretary to encourage the use of QCDRs, and section 1848(q)(5)(B)(ii)(I) of the Act requires the Secretary to encourage the use of CEHRT and QCDRs for reporting measures under the quality performance category under the final score methodology, but the statute does not limit the Secretary's discretion to establish other reporting mechanisms.

Section 1848(q)(2)(C)(iv) of the Act generally requires the Secretary to give consideration to the circumstances of non-patient facing MIPS eligible clinicians and allows the Secretary, to the extent feasible and appropriate, to apply alternative measures or activities to such clinicians.

As discussed in the CY 2017 Quality Payment Program final rule (81 FR 77098 through 77099), we finalized MIPS quality criteria that focus on measures that are important to beneficiaries and maintain some of the flexibility from PQRS, while addressing several of the comments we received in response to the CY 2017 Quality Payment Program proposed rule and the MIPS and APMs RFI.

- To encourage meaningful measurement, we finalized allowing individual MIPS eligible clinicians and groups the flexibility to determine the most meaningful measures and data submission mechanisms for their practice.

- To simplify the reporting criteria, we aligned the submission criteria for several of the data submission mechanisms.

- To reduce administrative burden and focus on measures that matter, we lowered the required number of the

measures for several of the data submission mechanisms, yet still required that certain types of measures, particularly outcome measures, be reported.

- To create alignment with other payers and reduce burden on MIPS eligible clinicians, we incorporated measures that align with other national payers.

- To create a more comprehensive picture of a practice's performance, we also finalized the use of all-payer data where possible.

As beneficiary health is always our top priority, we finalized criteria to continue encouraging the reporting of certain measures such as outcome, appropriate use, patient safety, efficiency, care coordination, or patient experience measures. However, as discussed in the CY 2017 Quality Payment Program final rule (81 FR 77098), we removed the requirement for measures to span across multiple domains of the NQS. While we do not require that MIPS eligible clinicians select measures across multiple domains, we encourage them to do so.

### (2) Contribution to Final Score

For MIPS payment year 2019, the quality performance category will account for 60 percent of the final score, subject to the Secretary's authority to assign different scoring weights under section 1848(q)(5)(F) of the Act. Section 1848(q)(2)(E)(i)(I)(aa) of the Act states that the quality performance category will account for 30 percent of the final score for MIPS. However, section 1848(q)(2)(E)(i)(I)(bb) of the Act stipulates that for the first and second years for which MIPS applies to payments, the percentage of the final score applicable for the quality performance category will be increased so that the total percentage points of the increase equals the total number of percentage points by which the percentage applied for the cost performance category is less than 30 percent. Section 1848(q)(2)(E)(i)(II)(bb) of the Act requires that, for the transition year for which MIPS applies to payments, not more than 10 percent of the final score shall be based on the cost performance category. Furthermore, section 1848(q)(2)(E)(i)(II)(bb) of the Act states that, for the second year for which MIPS applies to payments, not more than 15 percent of the final score shall be based on the cost performance category.

In the CY 2017 Quality Payment Program final rule (81 FR 77100), we finalized at § 414.1330(b) that, for MIPS payment years 2019 and 2020, 60 percent and 50 percent, respectively, of

the MIPS final score will be based on the quality performance category. For the third and future years, 30 percent of the MIPS final score will be based on the quality performance category.

As discussed in section II.C.6.d. of this final rule with comment period, we are not finalizing our proposal to weight the cost performance category at zero percent for the second MIPS payment year (2020) and are instead retaining the previously finalized cost performance category weight of 10 percent for that year. In accordance with section 1848(q)(5)(E)(i)(I)(bb) of the Act, for the first 2 years, the percentage of the MIPS final score that would otherwise be based on the quality performance category (that is, 30 percent) must be increased by the same number of percentage points by which the percentage based on the cost performance category is less than 30 percent. We proposed to modify § 414.1330(b)(2) to reweight the percentage of the MIPS final score based on the quality performance category for MIPS payment year 2020 as may be necessary to account for any reweighting of the cost performance category, if finalized (82 FR 30037). Thus, since we are not finalizing our proposal to reweight the cost performance category to zero percent for MIPS payment year 2020, we are not finalizing our proposal to modify § 414.1330(b)(2), as the performance in the quality performance category currently comprises 50 percent of a MIPS eligible clinician's final score for MIPS payment year 2020, and no reweighting is necessary to account for the previously finalized cost performance category weight. We refer readers to section II.C.6.d. of this final rule with comment period for more information on the cost performance category.

Section 1848(q)(5)(B)(i) of the Act requires the Secretary to treat any MIPS eligible clinician who fails to report on a required measure or activity as achieving the lowest potential score applicable to the measure or activity. Specifically, under our finalized scoring policies, an individual MIPS eligible clinician or group that reports on all required measures and activities could potentially obtain the highest score possible within the performance category, assuming they perform well on the measures and activities they report. An individual MIPS eligible clinician or group who does not submit data on a required measure or activity would receive a zero score for the unreported items in the performance category (in accordance with section 1848(q)(5)(B)(i) of the Act). The individual MIPS

eligible clinician or group could still obtain a relatively good score by performing very well on the remaining items, but a zero score would prevent the individual MIPS eligible clinician or group from obtaining the highest possible score within the performance category.

The following is a summary of the public comments received on the "Contribution to Final Score" proposal and our responses:

*Comment:* Many commenters supported the policy to weight the quality performance category at 60 percent of the final score for the 2020 MIPS payment year. One commenter expressed appreciation for the proposal because it maintains consistency within the program, which facilitates easier implementation for upcoming years.

*Response:* We appreciate the commenters' support. However, as noted above, we are not finalizing our proposal at § 414.1330(b)(2) to provide that performance in the quality performance category will comprise 60 percent of a MIPS eligible clinician's final score for MIPS payment year 2020. We believe that by keeping our current policy to weight the quality performance period at 50 percent and the cost performance category at 10 percent will help ease the transition so that MIPS eligible clinicians can understand how they will be scored in future years under MIPS generally and the cost performance category in particular, as the cost performance category will be weighted at 30 percent beginning with MIPS payment year 2021.

*Comment:* One commenter did not support the policy to weight the quality performance category at 60 percent of the final score for the 2020 MIPS payment year. Instead, the commenter recommended that CMS retain the previously finalized weighting for the quality performance category of 50 percent for the 2020 MIPS payment year. The commenter explained that since the 2021 MIPS payment year will require a cost performance category weighting of 30 percent, they recommended that CMS not retreat from progressing toward that amount in the intervening year.

*Response:* We appreciate the commenter's recommendation and note that we are not finalizing the cost performance category weighting at zero percent toward the final score for the 2020 MIPS payment year. Further, the percentage of the MIPS final score based on the quality performance category for MIPS payment year 2020 will be 50 percent in accordance with section 1848(q)(5)(E)(i)(I)(bb) of the Act. We

refer readers to section II.C.6.d. of this final rule with comment period for more information on the cost performance category.

*Comment:* One commenter requested clarification on the policy to weight the quality performance category at 60 percent of the final score for the 2020 MIPS payment year instead of 50 percent. The commenter requested clarification as to which performance category the 10 percent difference would apply if the quality performance category was weighted at 50 percent in the 2020 MIPS payment year.

*Response:* As previously noted in this final rule with comment period, for the 2020 MIPS payment year, the quality performance category will be weighted at 50 percent. The 10 percent difference will be applied to the cost performance category.

*Comment:* A few commenters urged CMS to reconsider the proposal to weight the quality performance category at 60 percent of the final score for the 2020 MIPS payment year for non-patient facing MIPS eligible clinicians. One commenter noted that the quality performance category accounts for 85 percent of the total score for pathologists, and placing this much weight on the quality performance category puts pathologists at an unfair disadvantage given the lack of reportable measures. The commenter recommended that the improvement activity performance category be weighted more heavily at a 50 percent weight and that the quality performance category receive a 50 percent weight. Another commenter indicated that it was not possible for non-patient facing MIPS eligible clinicians to achieve a score higher than 40 percent, in the quality performance category, given a lack of measures and given that those measures that are applicable are only worth 3 points. While this score allows them to avoid a penalty, the commenter noted it precludes them from achieving a bonus. Thus, the commenter recommended that CMS reweight the quality performance category for non-patient facing MIPS eligible clinicians so that they can receive a score of 70 percent or higher. This would give non-patient facing MIPS eligible clinicians motivation for improvement as well as encourage them to continue to participate in the Quality Payment Program should it become voluntary.

*Response:* As previously noted in this final rule with comment period, we are not finalizing our proposal to reweight the quality performance to 60 percent of the final score or the cost performance category to zero percent of the final score for the 2020 MIPS payment year.

Therefore, we are keeping our previously finalized policy to weight the quality performance category at 50 percent and the cost performance category at 10 percent for the 2020 MIPS payment year. It is important to note that for the 2021 MIPS payment year that the quality performance category will be 30 percent of the final score, and the cost performance category will be 30 percent of the final score as required by statute. We cannot weight the improvement activities performance category more heavily as suggested because section 1848(q)(5)(E)(i)(III) of the Act specifies that the improvement activities performance category will account for 15 percent of the final score and was codified as such at § 414.1355. Regarding the comment on applicable measures being worth less points, we note that non-patient facing MIPS eligible clinicians may report on a specialty-specific measure set (which may have fewer than the required six measures) or may report through a QCDR that can report QCDR measures in order to earn the full points in the quality performance category.

*Final Action:* After consideration of the public comments, we are not finalizing our proposal at § 414.1330(b)(2) to provide that performance in the quality performance category will comprise 60 percent of a MIPS eligible clinician's final score for MIPS payment year 2020. Rather we will be maintaining our previously finalized policy at § 414.1330(b)(2) to provide that the performance in the quality performance category will comprise 50 percent of a MIPS eligible clinician's final score for MIPS payment year 2020.

### (3) Quality Data Submission Criteria

#### (a) Submission Criteria

##### (i) Submission Criteria for Quality Measures Excluding Groups Reporting via the CMS Web Interface and the CAHPS for MIPS Survey

In the CY 2017 Quality Payment Program final rule (81 FR 77114), we finalized at § 414.1335(a)(1) that individual MIPS eligible clinicians submitting data via claims and individual MIPS eligible clinicians and groups submitting data via all mechanisms (excluding the CMS Web Interface and the CAHPS for MIPS survey) are required to meet the following submission criteria. For the applicable period during the performance period, the individual MIPS eligible clinician or group will report at least six measures, including at least one outcome measure. If an applicable outcome measure is not

available, the individual MIPS eligible clinician or group will be required to report one other high priority measure (appropriate use, patient safety, efficiency, patient experience, and care coordination measures) in lieu of an outcome measure. If fewer than six measures apply to the individual MIPS eligible clinician or group, then the individual MIPS eligible clinician or group would be required to report on each measure that is applicable. We defined "applicable" to mean measures relevant to a particular MIPS eligible clinician's services or care rendered. As discussed in section II.C.7.a.(2) of this final rule with comment period, we will only make determinations as to whether a sufficient number of measures are applicable for claims-based and registry submission mechanisms; we will not make this determination for EHR and QCDR submission mechanisms, for example.

Alternatively, the individual MIPS eligible clinician or group will report one specialty measure set, or the measure set defined at the subspecialty level, if applicable. If the measure set contains fewer than six measures, MIPS eligible clinicians will be required to report all available measures within the set. If the measure set contains six or more measures, MIPS eligible clinicians will be required to report at least six measures within the set. Regardless of the number of measures that are contained in the measure set, MIPS eligible clinicians reporting on a measure set will be required to report at least one outcome measure or, if no outcome measures are available in the measure set, the MIPS eligible clinician will report another high priority measure (appropriate use, patient safety, efficiency, patient experience, and care coordination measures) within the measure set in lieu of an outcome measure. MIPS eligible clinicians may choose to report measures in addition to those contained in the specialty measure set and will not be penalized for doing so, provided that such MIPS eligible clinicians follow all requirements discussed here.

In accordance with § 414.1335(a)(1)(ii), individual MIPS eligible clinicians and groups will select their measures from either the set of all MIPS measures listed or referenced in Table A of the Appendix in this final rule with comment period or one of the specialty measure sets listed in Table B of the Appendix in this final rule with comment period. We note that some specialty measure sets include measures grouped by subspecialty; in these cases, the measure set is defined at the subspecialty level. Previously finalized

quality measures may be found in the CY 2017 Quality Payment Program final rule (81 FR 77558 through 77816).

We also finalized the definition of a high priority measure at § 414.1305 to mean an outcome, appropriate use, patient safety, efficiency, patient experience, or care coordination quality measure. Except as discussed in section II.C.6.b.(3)(a) of this final rule with comment period with regard to the CMS Web Interface and the CAHPS for MIPS survey, we did not propose any changes to the submission criteria or definitions established for measures in the proposed rule.

In the CY 2017 Quality Payment Program final rule (81 FR 77114), we solicited comments regarding adding a requirement to our finalized policy that patient-facing MIPS eligible clinicians would be required to report at least one cross-cutting measure in addition to the high priority measure requirement for further consideration for the Quality Payment Program Year 2 and future years. For clarification, we consider a cross-cutting measure to be any measure that is broadly applicable across multiple clinical settings and individual MIPS eligible clinicians or groups within a variety of specialties. We specifically requested feedback on how we could construct a cross-cutting measure requirement that would be most meaningful to MIPS eligible clinicians from different specialties and that would have the greatest impact on improving the health of populations. We refer readers to the CY 2018 Quality Payment Program proposed rule (82 FR 30038 through 30039) for a full discussion of the comments received and responses provided.

Except as discussed in section II.C.6.b.(3)(a)(iii) of this final rule with comment period with regard to the CAHPS for MIPS survey, we did not propose any changes to the submission criteria for quality measures. We solicited additional feedback on meaningful ways to incorporate cross-cutting measurement into MIPS and the Quality Payment Program generally. We received several comments regarding incorporating cross-cutting measurements into the Quality Payment Program and will take them into consideration in future rulemaking.

##### (ii) Submission Criteria for Quality Measures for Groups Reporting via the CMS Web Interface

In the CY 2017 Quality Payment Program final rule (81 FR 77116), we finalized at § 414.1335(a)(2) the following criteria for the submission of data on quality measures by registered groups of 25 or more eligible clinicians

who want to report via the CMS Web Interface. For the applicable 12-month performance period, the group would be required to report on all measures included in the CMS Web Interface completely, accurately, and timely by populating data fields for the first 248 consecutively ranked and assigned Medicare beneficiaries in the order in which they appear in the group's sample for each module or measure. If the sample of eligible assigned beneficiaries is less than 248, then the group would report on 100 percent of assigned beneficiaries. A group would be required to report on at least one measure for which there is Medicare patient data. Groups reporting via the CMS Web Interface are required to report on all of the measures in the set. Any measures not reported would be considered zero performance for that measure in our scoring algorithm. Specifically, we proposed to revise § 414.1335(a)(2) to clarify that the CMS Web Interface criteria applies only to groups of 25 or more eligible clinicians (82 FR 30039). As previously finalized at § 414.1335(a)(2)(i), groups using the CMS Web Interface must report on all measures included in the CMS Web Interface and report on the first 248 consecutively ranked beneficiaries in the sample for each measure or module.

In the CY 2017 Quality Payment Program final rule (81 FR 77116), we finalized to continue to align the 2019 CMS Web Interface beneficiary assignment methodology with the attribution methodology for two of the measures that were formerly in the VM: the acute and chronic composite measures of Agency for Healthcare Research and Quality (AHRQ) Prevention Quality Indicators (PQIs) discussed in the CY 2017 Quality Payment Program proposed rule (81 FR 28192) and total per capita cost for all attributed beneficiaries discussed in the CY 2017 Quality Payment Program proposed rule (81 FR 28196). When establishing MIPS, we also finalized a modified attribution process to update the definition of primary care services and to adapt the attribution to different identifiers used in MIPS. These changes are discussed in the CY 2017 Quality Payment Program proposed rule (81 FR 28196).

We clarify that the attribution methodology for the CMS Web Interface implemented under MIPS is similar to the attribution methodology implemented under the Physician Quality Reporting System (PQRS) Group Practice Reporting Option (GPRO) Web Interface, which utilizes a two-step attribution process to associate beneficiaries with TINs during the

period in which performance is assessed. The process attributes a beneficiary to a TIN that bills the plurality of primary care services for that beneficiary. In order to conduct attribution for the CMS Web Interface, we utilize retrospective assignment to identify beneficiaries eligible for sampling and identify the beneficiary claims that will be utilized for the calculations of cost. Beneficiary assignment for groups is based on a 10-month period (between January and October) and determined retrospectively after the month of October for the applicable performance period. We note that it is not operationally feasible for us to utilize a period longer than 10 months, to assess claims data for beneficiary assignment for a performance period.

Lastly, we note that groups reporting via the CMS Web Interface may also report the CAHPS for MIPS survey and receive bonus points for submitting that measure. We did not propose any changes to the submission criteria for quality measures for groups reporting via the CMS Web Interface in the proposed rule.

The following is a summary of the public comments received on the "Submission Criteria for Quality Measures for Groups Reporting via the CMS Web Interface" proposal and our responses:

*Comment:* One commenter suggested that CMS allow groups with fewer than 25 eligible clinicians (such as 2 or more eligible clinicians in a group) to use CMS Web Interface reporting. The commenter was concerned that the Quality Payment Program is more limiting than PQRS with regard to available submission mechanisms.

*Response:* The CMS Web Interface has been limited to groups of 25 or more eligible clinicians because smaller groups have not been able to meet the data submission requirements on the sample of the Medicare Part B patients we provide. We would like to clarify that we have made available the same submission mechanisms for the Quality Payment Program that were available for PQRS. In addition, we are finalizing our proposal to revise § 414.1325(d) for purposes of the 2021 MIPS payment year and future years to allow individual MIPS eligible clinicians and groups to submit measures and activities, as applicable, via as many submission mechanisms as necessary to meet the requirements of the quality, improvement activities, or advancing care information performance categories. We refer readers to section II.C.6.a.(1) of this final rule with

comment period for more information on submission mechanisms.

*Final Action:* After consideration of the public comments, we are finalizing our proposal at § 414.1335(a)(2) to clarify that the CMS Web Interface criteria applies only to group of 25 or more eligible clinicians. As previously finalized at § 414.1335(a)(2)(i), the group must report on the first 248 consecutively ranked beneficiaries in the sample for each measure or module.

(iii) Performance Criteria for Quality Measures for Groups Electing To Report Consumer Assessment of Healthcare Providers and Systems (CAHPS) for MIPS Survey

In the CY 2017 Quality Payment Program final rule (81 FR 77100), we finalized at § 414.1335(a)(3) the following criteria for the submission of data on the CAHPS for MIPS survey by registered groups via CMS-approved survey vendor: For the applicable 12-month performance period, a group that wishes to voluntarily elect to participate in the CAHPS for MIPS survey measure must use a survey vendor that is approved by CMS for a particular performance period to transmit survey measures data to CMS. The CAHPS for MIPS survey counts for one measure towards the MIPS quality performance category and, as a patient experience measure, also fulfills the requirement to report at least one high priority measure in the absence of an applicable outcome measure. In addition, groups that elect this data submission mechanism must select an additional group data submission mechanism (that is, qualified registries, QCDRs, EHR, etc.) in order to meet the data submission criteria for the MIPS quality performance category. The CAHPS for MIPS survey will count as one patient experience measure, and the group will be required to submit at least five other measures through one other data submission mechanism. A group may report any five measures within MIPS plus the CAHPS for MIPS survey to achieve the six measures threshold. We did not propose any changes to the performance criteria for quality measures for groups electing to report the CAHPS for MIPS survey in the proposed rule.

In the CY 2017 Quality Payment Program final rule (see 81 FR 77120), we finalized retaining the CAHPS for MIPS survey administration period that was utilized for PQRS of November to February. However, this survey administration period has become operationally problematic for the administration of MIPS. In order to compute scoring, we must have the

CAHPS for MIPS survey data earlier than the current survey administration period deadline allows. Therefore, we proposed for the Quality Payment Program Year 2 and future years that the survey administration period would, at a minimum, span over 8 weeks and would end no later than February 28th following the applicable performance period (82 FR 30040). In addition, we proposed to further specify the start and end timeframes of the survey administration period through our normal communication channels.

In addition, as discussed in the CY 2017 Quality Payment Program final rule (81 FR 77116), we anticipated exploring the possibility of updating the CAHPS for MIPS survey under MIPS, specifically not finalizing all of the proposed Summary Survey Measures (SSMs). The CAHPS for MIPS survey currently consists of the core CAHPS Clinician & Group (CG-CAHPS) Survey developed by the Agency for Healthcare Research and Quality (AHRQ), plus additional survey questions to meet CMS's program needs. We proposed for the Quality Payment Program Year 2 and future years to remove two SSMs, specifically, "Helping You to Take Medication as Directed" and "Between Visit Communication" from the CAHPS for MIPS survey (82 FR 30040). We proposed to remove the SSM entitled "Helping You to Take Medication as Directed" due to low reliability. In 2014 and 2015, the majority of groups had very low reliability on this SSM. Furthermore, based on analyses conducted of SSMs in an attempt to improve their reliability, removing questions from this SSM did not result in any improvements in reliability. The SSM, "Helping You to Take Medication as Directed," has also never been a scored measure with the Medicare Shared Savings Program CAHPS for Accountable Care Organizations (ACOs) Survey. We refer readers to the CY 2014 Physician Fee Schedule final rule for a discussion on the CAHPS for ACOs survey scoring (79 FR 67909 through 67910) and measure tables (79 FR 67916 through 67917). The SSM entitled "Between Visit Communication" currently contains only one question. This question could also be considered related to other SSMs entitled: "Care Coordination" or "Courteous and Helpful Office Staff," but does not directly overlap with any of the questions under that SSM. However, we proposed to remove this SSM in order to maintain consistency with the Medicare Shared Savings Program which, utilizes the CAHPS for ACOs Survey. The SSM entitled "Between

Visit Communication" has never been a scored measure with the Medicare Shared Savings Program CAHPS for ACOs Survey. We refer readers to section I.I.C.6.g. for the discussion of the CAHPS for ACOs survey.

In addition to public comments we received, we also took into consideration analysis we conducted before finalizing this provision. Specifically, we reviewed the findings of the CAHPS for ACOs survey pilot, which was administered from November 2016 through February 2017. The CAHPS for ACOs survey pilot utilized a survey instrument which did not contain the two SSMs that we proposed for removal from the CAHPS for MIPS survey. For more information on the other SSMs within the CAHPS for MIPS survey, please see the explanation of the CAHPS for PQRS survey in the CY 2016 PFS final rule with comment period (80 FR 71142 through 71143).

TABLE 4—SUMMARY SURVEY MEASURES (SSMs) INCLUDED IN THE CAHPS FOR MIPS SURVEY

---

Getting Timely Care, Appointments, and Information.  
How Well Providers Communicate.  
Patient's Rating of Provider.  
Access to Specialists.  
Health Promotion and Education.  
Shared Decision-Making.  
Health Status and Functional Status.  
Courteous and Helpful Office Staff.  
Care Coordination.  
Stewardship of Patient Resources.

---

We sought comment on expanding the patient experience data available for the CAHPS for MIPS survey (82 FR 30040 through 30041). Currently, the CAHPS for MIPS survey is available for groups to report under the MIPS. The patient experience survey data that is available on Physician Compare is highly valued by patients and their caregivers as they evaluate their health care options. However, in user testing with patients and caregivers in regard to the Physician Compare Web site, the users regularly request more information from patients like them in their own words. Patients regularly request that we include narrative reviews of individual clinicians and groups on the Web site. AHRQ is fielding a beta version of the CAHPS Patient Narrative Elicitation Protocol (<https://www.ahrq.gov/cahps/surveys-guidance/item-sets/elicitation/index.html>). This includes five open-ended questions designed to be added to the CG CAHPS survey, after which the CAHPS for MIPS survey is modeled. These five questions have been

developed and tested in order to capture patient narratives in a scientifically grounded and rigorous way, setting it apart from other patient narratives collected by various health systems and patient rating sites. More scientifically rigorous patient narrative data would not only greatly benefit patients in their decision for healthcare, but it would also greatly aid individual MIPS eligible clinicians and groups as they assess how their patients experience care. We sought comment on adding these five open-ended questions to the CAHPS for MIPS survey in future rulemaking. Beta testing is an ongoing process, and we anticipate reviewing the results of that testing in collaboration with AHRQ before proposing changes to the CAHPS for MIPS survey.

We are requiring, where possible, all-payer data for all reporting mechanisms, yet certain reporting mechanisms are limited to Medicare Part B data. Specifically, the CAHPS for MIPS survey currently relies on sampling protocols based on Medicare Part B billing; therefore, only Medicare Part B beneficiaries are sampled through that methodology. We requested comments on ways to modify the methodology to assign and sample patients using data from other payers for reporting mechanisms that are currently limited to Medicare Part B data (82 FR 30041). In particular, we sought comment on the ability of groups to provide information on the patients to whom they provide care during a calendar year, whether it would be possible to identify a list of patients seen by individual clinicians in the group, and what type of patient contact information groups would be able to provide. Further, we sought comment on the challenges groups may anticipate in trying to provide this type of information, especially for vulnerable beneficiary populations, such as those lacking stable housing. We also sought comment on EHR vendors' ability to provide information on the patients who receive care from their client groups.

The following is a summary of the public comments received on the "Performance Criteria for Quality Measures for Groups Electing to Report the CAHPS for MIPS Survey" proposals and our responses:

*Comment:* A few commenters supported removing the 2 SSMs, "Helping You to Take Medication as Directed" and "Between Visit Communication" from CAHPS for MIPS for the 2018 MIPS performance period and future MIPS performance periods. The commenters recommended that CMS communicate all changes made to the CAHPS for MIPS survey well in advance of the annual registration

deadline. While supportive of CMS' proposal to remove these 2 SSMs, one commenter urged CMS to replace the "Helping You to Take Medication as Directed" module with a reliable way to measure patient experience for patients as part of understanding their medications. Finally, one commenter urged CMS to make the survey even shorter, stating that it is still significantly too long to gain a large enough adoption rate among patients and needs to be reduced further to increase completion rates.

*Response:* We thank the commenters for their support and will make every effort to continue to communicate changes to the CAHPS for MIPS survey. We also appreciate the commenters' suggestion to replace the "Helping You to Take Medication as Directed" SSM with a reliable way to measure patients' understanding of their medications, as well as the suggestion to reduce the number of questions in the CAHPS for MIPS survey, and will consider these suggestions for future years of the CAHPS for MIPS survey. We are finalizing for the Quality Payment Program Year 2 and future years to remove two SSMs, specifically, "Helping You to Take Medication as Directed" and "Between Visit Communication" from the CAHPS for MIPS survey.

*Comment:* Several commenters did not support the proposal to remove the 2 SSMs without alternative domains or better patient experience or patient-reported outcomes measures to replace them and urged us to leave these SSMs in the survey at this time. Commenters noted that although the "Between Visit Communication" measure is related to 2 other SSMs ("Care Coordination" and "Courteous and Helpful Office Staff"), these measures do not entirely overlap, and poor communication between visits can have serious consequences. The commenters also expressed concern that the "Helping You to Take Medication as Directed" SSM is needed to continue to capture safe and appropriate medication use as a domain of the CAHPS for MIPS survey. One commenter expressed concern that removal of the SSM is premature and encouraged us to improve this SSM instead of removing it entirely, urging us to retain the SSM and capture this information within both the CAHPS for MIPS and the CAHPS for ACOs surveys if necessary. Another commenter recommended that CMS keep the current CAHPS format which they noted provides important feedback on key areas such as timely appointments, easy access to information, and good communication with healthcare providers.

*Response:* We acknowledge the commenters' concerns with respect to removing the "Between Visit Communication" and "Helping You to Take Medication as Directed" SSMs. We would like to note that the Shared Savings Program piloted tested a revised CAHPS survey that did not include these two SSMs, and we have reviewed the results of that survey. Results from the pilot study suggest that administration of the shortened version of the survey (that is, the pilot survey) is likely to result in improvements in overall response rates. Findings show that the response rate to the pilot survey was 3.4 percentage points higher than the response rate to the Reporting Year (RY) 2016 CAHPS for ACOs survey among ACOs participating in the pilot study. Increases in response rates tended to be larger among ACOs that had lower response rates in the prior year. In addition, after accounting for survey questions that were removed from the pilot survey, the average survey responses for ACOs who participated in the pilot study were mostly similar across the two survey versions (pilot and RY 2016). Based on results of the piloted CAHPS survey, we recommend the removal of the two SSMs "Between Visit Communication" and "Helping You to Take Medications as Directed". Further, the SSM, "Between Visit Communication," currently contains only one question. This question could also be considered related to other SSMs entitled: "Care Coordination" or "Courteous and Helpful Office Staff," but does not directly overlap with any of the questions under that SSM. As for the SSM, "Helping You to Take Medication as Directed," this SSM has had low reliability. However, we will continue to look at ways to further improve the CAHPS for MIPS survey including exploring new questions and domains of patient experience. We are finalizing for the Quality Payment Program Year 2 and future years to remove two SSMs, specifically, "Helping You to Take Medication as Directed" and "Between Visit Communication" from the CAHPS for MIPS survey.

*Comment:* A few commenters supported the proposal to reduce the minimum fielding period for CAHPS for MIPS from 4 months to 2 months in the 2018 MIPS performance period to allow CMS to have adequate time to collect the data needed to administer the MIPS program. One commenter urged CMS to explore additional ways to improve the survey in terms of the survey administration time frame, frequency of results, and the length of the survey and

its administration, which is often well after the patient's visit.

*Response:* We plan to consider additional ways to improve the survey in regards to the timeframe for administering the survey, frequency of the results, as well as the survey instrument and its administration. We are finalizing that for the Quality Payment Program Year 2 and future years the survey administration period would span over a minimum of 8 weeks to a maximum of 17 weeks and would end no later than February 28th following the applicable performance period. In addition, we are finalizing to further specify the start and end timeframes of the survey administration period through our normal communication channels.

*Comment:* A few commenters did not support the proposal to change the minimum fielding period for CAHPS for MIPS, expressing concern that 2 months of data is inadequate for a meaningful assessment of the patient experience. One commenter expressed concern that the cost to engage a survey vendor for a relatively short period and for potentially low returns may limit the value of participation, especially if the cost is in addition to costs for the mechanisms to support the other 5 quality measures. Commenters encouraged CMS to field the CAHPS for MIPS survey for at least 10 to 14 weeks—or to select 12 weeks in alignment with existing CAHPS guidelines—in order to improve the patient response rate and avoid unintentionally excluding patients who have a more difficult time responding within the shortened response period.

*Response:* We appreciate the commenters' concern that 2 months of data is inadequate for a meaningful assessment of patient experience and the recommendation to field the CAHPS for MIPS survey for at least 10 to 14 weeks. We would like to clarify that the proposal was for the survey administration, at a minimum, to span over 8 weeks. We believe that an 8 week minimum is adequate for the meaningful assessment of the patient experience because it provides sufficient time for the beneficiaries to respond to the survey. With respect to the 2018 CAHPS for MIPS survey, we anticipate that the survey administration period will be longer than the minimum 8 weeks and note that we will specify the start and end timeframes of the survey administration period through our normal communication channels. Further, this policy will allow us the flexibility to adjust the survey administration period to meet future operational needs, as well

as any newly identified adjustments to the survey administration period that would result in improvements, such as response rates. We are finalizing that for the Quality Payment Program Year 2 and future years the survey administration period would, span over a minimum of 8 weeks to a maximum of 17 weeks and end no later than February 28th following the applicable performance period. We refer readers to section II.C.6.a. of this final rule with comment period for more information on submission mechanisms.

*Final Action:* After consideration of the public comments, we are finalizing that for the Quality Payment Program Year 2 and future years the survey administration period would span over a minimum of 8 weeks to a maximum of 17 weeks and would end no later than February 28th following the applicable performance period. In addition, we are finalizing to further specify the start and end timeframes of the survey administration period through our normal communication channels. Further, we are finalizing for the Quality Payment Program Year 2 and future years to remove two SSMs, specifically, “Helping You to Take Medication as Directed” and “Between Visit Communication” from the CAHPS for MIPS survey.

#### (b) Data Completeness Criteria

In the CY 2017 Quality Payment Program final rule (81 FR 77125), we finalized data completeness criteria for the transition year and MIPS payment year 2020. We finalized at § 414.1340 the data completeness criteria that follows for performance periods occurring in 2017.

- Individual MIPS eligible clinicians or groups submitting data on quality measures using QCDRs, qualified registries, or via EHR must report on at least 50 percent of the individual MIPS eligible clinician or group’s patients that meet the measure’s denominator criteria, regardless of payer, for the performance period. In other words, for these submission mechanisms, we expect to receive quality data for both Medicare and non-Medicare patients. For the transition year, MIPS eligible clinicians whose measures fall below the data completeness threshold of 50 percent would receive 3 points for submitting the measure.

- Individual MIPS eligible clinicians submitting data on quality measures data using Medicare Part B claims, would report on at least 50 percent of the Medicare Part B patients seen during the performance period to which the measure applies. For the transition year, MIPS eligible clinicians whose

measures fall below the data completeness threshold of 50 percent would receive 3 points for submitting the measure.

- Groups submitting quality measures data using the CMS Web Interface or a CMS-approved survey vendor to report the CAHPS for MIPS survey must meet the data submission requirements on the sample of the Medicare Part B patients that CMS provides.

In addition, we finalized an increased data completeness threshold of 60 percent for MIPS for performance periods occurring in 2018 for data submitted on quality measures using QCDRs, qualified registries, via EHR, or Medicare Part B claims. We noted that we anticipate we will propose to increase these thresholds for data submitted on quality measures using QCDRs, qualified registries, via EHR, or Medicare Part B claims for performance periods occurring in 2019 and onward.

We proposed to modify the previously established data completeness criteria for MIPS payment year 2020 (82 FR 30041 through 30042). Specifically, we proposed to provide an additional year for individual MIPS eligible clinicians and groups to gain experience with MIPS before increasing the data completeness thresholds for data submitted on quality measures using QCDRs, qualified registries, via EHR, or Medicare Part B claims. We noted concerns about the unintended consequences of accelerating the data completeness threshold so quickly, which may jeopardize MIPS eligible clinicians’ ability to participate and perform well under the MIPS, particularly those clinicians who are least experienced with MIPS quality measure data submission. We wanted to ensure that an appropriate yet achievable level of data completeness is applied to all MIPS eligible clinicians. We continue to believe it is important to incorporate higher data completeness thresholds in future years to ensure a more accurate assessment of a MIPS eligible clinician’s performance on quality measures and to avoid any selection bias. Therefore, we proposed a 60 percent data completeness threshold for MIPS payment year 2021. We strongly encouraged all MIPS eligible clinicians to perform the quality actions associated with the quality measures on their patients. The data submitted for each measure is expected to be representative of the individual MIPS eligible clinician’s or group’s overall performance for that measure. The data completeness threshold of less than 100 percent is intended to reduce burden and accommodate operational issues that may arise during data collection

during the initial years of the program. We provided this notice to MIPS eligible clinicians so that they can take the necessary steps to prepare for higher data completeness thresholds in future years.

Therefore, we proposed to revise the data completeness criteria for the quality performance category at § 414.1340(a)(2) to provide that MIPS eligible clinicians and groups submitting quality measures data using the QCDR, qualified registry, or EHR submission mechanism must submit data on at least 50 percent of the individual MIPS eligible clinician’s or group’s patients that meet the measure’s denominator criteria, regardless of payer, for MIPS payment year 2020. We also proposed to revise the data completeness criteria for the quality performance category at § 414.1340(b)(2) to provide that MIPS eligible clinicians and groups submitting quality measures data using Medicare Part B claims, must submit data on at least 50 percent of the applicable Medicare Part B patients seen during the performance period to which the measure applies for MIPS payment year 2020. We further proposed at § 414.1340(a)(3), that MIPS eligible clinicians and groups submitting quality measures data using the QCDR, qualified registry, or EHR submission mechanism must submit data on at least 60 percent of the individual MIPS eligible clinician or group’s patients that meet the measure’s denominator criteria, regardless of payer, for MIPS payment year 2021. We also proposed at § 414.1340(b)(3), that MIPS eligible clinicians and groups submitting quality measures data using Medicare Part B claims, must submit data on at least 60 percent of the applicable Medicare Part B patients seen during the performance period to which the measure applies for MIPS payment year 2021. We noted that we anticipate for future MIPS payment years we will propose to increase the data completeness threshold for data submitted using QCDRs, qualified registries, EHR submission mechanisms, or Medicare Part B claims. As MIPS eligible clinicians gain experience with the MIPS, we would propose to steadily increase these thresholds for future years through rulemaking. In addition, we sought comment on what data completeness threshold should be established for future years.

In the CY 2017 Quality Payment Program final rule (81 FR 77125 through 77126), we finalized our approach of including all-payer data for the QCDR, qualified registry, and EHR submission mechanisms because we believed this approach provides a more complete picture of each MIPS eligible clinician’s

scope of practice and provides more access to data about specialties and subspecialties not currently captured in PQRS. In addition, those clinicians who utilize the QCDR, qualified registry, or EHR data submission methods must contain a minimum of one quality measure for at least one Medicare patient. We did not propose any changes to these policies. As noted in the CY 2017 Quality Payment Program final rule, those MIPS eligible clinicians who fall below the data completeness thresholds will receive 3 points for the specific measures that fall below the data completeness threshold in the transition year of MIPS only. For the Quality Payment Program Year 2, we proposed that MIPS eligible clinicians would receive 1 point for measures that fall below the data completeness threshold, with an exception for small practices, which would still receive 3 points for measures that fail data completeness. We refer readers to section II.C.6.b.(3) of this final rule with comment period for our finalized policies on instances when MIPS eligible clinicians' measures fall below the data completeness threshold.

The following is a summary of the public comments received on the "Data Completeness Criteria" proposals and our responses:

*Comment:* Several commenters expressed support for our proposal to increase the data completeness threshold to 60 percent for the 2021 MIPS payment year.

*Response:* We appreciate the commenters' support and are finalizing this proposal.

*Comment:* Several commenters urged CMS to not finalize an increase in the data completeness threshold for the 2021 MIPS payment year or future payment years. Commenters noted that constant changing in reporting requirements creates administrative challenges for eligible clinicians and their staff. Other commenters observed that a higher threshold of data completeness requires a significant amount of technical and administrative coordination which can take several months to properly validate, both for MIPS eligible clinicians in larger practices and those in small and rural practices.

*Response:* We understand the commenters' concerns but believe it is important to incorporate higher thresholds to ensure a more accurate assessment of a MIPS eligible clinician's performance on the quality measures and to avoid any selection bias. Therefore, we are not finalizing our proposal to decrease the data completeness threshold to 50 percent

for the 2020 MIPS payment year and are instead retaining the previously finalized data completeness threshold of 60 percent that year. In addition, we are finalizing our proposal to increase the data completeness threshold to 60 percent for MIPS payment year 2021.

*Comment:* Many commenters supported the proposal to apply the data completeness criteria that was previously finalized for the CY 2017 performance period to the CY 2018 performance period because they believed that it would help create stability within the quality performance category, would enable MIPS eligible clinicians and groups to gain additional experience reporting on quality measures and make improvements, and would enhance the ability of MIPS eligible clinicians and groups to perform well in the program. Several commenters noted that taking a slower approach to increasing the data completeness criteria is the best way to ensure reliable and accurate data is submitted so that CMS has a complete and accurate reflection of MIPS eligible clinician performance.

*Response:* While we understand the commenters' desire to take a more gradual approach, we must balance this with need to ensure that we have a complete and accurate reflection of MIPS eligible clinician performance. As such, we are not finalizing our proposal to decrease the data completeness threshold to 50 percent for the 2020 MIPS payment year and are instead retaining the previously finalized data completeness threshold of 60 percent for that year. In addition, we are finalizing our proposal to increase the data completeness threshold to 60 percent for MIPS payment year 2021.

*Comment:* A few commenters did not support our proposal to delay moving to a higher data completeness threshold until the 2019 MIPS performance period and 2021 MIPS payment year, expressing concern that a delay would encourage MIPS eligible clinicians and groups to avoid the selection of population-based measures that would more easily meet any higher completeness requirements that we might set; would negatively impact the ability of high performers to receive a substantial payment increase in the 2020 MIPS payment year; and would not prepare MIPS eligible clinicians and groups for a more rigorous program in future years. A few commenters suggested that 50 percent of available data is insufficient and that a larger patient sample provides a more reliable and valid representation of true performance and will better support clinician groups in internal

benchmarking for quality improvement. One commenter noted that a delay would continue to create a misalignment between the MIPS and Advanced APM tracks. One commenter disagreed with the 50 percent threshold itself, expressing concern that this standard may motivate MIPS eligible clinicians and groups to "cherry pick" the cases that make up the denominator for reporting. This commenter suggested that for any reporting mechanism for which a MIPS eligible clinician could attest to a formal, auditable representative sampling, we should exempt the MIPS eligible clinician from the data completeness standard.

*Response:* We agree that a larger sample reduces the likelihood of selection bias and provides a more reliable and valid representation of true performance. As a result, we are not finalizing our proposal to decrease the data completeness threshold to 50 percent for the 2020 MIPS payment year and are instead retaining the previously finalized data completeness threshold of 60 percent for that year. In addition, we are finalizing our proposal to increase the data completeness threshold to 60 percent for MIPS payment year 2021.

*Final Action:* After consideration of the public comments, we are not finalizing our proposal regarding the data completeness criteria for MIPS payment year 2020. Instead, we are retaining our previously finalized requirements at:

- § 414.1340(a)(2) that MIPS eligible clinicians and groups submitting quality measures data using the QCDR, qualified registry, or EHR submission mechanism must submit data on at least 60 percent of the MIPS eligible clinician or group's patients that meet the measure's denominator criteria, regardless of payer for MIPS payment year 2020; and

- § 414.1340(b)(2) that MIPS eligible clinicians submitting quality measures data using Medicare Part B claims, must submit data on at least 60 percent of the applicable Medicare Part B patients seen during the performance period to which the measure applies for MIPS payment years 2020.

We are, however, finalizing our proposal regarding the data completeness criteria for MIPS payment year 2021. Specifically, we are finalizing at:

- § 414.1340(a)(2) that MIPS eligible clinicians and groups submitting quality measures data using the QCDR, qualified registry, or EHR submission mechanism must submit data on at least 60 percent of the MIPS eligible clinician or group's patients that meet the measure's denominator criteria,

regardless of payer for MIPS payment year 2021; and

- § 414.1340(b)(2) that MIPS eligible clinicians submitting quality measures data using Medicare Part B claims, must submit data on at least 60 percent of the applicable Medicare Part B patients seen during the performance period to which the measure applies for MIPS payment years 2021.

(c) Summary of Data Submission Criteria

Table 5 reflects our final quality data submission criteria for MIPS payment

years 2020 and 2021 via Medicare Part B claims, QCDR, qualified registry, EHR, CMS Web Interface, and the CAHPS for MIPS survey. It is important to note that while we finalized at § 414.1325(d) in the CY 2017 Quality Payment Program final rule that individual MIPS eligible clinicians and groups may only use one submission mechanism per performance category, in section II.C.6.a.(1) of this final rule with comment period, we are finalizing to revise § 414.1325(d) for purposes of the 2021 MIPS payment year and future years to allow

individual MIPS eligible clinicians and groups to submit measures and activities, as applicable, via as many submission mechanisms as necessary to meet the requirements of the quality, improvement activities, or advancing care information performance categories. We refer readers to section II.C.6.a.(1) of this final rule with comment period for further discussion of this policy.

**TABLE 5—SUMMARY OF FINAL QUALITY DATA SUBMISSION CRITERIA FOR MIPS PAYMENT YEAR 2020 AND 2021 VIA PART B CLAIMS, QCDR, QUALIFIED REGISTRY, EHR, CMS WEB INTERFACE, AND THE CAHPS FOR MIPS SURVEY**

Performance period	Clinician type	Submission mechanism	Submission criteria	Data completeness
Jan 1–Dec 31 ....	Individual MIPS eligible clinicians.	Part B Claims .....	Report at least six measures including one outcome measure, or if an outcome measure is not available report another high priority measure; if less than six measures apply then report on each measure that is applicable. Individual MIPS eligible clinicians would have to select their measures from either the set of all MIPS measures listed or referenced, or one of the specialty measure sets listed in, the applicable final rule.	60 percent of individual MIPS eligible clinician's Medicare Part B patients for the performance period.
Jan 1–Dec 31 ....	Individual MIPS eligible clinicians, groups.	QCDR, Qualified Registry, & EHR.	Report at least six measures including one outcome measure, or if an outcome measure is not available report another high priority measure; if less than six measures apply then report on each measure that is applicable. Individual MIPS eligible clinicians, or groups would have to select their measures from either the set of all MIPS measures listed or referenced, or one of the specialty measure sets listed in, the applicable final rule.	60 percent of individual MIPS eligible clinician's, or group's patients across all payers for the performance period.
Jan 1–Dec 31 ....	Groups .....	CMS Web Interface .....	Report on all measures included in the CMS Web Interface; AND populate data fields for the first 248 consecutively ranked and assigned Medicare beneficiaries in the order in which they appear in the group's sample for each module/measure. If the pool of eligible assigned beneficiaries is less than 248, then the group would report on 100 percent of assigned beneficiaries.	Sampling requirements for the group's Medicare Part B patients.
Jan 1–Dec 31 ....	Groups .....	CAHPS for MIPS Survey ...	CMS-approved survey vendor would need to be paired with another reporting mechanism to ensure the minimum number of measures is reported. CAHPS for MIPS survey would fulfill the requirement for one patient experience measure towards the MIPS quality data submission criteria. CAHPS for MIPS survey would only count for one measure under the quality performance category.	Sampling requirements for the group's Medicare Part B patients.

We note that the measure reporting requirements applicable to groups are also generally applicable to virtual groups. However, we note that the requirements for calculating measures and activities when reporting via QCDRs, qualified registries, EHRs, and attestation differ in their application to virtual groups. Specifically, these requirements apply cumulatively across all TINs in a virtual group. Thus, virtual groups will aggregate data for each NPI under each TIN within the virtual group by adding together the numerators and denominators and then cumulatively collate to report one measure ratio at the virtual group level. Moreover, if each MIPS eligible clinician within a virtual

group faces a significant hardship or has EHR technology that has been decertified, the virtual group can apply for an exception to have its advancing care information performance category reweighted. If such exception application is approved, the virtual group's advancing care information performance category is reweighted to zero percent and applied to the quality performance category increasing the quality performance weight from 50 percent to 75 percent.

Additionally, the data submission criteria applicable to groups are also generally applicable to virtual groups. However, we note that data completeness and sampling

requirements for the CMS Web Interface and CAHPS for MIPS survey differ in their application to virtual groups. Specifically, data completeness for virtual groups applies cumulatively across all TINs in a virtual group. Thus, we note that there may be a case when a virtual group has one TIN that falls below the 60 percent data completeness threshold, which is an acceptable case as long as the virtual group cumulatively exceeds such threshold. In regard to the CMS Web Interface and CAHPS for MIPS survey, sampling requirements pertain to Medicare Part B patients with respect to all TINs in a virtual group, where the sampling methodology would be conducted for

each TIN within the virtual group and then cumulatively aggregated across the virtual group. A virtual group would need to meet the beneficiary sampling threshold cumulatively as a virtual group.

#### (4) Application of Quality Measures to Non-Patient Facing MIPS Eligible Clinicians

In the CY 2017 Quality Payment Program final rule (81 FR 77127), we finalized at § 414.1335 that non-patient facing MIPS eligible clinicians would be required to meet the applicable submission criteria that apply for all MIPS eligible clinicians for the quality performance category. We did not propose any changes to this policy in the proposed rule.

#### (5) Application of Facility-Based Measures

Section 1848(q)(2)(C)(ii) of the Act provides that the Secretary may use measures used for payment systems other than for physicians, such as measures used for inpatient hospitals, for purposes of the quality and cost performance categories. However, the Secretary may not use measures for hospital outpatient departments, except in the case of items and services furnished by emergency physicians, radiologists, and anesthesiologists. We refer readers to section II.C.7.a.(4) of this final rule with comment period for a full discussion of the finalized policies regarding the application of facility-based measures.

#### (6) Global and Population-Based Measures

In the CY 2017 Quality Payment Program final rule (81 FR 77136), we did not finalize all of our proposals on global and population-based measures as part of the quality score. Specifically, we did not finalize our proposal to use the acute and chronic composite measures of the AHRQ Prevention Quality Indicators (PQIs). We agreed with commenters that additional enhancements, including the addition of risk adjustment, needed to be made to these measures prior to inclusion in MIPS. We did, however, calculate these measures at the TIN level, and provided the measure data through the QRURs released in September 2016, and this data can be used by MIPS eligible clinicians for informational purposes.

We did finalize the all-cause hospital readmissions (ACR) measure from the VM Program as part of the annual list of quality measures for the MIPS quality performance category. We finalized this measure with the following modifications. We did not apply the

ACR measure to solo practices or small groups (groups of 15 or less). We did apply the ACR measure to groups of 16 or more who meet the case volume of 200 cases. A group will be scored on the ACR measure even if it did not submit any quality measures, if it submitted in other performance categories. Otherwise, the group will not be scored on the readmission measure if it did not submit data in any of the performance categories. In our transition year policies, the readmission measure alone would not produce a neutral to positive MIPS payment adjustment since in order to achieve a neutral to positive MIPS payment adjustment, an individual MIPS eligible clinician or group must submit information in one of the three performance categories as discussed in the CY 2017 Quality Payment Program final rule (81 FR 77329). However, for MIPS eligible clinicians who did not meet the minimum case requirements, the ACR measure was not applicable. In the CY 2018 Quality Payment Program proposed rule, we did not propose to remove this measure from the list of quality measures for the MIPS quality performance category. Nor did we propose any changes for the ACR measure in the proposed rule. As discussed in section II.C.4.d. of this final rule with comment period, we are finalizing our proposal to generally apply our finalized group policies to virtual groups.

#### c. Selection of MIPS Quality Measures for Individual MIPS Eligible Clinicians and Groups Under the Annual List of Quality Measures Available for MIPS Assessment

##### (1) Background and Policies for the Call for Measures and Measure Selection Process

Under section 1848(q)(2)(D)(i) of the Act, the Secretary, through notice and comment rulemaking, must establish an annual list of MIPS quality measures from which MIPS eligible clinicians may choose for purposes of assessment for a performance period. The annual list of MIPS quality measures must be published in the **Federal Register** no later than November 1 of the year prior to the first day of a performance period. Updates to the annual list of MIPS quality measures must be published in the **Federal Register** no later than November 1 of the year prior to the first day of each subsequent performance period. Updates may include the addition of new MIPS quality measures, substantive changes to MIPS quality measures, and removal of MIPS quality measures. We refer readers to the CY

2018 Quality Payment Program proposed rule (82 FR 30043 and 30044) for additional information regarding eCQM reporting and the Measure Development Plan that serves as a strategic framework for the future of the clinician quality measure development to support MIPS and APMs. We encourage stakeholders to develop additional quality measures for MIPS that would address the gaps.

Under section 1848(q)(2)(D)(ii) of the Act, the Secretary must solicit a “Call for Quality Measures Under Consideration” each year. Specifically, the Secretary must request that eligible clinician organizations and other relevant stakeholders identify and submit quality measures to be considered for selection in the annual list of MIPS quality measures, as well as updates to the measures. Under section 1848(q)(2)(D)(ii) of the Act, eligible clinician organizations are professional organizations as defined by nationally recognized specialty boards of certification or equivalent certification boards. However, we do not believe there needs to be any special restrictions on the type or make-up of the organizations that submit measures for consideration through the call for measures. Any such restriction would limit the type of quality measures and the scope and utility of the quality measures that may be considered for inclusion under the MIPS.

As we described previously in the CY 2017 Quality Payment Program final rule (81 FR 77137), we will accept quality measures submissions at any time, but only measures submitted during the timeframe provided by us through the pre-rulemaking process of each year will be considered for inclusion in the annual list of MIPS quality measures for the performance period beginning 2 years after the measure is submitted. This process is consistent with the pre-rulemaking process and the annual call for measures, which are further described at (<https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/QualityMeasures/Pre-Rule-Making.html>).

Submission of potential quality measures, regardless of whether they were previously published in a proposed rule or endorsed by an entity with a contract under section 1890(a) of the Act, which is currently the National Quality Forum, is encouraged. The annual Call for Measures process allows eligible clinician organizations and other relevant stakeholder organizations to identify and submit quality measures for consideration. Presumably, stakeholders would not submit

measures for consideration unless they believe that the measure is applicable to clinicians and can be reliably and validly measured at the individual clinician level. The NQF-convened Measure Application Partnership (MAP) provides an additional opportunity for stakeholders to provide input on whether or not they believe the measures are applicable to clinicians as well as feasible, scientifically acceptable, and reliable and valid at the clinician level. Furthermore, we must go through notice and comment rulemaking to establish the annual list of quality measures, which gives stakeholders an additional opportunity to review the measures and provide input on whether or not they believe the measures are applicable to clinicians, as well as feasible, scientifically acceptable, and reliable and valid at the clinician level. Additionally, we are required by statute to submit new measures to an applicable specialty-appropriate, peer-reviewed journal.

As previously noted, we encourage the submission of potential quality measures regardless of whether such measures were previously published in a proposed rule or endorsed by an entity with a contract under section 1890(a) of the Act. However, we proposed to request that stakeholders apply the following considerations when submitting quality measures for possible inclusion in MIPS:

- Measures that are not duplicative of an existing or proposed measure.
- Measures that are beyond the measure concept phase of development and have started testing, at a minimum, with strong encouragement and preference for measures that have completed or are near completion of reliability and validity testing.
- Measures that include a data submission method beyond claims-based data submission.
- Measures that are outcome-based rather than clinical process measures.
- Measures that address patient safety and adverse events.
- Measures that identify appropriate use of diagnosis and therapeutics.
- Measures that address the domain for care coordination.
- Measures that address the domain for patient and caregiver experience.
- Measures that address efficiency, cost, and resource use.
- Measures that address significant variation in performance.

We will apply these considerations when considering quality measures for possible inclusion in MIPS.

In addition, we note that we are likely to reject measures that do not provide substantial evidence of variation in

performance; for example, if a measure developer submits data showing a small variation in performance among a group already composed of high performers, such evidence would not be substantial enough to assure us that sufficient variation in performance exists. We also noted that we are likely to reject measures that are not outcome-based measures, unless: (1) There is substantial documented and peer reviewed evidence that the clinical process measured varies directly with the outcome of interest; and (2) it is not possible to measure the outcome of interest in a reasonable timeframe.

We also noted that retired measures that were in one of CMS's previous quality programs, such as the Physician Quality Reporting System (PQRS) program, will likely be rejected if proposed for inclusion. This includes measures that were retired due to being topped out, as defined below. For example, measures may be retired due to attaining topped out status because of high performance, or measures that are retired due to a change in the evidence supporting their use.

In the CY 2017 Quality Payment Program final rule (81 FR 77153), we established that we will categorize measures into the six NQS domains (patient safety, person- and caregiver-centered experience and outcomes, communication and care coordination, effective clinical care, community/population health, and efficiency and cost reduction). We intend to submit future MIPS quality measures to the NQF-convened Measure Application Partnership's (MAP), as appropriate, and we intend to consider the MAP's recommendations as part of the comprehensive assessment of each measure considered for inclusion under MIPS.

In the CY 2017 Quality Payment Program final rule (81 FR 77155), we established that we use the Call for Quality Measures process as a forum to gather the information necessary to draft the journal articles for submission from measure developers, measure owners and measure stewards. The submission of this information does not preclude us from conducting our own research using Medicare claims data, Medicare survey results, and other data sources that we possess. We submit new measures for publication in applicable specialty-appropriate, peer-reviewed journals before including such measures in the final annual list of quality measures.

In the CY 2017 Quality Payment Program final rule (81 FR 77158), we established at § 414.1330(a)(2) that for purposes of assessing performance of MIPS eligible clinicians in the quality

performance category, we use quality measures developed by QCDRs. In the circumstances where a QCDR wants to use a QCDR measure for inclusion in the MIPS program for reporting, those measures go through a CMS approval process during the QCDR self-nomination period. We also established that we post the quality measures for use by QCDRs by no later than January 1 for performance periods occurring in 2018 and future years.

Previously finalized MIPS quality measures can be found in the CY 2017 Quality Payment Program final rule (81 FR 77558 through 77675). Updates may include the addition of proposed new MIPS quality measures, including measures selected 2 years ago during the Call for Measures process. The new MIPS quality measures proposed for inclusion in MIPS for the 2018 performance period and future years were found in Table A of the CY 2018 Quality Payment Program proposed rule (82 FR 30261 through 30270). The proposed new and modified MIPS specialty sets for the 2018 performance period and future years were listed in Table B of the CY 2018 Quality Payment Program proposed rule (82 FR 30271 through 30454), and included existing measures that were proposed with modifications, new measures, and measures finalized in the CY 2017 Quality Payment Program final rule. We noted that the modifications made to the specialty sets may include the removal of certain quality measures that were previously finalized. The specialty measure sets should be used as a guide for eligible clinicians to choose measures applicable to their specialty. To clarify, some of the MIPS specialty sets have further defined subspecialty sets, each of which is effectively a separate specialty set. In instances where an individual MIPS eligible clinician or group reports on a specialty or subspecialty set, if the set has less than six measures, that is all the clinician is required to report. MIPS eligible clinicians are not required to report on the specialty measure sets, but they are suggested measures for specific specialties. Throughout measure utilization, measure maintenance should be a continuous process done by the measure owners, to include environmental scans of scientific literature about the measure. New information gathered during this ongoing review may trigger an ad hoc review. Please note that these specialty specific measure sets are not all inclusive of every specialty or subspecialty. On January 25, 2017, we announced that we would be accepting

recommendations for potential new specialty measure sets for year 2 of MIPS under the Quality Payment Program. These recommendations were based on the MIPS quality measures finalized in the CY 2017 Quality Payment Program final rule, and include recommendations to add or remove the current MIPS quality measures from the specialty measure sets. The current specialty measure sets can be found on the Quality Payment Program Web site at <https://qpp.cms.gov/measures/quality>. All specialty measure sets submitted for consideration were assessed to ensure that they met the needs of the Quality Payment Program.

As a result, we proposed (82 FR 30045) to add new quality measures to MIPS (Table A in the proposed rule (82 FR 30261 through 30270)), revise the specialty measure sets in MIPS (Table B in the proposed rule (82 FR 30271 through 30454)), remove specific MIPS quality measures only from specialty sets (Table C.1 in the proposed rule (82 FR 30455 through 30462)), and proposed to remove specific MIPS quality measures from the MIPS program for the 2018 performance period (Table C.2 in the proposed rule (82 FR 30463 through 30465)). In addition, we proposed to also remove cross cutting measures from most of the specialty sets. Specialty groups and societies reported that cross cutting measures may or may not be relevant to their practices, contingent on the eligible clinicians or groups. We chose to retain the cross cutting measures in Family Practice, Internal Medicine, and Pediatrics specialty sets because they are frequently used in these practices. The proposed 2017 cross cutting measures (81 FR 28447 through 28449) were compiled and placed in a separate table for eligible clinicians to elect to use or not, for reporting. To clarify, the cross-cutting measures are intended to provide clinicians with a list of measures that are broadly applicable to all clinicians regardless of the clinician's specialty. Even though it is not required to report on cross-cutting measures, it is provided as a reference to clinicians who are looking for additional measures to report outside their specialty. We continue to consider cross-cutting measures to be an important part of our quality measure programs, and seek comment on ways to incorporate cross-cutting measures into MIPS in the future. The Table of Cross-Cutting Measures can be found in Table D of the Appendix in the CY 2018 Quality Payment Program proposed rule (82 FR 30466 through 30467).

For MIPS quality measures that are undergoing substantive changes, we

proposed to identify measures including, but not limited to measures that have had measure specification, measure title, and domain changes. MIPS quality measures with proposed substantive changes can be found at Table E of the Appendix in the CY 2018 Quality Payment Program proposed rule (82 FR 30468 through 30478).

The measures that would be used for the APM scoring standard and our authority for waiving certain measure requirements are described in section II.C.6.g.(3)(b)(ii) of this final rule with comment period, and the measures that would be used to calculate a quality score for the APM scoring standard are proposed in Tables 14, 15, and 16 of the CY 2018 Quality Payment Program proposed rule (82 FR 30091 through 30095).

We also sought comment on whether there are any MIPS quality measures that commenters believe should be classified in a different NQS domain than what is being proposed, or that should be classified as a different measure type (for example, process vs. outcome) than what we proposed (82 FR 30045). We did not receive any public comments in response to this solicitation.

The following is a summary of the public comments received on the "Background and Policies for the Call for Measures and Measure Selection Process proposals and our responses:

*Comment:* A few commenters supported the proposal to remove cross-cutting measures from most specialty sets. One commenter agreed that cross-cutting measures may or may not be relevant to certain practices.

*Response:* We appreciate the commenters support.

*Comment:* One commenter recommended that CMS retain cross-cutting measures in specialty sets with fewer than six measures because the commenter believed it would allow parity in quality measure reporting across all clinicians and provide incentives for all specialties to develop quality measures.

*Response:* We did not retain the cross-cutting measures in all the specialty sets, including those sets with less than six measures, because we believe that cross-cutting measures are not necessarily reflective of all specialty groups' scope of their practice. One goal of the MIPS program is to ensure that meaningful measurement occurs, and CMS chose to retain the cross cutting measures in Family Practice, Internal Medicine, and Pediatrics specialty sets because they are frequently used in these practices. The cross-cutting measures are intended to provide

clinicians with a list of measures that are broadly applicable to all clinicians regardless of the clinician's specialty. Even though MIPS eligible clinicians are not required to report on cross-cutting measures, they are provided as a reference to clinicians who are looking for additional measures to report outside their specialty.

*Final Action:* After consideration of the public comments received, we refer readers to the appendix of this final rule with comment period for the finalized list of new quality measures available for reporting in MIPS for the 2018 performance period and future years (Table A); the finalized specialty measure sets available for reporting in MIPS for the 2018 performance period and future years (Table B); the MIPS quality measures removed only from specialty sets for the 2018 performance period and future years (Table C.1); the MIPS quality measures removed from the MIPS program for the 2018 performance period and future years (Table C.2); the cross-cutting measures available for the 2018 MIPS performance period and future years (Table D); and the MIPS quality measures finalized with substantive changes for the 2018 performance period and future years (Table E).

## (2) Topped Out Measures

As defined in the CY 2017 Quality Payment Program final rule at (81 FR 77136), a measure may be considered topped out if measure performance is so high and unvarying that meaningful distinctions and improvement in performance can no longer be made. Topped out measures could have a disproportionate impact on the scores for certain MIPS eligible clinicians, and provide little room for improvement for the majority of MIPS eligible clinicians. We refer readers to section II.C.7.a.(2)(c) of this final rule with comment period for additional information regarding the scoring of topped out measures.

Although we proposed a 3-year timeline to identify and propose to remove (through future rulemaking) topped out measures (82 FR 30046). We would like to clarify that the proposed timeline is more accurately described as a 4-year timeline. After a measure has been identified as topped out for 3 consecutive years, we may propose to remove the measure through notice-and-comment rulemaking for the 4th year. Therefore, in the 4th year, if finalized through rulemaking, the measure would be removed and would no longer be available for reporting during the performance period. This proposal would provide a path toward removing topped out measures over time, and will

apply to the MIPS quality measures. QCDR measures that consistently are identified as topped out according to the same timeline as proposed below, would not be approved for use in year 4 during the QCDR self-nomination review process. These identified QCDR measures would not be removed through the notice-and-comment and rulemaking process described below.

We proposed to phase in this policy starting with a select set of six highly topped out measures identified in section II.C.7.a.(2)(c) of this final rule with comment period. We also proposed to phase in special scoring for measures identified as topped out in the published benchmarks for 2 consecutive performance periods, starting with the select set of highly topped out measures for the 2018 MIPS performance period. An example illustrating the proposed timeline for the removal and special scoring of topped out measures, as it would be applied to the select set of highly topped out measures identified in section II.C.7.a.(2)(c) of this final rule with comment period, is as follows:

- *Year 1:* Measures are identified as topped out in the benchmarks published for the 2017 MIPS performance Period. The 2017 benchmarks are posted on the Quality Payment Program Web site: <https://qpp.cms.gov/resources/education>.

- *Year 2:* Measures are identified as topped out in the benchmarks published for the 2018 MIPS performance period. We refer readers to section II.C.7.a.(2)(c) of this final rule with comment period for additional information regarding the scoring of topped out measures.

- *Year 3:* Measures are identified as topped out in the benchmarks published for the 2019 MIPS performance period. The measures identified as topped out in the benchmarks published for the 2019 MIPS performance period and the previous two consecutive performance periods would continue to have special scoring applied for the 2019 MIPS performance period and would be considered, through notice-and-comment rulemaking, for removal for the 2020 MIPS performance period.

- *Year 4:* Topped out measures that are finalized for removal are no longer available for reporting. For example, the measures in the set of highly topped out measures identified as topped out for the 2017, 2018 and 2019 MIPS performance periods, and if subsequently finalized for removal will not be available on the list of measures for the 2020 MIPS performance period and future years.

For all other measures, the timeline would apply starting with the benchmarks for the 2018 MIPS

performance period. Thus, the first year any other topped out measure could be proposed for removal would be in rulemaking for the 2021 MIPS performance period, based on the benchmarks being topped out in the 2018, 2019, and 2020 MIPS performance periods. If the measure benchmark is not topped out during one of the 3 MIPS performance periods, then the lifecycle would stop and start again at year 1 the next time the measure benchmark is topped out.

We sought comment on the proposed timeline; specifically, regarding the number of years before a topped out measure is identified and considered for removal, and under what circumstances we should remove topped out measures once they reach that point (82 FR 30046). We also noted that if for some reason a measure benchmark is topped out for only one submission mechanism benchmark, then we would remove that measure from the submission mechanism, but not remove the measure from other submission mechanisms available for submitting that measure. The comments we received and our responses are discussed further below.

We also sought comment on whether topped out Summary Survey Measures (SSMs), if topped out, should be considered for removal from the Consumer Assessment of Healthcare Providers and Systems (CAHPS) for MIPS Clinician or Group Survey measure due to high, unvarying performance within the SSM, or whether there is another alternative policy that could be applied for topped out SSMs within the CAHPS for MIPS Clinician or Group Survey measure (82 FR 30046). We received a comment on this item and appreciate the input received. As this was a request for comment only, we will take the feedback provided into consideration for future rulemaking.

In the CY 2017 Quality Payment Program final rule, we stated that we do not believe it would be appropriate to remove topped out measures from the CMS Web Interface for the Quality Payment Program because the CMS Web Interface measures are used in MIPS and in APMs, such as the Shared Savings Program. Removing topped out measures from the CMS Web Interface would not be appropriate because we have aligned policies where possible, with the Shared Savings Program, such as using the Shared Savings Program benchmarks for the CMS Web Interface measures (81 FR 77285). In the CY 2017 Quality Payment Program final rule, we also finalized that MIPS eligible clinicians reporting via the CMS Web Interface must report all measures

included in the CMS Web Interface (81 FR 77116). Thus, if a CMS Web Interface measure is topped out, the CMS Web Interface reporter cannot select other measures. We refer readers to section II.C.7.a.(2) of this final rule with comment period for information on scoring policies with regards to topped out measures from the CMS Web Interface for the Quality Payment Program. We did not propose to include CMS Web Interface measures in our proposal on removing topped out measures.

The following is a summary of the public comments received on the “Topped Out Measures” proposals and our responses:

*Comment:* Many commenters supported the proposed timeline for identification and removal of topped out measures because the process relies on multiple years of data and the lifecycle permits enough time to avoid disadvantaging certain clinicians who may report these measures. The commenters supported the lifecycle over multiple years to find a trend in high performance, providing time for consideration of replacement measures to sustain the focus on clinical areas where improvement opportunities exist. A few commenters supported the timeline and encouraged CMS to develop a more comprehensive approach to identifying topped out measures, to ensure that voluntary reporting on a menu of quality measures does not allow eligible clinicians to ‘cherry pick’ measures. One commenter supported not applying the topped out measure policies to measures in the CMS Web Interface to align with measures used in APMs such as the Shared Savings Program for the CMS Web Interface submission mechanism for the Quality Payment Program.

*Response:* We agree that by identifying and removing topped out measures, we may greatly reduce eligible clinicians’ ability to “cherry pick” measures. We believe that the benchmarks will help us identify those measures that meet our definition of topped out measures.

*Comment:* Many commenters did not support removal of the measures, because they noted: Benchmarks published for the 2017 performance period were not derived from MIPS reported data; criteria to identify topped out measures did not include consideration of important clinical considerations including patient safety and the ability to accurately measure and motivate high quality care; and removal of measures may disproportionately impact one submission mechanism or clinicians

based on medical specialty, practice size or regional variation. Several commenters indicated that identification of topped out measures is challenging because measures are voluntarily selected with limited reporting on each measure, and thus benchmarks may appear to be topped out when in fact there is still the room for improvement. A few commenters cautioned against removing measures because this may lead to “back sliding” due to a shift in resources from support of current practices yielding high performance to new practices to support a new measure. Several commenters indicated that the criteria for selection of topped out measures should be expanded to consider the clinical importance of measures, and a few commenters recommended the identification of measures that are essential for high quality care such as patient safety, public health or patient experience that should never be removed from the list of measures. Many commenters voiced concern over the potential number of measures that may be topped out which they believed would leave eligible clinicians, particularly specialists with few relevant measures to submit. Many commenters recommended only removing topped out measures if there are adequate replacement measures added to the measures list. A few commenters indicated that topped out measures could be incorporated into composite measures reflecting multiple, important aspects of care. A few commenters recommended that prior to the removal of a measure, CMS evaluate the topped out measure across submission mechanisms to determine if the measure is harmonized across submission mechanisms.

*Response:* The benchmarks for the 2017 performance period are derived from the measure’s historical performance data which helps us trend the measure’s anticipated performance in the future. Topped out measures are considered topped out if the measure performance is so high and unvarying that meaningful differences and improvement in performance can no longer be seen. Retaining topped out measures could have a disproportionate impact on the scores for certain MIPS eligible clinicians. We note that topped out measures must be consecutively identified for 3 years (in MIPS) as topped out before it is proposed for removal in the 4th year through rulemaking and comment period. As a part of the topped out measure timeline, we will take into consideration other factors such as clinical relevance and

the availability of other relevant specialty measures prior to deciding whether or not to remove the measure from the program. Through the Call for Measures process and annual approval of QCDR measures, we anticipate that MIPS eligible clinicians and groups will have measures that provide meaningful measurement and are reflective of their current scope of practice. We believe that through the annual Call for Measures and QCDR self-nomination processes additional quality measures will be developed and implemented in the program, that will provide eligible clinicians and groups with a continuously growing selection of measures to choose from that will allow for meaningful measurement. We recognize that there are certain types of high value measures such as patient safety and patient experience, but we disagree that such measures should be designated as never to be removed from the list of available quality measures. We thank the commenters for their suggestion to remove topped out measures if there are adequate replacement measures added to the measures list, and we will take this into consideration, while encouraging measure stewards to submit measures to us through the Call for Measures process. We would like to note that this policy creates a standard timeline for us to consider which measures are topped out and may need to be removed. Each removal would need to be proposed and finalized through rulemaking, and we would have the discretion to retain any particular measure that, after consideration of public comments and other factors, may be determined to be inappropriate for removal.

*Comment:* Several commenters did not support the removal of topped out measures from QCDR submissions because commenters believed this would reduce the ability of specialists to develop and strengthen new measures. A few commenters believed that not including QCDR measures in the topped out measure policy would ensure that eligible clinicians, including anesthesia clinicians, have measures of merit during the transition to full implementation of MIPS. One commenter urged CMS not to remove QCDR topped out measures but rather allow topped out measures as controls for new and developing measures by which true statistical validity and reliability can be assessed. One commenter voiced concern over potential removal of QCDR topped out measures without going through the notice-and-comment rulemaking process. One commenter indicated that

EHR measures used by QCDRs are less likely to be topped out because QCDRs led by specialty societies have significant expertise in quality measure development, measurement, and implementation, and are uniquely poised to develop and test meaningful measures. The commenter indicated that specialty registries can continue to monitor vital topped out measures, even if the measures are removed from MIPS reporting. A few commenters noted that many topped out process measures are important to monitor and to provide feedback to clinicians because less than very high performance is concerning and should be flagged.

*Response:* We disagree that the removal of topped out QCDR measures would reduce the ability of specialists to develop and strengthen new measures. Rather, we believe that QCDRs can develop QCDR measures that would address areas in which there is a known performance gap and in which there is need for improvement. We also disagree that the removal of QCDR measures should occur through the notice-and-comment rulemaking process, as QCDR measures are not approved for use in the program through rulemaking. We refer readers to section 1848(q)(2)(D)(vi) of the Act, which expressly provides that QCDR measures are not subject to the notice-and-comment rulemaking requirements described in section 1848(q)(2)(D)(i) of the Act that apply to other MIPS measures, and that the Secretary is only required to publish the list of QCDR measures on the CMS Web site. We appreciate the QCDRs expertise in given areas of specialty, but as previously indicated, we will utilize benchmarks for all submission mechanisms to appropriately identify measures as topped out, and will consider performance in all submission mechanisms before indicating that a given measure is topped out. QCDR measures should also be removed from MIPS through a similar timeline when QCDR measures meet the definition of a topped out measure. We understand the importance of monitoring high performance among clinicians, but we also believe that topped out QCDR measures may inadvertently penalize clinicians who are considered high performers when they are compared to other high performer clinicians, as described in the CY 2017 Quality Payment Program final rule (81 FR 77286). For example, a clinician who performs at the 90th percentile, when compared to another high performing clinician who scored in the 98th percentile, could potentially receive a lower score based on the cohort in

which they are compared. QCDR measures, their performance data, and clinical relevance are reviewed extensively as QCDRs self-nominate and submit their QCDR measures for consideration on an annual basis. We agree that specialty registries can continue to monitor their data submission of topped out measures for purposes of monitoring performance and improvement, even after the measures are removed from MIPS. Additional data provided by QCDRs or discussions about their QCDR measures is taken into consideration during the review process.

*Comment:* A few commenters encouraged CMS to have a transparent process using multiple communication processes to indicate which measures are topped out and which measures will have the scoring cap to ensure MIPS eligible clinicians have the necessary time to alter their reporting under the quality performance category before topped-out measures are finalized for removal. Some commenters recommended that CMS provide detailed information on the measures considered to be topped-out, including the number and type of clinicians or groups reporting the measure each year, the number and type of clinicians or groups consistently reporting the measure, the range of performance scores and any statistical testing information. Other commenters suggested that CMS announce the status of a topped out measure in a draft proposed rule with at least a 45-day comment period. One commenter urged CMS to announce topped out measures at a consistent time each year.

*Response:* We intend to indicate which measures are topped out through the benchmarks that will be published on the Quality Payment Program Web site annually, as feasible prior to the beginning of each performance period. We intend to consider, and as appropriate, propose removal of topped out measures in future notice-and-comment rulemaking in accordance with the proposed timeline. We thank commenters for their suggestions as to what information should be available on measures considered topped out and will provide additional data elements, as technically feasible and appropriate.

*Comment:* A few commenters did not support the proposed lifecycle and made suggestions regarding the delay of the initiation of the lifecycle or extension to the timeline, to allow more time to adjust and continue to demonstrate improvement over time within MIPS. A few commenters recommended lengthening the lifecycle by 1 year, allowing the measure to be

scored for 2 years after the measure is identified as topped out. The commenters indicated this will support MIPS eligible clinicians in incorporating appropriate measures into EHR systems and updating clinical practice. Several commenters recommended a delay in the start of the lifecycle to allow benchmarks to be developed from MIPS data and a more representative sample, while giving time for MIPS eligible clinicians to experience the program. One commenter requested a delay in the initiation of the lifecycle for measures without a benchmark to allow additional submissions in future years which may lead to the development of benchmarks.

*Response:* We note that the topped out measure lifecycle has built in a 4-year timeline, which would be triggered when topped out measures are identified through the benchmarks as topped out. We believe the 4-year timeline would provide MIPS eligible clinicians, groups, and third-party intermediaries with a sufficient amount of time to adjust to the removal of identified topped out measures. Topped out measures are identified through the benchmarks, and cannot be identified as topped out until the benchmark is established. We would like to note that this policy creates a standard timeline for us to consider which measures are topped out and may need to be removed. Each removal would need to be proposed and finalized through rulemaking, and we would have the discretion to retain any particular measure that, after consideration of public comments and other factors may be determined to be inappropriate for removal. We believe that the 4-year timeline will provide MIPS eligible clinicians with sufficient time to incorporate measures into their EHR systems and to update their clinical practice.

*Comment:* A few commenters did not support the proposed topped out measure removal timeline, noting that the proposal would delay the retirement of topped out measures and selection and use of different quality measures. One commenter believed that allowing performance to be supported by the selection of topped out measures will not provide sufficient incentive for eligible clinicians to select the more challenging and difficult measures available.

*Response:* We believe that the topped out measure timeline reflects a sufficient amount of time in which we are able to clearly distinguish topped out measures through their performance in the benchmarks. The timing will allow us to take into consideration any

variances in the benchmarks, and provide sufficient timing to request public comment on the proposed removal of topped out measures. There are a variety of quality and QCDR measures to choose from in the MIPS program, and we encourage MIPS individual eligible clinicians and groups to select measures that provide meaningful measurement for them.

*Final Action:* After consideration of the public comments received and since topped out measures may provide little room for improvement for the majority of MIPS eligible clinicians, and a disproportionate impact on the scores for certain MIPS eligible clinicians, we are finalizing our proposed 4-year timeline to identify topped out measures, after which we may propose to remove the measures through future rule making topped out measures. After a measure has been identified as topped out for 3 consecutive years, we may propose to remove the measure through notice and comment rulemaking for the 4th year. Therefore, in the 4th year, if finalized through rulemaking, the measure would be removed and would no longer be available for reporting during the performance period. This policy provides a path toward removing topped out MIPS quality measures over time. QCDR measures that consistently are identified as topped out according to the same timeline would not be approved for use in year 4 during the QCDR self-nomination review process. Removal of these QCDR measures would not go through the comment and rulemaking process as MIPS quality measures would.

### (3) Non-Outcome Measures

In the CY 2017 Quality Payment Program final rule, we sought comment on whether we should remove non-outcomes measures for which performance cannot reliably be scored against a benchmark (for example, measures that do not have 20 reporters with 20 cases that meet the data completeness standard) for 3 years in a row (81 FR 77288).

Based on the need for CMS to further assess this issue, we did not propose to remove non-outcome measures. However, we sought comment on what the best timeline for removing both non-outcome and outcome measures that cannot be reliably scored against a benchmark for 3 years (82 FR 30047). We received a number of comments on this item and appreciate the input received. As this was a request for comment only, we will take the feedback provided into consideration for future rulemaking.

## (4) Quality Measures Determined To Be Outcome Measures

Under the MIPS, individual MIPS eligible clinicians are generally required to submit at least one outcome measure, or, if no outcome measure is available, one high priority measure. As such, our determinations as to whether a measure is an outcome measure is of importance to stakeholders. We did not make any proposals on how quality measures are determined to be outcome measures, and refer readers to the CY 2018 Quality Payment Program proposed rule (82 FR 30047) for the criteria utilized in determining if a measure is considered an outcome measure. We sought comment on the criteria and process outlined in the proposed rule on how we designate outcome measures (82 FR 30047). We received a number of comments on this item and appreciate the input received. As this was a request for comment only, we will take the feedback provided into consideration for future rulemaking.

## d. Cost Performance Category

## (1) Background

## (a) General Overview

Measuring cost is an integral part of measuring value as part of MIPS. In implementing the cost performance category for the transition year (2017 MIPS performance period/2019 MIPS payment year), we started with measures that had been used in previous programs (mainly the VM) but noted our intent to move towards episode-based measurement as soon as possible, consistent with the statute and the feedback from the clinician community. Specifically, we adopted 2 measures that had been used in the VM: The total per capita costs for all attributed beneficiaries measure (referred to as the total per capita cost measure); and the MSPB measure (81 FR 77166 through 77168). We also adopted 10 episode-based measures that had previously been included in the Supplemental Quality and Resource Use Reports (sQRURs) (81 FR 77171 through 77174).

At § 414.1325(e), we finalized that all measures used under the cost performance category would be derived from Medicare administrative claims data and, thus, participation would not require additional data submission. We finalized a reliability threshold of 0.4 for measures in the cost performance category (81 FR 77170). We also finalized a case minimum of 35 for the MSPB measure (81 FR 77171) and 20 for the total per capita cost measure (81 FR 77170) and each of the 10 episode-based measures (81 FR 77175) in the cost

performance category to ensure the reliability threshold is met.

For the transition year, we finalized a policy to weight the cost performance category at zero percent of the final score in order to give clinicians more opportunity to understand the attribution and scoring methodologies and gain more familiarity with the measures through performance feedback so that clinicians may take action to improve their performance (81 FR 77165 through 77166). In the CY 2017 Quality Payment Program final rule, we finalized a cost performance category weight of 10 percent for the 2020 MIPS payment year (81 FR 77165). For the 2021 MIPS payment year and beyond, the cost performance category will have a weight of 30 percent of the final score as required by section 1848(q)(5)(E)(i)(II)(aa) of the Act.

For descriptions of the statutory basis and our existing policies for the cost performance category, we refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77162 through 77177).

As finalized at § 414.1370(g)(2), the cost performance category is weighted at zero percent for MIPS eligible clinicians scored under the MIPS APM scoring standard because many MIPS APMs incorporate cost measurement in other ways. For more on the APM scoring standard, see I.I.C.6.g. of this final rule with comment period.

## (2) Weighting in the Final Score

We proposed at § 414.1350(b)(2) to change the weight of the cost performance category from 10 percent to zero percent for the 2020 MIPS payment year. We noted that we continue to have concerns about the level of familiarity with and understanding of cost measures among clinicians. We noted that we could use the additional year where the cost performance category would not affect the final score to increase understanding of the measures so that clinicians would be more comfortable with their role in reducing costs for their patients. In addition, we could use this additional year to develop and refine episode-based cost measures, which are cost measures that are focused on clinical conditions or procedures. We intend to propose in future rulemaking policies to adopt episode-based measures currently in development.

Although we believed that reducing this weight could be appropriate given the level of understanding of the measures and the scoring standards, we noted that section 1848(q)(5)(E)(i)(II)(aa) of the Act requires the cost performance category to be assigned a weight of 30

percent of the MIPS final score beginning in the 2021 MIPS payment year. We recognized that assigning a zero percent weight to the cost performance category for the 2020 MIPS payment year may not provide a smooth enough transition for integrating cost measures into MIPS and may not provide enough encouragement to clinicians to review their performance on cost measures. Therefore, we sought comment on keeping the weight of the cost performance category at 10 percent for the 2020 MIPS payment year (82 FR 30048).

We invited public comments on this proposal of a zero percent weighting for the cost performance category and the alternative option of a 10 percent weighting for the cost performance category for the 2020 MIPS payment year (82 FR 30048).

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Many commenters supported our alternative option to keep the weight of the cost performance category at 10 percent for the 2020 MIPS payment year, as we previously finalized in the CY 2017 Quality Payment Program final rule. The commenters expressed concern that the statutorily mandated 30 percent weight of the cost performance category in the 2021 MIPS payment year would be too steep an increase from zero percent, and MIPS eligible clinicians would be unprepared. Some commenters indicated that they believed that cost measures are intrinsic measures of value and that clinicians can demonstrate value through lower costs. One commenter recommended that the cost performance category be weighted at 15 percent for the 2020 MIPS payment year.

*Response:* We share the commenters' concerns about the increase in the weight of the cost performance category from zero percent in the 2020 MIPS payment year to 30 percent in the 2021 MIPS payment year, which is statutorily required. We agree with the commenters that cost measures are an important component of value, and that weighting the cost category at 10 percent will help to provide a smoother transition for clinicians by giving them more time to experience cost measurement with the cost category having a lower relative weight of 10 percent. Furthermore, moving forward with a lower relative weight in anticipation of the requirement to go to 30 percent in the 2021 MIPS payment year will allow more time for the development of episode-based cost measures, which are being developed with substantial

clinician input. We are therefore adopting our alternative option to maintain the 10 percent weight for the cost performance category for the 2020 MIPS payment year, as we finalized in the CY 2017 Quality Payment Program final rule (81 FR 77165).

*Comment:* Many commenters supported our proposal to weight the cost performance category at zero percent of the final score for the 2020 MIPS payment year. The commenters stated that MIPS eligible clinicians are still gaining familiarity with the scoring methodology and the cost measures and would appreciate additional time to review feedback reports. Some commenters supported the proposal because episode-based measures were not yet included and therefore many clinicians would not be measured in the cost performance category. Some commenters suggested that CMS use the additional time to continue to improve risk adjustment, attribution, and other components of cost measures.

*Response:* We will continue to work to make clinicians more familiar with the measures and continue to refine the measures. However, we are concerned that not assigning any weight to the cost performance category when the weight is required to be at 30 percent in the third MIPS payment year will result in too dramatic a transition in a single year. We also agree with commenters that new episode-based cost measures will be an important part of the cost category, and intend to make future proposals about implementing episode-based measures as soon as they are developed.

*Comment:* Several commenters stated that although the statute requires the cost performance category to be weighted at 30 percent of the final score in the third MIPS payment year, we should use flexibility in the statute to weight the cost performance category at zero percent or a percentage lower than 30 percent for the third MIPS payment year and for additional years in the future either by determining that there are no applicable measures in the cost performance category or using broader flexibility to reweight the performance categories. These commenters supported the zero percent weight for the 2020 MIPS payment year but believed that the cost performance category should not count towards the final score until clinicians have gained more experience with this category, episode-based measures are more developed, and risk adjustment models are more robust.

*Response:* While we understand the concerns of commenters, section 1848(q)(5)(E) of the Act requires the cost performance category to be weighted at

30 percent of the final score beginning in the third MIPS payment year. We do not believe the statute affords us flexibility to adjust this prescribed weight, unless we determine there are not sufficient cost measures applicable and available to MIPS eligible clinicians under section 1848(q)(5)(F) of the Act. We believe that a clinician's influence on the costs borne by both patients and the Medicare program is an important component of measuring value as envisioned by the creation of the MIPS program. In addition, because of our concerns about the dramatic transition between the cost performance category being weighed at zero percent for a year and 30 percent for the next year, we are adopting our alternative to maintain the 10 percent weight for the cost performance category for the 2020 MIPS payment year. We continue to work with clinicians to better understand the cost measures as they prepare for the category to be weighted at 30 percent of the final score. We are seeking extensive input from clinicians on the development of episode-based measures and technical updates to existing measures in addition to providing feedback reports so that clinicians can better understand the measures.

*Comment:* Several commenters recommended that the cost performance category be weighted at 10 percent in the 2020 MIPS payment year only for those clinicians who volunteer to be measured on cost. Other commenters expressed their support for a zero percent weighting but requested that clinicians be given information on how they would have scored under cost measurement.

*Response:* We do not have the statutory authority to score cost measures on a voluntary basis under MIPS. Because the MIPS cost measures are calculated based on Medicare claims data and do not require additional reporting by clinicians, we are able to provide outreach and model scoring scenarios without clinicians volunteering to complete any actions. We are planning to provide feedback on both individual measures as well as the cost performance category to increase understanding and familiarity going into future years.

*Comment:* Many commenters requested that CMS provide extensive feedback on cost measures and the cost performance category score to ensure that clinicians are best positioned for the cost performance category to be weighted at 30 percent of the final score for the 2021 MIPS payment year.

*Response:* We discuss in section II.C.9.a of this final rule with comment

feedback, including on cost measures. As noted there, we will also be providing information on newly developed episode-based measures which may become a part of the MIPS cost performance category in future years.

*Comment:* A few commenters recommended that the cost performance category be weighted at zero percent for certain specialties or types of clinicians for an indefinite period of time because not enough measures are available for them. One commenter suggested that if at least one episode-based measure cannot be calculated for a clinician or group that they not be scored in the cost performance category.

*Response:* We recognize that not every clinician will have cost measures attributed to them in the initial years of MIPS and therefore may not receive a cost performance category score. However, we do not believe that it is appropriate to exclude certain clinicians from cost measurement on the basis of their specialty if they are attributed a sufficient number of cases to meet the case minimum for the cost measure. We did not propose any episode-based measures for the 2018 MIPS performance period. We address MIPS cost performance category scoring policies in section II.C.7.a.(3) of this final rule with comment period, but we did not propose any changes related to the minimum number of measures required to receive a cost performance category score. A MIPS eligible clinician must be attributed a sufficient number of cases for at least one cost measure, and that cost measure must have a benchmark, in order for the clinician to receive a cost performance category score (81 FR 77322 through 77323).

*Comment:* One commenter recommended that small practices (defined as 15 or fewer clinicians) not have the cost performance category contribute to the weight of their final score, at least until more valid and reliable measures are developed.

*Response:* While we have a strong commitment to ensuring that small practices are able to participate in MIPS, we do not have the statutory authority to exempt small practices from the cost performance category. We have offered additional flexibility for small practices in a number of areas, including a small practice bonus that will be added to the final score for the 2020 MIPS payment year (see section II.C.7.b.(1)(c) of this final rule with comment period). Many of these policies are intended to recognize the different level of administrative or other support a small practice might have in comparison to a larger entity. Because the MIPS cost

measures do not require reporting of data by clinicians other than the usual submission of claims, there is no additional administrative burden associated with being a small practice in the cost performance category.

Furthermore, it is possible that some small practices will not have any cost measures applicable and available to them because they may not meet the case minimums for any of the cost measures. Other small practices may have a considerable volume of patients and wish to be rewarded for their commitment to reducing the cost of care.

*Comment:* A few commenters recommended that the cost performance category be weighted at a percentage higher than zero percent but lower than 10 percent so that the cost performance category would have a limited contribution to the final score.

*Response:* We are adopting our alternative of maintaining the cost performance category weight at 10 percent of the final score for the 2020 MIPS payment year. We are doing so because we are concerned about the dramatic transition between a zero percent weight and the 30 percent weight mandated for the 2021 MIPS payment year. We did receive many comments in favor of the 10 percent weight and do not believe that a weight below 10 percent will provide an easier transition to the 30 percent weight for the 2021 MIPS payment year.

*Comment:* Some commenters expressed general concern about our approach to measuring the cost performance category. Some suggested that cost measures should not be included if there are not quality measures for the same group of patients. A few commenters suggested that cost measures should only consider services that were personally provided or ordered by a clinician.

*Response:* We have designed the Quality Payment Program to be flexible and allow clinicians to select quality measures that reflect their practice. We expect that most clinicians and groups will select measures based on the types of patients they typically see. Because the measures for the cost performance category are calculated based on Medicare claims submitted, we believe they will also reflect a clinician's practice. While we are finalizing cost measures that do not directly correspond to quality measures, we note that each performance category is weighted and combined to determine the final score. In that sense, we believe that we are measuring value by rewarding performance in quality while keeping down costs. We also believe

that clinicians can influence the cost of services that they do not personally perform by improving care management with other clinicians and avoiding unnecessary services.

*Final Action:* After consideration of the public comments, we are not finalizing our proposal to weight the cost performance category at zero percent of the final score for the 2020 MIPS payment year. We are instead adopting our alternative option to maintain the weight of the cost performance category at 10 percent of the final score for the 2020 MIPS payment year as we finalized in the CY 2017 Quality Payment Program final rule (81 FR 77165).

### (3) Cost Criteria

#### (a) Measures Proposed for the MIPS Cost Performance Category

##### (i) Background

Under § 414.1350(a), we specify cost measures for a performance period to assess the performance of MIPS eligible clinicians on the cost performance category. For the 2017 MIPS performance period, we will utilize 12 cost measures that are derived from Medicare administrative claims data. Two of these measures, the MSPB measure and total per capita cost measure, have been used in the VM (81 FR 77166 through 77168), and the remaining 10 are episode-based measures that were included in the sQRURs in 2014 and 2015 (81 FR 77171 through 77174).

Section 1848(r) of the Act specifies a series of steps and activities for the Secretary to undertake to involve the physician, practitioner, and other stakeholder communities in enhancing the infrastructure for cost measurement, including for purposes of MIPS, which we summarized in detail in the CY 2018 Quality Payment Program proposed rule (82 FR 30048).

##### (ii) Total Per Capita Cost and MSPB Measures

For the 2018 MIPS performance period and future performance periods, we proposed to include in the cost performance category the total per capita cost measure and the MSPB measure as finalized for the 2017 MIPS performance period (82 FR 30048 through 30049). We referred readers to the description of these measures in the CY 2017 Quality Payment Program final rule (81 FR 77164 through 77171). We proposed to include the total per capita cost measure because it is a global measure of all Medicare Part A and Part B costs during the performance period. MIPS eligible clinicians are familiar

with the total per capita cost measure because the measure has been used in the VM since the 2015 payment adjustment period and performance feedback has been provided through the annual QRUR since 2013 for a subset of groups that had 20 or more eligible professionals) and to all groups in the annual QRUR since 2014 and mid-year QRUR since 2015. We proposed to use the MSPB measure because many MIPS eligible clinicians will be familiar with the measure from the VM, where it has been included since the 2016 payment adjustment period and in annual QRUR since 2014 and the mid-year QRUR since 2015, or its hospital-specified version, which has been a part of the Hospital VBP Program since 2015. In addition to familiarity, these two measures cover a large number of patients and provide an important measurement of clinician contribution to the overall population that a clinician encounters.

We did not propose any changes to the methodologies for payment standardization, risk adjustment, and specialty adjustment for these measures and refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77164 through 77171) for more information about these methodologies.

We noted that we will continue to evaluate cost measures that are included in MIPS on a regular basis and anticipate that measures could be added or removed, subject to rulemaking under applicable law, as measure development continues. We will also maintain the measures that are used in the cost performance category by updating specifications, risk adjustment, and attribution as appropriate. We anticipate including a list of cost measures for a given performance period in annual rulemaking.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Many commenters opposed the inclusion of the total per capita cost measure and the MSPB measure as cost measures for the 2018 MIPS performance period and future performance periods. Commenters expressed concern that these measures did not differentiate between services or circumstances that clinicians could control from those that they could not. The commenters stated that the MSPB measure had been developed for the hospital setting and had not been endorsed for use for clinician accountability by the NQF. The commenters stated that the total per capita cost measure had not been endorsed by the NQF. Some commenters recommended that these

measures be eliminated when episode-based measures are made part of the program because episode-based measures are more focused on certain conditions.

*Response:* Both the total per capita cost and MSPB measures were included in the QRURs and used in the VM for many years before the implementation of MIPS. These two measures cover a large number of patients and provide an important measurement of clinician contribution to the overall population that a clinician encounters. Like all of the cost measures that we have developed, we continue to refine these measures for improvement. If we find that episode-based measures would be an appropriate replacement for both of these measures, we would address that issue in future rulemaking. At this time, we believe that the total per capita and MSPB measures are tested and reliable for Medicare populations and are therefore the best measures available for the cost performance category. We are concurrently developing new episode-based cost measures with substantial clinician input, that we will consider for proposals in future rulemaking.

*Comment:* Several commenters supported our proposal to include the total per capita cost measure and MSPB measure as cost measures for the 2018 MIPS performance period. These commenters stated that these measures had been used in the legacy VM and would be applicable to many clinicians.

*Response:* We appreciate the commenters for their support.

*Comment:* A few commenters recommended that Part B drugs be excluded from the cost measures because Part D drugs are excluded. They suggested that including Part B drugs is unfair because it would penalize clinicians for prescribing or providing appropriate care.

*Response:* We believe that clinicians play a key role in prescribing drugs for their patients and that the costs associated with drugs can be a significant contributor to the overall cost of caring for a patient. We do not believe it would be appropriate to remove the cost of Medicare Part B drugs from the cost measures, when other services that are ordered but not performed by clinicians, such as laboratory tests or diagnostic imaging, are included. Clinicians play a similar role in prescribing Part D drugs, and Part D drugs can also be a significant contributor to the overall cost of care. However, there are technical challenges that would need to be addressed to integrate Part D drug costs. Section 1848(q)(2)(B)(ii) of the Act requires CMS, to the extent feasible and

applicable, to account for the cost of drugs under Medicare Part D as part of cost measurement under MIPS, and we will continue to explore the addition of this data in cost measures.

*Final Action:* After consideration of the public comments, we are finalizing our proposal to include the total per capita cost and MSPB measures in the cost performance category for the 2018 MIPS performance period and future performance periods.

### (iii) Episode-Based Measures

Episode-based measures differ from the total per capita cost measure and MSPB measure because their specifications only include services that are related to the episode of care for a clinical condition or procedure (as defined by procedure and diagnosis codes), as opposed to including all services that are provided to a patient over a given period of time. For the 2018 MIPS performance period, we did not propose to include in the cost performance category the 10 episode-based measures that we adopted for the 2017 MIPS performance period in the CY 2017 Quality Payment Program final rule (81 FR 77171 through 77174). We instead will work to develop new episode-based measures, with significant clinician input, for future performance periods.

We received extensive comments on our proposal to include 41 of these episode-based measures for the 2017 MIPS performance period, which we responded to in the CY 2017 Quality Payment Program final rule (81 FR 77171 through 77174). We also received additional comments after publication of that final rule with comment period about the decision to include 10 episode-based measures for the 2017 MIPS performance period. Although comments were generally in favor of the inclusion of episode-based measures in the future, there was also overwhelming stakeholder interest in more clinician involvement in the development of these episode-based measures as required by section 1848(r)(2) of the Act. Although there was an opportunity for clinician involvement in the development of some of the episode-based measures included for the 2017 MIPS performance period, it was not as extensive as the process we are currently using to develop episode-based measures. We believe that the new episode-based measures, which we intend to propose in future rulemaking to include in the cost performance category for the 2019 MIPS performance period, will be substantially improved by more extensive stakeholder feedback and involvement in the process.

A draft list of care episodes and patient condition groups that could become episode-based measures used in the Quality Payment Program, along with trigger codes that would indicate the beginning of the episode, was posted for comment in December 2016 (<https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Value-Based-Programs/MACRA-MIPS-and-APMs/Episode-Based-Cost-Measure-Development-for-the-Quality-Payment-Program.pdf>). This material was informed by engagement with clinicians from over 50 clinician specialty societies through a Clinical Committee formed to participate in cost measure development. Subsequently, Clinical Subcommittees have been formed to provide input from a diverse array of clinicians on identifying conditions and procedures for episode groups. For the first set of episode-based cost measures being developed, the Clinical Subcommittees have nearly 150 clinicians affiliated with nearly 100 national specialty societies, recommending which services or claims would be counted in episode costs. This will ensure that cost measures in development are directly informed by a substantial number of clinicians and members of specialty societies.

In addition, a technical expert panel has met to provide oversight and guidance for our development of episode-based cost measures. The technical expert panel has offered recommendations for defining an episode group, assigning costs to the group, attributing episode groups to clinicians, risk adjusting episodes, and aligning cost and quality. This expert feedback has been built into the current cost measure development process.

As this process continues, we are continuing to seek input from clinicians. We believe that episode-based measures will benefit from this comprehensive approach to development. In addition, because it is possible that the new episode-based measures under development could address similar conditions as those in the episode-based measures finalized for the 2017 MIPS performance period, we believe that it would be better to focus attention on the new episode-based measures, so that clinicians would not receive feedback or scores from two measures for the same patient condition or procedure. We will endeavor to have as many episode-based measures available as possible for the 2019 MIPS performance period but will continue to develop measures for potential consideration in the more distant future.

Although we did not propose to include any episode-based measures in

calculating the cost performance category score for the 2020 MIPS payment year, we noted that we do plan to continue to provide confidential performance feedback to clinicians on their performance on episode-based measures developed under the processes required by section 1848(r)(2) of the Act as appropriate in order to increase familiarity with the concept of episode-based measurement as well as the specific episodes that could be included in determining the cost performance category score in the future. We recently provided an initial opportunity for clinicians to review their performance based on the new episode-based measures, as the measures are developed and as the information is available. We note that this feedback will be specific to the new episode-based measures that are developed under the process described above and may be presented in a different format than MIPS eligible clinicians' performance feedback as described in section II.C.9.a. of this final rule with comment period. However, our intention is to align the feedback as much as possible to ensure clinicians receive opportunities to review their performance on potential new episode-based measures for the cost performance category prior to the 2019 MIPS performance period. We are concerned that continuing to provide feedback on the older episode-based measures along with feedback on new episode-based measures will be confusing and a poor use of resources. Because we are focusing on development of new episode-based measures, our feedback on episode-based measures that were previously developed will discontinue after 2017, as these measures would no longer be maintained or reflect changes in diagnostic and procedural coding. We intend to provide feedback on newly developed episode-based measures as they become available in a new format around summer 2018. We noted that the feedback provided in the summer of 2018 will go to those MIPS eligible clinicians for whom we are able to calculate the episode-based measures, which means it would be possible a clinician may not receive feedback on episode-based measures in both the fall of 2017 and the summer of 2018. We believe that receiving feedback on the new episode-based measures will support clinicians in their readiness for the 2019 MIPS performance period.

As previously finalized in the in the CY 2017 Quality Payment Program final rule (81 FR 77173), the 10 episode-based measures (which we did not propose for the 2018 MIPS performance period) will

be used for determining the cost performance category score for the 2019 MIPS payment year in conjunction with the MSPB measure and the total per capita cost measure, although the cost performance category score will be weighted at zero percent in that year.

The following is a summary of the public comments received and our responses:

*Comment:* Many commenters supported our decision not to propose for the 2018 MIPS performance period the 10 episode-based measures that will be used for the 2017 MIPS performance period. These commenters stated that they supported the focus on the development of new episode-based measures that are currently being developed under section 1848(r)(2) of the Act and agreed that there would be confusion if multiple versions of episode-based measures existed.

*Response:* We appreciate the commenters for their support.

*Comment:* Many commenters expressed support for episode-based measurement but concern about our stated plan to introduce new episode-based measures to be used in the cost performance category beginning in next year's proposed rule. Many commenters expressed support for the process that had prioritized clinician involvement but were concerned that the measures would not be able to be tested or understood by clinicians prior to their introduction in the MIPS program. Some commenters recommended that episode-based measures be made available for feedback for at least a year before contributing to the cost performance category percent score. Some commenters recommended that cost measures not be included unless they were endorsed by the NQF or recommended by the MAP.

*Response:* As part of our episode-based measure development, we are completing an extensive outreach initiative in the fall of 2017 to share performance information with many clinicians on the newly developed episode-based measures as part of field testing, a part of measure development. We believe these efforts go beyond the typical testing associated with many performance measures and should reveal issues that were not clear during the development, which also included many clinician experts. We did not make any specific proposals related to the inclusion of episode-based measures in future years, but this development work is intended to develop measures that could be used in the MIPS cost performance category. All measures that will be included in the program would be included in a future proposed rule,

and we would discuss the assessment and testing of the measures at the time of their proposal. Although CMS is conducting a rigorous process to ensure that any new measure is rigorously reviewed before implementation, we believe it is in the interest of MIPS participants, particularly certain specialists, to have access to new episode based measures. We will consider the opportunity to submit measures that have been or may be adopted for the cost performance category for NQF endorsement and to the MAP review process in the future.

*Comment:* A few commenters recommended specific clinical topics for episode-based measures, including oncology care, chronic care, care of the frail elderly, and rare disease. One commenter recommended that CMS consider a measure that focuses on adherence to clinical pathways, rather than using costs of care, because clinical pathways would differentiate care that is appropriate from care that is not.

*Response:* We appreciate the suggestions for future development of episode-based measures and other measures. We will continue to endeavor to develop measures that capture the cost of care for as many different types of patients and clinicians as possible. We would also review potential different methodologies as appropriate.

*Comment:* Several commenters recommended that episode-based measures be developed so that all drugs costs are considered in the same manner, rather than Medicare Part B drugs being included and Medicare Part D drugs being excluded. These commenters suggested the clinical interchangeability of these types of drugs and expressed concern that they would be considered differently in determining cost measures.

*Response:* Section 1848(q)(2)(B)(ii) of the Act requires CMS, to the extent feasible and applicable, to account for the cost of drugs under Medicare Part D as part of cost measurement under MIPS. As stated in the CY 2017 Quality Payment Program final rule, we will continue to explore methods to add Part D drug costs into cost measures in the future. We believe that Part D drugs are a significant contributor to costs for both patients and the Medicare program and should be measured when technically feasible. Episode-based measures may include Part B drug costs if clinically appropriate as we believe these are an important component of health spending.

*Comment:* One commenter requested that CMS develop a process to allow stakeholders to develop their own cost measures, rather than only relying on

the CMS episode-based measure development. This commenter suggested that this would allow for more leadership from relevant specialties of medicine.

*Response:* Although we continue to develop episode-based measures, we are open to considering other types of measures for use in the cost performance category. If an episode-based measure or cost measure were to be created by an external stakeholder, we may consider it for inclusion in the program along the same criteria that we have used to develop and refine other cost measures.

*Comment:* A few commenters opposed the decision to not propose the inclusion of the 10 episode-based measures as cost performance category measures for the 2018 MIPS performance period and for future performance periods. These commenters suggested that clinicians would benefit from having these measures as part of their score even as new episode-based measures are developed.

*Response:* Many of the 10 episode-based measures that are included for the 2019 MIPS payment year have similar topics to those in the new list of episode-based measures we are currently developing. We believe that continuing to use these measures would create confusion. Furthermore, we want to potentially include episode-based cost measures that have significant clinician input, which is a cornerstone of the new episode-based cost measures currently being developed.

*Comment:* A few commenters recommended that, in addition to episode-based measures, we include condition-specific total per capita cost measures that were used in the VM.

*Response:* We are currently focusing on the development of episode-based measures. We continue to believe that the total per capita cost measure we have adopted is inclusive of the four condition-specific total per capita cost measures that have been used under the VM (chronic obstructive pulmonary disease, congestive heart failure, coronary artery disease, and diabetes mellitus).

*Final Action:* After consideration of the public comments, for the 2018 MIPS performance period, we will not include in the cost performance category the 10 episode-based measures that we adopted for the 2017 performance period, and we do not anticipate proposing to include these measures in future performance periods. We will continue to work on development and outreach for new episode-based measures, such as those that are undergoing field testing in October

2017, and may propose to include them in MIPS as appropriate in future rulemaking.

(iv) Attribution

In the CY 2017 Quality Payment Program final rule, we changed the list of primary care services that had been used to determine attribution for the total per capita cost measure by adding transitional care management (CPT codes 99495 and 99496) codes and a chronic care management code (CPT code 99490) (81 FR 77169). In the CY 2017 Physician Fee Schedule final rule, we changed the payment status for two existing CPT codes (CPT codes 99487 and 99489) that could be used to describe care management from B (bundled) to A (active) meaning that the services would be paid under the Physician Fee Schedule (81 FR 80349). The services described by these codes are substantially similar to those described by the chronic care management code that we added to the list of primary care services beginning with the 2017 performance period. We therefore proposed to add CPT codes 99487 and 99489, both describing complex chronic care management, to the list of primary care services used to attribute patients under the total per capita cost measure (82 FR 30050).

We did not propose any changes to the attribution methods for the MSPB measure and referred readers to the CY 2017 Quality Payment Program final rule (81 FR 77168 through 77169) for more information.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Some commenters supported the proposal to add CPT codes 99487 and 99489 to the list of primary care services used to attribute patients under the total per capita cost measure, noting the similarity of these codes to other codes defined as primary care services for this purpose.

*Response:* We appreciate the commenters for their support.

*Comment:* Some commenters expressed concern that cost measures were being attributed to clinicians before patient relationship codes were being reported by clinicians. Some commenters recommended that cost measures not be used before the patient relationship codes are implemented and studied.

*Response:* To facilitate the attribution of patients and episodes to one or more clinicians, section 1848(r)(3) of the Act requires the development of patient relationship categories and codes that define and distinguish the relationship and responsibility of a physician or

applicable practitioner with a patient at the time of furnishing an item or service. In the CY 2018 Physician Fee Schedule proposed rule (82 FR 34129), we proposed to use certain HCPCS modifiers as the patient relationship codes. Section 1848(r)(4) of the Act requires claims submitted for items and services furnished by a physician or applicable practitioner on or after January 1, 2018, shall, as determined appropriate by the Secretary, include the applicable patient relationship code, in addition to other information. We proposed (82 FR 34129) that for at least an initial period while clinicians gain familiarity, reporting the HCPCS modifiers on claims would be voluntary, and the use and selection of the modifiers would not be a condition of payment. The statute requires us to include the cost performance category in the MIPS program, and thus, we cannot delay the use of cost measures in MIPS until after the patient relationship codes have been implemented, as recommended by the commenters. However, we may consider future changes to our attribution methods for cost measures based on the patient relationship codes that will be reported on claims.

*Comment:* One commenter recommended that services provided in a nursing facility (POS 32) not be included for purposes of attribution under the total per capita cost measure. One commenter recommended that services provided in a skilled nursing home facility (POS 31) continue to be excluded for purposes of attribution under the total per capita cost measure.

*Response:* Patients in a skilled nursing home facility (SNF) (POS 31) require more frequent practitioner visits—often from 1 to 3 times a week. In contrast, patients in nursing facilities (NFs) (POS 32) are almost always permanent residents and generally receive their primary care services in the facility for the duration of their life. On the other hand, patients in an NF (POS 32) are usually seen every 30 to 60 days unless medical necessity dictates otherwise. We believe this distinction is important enough to treat these sites of service differently in terms of attribution for the total per capita cost measure. Services provided in POS 31 are not included in the definition of primary care services used for the total per capita cost measure, but services provided in POS 32 are. We will continue to evaluate attribution methods as part of measure development and maintenance.

*Comment:* One commenter opposed the addition of complex chronic care management codes because palliative

care physicians often bill for the services, but serve in a consulting role as opposed to serving as a primary care clinician.

*Response:* We believe that the attribution model that assigns patients on the basis of a plurality of services would not assign patients for the purposes of the total per capita cost measure on the basis of a single visit, unless that patient had also not seen a primary care clinician during the year. We believe these codes are consistent with other services typically provided by primary care clinicians.

*Comment:* Many commenters expressed general concerns about attribution methods, stating that they were not well understood, were not properly tested, and were unfair. These commenters encouraged CMS to improve or perfect attribution methods.

*Response:* We will continue to work to improve attribution methods as we develop the measures and methods that are part of the cost performance category. We do not use a single attribution method—instead the attribution method is linked to a measure and attempts to best identify the clinician who may have influenced the spending for a patient, whether it be all spending in a year or a more narrow set of spending in a defined period. As we continue our work to develop episode-based measures and refine the two cost measures included for the 2018 MIPS performance period, we will work to explain the methodology for attribution and how it works in relation to the measure and the scoring methodology.

*Final Action:* After consideration of the public comments, we are finalizing our proposal to add CPT codes 99487 and 99489 to the list of primary care services used to attribute patients under the total per capita cost measure.

#### (v) Reliability

In the CY 2017 Quality Payment Program final rule (81 FR 77169 through 77170), we finalized a reliability threshold of 0.4 for measures in the cost performance category. Reliability is an important evaluation for cost measures to ensure that differences in performance are not the result of random variation. In the proposed rule, we provided a summary of the importance of reliability in measurement and how high reliability must be balanced with other goals, such as measuring where there is significant variation and ensuring that cost measurement is not limited to large groups with large case volume (82 FR 30050). Although we did not propose any adjustments to our reliability

policies, we did receive a number of comments on issues related to reliability which we will consider as part of future rulemaking. We will continue to evaluate reliability as we develop new measures and to ensure that our measures meet an appropriate standard.

#### (b) Attribution for Individuals and Groups

We did not propose any changes for how we attribute cost measures to individual and group reporters. We refer readers to the CY 2017 Quality Payment Program final rule for more information (81 FR 77175 through 77176). Although we did not propose any adjustments to our attribution policies, we did receive a number of comments on issues related to attribution which we will consider as part of future rulemaking.

#### (c) Incorporation of Cost Measures With SES or Risk Adjustment

Both measures proposed for inclusion in the cost performance category for the 2018 MIPS performance period are risk adjusted at the measure level. Although the risk adjustment of the 2 measures is not identical, in both cases it is used to recognize the higher risk associated with demographic factors (such as age) or certain clinical conditions. We recognize that the risks accounted for with this adjustment are not the only potential attributes that could lead to a higher cost patient. Stakeholders have pointed to many other factors such as income level, race, and geography that they believe contribute to increased costs. These issues and our plans for attempting to address them are discussed in length in section II.C.7.b.(1)(a) of this final rule with comment period. While we did not propose any changes to address risk adjustment for cost measures in this rule, we continue to believe that this is an important issue and it will be considered carefully in the development of future cost measures and for the overall cost performance category. Although we did not propose any adjustments to our policies on incorporating cost measures with SES or risk adjustment, we did receive a number of comments which we will consider as part of future rulemaking.

#### (d) Incorporation of Cost Measures With ICD-10 Impacts

In the CY 2018 Quality Payment Program proposed rule (82 FR 30098), we discussed our proposal to assess performance on any measures impacted by ICD-10 updates based only on the first 9 months of the 12-month performance period. Because the total per capita cost and MSPB measures

include costs from all Medicare Part A and B services, regardless of the specific ICD-10 codes that are used on claims, and do not assign patients based on ICD-10, we do not anticipate that any measures for the cost performance category would be affected by this ICD-10 issue during the 2018 MIPS performance period. However, as we continue our plans to expand cost measures to incorporate episode-based measures, ICD-10 changes could become important. Episode-based measures may be opened (triggered) by and may assign services based on ICD-10 codes. Therefore, a change to ICD-10 coding could have a significant effect on an episode-based measure. Changes to ICD-10 codes will be incorporated into the measure specifications on a regular basis through the measure maintenance process. Please refer to section II.C.7.a.(1)(c) of this final rule with comment period for a summary of the comments and our response on this issue.

#### (e) Application of Measures to Non-Patient Facing MIPS Eligible Clinicians

We did not propose changes to the policy we finalized in the CY 2017 Quality Payment Program final rule (81 FR 77176) that we will attribute cost measures to non-patient facing MIPS eligible clinicians who have sufficient case volume, in accordance with the attribution methodology. Although we did not propose any adjustments to our attribution of cost measures to non-patient facing MIPS eligible clinicians with sufficient case volume policies, we did receive a few comments which we will consider as part of future rulemaking.

Section 1848(q)(2)(C)(iv) of the Act requires the Secretary to consider the circumstances of professional types who typically furnish services without patient facing interaction (non-patient facing) when determining the application of measures and activities. In addition, this section allows the Secretary to apply alternative measures or activities to non-patient facing MIPS eligible clinicians that fulfill the goals of a performance category. Section 1848(q)(5)(F) of the Act allows the Secretary to re-weight MIPS performance categories if there are not sufficient measures and activities applicable and available to each type of MIPS eligible clinician involved.

We believe that non-patient facing clinicians are an integral part of the care team and that their services do contribute to the overall costs but at this time we believe it better to focus on the development of a comprehensive system of episode-based measures which focus

on the role of patient-facing clinicians. Accordingly, for the 2018 MIPS performance period, we did not propose alternative cost measures for non-patient facing MIPS eligible clinicians or groups. This means that non-patient facing MIPS eligible clinicians or groups are unlikely to be attributed any cost measures that are generally attributed to clinicians who have patient-facing encounters with patients. Therefore, we anticipate that, similar to MIPS eligible clinicians or groups that do not meet the required case minimums for any cost measures, many non-patient facing MIPS eligible clinicians may not have sufficient cost measures applicable and available to them and would not be scored on the cost performance category under MIPS.

We will continue to explore methods to incorporate non-patient facing clinicians into the cost performance category in the future.

(f) Facility-Based Measurement as It Relates to the Cost Performance Category

In the CY 2018 Quality Payment Program proposed rule (82 FR 30123), we discussed our proposal to implement section 1848(q)(2)(C)(ii) of the Act by assessing clinicians who meet certain requirements and elect participation based on the performance of their associated hospital in the Hospital VBP Program. We refer readers to section II.C.7.a.(4) of this final rule with comment period for full details on the final policies related to facility-based measurement, including the measures and how the measures are scored, for the cost performance category.

e. Improvement Activity Criteria

(1) Background

Section 1848(q)(2)(C)(v)(III) of the Act defines an improvement activity as an activity that relevant eligible clinician organizations and other relevant stakeholders identify as improving clinical practice or care delivery, and that the Secretary determines, when effectively executed, is likely to result in improved outcomes. Section 1848(q)(2)(B)(iii) of the Act requires the Secretary to specify improvement activities under subcategories for the performance period, which must include at least the subcategories specified in section 1848(q)(2)(B)(iii)(I) through (VI) of the Act, and in doing so to give consideration to the circumstances of small practices, and practices located in rural areas and geographic health professional shortage areas (HPSAs).

Section 1848(q)(2)(C)(iv) of the Act generally requires the Secretary to give consideration to the circumstances of non-patient facing individual MIPS eligible clinicians or groups and allows the Secretary, to the extent feasible and appropriate, to apply alternative measures and activities to such individual MIPS eligible clinicians and groups.

Section 1848(q)(2)(C)(v) of the Act required the Secretary to use a request for information (RFI) to solicit recommendations from stakeholders to identify improvement activities and specify criteria for such improvement activities, and provides that the Secretary may contract with entities to assist in identifying activities, specifying criteria for the activities, and determining whether individual MIPS eligible clinicians or groups meet the criteria set. For a detailed discussion of the feedback received from the MIPS and APMs RFI, see the CY 2017 Quality Payment Program 2017 final rule (81 FR 77177).

In the CY 2017 Quality Payment Program final rule (81 FR 77178), we defined improvement activities at § 414.1305 as an activity that relevant MIPS eligible clinicians, organizations and other relevant stakeholders identify as improving clinical practice or care delivery and that the Secretary determines, when effectively executed, is likely to result in improved outcomes.

In the CY 2017 Quality Payment Program final rule (81 FR 77199), we solicited comments on activities that would advance the usage of health IT to support improvement activities for future consideration. Please refer to the CY 2018 Quality Payment Program proposed rule (82 FR 30052) for a full discussion of the public comments we received in response to the CY 2017 Quality Payment Program final rule and our responses provided on activities that would advance the usage of health IT to support improvement activities.

In the CY 2018 Quality Payment Program proposed rule (82 FR 30052), we sought comment on how we might provide flexibility for MIPS eligible clinicians to effectively demonstrate improvement through health IT usage while also measuring such improvement for future consideration. We received many comments on this topic and will take them into consideration for future rulemaking.

(2) Contribution to the Final Score

(i) Patient-Centered Medical Home

In the CY 2017 Quality Payment Program final rule (81 FR 77179 through 77180), we finalized at § 414.1355 that

the improvement activities performance category would account for 15 percent of the final score. We also finalized at § 414.1380(b)(3)(iv) criteria for recognition as a certified patient-centered medical home or comparable specialty practice. Since then, it has come to our attention that the common terminology utilized in the general medical community for “certified” patient-centered medical home is “recognized” patient-centered medical home.

Therefore, in order to provide clarity, in the CY 2018 Quality Payment Program proposed rule (82 FR 30052), we proposed that the term “recognized” be accepted as equivalent to the term “certified” when referring to the requirements for a patient-centered medical home to receive full credit for the improvement activities performance category for MIPS. Specifically, we proposed to revise § 414.1380(b)(3)(iv) to provide that a MIPS eligible clinician or group in a practice that is certified or recognized as a patient-centered medical home or comparable specialty practice, as determined by the Secretary, receives full credit for performance on the improvement activities performance category. A practice is certified or recognized as a patient-centered medical home if it meets any of the criteria specified under § 414.1380(b)(3)(iv).

We invited public comment on this proposal.

*Comment:* A few commenters supported the proposed expansion of the patient-centered medical home definition, to include both medical homes that are “certified” and those that are “recognized.” These commenters noted that inclusion of both terms aligns with the terminology used by various organizations and states that have patient-centered medical home programs that may be eligible for full credit in the improvement activities performance category.

*Response:* We thank the commenters for their support.

*Comment:* One commenter stated that in the CY 2017 Quality Payment Program final rule, the documented recognition as a patient-centered medical home from an accredited body combined with continual improvements was listed as already receiving credit in the improvement activity performance category.

*Response:* We believe the commenter is referring to our discussion in the CY 2017 Quality Payment Program final rule (81 FR 77179 through 77180), where we finalized at § 414.1380 an expanded definition of what is acceptable for recognition as a certified-

patient centered medical home or comparable specialty practice. We recognized a MIPS eligible clinician or group as being a certified patient-centered medical home or comparable specialty practice if they have achieved certification or accreditation as such from a national program, or they have achieved certification or accreditation as such from a regional or state program, private payer or other body that certifies at least 500 or more practices for patient-centered medical home accreditation or comparable specialty practice certification. In the CY 2018 Quality Payment Program proposed rule, we did not propose any substantive changes to that definition. However, for the sake of clarity we proposed that we will accept the designation of “recognized” as equivalent to the designation of “certified” when referring to the requirements for a patient-centered medical home or comparable specialty practice to receive full credit for the improvement activities performance category for MIPS and also to update § 414.1380(b)(3)(iv) to reflect this. Our intention behind this proposal was to reflect common terminology utilized in the general medical community—that “certified” patient-centered medical home is equivalent to “recognized” patient-centered medical home. A practice is certified or recognized as a patient-centered medical home if it meets any of the criteria specified under § 414.1380(b)(3)(iv).

*Comment:* Several commenters provided comments that were not related to our proposal to accept the designation of “recognized” as equivalent to the designation of “certified” when referring to the requirements for a patient-centered medical home or comparable specialty practice to receive full credit for the improvement activities performance category for MIPS. They are summarized here. Some commenters recommended that CMS consider other models as patient-centered medical homes for full credit in this performance category. These commenters suggested that CMS consider full credit to those MIPS eligible clinicians and groups participating in models such as a Patient Centered Medical Neighborhood (PCMN), participation in a Certified Community Behavioral Health Clinic (CCBHC) or a Medicaid Section 2703 Health Home, or Blue Distinction® Total Care. Other commenters suggested that CMS establish a policy to offer full auto-credit to any practice that achieves National Committee for Quality Assurance (NCQA) recognition by

December 31st of a given performance year, since NCQA requires that practices seeking patient-centered medical home and patient-centered specialty practice (PCSP) recognition perform the appropriate activities for a minimum of 90 days. Further, these commenters recommended that this policy should extend to any other approved patient-centered medical home programs that use a 90-day look-back period.

*Response:* We acknowledge the commenter’s suggestions that we consider additional models as patient-centered medical homes for full credit in this performance category. In the CY 2017 Quality Payment Program final rule (81 FR 77180), we previously stated that we recognize a MIPS eligible clinician or group as being a certified patient-centered medical home or comparable specialty practice if they have achieved certification or accreditation as such from a national program, or they have achieved certification or accreditation as such from a regional or state program, private payer or other body that certifies at least 500 or more practices for patient-centered medical home accreditation or comparable specialty practice certification. We went on to state that examples of nationally recognized accredited patient-centered medical homes are: (1) The Accreditation Association for Ambulatory Health Care; (2) the National Committee for Quality Assurance (NCQA) Patient-Centered Medical Home; (3) The Joint Commission Designation; or (4) the Utilization Review Accreditation Commission (URAC) (81 FR 77180). We finalized that the criteria for being a nationally recognized accredited patient-centered medical home are that it must be national in scope and must have evidence of being used by a large number of medical organizations as the model for their patient-centered medical home (81 FR 77180). We also stated that we will also provide full credit for the improvement activities performance category for a MIPS eligible clinician or group that has received certification or accreditation as a patient-centered medical home or comparable specialty practice from a national program or from a regional or state program, private payer, or other body that administers patient-centered medical home accreditation and certifies 500 or more practices for patient-centered medical home accreditation or comparable specialty practice certification (81 FR 77180). We note, however, that in the CY 2018 Quality Payment Program proposed rule we did not propose any changes to the definition of what is

acceptable for recognition as a certified patient-centered medical home or comparable specialty practice that we finalized in the CY 2017 Quality Payment Program final rule (81 FR 77180) and codified under § 414.1380(b)(3)(iv). Without more information, we cannot provide information as to whether the suggested entities fall within our previously established definition above. Furthermore, while we are not considering any changes to this definition and criteria for the CY 2018 performance period, we may consider commenters’ suggestions as we craft policy for future rulemaking. Moreover, we would like to make clear that credit is not automatically granted; MIPS eligible clinicians and groups must attest in order to receive the credit (81 FR 77181) which is codified at § 414.1360.

*Final Action:* After consideration of the public comments received, we are finalizing, as proposed, our proposals: (1) That the term “recognized” be accepted as equivalent to the term “certified” when referring to the requirements for a patient-centered medical home to receive full credit for the improvement activities performance category for MIPS; and (2) to update § 414.1380(b)(3)(iv) to reflect this change.

(ii) Weighting of Improvement Activities

As previously explained in the CY 2017 Quality Payment Program final rule (81 FR 77194), we believe that high weighting should be used for activities that directly address areas with the greatest impact on beneficiary care, safety, health, and well-being. In the CY 2017 Quality Payment Program final rule (81 FR 77198), we requested commenters’ specific suggestions for additional activities or activities that may merit additional points beyond the “high” level for future consideration.

*Comment:* Several commenters urged CMS to increase the overall number of high-weighted activities in this performance category. Some commenters recommended additional criteria for designating high-weighted activities, such as an improvement activity’s impact on population health, medication adherence, and shared decision-making tools, and encouraged CMS to be more transparent in our weighting decisions. Several commenters recommended that CMS weight registry-related activities as high, and suggested that we award individual MIPS eligible clinicians and groups in APMs full credit in this performance category. The commenters also offered many recommendations for changing

current medium-weighted activities to high and offered many specific suggestions for new high-weighted improvement activities.

*Response:* After review and consideration of comments in the CY 2017 Quality Payment Program final rule, while we did not propose changes to our approach for weighting improvement activities in the CY 2018 Quality Payment Program proposed rule (82 FR 30052), we will take the additional criteria suggested by commenters for designating high-weighted activities into consideration in future rulemaking. We did however, propose new, high-weighted as well as new medium weighted activities, in Table F in the Appendix of the proposed rule. We refer readers to Table F in the Appendix of this final rule with comment period where we are finalizing new activities, and Table G in the same Appendix where we are finalizing changes to existing improvement activities.

For MIPS eligible clinicians participating in MIPS APMs, in the CY 2017 Quality Payment Program final rule (81 FR 77185) we finalized a policy to reduce reporting burden through the APM scoring standard for this performance category to recognize improvement activities work performed through participation in MIPS APMs. This policy is codified at § 414.1370(g)(3), and we refer readers to the CY 2017 Quality Payment Program final rule for further details on reporting and scoring this performance category under the APM Scoring Standard (81 FR 77259 through 77260). In the CY 2018 Quality Payment Program proposed rule, we did not propose any changes to these policies.

We received many comments on this topic and will take them into consideration for future rulemaking.

### (3) Improvement Activities Data Submission Criteria

#### (a) Submission Mechanisms

##### (i) Generally

In the CY 2017 Quality Payment Program final rule (81 FR 77180), we discussed that for the transition year of MIPS, we would allow for submission of data for the improvement activities performance category using the qualified registry, EHR, QCDR, CMS Web Interface, and attestation data submission mechanisms through attestation. Specifically, in the CY 2017 Quality Payment Program final rule (81 FR 77180), we finalized a policy that regardless of the data submission method, with the exception of MIPS eligible clinicians in MIPS APMs, all

individual MIPS eligible clinicians or groups must select activities from the Improvement Activities Inventory. In addition, we codified at § 414.1360, that for the transition year of MIPS, all individual MIPS eligible clinicians or groups, or third party intermediaries such as health IT vendors, QCDRs and qualified registries that submit on behalf of an individual MIPS eligible clinician or group, must designate a “yes” response for activities on the Improvement Activities Inventory. We also codified at § 414.1360 that in the case where an individual MIPS eligible clinician or group is using a health IT vendor, QCDR, or qualified registry for their data submission, the individual MIPS eligible clinician or group will validate the improvement activities that were performed, and the health IT vendor, QCDR, or qualified registry would submit on their behalf.

We would like to maintain stability in the Quality Payment Program and continue these policies into future years. In the CY 2018 Quality Payment proposed rule (82 FR 30053), we proposed to update § 414.1360 for the transition year of MIPS and future years, to reflect that all individual MIPS eligible clinicians or groups, or third party intermediaries such as health IT vendors, QCDRs and qualified registries that submit on behalf of an individual MIPS eligible clinician or group, must designate a “yes” response for activities on the Improvement Activities Inventory. We note that these are the same requirements as previously codified for the transition year; requirements for the transition year remain unchanged. We merely proposed to extend the same policies for future years.

In addition, in the case where an individual MIPS eligible clinician or group is using a health IT vendor, QCDR, or qualified registry for their data submission, we proposed that the MIPS eligible clinician or group will certify all improvement activities were performed and the health IT vendor, QCDR, or qualified registry would submit on their behalf (82 FR 30053). In summary, we proposed to continue our previously established policies for future years and to generally apply our group policies to virtual groups. Furthermore, we refer readers to the CY 2018 Quality Payment Program proposed rule at (82 FR 30029) and section II.C.4.d. of this final rule, where we are finalizing to generally apply our group policies to virtual groups.

While we previously codified at § 414.1325(d) in the CY 2017 Quality Payment Program final rule that individual MIPS eligible clinicians and

groups may only use one submission mechanism per performance category, (81 FR 77275), in section II.C.6.a.(1) of this final rule with comment period, we are finalizing our proposal, with modification, to revise § 414.1325(d) for purposes of the 2021 MIPS payment year and future years to allow individual MIPS eligible clinicians and groups to submit measures and activities, as applicable, via as many submission mechanisms as necessary to meet the requirements of the quality, improvement activities, or advancing care information performance categories. We refer readers to section II.C.6.a.(1) of this final rule with comment period for discussion of this proposal as finalized.

We also included a designation column in the Improvement Activities Inventory at Table H in the Appendix of the CY 2017 Quality Payment Program final rule (81 FR 77817) that indicated which activities qualified for the advancing care information bonus codified at § 414.1380. In future updates to the Improvement Activities Inventory, we intend to continue to indicate which activities qualify for the advancing care information performance category bonus.

We invited public comment on our proposals.

*Comment:* A few commenters expressed support for our proposal that for the transition year of MIPS and future years, all individual MIPS eligible clinicians or groups, or third party intermediaries such as health IT vendors, QCDRs, and qualified registries that submit on behalf of an individual MIPS eligible clinician or group, must designate a “yes” response for activities on the Improvement Activities Inventory, and that where an individual MIPS eligible clinician or group is using a health IT vendor, QCDR, or qualified registry for their data submission, the MIPS eligible clinician or group must certify all improvement activities were performed and the health IT vendor, QCDR, or qualified registry would submit on their behalf.

*Response:* We thank the commenters for their support. We realize the way the proposal was worded may have caused some potential confusion. Therefore, we are clarifying here that our proposal merely extends the same requirements, as previously codified for the transition year, to future years; requirements for the transition year remain unchanged.

*Comment:* One commenter urged CMS to refer to registries more broadly, rather than using the term “QCDR,” noting that many qualified registries are in use by clinicians, even though these may not have received official QCDR

status for one reason or another. Another commenter requested that CMS consider allowing other third parties that may be collecting information that is indicative of completion of an improvement activity to submit data to CMS, suggesting that for example, an organization that awards continuing medical education (CME) credits that qualify as improvement activities could submit a list of MIPS eligible clinicians who received qualifying CME credit directly to CMS.

*Response:* We note that the terms “qualified registry” and “QCDR” are defined terms for the purposes of MIPS, as codified at § 414.1400. We refer readers to section I.I.C.10. of this final rule with comment period for a detailed discussion of third party intermediaries. While we recognize that there are other registries that are not considered MIPS qualified registry or QCDRs, those registries have the option to become a MIPS QCDR using the process finalized in the CY 2017 Quality Payment Program final rule (81 FR 77365), or qualify as a MIPS registry using the process finalized at 81 FR 77383 in that same final rule. If an organization becomes a MIPS qualified registry or QCDR then they could submit MIPS data to us.

*Final Action:* After consideration of the public comments we received, we are finalizing our proposals, with clarification, to continue our previously established policies for future years. Specifically: (1) For purposes of MIPS Year 2 and future years, MIPS eligible clinicians or groups must submit data on MIPS improvement activities in one of the following manners: Via qualified registries; EHR submission mechanisms; QCDR, CMS Web Interface; or attestation. Our proposal language may have potentially caused some confusion, because it included the transition year; however, we are clarifying here that policies were previously established for that year and remain unchanged. We are also finalizing, as proposed: (2) For activities that are performed for at least a continuous 90 days during the performance period, MIPS eligible clinicians must submit a yes response for activities within the Improvement Activities Inventory; and (3) that § 414.1360 will be updated to reflect these changes.

#### (ii) Group Reporting

In the CY 2017 Quality Payment Program final rule (81 FR 77181), we clarified that if one MIPS eligible clinician (NPI) in a group completed an improvement activity, the entire group (TIN) would receive credit for that activity. In addition, we specified that

all MIPS eligible clinicians reporting as a group would receive the same score for the improvement activities performance category if at least one clinician within the group is performing the activity for a continuous 90 days in the performance period. We refer readers to section I.I.C.4.d. of this final rule with comment period, where we are finalizing to generally apply our group policies to virtual groups. We did not propose any changes to our group reporting policies in the proposed rule. However, in the CY 2017 Quality Payment Program proposed rule (82 FR 30053), we requested comment for future consideration on whether we should establish a minimum threshold (for example, 50 percent) of the clinicians (NPIs) that must complete an improvement activity in order for the entire group (TIN) to receive credit in the improvement activities performance category in future years. In addition, we requested comments for future consideration on recommended minimum threshold percentages and whether we should establish different thresholds based on the size of the group. In the proposed rule, (82 FR 30053), we noted that we are concerned that while establishing any specific threshold for the percentage of NPIs in a TIN that must participate in an improvement activity for credit will incentivize some groups to move closer to the threshold, it may have the unintended consequence of incentivizing groups who are exceeding the threshold to gravitate back toward the threshold. Therefore, we requested comments for future consideration on how to set this threshold while maintaining the goal of promoting greater participation in an improvement activity.

Additionally, we noted in the CY 2017 Quality Payment Program final rule (81 FR 77197) that we intended, in future years, to score the improvement activities performance category based on performance and improvement, rather than simple attestation. In the CY 2018 Quality Payment Program proposed rule (82 FR 30053), we sought comment on how we could measure performance and improvement for future consideration; we were especially interested in ways to measure performance without imposing additional burden on eligible clinicians, such as by using data captured in eligible clinicians’ daily work.

We received many comments on these topics and will take them into consideration as we craft for future policies.

#### (b) Submission Criteria

##### (i) Background

In the CY 2017 Quality Payment Program final rule (81 FR 77185), we finalized at § 414.1380 to set the improvement activities submission criteria under MIPS, to achieve the highest potential score, at two high-weighted improvement activities or four medium-weighted improvement activities, or some combination of high and medium-weighted improvement activities. While the minimum reporting period for one improvement activity is 90 days, the maximum frequency with which an improvement activity may be reported would be once during the 12-month performance period (81 FR 77185). In addition, we refer readers to section I.I.C.4.d. of this final rule with comment period, where we are finalizing to generally apply group policies to virtual groups.

In the CY 2017 Quality Payment Program final rule (81 FR 77185), we established exceptions to the above for: Small practices; practices located in rural areas; practices located in geographic HPSAs; non-patient facing individual MIPS eligible clinicians or groups; and individual MIPS eligible clinicians and groups that participate in a MIPS APM or a patient-centered medical home submitting in MIPS. Specifically, for individual MIPS eligible clinicians and groups that are small practices, practices located in rural areas or geographic HPSAs, or non-patient facing individual MIPS eligible clinicians or groups, to achieve the highest score, one high-weighted or two medium-weighted improvement activities are required (81 FR 77185). For these individual MIPS eligible clinicians and groups, in order to achieve one-half of the highest score, one medium-weighted improvement activity is required (81 FR 77185).

In the CY 2017 Quality Payment Program final rule (81 FR 77185), we finalized that under the APM scoring standard, all clinicians identified on the Participation List of an APM receive at least one-half of the highest score applicable to the MIPS APM. To develop the improvement activities score assigned to each MIPS APM, we compare the requirements of the specific MIPS APM with the list of activities in the Improvement Activities Inventory and score those activities in the same manner that they are otherwise scored for MIPS eligible clinicians (81 FR 77185). If by our assessment the MIPS APM does not receive the maximum improvement activities performance category score then the APM entity can submit additional

improvement activities (81 FR 77185). All other individual MIPS eligible clinicians or groups that we identify as participating in APMs that are not MIPS APMs will need to select additional improvement activities to achieve the improvement activities highest score (81 FR 77185). We did not propose any changes to these policies; we refer readers to section II.C.6.g. of this final rule with comment period for further discussion of the APM scoring standard.

We received many comments on this topic and will take them into consideration for future rulemaking.

(ii) Patient-Centered Medical Homes or Comparable Specialty Practices

In the CY 2017 Quality Payment Program final rule (81 FR 77185), we finalized at § 414.1380(b)(3)(iv) to provide full credit for the improvement activities performance category, as required by law, for an individual MIPS eligible clinician or group that has received certification or accreditation as a patient-centered medical home or comparable specialty practice from a national program or from a regional or state program, private payer or other body that administers patient-centered medical home accreditation and certifies 500 or more practices for patient-centered medical home accreditation or comparable specialty practice certification, or for an individual MIPS eligible clinician or group that is a participant in a medical home model. We noted in the CY 2017 Quality Payment Program final rule (81 FR 77178) that practices may receive this designation at a practice level and that TINs may be comprised of both undesignated practices and designated practices. We finalized at § 414.1380(b)(3)(viii) that to receive full credit as a certified patient-centered medical home or comparable specialty practice, a TIN that is reporting must include at least one practice site which is a certified patient-centered medical home or comparable specialty practice (81 FR 77178). We also indicated that we would continue to have more stringent requirements in future years, and would lay the groundwork for expansion towards continuous improvement over time (81 FR 77189).

We received many comments on the CY 2017 Quality Payment Program final rule regarding our transition year policy that only one practice site within a TIN needs to be certified as a patient-centered medical home for the entire TIN to receive full credit in the improvement activities performance category. While several commenters supported our transition year policy, others disagreed and suggested to move

to a more stringent requirement in future years while still offering some flexibility. We refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77180 through 77182) for the details of those comments and our responses. In response to these comments, in the CY 2018 Quality Payment Program proposed rule (82 FR 30054), we proposed to revise § 414.1380(b)(3)(x) to provide that for the 2020 MIPS payment year and future years, to receive full credit as a certified or recognized patient-centered medical home or comparable specialty practice, at least 50 percent of the practice sites within the TIN must be recognized as a patient-centered medical home or comparable specialty practice. This is an increase to the previously established requirement codified at § 414.1380(b)(3) in the CY 2017 Quality Payment Program final rule (81 FR 77178) that only one practice site within a TIN needs to be certified as a patient-centered medical home. We chose not to propose to require that every site be certified, because that could potentially be overly restrictive given that some sites within a TIN may be in the process of being certified as patient-centered medical homes. We believe a 50 percent threshold is achievable, and is supported by a study of physician-owned primary care groups in a recent *Annals of Family Medicine* article (Casalino, et al., 2016) <http://www.annfam.org/content/14/1/16.full>. For nearly all groups in this study (sampled with variation in size and geographic area), at least 50 percent of the practice sites within the group had a medical home designation.<sup>2</sup> If the group is unable to meet the 50 percent threshold, then the individual MIPS eligible clinician may choose to receive full credit as a certified patient-centered medical home or comparable specialty practice by reporting as an individual for all performance categories. In addition, we refer readers to section II.C.4.d. of this final rule with comment period, where we are finalizing to generally apply our group policies to virtual groups. Further, in the proposed rule, we welcomed suggestions on an appropriate threshold for the number of NPIs within the TIN that must be recognized as a certified patient-centered medical home or comparable specialty practice to receive full credit in the improvement activities performance category.

<sup>2</sup> Casalino LP, Chen MA, Staub CT, Press MJ, Mendelsohn JL, Lynch JT, Miranda Y. Large independent primary care medical groups. *Ann Fam Med.* 2016;14(1):16–25.

In the CY 2018 QPP proposed rule (82 FR 30054 through 55) we invited public comments on our proposals to revise § 414.1380(b)(3)(x) to provide that for the 2020 MIPS payment year and future years, to receive full credit as a certified or recognized patient-centered medical home or comparable specialty practice, at least 50 percent of the practice sites within the TIN must be recognized as a patient-centered medical home or comparable specialty practice. However, we are correcting here that we intended to add § 414.1380(b)(3)(x) as a new provision, not revise it. This was an inadvertent typographical error. The following is a summary of the public comments received and our responses.

*Comment:* Several commenters supported CMS's proposal to raise the threshold to 50 percent for the number of practice sites that must be recognized within a TIN to receive full credit in this performance category as a patient-centered medical home or comparable specialty. These commenters noted that the proposal strikes an appropriate balance between requiring a TIN to show substantial accomplishment before receiving full credit in this performance category and acknowledging that it may be infeasible for every practice site within a TIN to achieve this recognition. One commenter urged CMS to accept data feeds from accrediting bodies so that we can move to requiring 100 percent of practice sites within a TIN to achieve recognition in order to receive full credit in this performance category.

*Response:* We appreciate the support and agree that establishing a 50 percent threshold strikes an appropriate balance. In addition, we appreciate the comment regarding accepting data feeds from accrediting bodies and will explore this idea, including whether it is technically feasible, as we craft future policy.

*Comment:* Another commenter supported the proposal, but suggested that it would be most logical to define the threshold as 50 percent of the primary care sites for TINs with both specialty and primary care, and for groups with both primary care and specialty only sites, the denominator for the threshold should be the number of primary care.

*Response:* It is important to note that our criteria for patient-centered medical homes include specialty sites as well, not just primary care. We do not believe it is appropriate to restrict patient-centered medical home designation to primary care sites only. Based on a survey of patient-centered medical homes accrediting organizations, named in the *Annals of Family Medicine* article

2017 (Casalino, et al., 2016) cited above in our proposal, only one specifically requires that practices be primary care, and another offers specialty-specific patient-centered medical homes recognition. Therefore, it is reasonable to assume that specialty practices could attain patient-centered medical homes recognition through multiple accrediting organizations along with their primary care sites if they choose to. Overall, we believe that setting the patient-centered medical home group threshold at 50 percent of the group is achievable and it is our goal to encourage TINs to have more practice sites undergo transformation.

*Comment:* Several commenters opposed CMS's proposal to raise the threshold to 50 percent for the number of practice sites that must be recognized within a TIN to receive full credit in this performance category as a patient-centered medical home or comparable specialty, expressing concern that it is a significant change from the first year of the program, and urging CMS to continue to provide flexibility in this area or gradually increase the threshold in future years.

Several commenters expressed concern that the proposed threshold is premature and may interfere with their ability to report participation in an improvement activity that may be unique to their specialty group or discourage participation by some clinicians in the medical home models altogether.

Other commenters expressed concern that CMS's proposed policy fails to account for the effort and investment required to achieve this designation, and fails to account for how the work of those sites that do achieve such recognition impacts specialty clinics within a TIN by ensuring coordinated primary care for patients as those practice sites refer patients needing specialized care who cannot be managed by primary care. Some commenters recommended that CMS consider alternatives to our proposal. A few commenters recommended a threshold of 2 or more practice sites, or beginning with a lower threshold, such as 33 percent. One commenter suggested that CMS instead consider awarding prorated credit for the entire TIN that is in proportion to the percentage of the TIN that is a patient-centered medical home or comparable specialty. For example, for one practice site that is a patient-centered medical home out of five sites under the same TIN, this practice would receive 20 percent of the 100 percent credit for the performance category score, and eligible clinicians in the other four sites within the TIN

would need to demonstrate other improvement activities. Although MIPS eligible clinicians may choose to receive full credit by reporting as an individual clinician, one commenter noted that this is not a reasonable alternative due to the complexity and burden required to do so as part of a large multi-specialty group. This commenter suggested that before proceeding with this policy, CMS should determine an alternative that allows a portion of a group under one TIN to report as a separate subgroup on measures and activities that are more applicable to that subgroup. This commenter suggested that alternatively, CMS could incorporate thresholds into improvement activities, consider a variety of thresholds (for example, clinicians participating, target population included, entire practice included, etc.) and adjust the thresholds based on the type of improvement activity. Another commenter suggested that CMS equate this threshold with the credit received, giving the example that if 70 percent of NPIs within a TIN are performing an improvement activity, then that group should get 70 percent credit toward that improvement activity score. Commenters suggested that this addresses the possibility of a decline in further improvement once the set threshold is achieved.

*Response:* We disagree with the commenters who oppose increasing the threshold to 50 percent of the group practice sites to receive patient-centered medical home designation. Currently, only one practice site in a TIN with multiple practice sites is required for full credit as a patient-centered medical home. We recognized that the transition year was the first time MIPS eligible clinicians or groups would be measured on the quality improvement work on a national scale. Therefore, we approached the improvement activities performance category with these principles in mind along with the overarching principle for the MIPS program that we are building a process that will have increasingly more stringent requirements over time. We noted in the CY 2017 Quality Payment Program final rule (81 FR 77188 through 77189) that the baseline requirements that would continue to have more stringent requirements in future years, and that we were laying the groundwork for expansion towards continuous improvement over time. We recognized that quality improvement is a critical aspect of improving the health of individuals and the health care delivery system overall. We have provided great flexibility during the transition year and believe it is time to increase this

threshold to encourage TINs to increase their number of patient-centered medical homes. We do not believe that only one MIPS eligible clinician should represent the entire group going forward; and accordingly, do not believe one MIPS eligible clinician's patient-centered medical home status should qualify the entire group to receive the maximum improvement activity performance category score (15 points) toward their final score beyond the transition year. In addition, as discussed in our proposal above, we determined that a 50 percent threshold would be appropriate, because we believe it is an achievable goal and it is supported by a study of physician-owned primary care groups in a recent *Annals of Family Medicine* article, in which nearly all groups of varying sizes in this study (sampled with variation in size and geographic area) have 50 percent or more of the practice sites within a group being an NCQA patient-centered medical home.

In response to the commenters who believed that the proposed threshold may interfere with their ability to report participation in an improvement activity that may be unique to their specialty group, if those specialty groups decided to use patient-centered medical home recognition as their credit for the improvement activities performance category, those specialty groups would not be able to report on improvement activities unique to their specialties. We refer commenters to our proposal above where we state that if the group is unable to meet the 50 percent threshold, then the individual MIPS eligible clinicians may choose to receive full credit as a recognized or certified patient-centered medical home, or comparable specialty practice, as an individual for all performance categories (82 FR 30054). To emphasize this point, specialty clinicians could either be recognized as a comparable specialty practice under the patient-centered medical home designation, which would reflect the specialty care they provide, or they could report on improvement activities that may be unique to their specialty group as individual reporters. Therefore, we do not believe that setting the patient-centered medical home threshold at 50 percent would interfere with a group's ability to report other specialty specific improvement activities. We believe that the suggestion that we use a threshold of 2 or more practice sites, instead of 50 percent might discourage large medical groups from investing in patient-centered medical home transformation more broadly, because many large

medical groups may have ten practice sites, and having only 2 sites recognized as patient-centered medical homes would mean a very different investment for a practice with 3 sites than it would for a practice with 30 sites. We also disagree that a threshold of 33 percent is appropriate, because the literature (Casalino, et al., 2016), as cited in our proposal, demonstrated that a 50 percent target is achievable and we have seen a subset of large, multi-specialty medical groups from across the country that have already surpassed this target. We also believe that finalizing a proportion lower than 50 percent of practice sites would unfairly discredit practices that have greater integration and required a significant investment. In addition, using a pro-rated approach as suggested by a commenter brings significant added complexity and burden, for which we do not believe outweighs the benefits.

*Comment:* Several commenters indicated that large multispecialty practices, such as academic medical centers, have a large number of specialists; therefore, it is unlikely that 50 percent of the practice sites under their TIN would be recognized as medical homes. Commenters cautioned that excluding these medical homes from getting credit while other practices get full credit is likely to discourage practice locations from seeking this designation.

*Response:* Regarding commenters who suggested that large multispecialty practices, such as academic medical centers with a large number of specialists would be unlikely to have 50 percent of the practice sites under their TIN recognized as medical homes, we want to raise the threshold to encourage greater transition such that there a meaningful investment in transforming their practice sites. Having 50 percent of their sites being recognized as patient-centered medical homes represents a significant investment toward practice transformation that is achievable and supported by the literature. As cited in our proposal (Casalino, et al., 2016), studies have demonstrated that a 50 percent target is achievable and we have seen a subset of large, multi-specialty medical groups from across the country that have already surpassed this target. In addition, if an academic medical center has numerous sites, and only one is a patient-centered medical home, we do not believe that represent the same degree of investment in practice transformation as a TIN with 50 percent or more of the practice sites being recognized medical homes, because because having only 2 sites recognized as patient-centered medical homes

would mean a very different investment for a practice with 3 sites than it would for a practice with 30 sites.

*Comment:* Another commenter suggested that CMS use the CMS Study on Burden Associated with Quality Reporting that is discussed in section II.C.6.e.(9) of this final rule with comment period to solicit input from stakeholders about how to assess thresholds of participation, score practices on performance, and assess improvement.

*Response:* As discussed in the CY 2017 Quality Payment Program final rule (81 FR 77195) the CMS Study on Burden Associated with Quality Reporting goals are to see whether there will be improved outcomes, reduced burden in reporting, and enhancements in clinical care by selected MIPS eligible clinicians desiring:

- A more data driven approach to quality measurement.
- Measure selection unconstrained by a CEHRT program or system.
- Improving data quality submitted to CMS.
- Enabling CMS get data more frequently and provide feedback more often.

We do not believe the CMS Study on Burden Associated with Quality Reporting is the appropriate vehicle to assess thresholds of participation, score practices on performance, and assess improvement. We will, however, take these comments into consideration as we craft future policies.

*Comment:* One commenter requested that CMS more clearly define the term “practice” used in the CY 2018 Quality Payment proposed rule (82 FR 30054) and clarify, for example, whether “practice” means a physical location where services are delivered or the administrative address, among other things, and urged CMS to define this term in a way that includes as many individual MIPS eligible clinicians as possible.

*Response:* In the CY 2018 Quality Payment Program proposed rule (82 FR 30054), we proposed to revise § 414.1380(b)(3)(x) to provide that for the 2020 MIPS payment year and future years, to receive full credit as a certified or recognized patient-centered medical home or comparable specialty practice, at least 50 percent of the practice sites within the TIN must be recognized as a patient-centered medical home or comparable specialty practice. However, we note again that we intended to add § 414.1380(b)(3)(x) as a new provision, not revise it. This was an inadvertent typographical error. We interpret commenter to be referring to our use of the term “practice sites” and we agree

with the commenter that defining this term will reduce ambiguity. In response, we are clarifying in this final rule that a practice site is the physical location where services are delivered. We are operationalizing this definition by using the practice address field within the Provider Enrollment, Chain and Ownership System (PECOS). We believe this definition is generally acceptable in the medical community as a whole, because physical practice locations are a common way for primary care to be organized.

*Comment:* One commenter stated that the intent of MACRA was to give all practices recognized as a patient-centered medical home or comparable specialty full credit in the improvement activities performance category and that the proposed threshold is not consistent with the intent of Congress.

*Response:* We disagree with the commenter that our proposal is contrary to the intent of Congress. Section 1848(q)(5)(C)(i) of the Act specifies that a MIPS eligible clinician or group that is certified or recognized as a patient-centered medical home or comparable specialty practice, as determined by the Secretary, must be given the highest potential score for the improvement activities performance category for the performance period. We believe the statute gives the Secretary discretion to determine what qualifies as a certified or recognized patient-centered medical home or comparable specialty practice. We have provided the utmost flexibility by allowing any undesignated practices to receive full credit simply by virtue of being in a TIN with one designated practice. As discussed in the CY 2017 Quality Payment Program final rule (81 FR 30054) for the transition year, that practices may receive a patient-centered medical home designation at a practice level, and that individual TINs may be composed of both undesignated practices and practices that have received a designation as a patient-centered medical home (for example, only one practice site has received patient-centered medical home designation in a TIN that includes five practice sites). In addition, we finalized an expanded definition of what is acceptable for recognition as a certified patient-centered medical home or comparable specialty practice (81 FR 77180). We refer readers to § 414.1380(3)(iv) for details. We recognized a MIPS eligible clinician or group as being a certified patient-centered medical home or comparable specialty practice if they have achieved certification or accreditation as such from a national program, or they have achieved certification or accreditation as

such from a regional or state program, private payer or other body that certifies at least 500 or more practices for patient-centered medical home accreditation or comparable specialty practice certification (81 FR 77180). Examples of nationally recognized accredited patient-centered medical homes are: (1) The Accreditation Association for Ambulatory Health Care; (2) the National Committee for Quality Assurance (NCQA) Patient-Centered Medical Home; (3) The Joint Commission Designation; or (4) the Utilization Review Accreditation Commission (URAC) (81 FR 77180). We finalized that the criteria for being a nationally recognized accredited patient-centered medical home are that it must be national in scope and must have evidence of being used by a large number of medical organizations as the model for their patient-centered medical home (81 FR 77180). We also provided full credit for the improvement activities performance category for a MIPS eligible clinician or group that has received certification or accreditation as a patient-centered medical home or comparable specialty practice from a national program or from a regional or state program, private payer or other body that administers patient-centered medical home accreditation and certifies 500 or more practices for patient-centered medical home accreditation or comparable specialty practice certification (81 FR 77180). Once a MIPS eligible clinician or group is certified or recognized as a patient-centered medical home or comparable specialty practice, those clinicians or groups are given the full improvement activities score (for example, 40 points) (81 FR 77180). This policy specifically applies to MIPS eligible groups; individual MIPS eligible clinicians may still attest that their practice is part of a patient-centered medical home or comparable specialty practice as established for the transition year in the CY 2017 Quality Payment Program final rule (81 FR 77189).

**Final Action:** After consideration of the public comments received, we are finalizing our proposals with clarification. Specifically, we are finalizing that for the 2020 MIPS payment year and future years, to receive full credit as a certified or recognized patient-centered medical home or comparable specialty practice, at least 50 percent of the practice sites within the TIN must be recognized as a patient-centered medical home or comparable specialty practice. We are clarifying that a practice site as is the physical location where services are

delivered. We are also finalizing to add § 414.1380(b)(3)(x) to reflect these changes.

(A) CPC+

In the CY 2018 Quality Payment Program proposed rule (82 FR 30054) we stated that we have determined that the Comprehensive Primary Care Plus (CPC+) APM design satisfies the requirements to be designated as a medical home model, as defined in § 414.1305; and therefore, as defined at 81 FR 77178 that states that patient-centered medical homes will be recognized if it is a nationally recognized accredited patient-centered medical home, a Medicaid Medical Home Model, or a Medical Home Model, CPC+ APM is also a certified or recognized patient-centered medical home for purposes of the improvement activities performance category. We have also determined that the CPC+ APM meets the criteria to be an Advanced APM. We refer readers to [https://qpp.cms.gov/docs/QPP\\_Advanced\\_APMs\\_in\\_2017.pdf](https://qpp.cms.gov/docs/QPP_Advanced_APMs_in_2017.pdf) for more information. Participating CPC+ practices in the Model must adopt, at a minimum, the certified health IT needed to meet the certified EHR technology (CEHRT) definition at § 414.1305. In addition, participating CPC+ practices receive payments for covered professional services based on quality measures comparable to those used in the quality performance category of MIPS, and they bear more than a nominal amount of financial risk for monetary losses as described at § 414.1415.

We recognized the possibility that certain practices that applied to participate in Round 2 of the CPC+ APM, but were not chosen to participate in the model, could potentially be randomized into a CPC+ control group. The control group practices would meet all of the same eligibility requirements as the CPC+ participating practices (also known as the “intervention group”) but the control group would not “participate” in the APM (for example, undertake the CPC+ care delivery activities such as providing 24/7 clinician access, or empanel attributed Medicare beneficiaries) or receive any of the CPC+ payments. In the CY 2018 Quality Payment Program proposed rule (82 FR 30015), we discussed that we believe MIPS eligible clinicians, who are participating in the CPC+ APM, whether actively in the intervention group or as part of the control group, should therefore receive full credit for the improvement activities performance category.

Accordingly, in the CY 2018 Quality Payment Program proposed rule (82 FR 30054 through 30055), we proposed that MIPS eligible clinicians in practices randomized to the control group in the CPC+ APM would receive full credit as a medical home model, and therefore, a certified patient-centered medical home, for the improvement activities performance category. In other words, MIPS eligible clinicians who attest that they are in practices that have been randomized to the control group in the CPC+ APM would receive full credit for the improvement activities performance category for each performance period in which they are on the Practitioner Roster, the official list of eligible clinicians participating in a practice in the CPC+ control group (82 FR 30054 through 30055).

We invited public comment on our proposal. The following is a summary of public comments received on this proposal and our response.

**Comment:** Several commenters stated that they support recognizing CPC+ control group participants as participating in a medical home model and receiving full credit for the improvement activities performance category. The commenters noted that the focus of these practices should be on developing a balance in primary care and specialty care focused high-weight improvement activities. One commenter stated that the requirements of CPC+ are such that there would be a guarantee that participants are carrying out true practice improvement activities focused on patient-centered care.

**Response:** We thank commenters for their support. As an update, CMS has not randomized any practices that will begin participation in CPC+ in 2018 into a control group. Because we have not randomized any practices into a control group in CPC+ Round 2, we are not finalizing our proposal.

**Final Action:** After consideration of the public comments we received and developments in the CPC+ Model, we are not finalizing our proposal as discussed above.

(c) Required Period of Time for Performing an Activity

In the CY 2017 Quality Payment Program final rule (81 FR 77186), we specified at § 414.1360 that MIPS eligible clinicians or groups must perform improvement activities for at least 90 consecutive days during the performance period for improvement activities performance category credit. Activities, where applicable, may be continuing (that is, could have started prior to the performance period and are continuing) or be adopted in the

performance period as long as an activity is being performed for at least 90 days during the performance period. In the CY 2018 Quality Payment Program proposed rule (82 FR 30055), we did not propose any changes to the required period of time for performing an activity for the improvement activities performance category in the proposed rule. We also refer readers to section II.C.4.d. of this final rule with comment period, where we are finalizing to generally apply our group policies to virtual groups.

We received many comments on this topic and will take them into consideration for future rulemaking.

#### (4) Application of Improvement Activities to Non-Patient Facing Individual MIPS Eligible Clinicians and Groups

In the CY 2017 Quality Payment Program final rule (81 FR 77187), we specified at § 414.1380(b)(3)(vii) that for non-patient facing individual MIPS eligible clinicians or groups, to achieve the highest score one high-weighted or two medium-weighted improvement activities are required. For these individual MIPS eligible clinicians and groups, in order to achieve one-half of the highest score, one medium-weighted improvement activity is required (81 FR 77187). In the CY 2018 Quality Payment Program proposed rule (82 FR 30055), we did not propose any changes to the application of improvement activities to non-patient facing individual MIPS eligible clinicians and groups for the improvement activities performance category.

We received a few comments on this topic and will take them into consideration for future rulemaking.

#### (5) Special Consideration for Small, Rural, or Health Professional Shortage Areas Practices

In the CY 2017 Quality Payment Program final rule (81 FR 77188), we finalized at § 414.1380(b)(3)(vii) that one high-weighted or two medium-weighted improvement activities are required for individual MIPS eligible clinicians and groups that are small practices or located in rural areas, or geographic HPSAs, to achieve full credit. In addition, we specified at § 414.1305 that a rural area means ZIP codes designated as rural, using the most recent HRSA Area Health Resource File data set available (81 FR 77012). Lastly, in the CY 2017 Quality Payment Program final rule (81 FR 77539 through 77540), we codified the following definitions at § 414.1305: (1) Small practices is defined to mean practices consisting of 15 or eligible clinicians; and (2) Health

Professional Shortage Areas (HPSA) refers to areas as designated under section 332(a)(1)(A) of the Public Health Service Act. In the CY 2018 Quality Payment Program proposed rule (82 FR 30055), we did not propose any changes to the special consideration for small, rural, or health professional shortage areas practices for the improvement activities performance category in the proposed rule.

We received many comments on this topic and will take them into consideration for future rulemaking.

#### (6) Improvement Activities Subcategories

In the CY 2017 Quality Payment Program final rule (81 FR 77190), we finalized at § 414.1365 that the improvement activities performance category will include the subcategories of activities provided at section 1848(q)(2)(B)(iii) of the Act. In addition, we finalized (81 FR 77190) at § 414.1365 the following additional subcategories: Achieving Health Equity; Integrated Behavioral and Mental Health; and Emergency Preparedness and Response. In the CY 2018 Quality Payment Program proposed rule (82 FR 30055), we did not propose any changes to the improvement activities subcategories for the improvement activities performance category in the proposed rule.

We received a few comments on this topic and will take them into consideration for future rulemaking.

#### (7) Improvement Activities Inventory

We refer readers to Table H in the Appendix of the CY 2017 Quality Payment Program final rule (81 FR 77817) for our previously finalized Improvement Activities Inventory for the transition year of MIPS and future years. In this final rule with comment period, we are finalizing updates to the Improvement Activities Inventory, formalizing the process for adding new improvement activities to the Improvement Activities Inventory, and finalizing the criteria for nominating new improvement activities. These are discussed in detail below.

##### (a) Annual Call for Activities Process for Adding New Activities

###### (i) Transition Year

As discussed in the CY 2017 Quality Payment Program final rule (81 FR 77190), for the transition year of MIPS, we implemented the initial Improvement Activities Inventory and took several steps to ensure it was inclusive of activities in line with statutory and program requirements. Prior to selecting the improvement activities, we conducted background

research. We interviewed high performing organizations of all sizes, conducted an environmental scan to identify existing models, activities, or measures that met all or part of the improvement activities performance category requirements, including the patient-centered medical homes, the Transforming Clinical Practice Initiative (TCPI), CAHPS surveys, and AHRQ's Patient Safety Organizations (81 FR 77190). In addition, we reviewed comments from the CY 2016 PFS final rule with comment period (80 FR 70886), and those received in response to the MIPS and APMs RFI published in the October 1, 2015 **Federal Register** (80 FR 59102, 59106 through 59107) regarding the improvement activities performance category. The Improvement Activities Inventory finalized in the CY 2017 Quality Payment Program final rule (81 FR 77817 through 77831) in Table H of the Appendix, for the transition year and future years, was compiled as a result of the stakeholder input, an environmental scan, the MIPS and APMs RFI comments, and subsequent working sessions with AHRQ and ONC and additional communications with CDC, SAMHSA, and HRSA.

###### (ii) Year 2

For the Quality Payment Program Year 2, we provided an informal process for submitting new improvement activities for potential inclusion in the comprehensive Improvement Activities Inventory for the Quality Payment Program Year 2 and future years through subregulatory guidance ([https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/Annual-Call-for-Measures-and-Activities-for-MIPS\\_Overview-Factsheet.pdf](https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/Annual-Call-for-Measures-and-Activities-for-MIPS_Overview-Factsheet.pdf)). As part of this informal process, we solicited and received input from various MIPS eligible clinicians and organizations suggesting possible new activities via a nomination form that was posted on the CMS Web site at <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/CallForMeasures.html>. These nominations were vetted by an internal CMS review panel that conferred with other federal partners. New activities or modifications to existing activities were proposed in the CY 2018 Quality Payment Program proposed rule (82 FR 30479 through 30500) Improvement Activities Inventory in Tables F and G of the Appendix for Year 2 of the MIPS program. We refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77817 through 77831) in

Table H of the Appendix, for the transition year and future years and Tables F and G of the Appendix of this final rule with comment period for our finalized Improvement Activities Inventory for Year 2 and future years of MIPS.

(iii) Year 3 and Future Years

For the Quality Payment Program Year 3 and future years, in the CY 2018 Quality Payment Program proposed rule (82 FR 30055), we proposed to formalize an Annual Call for Activities process for adding possible new activities or providing modifications to the current activities in the Improvement Activities Inventory. We believe this is a way to engage eligible clinician organizations and other relevant stakeholders, including beneficiaries, in the identification and submission of improvement activities for consideration. Specifically, we proposed that individual MIPS eligible clinicians or groups and other relevant stakeholders may recommend activities for potential inclusion in the Improvement Activities Inventory via a similar nomination form that was utilized in the Year 2 of MIPS informal Annual Call for Activities found on the Quality Payment Program Web site at [www.qpp.cms.gov](http://www.qpp.cms.gov), as discussed above. As part of this formalized process, individual MIPS eligible clinicians, groups, and other relevant stakeholders would be able to nominate new improvement activities that we may consider adding to the Improvement Activities Inventory. Individual MIPS eligible clinicians and groups and relevant stakeholders would be required to provide an explanation, via the nomination form, of how the improvement activity meets all the relevant criteria proposed in the CY 2018 Quality Payment Program proposed rule (82 FR 30055 through 30056) and finalized below in section II.C.6.e.(7)(b) of this final rule with comment period.

We refer readers to the Improvement Activities Inventory in Tables F and G of the Appendix of this final rule with comment period where we are finalizing new activities and changes to existing activities, some with modification. We invited public comment on our proposal to formalize the Annual Call for Activities process for the Quality Payment Program Year 3 and future years.

*Comment:* Several commenters supported the proposal to formalize an Annual Call for Activities process to facilitate the solicitation of new improvement activities. The commenters supported CMS's criteria

for improvement activities that continue to follow the priorities of the National Quality Strategy. In addition, other commenters noted that the addition of new improvement activities creates more opportunity for clinicians to select a suite of activities that further a particular improvement goal, rather than choosing several discrete activities, which together may not move the practice toward transformation. Several commenters supported the inclusion of improvement activities that demonstrate the delivery of patient and family centered care.

*Response:* We thank the commenters for their support.

*Comment:* One commenter suggested that quality and practice transformation standards such as the National Committee for Quality Assurance (NCQA) patient-centered medical home recognition should be the basis for reporting and validating improvement activities.

*Response:* We are considering the standards for reporting and validation, given that each national accrediting organization has different reporting requirements and utilizes different standards to evaluate their respective patient-centered medical home recognition programs. Although the AHRQ patient-centered medical home definition (<https://pcmh.ahrq.gov/page/defining-pcmh>) identified national accrediting organizations' patient-centered medical home models which align around recognized functions, their standards and activities for evaluation of each element may be different. Likewise, the data collected and maintained by each accrediting organization may be updated during different time frames and assess or evaluate performance elements using different methodologies, presenting challenges to standardizing validation that would need to be addressed through further research. We are evaluating the technical feasibility of having an external entity report and potentially validate improvement activities in the future. We refer readers to the Quality Payment Program Web site Resource Library at <https://qpp.cms.gov/> (MIPS Data Validation Criteria), which provides the current expected data validation information.

*Comment:* Some commenters also encouraged CMS to ensure that accepted improvement activities are aligned with measures for the other performance categories.

*Response:* We agree that it is important to create a program in which the performance categories are aligned as much as possible. We will continue to identify those improvement activities

that are also eligible for the advancing care information performance category in the Improvement Activities Inventory. We encourage stakeholders to submit new improvement activities and modifications to existing improvement activities that help to align performance categories through the Annual Call for Activities.

*Comment:* Commenters also encouraged CMS to ensure that the process is transparent, urged CMS to continue to be flexible and include as many proposed improvement activities on the final list as possible, and urged CMS to create more explicit inclusion criteria, which would further streamline the process of hospitals identifying the broader activity to which the discrete activity belongs. A few commenters expressed concern that improvement activities that were submitted were not accepted and urged CMS to be more transparent in the manner in which they make decisions about: (1) Which improvement activities are included and not included in the inventory, and (2) the weighting of improvement activities. In addition, they urged CMS to provide additional rationale to submitters when their recommended improvement activities are not accepted and engage specialists and non-specialists equally to select improvement activities for inclusion in the Inventory.

*Response:* As we have developed the Improvement Activity Inventory, we have strived to be flexible and have accepted as many improvement activities as possible that are appropriate. As we work to further develop the Annual Call for Activities process, we intend to be as transparent as feasible. In the CY 2017 Quality Payment final rule (81 FR 77190), we discussed some guidelines by which improvement activities are selected based on a set of criteria. We note that the Annual Call for Activities that was held in Year 2 for improvement activities that will be applicable for the 2018 performance period, was an informal process. We formally proposed criteria in the CY 2018 QPP proposed rule (82 FR 30055 through 30056) and are finalizing them in section II.C.6.e.(7)(b) of this final rule with comment period. We refer readers to section II.C.6.e.(7)(b) of this final rule with comment period.

We will take the commenters' feedback into consideration as we work to refine the Annual Call for Activities process for future years.

*Comment:* Another commenter recommended that CMS prioritize additional modifications to existing improvement activities and adopt new

improvement activities on a more gradual basis.

*Response:* We do not disagree that we should prioritize modifications to the current improvement activities over new improvement activities as we believe they are both valuable. We must balance burden with including a sufficient number and variety of improvement activities in the Inventory so that all MIPS eligible clinician and groups have relevant activities to select. However, we are mindful of adopting new activities gradually; the Improvement Activities Inventory has not grown by more than 20 percent for the 2018 performance period.

*Comment:* Several commenters supported the addition of improvement activities for hospitals, but recommended that CMS work with partners, clinicians, researchers, and other stakeholders to develop a broad set of activities to fill existing gaps in the program. Some commenters expressed concern that the Inventory is too heavily focused on primary care and urged us to work closely with specialty societies to solicit and develop additional improvement activities.

*Response:* We consistently engage a variety of groups within different specialties via webinars and listening sessions to get improvement activity feedback. We do not agree that the Improvement Activities Inventory is primary care focused as there are many activities specialists may perform. As discussed in the CY 2017 Quality Payment Program final rule (82 FR 77190), we wanted to create a broad list of activities that can be used by multiple practice types to demonstrate improvement activities and activities that may lend themselves to being measured for improvement in future years. We took several steps to ensure the initial improvement activities inventory is inclusive of activities in line with the statutory language. We had numerous interviews with highly performing organizations of all sizes, conducted an environmental scan to identify existing models, activities, or measures that met all or part of the improvement activities performance category. We also encourage specialties to submit new improvement activities and modifications to existing improvement activities through the Annual Call for Activities.

*Comment:* Several commenters noted that it would make more sense to reorganize and augment the Improvement Activities Inventory to align explicitly with the requirements in MIPS, and for APMs. Several commenters believed that improvement activities should be developed and

added that would support a practice's capacity to analyze its own quality data and be prepared to share downside risk in order to participate in an APM. The commenters encouraged CMS to align the thresholds and reporting requirements across performance categories for any of these overlapping activities, in order to reduce burden.

*Response:* Section 1848(q)(2)(B)(iii) of the Act specified subcategories improvement activities. However, we are working to ensure that improvement activities align across the performance categories and must balance burden with including a sufficient number and variety of improvement activities in the Inventory so that all MIPS eligible clinician and groups have relevant activities to select, and in particular for clinicians who do not participate in APMs as we do not want to the Inventory to be exclusive to any one group. We encourage stakeholders to submit new improvement activities and modifications to existing improvement activities through the Annual Call for Activities.

*Comment:* One commenter encouraged CMS to specify improvement activities for which a participant can use application programming interfaces (APIs) to receive another advancing care information bonus point. The commenter noted that doing so would further incentivize clinicians to utilize the API functionality for health information sharing with beneficiaries as part of patient engagement and care coordination activities.

*Response:* We will take the commenter's suggestions for specifying improvement activities that are eligible for a bonus in the advancing care information performance category into consideration in future rulemaking. We note that in the CY 2017 Quality Payment Program final rule (81 FR 77182), we finalized a policy to allow MIPS eligible clinicians to achieve a bonus in the advancing care information performance category when they use functions included in CEHRT to complete eligible activities from the improvement activities inventory, and codified at § 414.1380 that we would provide a designation indicating which activities qualify for the advancing care information bonus finalized. In addition, we refer readers to section II.E.5.g. of this final rule with comment period for details on how improvement activities using CEHRT relate to the objectives and measures of the advancing care information and improvement activities performance categories. We acknowledge the commenters additional suggestions and

note that in addition to those functions included under the CEHRT definition, we advised in the CY 2017 Quality Payment Program final rule (81 FR 77199) that we may consider including additional ONC certified health IT capabilities as part of activities within the improvement activities inventory in future years. However, we are not making any changes to our current approach for allowing MIPS eligible clinicians to achieve a bonus in the advancing care performance category in this final rule with comment period.

*Comment:* Some commenters encouraged CMS to consider the role of digital technologies in improving care and including related activities as part of continual improvement activities for future consideration. Some commenters supported the inclusion of telehealth-related improvement activities in the Inventory and suggested that these be high-weighted activities. A few commenters recommended that improvement activities that are registry-focused be assigned a high-weight, or alternatively, that CMS allow eligible clinicians who participate in a registry and meet certain basic requirements to receive the maximum score in this performance category.

*Response:* We acknowledge commenters' suggestions for considering digital technologies and telehealth in improvement activities and their weighting in the Improvement Activities Inventory. We note that we have reserved high weighting for activities that directly address areas with the greatest impact on beneficiary care, safety, health, and well-being, as explained in the CY 2017 Quality Payment Program final rule (81 FR 77194). We are not making any changes to this approach in this final rule with comment period; however, we will take these commenters' suggestions into consideration for future rulemaking. We also encourage stakeholders to submit activities for consideration during our formal Annual Call for Activities finalized in this final rule with comment period, as suggestions regarding improvement activity type, and content will be taken into consideration as part of that process. Finally, we do not agree that clinicians who participate in a registry and meet certain basic requirements should receive the maximum improvement activities score at this time, as we do not have sufficient data to determine what basic requirements might be sufficient to merit full credit, or what impact such an approach would have across MIPS eligible clinicians and groups.

*Comment:* One commenter noted that some of the proposed activities exclude

clinicians who are not physicians from participation, and advised us to be mindful of this going forward.

*Response:* We believe that this comprehensive Improvement Activities Inventory includes a broad range of activities that can be used by multiple clinician and practice types to demonstrate improvement activities and activities that may lend themselves to being measured for improvement in future years. We will take this concern into consideration, however, as we craft future policy, and we encourage stakeholders to submit new activities or suggestions for modifications to existing activities for consideration during our Annual Call for Activities.

*Comment:* One commenter urged CMS to accept input from stakeholders regarding the weighting of several activities already included in the inventory that are resource intensive and currently have a medium weighting, and reconsider the weighting of these activities.

*Response:* We refer the commenter and readers to Tables F and G in the Appendices of this final rule with comment period where we received public input on the weighting of a number of existing improvement activities. We previously stated that we believe high weighting should be used for activities that directly address areas with the greatest impact on beneficiary care, safety, health, and well-being, as explained in the CY 2017 Quality Payment Program final rule (81 FR 77194). While we are not making any changes to this approach in this final rule with comment period, we will take the commenter's suggestions into consideration for future rulemaking. We also encourage commenter to submit new improvement activities, or recommendations for modifications to existing activities (including weighting) to us for consideration during the Annual Call for Activities.

*Comment:* Several commenters proposed additional concepts for improvement activities for the Quality Payment Program Year 2, including improvement activities that address participation in self-assessment or ongoing learning activities; improving access to care; engaging patients and families in practice governance; using telehealth for patient interactions; and collaborating and data-sharing with Regional Health Improvement Networks. Several comments were received requesting various new improvement activities for inclusion in the Improvement Activities Inventory.

*Response:* We thank the commenters for their suggestions. While the informal process for the nominating

improvement activities for MIPS Year 2 is now closed, we encourage stakeholders to submit new improvement activities and modifications to existing improvement activities through the upcoming Annual Call for Activities.

*Final Action:* After consideration of the public comments we received, we are finalizing our proposal, as proposed, to formalize the Annual Call for Activities process for Quality Payment Program Year 3 and future years, as discussed in this final rule with comment period.

(b) Criteria for Nominating New Improvement Activities for the Annual Call for Activities

In the CY 2017 Quality Payment final rule (81 FR 77190), we discussed guidelines for the selection of improvement activities. In the CY 2018 Quality Payment Program proposed rule (82 FR 30055 and 30485), we formally proposed that for the Quality Payment Program Year 3 and future years, that stakeholders would apply one or more of the following criteria when submitting improvement activities in response to the proposed formal Annual Call for Activities. We intend to also use these criteria in selecting improvement activities for inclusion in the program.

- Relevance to an existing improvement activities subcategory (or a proposed new subcategory);
- Importance of an activity toward achieving improved beneficiary health outcome;
- Importance of an activity that could lead to improvement in practice to reduce health care disparities;
- Aligned with patient-centered medical homes;
- Activities that may be considered for an advancing care information bonus;
- Representative of activities that multiple individual MIPS eligible clinicians or groups could perform (for example, primary care, specialty care);
- Feasible to implement, recognizing importance in minimizing burden, especially for small practices, practices in rural areas, or in areas designated as geographic HPSAs by HRSA;
- Evidence supports that an activity has a high probability of contributing to improved beneficiary health outcomes; or
- CMS is able to validate the activity.

We also noted in our proposal that in future rulemaking, activities that overlap with other performance categories may be proposed to be included if such activities support the key goals of the program.

We invited public comment on our proposal. The following is a summary of the public comments received on the "Criteria for Nominating New Improvement Activities for the Annual Call for Activities" proposals and our responses.

*Comment:* Several commenters provided suggested additional selection criteria: (1) Improvement activities should focus on meaningful activities from the person and family's point of view, not structural processes that do not improve clinical care; and (2) there should be consideration for adding new activities that focus on identifying and supporting the patient's family or personal caregiver. A few commenters requested that CMS expand the definition of eligible activities to include "actions that reduce barriers to care," and to include interpretation and transportation services explicitly.

*Response:* We acknowledge commenters' suggestions for additional criteria, and in response to these comments, we are expanding the proposed criteria to also include: (1) Improvement activities that focus on meaningful actions from the person and family's point of view; and (2) improvement activities that support the patient's family or personal caregiver. We believe these are appropriate to add, because they closely align with one of our MIPS strategic goals, to use a patient-centered approach to program development that leads to better, smarter, and healthier care.

In addition, we currently include several activities in the Improvement Activities Inventory that address barriers to care, such as IA\_CC\_16, Primary Care Physician and Behavioral Health Bilateral Electronic Exchange of Information for Shared Patients, which rewards primary care and behavioral health practices using the same electronic health record system for shared patients or for exchanging information bilaterally and IA\_PM\_18 Provide Clinical-Community Linkages, which rewards MIPS eligible clinicians engaging community health workers to provide a comprehensive link to community resources through family-based services focusing on success in health, education, and self-sufficiency. However, we will consider criteria that address "actions that reduce barriers to care" and those that identify interpretation and transportation services as we craft future policies.

*Final Action:* After consideration of the public comments received, we are finalizing with modification, for the Quality Payment Program Year 3 and future years, that stakeholders should apply one or more of the criteria when

submitting improvement activities in response to the Annual Call for Activities. In addition to the criteria listed in the proposed rule for nominating new improvement activities for the Annual Call for Activities policy we are modifying and expanding the proposed criteria list to also include: (1) Improvement activities that focus on meaningful actions from the person and family's point of view, and (2) improvement activities that support the patient's family or personal caregiver. The finalized list of criteria for submitting improvement activities in response to the Annual Call for Activities is as follows:

- Relevance to an existing improvement activities subcategory (or a proposed new subcategory);
- Importance of an activity toward achieving improved beneficiary health outcome;
- Importance of an activity that could lead to improvement in practice to reduce health care disparities;
- Aligned with patient-centered medical homes;
- Focus on meaningful actions from the person and family's point of view;
- Support the patient's family or personal caregiver;
- Activities that may be considered for an advancing care information bonus;
- Representative of activities that multiple individual MIPS eligible clinicians or groups could perform (for example, primary care, specialty care);
- Feasible to implement, recognizing importance in minimizing burden, especially for small practices, practices in rural areas, or in areas designated as geographic HPSAs by HRSA;
- Evidence supports that an activity has a high probability of contributing to improved beneficiary health outcomes; or
- CMS is able to validate the activity.

(c) Submission Timeline for Nominating New Improvement Activities for the Annual Call for Activities

During the informal process, we accepted nominations from February 16 through February 28, 2017. For the Quality Payment Program Year 2, we provided an informal process for submitting new improvement activities for potential inclusion in the comprehensive Improvement Activities Inventory for the Quality Payment Program Year 2 and future years through subregulatory guidance ([https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/Annual-Call-for-Measures-and-Activities-for-MIPS\\_Overview-Factsheet.pdf](https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/Annual-Call-for-Measures-and-Activities-for-MIPS_Overview-Factsheet.pdf)). As part

of this informal process, we solicited and received input from various MIPS eligible clinicians and organizations suggesting possible new activities via a nomination form that was posted on the CMS Web site at <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/CallForMeasures.html>.

It is our intention that the nomination and acceptance process for improvement activities, to the best extent possible, parallel the Annual Call for Measures process that is already conducted for MIPS quality measures. We refer readers to the CY 2017 Quality Payment Program final rule (81 FR 77147 through 77153) and section II.C.6.c.(1) of this final rule with comment period for more information. Therefore, aligned with this process, in the CY 2018 Quality Payment Program proposed rule (82 FR 30056), we proposed to accept submissions for prospective improvement activities at any time during the performance period for the Annual Call for Activities and create an Improvement Activities Under Review (IAUR) list which will be displayed on a CMS Web site. For example, the CY 2019 performance period spans January 1, 2019 through December 31, 2019, therefore, the submission period for CY 2019 prospective improvement activities would be March 2, 2017 through March 1, 2018. When submissions are received after the March 1 deadline then that submission will be included in the next performance period activities cycle. We will consider the IAUR list we make decisions on which improvement activities to include in a future Improvement Activities Inventory. We will analyze the IAUR list while considering the criteria for inclusion of improvement activities as finalized in section II.C.6.e.(7)(b) of this final rule with comment period.

In addition, in the CY 2018 Quality Payment Program proposed rule (82 FR 30056), we proposed that for the formal Annual Call for Activities, only activities submitted by March 1 would be considered for inclusion in the Improvement Activities Inventory for the performance periods occurring in the following calendar year. In other words, we will accept improvement activities at any time throughout the year, however, we will only consider those improvement activities that are received by the March 1 deadline for the following performance period. This proposal was slightly different than the Call for Measures timeline. The Annual Call for Measures requires a 2-year implementation timeline, because the measures being considered for inclusion

in MIPS undergo the pre-rulemaking process with review by the Measures Application Partnership (MAP) (81 FR 77153). In order to decrease the timeframe for activity implementation, we did not propose that improvement activities also undergo MAP review. Our intention is that while we will accept improvement activities at any time throughout the year, we will close the Annual Call for Activities submissions by March 1 before the applicable performance period, which would enable us to propose the new improvement activities for adoption in the same year's rulemaking cycle for implementation in the following year. When submissions are received after the March 1 deadline then that submission will be included in the next performance period activities cycle. For example, an improvement activity submitted to the IAUR prior to March 1, 2018 could be considered for performance periods beginning in 2019. If an improvement activity submission is submitted April 1, 2018 then the submission could be considered for performance periods beginning in 2020.

In addition, in the CY 2018 Quality Payment Program proposed rule (82 FR 30056), we proposed that we would add new improvement activities to the inventory through notice-and-comment rulemaking.

We invited public comment on our proposals.

*Final Action:* We did not receive any public comments on these proposals. Therefore, we are finalizing our proposals, as proposed, to: (1) Accept submissions for prospective improvement activities at any time during the performance period for the Annual Call for Activities and create an Improvement Activities under Review (IAUR) list; (2) only consider prospective activities submitted by March 1 for inclusion in the Improvement Activities Inventory for the performance periods occurring in the following calendar year; and (3) add new improvement activities to the inventory through notice-and-comment rulemaking.

(8) Removal of Improvement Activities

In future years, we anticipate developing a process and establishing criteria for identifying activities for removal from the Improvement Activities Inventory through the Annual Call for Activities process. We anticipate proposing these requirements in the future through notice-and-comment rulemaking. In the CY 2018 Quality Payment Program proposed rule (82 FR 30056), we invited public comments on what criteria should be

used to identify improvement activities for removal from the Improvement Activities Inventory.

We received a few comments on this topic and will take them into consideration for future rulemaking.

#### (9) Approach for Adding New Subcategories

In the CY 2017 Quality Payment Program final rule (81 FR 77197), we finalized the following criteria for adding a new subcategory to the improvement activities performance category:

- The new subcategory represents an area that could highlight improved beneficiary health outcomes, patient engagement and safety based on evidence.
- The new subcategory has a designated number of activities that meet the criteria for an improvement activity and cannot be classified under the existing subcategories.
- Newly identified subcategories would contribute to improvement in patient care practices or improvement in performance on quality measures and cost performance categories.

In the CY 2018 Quality Payment Program proposed rule at (82 FR 30056), while we did not propose any changes to the approach for adding new subcategories for the improvement activities performance category, we did propose that in future years of the Quality Payment Program, we would add new improvement activities subcategories through notice-and-comment rulemaking. We did not receive any comments on this proposal and are finalizing, as proposed, that in future years of the Quality Payment Program, we will add new improvement activities subcategories through notice-and-comment rulemaking.

In the CY 2018 Quality Payment Program proposed rule at (82 FR 30056), we also sought comments on new improvement activities subcategories for future consideration. In particular, in the CY 2017 Quality Payment Program final rule (81 FR 77194), several stakeholders have suggested that a separate subcategory for improvement activities specifically related to health IT would make it easier for MIPS eligible clinicians and vendors to understand and earn points toward their final score through the use of health IT. Such a health IT subcategory could include only improvement activities that are specifically related to the advancing care information performance category measures and allow MIPS eligible clinicians to earn credit in the improvement activities performance category, while receiving a bonus in the

advancing care information performance category as well. In the CY 2018 Quality Payment Program proposed rule (82 FR 30056), we sought suggestions on how a health IT subcategory within the improvement activities performance category could be structured to provide MIPS eligible clinicians with flexible opportunities to gain experience in using CEHRT and other health IT to improve their practice.

We received many comments on this topic and will take these into consideration for future rulemaking.

#### (10) CMS Study on Burdens Associated With Reporting Quality Measures

##### (a) Background

In the CY 2017 Quality Payment Program final rule (81 FR 77195), we finalized specifics regarding the CMS Study on Improvement Activities and Measurement including the study purpose, study participation credit and requirements, and the study procedure. In the CY 2018 Quality Payment Program proposed rule (82 FR 30056), we proposed to modify the name of the study to the “CMS Study on Burdens Associated with Reporting Quality Measures” to more accurately reflect the purpose of the study. The study assesses clinician burden and data submission errors associated with the collection and submission of clinician quality measures for MIPS, enrolling groups of different sizes and individuals in both rural and non-rural settings and also different specialties. We previously finalized that study participants receive full credit in the improvement activities performance category if they successfully elect, participate, and submit data to CMS for the full calendar year (81 FR 77196). In the CY 2017 final rule (81 FR 77195 through 77197), we requested comments on the study and received generally supportive feedback for the study.

In the CY 2018 Quality Payment Program proposed rule (82 FR 30056 through 30057), we did not propose any changes to the study purpose. However, we proposed changes to the study participation credit and requirements for sample size, how the study sample is categorized into groups, and the study procedures for the frequency of surveys, focus groups, and quality data submission. These proposals are discussed in more detail below.

##### (b) Sample Size

In addition to performing descriptive statistics to compare the trends in errors and burden between study years 2017 and 2018 as previously finalized in the (81 FR 77196), we would like to perform

a more rigorous statistical analysis with the 2018 data, which will require a larger sample size. Therefore, in the CY 2018 Quality Payment Program proposed rule (82 FR 30056), we proposed increasing the sample size for CY 2018 and beyond to provide the minimum sample needed to get a significant result with adequate power; that is, we proposed increasing the number of the study participants to provide the minimum needed to make a meaningful and factual conclusion out of the study. This is described in more detail below. The sample size, as finalized in the CY 2017 Quality Payment Program final rule (81 FR 77196), for performance periods occurring in CY 2017 consisted of 42 MIPS groups as stated by MIPS criteria from the following seven categories:

- 10 urban individual or groups of <3 eligible clinicians.
- 10 rural individual or groups of <3 eligible clinicians.
- 10 groups of 3–8 eligible clinicians.
- 5 groups of 8–20 eligible clinicians.
- 3 groups of 20–100 eligible clinicians.
- 2 groups of 100 or greater eligible clinicians.
- 2 specialty groups.

In the CY 2018 Quality Payment Program proposed rule (82 FR 30057), we proposed to increase the sample size for the performance periods occurring in CY 2018 to a minimum of:

- 20 urban individual or groups of <3 eligible clinicians,—(broken down into 10 individuals and 10 groups).
- 20 rural individual or groups of <3 eligible clinicians,—(broken down into 10 individuals and 10 groups).
- 10 groups of 3–8 eligible clinicians.
- 10 groups of 8–20 eligible clinicians.
- 10 groups of 20–100 eligible clinicians.
- 10 groups of 100 or greater eligible clinicians.
- 6 groups of >20 eligible clinicians reporting as individuals—(broken down into 3 urban and 3 rural).
- 6 specialty groups—(broken down into 3 reporting individually and 3 reporting as a group).
- Up to 10 non-MIPS eligible clinicians reporting as a group or individual (any number of individuals and any group size).

##### (c) Study Procedures

###### (i) Frequency of Survey and Focus Group

In the CY 2018 Quality Payment Program proposed rule (82 FR 30057), we also proposed changes to the study procedures. In the CY 2017 Quality

Payment Program final rule (81 FR 77196), we finalized that for transition year of MIPS, study participants were required to attend a monthly focus group to share lessons learned in submitting quality data along with providing survey feedback to monitor effectiveness. However, an individual MIPS eligible clinician or group who chooses to report all 6 measures within a period of 90 days may not need to be a part of all of the focus groups and survey sessions after their first focus group and survey following the measurement data submission (81 FR 77196). This is because they may have nothing new to contribute in terms of discussion of errors or clinician burdens (81 FR 77196). This also applied to MIPS eligible clinicians that submitted only three MIPS measures within the performance period, if all three measures within the 90-day period or at one submission (81 FR 77196). We finalized that all study participants would participate in surveys and focus group meetings at least once after each measures data submission (81 FR 77196). For those who elect to report data for a 90-day period, we made further engagement optional (81 FR 77196).

In order to prevent or reduce study participants from incurring any more significant additional administrative work as compared to other MIPS eligible clinicians not participating in the study, in the CY 2018 Quality Payment Program proposed rule (82 FR 30057), we proposed that for Quality Payment Program Year 2 and future years, that study participants would be required to attend as frequently as four monthly surveys and focus group sessions throughout the year, but certain study participants would be able to attend less frequently. In other words, study participants would be required to attend a maximum of four surveys and focus group sessions throughout the year.

#### (ii) Data Submission

We previously required study measurement data to be collected at baseline and then at every 3 months (quarterly basis) afterwards for the duration of the calendar year (81 FR 77196). We also finalized a minimum requirement of three MIPS quality measures, four times within the year (81 FR 77196). We stated that we believe this is inconsistent with clinicians reporting a full year's data, as we believe some study participants may choose to submit data for all measures at one time, or alternatively, may choose to submit data up to six times during the 1-year period (82 FR 30057).

As a result, in the CY 2018 Quality Payment Program proposed rule (82 FR 30057), we proposed, for the Quality Payment Program Year 2 and future years, to offer study participants flexibility in their submissions such that they could submit all their quality measures data at once, as allowed in the MIPS program, and participate in study surveys and focus groups, while still earning improvement activities credit.

We invited public comments on our proposals.

*Comment:* A few commenters supported the proposal to examine the challenges and costs of reporting quality measures by expanding, and aptly renaming the “CMS Study on Burdens Associated with Reporting Quality Measures.”

*Response:* We thank the commenters for their support.

*Comment:* A few commenters encouraged CMS to automate the process to reduce administrative burden and publicly share the survey results.

*Response:* We note the suggestion to automate the process (that is, the measure data submission process) to reduce administrative burden, and will take this into consideration as we craft future policies. We also note that the current study survey and focus group have open ended questions that ask study participants about their recommendations and opinions on the ease and complexities of technology on the process. Furthermore, we intend to make the results of the study public immediately after the end of the study year CY 2018 (summer 2019) to all study participants, relevant stakeholders, and on the CMS Web site.

*Comment:* A few commenters suggested that CMS consider additional study inclusion factors, such as: Practices and clinicians located in both urban and rural HPSAs and clinicians who serve a high proportion of low-income patients and patients of color.

*Response:* The study selection criteria already includes; but is not limited to, rural, urban and geographical location (based on demographic characteristics) (81 FR 77195). For study years CY 2017 and CY 2018, we are able to analyze and compare clinicians who serve at both rural and urban HPSAs, based on participant's zip codes collected during recruitment. Additionally, we will consider for future rulemaking further efforts to include proportionate HPSAs and minority patients in the recruitment and screening of the study participants.

*Final Action:* After consideration of the public comments we received, we are finalizing our proposals for the CY 2018 and beyond as proposed, to: (1) Modify the name of the study to the

“CMS Study on Burdens Associated with Reporting Quality Measures;” (2) increase the sample size for CY 2018 and beyond as discussed previously in this final rule with comment period; (3) require study participants to attend as frequently as four monthly surveys and focus group sessions throughout the year; and (4) for the Quality Payment Program Year 2 and future years, offer study participants flexibility in their submissions such that they can submit all their quality measures data at once and participate in study surveys and focus groups while still earning improvement activities credit.

It must be noted that although the aforementioned activities constitute an information collection request as defined in the implementing regulations of the Paperwork Reduction Act (PRA) of 1995 (5 CFR 1320), the associated burden is exempt from application of the Paperwork Reduction Act. Specifically, section 1848(s)(7) of the Act, as added by section 102 of the MACRA (Pub. L. 114–10) states that Chapter 35 of title 44, United States Code, shall not apply to the collection of information for the development of quality measures. Our goals for new measures are to develop new high quality, low cost measures that are meaningful, easily understandable and operable, that also, reliably and validly measure what they purport. This study shall inform us on the root causes of clinicians' performance measure data collection and data submission burdens and challenges that hinders accurate and timely quality measurement activities. In addition, this study will inform us on the characteristic attributes that our new measures must possess to be able to accurately capture and measure the priorities and gaps MACRA aims for, as described in the Quality Measures Development Plan.<sup>2</sup> This study, therefore, serves as the initial stage of developing new measures and also adapting existing measures. We believe that understanding clinician's challenges and skepticisms, and especially, understanding the factors that undermine the optimal functioning and effectiveness of quality measures are requisites of developing measures that are not only measuring what it purports but also that are user friendly and understandable for frontline clinicians—our main stakeholders in measure development. This will lead to the creation of practice-derived, tested measures that reduces burden and create a culture of continuous improvement in measure development.

f. Advancing Care Information Performance Category

(1) Background

Section 1848(q)(2)(A) of the Act includes the meaningful use of CEHRT as a performance category under the MIPS. We refer to this performance category as the advancing care information performance category, and it is reported by MIPS eligible clinicians as part of the overall MIPS program. As required by sections 1848(q)(2) and (5) of the Act, the four performance categories of the MIPS shall be used in determining the MIPS final score for each MIPS eligible clinician. In general, MIPS eligible clinicians will be evaluated under all four of the MIPS performance categories, including the advancing care information performance category.

(2) Scoring

Section 1848(q)(5)(E)(i)(IV) of the Act states that 25 percent of the MIPS final score shall be based on performance for the advancing care information performance category. We established at § 414.1380(b)(4) that the score for the advancing care information performance category would be comprised of a base score, performance score, and potential bonus points for reporting on certain measures and activities. For further explanation of our scoring policies for the advancing care information performance category, we refer readers to 81 FR 77216–77227.

(a) Base Score

For the CY 2018 performance period, we did not propose any changes to the base score methodology as established in the CY 2017 Quality Payment Program final rule (81 FR 77217–77223).

(b) Performance Score

In the CY 2017 Quality Payment Program final rule (81 FR 77223 through 77226), we finalized that MIPS eligible clinicians can earn 10 percentage points in the performance score for meeting the Immunization Registry Reporting Measure. We proposed to modify our policy for scoring the Public Health and Clinical Data Registry Reporting Objective beginning with the performance period in CY 2018 because we have learned that there are areas of the country where immunization registries are not available, and we did not intend to disadvantage MIPS eligible clinicians practicing in those areas. We proposed if a MIPS eligible clinician fulfills the Immunization Registry Reporting Measure, the MIPS eligible clinician would earn 10 percentage points in the performance score. If a

MIPS eligible clinician cannot fulfill the Immunization Registry Reporting Measure, we proposed that the MIPS eligible clinician could earn 5 percentage points in the performance score for each public health agency or clinical data registry to which the clinician reports for the following measures, up to a maximum of 10 percentage points: Syndromic Surveillance Reporting; Electronic Case Reporting; Public Health Registry Reporting; and Clinical Data Registry Reporting. A MIPS eligible clinician who chooses to report to more than one public health agency or clinical data registry may receive credit in the performance score for the submission to more than one agency or registry; however, the MIPS eligible clinician would not earn more than a total of 10 percentage points for such reporting.

We further proposed similar flexibility for MIPS eligible clinicians who choose to report the measures specified for the Public Health Reporting Objective of the 2018 Advancing Care Information Transition Objective and Measure set. (In section II.C.6.f.(6)(b) of the proposed rule, we proposed to allow MIPS eligible clinicians to report using the 2018 Advancing Care Information Transition Objectives and Measures in 2018.) We proposed if a MIPS eligible clinician fulfills the Immunization Registry Reporting Measure, the MIPS eligible clinician would earn 10 percentage points in the performance score. If a MIPS eligible clinician cannot fulfill the Immunization Registry Reporting Measure, we proposed that the MIPS eligible clinician could earn 5 percentage points in the performance score for each public health agency or specialized registry to which the clinician reports for the following measures, up to a maximum of 10 percentage points: Syndromic Surveillance Reporting; Specialized Registry Reporting. A MIPS eligible clinician who chooses to report to more than one specialized registry or public health agency to submit syndromic surveillance data may earn 5 percentage points in the performance score for reporting to each one, up to a maximum of 10 percentage points.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Commenters supported the flexibility that we proposed to complete the objective and earn points in the performance score. Other commenters stated that they appreciate the options for earning a performance score. Most commenters appreciated our intent not to disadvantage those clinicians without

access to immunization registries; however, they stated our proposal to award 5 percentage points for reporting to each additional public health agency or clinical data registry minimized the value of reporting to other types of public health information beyond immunization information. Commenters suggested that we award 10 percentage points in the performance score for reporting to a single agency or registry.

*Response:* We appreciate the suggestion and did not intend to disadvantage MIPS eligible clinicians who lack access to immunization registries or do not administer immunizations. The Public Health and Clinical Data Registry Reporting Objective focuses on the importance of the ongoing lines of communication that should exist between MIPS eligible clinicians and public health agencies and clinical data registries, and we want to encourage reporting to them. These registries play an important part in monitoring the health status of patients and some, for example syndromic surveillance registries, help in the early detection of outbreaks, which is critical to public health overall. For these reasons, we are finalizing our proposal with modification so that a MIPS eligible clinician may earn 10 percentage points in the performance score for reporting to any single public health agency or clinical data registry, regardless of whether an immunization registry is available to the clinician.

*Comment:* One commenter requested that we clarify that the exclusion for Immunization Registry Reporting is still available to those who do not routinely provide vaccinations.

*Response:* No exclusion is available for the Immunization Registry Reporting Measure for the advancing care information performance category. The Immunization Registry Reporting Measure is part of the performance score in which clinicians can select which measures they wish to report. If they do not provide vaccinations, then they would not report on the Immunization Registry Reporting Measure. The final policy we are adopting should provide flexibility for clinicians who do not administer immunizations by allowing them to earn performance score points for public health reporting that is not related to immunizations.

*Final Action:* After consideration of the public comments and for the reasons noted above, we are finalizing our proposal with modification. Rather than awarding 5 percentage points in the performance score for each public health agency or clinical data registry that a MIPS eligible clinician reports to (for a maximum of 10 percentage

points), we are finalizing that a MIPS eligible clinician may earn 10 percentage points in the performance score for reporting to any single public health agency or clinical data registry to meet any of the measures associated with the Public Health and Clinical Data Registry Reporting Objective (or any of the measures associated with the Public Health Reporting Objective of the 2018 Advancing Care Information Transition Objectives and Measures, for clinicians who choose to report on those measures), regardless of whether an immunization registry is available to the clinician. A MIPS eligible clinician can earn only 10 percentage points in the performance score under this policy, no matter how many agencies or registries they report to. This policy will apply beginning with the 2018 performance period.

(c) Bonus Score

In the CY 2017 Quality Payment Program final rule (81 FR 77220 through 77226), for the Public Health and Clinical Data Registry Reporting Objective and the Public Health Reporting Objective, we finalized that MIPS eligible clinicians who report to one or more public health agencies or clinical data registries beyond the Immunization Registry Reporting Measure will earn a bonus score of 5 percentage points in the advancing care information performance category. Based on our proposals discussed above to allow MIPS eligible clinicians who cannot fulfill the Immunization Registry Reporting Measure to earn additional points in the performance score, we proposed to modify this policy so that MIPS eligible clinicians cannot earn points in both the performance score and bonus score for reporting to the same public health agency or clinical data registry. We proposed to modify our policy beginning with the performance period in CY 2018. We proposed that a MIPS eligible clinician may earn the bonus score of 5 percentage points for reporting to at least one additional public health agency or clinical data registry that is different from the agency/agencies or registry/or registries to which the MIPS eligible clinician reports to earn a performance score. A MIPS eligible clinician would not receive credit under both the performance score and bonus score for reporting to the same agency or registry.

We proposed that for the Advancing Care Information Objectives and Measures, a bonus of 5 percentage points would be awarded if the MIPS eligible clinician reports “yes” for any one of the following measures

associated with the Public Health and Clinical Data Registry Reporting Objective: Syndromic Surveillance Reporting; Electronic Case Reporting; Public Health Registry Reporting; or Clinical Data Registry Reporting. We proposed that for the 2018 Advancing Care Information Transition Objectives and Measures, a bonus of 5 percent would be awarded if the MIPS eligible clinician reports “yes” for any one of the following measures associated with the Public Health Reporting Objective: Syndromic Surveillance Reporting or Specialized Registry Reporting. We proposed that to earn the bonus score, the MIPS eligible clinician must be in active engagement with one or more additional public health agencies or clinical data registries that is/are different from the agency or registry that they identified to earn a performance score.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Commenters supported the awarding of bonus points for reporting to an additional agency or registry. A commenter supported providing bonus points for registry reporting rather than mandating registry reporting.

*Response:* We appreciate the support for our proposal.

*Comment:* One commenter requested that we make it explicitly clear that MIPS eligible clinicians cannot earn a bonus score for reporting to the same agency or registry that they identified for the purposes of earning a performance score.

*Response:* Under our final policy discussed above, MIPS eligible clinicians may report to a single public health or clinical data registry and earn 10 percentage points in the performance score. Reporting to a different public health or clinical data registry may earn the MIPS eligible clinician five percentage points in the bonus score. In order to earn the bonus score, the MIPS eligible clinician must be in active engagement with a different public health agency or clinical data registry than the one to which they reported to earn the 10 percentage points for the performance score. We expect to engage in education and outreach efforts to ensure MIPS eligible clinicians are aware of the policies adopted in this final rule with comment period including the policy for earning bonus points for the advancing care information performance category.

*Comment:* One commenter supported closing the loophole so that a MIPS eligible clinician cannot receive double credit under both the performance score

and bonus score for reporting to the same agency or registry.

*Response:* We appreciate the support for our proposal. As we proposed, MIPS eligible clinician cannot receive credit under both the performance score and bonus score for reporting to the same public health agency or registry.

*Final Action:* After consideration of the public comments that we received, we are adopting our proposal as proposed and updating the regulation text at § 414.1380(b)(4)(C)(1).

(d) Improvement Activities Bonus Score under the Advancing Care Information Performance Category

In the CY 2017 Quality Payment Program final rule (81 FR 77202), we discussed our approach to the measurement of the use of health IT to allow MIPS eligible clinicians and groups the flexibility to implement health IT in a way that supports their clinical needs. Toward that end, we adopted a policy to award a bonus score to MIPS eligible clinicians who use CEHRT to complete certain activities in the improvement activities performance category based on our belief that the use of CEHRT in carrying out these activities could further the outcomes of clinical practice improvement.

We adopted a final policy to award a 10 percent bonus for the advancing care information performance category if a MIPS eligible clinician attests to completing at least one of the improvement activities we have specified using CEHRT (81 FR 77209). We referred readers to Table 8 in the CY 2017 Quality Payment Program final rule (81 FR 77202–77209) for a list of the improvement activities eligible for the advancing care information performance category bonus. We proposed to expand this policy beginning with the CY 2018 performance period by identifying additional improvement activities in Table 6 (82 FR 30060–30063) that would be eligible for the advancing care information performance category bonus score if they are completed using CEHRT functionality.

The following is a summary of the public comments received on this proposal and our responses:

*Comment:* One commenter supported rewarding clinicians who used CEHRT to perform improvement activities. Other commenters appreciated the proposed additions to the list of improvement activities using CEHRT that would be eligible for the bonus.

*Response:* We appreciate the support as we continue to believe that offering this bonus will encourage MIPS eligible clinicians to use CEHRT not only to

document patient care, but also to improve their clinical practices by using CEHRT in a meaningful manner that supports clinical practice improvement. We refer readers to Table 6 which lists all improvement activities eligible for the advancing care information performance category improvement activity bonus in 2018.

*Comment:* One commenter recommended that MIPS eligible clinicians and groups that attest to completing one or more of the improvement activities using CEHRT should not only earn improvement activity credit but also automatically

earn the base score for the advancing care information performance category, amounting to 50 percent of the advancing care information performance category.

*Response:* We appreciate the commenter's input and continue to be interested in options for incentivizing clinicians to use CEHRT in the completion of improvement activities. We will take this comment under consideration for future rulemaking on this topic.

*Final Action:* After consideration of the public comments, we are finalizing with modifications the list of

improvement activities shown in Table 6 that will be eligible for the advancing care information performance category bonus score beginning with the 2018 performance period if they are completed using CEHRT. We refer readers to Table F: New Improvement Activities for the Quality Payment Program Year 2 and Future Years and Table G: Improvement Activities with Changes for the Quality Payment Program Year 2 and Future Years for more information on modifications to the Improvement Activities that were proposed.

TABLE 6—IMPROVEMENT ACTIVITIES ELIGIBLE FOR THE ADVANCING CARE INFORMATION PERFORMANCE CATEGORY BONUS BEGINNING WITH THE 2018 PERFORMANCE PERIOD

Improvement activity performance category subcategory	Activity name	Activity	Improvement activity performance category weight	Related advancing care information measure(s) *
Expanded Practice Access ..	Provide 24/7 access to eligible clinicians or groups who have real-time access to patient's medical record.	Provide 24/7 access to MIPS eligible clinicians, groups, or care teams for advice about urgent and emergent care (for example, MIPS eligible clinician and care team access to CEHRT, cross-coverage with access to CEHRT, or protocol-driven nurse line with access to CEHRT) that could include one or more of the following: <ul style="list-style-type: none"> <li>Expanded hours in evenings and weekends with access to the patient medical record (for example, coordinate with small practices to provide alternate hour office visits and urgent care);</li> <li>Use of alternatives to increase access to care team by MIPS eligible clinicians and groups, such as e-visits, phone visits, group visits, home visits and alternate locations (for example, senior centers and assisted living centers); and/or</li> <li>Provision of same-day or next-day access to a consistent MIPS eligible clinician, group or care team when needed for urgent care or transition management.</li> </ul>	Medium .....	Provide Patient Access. Secure Messaging. Send A Summary of Care. Request/Accept Summary of Care.
Patient Safety and Practice Assessment.	Communication of Un-scheduled Visit for Adverse Drug Event and Nature of Event.	A MIPS eligible clinician providing unscheduled care (such as an emergency room, urgent care, or other unplanned encounter) attests that, for greater than 75 percent of case visits that result from a clinically significant adverse drug event, the MIPS eligible clinician transmits information, including through the use of CEHRT to the patient's primary care clinician regarding both the unscheduled visit and the nature of the adverse drug event within 48 hours. A clinically significant adverse event is defined as a medication-related harm or injury such as side-effects, supratherapeutic effects, allergic reactions, laboratory abnormalities, or medication errors requiring urgent/emergent evaluation, treatment, or hospitalization.	Medium .....	Secure Messaging. Send A Summary of Care. Request/Accept Summary of Care.
Patient Safety and Practice Assessment.	Consulting AUC using clinical decision support when ordering advanced diagnostic imaging.	Clinicians attest that they are consulting specified applicable AUC through a qualified clinical decision support mechanism for all applicable imaging services furnished in an applicable setting, paid for under an applicable payment system, and ordered on or after January 1, 2018. This activity is for clinicians that are early adopters of the Medicare AUC program (2018 performance year) and for clinicians that begin the Medicare AUC program in future years as specified in our regulation at §414.94. The AUC program is required under section 218 of the Protecting Access to Medicare Act of 2014. Qualified mechanisms will be able to provide a report to the ordering clinician that can be used to assess patterns of image-ordering and improve upon those patterns to ensure that patients are receiving the most appropriate imaging for their individual condition.	High .....	Clinical Decision Support (CEHRT function only).
Patient Safety and Practice Assessment.	Cost Display for Laboratory and Radiographic Orders.	Implementation of a cost display for laboratory and radiographic orders, such as costs that can be obtained through the Medicare clinical laboratory fee schedule.	Medium .....	Clinical Decision Support (CEHRT function only).

TABLE 6—IMPROVEMENT ACTIVITIES ELIGIBLE FOR THE ADVANCING CARE INFORMATION PERFORMANCE CATEGORY BONUS BEGINNING WITH THE 2018 PERFORMANCE PERIOD—Continued

Improvement activity performance category subcategory	Activity name	Activity	Improvement activity performance category weight	Related advancing care information measure(s) *
Population Management .....	Glycemic Screening Services.	For at-risk outpatient Medicare beneficiaries, individual MIPS eligible clinicians and groups must attest to implementation of systematic preventive approaches in clinical practice for at least 60 percent for the 2018 performance period and 75 percent in future years, of CEHRT with documentation of screening patients for abnormal blood glucose according to current U.S. Preventive Services Task Force (USPSTF) and/or American Diabetes Association (ADA) guidelines.	Medium .....	Patient-Specific Education. Patient Generated Health Data or Data from Non-clinical Settings.
Population Management .....	Glycemic management services.	<p>For outpatient Medicare beneficiaries with diabetes and who are prescribed antidiabetic agents (for example, insulin, sulfonylureas), MIPS eligible clinicians and groups must attest to having:</p> <p>For the first performance period, at least 60 percent of medical records with documentation of an individualized glycemic treatment goal that:</p> <ul style="list-style-type: none"> <li>○ Takes into account patient-specific factors, including, at least (1) age, (2) comorbidities, and (3) risk for hypoglycemia, and</li> <li>○ Is reassessed at least annually.</li> </ul> <p>The performance threshold will increase to 75 percent for the second performance period and onward.</p> <p>Clinicians would attest that, 60 percent for first year, or 75 percent for the second year, of their medical records that document individualized glycemic treatment represent patients who are being treated for at least 90 days during the performance period.</p>	High .....	Patient Generated Health Data. Clinical Information Reconciliation. Clinical Decision Support, CCDS, Family Health History (CEHRT functions only).
Population Management .....	Glycemic Referring Services.	For at-risk outpatient Medicare beneficiaries, individual MIPS eligible clinicians and groups must attest to implementation of systematic preventive approaches in clinical practice for at least 60 percent for the CY 2018 performance period and 75 percent in future years, of CEHRT with documentation of referring eligible patients with prediabetes to a CDC-recognized diabetes prevention program operating under the framework of the National Diabetes Prevention Program.	Medium .....	Patient-Specific Education. Patient Generated Health Data or Data from Non-clinical Settings.
Population Management .....	Anticoagulant management improvements.	<p>Individual MIPS eligible clinicians and groups who prescribe oral Vitamin K antagonist therapy (warfarin) must attest that, for 60 percent of practice patients in the transition year and 75 percent of practice patients in Quality Payment Program Year 2 and future years, their ambulatory care patients receiving warfarin are being managed by one or more of the following improvement activities:</p> <ul style="list-style-type: none"> <li>• Patients are being managed by an anticoagulant management service, that involves systematic and coordinated care, incorporating comprehensive patient education, systematic prothrombin time (PT-INR) testing, tracking, follow-up, and patient communication of results and dosing decisions;</li> <li>• Patients are being managed according to validated electronic decision support and clinical management tools that involve systematic and coordinated care, incorporating comprehensive patient education, systematic PT-INR testing, tracking, follow-up, and patient communication of results and dosing decisions;</li> <li>• For rural or remote patients, patients are managed using remote monitoring or telehealth options that involve systematic and coordinated care, incorporating comprehensive patient education, systematic PT-INR testing, tracking, follow-up, and patient communication of results and dosing decisions; and/or</li> <li>• For patients who demonstrate motivation, competency, and adherence, patients are managed using either a patient self-testing (PST) or patient-self-management (PSM) program.</li> </ul>	High .....	Provide Patient Access. Patient-Specific Education. View, Download, Transmit. Secure Messaging. Patient Generated Health Data or Data from Non-Clinical Setting. Send a Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation Exchange. Clinical Decision Support (CEHRT Function Only).

TABLE 6—IMPROVEMENT ACTIVITIES ELIGIBLE FOR THE ADVANCING CARE INFORMATION PERFORMANCE CATEGORY BONUS BEGINNING WITH THE 2018 PERFORMANCE PERIOD—Continued

Improvement activity performance category subcategory	Activity name	Activity	Improvement activity performance category weight	Related advancing care information measure(s) *
Population Management .....	Provide Clinical-Community Linkages.	Engaging community health workers to provide a comprehensive link to community resources through family-based services focusing on success in health, education, and self-sufficiency. This activity supports individual MIPS eligible clinicians or groups that coordinate with primary care and other clinicians, engage and support patients, use of CEHRT, and employ quality measurement and improvement processes. An example of this community based program is the NCQA Patient-Centered Connected Care (PCCC) Recognition Program or other such programs that meet these criteria.	Medium .....	Provide Patient Access. Patient-Specific Education. Patient-Generated Health Data.
Population Management .....	Advance Care Planning .....	Implementation of practices/processes to develop advance care planning that includes: Documenting the advance care plan or living will within CEHRT, educating clinicians about advance care planning motivating them to address advance care planning needs of their patients, and how these needs can translate into quality improvement, educating clinicians on approaches and barriers to talking to patients about end-of-life and palliative care needs and ways to manage its documentation, as well as informing clinicians of the healthcare policy side of advance care planning.	Medium .....	Patient-Specific Education. Patient-Generated Health Data.
Population Management .....	Chronic care and preventative care management for empanelled patients.	Proactively manage chronic and preventive care for empanelled patients that could include one or more of the following: <ul style="list-style-type: none"> <li>• Provide patients annually with an opportunity for development and/or adjustment of an individualized plan of care as appropriate to age and health status, including health risk appraisal; gender, age and condition-specific preventive care services; plan of care for chronic conditions; and advance care planning;</li> <li>• Use condition-specific pathways for care of chronic conditions (for example, hypertension, diabetes, depression, asthma and heart failure) with evidence-based protocols to guide treatment to target;</li> <li>• Use pre-visit planning to optimize preventive care and team management of patients with chronic conditions;</li> <li>• Use panel support tools (registry functionality) to identify services due;</li> <li>• Use reminders and outreach (for example, phone calls, emails, postcards, patient portals and community health workers where available) to alert and educate patients about services due; and/or</li> <li>• Routine medication reconciliation</li> </ul>	Medium .....	Provide Patient Access. Patient-Specific Education. View, Download, Transmit. Secure Messaging. Patient Generated Health Data or Data from Non-Clinical Setting. Send A Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation. Clinical Decision Support, Family Health History (CEHRT functions only).
Population Management .....	Implementation of methodologies for improvements in longitudinal care management for high risk patients.	Provide longitudinal care management to patients at high risk for adverse health outcome or harm that could include one or more of the following: <ul style="list-style-type: none"> <li>• Use a consistent method to assign and adjust global risk status for all empaneled patients to allow risk stratification into actionable risk cohorts. Monitor the risk-stratification method and refine as necessary to improve accuracy of risk status identification;</li> <li>• Use a personalized plan of care for patients at high risk for adverse health outcome or harm, integrating patient goals, values and priorities; and/or</li> <li>• Use on-site practice-based or shared care managers to proactively monitor and coordinate care for the highest risk cohort of patients.</li> </ul>	Medium .....	Provide Patient Access. Patient-Specific Education. Patient Generated Health Data or Data from Non-clinical Settings. Send A Summary of Care. Request/Accept Summary of Care. Clinical information reconciliation. Clinical Decision Support, CCDS, Family Health History, Patient List (CEHRT functions only).
Population Management .....	Implementation of episodic care management practice.	Provide episodic care management, including management across transitions and referrals that could include one or more of the following: <ul style="list-style-type: none"> <li>• Routine and timely follow-up to hospitalizations, ED visits and stays in other institutional settings, including symptom and disease management, and medication reconciliation and management; and/or</li> <li>• Managing care intensively through new diagnoses, injuries and exacerbations of illness.</li> </ul>	Medium .....	Send A Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation.

TABLE 6—IMPROVEMENT ACTIVITIES ELIGIBLE FOR THE ADVANCING CARE INFORMATION PERFORMANCE CATEGORY BONUS BEGINNING WITH THE 2018 PERFORMANCE PERIOD—Continued

Improvement activity performance category subcategory	Activity name	Activity	Improvement activity performance category weight	Related advancing care information measure(s) *
Population Management .....	Implementation of medication management practice improvements.	Manage medications to maximize efficiency, effectiveness and safety that could include one or more of the following: <ul style="list-style-type: none"> <li>• Reconcile and coordinate medications and provide medication management across transitions of care settings and eligible clinicians or groups;</li> <li>• Integrate a pharmacist into the care team; and/or</li> <li>• Conduct periodic, structured medication reviews.</li> </ul>	Medium .....	Clinical Information Reconciliation. Clinical Decision Support, Computerized Physician Order Entry Electronic Prescribing (CEHRT functions only).
Achieving Health Equity .....	Promote use of patient-reported outcome tools.	Demonstrate performance of activities for employing patient-reported outcome (PRO) tools and corresponding collection of PRO data (e.g., use of PQH-2 or PHQ-9 and PROMIS instruments) such as patient reported Wound Quality of Life (QoL), patient reported Wound Outcome, and patient reported Nutritional Screening.	High .....	Public Health Registry Reporting. Clinical Data Registry Reporting. Patient-Generated Health Data.
Care Coordination .....	Practice Improvements that Engage Community Resources to Support Patient Health Goals.	Develop pathways to neighborhood/community-based resources to support patient health goals that could include one or more of the following: <ul style="list-style-type: none"> <li>• Maintain formal (referral) links to community-based chronic disease self-management support programs, exercise programs and other wellness resources with the potential for bidirectional flow of information and provide a guide to available community resources.</li> <li>• Including through the use of tools that facilitate electronic communication between settings;</li> <li>• Screen patients for health-harming legal needs;</li> <li>• Screen and assess patients for social needs using tools that are CEHRT enabled and that include to any extent standards-based, coded question/field for the capture of data as is feasible and available as part of such tool; and/or</li> <li>• Provide a guide to available community resources.</li> </ul>	Medium .....	Send a Summary of Care. Request/Accept Summary of Care. Patient-Generated Health Data.
Care Coordination .....	Primary Care Physician and Behavioral Health Bilateral Electronic Exchange of Information for Shared Patients.	The primary care and behavioral health practices use the same CEHRT system for shared patients or have an established bidirectional flow of primary care and behavioral health records.	Medium .....	Send a Summary of Care. Request/Accept Summary of Care.
Care Coordination .....	PSH Care Coordination .....	Participation in a Perioperative Surgical Home (PSH) that provides a patient-centered, physician-led, interdisciplinary, and team-based system of coordinated patient care, which coordinates care from pre-procedure assessment through the acute care episode, recovery, and post-acute care. This activity allows for reporting of strategies and processes related to care coordination of patients receiving surgical or procedural care within a PSH. The clinician must perform one or more of the following care coordination activities: <ul style="list-style-type: none"> <li>• Coordinate with care managers/navigators in pre-operative clinic to plan and implementation comprehensive post discharge plan of care;</li> <li>• Deploy perioperative clinic and care processes to reduce post-operative visits to emergency rooms;</li> <li>• Implement evidence-informed practices and standardize care across the entire spectrum of surgical patients; or.</li> <li>• Implement processes to ensure effective communications and education of patients' post-discharge instructions.</li> </ul>	Medium .....	Send a Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation. Health Information Exchange.
Care Coordination .....	Implementation of use of specialist reports back to referring clinician or group to close referral loop.	Performance of regular practices that include providing specialist reports back to the referring MIPS eligible clinician or group to close the referral loop or where the referring MIPS eligible clinician or group initiates regular inquiries to specialist for specialist reports which could be documented or noted in the CEHRT.	Medium .....	Send A Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation.
Care Coordination .....	Implementation of documentation improvements for developing regular individual care plans.	Implementation of practices/processes, including a discussion on care, to develop regularly updated individual care plans for at-risk patients that are shared with the beneficiary or caregiver(s). Individual care plans should include consideration of a patient's goals and priorities, as well as desired outcomes of care.	Medium .....	Secure Messaging. Send A Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation.

**TABLE 6—IMPROVEMENT ACTIVITIES ELIGIBLE FOR THE ADVANCING CARE INFORMATION PERFORMANCE CATEGORY BONUS BEGINNING WITH THE 2018 PERFORMANCE PERIOD—Continued**

Improvement activity performance category subcategory	Activity name	Activity	Improvement activity performance category weight	Related advancing care information measure(s) *
Care Coordination .....	Implementation of practices/processes for developing regular individual care plans.	Implementation of practices/processes to develop regularly updated individual care plans for at-risk patients that are shared with the beneficiary or caregiver(s).	Medium .....	Provide Patient Access (formerly Patient Access). View, Download, Transmit. Secure Messaging. Patient Generated Health Data or Data from Non-Clinical Setting.
Care Coordination .....	Practice improvements for bilateral exchange of patient information.	Ensure that there is bilateral exchange of necessary patient information to guide patient care, such as Open Notes, that could include one or more of the following: <ul style="list-style-type: none"> <li>• Participate in a Health Information Exchange if available; and/or</li> <li>• Use structured referral notes</li> </ul>	Medium .....	Send A Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation.
Beneficiary Engagement .....	Engage Patients and Families to Guide Improvement in the System of Care.	Engage patients and families to guide improvement in the system of care by leveraging digital tools for ongoing guidance and assessments outside the encounter, including the collection and use of patient data for return-to-work and patient quality of life improvement. Platforms and devices that collect patient-generated health data (PGHD) must do so with an active feedback loop, either providing PGHD in real or near-real time to the care team, or generating clinically endorsed real or near-real time automated feedback to the patient. Includes patient reported outcomes (PROs). Examples include patient engagement and outcomes tracking platforms, cellular or web-enabled bi-directional systems, and other devices that transmit clinically valid objective and subjective data back to care teams.  Because many consumer-grade devices capture PGHD (for example, wellness devices), platforms or devices eligible for this improvement activity must be, at a minimum, endorsed and offered clinically by care teams to patients to automatically send ongoing guidance (one way). Platforms and devices that additionally collect PGHD must do so with an active feedback loop, either providing PGHD in real or near-real time to the care team, or generating clinically endorsed real or near-real time automated feedback to the patient (e.g. automated patient-facing instructions based on glucometer readings). Therefore, unlike passive platforms or devices that may collect but do not transmit PGHD in real or near-real time to clinical care teams, active devices and platforms can inform the patient or the clinical care team in a timely manner of important parameters regarding a patient's status, adherence, comprehension, and indicators of clinical concern.	High .....	Patient-Generated Health Data. Provide Patient Access. View, Download, or Transmit.
Beneficiary Engagement .....	Use of CEHRT to capture patient reported outcomes.	In support of improving patient access, performing additional activities that enable capture of patient reported outcomes (for example, home blood pressure, blood glucose logs, food diaries, at-risk health factors such as tobacco or alcohol use, etc.) or patient activation measures through use of CEHRT, containing this data in a separate queue for clinician recognition and review.	Medium .....	Provide Patient Access. Patient-Specific Education. Care Coordination through Patient Engagement.
Beneficiary Engagement .....	Engagement of patients through implementation.	Access to an enhanced patient portal that provides up to date information related to relevant chronic disease health or blood pressure control, and includes interactive features allowing patients to enter health information and/or enables bidirectional communication about medication changes and adherence.	Medium .....	Provide Patient Access. Patient-Specific Education.
Beneficiary Engagement .....	Engagement of patients, family and caregivers in developing a plan of care.	Engage patients, family and caregivers in developing a plan of care and prioritizing their goals for action, documented in the CEHRT.	Medium .....	Provide Patient Access. Patient-specific Education. View, Download, Transmit (Patient Action). Secure Messaging.
Patient Safety and Practice	Use of decision support and standardized treatment protocols.	Use decision support and protocols to manage workflow in the team to meet patient needs.	Medium .....	Clinical Decision Support (CEHRT function only).

TABLE 6—IMPROVEMENT ACTIVITIES ELIGIBLE FOR THE ADVANCING CARE INFORMATION PERFORMANCE CATEGORY BONUS BEGINNING WITH THE 2018 PERFORMANCE PERIOD—Continued

Improvement activity performance category subcategory	Activity name	Activity	Improvement activity performance category weight	Related advancing care information measure(s) *
Achieving Health Equity .....	Promote Use of Patient-Reported Outcome Tools.	Demonstrate performance of activities for employing patient-reported outcome (PRO) tools and corresponding collection of PRO data such as the use of PQH-2 or PHQ-9, PROMIS instruments, patient reported Wound Quality of Life (QoL), patient reported Wound Outcome, and patient reported Nutritional Screening.	Medium .....	Patient Generated Health Data or Data from a Non-Clinical Setting. Public Health and Clinical Data Registry Reporting.
Behavioral and Mental Health.	Implementation of integrated Patient Centered Behavioral Health (PCBH) model.	Offer integrated behavioral health services to support patients with behavioral health needs, dementia, and poorly controlled chronic conditions. The services could include one or more of the following: <ul style="list-style-type: none"> <li>• Use evidence-based treatment protocols and treatment to goal where appropriate;</li> <li>• Use evidence-based screening and case finding strategies to identify individuals at risk and in need of services;</li> <li>• Ensure regular communication and coordinated workflows between eligible clinicians in primary care and behavioral health;</li> <li>• Conduct regular case reviews for at-risk or unstable patients and those who are not responding to treatment;</li> <li>• Use of a registry or certified health information technology functionality to support active care management and outreach to patients in treatment; and/or</li> <li>• Integrate behavioral health and medical care plans and facilitate integration through co-location of services when feasible; and/or</li> <li>• Participate in the National Partnership to Improve Dementia Care Initiative, which promotes a multidimensional approach that includes public reporting, state-based coalitions, research, training, and revised surveyor guidance.</li> </ul>	High .....	Provide Patient Access. Patient-Specific Education. View, Download, Transmit. Secure Messaging. Patient Generated Health Data or Data from Non-Clinical Setting. Care coordination through Patient Engagement. Send A Summary of Care.  Request/Accept Summary of Care.
Behavioral and Mental Health.	Electronic Health Record Enhancements for BH data capture.	Enhancements to CEHRT to capture additional data on behavioral health (BH) populations and use that data for additional decision-making purposes (for example, capture of additional BH data results in additional depression screening for at-risk patient not previously identified).	Medium .....	Patient Generated Health Data or Data from Non-Clinical Setting. Send A Summary of Care. Request/Accept Summary of Care. Clinical Information Reconciliation.

(3) Performance Periods for the Advancing Care Information Performance Category

In the CY 2017 Quality Payment Program final rule (81 FR 77210 through 77211), we established a performance period for the advancing care information performance category to align with the overall MIPS performance period of one full year to ensure all four performance categories are measured and scored based on the same period of time. We stated for the first and second performance periods of MIPS (CYs 2017 and 2018), we will accept a minimum of 90 consecutive days of data and encourage MIPS eligible clinicians to report data for the full year performance period. We proposed the same policy for the advancing care information performance category for the performance period in CY 2019, Quality Payment Program Year 3, and would accept a minimum of 90 consecutive days of data in CY 2019.

*Comment:* Commenters supported the continuation of a performance period of a minimum of 90 consecutive days of data in CY 2019. Some stated that maintaining the 90-day performance period for the first 3 years of MIPS is important to add stability for the reporting on the performance category. One commenter requested that we maintain the 90-day performance period for the advancing care information performance category in perpetuity as a shorter period enables physicians to adopt innovative uses of technology and permits flexibility to test new health IT solutions.

*Response:* While we believe a 90-day performance period is appropriate for advancing care information for the 2017, 2018 and 2019 performance periods, we believe it is premature to establish the performance periods for any additional years at this time. We will consider creating a 90-day performance period for 2020 and beyond and may address this issue in future rulemaking.

*Comment:* A few commenters expressed their disappointment that we proposed another 90-day performance period for 2019 and urged us to move to full calendar year reporting as soon as possible. They stated that patients and families should be able to experience the benefits of health IT—getting questions answered through secure email, or having summary of care records incorporated into new providers’ health records—any day of the year, rather than a particular three-month period.

*Response:* Although we proposed that the MIPS performance period for the advancing care information performance category would be a minimum of 90 consecutive days, MIPS eligible clinicians have the option to submit data for longer periods up to a full calendar year. Furthermore, we believe

that once the functionality in the 2015 Edition CEHRT is implemented, MIPS eligible clinicians will use it all the time.

*Final Action:* After consideration of the public comments, we are adopting our policy as proposed. We will accept a minimum of 90 consecutive days of data in CY 2019 and are revising § 414.1320(d)(1).

#### (4) Certification Requirements

In the CY 2017 Quality Payment Program final rule (81 FR 77211 through 77213), we outlined the requirements for MIPS eligible clinicians using CEHRT during the CY 2017 performance period for the advancing care information performance category as it relates to the objectives and measures they select to report, and also outlined requirements for the CY 2018 performance period. We additionally adopted a definition of CEHRT at § 414.1305 for MIPS eligible clinicians that is based on the definition that applies in the EHR Incentive Programs under § 495.4.

For the CY 2017 performance period, we adopted a policy by which MIPS eligible clinicians may use EHR technology certified to either the 2014 or 2015 Edition certification criteria, or a combination of the two. For the CY 2018 performance period, we previously stated that MIPS eligible clinicians must use EHR technology certified to the 2015 Edition to meet the objectives and measures specified for the advancing care information performance category. We received significant comments from the CY 2017 Quality Payment Program final rule and feedback from stakeholders through meetings and listening sessions requesting that we extend the use of 2014 Edition CEHRT beyond CY 2017 into CY 2018. Many commenters expressed concern over the lack of products certified to the 2015 Edition. Other commenters stated that switching from the 2014 Edition to the 2015 Edition requires a large amount of time and planning and if it is rushed there is a potential risk to patient health. Also, our experience with the transition from EHR technology certified to the 2011 Edition to EHR technology certified to the 2014 Edition did make us aware of the many issues associated with the adoption of EHR technology certified to a new Edition. These include the time that will be necessary to effectively deploy EHR technology certified to the 2015 Edition standards and certification criteria and to make the necessary patient safety, staff training, and workflow investments to be prepared to report for the advancing care information performance category

for 2018. Thus, we proposed that MIPS eligible clinicians may use EHR technology certified to either the 2014 or 2015 Edition certification criteria, or a combination of the two for the CY 2018 performance period. We proposed to amend § 414.1305 to reflect this change.

We further noted, that to encourage new participants to adopt certified health IT and to incentivize participants to upgrade their technology to 2015 Edition products which better support interoperability across the care continuum, we proposed to offer a bonus of 10 percentage points under the advancing care information performance category for MIPS eligible clinicians who report the Advancing Care Information Objectives and Measures for the performance period in CY 2018 using only 2015 Edition CEHRT. We proposed to amend § 414.1380(b)(4)(C)(3) to reflect this change. We proposed this one-time bonus for CY 2018 to support and recognize MIPS eligible clinicians and groups that invest in implementing certified EHR technology in their practice. We sought comment on the proposed bonus, the proposed amount of percentage points for the bonus, and whether the bonus should be limited to new participants in MIPS and small practices.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Most commenters supported our proposal to allow the use of 2014 Edition or 2015 Edition CEHRT or a combination for the 2018 performance period. One stated that allowing flexibility allows clinicians more time to fully evaluate their EHR optimization in a meaningful way that ensures EHR systems are in place, tested thoroughly and operating as intended. Many stated that an additional transition year would be very helpful in allowing physicians to plan for the required upgrades, which can be costly and time-consuming. A few commenters supported our proposal because they believed it would delay the requirement to report on the Advancing Care Information Objectives and Measures derived from meaningful use Stage 3 in 2018.

*Response:* We thank commenters for their feedback and support of CEHRT flexibility in 2018. We hope that allowing MIPS eligible clinicians to use 2014 Edition or 2015 Edition CEHRT or a combination of the two in 2018 will allow for a smooth transition to 2015 Edition CEHRT.

*Comment:* One commenter requested that we affirm that 2015 Edition CEHRT will be required for the 2019

performance period so that they can plan accordingly.

*Response:* Under our current policy as reflected in § 414.1305, 2015 Edition CEHRT will be required in the performance period in 2019. We believe that there are many benefits for MIPS eligible clinicians and their patients implementing the 2015 Edition of CEHRT. These include enabling health information exchange through new and enhanced certification criteria standards, as well as through implementation specifications for interoperability. The 2015 Edition also incorporates changes that are designed to spur innovation and provide more choices to health care providers and patients for the exchange of electronic health information, including new Application Programming Interface (API) certification criteria.

*Comment:* Several commenters stated their disappointment with the proposed delayed transition to 2015 Edition CEHRT as they believe that it includes significant patient-facing technologies and new functionalities to support patient engagement and improve interoperability.

*Response:* While we understand the concern, we believe that it is important to provide MIPS eligible clinicians with flexibility and more time to adopt and implement 2015 CEHRT. We recognize there is burden associated with the development and deployment of each new version of CEHRT, which may be labor intensive and expensive for clinicians so we believe the additional time will be welcomed. In addition if MIPS eligible clinicians are ready to report using the 2015 Edition, we encourage them to do so.

*Comment:* Most commenters supported our proposal to award a 10 percentage point bonus for using 2015 Edition CEHRT exclusively in 2018.

*Response:* We appreciate the support for this proposal and believe the bonus will incentivize MIPS eligible clinicians to work to implement 2015 Edition CEHRT by 2018.

*Comment:* Some commenters suggested that we offer a bonus to those MIPS eligible clinicians who use a combination of 2014 Edition and 2015 Edition CEHRT in 2018. Others suggested that the bonus be available not only in 2018 but also in 2019. Other commenters requested that the bonus be available to all MIPS eligible clinicians regardless of whether they are new to the MIPS program or not. Other commenters believed that CMS has struck an appropriate balance of minimizing the regulatory burden on clinicians not yet prepared to transition to 2015 Edition CEHRT, while

incentivizing those clinicians who have transitioned to 2015 Edition CEHRT.

*Response:* We believe it is appropriate to award the bonus only to those MIPS eligible clinicians who are able to use only the 2015 Edition of CEHRT in 2018. We understand that it is challenging to transition from the 2014 Edition to the 2015 Edition of CEHRT and wish to incentivize clinicians to complete the transition. We believe this bonus will help to incentivize participants to continue the process of upgrading from 2014 Edition to 2015 Edition, especially small practices where the investment in updated workflows and implementation may present unique challenges. We agree with commenters that the bonus should be available to all MIPS eligible clinicians who use 2015 Edition CEHRT exclusively in 2018. In addition, we intend this bonus to support and recognize the efforts to report on the Advancing Care Information Measures using EHR technology certified to the 2015 Edition, which include more robust measures using updated standards and functions which support interoperability.

*Comment:* Several commenters requested that the bonus points available for using 2015 Edition CEHRT be raised from 10 percentage points to 20 percentage points because it would provide stronger incentive for clinicians to upgrade to and implement 2015 Edition CEHRT for use in 2018, thereby expanding the availability of 2015 Edition enhancements, such as the new open APIs. A few commenters recommended that we provide a bonus of 15 percentage points. Commenters expressed concern that adding only 10 percentage points to the score for the use of 2015 Edition CEHRT is too trivial an incentive and would do little to offset the work participants must do to prepare to participate in the Quality Payment Program.

*Response:* We disagree and believe that a 10 percentage point bonus provides an adequate incentive for MIPS eligible clinicians to use 2015 Edition CEHRT exclusively for a minimum of a 90-day performance period in 2018. Additionally, the addition of this 10 percentage point bonus would bring the total bonus points available under the advancing care information performance category to 25 percentage points. We remind readers that a MIPS eligible clinician may earn a maximum score of 165 percentage points (including the 2015 Edition CEHRT bonus) for the advancing care information performance category, but all scores of 100 percentage points and higher will

receive full credit for the category (25 percentage points) in the final score.

*Comment:* One commenter did not support bonus points for clinicians that adopt 2015 Edition CEHRT in 2018 because they do not agree that 2015 Edition CEHRT enhances a physician's ability to provide higher quality care. Another commenter indicated that providing bonus points may disadvantage clinicians who have prior experience with CEHRT but are unable to fully implement the 2015 Edition due to vendor issues beyond their control.

*Response:* While we appreciate these concerns, we believe that the availability of the bonus is appropriate and we wish to incentivize clinicians to complete the transition to 2015 Edition CEHRT in 2018.

*Final Action:* After consideration of the public comments, we are adopting as proposed our proposal to allow the use of 2014 Edition or 2015 Edition CEHRT, or a combination of the two Editions, for the performance period in 2018. We will offer a one-time bonus of 10 percentage points under the advancing care information performance category for MIPS eligible clinicians who report the Advancing Care Information Objectives and Measures for the performance period in CY 2018 using only 2015 Edition CEHRT. We will not limit the bonus to new participants. We are revising §§ 414.1305 and 414.1380(b)(4) of the regulation text to reflect this policy.

#### (5) Scoring Methodology Considerations

Section 1848(q)(5)(E)(i)(IV) of the Act states that 25 percent of the MIPS final score shall be based on performance for the advancing care information performance category. Further, section 1848(q)(5)(E)(ii) of the Act, provides that in any year in which the Secretary estimates that the proportion of eligible professionals (as defined in section 1848(o)(5) of the Act) who are meaningful EHR users (as determined under section 1848(o)(2) of the Act) is 75 percent or greater, the Secretary may reduce the applicable percentage weight of the advancing care information performance category in the MIPS final score, but not below 15 percent, and increase the weightings of the other performance categories such that the total percentage points of the increase equals the total percentage points of the reduction. We noted that section 1848(o)(5) of the Act defines an eligible professional as a physician, as defined in section 1861(r) of the Act.

In CY 2017 Quality Payment Program final rule (81 FR 77226–77227), we established a final policy, for purposes of applying section 1848(q)(5)(E)(ii) of

the Act, to estimate the proportion of physicians as defined in section 1861(r) of the Act who are meaningful EHR users, as those physician MIPS eligible clinicians who earn an advancing care information performance category score of at least 75 percent for a performance period. We established that we will base this estimation on data from the relevant performance period, if we have sufficient data available from that period. We stated that we will not include in the estimation physicians for whom the advancing care information performance category is weighted at zero percent under section 1848(q)(5)(F) of the Act, which we relied on in the CY 2017 Quality Payment Program final rule (81 FR 77226 through 77227) to establish policies under which we would weigh the advancing care information performance category at zero percent of the final score. In addition, we proposed not to include in the estimation physicians for whom the advancing care information performance category would be weighted at zero percent under the proposal in section II.C.6.f.(7) of the proposed rule to implement certain provisions of the 21st Century Cures Act (that is, physicians who are determined hospital-based or ambulatory surgical center-based, or who are granted an exception based on significant hardship or decertified EHR technology).

We stated that we were considering modifications to the policy we established in last year's rulemaking to base our estimation of physicians who are meaningful EHR users for a MIPS payment year (for example, 2019) on data from the relevant performance period (for example, 2017). We stated our concern that if in future rulemaking we decide to propose to change the weight of the advancing care information performance category based on our estimation, such a change may cause confusion to MIPS eligible clinicians who are adjusting to the MIPS program and believe this performance category will make up 25 percent of the final score for the 2019 MIPS payment year. We noted the earliest we would be able to make our estimation based on 2017 data and propose in future rulemaking to change the weight of the advancing care information performance category for the 2019 MIPS payment year would be in mid-2018, as the deadline for data submission is March 31, 2018. We requested public comments on whether this timeframe is sufficient, or whether a more extended timeframe would be preferable. We proposed to modify our existing policy such that we would base our estimation

of physicians who are meaningful EHR users for a MIPS payment year on data from the performance period that occurs 4 years before the MIPS payment year.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Some commenters supported our proposal because they believed it was appropriate to allow additional time to ensure that clinicians are aware of the percentage weighting of each MIPS performance category. A few commenters stated that more certainty and advance notice will offer MIPS eligible clinicians more time to prepare and focus resources on areas of most significance.

*Response:* We thank commenters for their support and agree that additional time to determine whether the advancing care information category weight should be reduced is necessary. Once we make a determination we will communicate such a change to the percentage weighting of each of the MIPS performance categories to MIPS eligible clinicians.

*Comment:* Some commenters stated that the timeline that we proposed was not sufficient. Commenters stated that a proposal to change the weight would not be finalized until late in 2018 and would be applied to the 2019 MIPS performance period/2021 payment year which does not give clinicians sufficient time to be educated and respond to the changes in the category weights. Other commenters stated that any change to the MIPS program, specifically the possibility of a change in the weight of the advancing care information performance category, will have a domino effect on various aspects of the program, as well as within the health IT space. Based on updated category weight allocation, which would change the overall computation of a MIPS score, health IT developers will need to make adjustments to their products and software accordingly. In turn, those products must be implemented by clinicians. For product lifecycles, there needs to be at least 12 months' notice given for all parties to adequately plan and execute these changes. The proposed timeline that CMS has outlined (for performance period 2017/ payment year 2019, the earliest feedback would be in mid-2018 that would in turn effect the weight of performance period 2019/payment year 2021) would allow for notification of less than a year, and is therefore not sufficient.

*Response:* While we understand these concerns, we previously finalized our policy to base our estimation of physicians who are meaningful EHR users for a MIPS payment year on data

from the relevant performance period for the MIPS payment year. For example, for the 2019 MIPS payment year, the performance period is two years prior to the payment year, in 2017. We proposed to extend the look-back period to the performance period that occurs 4 years before the MIPS payment year, which would give additional time for MIPS eligible clinicians and health IT developers to adjust to the new weighting prior to the start of the actual performance period for the MIPS payment year. We continue to believe that this timeframe is sufficient.

*Comment:* Some commenters expressed concern with the proposal to base CMS' estimation of meaningful EHR users on data from the performance period that occurs 4 years before the MIPS payment year. According to the commenters, the 4-year look-back period is unreasonably long given the rapid pace of technology, especially given continued delays in adopting 2015 Edition technology. Commenters encouraged CMS to shorten this look-back period. Prematurely reducing the advancing care information performance category's weight could impair progress towards robust, person-centered uses of health IT.

*Response:* While we appreciate these concerns, we also believe that it is important to give MIPS eligible clinicians sufficient notice before we change the weighting of a category so that they can plan appropriately. We note that the earliest data we can use to calculate the proportion of physicians who are meaningful EHR users will be the data from the 2017 performance period, which will not be available until 2018. Under our current policy, 2018 is the earliest we would be able to propose in rulemaking to reduce and redistribute the weight of the advancing care information performance category for the 2019 MIPS payment year, based on the proportion of physicians who were meaningful EHR users during the performance period in 2017. As previously stated, we believe it is important for MIPS eligible clinicians to be aware of this reweighting prior to the relevant performance period during which they would be measured for the MIPS payment year, which is why we believe the proposed 4-year timeline is more appropriate.

*Comment:* Some commenters recommended keeping the advancing care information performance category as 25 percent of the MIPS final score in years in which 75 percent or more of physicians are meaningful EHR users. Other commenters recommended that if the weight of the advancing care information performance category is

reduced, it should not all be redistributed to the quality category. Many commenters suggested that it be redistributed to quality and improvement activities performance categories particularly for physicians for whom there are not the required number of meaningful quality measures.

*Response:* We appreciate this input. We intend to make our decision about whether to change the performance category weight based on data from the performance period that is 4 years prior to the MIPS payment year. We have not yet proposed a new weight for the advancing care information performance category or to which category or categories the points would be distributed.

*Comment:* A few commenters stated that it is too early to consider reweighting a category before any data has been received or analyzed. When reweighting is implemented, they urged CMS to ensure that clinicians are informed of the reweighting prior to the performance period. Changing the weight of a performance category retrospectively would add confusion to an already complex program.

*Response:* We have not yet proposed to reduce the weight of the performance category. We are simply establishing the timeframe for when we would decide whether to reduce and redistribute the weight.

*Comment:* Several commenters suggested that any proposed changes to the weight of the advancing care information performance category resulting from an assessment of the proportion of clinicians who are meaningful EHR users, for example, those who achieve an advancing care information performance category score of at least 75 percent, should be based on at least two to three MIPS performance periods worth of data to ensure an accurate baseline.

*Response:* We agree that this decision should be made with consideration for the reliability and validity of data, however, we disagree that it would require multiple performance periods to obtain the necessary data to make this determination. We also note that we are not proposing to base this decision on any particular year at this point in time, we are only addressing the timeframe relationship between when the data is reported and when the reweighting would take place. For example, should the data show that 75 percent or more physicians are considered meaningful users based on data submitted for the 2017 performance period, we would propose to reweight the advancing care information performance category weight in 2021 instead of 2019. We

believe this policy would allow adequate time for MIPS eligible clinicians, EHR vendors and other stakeholders to adjust to the new scoring structure prior to submitting data for the effected payment year.

*Final Action:* Based on the public comments and for the reasons discussed in the proposed rule, we are adopting our proposal as proposed. Our ability to implement this policy will be dependent on the availability of data from the performance period that occurs 4 years before the MIPS payment year.

## (6) Objectives and Measures

### (a) Advancing Care Information Objectives and Measures Specifications

We proposed to maintain for the CY 2018 performance period the Advancing Care Information Objectives and Measures as finalized in the CY 2017 Quality Payment Program final rule (81 FR 77227 through 77229). We proposed the following modifications to certain objectives and measures.

*Provide Patient Access Measure:* For at least one unique patient seen by the MIPS eligible clinician: (1) The patient (or the patient-authorized representative) is provided timely access to view online, download, and transmit his or her health information; and (2) The MIPS eligible clinician ensures the patient's health information is available for the patient (or patient-authorized representative) to access using any application of their choice that is configured to meet the technical specifications of the Application Programming Interface (API) in the MIPS eligible clinician's CEHRT.

*Proposed definition of timely:* Beginning with the 2018 performance period, we proposed to define "timely" as within 4 business days of the information being available to the MIPS eligible clinician. This definition of timely is the same as we adopted under the EHR Incentive Programs (80 FR 62815).

*Proposed change to the View, Download, Transmit (VDT) Measure:* During the performance period, at least one unique patient (or patient-authorized representatives) seen by the MIPS eligible clinician actively engages with the EHR made accessible by the MIPS eligible clinician by either (1) viewing, downloading or transmitting to a third party their health information; or (2) accessing their health information through the use of an API that can be used by applications chosen by the patient and configured to the API in the MIPS eligible clinician's CEHRT; or (3) a combination of (1) and (2). We proposed this change because we

erroneously described the actions in the measure (viewing, downloading or transmitting; or accessing through an API) as being taken by the MIPS eligible clinician rather than the patient or the patient-authorized representatives. We proposed this change would apply beginning with the performance period in 2017.

*Objective:* Health Information Exchange.

*Objective:* The MIPS eligible clinician provides a summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other health care clinician into their EHR using the functions of CEHRT.

*Proposed change to the Objective:* The MIPS eligible clinician provides a summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other health care providers into their EHR using the functions of CEHRT.

We inadvertently used the term "health care clinician" and proposed to replace it with the more appropriate term "health care provider". We proposed this change would apply beginning with the performance period in 2017.

*Send a Summary of Care Measure:* For at least one transition of care or referral, the MIPS eligible clinician that transitions or refers their patient to another setting of care or health care clinician (1) creates a summary of care record using CEHRT; and (2) electronically exchanges the summary of care record.

*Proposed Change to the Send a Summary of Care Measure:* For at least one transition of care or referral, the MIPS eligible clinician that transitions or refers their patient to another setting of care or health care provider (1) creates a summary of care record using CEHRT; and (2) electronically exchanges the summary of care record.

We inadvertently used the term "health care clinician" and proposed to replace it with the more appropriate term "health care provider". We proposed this change would apply beginning with the 2017 performance period.

*Syndromic Surveillance Reporting Measure:* The MIPS eligible clinician is

in active engagement with a public health agency to submit syndromic surveillance data from a non-urgent care ambulatory setting where the jurisdiction accepts syndromic data from such settings and the standards are clearly defined.

*Proposed change to the Syndromic Surveillance Reporting Measure:* The MIPS eligible clinician is in active engagement with a public health agency to submit syndromic surveillance data.

We proposed this change because we inadvertently finalized the measure description that we had proposed for Stage 3 of the EHR Incentive Program (80 FR 62866) and not the measure description that we finalized (80 FR 62970). We are modifying the proposed change so that it does align with the measure description finalized for Stage 3 by adding the phrase "from an urgent care setting" to the end of the measure description.

In the proposed rule, we noted that we have split the Specialized Registry Reporting Measure that we adopted under the 2017 Advancing Care Information Transition Objectives and Measures into two separate measures, Public Health Registry Reporting and Clinical Data Registry Reporting, to better define the registries available for reporting. We proposed to allow MIPS eligible clinicians and groups to continue to count active engagement in electronic public health reporting with specialized registries. We proposed to allow these registries to be counted for purposes of reporting the Public Health Registry Reporting Measure or the Clinical Data Registry Reporting Measure beginning with the 2018 performance period. A MIPS eligible clinician may count a specialized registry if the MIPS eligible clinician achieved the phase of active engagement as described under "active engagement option 3: production" in the 2015 EHR Incentive Programs final rule with comment period (80 FR 62862 through 62865), meaning the clinician has completed testing and validation of the electronic submission and is electronically submitting production data to the public health agency or clinical data registry.

### (b) 2017 and 2018 Advancing Care Information Transition Objectives and Measures Specifications

In the CY 2017 Quality Payment Program final rule (81 FR 77229 through 77237), we finalized the 2017 Advancing Care Information Transition Objectives and Measures for MIPS eligible clinicians using EHR technology certified to the 2014 Edition. Because we proposed in section II.C.6.f.(4) of the

proposed rule to continue to allow the use of EHR technology certified to the 2014 Edition in the 2018 performance period, we also proposed to allow MIPS eligible clinicians to report the 2017 Advancing Care Information Transition Objectives and Measures in 2018. We proposed to make several modifications identified and described below to the 2017 Advancing Care Information Transition Objectives and Measures for the advancing care information performance category of MIPS for the 2017 and 2018 performance periods.

*Objective: Patient Electronic Access.*

*Objective:* The MIPS eligible clinician provides patients (or patient-authorized representative) with timely electronic access to their health information and patient-specific education.

*Proposed Change to the Objective.*

We proposed to modify this objective beginning with the 2017 performance period by removing the word “electronic” from the description of timely access as it was erroneously included in the final rule (81 FR 77228).

*Objective: Patient-Specific Education.*

*Objective:* The MIPS eligible clinician provides patients (or patient authorized representative) with timely electronic access to their health information and patient-specific education.

*Proposed Change to the Objective:*

The MIPS eligible clinician uses clinically relevant information from CEHRT to identify patient-specific educational resources and provide those resources to the patient. We inadvertently finalized the description of the Patient Electronic Access Objective for the Patient-Specific Education Objective, so that the Patient-Specific Education Objective had the wrong description. We proposed to correct this error by adopting the description of the Patient-Specific Education Objective adopted under modified Stage 2 in the 2015 EHR Incentive Programs final rule (80 FR 62809 and 80 FR 62815). We proposed this change would apply beginning with the performance period in 2017.

*Objective: Health Information Exchange.*

*Objective:* The MIPS eligible clinician provides a summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other health care clinicians into their EHR using the functions of CEHRT.

*Proposed change to the Objective:* The MIPS eligible clinician provides a

summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other health care providers into their EHR using the functions of CEHRT.

We inadvertently used the term “health care clinician” and proposed to replace it with the more appropriate term “health care provider”. We proposed this change would apply beginning with the performance period in 2017.

*Health Information Exchange Measure:* The MIPS eligible clinician that transitions or refers their patient to another setting of care or health care clinician (1) uses CEHRT to create a summary of care record; and (2) electronically transmits such summary to a receiving health care clinician for at least one transition of care or referral.

*Proposed change to the measure:* The MIPS eligible clinician that transitions or refers their patient to another setting of care or health care provider (1) uses CEHRT to create a summary of care record; and (2) electronically transmits such summary to a receiving health care provider for at least one transition of care or referral.

We inadvertently used the term “health care clinician” and proposed to replace it with the more appropriate term “health care provider”. We proposed this change would apply beginning with the performance period in 2017.

*Denominator:* Number of transitions of care and referrals during the performance period for which the EP was the transferring or referring health care clinician.

*Proposed change to the denominator:* Number of transitions of care and referrals during the performance period for which the MIPS eligible clinician was the transferring or referring health care provider. This change reflects the change proposed to the Health Information Exchange Measure replacing “health care clinician” with “health care provider.” We also inadvertently referred to the EP in the description and are replacing “EP” with “MIPS eligible clinician.” We proposed this change would apply beginning with the performance period in 2017.

*Objective: Medication Reconciliation.*

*Proposed Objective:* We proposed to add a description of the Medication Reconciliation Objective beginning with the CY 2017 performance period, which we inadvertently omitted from the CY

2017 Quality Payment Program proposed and final rules, as follows:

*Proposed Objective:* The MIPS eligible clinician who receives a patient from another setting of care or provider of care or believes an encounter is relevant performs medication reconciliation. This description aligns with the objective adopted for Modified Stage 2 at 80 FR 62811.

*Medication Reconciliation Measure:* The MIPS eligible clinician performs medication reconciliation for at least one transition of care in which the patient is transitioned into the care of the MIPS eligible clinician.

- *Numerator:* The number of transitions of care or referrals in the denominator where the following three clinical information reconciliations were performed: Medication list, Medication allergy list, and current problem list.

*Proposed Modification to the Numerator.*

*Proposed Numerator:* The number of transitions of care or referrals in the denominator where medication reconciliation was performed.

We proposed to modify the numerator by removing medication list, medication allergy list, and current problem list. These three criteria were adopted for Stage 3 (80 FR 62862) but not for Modified Stage 2 (80 FR 62811). We proposed this change would apply beginning with the performance period in 2017.

The following is a summary of the public comments received on the “Advancing Care Information Objectives and Measures” and the “2017 and 2018 Advancing Care Information Transition Objectives and Measures” proposals and our responses:

*Comment:* Several commenters were confused by our proposal related to specialized registries and active engagement option 3, production, believing that the only way to receive credit for the Public Health Agency and Clinical Data Registry Reporting Objective is through the production option.

*Response:* MIPS eligible clinicians may fulfill the Public Health Agency and Clinical Data Registry Reporting Objective or the Public Health Reporting Objective through any of the active engagement options as described at 80 FR 62818–62819: completed registration to submit data; testing and validation; or production. Our proposal pertained to MIPS eligible clinicians who choose to use option 3, production, for specialized registries.

*Comment:* Several commenters supported the proposed definition of timely for the Patient Electronic Access

Measure. One stated that the proposed definition supports practice workflows where patient information may become available prior to a weekend or holiday. This proposal would allow the necessary time for an eligible clinician to review and ensure accurate information is made available to patients.

*Response:* We appreciate the support for our proposal. We sought to give MIPS eligible clinicians sufficient time to make information available. We specified 4 business days so as not to include holidays and weekends.

*Comment:* In the interest of reducing administrative burden, a commenter encouraged the alignment of the definition of “timely” for the “Provide Patient Access Measure” in the Medicaid EHR Incentive Program and the Quality Payment Program. For both programs, they supported defining “timely” as follows: Providing access to health information within 4 business days of the information being available to the MIPS eligible clinician, as opposed to the 48 hour standard in Stage 3 of the Medicaid EHR Incentive Program.

*Response:* We understand that there are two different definitions of timely. We proposed 4 business days for MIPS because we believe it provides an adequate timeframe for a new program and the clinicians who may not have previously participated in the Medicare and Medicaid EHR Incentive Programs. We may consider aligning the Medicaid EHR Incentive Program definition in the future.

*Comment:* One commenter disagreed with our proposal related to the Patient Electronic Access Objective and suggested that the definition of timely access under the Health Insurance

Portability and Accountability Act (HIPAA) is appropriate. The commenter stated that under the HIPAA Privacy Rule, a covered entity must act on an individual’s request for access no later than 30 calendar days after receipt of the request.

*Response:* We disagree and believe that 4 business days will provide MIPS eligible clinicians with an adequate amount of time to provide their patients with electronic access to their health information. We further note that the HIPAA timeframe relates to an individual’s request for their information and the Patient Electronic Access Measure relates to information being made available regardless of whether a request is made.

*Comment:* One commenter cautioned CMS of the unintended consequences related to the proposed definition of providing “timely” access for patients or their authorized representatives. The commenter stated that the proposed definition of timely (4 business days) may result in the inability of clinicians to achieve the base score, and thus, any advancing care information performance category score.

*Response:* While we appreciate this concern, we believe that by establishing the definition of timely as 4 business days MIPS eligible clinicians should have a sufficient amount of time to fulfill the Patient Electronic Access Measure. We also note that you only need to provide timely access for one patient to achieve the base score for the advancing care information performance category.

*Comment:* Most commenters supported the proposed modifications to the Advancing Care Information Objectives and Measures as reasonable and appropriate. Another commenter

stated that until an overhaul of the advancing care information performance category is undertaken, they support the modifications as proposed and urged CMS to finalize them as described.

*Response:* We thank commenters for their support of the proposed modifications and agree that these modifications should be finalized.

*Comment:* Some commenters suggested that we clarify that MIPS eligible clinicians may report either the Advancing Care Information Objectives and Measures or the Advancing Care Information Transition Objectives and Measures using 2015 Edition or 2014 Edition CEHRT.

*Response:* For the 2018 performance period, MIPS eligible clinicians will have the option to report the Advancing Care Information Transition Objectives and Measures using 2014 Edition CEHRT, 2015 Edition CEHRT, or a combination of 2014 and 2015 Edition CEHRT, as long as the EHR technology they possess can support the objectives and measures to which they plan to attest. Similarly, MIPS eligible clinicians will have the option to attest to the Advancing Care Information Objectives and Measures using 2015 Edition CEHRT or a combination of 2014 and 2015 Edition CEHRT, as long as their EHR technology can support the objectives and measures to which they plan to attest.

*Final Action:* After considering the public comments that we received, we are finalizing our proposals as proposed with one modification to the description of the *Syndromic Surveillance Reporting Measure*: The MIPS eligible clinician is in active engagement with a public health agency to submit syndromic surveillance data from an urgent care setting.

(c) Exclusions

We proposed to add exclusions to the measures associated with the Health Information Exchange and Electronic Prescribing Objectives required for the base score, as described below. We proposed these exclusions would apply beginning with the CY 2017 performance period.

Proposed Exclusion for the E-Prescribing Objective and Measure Advancing Care Information Objective and Measure

*Objective:* Electronic Prescribing.  
*Objective:* Generate and transmit permissible prescriptions electronically.  
*E-Prescribing Measure:* At least one permissible prescription written by the MIPS eligible clinician is queried for a drug formulary and transmitted electronically using CEHRT.

*Proposed Exclusion:* Any MIPS eligible clinician who writes fewer than 100 permissible prescriptions during the performance period.

2017 and 2018 Advancing Care Information Transition Objective and Measure

*Objective:* Electronic Prescribing.  
*Objective:* MIPS eligible clinicians must generate and transmit permissible prescriptions electronically.  
*E-Prescribing Measure:* At least one permissible prescription written by the MIPS eligible clinician is queried for a drug formulary and transmitted electronically using CEHRT.

*Proposed Exclusion:* Any MIPS eligible clinician who writes fewer than 100 permissible prescriptions during the performance period.

Proposed Exclusion for the Health Information Exchange Objective and Measures Advancing Care Information Objective and Measures

*Objective:* Health Information Exchange.  
*Objective:* The MIPS eligible clinician provides a summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition

or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other health care clinician into their EHR using the functions of CEHRT.

*Send a Summary of Care Measure:* For at least one transition of care or referral, the MIPS eligible clinician that transitions or refers their patient to another setting of care or health care clinician (1) creates a summary of care record using CEHRT; and (2) electronically exchanges the summary of care record.

We note that we finalized our proposal to replace “health care clinician” with “health care provider” in the objective and measure.

*Proposed Exclusion:* Any MIPS eligible clinician who transfers a patient to another setting or refers a patient is fewer than 100 times during the performance period.

*Request/Accept Summary of Care Measure:* For at least one transition of care or referral received or patient encounter in which the MIPS eligible clinician has never before encountered the patient, the MIPS eligible clinician receives or retrieves and incorporates into the patient’s record an electronic summary of care document.

*Proposed Exclusion:* Any MIPS eligible clinician who receives transitions of care or referrals or has patient encounters in which the MIPS eligible clinician has never before encountered the patient fewer than 100 times during the performance period.

2017 and 2018 Advancing Care Information Transition Objective and Measures

*Objective:* Health Information Exchange.  
*Objective:* The MIPS eligible clinician provides a summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other health care

clinicians into their EHR using the functions of CEHRT.

*Health Information Exchange Measure:* The MIPS eligible clinician that transitions or refers their patient to another setting of care or health care clinician (1) uses CEHRT to create a summary of care record; and (2) electronically transmits such summary to a receiving health care clinician for at least one transition of care or referral.

We note that we finalized our proposal to replace “health care clinician” with “health care provider” in the objective and measure.

*Proposed Exclusion:* Any MIPS eligible clinician who transfers a patient to another setting or refers a patient fewer than 100 times during the performance period.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Commenters overwhelmingly supported the addition of exclusions for the Electronic Prescribing, Health Information Exchange, Send a Summary of Care, and Request/Accept Summary of Care Measures.

*Response:* We appreciate the support of the proposed modifications, and for the reasons discussed in the proposed rule, agree that it is appropriate to establish these exclusions.

*Comment:* One commenter supported establishing exclusions but recommended that the thresholds be set at fewer than 200 instead of fewer than 100 as proposed.

*Response:* We disagree. We proposed the exclusions because these measures may be outside a MIPS eligible clinician’s licensing authority or outside their scope of practice. By claiming the exclusion, the MIPS eligible clinician is indicating that the measure is inapplicable to them, because they have few patients or insufficient number of actions that would allow calculation of the measure. We proposed the fewer than 100 threshold to align with the exclusions for these measures that were established for the Medicare and Medicaid EHR Incentive Programs. We believe that the threshold of fewer than 100 will enable MIPS eligible clinicians

who do not prescribe, or transfer or refer patients or rarely do so to claim the exclusion(s) and still fulfill the base score of the advancing care information performance category. We believe a threshold of 200 is too high, and believe that a MIPS eligible clinician who is prescribing, transferring or referring more than 100 times during the performance period is taking the actions described in the measures often enough to be able to report on the measures for at least one patient to fulfil the base score requirement.

*Comment:* One commenter was pleased to see CMS's intent to establish an exclusion for the e-Prescribing Measure. They stated that as doctors of chiropractic are statutorily prohibited in most states from prescribing medication, this measure created a great deal of concern over the last year that doctors of chiropractic would be adversely affected by not reporting this measure.

*Response:* We did not intend to disadvantage chiropractors or other types of clinicians who may be prohibited by law from prescribing medication. We are establishing this exclusion for the e-Prescribing Measure beginning with the 2017 performance period.

*Comment:* One commenter requested that if a MIPS eligible clinician claims an exclusion for the base score for the Health Information Exchange Measure, they should also be able to claim an exclusion for the performance score for this measure so their total advancing care information points are not adversely affected.

*Response:* We disagree. MIPS eligible clinicians have many options to earn performance score points. If a measure is not applicable to a clinician, they have the flexibility to select other performance score measures on which to report.

*Comment:* One commenter asked if these exclusions are available if reporting as a group.

*Response:* Yes, MIPS eligible clinicians may claim the exclusion if they are reporting as a group. In the CY 2017 Quality Payment Program final rule (81 FR 77215), we stated that the group will need to aggregate data for all the individual MIPS eligible clinicians within the group for whom they have data in CEHRT, and if an individual MIPS eligible clinician meets the criteria to exclude a measure, their data can be excluded from the calculation of that particular measure only.

*Comment:* One commenter questioned whether clinicians who qualify to exclude these measures will be allowed to report on the measures. The commenter encouraged CMS to consider

allowing these clinicians to exclude or to attest to the measures as they stated that both measures are key objectives in the advancing care information performance category and also stated that it will be beneficial to encourage clinicians to attest to both measures, even if they qualify to exclude them.

*Response:* MIPS eligible clinicians may claim these exclusions if they qualify, although they do not have to claim the exclusions and may report on the measures if they choose to do so.

*Comment:* One commenter requested that for the Request/Accept a Summary of Care Measure, that the exclusion be more closely tied to the logic for the denominator of that measure, so that the exclusion is specified in terms of new patients for whom a summary of care is available.

*Response:* While we understand this concern, we disagree that the exclusion should be limited to new patients. While we believe the exclusion should include instances where the MIPS eligible clinician has never before encountered the patient, we do not want to limit it to just those instances.

*Final Action:* After consideration of the public comments, we are finalizing these proposals as proposed. We note that the exclusions apply beginning with the 2017 performance period.

## (7) Additional Considerations

### (a) 21st Century Cures Act

As we noted in the CY 2017 Quality Payment Program final rule (81 FR 77238), section 101(b)(1)(A) of the MACRA amended section 1848(a)(7)(A) of the Act to sunset the meaningful use payment adjustment at the end of CY 2018. Section 1848(a)(7) of the Act includes certain statutory exceptions to the meaningful use payment adjustment under section 1848(a)(7)(A) of the Act. Specifically, section 1848(a)(7)(D) of the Act exempts hospital-based EPs from the application of the payment adjustment under section 1848(a)(7)(A) of the Act. In addition, section 1848(a)(7)(B) of the Act provides that the Secretary may, on a case-by-case basis, exempt an EP from the application of the payment adjustment under section 1848(a)(7)(A) of the Act if the Secretary determines, subject to annual renewal, that compliance with the requirement for being a meaningful EHR user would result in a significant hardship, such as in the case of an EP who practices in a rural area without sufficient internet access. The last sentence of section 1848(a)(7)(B) of the Act also provides that in no case may an exemption be granted under subparagraph (B) for more than 5 years.

The MACRA did not maintain these statutory exceptions for the advancing care information performance category of the MIPS. Thus, we had previously stated that the provisions under sections 1848(a)(7)(B) and (D) of the Act are limited to the meaningful use payment adjustment under section 1848(a)(7)(A) of the Act and do not apply in the context of the MIPS.

Following the publication of the CY 2017 Quality Payment Program final rule, the 21st Century Cures Act (Pub. L. 114–255) was enacted on December 13, 2016. Section 4002(b)(1)(B) of the 21st Century Cures Act amended section 1848(o)(2)(D) of the Act to state that the provisions of sections 1848(a)(7)(B) and (D) of the Act shall apply to assessments of MIPS eligible clinicians under section 1848(q) of the Act with respect to the performance category described in subsection (q)(2)(A)(iv) (the advancing care information performance category) in an appropriate manner which may be similar to the manner in which such provisions apply with respect to the meaningful use payment adjustment made under section 1848(a)(7)(A) of the Act. As a result of this legislative change, we believe that the general exceptions described under sections 1848(a)(7)(B) and (D) of the Act are applicable under the MIPS program. We included the proposals described below to implement these provisions as applied to assessments of MIPS eligible clinicians under section 1848(q) of the Act with respect to the advancing care information performance category.

### (i) MIPS Eligible Clinicians Facing a Significant Hardship

In the CY 2017 Quality Payment Program final rule (81 FR 77240 through 77243), we recognized that there may not be sufficient measures applicable and available under the advancing care information performance category to MIPS eligible clinicians facing a significant hardship, such as those who lack sufficient internet connectivity, face extreme and uncontrollable circumstances, lack control over the availability of CEHRT, or do not have face-to-face interactions with patients. We relied on section 1848(q)(5)(F) of the Act to establish a final policy to assign a zero percent weighting to the advancing care information performance category in the final score if there are not sufficient measures and activities applicable and available to MIPS eligible clinicians within the categories of significant hardship noted above (81 FR 77243). Additionally, under the final policy (81 FR 77243), we did not impose a limitation on the total number of MIPS payment years for which the advancing

care information performance category could be weighted at zero percent, in contrast with the 5-year limitation on significant hardship exceptions under the Medicare EHR Incentive Program as required by section 1848(a)(7)(B) of the Act.

We did not propose substantive changes to this policy; however, as a result of the changes in the law made by the 21st Century Cures Act discussed above, we will not rely on section 1848(q)(5)(F) of the Act and instead proposed to use the authority in the last sentence of section 1848(o)(2)(D) of the Act for significant hardship exceptions under the advancing care information performance category under MIPS. Section 1848(o)(2)(D) of the Act, as amended by section 4002(b)(1)(B) of the 21st Century Cures Act, states in part that the provisions of section 1848(a)(7)(B) of the Act shall apply to assessments of MIPS eligible clinicians with respect to the advancing care information performance category in an appropriate manner which may be similar to the manner in which such provisions apply with respect to the payment adjustment made under section 1848(a)(7)(A) of the Act. We would assign a zero percent weighting to the advancing care information performance category in the MIPS final score for a MIPS payment year for MIPS eligible clinicians who successfully demonstrate a significant hardship through the application process. We would use the same categories of significant hardship and application process as established in the CY 2017 Quality Payment Program final rule (81 FR 77240–77243). We would automatically reweight the advancing care information performance category to zero percent for a MIPS eligible clinician who lacks face-to-face patient interaction and is classified as a non-patient facing MIPS eligible clinician without requiring an application. If a MIPS eligible clinician submits an application for a significant hardship exception or is classified as a non-patient facing MIPS eligible clinician, but also reports on the measures specified for the advancing care information performance category, they would be scored on the advancing care information performance category like all other MIPS eligible clinicians, and the category would be given the weighting prescribed by section 1848(q)(5)(E) of the Act regardless of the MIPS eligible clinician's score.

As required under section 1848(a)(7)(B) of the Act, eligible professionals were not granted significant hardship exceptions for the payment adjustments under the

Medicare EHR Incentive Program for more than 5 years. We proposed not to apply the 5-year limitation under section 1848(a)(7)(B) of the Act to significant hardship exceptions for the advancing care information performance category under MIPS.

We solicited comments on the proposed use of the authority provided in the 21st Century Cures Act in section 1848(o)(2)(D) of the Act as it relates to application of significant hardship exceptions under MIPS and the proposal not to apply a 5-year limit to such exceptions.

The following is a summary of the public comments received on these proposals and our responses:

*Comment:* Many commenters supported our proposal not to apply the 5-year limit for significant hardship exceptions. Some commenters stated that the 5-year limit was arbitrary and should be eliminated. Other commenters stated that the issue causing the hardship may not be rectified within a 5-year period, and thus, could create undue burdens on the clinicians in the future. Assigning a zero percent weighting to the advancing care information performance category for those who successfully demonstrate a significant hardship through the application process would provide significant relief.

*Response:* We thank commenters for their support and agree it is possible a clinician could experience a hardship for more than 5 years.

*Comment:* One commenter suggested that under the EHR Incentive Program, a significant hardship exception would apply even if a health care provider attested to meaningful use. They requested that we not penalize eligible clinicians who choose to submit data, and to apply the exception if they qualify.

*Response:* We disagree. Under the EHR Incentive Program, if a health care provider submits a request for or is otherwise granted a significant hardship exception, and also successfully attests to meaningful use, we would consider that provider to be a meaningful EHR user based on its attestation and thus would not apply the exception. Under MIPS, we continue to believe that this approach is warranted. If a MIPS eligible clinician chooses to submit data for the advancing care information performance category, they will be scored. As we explained in the CY 2017 Quality Payment Program final rule (81 FR 77241), we believe there may not be sufficient advancing care information measures applicable and available to MIPS eligible clinicians who experience a significant hardship, such as

insufficient internet connectivity, extreme and uncontrollable circumstances, lack of control over the availability of CEHRT, and lack of face-to-face patient interaction. We believe that the submission of data indicates that there are sufficient measures applicable and available for the MIPS eligible clinician, and therefore, the significant hardship exception is not necessary.

*Comment:* One commenter recommended that CMS outline more specific criteria for hardship exceptions because allowing too many exceptions could hinder adoption of the changes required to create a more efficient, value focused health care system. They suggested that hardship exceptions only be available for unusual and unique clinician circumstances.

*Response:* While we understand the concern expressed in this comment, we decline to adopt narrower criteria for significant hardship exceptions at this time. We understand that the transition to MIPS has created challenges for MIPS eligible clinicians, and we believe the significant hardship exception policy we proposed would encourage more clinicians to participate successfully in the other performance categories of MIPS.

*Comment:* One commenter questioned the proposed requirement to reapply for a hardship exception on an annual basis and recommended that exceptions should be granted for 2 years.

*Response:* We disagree and believe it is appropriate to limit a hardship exception to 1 year. We want to encourage MIPS eligible clinicians to adopt and use CEHRT and allowing multi-year exceptions would not accomplish that goal. We believe that granting hardship exceptions for 1 year at a time will enable clinicians to work harder to successfully participate in the advancing care information performance category while knowing that there may be the possibility of receiving a significant hardship exception if it is needed and they qualify. Furthermore we have created a streamlined mechanism for the submission of Quality Payment Program Hardship Exception Applications. Applications that are submitted are reviewed on a rolling basis.

*Comment:* One commenter expressed concern about occupational therapists participating in MIPS as they were never eligible for the EHR Incentive Program. They stated that many clinicians in solo or very small therapy practices cannot afford the expense of purchasing an EHR documentation system. For this reason, the commenter requested that in CY 2018 and future

years CMS grant them exceptions. Further, they recommended that CMS dedicate staff to engage therapists in an effort to provide consistent and targeted education regarding CEHRT requirements, applicable electronic measures, and other new criteria so they may be successful under the advancing care information performance category.

*Response:* We appreciate this comment and point out that under section 1848(q)(1)(C)(i)(II) of the Act, additional eligible clinicians such as occupational therapists could be considered MIPS eligible clinicians starting in the third year of the program. If we decide to add additional clinician types to the definition of a MIPS eligible clinician, it would be proposed and finalized through notice and comment rulemaking. We would support these clinicians and help them to become successful program participants.

*Comment:* One commenter expressed concern over the proposal to not apply the 5-year limit to significant hardship exceptions. They stated that although it is important to acknowledge circumstances outside of a clinician's control, it does not seem necessary to grant these hardship exceptions in perpetuity.

*Response:* While we appreciate this comment, we disagree. We believe that a variety of circumstances may arise, and the application of the 5-year limit could unfairly disadvantage MIPS eligible clinicians whose circumstances warrant a hardship exception. For example, a MIPS eligible clinician may lack control over the availability of CEHRT and apply annually for and receive a hardship exception for 5 years. If their practice is later significantly affected by a natural disaster, such as a hurricane, they would be unable to receive a hardship exception due to the 5-year limit, even though they would otherwise qualify for the exception.

*Comment:* Commenters recommended adding additional hardship exception categories such as those eligible for Social Security benefits, those who have changed specialty taxonomy, those who practice in Tribal health care facilities and those who are solo practitioners.

*Response:* While we appreciate the suggestions, we are declining to adopt these suggestions at this time. We will monitor performance on the advancing care information performance category to determine if additional hardship exception categories are appropriate. As we have previously stated, we do not believe that it is appropriate to reweight this category solely on the basis of a MIPS eligible clinicians' age or Social Security status, and believe that while other factors such as the lack of access

to CEHRT or unforeseen environmental circumstances may constitute a significant hardship, the age of an MIPS eligible clinician alone or the preference to not obtain CEHRT does not. We note that solo practitioners would be included in the small practice significant hardship that we proposed at 82 FR 30076 so a separate hardship exception category for them is unnecessary.

*Final Action:* After consideration of the comments we received, we are finalizing our policy as proposed.

(ii) Significant Hardship Exception for MIPS Eligible Clinicians in Small Practices

Section 1848(q)(2)(B)(iii) of the Act requires the Secretary to give consideration to the circumstances of small practices (consisting of 15 or fewer professionals) and practices located in rural areas and geographic HPSAs in establishing improvement activities under MIPS. In the CY 2017 Quality Payment Program final rule (81 FR 77187 through 77188), we finalized that for MIPS eligible clinicians and groups that are in small practices or located in rural areas, or geographic health professional shortage areas (HPSAs), to achieve full credit under the improvement activities category, one high-weighted or two medium-weighted improvement activities are required.

While there is no corresponding statutory provision for the advancing care information performance category, we believe that special consideration should also be available for MIPS eligible clinicians in small practices. We proposed a significant hardship exception for the advancing care information performance category for MIPS eligible clinicians who are in small practices, under the authority in section 1848(o)(2)(D) of the Act, as amended by section 4002(b)(1)(B) of the 21st Century Cures Act (see discussion of the statutory authority for significant hardship exceptions in section II.C.6.f.(7)(ii) of the proposed rule). We proposed that this hardship exception would be available to MIPS eligible clinicians in small practices as defined under § 414.1305. We proposed in section II.C.1.e. of the proposed rule, that CMS would make eligibility determinations regarding the size of small practices for performance periods occurring in 2018 and future years. We proposed to reweight the advancing care information performance category to zero percent of the MIPS final score for MIPS eligible clinicians who qualify for this hardship exception. We proposed this exception would be available beginning with the 2018 performance
